## DEDICATION AND ACKNOWLEDGMENTS

**This book is dedicated to Dr. John Harvey Kellogg and to all subsequent Seventh-day Adventist pioneers in the development of meat alternatives.**

Part of the enjoyment of writing a book lies in meeting people from around the world who share a common interest, and in learning from them what is often the knowledge or skills acquired during a lifetime of devoted research or practice. We wish to give deepest thanks...

Of the many libraries and librarians who have been of great help to our research over the years, several stand out:

University of California at Berkeley: John Creaser, Lois Farrell, Norma Kobzina, Ingrid Radkey.

Northern Regional Library Facility (NRLF), Richmond, California: Martha Lucero, Jutta Wiemhoff, Scott Miller, Virginia Moon, Kay Loughman.

Stanford University: Molly Molloy, who has been of special help on Slavic-language documents.

National Agricultural Library: Susan Chapman, Kay Derr, Carol Ditzler, John Forbes, Winnifred Gelenter, Henry Gilbert, Kim Hicks, Ellen Knollman, Patricia Krug, Sarah Lee, Veronica Lefebvre, Julie Mangin, Ellen Mann, Josephine McDowell, Wayne Olson, Mike Thompson, Tanner Wray.

Library of Congress: Ronald Jackson, Ronald Roache.

Lane Medical Library at Stanford University.

Contra Costa County Central Library and Lafayette Library: Carole Barksdale, Kristen Wick, Barbara Furgason, Sherry Cartmill, Linda Barbero.

Harvard University's Five Botanical Libraries (especially Arnold Arboretum Library): Jill Gelmers Thomas.

French translation: Martine Liguori of Lafayette, California, for ongoing, generous, and outstanding help since the early 1980s. Dutch translation: Sjon Welters. German translation Philip Isenberg,

Japanese translation and maps: Akiko Aoyagi Shurtleff.

Loma Linda University, Del E. Webb Memorial Library (Seventh-day Adventist): Janice Little, Trish Chapman.

We would also like to thank our co-workers and friends at Soyinfo Center who, since 1984, have played a major role in collecting the documents, building the library, and producing the SoyaScan database from which this book is printed:

Irene Yen, Tony Jenkins, Sarah Chang, Laurie Wilmore, Alice Whealey, Simon Beaven, Elinor McCoy, Patricia McKelvey, Claire Wickens, Ron Perry, Walter Lin, Dana Scott, Jeremy Longinotti, John Edelen, Alex Lerman, Lydia Lam, Gretchen Muller, Joyce Mao, Luna Oxenberg, Joelle Bouchard, Justine Lam, Joey Shurtleff, Justin Hildebrandt, Michelle Chun, Olga Kochan, Loren Clive, Marina Li, Rowyn McDonald, Casey Brodsky, Hannah Woodman, Elizabeth Hawkins, Molly Howland, Jacqueline Tao, Lynn Hsu, Brooke Vittimberga, Tanya Kochan.

Special thanks to Tom and Linda Wolfe of Berwyn Park, Maryland. And to Lorenz K. Schaller of Ojai, California.

■ For outstanding help on this meat alternatives book we thank: Seth Tibbott, Harry W. Miller, Ed Bisalski, Sam Yoshimura, Mable H. Towery, Dorothy Mathews, Glen Blix, Charles D. Howes, George Chapman, Matthew Schmit, Valerie Robertson, Ted Nordquist, Allan Buller, Jay Highman, Richard S. Leiss, Ron McDermott, Evelyn Wiesner, Frank Poston, James Hagle, George Harding, Sr., and Warren Hartman.

■ Finally our deepest thanks to Tony Cooper of San Ramon, California, who has kept our computers up and running since Sept. 1983. Without Tony, this series of books on the Web would not have been possible.

This book, no doubt and alas, has its share of errors. These, of course, are solely the responsibility of William Shurtleff.

■ This bibliography and sourcebook was written with the hope that someone will write a detailed and well-documented history of this subject.

# INTRODUCTION

**What is a meat alternative?** It is a meatless food that has approximately the same taste, appearance, and texture of a related food made from meat, poultry, fish or shellfish. Its nutritional value is, in general, approximately equal to (or sometimes greater than) that of the related food, including essential vitamin B-12. Its name often indicates the meat to which it is an alternative, and the label must indicate clearly that it is a meatless product. For example Tofurky is a meatless alternative to turkey. FriChik (or White-Chik) is an alternative to fried chicken. Choplets is an alternative to pork chops. Likewise there are Soyloin Steaks, Veja-Links (or Vegelinks), Vegetable Skallops, Bac\*Os (or Stripples), Mock Chicken Tempeh Salad, a myriad of meatless burgers, etc.

Traditionally a main ingredient in meat alternatives has been tofu (including fried and dried frozen tofu), wheat gluten, tempeh, yuba, and nuts (especially peanuts). Yet while these foods have been used for centuries **to make** meat alternatives, the Soyinfo Center does not include them in our definition of meat alternatives.

More recently, soy protein isolates, concentrates, and modern textured soy protein products (such as spun soy protein fibers, TVP®, textured soy protein concentrates, etc.) have been added to the mix. Yet while these ingredients are increasingly used **to make** meat alternatives, we do not consider them to be meat alternatives. In the 1960s and 1970s they were often called “meat analogs/analogues.”

Meat alternatives serve many useful purposes:

- Most people who become vegetarians do so for reasons of health, protection of animals (not killing or exploiting them), and/or concern for the environment. They often keep their desire for the taste and texture of meat – at least for a while. Meat alternatives may make it easier for them to make the transition to (or to maintain) this new diet and lifestyle.
- Meat alternatives make it much easier for meat eaters to reduce or eliminate meat consumption – as, for example, when that is suggested by a cardiologist after (or just before) heart surgery. Many heavy consumers of meat cannot imagine life without it.
- They serve as an occasional “comfort food” for long-time vegetarians.
- A meatless turkey (such as Tofurky) makes it easier for vegetarians to not “stand out” at Thanksgiving.

## Brief Chronology of Meat Alternatives.

**965** – The earliest known reference to tofu (worldwide) appears in China in the Anecdotes, Simple and Exotic (*Qing*

*yilu*) by Tao Ku. It states: When Shi Ji was the magistrate of Qing Yang, he emphasized the virtue of frugality among the people, and discouraged the consumption of meat. Instead he promoted the sale of tofu. But rather than calling it *doufu* (the Chinese name for tofu), he referred to it as ‘mock lamb chops’ or ‘the vice mayor’s mutton.’ (Translated by H.T. Huang, PhD, July 2002).

**1301** – Meat alternatives are next mentioned, worldwide, in China. A recipe for mock lung sausage and one for mock eel (the main ingredient of each is *mien-chin*/wheat gluten) appears in the Essential Arts for Family Living (*Jujia biyong shilei quanji*), an encyclopedia.

**1587 Jan. 24** – Yuba, called *uba*, is first mentioned worldwide; it appears in a Japanese diary.

**1596** – Wheat gluten is again used in China to make meat alternatives in The Great Pharmacopoeia (*Bencao gangmu*) by Li Shizen. Yuba (*doufu-pi*) is first mentioned in China in the same work.

**1621-1627** – At a banquet in Ming-dynasty China, a group of Buddhist nuns is reassured: “This is vegetarian food made to look like meat. It has come from the temple, and there can’t possible be any harm in eating it.” (Egerton’s 1939 translation of The Golden Lotus {*Jin Ping Mei*}, by Xioa-Xiao Sheng).

**1790** – In the famous book Recipes from the Sui Garden (*Suiyuan shidan*) by Yuan Mei (Qing dynasty), Mock roast goose with yam wrapped in yuba (*doufu pi*) is mentioned. This is the earliest document seen that mentions a meat alternative resembling poultry.

**1815** – Tempeh is first mentioned worldwide in the *Serat Centini* from Indonesia.

**1852 Nov. 24** – Meat alternatives are first mentioned in the Western world. “We learn that a distinguished Grahamite has invented a vegetable sausage. It is composed mainly of red flannel and turnip tops, chopped fine. All heating spices are excluded. The vegetable sausage has long been a desideratum with the proprietors of vegetarian boarding-houses.” (*New Hampshire Patriot and State Gazette* {Concord}. “An important invention,” p. 3).

**1876** – The term “substitute for meat” is first used (in English) in the official catalogue for Japan’s International Exhibition at Philadelphia. Tofu and miso, “afford the necessary nitrogenous substances, and to a certain extent

form the substitute for meat;...” (p. 106).

**1886** – The earliest known document to mention a meat alternative in Japan is *A Japanese-English and English-Japanese Dictionary*. 3rd ed., by James C. Hepburn. The entry states: “Hiriōzu: A kind of food made of tōfu fried in oil.” Hiriōzu (now usually spelled *Hiryōzu*) refers to Kyoto-style deep-fried tofu treasure balls.

**1888** – The term “substitute for flesh meat” is first used (M. Holbrook, p. 117).

**1892 March 16** – The word “meatless” is first used. The *New York Times* (p. 2) runs an article titled “A Meatless Feast. Banquet of the New-York Vegetarian Society.”

**1893 Jan. 15** – The term “meat substitutes” first appears. In an article titled “Lectures on Cooking,” the *New York Times* (p. 17) states that Miss Maria Daniell of the Massachusetts Institute of Technology will give a course of lectures on cooking for the sick. It “will include instructions for the... cooking of meats and meat substitutes.”

**1895 Dec. 25** – Earliest known reference to a meatless turkey. In an article titled “No Meats on the Menu,” about the Chicago Vegetarian Society’s annual banquet, the *Chicago Daily Tribune* states that the twelve course menu included “vegetable turkey.”

**1895-1899** – Charles Dabney interests Dr. John Harvey Kellogg in developing substitutes for meat. Dr. Kellogg first described this in 1923 in a book titled *The Natural Diet of Man* (p. 334-36): “By the combination of nuts and cereals, a product very closely resembling meat may be prepared. The process for doing this was discovered by the writer many years ago in a series of experiments undertaken for the purpose by the request of Professor Dabney, then assistant professor in the Department of Agriculture. Recognizing that the increase of population would ultimately lead to an increase in the price of foodstuffs and particularly of meats, and possibly a scarcity of meats, Professor Dabney requested the writer to solve the problem by the production of a vegetable substitute for meat. The result of the experiment undertaken was Protose, a nut-cereal preparation, which to a considerable degree resembles meat in appearance, taste and odor, having a slight fibre like potted meat.”

**1896 July** – Nuttose, the first commercial meat alternative in the Western world, is launched by the Battle Creek Sanitarium Bakery, renamed the Sanitas Nut Food Co. by Nov. 1896. The brainchild of Dr. John Harvey Kellogg, it is the first of many Seventh-day Adventist meat alternatives and the world’s first canned meat alternative. Peanuts are the main ingredient. In Sept. 1896, Ella Kellogg, Dr. Kellogg’s

wife, publishes six recipes for its use in the popular magazine *Good Health* (Battle Creek, Michigan). In a Nov. 1896 advertisement, Nuttose is said to have “somewhat the appearance and flavor of cold roast mutton.” By Dec. 1896 Nuttose is being sold as a “health food” in Los Angeles and advertised in the *Los Angeles Times*.

**1896 July** – The term “substitute for flesh food” first appears. It is used to describe Nuttose in an article by Dr. J.H. Kellogg in *Good Health* magazine.

**1896 Sept.** – The word “analogue” is first used in connection with meat. Dr. John Harvey Kellogg writes in the *Modern Medicine and Bacteriological Review* (Battle Creek, p. 220-23): “Nuts are unquestionably the vegetable analogue of meat and other animal foods, not only containing all the food elements to be found in animal products, but in finer and more digestible form, more delicately flavored, and wholly free from deleterious elements which abound in meat...”

**1897 Jan. 1** – The term “vegetable meat” is first used. It appears in a New Zealand newspaper and refers to tofu.

**1899 June 3** – The term “vegetable substitute for meat” is first used in U.S. Patent 670,283 titled “Vegetable-food compound,” by Dr. J.H. Kellogg. The application was filed on this date; the patent was issued on 19 March 1901. “The object of my invention is to furnish a vegetable substitute for meat which shall possess equal or greater nutritive value in equal or more available form.”

The term “meat-like” (or “meat like”) first appears in the same patent. “By proper regulation of the temperature and proportions of the ingredients various meat-like flavors are developed, which give to the finished product very characteristic properties.”

**1899 June** – Protose, the 2nd commercial meat alternative in the Western world, is launched by the Sanitas Nut Food Co. Also the brainchild of Dr. John Harvey Kellogg, it too is canned.

**1899** – *Guide to Nut Cookery*, a vegan cookbook by Almeda Lambert, mentions many meat alternatives, including a recipe for meatless “peanut sausages.” This is the earliest document seen in the Western world that mentions a meatless sausage.

The chapter titled Nutmeato (p. 91-127) contains many nut-based recipes for meat alternatives. The main ingredient is usually nut butter. The mixture is usually sealed in a can and steamed for 3-5 hours. Recipes include: Mock Nutmeato roast, Nutmeato steak, Nutgrano No. 1-10, (No. 1 and No. 8 use 1 cup raw peanut butter), Nutmeatose No. 1-7 (p. 97-98; No. 1 uses 2 cups peanut butter), Roast goose, (with full-page photo), Turkey legs, Chicken legs, Roast turkey

(with photo), Nut lobster, Baked trout (with photo), Mock fish, baked, Sauce for baked fish (with photo), Mock turkey, Mock fish-balls, Vegetable nut roast, Mock salmon, Mock chicken croquettes, Mock fried oysters, Mock oyster patties, and Mock chip beef.

This is the earliest English-language document seen that mentions a meatless turkey, or that uses the terms “Turkey legs,” “Roast turkey,” “Mock turkey” or “Vegetable turkey” to refer to meatless turkey.

**1899** – *A Friend in the Kitchen*, by Mrs. Anna L. Colcord, a Seventh-day Adventist vegetarian cookbook, refers again and again to meat alternatives.

**1904** – Japanese deep-fried tofu burgers (*gammodoki*; English: *gammodoki*) are first mentioned in any language in a Japanese-French Dictionary by J.M. Lemaréchal; they are not mentioned in English until 1924.

**1911 April 20** – Li Yu-ying, owner of a tofu company near Paris, France applies for French Patent No. 428,718 titled *Charcuterie de soja* [Cold cuts and meatlike products from soy]. He describes how to make vegetal meat (*viande végétale*), products like those from a pork-butcher’s shop. Including fresh sausages (*les saucisses*), large dry sausages or salami, (*saucissons*), etc. – from tofu.

**1911 Dec.** – The first commercial meat alternative is made by the Seventh-day Adventist Nashville Sanitarium – Food Factory in Nashville, Tennessee. “Nutfoda is the great vegetable meat, pure, wholesome, delicious, a perfect meat substitute at 10, 15 and 25¢. for ½ lb., 1 lb and 2¼ lb. cans.”

Note: This organization is probably the same as that later known as Madison College; Madison was near Nashville, Tennessee.

**1916** – The term “meat free” (regardless of hyphenation) is first used by M. Helen Keith in *Scientific American*. Reviewing animal studies, she states: “The general conclusion to be drawn from the scientific evidence is, therefore, that the meat-free diet is not as safe as the diet containing meat.”

**1919** – The term “meat alternatives” is first used by Armour and Company (the meat company) in an ad in the *Baltimore Sun* during World I when there were meat shortages in the United States. “Armour’s oval label quality foods: Meat alternatives. Fish. Eggs. Cheese. Poultry. Peanut butter...”

**1922 March** – The first soy-based meat alternative is Soy Bean Meat, developed by Madison Foods in Madison (near Nashville), Tennessee. Thereafter the great majority of meat alternatives would use soy (or a combination of soy and wheat gluten) as their main ingredient.

**1923 March** – The word “meat like” (or “meatlike”) is used for the 2<sup>nd</sup> time to refer to a meat alternative by Piper & Morse in their classic *The Soybean* (p. 239). “Thousand folds (*Chien Chang Tofu*): This product is prepared by placing very thin layers of the bean curds on cloths, on top of one another, and subjecting them to considerable pressure and allowing them to dry for a short time. The layers of bean curd are then removed and rolled together like a jamroll... When allowed to mold for several days it is fried in sesame oil and has a meat like flavor.”

**1923 Sept.** – Jethro Kloss Health Food Co. in Brooke, Virginia, first announces that it makes commercial meat alternatives. “We manufacture a line of foods that most perfectly takes the place of meat, milk, eggs and butter. There are no animal products used in the manufacture of our foods.” The Kloss family are Seventh-day Adventists.

**1929 Nov.** – La Sierra Industries in La Sierra, California, owned and operated by T.A. Van Gundy and his family (Seventh-day Adventists) launch La Sierra Soy Gluten, their first meat alternative.

Note: In 1921 this company had launched La Sierra Smoein, an innovative, meatless, bacon-flavored smoked soy powder seasoning, probably made of roasted soy flour (*kinako*). Although it is a seasoning and does not fit our definition of a meat alternative, it is clearly a step in that direction.

**1930 Feb. 10** – The word “meatless” (regardless of hyphenation) is first used to describe a meat alternative by the *Guardian* (p. 7) in England. “Perhaps the meatless sausage or the fishless rissole have already begun to appear in our own teashops.”

Note: This is also the earliest document seen that uses the word “meatlike,” but only to refer to a “meatlike taste” – not to a meat alternative.

**1937 Oct.** – Soy-Burger is launched by Madison Foods of Tennessee. It is the earliest known meatless burger made in the USA. Renamed Zoyburger in 1939.

**1941 Oct.** – Choplets (resembling pork chops), are launched by Special Foods, a company owned by Seventh-day Adventist laymen (renamed Worthington Foods, Inc. in Dec. 1945) in Worthington, Ohio. It is their first of many successful meat alternatives.

**1943 Nov.** – The term “soy meats” first appears in *Soybean Digest* (p. 8). Lauxsoy Soy Meats are made by I.F. Laucks, Inc.

**1944 March 12** – The term “meatless meat” is first used by

Clementine Paddleford in the *Los Angeles Times* (p. F14). “Beanburger is a meatless meat.”

**1945 Feb.** – Choplet-Burger is launched by Special Foods of Worthington, Ohio. It is the 2<sup>nd</sup> earliest known meatless burger made in the USA.

**1946 June 30** – The term “meat alternates” is first used in the *Madison Survey* (published by a Seventh-day Adventist school in Madison, Tennessee). “Madison’s food manufacturing plant, utilizing vegetable protein as meat alternates, is an attractive phase of the industrial program of the college.”

**1947** – Robert Boyer, a young researcher inspired by Henry Ford and employed for many years by the Ford Motor Co., develops a textured edible soy protein fiber using a process similar to that for making textile fibers (Wilding 1970).

**1952 May 6** – Boyer applies for U.S. patent No. 2,682,466 which describes the preparation of textured meatless foods from spun vegetable protein; this started the spinning of soy protein filaments/fibers used to create an entirely new type of meat alternative. The patent was issued on 29 June 1954.

Earlier Boyer had developed a far-from-perfect synthetic wool for Ford. However the edible product resembled muscle fiber. Boyer’s new materials did not lend themselves to processing under high temperatures normally used in canning. This led to the manufacture of frozen meatless products.

The terms “synthetic meat,” “edible filaments,” “spinneret” and “tow” [of filaments] are first used in this patent.

**1953 Feb. 2** – The terms “imitation meat” and “imitation meat products” are first used in U.S. Patent No. 2,730,448, applied for by Robert Boyer and Harold Saewert. The patent is issued on 10 Jan. 1956.

**1954 May 14** – The terms “simulated meat” and “simulated meat products” are first used in U.S. Patent No. 2,813,025, applied for by Mortimer L. Anson and Morton Pader. The patent is issued on 12 Nov. 1957.

**1960** – Robert Boyer begins work as a full-time consultant for Ralston Purina Co. Starting that year, Ralston Purina begins its first research on edible soy protein isolates. In about September 1962 Boyer was named technical director of protein product sales in the soybean division of the Ralston Purina Co.; he worked for Ralston until his retirement in 1971.

**1962 July** – Worthington launches White Chik, Beeflike, Prosage, Stripples, and Holiday Roast. They are the earliest

meat alternatives containing Fibroprotein or Textured Edi-Pro (spun soy protein fibers), made by Ralston Purina Co., as a basic ingredient, and the earliest known frozen meat alternatives.

**1962 July** – The trade name “Soyameat” is first mentioned in the *Choplet Newsletter* (Worthington Foods). All of these products contain Fibroprotein (spun soy protein fibers) as a basic ingredient.

This is also the earliest document seen that mentions Fibroprotein.

**1965 Dec.** – Bac\*O’s (Meatless Fried Bacon Bits from Spun Soy Protein Fiber) are launched by General Mills of Minneapolis, Minnesota.

**1968** – *The Cooking of China*, by Emily Hahn (Time-Life Books) states that Buddhist monks and nuns in China are strict vegetarians; special foods that simulate meat have been developed for them. These include vegetarian “duck made from crisp bean-curd skin, colored and shaped to look like the bird’s flesh” and “chicken roll in *hoisin* sauce, the ‘chicken’ made of soft soybean curd” (p. 64, 67, 70).

Note: The term “bean-curd skin” refers to yuba (*doufu-pi* in pinyin).

**1960s and 1970s** – There is a big increase in the number of vegetarians in the United States and Europe. Some of these in the USA are called “hippies.”

Note: The word “hippy” was coined in about 1965.

**1974 early** – Miles Laboratories buys Worthington Foods and launches the new “Morningstar Farms” brand of frozen meat alternatives in mainstream supermarkets.

**1975 Dec.** – Meat alternatives made from yuba and shaped like their animal counterparts are first described in English in *The Book of Tofu* by Shurtleff and Aoyagi. “One of the obvious differences between the uses to which yuba is put in China as compared to Japan is the remarkable ingenuity and inventiveness employed by the Chinese in giving yuba the semblance of meat. Imagine walking by the display case of attractive restaurants or marketplace yuba shops and seeing perfect replicas of plucked hens, roosters, and ducks, light-brown fish (complete with fins, gills, eyes, and mouth), juicy hams, tripe, liver and rolled meats – all made from yuba (fig. 111). Rich red sausage links hang in rows and deep-fried drumsticks are handsomely arranged on a large platter – together with a life-sized pig’s head.

“Most of these imitation meat dishes are prepared by pressing fresh yuba into a hinged (wooden or aluminum) mold,” clamping the mold closed, then steaming it until the yuba’s shape is fixed.

“Served at *su-tsai* restaurants which specialize in

Buddhist vegetarian cookery, each has its own well-known name: Buddha's Chicken (*suchi*), Buddha's Fish (*suyu*, sushi), Buddha's Duck (*suya*), Vegetarian Tripe (*taoto*) or Liver (*sukan*); Molded Pig's Head (*tutao*), Molded Ham (*suhuo*), Sausage Links (*enchan*), Buddha's Drumsticks (*sutsai tsui*), Deep-fried Duck (*suya*).” A full-page illustration (p. 258) shows these products.

**1982 Oct. 15** – Worthington Foods Inc. is repurchased by a group of lay Seventh-day Adventist investors – many of them the previous owners.

**1985 Feb.** – Yves Tofu Wieners are launched by Yves Potvin of Yves Natural Foods (Vancouver, BC, Canada) – the first of the company's many meat alternatives.

**1995 Oct.** – Tofurky, an alternative to turkey at Thanksgiving and Christmas is launched by Seth Tibbott of Turtle Foods, Inc., Hood River, Oregon. It soon becomes the best known meat alternative in the United States.

**1996 Feb.** – “Worthington Foods controls about 58% of the meat alternative category nationally,” and it had sales of \$91 million in 1995, up 13% over 1994 (*Plain Dealer* {Cleveland, Ohio}, Feb. 25, p. 1-1, 3-1).

**1999 Oct. 26** – The U.S. Food and Drug Administration (FDA) authorizes a health claim stating that consumption of 6.25 grams of soy protein per serving, as a part of a healthy diet, low in saturated fats and cholesterol, may reduce the risk of heart disease by lowering cholesterol levels. This claim soon appears on the front of many products that meet these requirements. It leads to the creation of many new soyfood products (including meat alternatives) and generates major public interest in soyfoods.

**1999 Oct.** – Worthington Foods, Inc. is purchased by The Kellogg Co. (the world's leading maker of breakfast cereals, with yearly sales of \$6.8 billion) for about \$307 million (*Natural Foods Merchandiser*, Nov. p. 9). Meat alternatives hit the big time!

**1995-1999** circa – The product category “Meat Alternatives” is created at the inception of SPINS Product Library; later it was split into Frozen vs. Refrigerated Meat Alternatives (Leahy 2014, personal communication).

**2001 Jan.** – Kraft Foods Inc. purchases Boca Burger (founded in 1993). Last year American consumers spent about \$500 million on meat alternatives, about 75% of that on soy products. Boca Burger had revenues of \$40 million last year, about double the previous year (*Capital Times* {Madison, Wisconsin}, Jan. 18).

**2002 March 18** – Burger King is the first major U.S. fast food chain to put a veggie burger on its menu, at more than 8,000 outlets nationwide; soy is not an ingredient since allergies are a big concern (Abrahms 2002, p. 2). One smaller chain, Back Yard Burgers, with about 100 restaurants in 17 states, began offering Gardenburger meatless patties on its menu in about the year 2000 (*Soybean Digest*, April 2002, p. 31).

**2014** – Current status of meat alternatives in the USA. Total retail sales for the 12 months ending 1 Jan. 2014, both refrigerated and frozen, both Natural foods and mainstream supermarkets: \$620 million. Source: SPINS and AC Neilsen (IRI).

The leading brand is probably Morningstar Farms (owned by The Kellogg Co.).

Update on Tofurky:

Tofurky Company total sales in 2014: \$31 million.

Total Tofurky roasts sold in 2014 (projected): 360,000.

Total Tofurky roasts sold since 1995: 3.84 million.

## ABOUT THIS BOOK

This is the most comprehensive book ever published about the history of meat alternatives. It has been compiled, one record at a time over a period of 35 years, in an attempt to document the history of this ancient and interesting food. It is also the single most current and useful source of information on this subject.

This is one of more than 100 books compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyinfo Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features detailed information on:

- 76 different document types, both published and unpublished.
- 1977 published documents - extensively annotated bibliography. Every known publication on the subject in every language.
- 536 unpublished archival documents.
- 626 original Soyinfo Center interviews and overviews never before published, except perhaps in our books.
- 1424 commercial meat alternatives.

Thus, it is a powerful tool for understanding the development of this subject from its earliest beginnings to the present.

Each bibliographic record in this book contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English language publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given). For most books, we state if it is illustrated, whether or not it has an index, and the height in centimeters.

All of the graphics (labels, ads, leaflets, etc) displayed in this book are on file, organized by subject, chronologically, in the Soyinfo Center's Graphics Collection.

For commercial soy products (CSP), each record includes (if possible) the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as advertisements, articles, patents, etc.) are also given.

A complete subject/geographical index is also included.

## ABBREVIATIONS USED IN THIS BOOK

A&M = Agricultural and Mechanical	mm = millimeter(s)
Agric. = Agricultural or Agriculture	N. = North
Agric. Exp. Station = Agricultural Experiment Station	No. = number or North
ARS = Agricultural Research Service	Nov. = November
ASA = American Soybean Association	Oct. = October
Assoc. = Association, Associate	oz = ounce(s)
Asst. = Assistant	p. = page(s)
Aug. = August	photo(s) = photograph(s)
Ave. = Avenue	P.O. Box = Post Office Box
Bld. = Boulevard	Prof. = Professor
bu = bushel(s)	psi = pounds per square inch
ca. = about (circa)	R&D = Research and Development
cc = cubic centimeter(s)	Rd. = Road
Chap. = Chapter	Rev. = Revised
cm = centimeter(s)	RPM = revolutions per minute
Co. = company	S. = South
Corp. = Corporation	SANA = Soyfoods Association of North America
Dec. = December	Sept. = September
Dep. or Dept. = Department	St. = Street
Depts. = Departments	tonnes = metric tons
Div. = Division	trans. = translator(s)
Dr. = Drive	Univ. = University
E. = East	USB = United Soybean Board
ed. = edition or editor	USDA = United States Department of Agriculture
e.g. = for example	Vol. = volume
Exp. = Experiment	V.P. = Vice President
Feb. = February	vs. = versus
fl oz = fluid ounce(s)	W. = West
ft = foot or feet	°C = degrees Celsius (Centigrade)
gm = gram(s)	°F = degrees Fahrenheit
ha = hectare(s)	> = greater than, more than
i.e. = in other words	< = less than
Inc. = Incorporated	
incl. = including	
Illust. = Illustrated or Illustration(s)	
Inst. = Institute	
J. = Journal	
J. of the American Oil Chemists' Soc. = Journal of the American Oil Chemists' Society	
Jan. = January	
kg = kilogram(s)	
km = kilometer(s)	
Lab. = Laboratory	
Labs. = Laboratories	
lb = pound(s)	
Ltd. = Limited	
mcg = microgram(s)	
mg = milligram(s)	
ml = milliliter(s)	

## HOW TO MAKE THE BEST USE OF THIS DIGITAL BOOK - THREE KEYS

**1. Read the Introduction and Chronology/Timeline located near the beginning of the book; it contains highlights and a summary of the book.**

**2. Search the book.** The **KEY** to using this digital book, which is in PDF format, is to **SEARCH IT** using Adobe Acrobat Reader: For those few who do not have it, Google: **Acrobat Reader** - then select the **free** download for your type of computer.

**Click on the link to this book and wait for the book to load completely and the hourglass by the cursor to disappear (4-6 minutes).**

**Type [Ctrl+F] to “Find.” A white search box will appear near the top right of your screen.**

**Type in your search term, such as Tofurky or meat substitute.**

**You will be told how many times this term appears, then the first one will be highlighted.**

**To go to the next occurrence, click the down arrow, etc.**

**3. Use the indexes, located at the end of the book.** Suppose you are looking for all records about tofu. These can appear in the text under a variety of different names: bean curd, tahu, doufu, to-fu, etc. Yet all of these will appear (by record number) under the word “Tofu” in the index. See “**How to Use the Index,**” below. Also:

**Chronological Order:** The publications and products in this book are listed with the earliest first and the most recent last. Within each year, references are sorted alphabetically by author. If you are interested in only current information, start reading at the back, just before the indexes.

**A Reference Book:** Like an encyclopedia or any other reference book, this work is meant to be searched first - to find exactly the information you are looking for - and then to be read.

**How to Use the Index:** A subject and country index is located at the back of this book. It will help you to go directly to the specific information that interests you. Browse through it briefly to familiarize yourself with its contents and format.

Each record in the book has been assigned a sequential number, starting with 1 for the first/earliest reference. It is this number, not the page number, to which the indexes refer. A publication will typically be listed in each index in more than one place, and major documents may have 30-40

subject index entries. Thus a publication about the nutritional value of tofu and soymilk in India would be indexed under at least four headings in the subject and country index: Nutrition, Tofu, Soymilk, and Asia, South: India.

Note the extensive use of cross references to help you: e.g. “Bean curd. See Tofu.”

**Countries and States/Provinces:** Every record contains a country keyword. Most USA and Canadian records also contain a state or province keyword, indexed at “U.S. States” or “Canadian Provinces and Territories” respectively. All countries are indexed under their region or continent. Thus for Egypt, look under Africa: Egypt, and not under Egypt. For Brazil, see the entry at Latin America, South America: Brazil. For India, see Asia, South: India. For Australia see Oceania: Australia.

**Most Important Documents:** Look in the Index under “Important Documents -.”

**Organizations:** Many of the larger, more innovative, or pioneering soy-related companies appear in the subject index – companies like ADM / Archer Daniels Midland Co., AGP, Cargill, DuPont, Kikkoman, Monsanto, Tofutti, etc. Worldwide, we index many major soybean crushers, tofu makers, soymilk and soymilk equipment manufacturers, soyfoods companies with various products, Seventh-day Adventist food companies, soy protein makers (including pioneers), soy sauce manufacturers, soy ice cream, tempeh, soynut, soy flour companies, etc.

Other key organizations include Society for Acclimatization (from 1855 in France), American Soybean Association, National Oilseed/Soybean Processors Association, Research & Development Centers (Peoria, Cornell), Meals for Millions Foundation, and International Soybean Programs (INTSOY, AVRDC, IITA, International Inst. of Agriculture, and United Nations). Pioneer soy protein companies include Borden, Drackett, Glidden, Griffith Labs., Gunther, Laucks, Protein Technologies International, and Rich Products.

**Soyfoods:** Look under the most common name: Tofu, Miso, Soymilk, Soy Ice Cream, Soy Cheese, Soy Yogurt, Soy Flour, Green Vegetable Soybeans, or Whole Dry Soybeans. But note: Soy Proteins: Isolates, Soy Proteins: Textured Products, etc.

**Industrial (Non-Food) Uses of Soybeans:** Look under “Industrial Uses ...” for more than 17 subject headings.

**Pioneers - Individuals:** Laszlo Berczeller, Henry Ford, Friedrich Haberlandt, Artemy A. Horvath, Englebert Kaempfer, Mildred Lager, William J. Morse, etc. Soy-Related Movements: Soyfoods Movement, Vegetarianism, Health and Dietary Reform Movements (esp. 1830-1930s), Health Foods Movement (1920s-1960s), Animal Welfare/Rights. These are indexed under the person's last name or movement name.

**Nutrition:** All subjects related to soybean nutrition (protein quality, minerals, antinutritional factors, etc.) are indexed under Nutrition, in one of more than 70 subcategories.

**Soybean Production:** All subjects related to growing, marketing, and trading soybeans are indexed under Soybean Production, e.g., Soybean Production: Nitrogen Fixation, or Soybean Production: Plant Protection, or Soybean Production: Variety Development.

**Other Special Index Headings:** Browsing through the subject index will show you many more interesting subject headings, such as Industry and Market Statistics, Information (incl. computers, databases, libraries), Standards, Bibliographies (works containing more than 50 references), and History (soy-related).

**Commercial Soy Products (CSP):** See "About This Book."

**SoyaScan Notes:** This is a term we have created exclusively for use with this database. A SoyaScan Notes Interview contains all the important material in short interviews conducted and transcribed by William Shurtleff. This material has not been published in any other source. Longer interviews are designated as such, and listed as unpublished manuscripts. A transcript of each can be ordered from Soyinfo Center Library. A SoyaScan Notes Summary is a summary by William Shurtleff of existing information on one subject.

**"Note:"** When this term is used in a record's summary, it indicates that the information which follows it has been added by the producer of this database.

**Asterisks at End of Individual References:**

1. An asterisk (\*) at the end of a record means that Soyinfo Center does not own that document. Lack of an asterisk means that Soyinfo Center owns all or part of the document.
2. An asterisk after eng (eng\*) means that Soyinfo Center has done a partial or complete translation into English of that document.
3. An asterisk in a listing of the number of references [23\* ref] means that most of these references are **not** about soybeans or soyfoods.

**Documents Owned by Soyinfo Center:** Lack of an \* (asterisk) at the end of a reference indicates that the Soyinfo Center Library owns all or part of that document. We own roughly three fourths of the documents listed. Photocopies of hard-to-find documents or those without copyright protection can be ordered for a fee. Please contact us for details.

**Document Types:** The SoyaScan database contains 135+ different types of documents, both published (books, journal articles, patents, annual reports, theses, catalogs, news releases, videos, etc.) and unpublished (interviews, unpublished manuscripts, letters, summaries, etc.).

**Customized Database Searches:** This book was printed from SoyaScan, a large computerized database produced by the Soyinfo Center. Customized/personalized reports are "The Perfect Book," containing exactly the information you need on any subject you can define, and they are now just a phone call away. For example: Current statistics on tofu and soymilk production and sales in England, France, and Germany. Or soybean varietal development and genetic research in Third World countries before 1970. Or details on all tofu cheesecakes and dressings ever made. You name it, we've got it. For fast results, call us now!

**BIBLIO:** The software program used to produce this book and the SoyaScan database, and to computerize the Soyinfo Center Library is named BIBLIO. Based on Advanced Revelation, it was developed by Soyinfo Center, Tony Cooper and John Ladd.

**History of Soybeans and Soyfoods:** Many of our digital books have a corresponding chapter in our forthcoming scholarly work titled History of Soybeans and Soyfoods (4 volumes). Manuscript chapters from that book are now available, free of charge, on our website, [www.soyinfocenter.com](http://www.soyinfocenter.com) and many finished chapters are available free of charge in PDF format on our website and on Google Books.

**About the Soyinfo Center:** An overview of our publications, computerized databases, services, and history is given on our website.

# All the Sizzle... None of the Steak.

Mmmm...go ahead, bite into this thick and juicy "All American" Tempeh Burger from Soyfoods Unlimited. It's a real taste sensation that is wholesome and full of hearty flavor.

There's no need to worry about fat and cholesterol while you're enjoying this burger. Made from cultured organic soybeans, natural soy sauce and a unique blend of seasonings this new burger alternative is a complete protein containing *no animal products, no oil, and no cholesterol*. And there are only 120 calories per burger. The Tempeh Burger from Soyfoods Unlimited is *pre-cooked* so it's ready to eat. Add it to casseroles, pizzas, tacos or one of your favorite recipes.

*Enjoy the best of both worlds: meaty flavor, high protein, plenty of B vitamins and lots of sizzle...but none of the steak.*

Available in popular square and round shapes.

Look for other delicious and versatile products from Soyfoods Unlimited: Soy Tempeh • Soy and Five Grain Tempeh • Soy and Rice Tempeh • Available in the refrigerator or freezer case wherever you buy natural foods.

## HISTORY OF MEAT ALTERNATIVES

1. Tao Ku. 965 CE. *Qing yilu* [Anecdotes, simple and exotic]. China. Passage on soy reprinted in C.N. Li 1958 #90, p. 75. [Chi]

• **Summary:** Wade-Giles reference: *Ch'ing I Lu*, by T'ao Ku. Northern Song dynasty. The section titled *Xiaozaiyang* states: "When Shi Ji was the magistrate of Qing Yang, he emphasized the virtue of frugality among the people, and discouraged the consumption of meat. Instead he promoted the sale of tofu (*doufu*), which gained the sobriquet, 'mock lamb chops' or 'the vice mayor's mutton.'" (Translated by H.T. Huang, PhD, July 2002).

Note 1. This is the earliest document seen (May 2014), worldwide, that mentions tofu. Note 2. This is the earliest Chinese-language document seen (May 2014) that uses the term *doufu* to refer to tofu.

Note 3. This is the earliest document seen (May 2014) that advocates both vegetarianism and soyfoods, and that recommends the use of soyfoods (tofu) as a replacement for meat.

Dr. Huang adds: The title of this section can have a double meaning. *Xiao* means "little." *Zai* can mean either "ruler / minister / mayor" or "sacrificial / slaughtered." And *Yang* means "mutton" or "lamb." The intended meaning is clearly "mock (meatless) lamb chops" or "lamb chops for the people." The story implies that tofu was produced and marketed commercially by the latter part of the Tang dynasty, and that it was less expensive than mutton.

In March 1894, Schlegel and Cordier wrote an article in the European periodical *T'oung Pao* (published in France) titled "The Chinese bean-curd and soy and the soya-bread of Mr. Lecerf. I. Tofu" in which they discussed in detail the story from the *Qing yilu* but without actually citing that early Chinese book. Instead they cited the *Shuwu yiming shu* (ca. 1644, late Ming dynasty).

In 1968, in a Japanese-language article on the origin of tofu, the well-known Japanese food historian and sinologist Shinoda Osamu showed that this book (called *Seiuroku* in Japanese) was the world's earliest known *document* to mention tofu (Huang 2000, p. 300).

Then, in the 1980s, Chinese researchers found a tomb mural incised on a stone slab from the Eastern / Later Han dynasty (25-220 CE) that clearly shows tofu (or a prototype of tofu) being made (Chen, Wenhua 1990).

Huang (2000) gives a good explanation and translation of this passage and notes that during the Song dynasty, there was a dramatic increase in the number of times that the term "tofu" appeared in Chinese literature (p. 300-01). He adds (p. 126-27) that this food canon of late medieval China is "a compilation of anecdotes of little known facts and unusual

events associated with a wide range of topics current in the Sui, Tang and Five Dynasties era. The entire book consists of 648 anecdotes, of which 238 deal with matters relating to food and drink." In addition (p. 354) this book states: Jiang (soybean paste) "is the host of the eight delicacies (*bazhen*), while vinegar (*chu*) is their manager." Thus it places "the value of *jiang* as a condiment higher than that of vinegar."

A second passage in this book, titled *Hutuofan* states that Guang Wu (a person or ruler) is at a place named Hutuo. Someone named Gong Sun recommended soybean congee (*douzhou*) to him. Until now, all through the northwestern prefectures and counties, people call soybean congee as *Hutuofan*. Note 4. *Fan* means "cooked grains." (Translated by H.T. Huang, PhD, July 2002).

Huang (2000, p. 193) also states that an early reference to red rice koji (*hong qu*) appears in this work in an entry titled "Fermented Mash: Bone of Wine." Huang translates this: "Among the recipes there is one for red pot-roast lamb. The method is to simmer the meat with red ferment,..."

Note 5. This is the earliest document seen (May 2014) that mentions red rice koji / fermented red rice, which it calls *hong qu*.

2. Kou Zongshi. 1116. *Bencao yanyi* [Dilations upon pharmaceutical natural histories]. China. Passage on soy reprinted in C.N. Li 1958 #300, p. 221. [Chi]

• **Summary:** Wade-Giles reference: *Pên Ts'ao Yen I*, by K'ou Tsung-Shih. Song dynasty. An important work. In Chapter 20, the section titled "Whole dry soybeans" (uncooked, *sheng dadou*) after describing the different colors and kinds of soybeans (already found in many earlier documents) it states that soybeans can be ground and made into tofu (*fu*), and eaten.

Red azuki beans (*chixiaodou*) are also mentioned in this book. (See Li 1958 #388). (Translated by H.T. Huang, PhD, Jan. 2003).

Dr. H.T. Huang (personal communication, 5 June 1993) notes that this book states: "Keep chewing (massaging) wheat flour and it will yield *mianjin* (wheat gluten)."

Gai & Guo (2001, p. 44): This book was written by Ke Zhong-Xiang, who wrote: There are three kinds of immature raw soybeans: green, brown and black. The larger ones come mainly from Jiangsu, Zhejiang, Hunan, and Hubei; the smaller ones are from other places.

Needham (1986, p. 283-87): Emperor Hui Tsung, a remarkable man, came to the throne in 1101 CE. His court was a "veritable entourage of virtuosi, appreciative of all the best that the art, the science and the technology of the time could perform." A major of event was the presentation to

his throne of an “entirely original treatise on pharmaceutical natural history, by a hitherto unknown Medical Officer,” K’ou Tsung-Shih. It was printed in 1119 by the writer’s nephew, K’ou Yo. He wrote passages of “cardinal importance about the lodestone and the magnetic needle, recording induction and polarity, with a description of the floating compass,” a statement on magnetic declination, and an attempt to explain it, all about 60 years before anything was known about magnetic polarity in Europe. He also discussed various fossils, and was perhaps an even better mineralogist and geologist than a botanist. In Chapter 17, he also discussed insect pests and their natural enemies (p. 525).

A modern edition was published in 1937 by Commercial Press.

3. *Jujia biyong shilei quanji* [Essential arts for family living (encyclopedia)]. 1301. China. Passage on soy reprinted in H.T. Huang 2000, p. 352. Undated. [Chi]

• **Summary:** Wade-Giles reference: *Chü Chia Pi Yung Shih Lei Ch’üan Chi*, author probably unknown or maybe by Hsiung Tsung-Li (pinyin Xiong Zongli). Late Yuan (Mongol) dynasty.

Huang (2000, p. 352) states that this book “presents two methods for making jiang from soybeans, one for *shu huang jiang* (ripe yellow soy paste) and the other for *sheng huang jiang* (raw yellow soy paste). The names are actually misleading since the ‘ripe’ and the ‘raw’ refer to the manner in which the beans are treated before mixing with wheat flour for the first fermentation and do not refer to the quality of the final product. In the *shu* or ‘ripe’ case, the beans are roasted and ground into flour; in the *sheng* or ‘raw’ case the beans are soaked overnight and boiled until soft and tender. The product from the first fermentation is called *huangzi* [‘yellow child,’ soybean koji] and well as *jianghuang* [‘jiang yellow’].”

Huang (2000, p. 355-56) gives an interesting full-page table which compares the processes for making the following types of jiang: Soybean (*dou*), wheat (*mien*), sweet flour (*tianmien*), azuki bean (*xiaodou*), jack bean, barley (*damai*), and elmnut (*yuren*). Each of the processes except one is based on the *Jujia Biyong* (ca. 1350); the process for making sweet flour jiang is based on the *Bencao Gangmu* (The great pharmacopoeia) (1596 CE).

A full-page table (Huang, p. 372) shows the “Usage of soy condiments in food recipes from the Han to the Qing dynasties.” Only seasonings based on jiang (fermented soybean paste) are used in this book; none are based on fermented black soybeans (*shi*). Jiang itself is used in 17 recipes, and soy sauce made from jiang (*jiangqing*) in 1 recipe.

Huang (2000, p. 297) notes that this is the earliest document seen to use the term *douya*, which, in English, is the modern term—“bean sprouts.” Mung beans (*lüdou*) are the

preferred beans for making such sprouts. A long quotation describes the process in detail and gives a recipe.

Huang (2000, p. 255) quotes a passage describing the process for making *jufu* (also known as *jubing*), from dairy milk curds. Its says to coagulate cow’s milk by adding vinegar, just as when making tofu (*doufu*). When the dairy curds are fully formed, drain in a silk bag and press with a stone. Add salt and store in a jar.

Letter from Dr. H.T. Huang. 1996. Sept. 29. “I am glad you brought up the question of when vegetarian mock meat dishes were first prepared in China; it is one that requires further research. The earliest examples of mock meat dishes I have found so far were made with *mien-chin* (wheat gluten).” Gluten is used “in a recipe for mock lung sausage and one for mock eel.” The book contains 4 vegetarian recipes using *mien chien* (wheat gluten), found on pages 132-34. These are vegetarian versions of grilled liver, barbecued liver, mock fermented beans (*doushi* = fermented black soybeans), and mock fish.

Note 1. This is the earliest document seen (Nov. 2014) concerning meat alternatives. It is also the earliest Chinese-language document seen (Nov. 2014) concerning meat alternatives.

Note 2. This is the earliest document seen (Oct. 2014) that mentions a meat alternative in the form of fish or seafood (“mock eel”).

Note 3. This is the earliest document seen (Oct. 2014) that mentions a meat alternative in the form of sausage (“mock lung sausage”).

Note 4. This may be the earliest document seen (May 2014) concerning roasted soy flour.

Note 5. This is the earliest document seen (May 2014) concerning a meatless sausage.

Huang (2000, p. 194-95) notes that this book contains probably the earliest account of the process for making red ferment [*hong qu*; red rice koji] and a red wine.

Bray (1984, p. 623): Translates the title as “Collection of certain sorts of techniques necessary for households (encyclopedia).” Published in Yuan, 1301 CE. Probably by Hsiung Tsung-Li. Ed. Ming, 1560 CE, T’ien Ju-Ch’eng. Partly reprinted in Shinoda & Tanaka (1973), “A Collection of Chinese Dietary Classics.” Also discusses hemp oil, which was widely used in traditional China, was considered to have an offensive smell, and was rated lowest of all the cooking oils, but it was a good lamp oil as it did not smoke or hurt the eyes” (p. 51).

Bo (1982): This book mentions wheat chiang. It also gives a detailed description of the method for making fermented black soybean sauce: Two months after September, heat clear sesame oil, stir in 3 *tou* [unit of measure] of good fermented black soybeans (*shi*), mix, steam, and cool. Sun dry then steam again. After repeating this process 3 times, mix in 1 *tou* of white salt and put everything in a large cauldron with 3-4 *tou* of hot water.

Add 1 *ry* each of three spices, 5 *kin* each of white onion and (?). Simmer down to two-thirds the volume and store in a container. From this it is clear that fermented black soybean sauce was a kind of soy sauce with flavorings and spices.

4. Li Shizhen. comp. 1596. *Bencao gangmu* [The great pharmacopoeia]. China. [Chi]

• **Summary:** Wade-Giles reference: *Pên Ts'ao Kang Mu*, by Li Shih-Chên (lived 1518-1593). This classic work describes almost 2,000 animal, vegetable, and mineral drugs and gives over 8,000 prescriptions. A rich source of information, it is still very useful. All foods mentioned are considered as medicines, based on the ancient Chinese saying: "Food and medicine have the same origin." Gluten is discussed in chapter 22 of this work.

Huang (2000, p. 498) states: "Although gluten is probably well known to all peoples who use flour as a staple food, the Chinese were the only ones who had extracted and used it separately as a substitute for meat and other animal products, and thus raised vegetarian fare to a new height of culinary inventiveness. How did this happen? What is the origin of gluten? In regard to the latter question, the great naturalist Li Shizhen in about +1596 had this to say (Chap. 22): 'Gluten is sweet, cooling and non-toxic... It is made by kneading and washing wheat flour or bran in water. The ancients have no knowledge of it, yet today it is a most important component of vegetarian food. It is very good boiled, but nowadays people often fry it in oil, which would turn it into a "heating" type food.'

"He [Li] then quotes Kou Zongshi, c. 1116, who states, 'When white flour is chewed, it becomes gluten. Its stickiness can be used to trap insects and birds.' From these quotations one might be led to think that gluten was discovered sometime during the Song [dynasty]. Actually, gluten was probably isolated at least 500 years earlier." See the *Qimin Yaoshu* (544 AD).

5. Xiao Xiao Sheng. trans. 1621-1627. *Jin ping mei* [The golden lotus. 4 vols.]. China. [Chi]\*

• **Summary:** Wade-Giles reference: *Chin P'ing Mei* by Hsiao Hsiao Shêng. The most food-conscious work of Ming dynasty fiction is the famous novel of sexuality and sensuality, the *Chin P'ing Mei*. It first appeared in 1617, and was first printed in 1621-27. The author's name given above is a pseudonym meaning "The Scoffing Scholar of Lanling." The true author is unknown. The only clue to his identity is that he hailed from Lanling, or today's Shandong.

In 1939 Egerton's translated this work as *The Golden Lotus*. Pages 179-80 of Egerton's translation describe a banquet at which a group of Buddhist nuns are entertained strictly observing dietary prohibitions [against eating meat] while nonetheless enjoying delicacies fashioned to resemble forbidden meat dishes. One of the pious old women cannot see well and has to be convinced that the foods can be eaten:

Four "plates of vegetarian food" were ordered by the Moon Lady, one of the hosts. She reassured the pious old nun: "This is vegetarian food made to look like meat. It has come from the temple, and there can't possibly be any harm in eating it."

Mote (1977, p. 248) observes: "When, in the second half of the sixteenth century, the *Chin-p'ing mei*, appeared, a massive novel that wallows in sensuality, it became accepted as an important, even classic, work on the grounds that it attempts to dissect the souls of humans who have inflicted uninhibited sensuality on themselves and others. Critics have seen the novel's achievement in its mastery of those psychological elements of human tragedy."

Note: This is the earliest document seen (Nov. 2014) that mentions a general meat alternative ("vegetarian food made to look like meat").

6. Yuan Mei. 1790. *Suiyuan shidan* [Recipes from the Sui garden]. China. [Chi]

• **Summary:** Wade-Giles reference: *Sui Yüan Shih Tan*, by Yüan Mei. Qing dynasty.

H.T. Huang (2000, p. 323-24), in the section titled "Products associated with tou fu," states that this is the earliest document seen that mentions fresh tofu curds. In a recipe for "Hibiscus Tofu" (*fuyong doufu*) the famous Qing dynasty gastronome says (p. 100): Place fresh tofu curds (*funao* = "tofu brain") in well water and heat to boiling three times to remove the beany flavor. Suspend the curds in chicken soup and heat again to boiling. Before serving, garnish with laver / nori (*Porphyra*, a sea vegetable) and pieces of shrimp. Later, fresh tofu curds were also called "tofu flowers" (*douhua* or *doufu hua*).

Concerning frozen tofu, Huang states (p. 324) that a recipe in this book states: Boil the thawed tofu in water to remove the remaining beany flavor, then simmer it in a soup base.

Huang also states (p. 325, 364) that both pressed tofu (*doufugan*) and smoked tofu (*xun doufu*) are mentioned in this book.

Concerning fermented tofu, Huang (2000, p. 327) notes: By the middle of the Qing dynasty local varieties of *furu* had begun to win national fame, such as the *furu* of Suzhou [in southern Jiangsu; W.-G. Su-chou or Soochow, formerly Wuhsien] and the white *furu* of Guangxi [or Guangxi Zhangzu, an autonomous region in southeast China; W.-G. Kuangsi]. The *Suiyuan Shidan* says:

'*Rufu*: The ones from the [shops] near the front of the Temple of General Wên in Suzhou are particularly good. The colour is black, and the flavour is clean. There are two types, a wet and a dry. The product with some shrimp paste in it is also attractive, but may have a slight fishy taste. The white *furu* from Guangxi (Kuangsi) is also outstanding, especially that made by the family of the official Wang Ku.'

A full-page table (Huang, p. 372) shows the "Usage of

soy condiments in food recipes from the Han to the Qing dynasties.” Seasonings based on jiang (fermented soybean paste) are used in 48 recipes: Jiang itself in 15, soy sauce made from jiang named *qingjiang* in 24 recipes, soy sauce named *jiangyou* in 2 recipes, soy sauce named *jiangzhi* in 1 recipe, and soy sauce named *jiangshui* in 6 recipes. Fermented black soybeans (*shi*) are used in 2 recipes, and a new type of soy sauce named *qiuyou* (W.-G. *ch’iu yu*) is used in a whopping 62 recipes. Note 1. This is the earliest document seen (May 2014) in which a soy-based seasoning named *qiuyou* is mentioned. Huang states (p. 371) that *qiuyou* is written with the Chinese characters for autumn + oil, implying a sauce harvested in autumn.

Wilkinson (2000, p. 647-49). This was the most famous recipe book of its day, yet *wok* dishes accounted for only 16% of the recipes. Yuan Mei (lived 1716-1798) was one of China’s four most famous “literati gourmands;” they “exerted a considerable influence on the development of a higher cuisine, especially when they compiled their own cookbooks...”

Letter from Dr. H.T. Huang. 1996. Sept. 29. “Page 103 mentions mock roast goose made with yam wrapped in *doufu*

*pi* (yuba).”

Note 2. This is the earliest document seen (Oct. 2014) that mentions a meat alternative (“mock roast goose”) resembling poultry.

Dr. H.T. Huang, expert on the history of Chinese food and agriculture (personal communication, 5 June 1993), gives the date of this document as 1790 CE, and the English translation of the title as “Recipes from the Sui Garden.” He notes that page 107 contains three recipes for gluten.

Endymion Wilkinson. 2000. *Chinese History: A Manual* (p. 649). This book *Suiyuan shidan* or *The Suiyuan recipes* was published in 1792, with a modern edition in 1984.

Newman (1989) states: “The idea of freezing bean curd is not new. Iced Bean Curd is one of Yuan Mei’s recipes from the *Xi Yuan Cookery Book* written near the end of the 18th century. This book by a poet, government official and author, is a very comprehensive volume of over 300 recipes, only some are about tofu. One difference is that the Iced Bean Curd recipe is meant to be served hot, the *doufu* in it is first frozen then prepared for use.”

Bo (1982): In this work Yüan Mei states that it is more graceful for a writer to use the term “ch’ing chiang” instead of “chiang-yu” when referring to soy sauce.

Reichl (1985): Yuan Mei has been called the “the 18th century philosopher of the table.” His sayings are widely quoted. For example: “A great cook cannot with the utmost application produce more than four great dishes a day.”

Waley, Arthur. 1956. *Yuan Mei: Eighteenth century Chinese poet*. London: Allen & Unwin. 227 p. An excellent, early biography of Yuan Mei.

Hummel (1944, p. 955-56): Yüan Mei lived 1716-1798. A poet, literary critic, and essayist, he was a native of Ch’ien-t’ang (Hangchow). Resigning (in 1748) from his post as magistrate of Chiang-ning, he retired (in 1749) to his newly acquired “Garden of Contentment,” Sui-yüan, near Nanking. From 1784-1795, spent in alternate travel and quiet seclusion, he came to be known as one of the most skillful poets of his time. Address: China.

7. *New Hampshire Patriot and State Gazette (Concord)*. 1852. Important invention. Nov. 24. p. 3.

• **Summary:** “We learn that a distinguished Grahamite has invented a vegetable sausage. It is composed mainly of red flannel and turnip tops, chopped fine. All heating spices are excluded. The vegetable sausage has long been a desideratum with the proprietors of vegetarian boarding-houses.”

Note: This is the earliest document seen (Oct. 2014) that mentions a meat alternative in the Western world, or a meat alternative in the form of a sausage, or that contains the term “vegetable sausage.”

8. Imperial Japanese Commission to the International Exhibition at Philadelphia (1876). 1876. Official catalogue of

the Japanese section: And descriptive notes on the industry and agriculture of Japan. Philadelphia, Pennsylvania: Published by the Japanese Commission. 130 p. 24 cm.

• **Summary:** The Preface (p. 3) begins: “Never until the year 1873, had Japan participated to any great extent in the various European International Exhibitions. Up to that time she had been merely represented by some of the provincial governments, acting independently of the central Government. However, the Government determined to be worthily represented at the Vienna International Exhibition of 1873,...” But Japan was well prepared for the Philadelphia Centennial Exhibition.

Under classes of “Agricultural products” (p. 32, 34): Class 621–Peas, beans, etc. (incl. Soya, adzuki). Class 650–Sea weeds (incl. Vegetable isinglass [agar, kanten]). Class 657–Flour and starch (incl. Kudzu {*Pueraria thunbergiana*}). Class 659–Wines and other kinds of drinks (incl. Sake, Soy {a kind of sauce}).

Page 71 discusses relief painting in lacquer: “The lacquer can even be carved, and, finally, the artisan can incrustate mother-of-pearl shell, ivory, thin metal, or anything he likes into the lacquer. By mixing a sort of paste made of [soy] bean powder, or the white of eggs, with the lacquer, he can thicken it to such an extent as to give it a kind of plasticity, admitting the possibility of making impressions which remain visible after hardening.”

In the long chapter titled “Descriptive notes on the industry and agriculture of Japan (p. 37-117) is section on “Agricultural products. Classes 620-21–Cereals, vegetables, etc.” (p. 104-06). Beans, generally referring to soy beans, are mentioned many times. “Manures of a mineral nature consist of marls, shells and ashes; those of vegetable origin of inferior kinds of beans and peas or their residues, of [soy bean] oil-cakes, the residues of sake-brewing,...

“The excellent kinds of beans and peas, which are made into a kind of cheese [tofu] and a peculiar mixed dish called ‘misso’ [miso] afford the necessary nitrogenous substances, and to a certain extent form the substitute for meat; the Soyu [shoyu; soy sauce] also belongs to this kind of food, and is frequently mixed with other dishes. With regard to animal food, it is limited almost exclusively to fish, poultry and eggs. But a change has already been effected to a certain extent in the larger towns, where butcheries have been established. An experiment of sheep farming was commenced one or two years ago” (p. 106).

Note 1. This is the earliest English-language document seen (April 2012) that uses the word “Soyu” (regardless of capitalization) to refer to shoyu or soy sauce.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “substitute for meat” (or “substitute for meats,” with any combination of quotation marks).

Under “Class 657, 658–Flour, starch, etc. we read (p. 110-11): “It has been mentioned above that the various kinds

of beans constitute a very important element of the national diet. Some of the preparations made of beans and peas are worthy of a short notice. In preparing the ‘Tofu,’ white beans are soaked in water, ground between two stones, strained through a sieve and afterwards boiled. The contents of the kettle are then filtered through cotton cloth and the residue pressed out. The liquid [soymilk], which may be considered as an alkaline solution of legumine, is precipitated by successive additions of the bitter lye [nigari] which runs off from sea-salt by deliquation, and which is mostly composed of magnesium salts. The precipitate is legumine with a small percentage of legumine-composites [-composites] and a large proportion of water. The ‘yuba’ is also made by boiling the above-mentioned legumine solution in an open kettle, with a slight addition of ash-lye. The insoluble skins which form upon the surface of the boiling liquid, are taken off and dried. Another kind of preserved food is the ‘misso’ [miso]. White beans are first boiled, pounded in a mortar to form a paste, then mixed with fermenting rice and salt, whereupon the whole mixture is placed in tubs and left in some cool place; at the end of a month it is ready for use. In mentioning the various preparations made of beans, the ‘Soy’ or, as the Japanese call it, ‘Soyu’ [shoyu] should not be omitted; but as it belongs rather to the produce of fermentation, the process will be described under the head of Class 660 [Alcohol and malt liquors].

One page 112 we read: “The soy, or ‘soyu,’ is made of a small bean, the ‘Dolichos soja,’ or ‘Soya hispida,’ to which are mixed wheat, salt and water. The beans are first boiled, and the wheat bruised and steamed; both are then mixed with a small addition of fermenting wheat, placed in flat wooden boxes and kept for several days at a fixed temperature in a special room. At the end of three days, the mass [koji] is all covered with fungi and partly with roots of germination. After having been mixed with a salt-lye, which has been prepared hot and allowed afterwards to cool down, and to depose certain impurities, the mashings are now removed to enormous coops [vats] in which they are kept for several years. Experience has shown that the best soy is produced by mixing equal quantities of mashings of three years and five years’ standing. This mixture is transferred into bags of thick cotton-cloth, placed in large boxes, and then submitted to pressure—at first only to a slight pressure, which yields the best soy, and afterwards, however, to a gradually increasing pressure, the separation of the last portions being assisted by an addition of salt water.

“The soy forms a very important condiment for all kinds of dishes, and is consumed in large quantities. In 1874 the production amounted to 1,506,402 hectolitres.”

An interesting term in the Index (p. 129) is “Bean-cheese,” which refers to tofu (p. 110).

Also: Use of hemp (*asa*) for manufacture of cloth (p. 77, 113). The tea ceremony (p. 108). Sea weeds, incl. cultivated nori and Asakusa nori in Tokio bay, kanten or vegetable

isinglass, and fu (that resembles carrageen [carrageenan] moss and is used in the sizing of the warp of silk goods) (p. 109). Kudzu (p. 110). Sake (p. 111). Address: Japan.

9. Hepburn, James Curtis. 1886. A Japanese-English and English-Japanese dictionary. 3rd ed. Tokyo: Z.P. Maruya & Co., Limited. Yokohama, Shanghai, Hongkong & Singapore: Kelly & Walsh, Limited. London: Trübner & Co. 962 p. 22 cm.

• **Summary:** “During the fourteen years which have elapsed since the publication of the last edition of this Dictionary [in 1867], the Author has kept it constantly before him, correcting errors, improving and enlarging the definitions, and adding new words and illustrations, according as his time and other important engagements allowed him. But owing to the amazing changes and rapid advancement of the Japanese in every department, he has found it difficult to keep pace with the corresponding advance of the language in the increase of its vocabulary. He has endeavored, however, to collect these words, examine, classify and define them. Many, no doubt, have escaped his notice. Still there is an addition of more than ten thousand words to the Japanese and English part.”

New soy-related definitions in this edition, not found in or changed from the 1867 edition: Aburage: Anything fried in oil or grease, especially fried *tofu*. [fried tofu].

Amazake: Sweet *sake*, a kind of drink made of fermented rice.

Azuki: A small red bean, *Phaseolus radiatus*. Daizu: A kind of large white bean, *Soja hispida*.

Hiriōzu: A kind of food made of *tōfu* fried in oil.

Note 1. This is the earliest document seen (Nov. 2014) that contains the word *Hiriōzu* (written exactly like this). It refers to Kyoto-style deep-fried tofu treasure balls. It is also the earliest document seen (Nov. 2014) that contains a traditional Asian meat alternative made from deep-fried tofu.

Kinako: A flour made of beans.

Kirazu: The refuse of beans left in making *tōfu* [okara].

Note 2. This is the earliest English-language document seen (June 2013) that uses the word “Kirazu” [not Kiradzu] to refer to what is now called “okara” or “soy pulp.”

Koji: Barm or yeast made by the fermentation of rice or barley in the process of making *sake* or *soy* [sauce].

Miso: A kind of sauce made of beans, wheat and salt.

Miso wo suru: To rub miso in a mortar.

Sake: A fermented liquor brewed from rice. Sake wo kamosu: To brew sake. Sake ni yō: To be drunk. Sake no uye ga warui hito: One who behaves disorderly because of drink. Sake ni oboreru: To be addicted to drink [alcohol].

Shoyu: Soy, a kind of sauce made of fermented wheat and beans. Syn. [Synonym]: Shitaji.

Tamari: Soy, *shōyu*. Note 3. This is the earliest English-language document seen (April 2012) that uses the word “Tamari” to refer to a type of Japanese soy sauce,

Tofu: A kind of food made of beans, bean curd.

Unohana: The *Deutzia scabra*; also refuse of beans [okara] from making tofu. Yuba: A kind of food made of beans, the skin of bean curd.

Terms listed unchanged from the 1867 edition include Natto, and Yu-dofu.

No listing is given for: Daitokuji natto, Edamame [Yedamame], Hamanatto, or Okara.

The “English and Japanese dictionary,” which starts on page 771-73, contains the most important English words with numerous examples. Included are: Bean: Mame. Spec. Azuki, sora-mame, daizu, endo, ingen, sasage. Bean pod: Mame no saya. Bean curd: Tōfu.

Soy: Shōyu. Address: M.D., LL.D., Yokohama, Japan.

10. Holbrook, Martin L. 1888. Eating for strength: or, Food and diet in their relation to health and work, together with several hundred recipes for wholesome foods and drinks. New York: M.L. Holbrook & Co. 236 p. No index. 20 cm.

• **Summary:** The author, a health reformer, advocates a vegetarian diet. Chapter 9, titled “Alimentary products of the vegetable kingdom,” has a section on “Peas, beans and lentils” which states (p. 117): “The special characteristic of the bean, as compared with cereals, is a less amount of starch and a larger amount of nitrogenous matter. This renders it an excellent substitute for flesh meat. All experience goes to show that it is a more satisfying vegetable product for hard-working men than almost any other. In Catholic countries, especially France, where flesh food is less used, and where during Lent and on Fridays it is proscribed, leguminous products are more extensively used than elsewhere. They are much used by the vegetarians of India and China...”

“In Japan the bean is made into a curd [tofu], a most nutritious article of diet, and the nearest approach in its chemical constituents to animal food of any of the vegetable foods. A very full account of the mode of preparing and using it was published by the United States Government in the consular reports for 1886. This curd is used in soup, croquettes [croquettes] and a hundred other ways, and is said to be well liked. It might to our advantage be introduced into our country, and so might the soy bean generally used in Japan and China, which is richer in fat than our own beans are.” A table (p. 118, based on Kinch 1880) gives the composition of the soy bean.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “substitute for flesh” or the term “substitute for flesh meat” used to refer to a meat alternative.

Note 2. This is also earliest document seen (March 2001) concerning the etymology of meat alternatives.

The chapter on “Food in various diseases” recommends remedies for constipation (brown bread, fruit, and fresh vegetables), chronic rheumatism (a vegetarian diet), diabetes (gluten bread, “made now by many health food companies”),

food for orphan asylums, prisons, etc. (“a rightly constituted vegetable diet,” ‘non-flesh’ diet, or ‘Vegetarian’ dietary).

Note 3. This is the earliest English-language document seen (Sept. 2006) that contains the term “health food” (or “health-food” or “health foods”). Address: M.D., Prof. of Hygiene in the New York Medical College and Hospital for Women, Editor of the *Herald of Health*, etc.

11. Ichikawa, Yoshio. 1888. A new pocket dictionary of the English and Japanese languages. New edition. Yokohama, Japan: Seishi-Bunsha Printing Office. 907 p. 15 cm. [Eng; jap]

• **Summary:** The basic structure for each entry is: (1) The word, romanized, with the first letter capitalized and diacritical marks included. (2) The Chinese / Japanese characters (*kanji*, *hiragana*, *katakana*). (3) The “part of speech” (e.g. noun, verb, adjective, etc.). (4) A brief definition. In the following 3Cc = 3 Chinese characters are given

Soy-related words:

Abura-age, 2 Cc, 2 Cc, n. A thin piece of *tôfu* fried in oil.

Hiryôzu, 3 Cc, n. A kind of food made of *tôfu* fried in oil.

Daizu, 2 Cc, n. A kind of large white bean, Soja hispida.

Kinako, 2 Cc, 3 Cc, n. A [soy] bean flour.

Kirazu, 3 Cc, n. The refuse of beans left in making *tôfu*.

Kôji, 1 Cc, n. Barm or yeast, made by the fermentation of rice or barley in the process of making *sake* and soy.

Mame, 1 Cc, 1 Cc, n. A bean, pea. *Mame no saya*, beanpod; *mame no ko*, [soy] bean flour; irimame, parched beans.

Mamemaki, 2 Cc, 2 Cc, The ceremony of scattering parched [soy] beans about the rooms of a house to drive out evil spirits, on the evening of *Setsubun*.

Miso, 2 Cc, n. A kind of sauce made of [soy] beans.

Miso o suru: To rub miso.

Moromi, 2 Cc, n. The grounds left in making soy, used as an article of food. Nattô, 2 Cc, 2 Cc, 2 Cc, n. A kind of food made of boiled [soy] beans.

Nuta, 2 Cc, n. A food made of fish sliced and seasoned with vinegar and miso.

Sashimi, 2 Cc, 2 Cc, 2 Cc, 2 Cc, [this means the word “sashimi” can be written with four different pairs of characters], n. Raw fish cut in thin slices, and eaten with soy.

Shitaji, 2 Cc, n. Soy.

Shitashimono [Hitashimono, Oshitashi], 2 Cc, n. Boiled greens eaten with soy.

Shôyû, 2 Cc, n. Soy, a kind of sauce made of fermented wheat and [soy] beans.

Suribachi, 2 Cc, n. An earthenware bowl used for rubbing miso. Tôfu, 2 Cc, 2 Cc, 2 Cc, n. A kind of food made of beans, bean curd.

Yuba, 2 Cc, 2 Cc, n. A kind of food made of [soy] beans.

NOT listed: atsu-age, atsuage, Daitokuji-natto,

edamame, eda mame, gammodoki, ganmo, ganmodoki, hama-natto, hamanatto, hiya-yakko, hiyayakko, kaisô, koridofu, koridofu, koya-dofu, koyadofu, nama-age, namaage, okara, yaki-dofu, yakidofu, yeda-mame, yedamame, tamari, unohana.

Also mentions the following non-soy words:

Azuki, 2 Cc [small + bean], n. A small red bean.

Hijiki, 3 Cc, n. Systoseira [Cystoseira], a sea-weed.

Itokoni, 3 Cc, n. A kind of food made of red beans.

Kanten, 2 Cc, n. A kind of isinglass made of sea-weed.

Kombu, 2 Cc, n. A kind of edible sea-weed, algae.

Mekari, 3 Cc, n. Sea-weed gathering.

Mikusa, 2 Cc, 2 Cc, n. Sea-weed; aquatic plants.

Miru, 2 Cc, 2 Cc, 2 Cc, n. A kind of sea weed, something like Iceland moss.

Neriyôkan. 3 Cc, n. A kind of confectionary made of red beans and sugar.

Nori, 2 Cc, 2 Cc, A kind of edible seaweed, sloke.

Sekihan, 2 Cc, n. A kind of food made of red beans and rice.

Shiruko, 2 Cc, a kind of sauce made of red-beans and sugar, eaten with rice-cake.

Tokoroten, 2 Cc, 2 Cc, n. A kind of jelly made of seaweed.

Wakame, 2 Cc, 2 Cc, 3 Cc, n. A kind of sea weed.

Non-soy words that are not mentioned: Mozuku.

Address: Japan.

12. *New York Times*. 1892. A meatless feast. Banquet of the New-York Vegetarian Society. March 16. p. 2, col. 5.

• **Summary:** “Two hundred members of the New-York Vegetarian Society ate parsnips and potato cakes last night at the Columbia, in East Fourteenth Street. It was the society’s first banquet. There was no meat, no wine, no toothpicks, and even the exhilarating flavor of pea soup was absent from the bill of fare. There were post-prandial speeches, but most of them were from manuscript.

“Dr. Chauncey M. Depew was expected to preside, but unkindly staid [sic] away, and Mrs. Le Favre, the President of the Society, sat at the head of the table... Of those present one-half were women of mature age, and many of the confirmed vegetarians were accompanied by their sons and daughters. The price of the dinner was \$1. There were but six courses, but these were served slowly, and for two hours and a quarter the vegetarians ate and listened to the seductive strains of popular operas furnished without extra cost by the regular orchestra of the restaurant.” Waiters served the six courses, each of which is described.

“During the meal chromo cards were circulated, on which was the picture of a child bearing a dish of plum pudding with a wreath of roses around it, and the following motto: ‘As a man eateth, so is he. / Who, temperate, lives on fruits and grain / Is clear in thought and free from pain.’”

“In introducing the speakers, Toastmaster J.W. Scott

alluded to the dinner as a ‘bloodless feast.’”

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word “meatless.”

Note 2. This is the earliest English-language document seen (June 2002) that uses the word “bloodless” to refer to meatless.

13. *New York Times*. 1893. Lectures upon cooking: Miss Maria Daniell will give her views on the subject. Jan. 15. p. 17, col. 4.

• **Summary:** “The course of lectures upon sanitary and economic cooking is to be given during the month of February at the New-York Infirmary for Woman and Children by Miss Maria Daniell of the Massachusetts Institute of Technology. The cooking for the sick is intended to be of especial value to medical students and nurses, and will include instructions for the... cooking of meats and meat substitutes.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “meat substitutes” (or “meat substitute”).

14. *Chicago Daily Tribune*. 1895. No meats in the menu. Holiday banquet of vegetarians at Great Northern. Many members of Chicago society gather at tables—Claim made organization numbers 100,000 in this city, result of only eighteen months’ labor—Aims and objects set forth in addresses by President Ellison and others. Dec. 29. p. 3.

• **Summary:** The society “sprang into being eighteen months ago [i.e., about June 1894] at the home of the present secretary of the society, A.H. Snyder of Rogers Park. The society was organized with five members. They now claim 100,000 persons in Chicago alone are vegetarians, and all as a result of their society. The twelve course menu, which is described, includes lentil soup, gherkins, vegetable turkey, corn fritters, Roquefort and Camembert cheese, fruits, cocoanut butter, and distilled water.

“Prof. Addison Blakeley presided over the toastmaking which followed the dinner. He first introduced Mr. Luther E. Ellison, President of the Central Society of Chicago Vegetarians. President Ellison said: ‘The Chicago Vegetarian Society is not a premature blossom of the unacclimated tree...’ Clarence S. Darrow gave a toast. A list of those present is given. Many letters of regret were read, including those from Mayor George B. Swift, the Rev. N.B. Hills, etc.

Note: This is the earliest English-language document seen (Nov. 2014) that mentions meatless turkey, which it calls “vegetable turkey.” Soy is not mentioned. This “vegetable turkey” is almost certainly not a commercial product.

15. *Lancet*. 1896. With a view to letting the press know exactly what vegetarianism can accomplish in the gastronomic art... i:526. Feb. 22.

• **Summary:** “... Mr. A.F. Hills, the President of the London Vegetarian Society, entertained a number of ladies and gentlemen of the fourth estate [the public press] at the Ideal Café, Tottenham-court-road, on Feb. 14th last. Of course, the various dishes were composed entirely of vegetables and fruit, but such things as macaroni cutlet and dishes prepared *à la Française, à la Normandy, &c.*, bore some resemblance to the food eaten by the ordinary ‘corpse’ eater, to use the not very elegant phrase of one of the speakers. We see no reason to change our opinion that a mixed diet is preferable.”

Note: This is the earliest English-language document seen (Jan. 2014) that mentions a meat alternative in the form of a “cutlet.” Address: England.

16. **Product Name:** Nuttose (Meatlike or Cheeselike Product Made from Nuts—Mostly Peanuts, No Soy).

**Manufacturer’s Name:** Battle Creek Sanitarium Bakery. Then Sanitas Nut Food Co. from Nov. 1896. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.

**Manufacturer’s Address:** Battle Creek, Michigan.

**Date of Introduction:** 1896 July.

**Ingredients:** Mainly peanuts.

**New Product—Documentation:** Dr. John Harvey Kellogg. 1896. *Good Health* (Battle Creek, Michigan) 31(7):195-96. July. “Nuttose: A new food for brain and muscle building.” “It is so perfect a substitute for flesh food that in eating it one could readily imagine himself to be partaking of roast beef, dried beef, broiled chicken, or other meats, according to the mode of preparation...”

Note: Nuttose appears to be Dr. Kellogg’s first commercial meatlike or cheeselike product, and the first commercial meatlike or cheeselike product introduced by any Caucasian in the Western world. It is also the earliest commercial meat alternative seen which is described as an alternative to chicken or poultry. Made solely from nuts, Nuttose contains no soy.

Ellen Goodell Smith. 1896. *The Fat of the Land and How to Live on it*. Page 195 contains a full-page ad for

products made and sold by the Sanitas Food Company (Battle Creek, Michigan) titled “Pure Products of Nuts.” These include Bromose and Nuttose.

Kellogg, John H. 1898. *Good Health*. Jan. p. 46. Nuttose is “a thoroughly cooked and sterilized product of nuts, chiefly peanuts. Nuttose is made in the form of a cheesy mass which readily dissolves in the digestive fluids, the nuts having been first completely disintegrated and then thoroughly cooked. It contains about the same amount of proteids as beefsteak, and, in addition, between twenty-five and thirty per cent of easily digestible nut fat in a state of natural emulsion.”

Concerning the establishment and name of this company: Richard Schwarz in his excellent book *John Harvey Kellogg, M.D.* states: “Shortly after the production of Granola for patients at the sanitarium began in 1877, Dr. Kellogg organized the Sanitarium Food Company as a subsidiary of the Battle Creek Sanitarium. Operated as an adjunct to the sanitarium bakery, for more than a decade it marketed a variety of oatmeal, graham, and fruit crackers and whole-grain cooked cereals—all originally devised to provide variety in the menu of sanitarium patients.” All products were made from whole grains without artificial additives, and all underwent prolonged high-temperature baking designed to dextrinize their starch. “By 1889 the Sanitarium Foods had become popular enough to warrant the establishment of a separate factory; Granola alone sold at the rate of two tons a week.” But when Dr. Kellogg wanted to expand the business, other sanitarium doctors refused to vote the funds. So Dr. Kellogg launched the private Sanitas Food Company, relying heavily on his younger brother, Will Keith, who had served as his personal accountant and business manager since 1880. John Harvey’s new flaked cereals and vegetable meats became the property of the Sanitas Company. In mid-1906 Dr. Kellogg decided to change Sanitas’ corporate name to the Kellogg Food Company.

The Loma Linda University Library Heritage Room (Loma Linda, California) has a copy of a stock certificate for this company (White document file #497-h). On the certificate two company names appear: Sanitas Nut Food Co. and Sanitas Food Co.

Talk with Duff Stoltz of Battle Creek, Michigan. 2001. April 26. Duff believes that Nuttose probably contained peanuts as the main ingredient. Dr. Kellogg was making peanut butter by this time and his first U.S. patent (No. 567,901), issued on 15 Sept. 1896, describes the production of both peanut butter and peanut meal. He could well have used the latter to make Nuttose.

17. Kellogg, John Harvey. 1896. Nuttose: A new food for brain and muscle building. *Good Health (Battle Creek, Michigan)* 31(7):195-96. July.

• **Summary:** A disease known as “amylaceous dyspepsia” requires a diet which is entirely free of starch. “Quite a large

proportion of persons suffering from this form of dyspepsia find so much relief from their distressing symptoms by the use of a flesh diet that they are naturally led to the conclusion that a vegetable diet does not agree with them...” To meet the needs of such patients, Dr. J.H. Kellogg has developed Nuttose, a most delicious and wholesome food, made solely from nuts. “It is so perfect a substitute for flesh food that in eating it one could readily imagine himself to be partaking of roast beef, dried beef, broiled chicken, or other meats, according to the mode of preparation.”

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “substitute for flesh food” used to refer to a meat alternative.

“Nuttose not only satisfies the craving for meat, but supplies the same kind of nutriment, and in a form which is digestible, and wholly free from the unwholesome properties of flesh food. Nuttose contains exactly the same proportion of proteids, or nitrogenous matter, as beefsteak, and in addition, thirty per cent. of fat, and a rich supply of the nerve- and bone-building salts. The invention of nuttose has thus removed one of the greatest obstacles which had stood in the way of the advancement of dietetic reform.”

“Nuttose has the advantage over meats and most other foods in that it is very quickly digested, agrees with almost any stomach, can be made an exclusive article of diet if necessary, and contains all the elements required for complete nutrition... Nuttose is put up in one and one-half pound tins, hermetically sealed, and in this condition will keep for an indefinite length of time.”

Note 2. Nuttose appears to be Dr. Kellogg’s first meatlike or cheeselike product, and the first commercial meatlike or cheeselike product introduced by any Caucasian in the Western world. Though Nuttose was usually marketed as a substitute for meat, it was described as having “a consistency similar to brick cheese,” and therefore could also be used as a cheese substitute.

Note 3. This is the earliest document seen (Oct. 2013) concerning a Western-style cheese alternative. It was a non-soy, non-dairy cheese alternative—although it did not melt. Address: M.D.

18. Kellogg, John Harvey. 1896. A doctor’s chats with his patients: A new food for diabetics. *Good Health (Battle Creek, Michigan)* 31(8):248. Aug.

• **Summary:** The new food is Nuttose. “Until recently the almost universal prescription for persons suffering from diabetes has been a meat diet, it being well known that the leading symptom of this disease is the presence of sugar in the urine, which is aggravated by the use of starchy foods. Within the last few years, however, eminent French physicians have pointed out the fact that in the exclusive or free use of meat there is great danger of so filling the system with a class of poisons which abound in meat, and are known as leucomains and ptomains, as to produce death by a

diabetic coma...

“Gluten derived from wheat, the nitrogenous principle of Soja bean, and the casein of milk, have been substituted for meats with advantage. But the patient tires of these substances, which, by their means of production, are necessarily deprived of their natural flavors, and consequently do not appeal to the palate in an appetizing way.

“As a result of a long series of expensive experiments and investigations, it has been found possible to prepare from nuts a food which answers perfectly the requirements of a person suffering from diabetes. This food, known as nuttose, closely resembles meat, both in its appearance and flavor. Its [percentage] composition is as follows:—Proteids, 15. Vegetable fat, 23.3, with a very small proportion of soluble starch and dextrin. It also contains an abundance of the salts, phosphates, etc., which accompany both vegetable and animal proteids, and hence is a perfect food. Nuttose is furnished in hermetically sealed cans, in which it will keep indefinitely.”

Note: This is the earliest document seen (Oct. 2004), by or about Dr. John Harvey Kellogg, that mentions the soy bean [actually “Soja bean”]. It is also the earliest soy-related article seen in Dr. Kellogg’s periodical *Good Health*. Dr. Kellogg was born in 1852. Address: M.D., Superintendent of the Battle Creek (Michigan) Sanitarium.

19. E.E.K. [Ella Eaton Kellogg]. 1896. Nuttose, and some recipes for its use. *Good Health (Battle Creek, Michigan)* 31(9):275. Sept.

• **Summary:** The author is Dr. John Harvey Kellogg’s wife. Nuttose “is a pure product of nuts. It is intended as a substitute for meat, which it completely replaces dietetically...” Six brief recipes are given. Soy is not mentioned.

Note: This is the 2nd earliest English-language document seen (Nov. 2014) that contains the term “substitute for meat” (or “substitute for meats,” with any combination of quotation marks).

20. Kellogg, John Harvey. 1896. Cow’s milk a cause of disease: Editorial. *Modern Medicine and Bacteriological Review (Battle Creek, Michigan)* 5(9):220-23. Sept.

• **Summary:** Contents: Introduction. Milk a natural food for infants, but not for adults. Milk the cause of biliousness. Milk the cause of nervous headache, or migraine. Vegetable substitutes for milk.

“Cow’s milk differs very materially from mother’s milk, containing less sugar, more fat, and four times as much casein [protein] as mother’s milk. The casein in cow’s milk also differs from that in mother’s milk in that it forms large, firm, tough curds, whereas those formed in mother’s milk are small, soft, and friable, crumbling easily into small particles under the action of the stomach.

“It will thus be seen that that popular notion that since milk is the natural food of infants, cow’s milk must be the most wholesome and easily digested of all foods for adults, is without proper foundation. When pure cow’s milk is fed to infants, the child not infrequently vomits fragments of decomposing curds, which, having remained many hours in the stomach, are still hard, tough, and leathery. Every nurse is also familiar with the fact that the bowel discharges of children fed upon cow’s milk often contain large quantities of tough, undigested curds.”

“The writer has become thoroughly convinced that there are few persons who do not suffer sooner or later from the long-continued use of cow’s milk.”

“Vegetable substitutes for milk.—Some years ago Sir B.W. Richardson, the eminent London physician, prophesied that the time would come when milk, as well as all other forms of animal food, would be derived directly from the vegetable kingdom... The milk of the cocoanut furnishes a satisfactory substitute for cow’s milk to the teeming millions of many tropical countries...” Most nuts, when crushed and mixed with water, give a solution “closely resembling milk...” By the addition of a proper amount of sugar, preferably levulose or maltose, a very perfect substitute for milk may be produced. Such a preparation may be made from almonds...”

“In the experiments which we have made with nut milk we find it has a delicate, delightful flavor, with a suggestion of its nutty origin, but resembles cow’s milk very closely indeed... Added to cow’s milk in proper proportion, lac vegetal, or nut cream, prevents the formation of hard curds in the stomach, as when the cow’s milk is used alone. This renders it an exceedingly valuable food for infants—vastly superior to any infant’s food which has been devised.”

“Nuts are unquestionably the vegetable analogue of meat and other animal foods, not only containing all the food elements to be found in animal products, but in finer and more digestible form, more delicately flavored, and wholly free from deleterious elements which abound in meat...”

Note 1. This is the earliest English-language document seen (Feb. 2012) that uses the word “vegetal” to refer to a plant-based or pure vegetarian diet. *Merriam-Webster’s Collegiate Dictionary* (1998) defines vegetal (derived from the Middle Latin *vegetare*, meaning to grow), a word first used in English in the 15th century, to mean: “1: vegetable. 2. Vegetative...”

Note 2. This is earliest English-language document seen (Aug. 2013) that contains the term “nut milk” (or “nut milks” or “nut-milk”) or the term “nut cream” (or “nut creams” or “nut-cream”) or the term “lac vegetal” (or “lac-vegetal”).

Note 3. This is earliest English-language document seen (Nov. 2014) that contains the word “analogue” (spelled that way) in connection with meat or meat alternatives—Nuts are “the vegetable analogue of meat...” Address: M.D., Battle Creek, Michigan.

21. Sanitas Food Co. 1896. New nut products (Ad). *Chicago Vegetarian* 1(3):8. Nov.

• **Summary:** Four products are advertised: 1. “Nuttose. A pure product of nuts, of the consistency of cheese, having somewhat the appearance and flavor of cold roast mutton.” May be prepared like meats.

2. “Bromose. Makes fat and blood. This is a product made by malting nuts, and is especially adapted to persons who cannot digest starch.”

3. “Nut Butter. A substitute for ordinary butter, presenting fat in the form of a perfect emulsion; combined with water, forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter.”

Note 1. This may well be peanut butter.

4. “Nut Cream. A delicate, delicious nut preparation, which, properly diluted, furnishes a delicately-flavored cream or milk. It resembles milk in appearance.”

Note 2. This is probably made from peanuts and/or almonds.

“Send 25 cents in stamps for samples. Circulars free on application.”

Note 3. This is the earliest English-language document seen (Aug. 2013) that contains the term “Nut Cream.” Address: 65 Washington St., Battle Creek, Michigan.

22. Newberry’s. 1896. Just arrived: Another shipment of Health Foods in today from Battle Creek (Ad). *Los Angeles Times*. Dec. 3. p. 7.

• **Summary:** “Bromose, Nuttose, Almond Meal, Granose, Caramel Cereal, Granose Flakes and Avandola.” Address: 216 and 218 South Spring Street [Los Angeles, California].

23. Hoy, Albert Harris. 1896. Eating and drinking: The alkalinity of the blood, the test of food and drink in health and disease. Chicago, Illinois: A.C. McClurg and Co. 304 p. Index. 20 cm.

• **Summary:** Saliva contains ptyalin, which converts / digests the starch in food into maltose, a sugar. Saliva is a weakly alkaline fluid; acids inhibit its action. After mastication, food is swallowed and enters the stomach—which is normally free of acid for 30-45 minutes during the process of eating (p. 44-47).

Results of experiments published by Dr. J. von Feder show that the increasing alkalinity of the blood is nature’s way of overcoming harmful bacteria. After the blood is infected, its alkalinity suddenly increases (p. 82).

Chapter 6 (p. 222-95) is titled “Food, its effects on the alkalinity of the blood.” In discussing the subject of vegetarianism, the question is always raised: “Is animal food, in some form, absolutely essential for all races of men? The answer must be equivocally, no.” Vegetarians are divided into two classes, from hygienic [health] and from ethical considerations. Vegetarians of the first class

partake of butter, milks, eggs, and cheese—food which can be procured without taking life. Ethical vegetarians eschew the use of animal fat, substituting in its place vegetable fat, as olive oil, cocoa butter, etc. (p. 234-35). The daily ethical vegetarian diet of a healthy woman from Oct. 27 to Nov. 23 is given; it includes Graham bread, nut butter, nuts, cocoanut butter, bananas, grapes, and gluten pancakes (p. 238-43). “That the proper alkalinity of her blood was maintained was shown by the amphoteric condition [capable of reacting chemically either as an acid or as a base] of her morning urine.” Vegetarians have always claimed that meat-eating causes both intemperance [over-consumption of alcohol] and excess thirst (p. 244).

The longer meat has stood after an animal dies, the more acid is generated by uric acid. Cooked meat is “less stimulating than rare. Trainers of fighting dogs recognize this and put their brutes on a raw meat diet before contests” (p. 251).

“An artificial milk, made from sweet almonds, is highly recommended in many cases of febrile diseases or in cases of feeble digestion and assimilation, and often given better results than natural milk.” Directions for making it at home are given (p. 262-63).

Soups made by pureeing peas, beans and lentils only are “rich in a substance known as legumin, which is simply a vegetable caseine. This is as nourishing as the caseine of milk...” (p. 271).

Gluten “satisfies, by itself, all that nature demands for prolonged and complete nutrition.” “The writer recommends it very highly as a non-acid-making, non-fermenting food, and feels justified in asking physicians to give it a thorough trial” (p. 275, 277).

Note: This is the earliest document seen (Aug. 2004) that discusses, systematically and at length, alkalinity, alkaline vs. acid reaction, or the alkalinity of the blood in relation to human health. Note that the author is an M.D. Address: M.D., 103 State Street, Chicago, Illinois.

24. Kellogg, Ella Ervilla Eaton. 1896. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 184 p. Index. 24 cm.

• **Summary:** The wife of the famous Dr. John Harvey Kellogg discusses her system of meatless cookery—though the term “vegetarian” is not used. She lived 1852-1920. Contents: Eight pages of ads (for books, foods, and medical instruments/devices). Title page. Cereals (incl. Graham grits, Graham apple mush). Preface. Introduction. Cereals (incl. Graham grits, Graham meal). Macaroni. Fermented or yeast bread (incl. whole-wheat bread, Graham or wheat-meal bread). Unfermented or aerated bread (incl. Graham puffs, Granola gems). Fruit (cooking, canning). The leguminous seeds (incl. peas, beans, lima beans, lentils, cooked peanuts). Vegetables. Soups (incl. without milk, with milk and cream; Bran stock). Eggs (incl. cream). Desserts. Pastry. Cake.

Toasts. The Battle Creek Sanitarium Health Food Company's products (discusses and contains recipes using Granola, Granose, Crystal Wheat, gluten {13 recipes}, nut butter and nut meal, Nuttose, zwieback, and caramel cereal, p. 139-52). Hints about every-day work. Every-day bills of fare.

The eight ads on unnumbered pages in the front of the book are for: (1) "Caramel-Cereal. A most delicious substitute for the Coffee Bean, and contains none of its harmful properties... Caramel-Cereal has been used for over twenty years at the Battle Creek Sanitarium, and the demand has increased daily... Try it, and you will always use it... Manufactured by Battle Creek Sanitarium Health Food Co." (2) Battle Creek (Mich.) Sanitarium Health Foods. "Eat Granola, Granose. Drink Caramel-Cereal." (3) Charcoal Tablets: Antiseptic... Absorbent. Sanitas Food Company, Battle Creek. (4) Almond Meal, from Sanitas Food Co. (5) Lac Vegetal or Nut Cream: Prepared from the choicest nuts. A perfect substitute for cow's milk. Sanitas Food Co. (6) Bromose: Makes fat and blood. "Consists of cereals and nuts in which the starch is completely digested... Unequaled as a tissue builder... Gain in flesh." Sanitas Food Co. (7) The natural abdominal supporter. Modern Medicine Co., Battle Creek. (8) *The Stomach: Its Disorders and How to Cure Them*, by J.H. Kellogg, M.D. Modern Medicine Publishing Co.

A table (p. 7) shows the "nutritive value of some common food substances," including sweet almonds, peanuts, five legumes, milk, and six types of meat and poultry, and eggs. Values/columns are given for: Water, albuminous elements, starch, grape sugar, free fat, salts, cellulose, proportion of carbonaceous to nitrogenous material, total nutritive value.

The chapters on cereals and breads include Graham Grits, Wheat-Meal or Graham Mush, whole-wheat breads, Graham breads, Graham Puffs, etc.—but most breads are made with white flour and milk—and fermented. The chapter on leguminous seeds contains two recipes for blanched and boiled peanuts (p. 76); soy beans are not mentioned. Milk, cream, eggs, and sugar are used in moderation throughout the book. There is an entire chapter titled "Eggs." Desserts are generally sweetened with sugar. Up to 1 cup of sugar is used in some recipes (p. 117), but fruits are often used instead; milk or cream are also widely used in desserts. The chapter on "Pastries" (mostly pies) begins by discussing the dietetic evils of pastries; recipes calls for less fat than typical recipes.

The section on "Nut Butter and Nut Meal" (p. 147-49) notes that these two foods "have been prepared as substitutes for butter and cream," which cause many persons to "suffer from biliousness, nervous and sick-headache, and various forms of indigestion." Ten recipes are given. For example (p. 149): "Nut Butter Sandwiches.—Spread slices of thinly cut graham bread with nut butter, and then with chopped dates or figs..." Note 1. Although "peanut butter" is not mentioned,

this is almost certainly a peanut butter sandwich. Yet this book contains no recipe for making peanut butter at home.

The section titled "Nuttose" (p. 149-50) states: "This is a pure product of nuts. It is intended as a substitute for meat, which it completely replaces dietetically, having nearly twice the nutritive value, while it furnishes the same elements and in a form much more digestible, and wholly free from the objectionable features of meat. Nuttose may be prepared and served in the same manner as the various forms of flesh food. It so perfectly resembles meat in appearance and flavor, as well as nutritive properties, that many persons find it difficult to distinguish the difference. 7 recipes are given.

The 1¼ page discussion of Zwieback (p. 151) states: "Any one who has ever made a visit to Carlsbad [Karlsbad or Karlovy Vary in today's Czech Republic] will remember the delicious zwieback which occupies so conspicuous a place in the bill of fare... At Carlsbad, zwieback is made by exposing the sour 'schwartz brodt' to moderate heat for several hours until the starch becomes to dextrin and dextrose. For years the Sanitarium Health Food Company has manufactured for the use of the numerous patrons of the Medical and Surgical Sanitarium, Battle Creek, Mich., a superior quality of zwieback, which is not only more palatable but much more wholesome than the original article of Carlsbad manufacture... With milk or cream it is a real delicacy, as toothsome as it is nourishing and easy of digestion. Zwieback is supplied in three grades as follows:—No. 1. Made of graham flour (Sanitarium brand), containing fifteen per cent. of gluten... For recipes, see pages 145 to 138."

Note 2. This is the earliest document seen (July 2004) that contains the word "zwieback" (pronounced SWEE-bak in English). The word is also spelled like this in German, but with a capital "Z" and pronounced TSVEE-bak. The earliest occurrence of the word seen by *Merriam-Webster's Collegiate Dictionary* is 14 March 1894, *New York Weekly Tribune* (p. 5, col. 4). "These Zweiback will keep for a long time if put in a dry place." Note spelling and capitalization!

The eight ads on unnumbered pages in the back of the book are for: (1) Health Foods—Granola, a health food, an invalid food. From Battle Creek Sanitarium Health Food Co. Established 1876. "One pound more than equals three pounds of best beef." (2) Health Foods—Granose, Granola, Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Wheat Grits, Germless Corn Grits, Crystal Wheat, gluten preparations, diabetic foods. Send for a catalogue and price list to Battle Creek Sanitarium Health Food Co. (3) "Almond Butter—A substitute for ordinary butter. Presenting fat in the form of a perfect emulsion. Combined with water it forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter. Send five cents for sample. From: Sanitas Food Co., Battle Creek. (4) "Nuttose—Pure product of nuts. Perfect substitute for all flesh foods. Makes fat and blood. In their natural state nuts are difficult

to digest, and cannot be eaten by many persons... Nuttose has the consistency of cheese, and much the consistency of cold roast mutton, and may be eaten cold, stewed, cooked with vegetables or other foods, made into gravies and other preparations in the same manner as meat..." "Send ten cents for a sample can... Ready to eat at once. Keeps indefinitely." From: Sanitas Food Co., Battle Creek.

(5) *Science in the Kitchen*, by Mrs. E.E. Kellogg. Published by Modern Medicine Publishing Co., 65 Washington St., Battle Creek, Michigan. (6) Universal Mercurial Dynamometer, developed by Dr. Kellogg for testing the strength of individual groups of muscles in the human body. From: Sanitary and Electrical Supply Co., Battle Creek. (7) *Home Hand-Book*, by Dr. J.H. Kellogg. Published by Modern Medicine Publishing Co. Over 1,700 pages and 500+ engravings. Describes the best means of preserving and regaining health. (8) Perfection vaporizer, from Modern Medicine Co. Address: A.M., author of "Science in the Kitchen," etc., Battle Creek, Michigan.

25. Kellogg, John Harvey. 1896? Cow's milk a cause of disease (Brochure). Battle Creek, Michigan. 18 p. Undated. 15 cm.

• **Summary:** Contents: Introduction. General suspicion of cow's milk. Milk a natural food for infants, but not for adults. Why milk disagrees with adults. Milk the cause of biliousness. Milk the cause of nervous headache, or migraine. A vegetable substitute for milk (Lac Vegetal, or Nut Cream, sterilized in half pound tin cans). Nuts and fruits remain man's natural diet. The advantages of Nut Cream (10 advantages). Directions for use.

Infants who cannot digest cow's milk should "add one part of Nut Cream to six parts of thin gruel made of the Sanitarium Infant Food, or Sanitarium Gluten Meal. Every one who has seen Nut Cream and tasted it, is astonished that so close an imitation of milk could be produced from nuts. It constitutes one of the most useful and interesting products of the many experiments which have been conducted by the Sanitas Food Co. Taken together with Nuttose, nut cheese, and nut butter, Nut Cream completes the list of substitutes for most common animal food substances; namely, meat and milk and their products."

Note: This brochure was probably published shortly after an article by the same title appeared in *Modern Medicine and Bacteriological Review* (Battle Creek, Michigan) (Sept. 1896, p. 220-23)—because it is longer and more detailed. Address: M.D., Battle Creek, Michigan.

26. *Bruce Herald* (Otago, New Zealand). 1897. Miscellaneous. Jan. 12. p. 6.

• **Summary:** "Vegetable meat of Japan, called "torfu" [sic, tofu], is said to consist chiefly of protein of the soya bean, and to be as nutritious and digestible as meat. It is sold in tablets, is white as snow, and tastes like fresh malt."

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "vegetable meat" (or "vegetable meats"—with any combination of hyphens or quotation marks). This "vegetable meat" is tofu, which is made from soya beans.

27. Newberry's. 1897. Health, 'Lead in quality and quantity.' We are headquarters for Battle Creek Sanitarium Health Foods. The following is a partial list (Ad). *Los Angeles Times*. March 7. p. 27.

• **Summary:** "Granose Flakes—20¢ a package. Arenola—15¢ a package. Granola—15¢ a package. Bromose—50¢ a package. Nuttose—25¢ a can. Zwieback—15¢ a package. Glutin [Gluten] Biscuits—40¢ a package. Glutin Wafers—25¢ a package. Caramel Cereal, a substitute for coffee—15¢ a pound. Whole Wheat Wafers—15¢ a package.

"Just in a large shipment of shredded whole wheat biscuits, from Worcester, Massachusetts, 15¢ a package." Address: 216 and 218 South Spring Street [Los Angeles, California].

28. New York Food Co. 1897. Notice (Ad). *Indicator* (New York Tract Society, Rome, New York; Seventh-day Adventist) 7(37):4. Sept. 29.

29. Kellogg, Ella Ervilla (Eaton) (Mrs.). 1897. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 184 p. Index. 22 cm. [2 ref]

• **Summary:** The text of this book is identical to that of the 1896 edition, and on the same pages. However the order and location of the ads are different.

The eight ads on unnumbered pages in the front of the book are for: (1) *Science in the Kitchen*, by Mrs. E.E. Kellogg. Published by Modern Medicine Publishing Co., 65 Washington St., Battle Creek, Michigan. (2) Universal Mercurial Dynamometer, developed by Dr. Kellogg for testing the strength of individual groups of muscles in the human body. From: Sanitary and Electrical Supply Co.,

Battle Creek. (3) *Home Hand-Book*, by Dr. J.H. Kellogg. Published by Modern Medicine Publishing Co. Over 1,700 pages and 500+ engravings. Describes the best means of preserving and regaining health. (4) Perfection vaporizer, from Modern Medicine Co. (5) Health Foods—Granola—a health food, an invalid food. From Battle Creek Sanitarium Health Food Co. (6) Health Foods—Granose, Granola, Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Wheat Grits, Germless Corn Grits, Crystal Wheat, gluten preparations, diabetic foods. Send for a catalogue and price list to Battle Creek Sanitarium Health Food Co. (7) “Almond Butter—A substitute for ordinary butter. Presenting fat in the form of a perfect emulsion. Combined with water it forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter. Send five cents for sample. From: Sanitas Food Co., Battle Creek. (8) “Nuttose—Pure product of nuts. Perfect substitute for all flesh foods. Makes fat and blood. In their natural state nuts are difficult to digest, and cannot be eaten by many persons... Nuttose has the consistency of cheese, and much the consistency of cold roast mutton, and may be eaten cold, stewed, cooked with vegetables or other foods, made into gravies and other preparations in the same manner as meat...” “Send ten cents for a sample can... Ready to eat at once. Keeps indefinitely.” From: Sanitas Food Co., Battle Creek.

The last 8 unnumbered pages of the book contain more ads. Foods from Sanitas Food Co. in Battle Creek include: Almond Meal, Lac Vegetal or Nut Cream (“Prepared from the choicest nuts. A perfect substitute for cow’s milk. Added to cow’s milk, it increases its digestibility. Especially valuable for invalids and infants”), and Bromose (“Consists of nuts and cereals, in which the starch is perfectly digested... It is the most easily digested and most fattening of all foods.”).

Other terms *not* seen in this book: Bran, roughage, dietary fiber, or fiber (but cellulose is mentioned in a table on p. 7).

A slightly enlarged edition (186 p.) of this book was published in 1898, and another in 1900 (copyright 1896). Address: Battle Creek, Michigan.

**30. Product Name:** Nuttolene (Meatlike or Cheeselike Product Made from Nuts—Mostly Peanuts, No Soy).

**Manufacturer’s Name:** Sanitas Nut Food Co. from 1899. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.

**Manufacturer’s Address:** Battle Creek, Michigan.

**Date of Introduction:** 1898 May.

**Ingredients:** Mainly peanuts.

**New Product—Documentation:** *Food, Home and Garden* (Philadelphia). 1898. “Nuttolene.” May. p. 74. “This is a new product of the Sanitas Food Co., Battle Creek and is a solid substance that can be sliced like cheese which it somewhat

resembles in flavor. It is also good for sauces having a rich flavor.”

31. Sanitas Nut Food Co., Ltd. 1898. Twentieth century foods (Ad). *Gospel of Health (Battle Creek, Michigan; Seventh-day Adventist)* 2(5):106. May.

• **Summary:** A ½-page ad. The company makes the following foods: Ambrosia. Bromose. Nuttose. Nut Butter. Malted Nuts. Maltol. Address: A 25, Battle Creek. Michigan.

32. *Good Health (Battle Creek, Michigan)*. 1898. The medical opinion of the Battle Creek Sanitarium Health Food Company’s products. 33(6):391. June.

• **Summary:** The London *Lancet* is one of the leading medical publications of the world. It is recognized as an eminent authority in all parts of the civilized globe. A recent issue contains the following reference to the foods manufactured by the Battle Creek Sanitarium Health Food Company and the Sanitas Nut Food Company: -

“There are some novel and interesting dietetic preparations in the list of this company. They consist chiefly of food prepared from cereals and from nuts.

“Granose Flakes,’ for example consists of light brown flakes resembling potato chips, which on analysis present the composition of wheaten flour of superior quality—that is, flour in which all the essential food constituents are retained. The nitrogen amounted to 2.14 per cent., which is equivalent to a total of 13.37 per cent. albuminoids. The moisture amounted to 12.02 per cent., and the mineral matter to 2.09 per cent. The microscope showed the presence of starch granules highly distorted by cooking, probably by steam. The preparation is undoubtedly nutritious, not merely on account of its composition, but also because the constituents are prepared for the digestive process.

“Nuttose’ is an oily compound prepared from nuts. The fat is in a finely divided state, amounting to an emulsified condition, while the carbohydrates and nitrogenous matter are previously treated so as to render them easy of digestion.”

Bromose and Caramel Cereal (an alternative to coffee) are also discussed.

33. Birmingham Vegetarian Hotels & Restaurants, Ltd. 1898. “Pitman” Stores price list. Birmingham, England: 21 p.

• **Summary:** A facsimile of this first Pitman catalog appears after page 16 in the book: Hill, Ray. 1998. *The Health Food Store: A Nostalgic Look at the First—Its Origins, Philosophy and Development*. Gloucestershire, England: NuHelth Books.

The catalog has a blue cover, printed with black ink on the front and rear. Then next 23 pages show the contents of the catalog, which are the foods sold at the “Pitman Store” located on the ground floor of the “Pitman Hotel and Restaurant,” located at 159, Corporation Street, Birmingham,

England—next to the County Court.

At the top of the front cover is written: "Fruits, Cereals, Italian Goods, Vegetarian Specialities, &c. &c. The date, December 1898, appears at the bottom of the front cover. An illustration of the hotel, restaurant and store building appears on the inside front cover.

The first two pages of the catalog discuss: Good sold. Quality of Goods. Terms. Delivery. Postage. Standing orders. Lists. Parcel Post Rates. The rest of the catalog is the "Price List." The goods (mostly foods) are listed in alphabetical order. Some interesting items are: Agar agar (Vegetable gelatin for jellies). Almonds (7 types). Apples (8 types). Beans (6 types, not including soy). Blanc Mange Powder (Dr. Allinson's). Bottled fruits. Breakfast food (for invalids). Bromose (Malted nuts for Consumption, &c.). Butter (5 types). Caramel Cereal (Tea or coffee substitute made from wheat). Chutney (10 types). Flour (10 types, incl. wholemeal). Granose biscuits, Granose flakes. Jams and preserves (2 pages). Ketchup (mushroom, walnut, tomato). Milk ("Ideal," unsweetened in tins). Nut butter. Nuttose ("Product of nuts; a perfect substitute for meat, and much more nourishing"). Nuts. Oil. Parmesan cheese. Peas. Pea flour. Peanuts. Rice. Sago (small, pearl, bullet). Wheat. Wheatose.

On the inside rear cover (also black ink on blue) is a full page of vegetarian literature, especially vegetarian cookery. Most of the publication sell for one penny each, but some larger ones are threepence each, and nine books are tenpence each. The rear cover is the same as the front cover.

As Ray Hill explains on page 3 of his book, the man

behind this catalog and the concept of a health food store was James Henry Cook, a portrait photo of whom appears on page 4 of Hill's book.

As Illustration of the Pitman Hotel and of James Henry Cook have been added from *The First Century of Health Foods*, by Kathleen Keleny, James Cook's daughter. Address: 159, Corporation Street, Birmingham, England.. Phone: 2972. Telegrams, "Fruit, Birmingham".

34. Sanitarium Health Food Company. 1899. Protose and Beans (Ad). *Modern Medicine (Battle Creek, Michigan)* 8(6):Ad at rear of issue. June.

• **Summary:** A full-page ad on page 5 of "Advertisements" at rear of issue. "A delicious, appetizing, and nutritious combination.

"Protose is a vegetable meat containing 25% more food value and 10% more fat-making properties than beef, with a rich, delicious, meaty flavor.

"Sanitarium Baked Beans. Are cooked three times and are easily digested. Prepared in a scientific manner, rendering them the most digestible preparation of beans on the market.

"The addition of Protose makes these porkless beans the most toothsome product imaginable. A new combination of food properties, representing the new and progressive ideas of the best food experts in the country.

"Sample free.

"Send us the name of a grocer who does not sell Sanitarium Baked Beans, with eight cents to pay postage, and we will mail you a sample can.

"Art Booklet on Health Foods for the asking."

Note: This is the 2nd earliest English-language document seen (Nov. 2014) that contains the term "vegetable meat" (or "vegetable meats").

Note: This is the earliest document seen (March 2010) that mentions "Protose," a vegetable meat made in Battle Creek, Michigan.

This same ad appeared in the next issue of this magazine, in the same place. Address: Battle Creek, Michigan.

35. **Product Name:** Protose (Meatlike Product Made of Peanuts and Cereal—No Soy).

**Manufacturer's Name:** Sanitas Nut Food Co., Ltd. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.

**Manufacturer's Address:** Battle Creek, Michigan.

**Date of Introduction:** 1899 June.

**New Product—Documentation:** Ads in *Modern Medicine* (Battle Creek, Michigan). 1899. June. Full-page ads on pages 5 and 8 of "Advertisements" section at rear of issue.

Mrs. Anna L. Colcord. 1899. *A friend in the kitchen: Or, what to cook and how to cook it. Containing about 400 choice recipes carefully tested.* Oakland, California, San Francisco, New York, Kansas City: Pacific Press Publishing

Company. Protose is discussed in detail on pages 108-09. "Protose. This is also a nut product and is intended as a substitute for meat. It may be prepared and served in much the same way as flesh foods, which it resembles somewhat in both appearance and flavor. While it possesses nearly twice their nutritive value, it is free from their objectionable features. Protose makes a good flavoring for soups, and is excellent cooked with vegetables." Recipes are given for: Stewed Protose. Roast Protose. Protose sandwiches.

Ad for Protose by Sanitas Nut Food Co., Ltd. 1900. July. *Good Health* (Battle Creek, Michigan). Protose is described as an easy to digest, perfect substitute for meat.

*Good Health*. 1904. Jan. (Insert after p. 48) "Chart of food elements." Protose (0.5 pint or 4.2 oz) contains 21.3 [units not given] protein, 10.2 fat, 2.8 carbohydrates, and 60 food units per oz.

Lenna Frances Cooper. 1923. *The New Cookery*. 8th ed., revised. The section titled "Unusual foods referred to in this book" (p. 462-64) states: They are made by the Battle Creek Food Company, Battle Creek, Michigan: "Protose (a meat substitute made from cereal and nuts)."

# **PROTOSE**

## **VEGETABLE MEAT**

**T**HE MOST REMARKABLE DIETETIC DISCOVERY OF RECENT YEARS. Almost identical with flesh-food in composition, appearance, and flavor, Protose, being a purely vegetable product, is free from the many objections raised by eminent scientists against the use of meats.

Progressive physicians, who have for years been looking for a meat substitute for use in cases of chronic rheumatism, Bright's disease, diabetes, and the long list of nervous affections, are using Protose with marked success.

The London *Lancet*, London, England, one of the highest medical authorities, having made an elaborate analysis of Protose, published the following unsolicited report in its issue of Aug. 26, 1899:—

"Our analysis of Protose was as follows: Moisture, 64.22 per cent; proteids, 21.30 per cent; fat, 10.23 per cent; mineral matter, 1.40 per cent; carbohydrates, 2.85 per cent. **Chemically, therefore, it presents the composition of animal tissue, beef or mutton.** The fat exhibited a low melting point, and was easily saponified, so that it would probably be readily digested. The flavor of the preparation is not unpleasant, and somewhat meaty. Protose is unquestionably a food of some merit."

Your grocer will supply you with a sample of this unique food.

**BATTLE CREEK, MICH.**

John Harvey Kellogg. 1930. Good Health (Battle Creek, Michigan). Dec. 5, p. 5-7. "Soybeans as human food. I." "I was wholly unacquainted with it [the soybean], and so naturally sought to find in nuts, especially the peanut, a solution to the problem, and succeeded in producing a vegetable meat, Protose, of which several thousand tons have been since made and consumed." Note: It is not known when gluten was first used in this product, but "wheat protein" was the main ingredient in Protose made by Granose Foods in England in 1940.

Ad in *California Health News*. 1937. Feb. 19. p. 13. "For meatless days and for a delicious change. Protose: A satisfying vegetable meat." Illustrations show (each on a plate): Protose croquettes. Protose steak with onions. Protose

salad. A can of "Protose: Vegetable meat." "Protose is made of grains and nuts."

Ad for Protose: Vegetable Meat by Battle Creek Food Co., Ltd. 1939. *Good Health* (Battle Creek, Michigan). July, p. 380. "Protose, a vegetable meat, may be prepared in any of the ways in which meat is served." A small photo shows the Battle Creek Sanitarium.

Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 18. "Battle Creek Health Products: Vegetable Meats—Protose Vegetable Meat. 1 lb. \$0.50. ½ lb \$0.30.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Protose contains 22.30% protein, % fat, and 22.70% carbohydrate.

Richard W. Schwarz. 1970. John Harvey Kellogg, M.D. p. 122, 209-14, 216, 218. "In 1896 [Dr. John Harvey] Kellogg announced that he had perfected the ideal substitute for meat in Nuttose, a nut product which he could prepare to taste much like beef or chicken." This was his first meatlike product. Later he developed Protose. "Shortly after the production of Granola for patients at the sanitarium began in 1877, Dr. Kellogg organized the Sanitarium Food Company as a subsidiary of the Battle Creek Sanitarium." But when Dr. Kellogg wanted to expand the business, other sanitarium doctors refused to vote the funds. So Dr. Kellogg launched the private Sanitas Food Company, relying heavily on his younger brother, Will Keith, who had served as his personal accountant and business manager since 1880. "John Harvey's new flaked cereals and vegetable meats became the property of the Sanitas Company." In mid-1906 Dr. Kellogg decided to change Sanitas' corporate name to the Kellogg Food Company. Then: "In the spring of 1921, to avoid further difficulties with Will Kellogg's manufacturing business [Battle Creek Toasted Corn Flake Company], Dr. Kellogg changed his concern's name to the Battle Creek Food Company."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in "Protose (Battle Creek)."

Note 1. This is the earliest known commercial product that could be used as a meat alternative in place of beef. See, for example, "Protose steak with onions."

Note that in 1960 Worthington Foods had acquired Battle Creek Food Co.

36. Sanitas Nut Food Co., Ltd. 1899. The Dujardin-Beaumont antiseptic dietary (Ad). *Modern Medicine (Battle Creek, Michigan)* 8(6):Ad at rear of issue. June.

• **Summary:** A full-page ad on page 8 of the "Advertisements" section at rear of issue. "It is universally recognized by European physicians as essential to the successful treatment of Disorders of the Stomach and Liver. This dietary excludes flesh, fish, and shell-fish of all kinds. The chief difficulty in enforcing the non-flesh regimen is

the lack of a suitable variety of foods rich in proteids in the ordinary bill of fare.

"The Sanitas Nut Food Co. has discovered how to make all sorts of delicious meat dishes from nuts, by newly discovered processes, which have proved so successful that thousands of invalids are already daily regaling themselves with the most delicate and tasty meat 'stews,' 'roasts,' 'potted meats,' meat 'soups,' 'broths,' and other savory and blood-enriching viands, without the slightest fear of 'hepatic congestion,' 'uric acid diathesis,' or any thing of the sort.

"Vegetable Meat—in the form of 'Protose,' 'Nuttose,' 'Bromose,' 'Nutta,' And their congeners, is as much more toothsome than 'bloody beefsteaks,' as Bartlett pears are superior to crabapples. Address for circulars and further information,-

Advertiser” section at rear of issue. Should include dainty, delicious sandwiches made with Protose, the vegetable meat, containing 25 per cent. more food value and 10 per cent. more fat-making properties than beef. Our free cook book gives a score of appetizing ways to prepare Protose.

“Send us the name of a grocer who does not sell Sanitas Nut Foods, and six cents to pay postage, and we will send a can free.” Address: 80 Washington St., Battle Creek, Michigan.

40. Colcord, Anna L. (Mrs.). 1899. *A friend in the kitchen: Or, what to cook and how to cook it.* Containing about 400 choice recipes carefully tested. Oakland, California, San Francisco, New York, Kansas City: Pacific Press Publishing Company. 126 + v p. Illust. 19 cm.

• **Summary:** A Seventh-day Adventist vegetarian cookbook. The subtitle continues: Plain directions for healthful cookery; How to can fruit; A week’s menu; Proper food combinations; Rules for dyspeptics; Food for infants; Simple dishes for the sick; Wholesome drinks; Useful tables on nutritive values of foods, time required to digest foods, weights and measures for the kitchen, etc.

Pages 105-09 discuss “Specially Prepared Health Foods” which may be obtained from the St. Helena Sanitarium Health Food Company (St. Helena, California), of the Battle Creek Sanitarium Health Food Company (Battle Creek, Michigan). They include Granola (thoroughly cooked and partially digested; may be eaten with milk, cream, or fruit juice), Granose (light, crisp flakes; serve like Granola), Nut Butter (a substitute for butter and cream), Protose (“This is also a nut product and is intended as a substitute for meat...”), and Caramel Cereal (a “harmless and nutritious substitute for tea and coffee, both of which are now generally recognized by the best physicians as harmful beverages, and the cause of many nervous disorders. It is made wholly from grain products...”).

Page 120 gives a week’s menu and page 121 discusses the Sabbath and Sabbath dinners (“The Sabbath is the day of rest In order that it may be devoted by all to religious exercises, holy meditation, and spiritual delight, it should be as free as possible from the ordinary duties and cares of life... With proper planning, very little, if any, cooking need ever be done on the Sabbath...”).

A full-page ad on the next to last page of the book (unnumbered) lists foods available from the St. Helena Sanitarium Health Food Company (which has a San Francisco branch at 1422 Market St.): Granose (“The Queen of cereal foods”), Granola, Granose biscuit, Caramel cereal, Whole wheat sticks, Graham sticks, Pure gluten biscuit, Whole wheat zwieback, Whole wheat wafers, Nut butter, Nucose, Nutlet, Bromose, Malted nuts, Protose, Maltol, Ambrosia, Almond butter, Manno, Fruit coco. “Unfermented breads aid digestion: Most of our crackers and sticks are unfermented.”

Note: This is the earliest document seen that mentions Protose (which was Dr. John H. Kellogg’s first meat alternative product), or that mentions “Malted Nuts” (a nondairy product made principally from peanuts and almonds; when mixed with water it resembled malted milk).

41. Lambert, Almeda. 1899. *Guide for nut cookery: Together with a brief history of nuts and their food values.* Battle Creek, Michigan: J. Lambert & Co. 452 p. Illust. Index. 22 cm.

• **Summary:** Published in 1899, this book was copyrighted in 1898 by Mrs. Almeda Lambert (of Battle Creek, Michigan), who was almost certainly a Seventh-day Adventist. She quotes from Genesis 1:29 and on pages 60-65 she quotes extensively from the writings of Ellen G. White, the founder of the Seventh-day Adventist religion; she likewise advocates a vegetarian diet—indeed a pure vegetarian diet, free from milk and dairy products.

In the Introduction (p. 6) she states: “In the last few years there has been a great awakening in regard to healthful living and great strides have been made in the methods of emulsifying nuts into a paste or butter,—a convenient form for cooking purposes and much easier to digest. But the majority of those who have adopted nut butter, use it instead of the dairy product only to spread on bread. It is the object of the author to place before the public a book treating upon the use of nuts as shortening, seasoning, etc., to be used in every way in which milk, cream, butter, or lard can be used, and fully to take their place.”

Chapter 1, “Nuts and Their History” (p. 7-58) includes many species of nuts arranged alphabetically including almonds, beechnut, chufa (earth almond), cocconut, groundnut (*Apios tuberosa*, common in low, wet grounds), hickory-nut, litchi (leechee nut), peanut, pecans, sapucia-nut, souari-nut, pine-nut, walnut, and water chestnut.

The section on the peanut (*Arachis hypogaea*, p. 37-42) states that it is also “known in different localities as the earthnut, ground-pea, goober, pindar, jar-nut, and Manila nut. Strictly speaking it is not a nut at all, and should be more properly called the ground-pea.” About 3½ pages of extracts are given from *Farmers’ Bulletin* No. 25 titled “Peanuts: Culture and Uses,” by Robert B. Handy (1895). Mrs. Lambert then comments: “Thus we see that over thirty years ago, peanuts were not only used as tidbits [sic, tidbits] between meals, but also for culinary purposes. But since the invention of machinery for family use, for grinding the nuts into a butter, their use has spread over a greater territory. This is partly due to the fact that the expense is thus lessened, and not only this, but because the nut as it comes from the mill is in a much healthier condition to eat, being easier of digestion than the oil or the raw residue that remains after the oil is taken out. The nut butter can be easily mixed with water, forming an emulsion, and by thinning it sufficiently, it makes an excellent substitute for cream and milk. It can also

be made into various nut foods.”

A table compiled by Prof. König (p. 41) shows that peanut meal has the largest number of nutritive units per pound of twelve principal foods listed, and the cost of 1,000 nutritive units in the form of peanut meal is the lowest. For this reason the German army now uses peanuts, peanut flour and peanut meal extensively in its diet (p. 6).

In the chapter titled “Nuts: Their properties and food values” she states (p. 68-69): “The purest and most easily digested of all meats is the meat of nuts. In nutritive value they far exceed all flesh meats.” “Nuts are more digestible if they are first emulsified, as very few can masticate them fine enough to be acted upon by the digestive juices. The question of emulsifying nuts has been practically settled in the last few years by the invention of machinery for that purpose, both for family and factory use. It is sincerely hoped and believed that the time is not far distant when nuts will fully take the place of animal flesh, fats, and products.”

The chapter titled “Nut butter” (p. 70-75) describes how to make the following at home: “Peanut butter, raw peanut butter, almond butter, Brazil-nut butter, peanut cream, peanut milk, raw peanut milk and cream, almond milk, hickory milk, pine-nut milk, chufas milk, and cocoanut milk.”

Note 1. This is the earliest document seen (Aug. 2013) that mentions coconut milk, which it calls “cocoanut milk.”

Concerning homemade “Peanut butter” (p. 70-71): The introduction states: “The Spanish peanut makes the best peanut butter. The first essential thing is to have a nut-grinding mill” [such as the one made by Joseph Lambert & Co.]. The recipe itself states: “The first step is to roast the peanuts to a nice brown, being careful not to over-brown or scorch them, as too much cooking spoils the flavor. They can be roasted in an ordinary oven, but can be better done in a peanut roaster made especially for this purpose. As soon as they are roasted and cool, the skins or bran should be removed by rubbing them in the hands, or what is better, a coarse bag; or take a square piece of cloth and fold the edges together, forming a bag of it. The chaff can then be removed by the use of an ordinary fan, or by pouring from one dish to another where the wind is blowing. The process of removing the skins is called blanching. Next look them over carefully, remove all defective nuts and foreign substances, and they are ready for grinding. If a fine, oily butter is desired, adjust the mill quite closely, and place in the oven to warm. Feed the mill slowly, turn rapidly, and always use freshly roasted nuts; after they have stood a day or two they will not grind well nor make oily butter. If the butter is kept in a cool place in a covered dish, and no moisture allowed to come in contact with it, it will keep several weeks; and if put in sealed jars or cans, will keep indefinitely.”

Note 3. This is the earliest document seen (Dec. 2007) that contains a recipe for homemade peanut butter.

When making peanut cream and milk, roast the peanuts less than when making peanut butter. “They should have a

light straw color.”

Note 4. This is the earliest document seen (Oct. 2004) that mentions Joseph Lambert in connection with peanut butter. Unfortunately it provides little information on the history of peanut butter or the history of his work with it.

Note 4. This is the earliest document seen (Sept. 2000) that mentions almond butter (resembling the modern product) or gives a recipe: “Almond butter is more difficult to make than peanut butter because the skins can not be so easily moved. Roasting does not loosen the skins of the almond as it does of the peanut. They have to be soaked in boiling water from two to five minutes; then the skins become loose and can be pinched off by pressing on the nut with the thumb and finger; the skin will crack and the kernel pop out. But by this process the nuts have soaked up some water and become tough. They must then be dried in the oven until quite crisp, but the oven must not be hot, or they will brown. Then run them through a loosely adjusted mill or a sausage grinder, and place on a cloth stretched over the stove until perfectly dry; then grind them in the nut-butter mill, quite tightly adjusted. This makes excellent butter if the almonds are first-class, and sweet.”

Note 5. This is the earliest U.S. document seen (Sept. 2000) that mentions “Almond milk” which is prepared as follows: “Dissolve 1 tablespoonful of almond butter in 1 pint of warm water, adding a little at a time.

Note 6. This is the earliest English-language document seen (Aug. 2013) that contains the term “peanut milk.” Continued. Address: Battle Creek, Michigan.

42. Lambert, Almeda. 1899. Guide for nut cookery: Together with a brief history of nuts and their food values (Continued—Document part II). Battle Creek, Michigan: J. Lambert & Co. 452 p. Illust. 22 cm.

• **Summary:** Continued from p. 76. Other chapters include—Nut meal (p. 76-78): To make peanut meal, heat the nuts sufficiently to remove the skins, but do not brown them. Blanch (remove skins), then boil in water until very tender. Drain until perfectly dry, then grind in a mill that is loosely adjusted. If desired, rub through a flour sieve. A very rich meal can also be made by grinding raw peanuts. Meals can also be made from almonds, pine-nuts, etc.

Sausages (p. 79-81): For peanut sausages mix 1 tablespoon peanut butter, 2 tablespoons water, 3 tablespoons gluten or dry bread-crumbs, a little salt, sage, and parsley. Form into small cakes and bake on an oiled tin. Serve topped with Peanut Gravy No. 1.

Nut oil (p. 82-83): Boil ground cocoanuts or peanuts with water in a kettle for 1 hour. Set in a cool place and the oil will rise to the top. Nutmeatose, Nutora, etc. (p. 84-90): These foods are best cooked under high-pressure steam to make them quite solid. For Nutora of peanuts: Mix 2 cups raw nut butter or nut meal with 1 cup water and salt to taste. Beat with an egg beater for 5 minutes or more, then put into

cans and cook (in a steam cooker) for 3 or 4 hours. For “Nut cheese,” see p. 90.

Note 7. This is the earliest document seen (Nov. 2014) in the Western world concerning a meatless sausage.

Nutmeato (p. 91-127): This chapter contains many nut-based recipes for meat alternatives. The main ingredient is usually nut butter, but “nutmeatose” gluten, zwieola or toasted bread crumbs, and legumes are also used, along with corn starch and a little salt. The mixture is usually sealed in a can and steamed for 3-5 hours. Recipes include: Mock Nutmeato roast, Nutmeato steak, Nutgrano No. 1-10 (No. 1 and No. 8 use 1 cup raw peanut butter), Nutmeatose No. 1-7 (p. 97-98; No. 1 uses 2 cups peanut butter), Frutose, Frutosia, Butter for table (butter whipped with an equal quantity of water [“Better Butter”]), Roast goose (with full-page photo, based on zwieola {see p. 399} and eggs), Turkey legs, Chicken legs, Roast turkey (with photo, p. 105; “To make a good sized turkey, take 20 heaping tablespoonfuls zwieola, 20 tablespoonfuls of No. 3 gluten, 8 tablespoonfuls of pecan meal, 8 tablespoonfuls of roasted almond meal, 8 tablespoonfuls of black walnut meal, 2 tablespoons of peanut butter,...”), Nut lobster, Baked trout (with photo), Mock fish stuffed and baked, Sauce for baked fish (with photo), Mock turkey, Mock fish-balls, Vegetable nut roast, Mock salmon, Mock chicken croquettes, Mock fried oysters, Mock oyster patties, Mock chip beef. Includes many photos of the finished dishes.

Unleavened breads (p. 156-67): These are “made light without the use of yeast, baking-powder, or soda. Since they are the most healthful of all breads, it would be of benefit to mankind if they were in more general use.” For best results “run the dough through the nut-butter mill twice or more, instead of kneading by hand as directed in the recipes.” Recipes include: Graham gems, Raw peanut-butter gems, No. 1 gluten (made from best grade white flour which is rich in wheat gluten—such as Pillsbury’s Best). Yeast breads (p. 168-82) incl. Graham bread.

Legumes (p. 246-52) incl. Nut meatose beans, Vegetable turkey, boiled peanuts. Gravies for vegetables and toasts (p. 311-17) incl. Mock milk gravy (from peanut butter), raw peanut milk gravy. Pies (p. 320-32) incl. Peanut meal pie crust, Chufa cream pie crust.

Puddings (p. 333-43): “Puddings made with dairy milk and sugar combined are apt to ferment in weak stomachs. They are much better prepared without dairy milk.” Incl. Custard No. 1 (from raw peanut milk). Sauces for puddings (p. 344-49) incl. Almond cream sauce. Cakes (p. 354-75): “Cakes and pies are filled with animal fats, irritating spices, and are raised with baking-powder or soda, are certainly very unwholesome; to use them in our bill of fare could work nothing but injury to all who partake.

“Animals are becoming so diseased that it is no longer safe to use their flesh as food, and even if they were not diseased, free fats are hard of digestion.” (p. 354).

“Spices and condiments, which usually enter into cake making, are equally injurious. The effect that they have upon the stomach can be illustrated by putting them upon a raw surface or in the eye; inflammation immediately takes place. They irritate the nerves, cause irritability and peevishness, and create a craving for something more highly spiced, which often leads to grosser forms of intemperance.”

Drinks (p. 381-83) incl. Peanut and cereal coffee (with wheat bran, corn-meal, and malt), Peanut coffee No. 1-2 (roast peanuts until dark brown), Chufa coffee. Food for the sick (p. 400-01) incl. Almond milk, Graham gruel, Plain gluten gruel, Nut gruel (with almonds and peanuts), Egg nog (made from cocoanut cream, eggs, and sugar).

Note 8. This is the earliest document seen (Dec. 2012) that mentions or contains a recipe for a nondairy egg nog.

Creams, ices, etc. (p. 411-14) incl. Ice-cream No. 1-3 (made from almond or peanut cream, sugar, and eggs), Ice-cream made of peanut milk, Almond ice cream, Sherbets (from frozen fruit juices). To blanch nuts (p. 415-16); blanch peanuts dry and almonds by pouring boiling water over them. To salt nuts (p. 417-18). Confectionery (p. 419-24) incl. Peanut candy (with 1 lb each sugar and peanuts). Menus (p. 425-33) incl. Thanksgiving dinner: This “has been a great puzzler to the vegetarian housewife... I propose that we do have a turkey for Thanksgiving, not the corpse of a bird whose life was sacrificed to satisfy our perverted appetites, but something which... is only one made of nuts and grains... “With painstaking we shall have a better dinner than our sisters who have their platters laden [laden] with the remains of a barn-yard fowl, and with cakes and pies filled with animal fats and spices. Besides this, we shall have a clearer mind, as well as a clear conscience; while those who eat meat are taking poisons into the system which benumb the brain, cloud the conscience, and render man unfit to meet the vesper hour and hold communion with his God.”

Thanksgiving dinner menu (8-course meal), Christmas dinner. Composition of foods (p. 434-39) incl. Dietetic tables by Atwater and Woods of USDA. See p. 439 for composition of nuts.

On the last page is a full-page ad for nut grinders, blanchers, and peanut roasters made by Joseph Lambert & Co., Battle Creek, Michigan.

Note 9. This is the earliest U.S. document seen (March 1999) that mentions almond milk.

Note 10. This is the earliest document seen (Sept. 2013) that mentions a non-dairy non-soy ice cream; it is based on almonds or peanuts.

Note 11. This is the earliest document seen (Oct. 2014) that gives a recipe for a meatless turkey and the 2nd earliest that mentions meatless turkey. However soy is not mentioned.

Note 12. This is the earliest English-language document seen (Nov. 2014) that uses the terms “Turkey legs,” “Roast turkey,” “Mock turkey, or “Vegetable turkey” to refer to

meatless turkey.

Note 13. This is the earliest document seen (Oct. 2014) that mentions or gives a recipe for a meat alternative resembling beef: Mock Nutmeato roast, and Nutmeato steak. These were made with nuts rather than soy. Address: Battle Creek, Michigan.

43. *Los Angeles Times*. 1900. Care of the body: Valuable suggestions for acquiring and preserving health. Jan. 7. p. IM27.

• **Summary:** The section titled “A vegetarian restaurant” states: “Los Angeles has now a first-class vegetarian restaurant and it appears to be well patronized. The restaurant, which also keeps health foods for sale, is connected with a well-known hygienic institution [Battle Creek Sanitarium] in Michigan, which manufactures these foods on a large scale, and has branch sanitariums all over the world. For those who are not acquainted with the wide range of dishes at the command of the modern vegetarian in the United States, the following dinner bill of fare of the restaurant above referred to, on a recent Sunday, will be of interest:

“Bayo beans and tapioca soup, celery, cabbage salad, onions, nut and vegetable roast, egg macaroni, boiled potatoes with gluten sauce, lima beans and nut stew, carrots, vegetable stew, ambrosia, bromose tablets, shaved nuttose, sliced nucose, protose.

“Boiled eggs, plain omelet, scrambled, poached, poached on toast, and poached on granose.

“Rice with raisins, granose, granola, gluten mush with milk, nut cream or dairy cream.

“Steamed figs, pear sauce, baked apples with cream, sliced bananas with cream, stewed prunes, apple sauce, apples, oranges, and bananas. Apple charlotte, cream rice pudding.

“Cereal coffee, hot malted nuts, cold milk, hot milk, unfermented wine, glass one-half cream and one-half milk, lemonade, hot or cold orangeade, distilled water.

“Whole-wheat bread, graham bread, zweiback [zwieback], graham sticks, whole-wheat sticks, mixed wafers, oatmeal wafers, graham wafers, granose biscuit, gluten wafers, and whole-wheat wafers.”

Note: This is the earliest document seen (March 2007) worldwide that mentions a health foods restaurant.

44. *Vegetarian Messenger (Manchester, England)*. 1900. Price list of the Vegetarian Society’s food stores, 19, Oxford St., Manchester, S.E. April. Unnumbered page at rear of issue.

• **Summary:** The five categories of food sold are: (1) Foods [cereal grain, whole, crushed, meal, and flakes] (First item is whole wheat meal, freshly ground from best English red wheat). (2) Beans, peas, lentils (incl. soya beans and lists the price as “4d. a lb” plus carriage; also 4 types of haricot beans

{2.5 to 4d.} and 4 types of lentils {2.5 to 3d. a lb.}).

(3) Prepared foods (incl. Dr. Nicholl’s Food of Health, Dr. Allinson’s Food of Health, Fromm’s Extract, Fromm’s Soup, Nuttosia, Nut Butter {almond, hazel}, Nuttose, Protose, Sterilized Nut Butter, Granose Flakes, Granose biscuits, Avenola, Crystal Wheat, Nutta, Bromose, Falona). (4) Biscuits (incl. Graham crackers, Wholewheat wafers, Wheat and nut rolls, Zwieback–white or Graham). (5) Plasmon [digested milk proteid] chocolate, or biscuits).

Note: This is the earliest English-language document seen (June 2009) published in England that contains the word “Granose” (a flaked cereal food).

45. Stewart, Charles E. 1900. Chronic constipation, a symptom resulting from a disordered state of the sympathetic nervous system. Its causes and cure. *J. of the American Medical Association* 34:1306-10. May 26.

• **Summary:** “Nuts, in order to be of service, should go through a special process of preparation. At the present time such specially prepared nut foods as protose, nuttolene, malted nuts, granuts, bromose, and a number of others can be found on the market. A careful analysis of these nut foods has been made in our laboratory, and they have been found to be sterile and wholesome, and to contain nitrogenous and fatty material to meet the demands of the human economy. A diet consisting of granose, browned rice, protose, steamed figs, prune marmalade, and ripe fresh fruits..., almond butter, and cream [almond cream], is so palatable, nourishing, and easy of digestion that the most fastidious epicure could find no fault with it” (p. 1309). Address: M.D., Battle Creek, Michigan.

46. Sanitas Nut Food Co., Ltd. 1900. 20th century foods (Ad). *Good Health (Battle Creek, Michigan)* 35(7):July. Ad section in back of issue. Unpaginated.

• **Summary:** “We manufacture the most unique, delicate, and toothsome line of foods on the market. While these foods are so prepared as to be perfectly adapted to the stomach of the feeblest invalid, or the youngest child, they are at the same time of the greatest value in forming the healthy tissue of the vigorous man or woman. They are prepared with the greatest care from the choicest edible nuts. Perfect substitutes for meat, butter, and milk. Possessing none of their objections.” Products include: “Malt Honey, Bromose, Protose, Nut Butter, Malted Nuts, Maltöl. Ask your grocer for samples, and if you fail to get them, write us, giving his name, and you will hear of something to your advantage.”

Note: According to Stoltz (1992) Sanitas Nut Food Co. was legally founded in 1899. Address: Battle Creek, Michigan.

47. Kellogg, Ella Ervilla (Eaton) (Mrs.). 1900. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 206 p. Index. 21 cm. [1 ref]

• **Summary:** The wife of the famous Dr. John Harvey Kellogg discusses her system of meatless cookery. She lived 1852-1920. This book was copyrighted 1896.

Contents: Preface. Cereals. Macaroni. Fermented or yeast bread. Unfermented or aerated bread. Fruit. The leguminous seeds (soy is not mentioned). Vegetables. Soups (without milk, with milk), Eggs. Desserts. Pastry (“Dietetic evils of pastry—General suggestions for making pies”). Cake. Toasts (incl. Zwieback). The Battle Creek Sanitarium Food Company’s Products (recipes using them; including Granola, Granose, Crystal Wheat, Gluten, Zwieback, Caramel-Cereal).

Sanitas Nut Food Company’s Products (recipes using them; including Nut Butter, Nuttolene, Nut Meal {“Many persons suffer from biliousness, nervousness, sick-headache, and various forms of indigestion, from the use of butter, milk, and cream, without being aware that these substances are harmful to them. Persons suffering from dilatation of the stomach, a condition which is exceedingly common, must avoid milk and butter in all forms. Nut butter, nut meal, and nuttolene have been prepared as substitutes for butter and cream. In nut butter, the fat is in a state of perfect emulsion, so that it mixes well with water. Thus it does not interfere with digestion},” Protose, Granose, Almond Meal). Hints about every-day work (Economizing time, system in work, daily program of kitchen work, economizing money, economy of material, uses of stale bread, left-overs, waste of fuel, general suggestions for economical housework, order of clearing the table, washing the dishes, dish-cloth and towels, cleaning silver, care of table linen, disposal of garbage).

Peanut butter is called for as an ingredient in recipes on pages 166 and 170 (“An icing for the peanut cake may be made in the same way by using the peanut butter”).

Note: This is the earliest English-language document seen (Nov. 2013) that mentions a non-dairy icing.

Almond butter is called for as an ingredient in recipes on pages 140 (one well-rounded tablespoonful in an icing for Almond pound cake), 155 (twice), 156 (twice), 166 (twice), 170, and 172 (twice).

The term “nut butter” appears on 32 pages; see p. 201 in Index.

The word “Vegetarian” appears in this book only once, in the titled of a recipe, “Vegetarian Boiled Dinner” (p. 164).

Bran (including wheat bran) is mentioned on pages 98 and 99 (3 times each in the section on soups), 100, 144, 169, and 197.

Near the end of this book are full-page ads for: Bromose (p. 207), Malted Nuts (“presented in the form of a fine granular powder,” p. 208), Protose—vegetable meat (“This truly wonderful food product is, without question, the most remarkable discovery in dietetics which has been made within the last half century... Protose is a Perfect Substitute for flesh food... Send 10 cents for a sample can,” p. 209), Battle Creek Sanitarium Health Foods (Granose, Granola,

Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Corn Grits, Crystal Wheat {sterilized, ready cooked}, Gluten Preparations, Diabetic Foods, A large variety of crackers and biscuit and other wholesome preparations. Superior canned goods. Warranted pure. Send for catalog and price list, p. 210).

Antiseptic charcoal tablets—antiseptic, absorbent. “Charcoal Tablets are not a panacea, but they have proved to be the most valuable remedy we possess for morbid conditions arising from fermentation or decomposition of food in the stomach and intestines. They consist of a special form of vegetable charcoal, much superior to willow, freshly prepared, to which is added sulphur, one of our most valuable intestinal antiseptics, and diastase, a starch-digesting ferment. This will at once be recognized as a happy combination for combating the action of microbes in the alimentary canal,” (p. 211). *The Stomach: Its Disorders and How to Cure Them*, by J.H. Kellogg, M.D. (p. 212). *The Home Hand-Book*, by J.H. Kellogg (p. 213). *Science in the Kitchen*, by Mrs. E.E. Kellogg, A.M. (p. 214). Address: A.M., Battle Creek, Michigan; Author of *Science in the Kitchen*, etc.

48. “Pitman” Stores: The depot for Dr. Kellogg’s health food products. 1901. Birmingham, England: 1 p.

• **Summary:** See next page. A facsimile of this page appears on page 59 of the following book: Hill, Ray. 1998. *The Health Food Store: A Nostalgic Look at the First—Its Origins, Philosophy and Development*. Gloucestershire, England: NuHelth Books.

Hill’s book states (p. 58) that this page appears in the “1901 February Pitman Price List.”

“These Goods are now being manufactured in England by The International Health Association Limited.

“The factory being situated in Birmingham will be a guarantee of the freshness of the Goods. All orders, either wholesale or retail, intrusted to us will receive prompt attention.

The following products, and the price of each, are listed: Avenola. Biscuits. Bromose: Malted nuts. Caramel Cereal: Tea and coffee substitute. Charcoal Tablets. Fruit Coco Tablets. Gluten Meal. Granose Flakes. Granose Biscuits. Life and Health Cookery Book, by Mrs. Kress. Meltose, or Malted Honey. Malted Nuts. Nuttose, a perfect substitute for meat. Nuttolene. Nut Butter. Protose (a perfect vegetable meat). Address: 159, Corporation Street, Birmingham, England..

49. Kellogg, John Harvey. 1901. Vegetable-food compound [made from wheat gluten and peanuts]. *U.S. Patent* 0,670,283. March 19. 2 p. Application filed 3 June 1899.

• **Summary:** “My invention relates to an improvement in vegetable-food compounds; it consists in combining gluten of wheat or other cereals and water with a meal prepared

**" Pitman " Stores,**

**159, Corporation Street.**

from peanuts or other oleaginous nuts... The object of my invention is to furnish a vegetable substitute for meat which shall possess equal or greater nutritive value in equal or more available form for digestion and assimilation..."

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term "vegetable substitute for meat."

Wash wheat gluten until it is practically free from starch, then mix it with dry peanut meal in the proportion of 1 part of the nut meal to one or more parts of the raw moist gluten. To mix, pass the gluten and meal one or more times through a vegetable shredding or other suitable mixing machine. Then carefully mix in the proper quantity of water. Cook for 1-3 hours or more at a temperature of 212-230°F. Cooking not only preserves the product (in the way ordinary canned foods are preserved) but modifies "its consistence [consistency] and flavor, both of which are changed in a very remarkable way... By proper regulation of the temperature

and proportions of the ingredients various meat-like flavors are developed, which give to the finished product very characteristic properties."

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term "meat-like" (or "meat like"); it refers to a substitute for meat.

"My product is purely vegetable in character. It contains no animal substance or extract. In color and appearance it resembles potted veal or chicken. It has a distinctly meaty odor and flavor. When a bit is torn off and chewed, it shows a distinct fiber. It is of such consistency that it may be masticated like tender meat and when cooked retains its form as does meat. As is the case with animal flesh, its color varies somewhat according to the temperature to which it is subjected in cooking, the higher the temperature the darker the color... It may be cut into slices and served cold. It may be broiled like meats of all sorts and lends itself to the various culinary manipulations in a manner altogether resembling meat. Laboratory digestion experiments demonstrate that it is digestible in less time than meat-pulp. This is due to the well-known fact that the digestibility of vegetable proteids is increased by cooking, while animal proteids are rendered less digestible by cooking."

Advantages: "It is more digestible than flesh meats. It is free from danger of contamination with the disease germs or putrefaction products, and hence may be freely employed in many disorders in which physicians find it wise to prohibit the use of flesh foods, such as rheumatism, gout, Bright's disease, various disorders of the liver, myxoedema, and exophthalmic goiter. It is an economical substitute for flesh food, as it can be commercially produced at a price less than that usually charged for flesh meats. Its use obviates the necessity of slaughtering animals, against which in certain countries, as India, there are many millions of people who entertain a deeply-rooted prejudice. It may be freely used without incurring many of the risks which are involved in the free use of flesh meats."

Note 3. This is the earliest patent seen issued to Dr. John Harvey Kellogg that mentions wheat gluten. Note 3. The process described in this patent was probably used to make Protose. Address: M.D., Battle Creek, Calhoun Co., Michigan.

50. *Good Health (Battle Creek, Michigan)*. 1901. Dainty summer dishes prepared from the celebrated foods that have made Battle Creek famous (Ad). 36(7): July.

• **Summary:** This page consists of three large, horizontal photos and their detailed captions. They show: (1) Roast of Protose. "Serve with brown gravy, the recipe for which may be found in the Recipe book which may be had from the Sanitas Nut Food Co., Ltd." Note: Protose is a meatlike product made of peanuts and cereal (no soy) introduced in 1899 by the Sanitas Nut Food Co.

(2) Croquettes of Protose. "Form into croquettes, roll

in granola, then in beaten egg, and again in granola. Bake until brown and serve hot, garnished with parsley.” (3)  
 “Malt honey balls.—Over freshly toasted granose flakes pour sufficient malt honey to hold the flakes together. Form into balls, and serve with fresh fruit of any kind.

At the bottom of the page is written: “Samples of the foods that are used in these dishes may be obtained by addressing the Battle Creek Sanitarium Food Co., or Sanitas Nut Food Co., Battle Creek, Michigan.”

Note: This is the earliest document seen (May 2004) that mentions the Battle Creek Sanitarium Food Co.

51. Kander, Lizzie Black. comp. 1901. The “Settlement” cook book: Compiled by Mrs. Simon Kander,... Containing many recipes used in “settlement” cooking classes,... 6th ed. Milwaukee, Wisconsin. xxv + 470 p. Illust. Index. 20 cm.

• **Summary:** Worcestershire sauce is used as an ingredient in about 20 recipes. The first 4 of these are: Tartar sauce (p. 92). Baked trout (p. 99). Steak for the oven (p. 115). Stuffed peppers No. 4 (p. 168).

The word “vegetarian” appears in the title of two recipes: Nut butters for sandwiches—vegetarian (p. 240). Vegetarian chicken (p. 240).

Peanut butter is used as an ingredient in Cheese mixture for sandwiches (p. 236). Peanuts are used in at least 25 recipes; almonds are used in 6.

This is a “charity cookbook” published “for the benefit of the ‘settlement,’ 601 Ninth Street, Milwaukee. Price: \$1.20 postpaid.” Address: Milwaukee, Wisconsin.

52. Sanitas Nut Food Co. 1901. The Court of Awards of the Paris Exposition (Ad). In: Charles B. Reynolds. 1901. Washington: A Handbook for Visitors. The Standard Guide. New York, NY: Foster & Reynolds.

• **Summary:** A half-page ad near the rear of this book. “... recognizing the merits of the unique foods manufactured by the Sanitas Nut Food Co., granted them a medal.

“The thousands of persons, both in this country and in the Old World, who are daily using these products of forest and field, furnish a stronger proof, if possible, of their intrinsic value.

“Chief among these foods is Protose, the Vegetable Meat, which is more than a substitute for flesh, fish, and fowl.

“Protose Steaks with tomato sauce are delicious. That flesh meats are productive of disease is fast becoming recognized by intelligent people everywhere. Eminent scientists in both hemispheres are charging to the account of meat eating such diseases as cancer, Bright’s disease, epilepsy, gout, rheumatism, and a host of other afflictions of mind and body.

“‘As a man soweth so shall he also reap,’ is a principle as true in our habits of eating as in any other phase of human experience. The poisons contained in flesh foods when

taken into the human stomach are sure to produce disastrous results. Why do we slay to eat, and make graveyards of our stomachs when there is a better way?

“Protose which resembles meat in appearance and taste, and whose nutritive value is twenty-five per cent greater, may be baked, boiled, stewed, or broiled, or served in the hundred and one other ways known to the skillful cook for the preparation of flesh foods.

“If you can not procure Protose of your grocer, send us three two-cent stamps, and we will mail you a sample, together with the address of our nearest agent.

“Booklet ‘Nut Foods’ free on application.”

Illustrations show the front and back of a circular medal / medallion from the 1900 Exposition Universelle Internationale. Address: Battle Creek, Michigan.

53. R.S.T. 1902. The solving of the meat problem: What has been accomplished at the Battle Creek Sanitarium during the past thirty-seven years. *Chicago Daily Tribune*. June 5. p. 7.

• **Summary:** “Just now, when the price of meat is so high as to make it an expensive luxury even to the well-to-do classes, it strikes me that it is a good time generally for people to learn the fact that meats are not the best foods obtainable to contribute to either health or strength.”

“I was surprised to learn that the patients treated at this great institution were not only not given drugs for the cure of their ailments but were fed on a ‘meatless’ or vegetarian diet. At first I said these people are ‘cranks,’ ... Gradually I sampled the ‘vegetarian’ dishes, and found them so temptingly prepared and served, that I soon learned to prefer them to the flesh foods. I was surprised at the great and pleasing variety of substitutes for meats in the line of cereal and nut preparations.”

Dr. Kellogg, whom the writer has known intimately for about 6 years, “has been a vegetarian for 35 years or more [i.e., since at least 1867]. He is the hardest and most persistent worker that I know of.” He works at least 14 hours a day. “He is a human dynamo of wonderful energy. Recently, when he was engaged almost night and day planning and working for the rebuilding of the Sanitarium [destroyed by fire on 18 Feb. 1902], I asked him how he could endure so much work. He answered in his uniformly courteous and cheerful way: ‘O, that is simple; I live right.’”

He has developed scientifically prepared foods from cereals and nuts for his thousands of patients. In “this line he is certainly the most prolific as well as the most successful inventor in the world.”

These food products were primarily “for use in the Battle Creek Sanitarium, but as the thousands of patients who have been cured or benefited, learned the better way of living, they demanded that these foods be supplied to them at their homes, and as a result the Battle Creek Sanitarium Food Company and the Sanitas Nut Food Company came into existence, the former about 3 years ago [i.e., about 1899],

The strike of 50,000 men in the meat trade need cause you no anxiety, in so far as the supply of meat is concerned, for there is a meat in existence that has no dependence upon the animal world for its supply. That meat is

# Protose, The Vegetable \* Meat. \*

**W**HY incur the risk and extravagance of "tainted" meat, or enrich grasping "Beef Trusts," when in PROTOSE you can have pure, fresh, wholesome meat from the best vegetable sources? PROTOSE is palatable, possesses a mild, meaty flavour, is slightly fibrous like tender chicken, has none of the tissue-poisons that always abound in animal flesh; yet, as the "Lancet" analysis states, "Chemically, it presents the composition of animal tissue, beef or mutton." PROTOSE is prepared from the best grains and nuts, and is perfectly cooked. **TRY IT,** and we will guarantee to satisfy you. It tastes good, promotes health and vigour, and imparts great staying power. PROTOSE is put up in three sizes of sealed tins. In the case of PROTOSE no dangers are involved by the use of tins.

**The International Health Association, Ltd.,**  
Legge Street, Birmingham.

and the latter about 7 years ago [i.e., about 1895].

"Dr. Kellogg is not the only living example of the superiority of a vegetarian over a meat diet. There are, I should judge, no less than 2,000 people in Battle Creek who do not eat meat, and who claim as a consequence that they enjoy better health on account of their method of living, and they certainly look healthier than the average persons who are meat eaters."

The Sanitarium "corps, numbering about 800, are all vegetarians, and the amount of work that they do, always with cheerfulness, amply demonstrates the fact that the 'Battle Creek Idea' is correct."

It is important to know that neither "the Battle Creek Sanitarium nor the Battle Creek Sanitarium Health Food Company is conducted for the purpose of making money." They are "wholly philanthropic in nature."

There follows a long column giving menus on specific days, starting with breakfast, 4 June 1902. Items preceded by an asterisk (\*) are made by one of the two food companies. These include: Almond Cream, Bromose, Caramel Cereal, Coconut Crisps, Crystal Wheat, Gluten Biscuit No. 1, Gluten Wafers, Graham Crackers, Granola, Granut, Granose Biscuits, Granose Flakes, Malted Honey, Malted Nuts,

Nuttolene, Protose, and Zwieback. Categories: Dextrinized grains. Unfermented breads. Eggs and milk are served, but no meat, fish, or poultry—except at the "sinners" table. Two photos show the Sanitarium, old and new.

54. Bilson (T.J.) & Co. 1902. T.J. Bilson & Co. (Ad). *Good Health (London)* 1(4):125. Sept.

• **Summary:** A ¼-page ad. "Supplies of the best dried fruits and nuts of all kinds.

"Also a full stock of the foods of the International Health Association [IHA], such as Bromose, Protose, Granose, Toasted Wheat Flakes, etc.

"Special offer made with respect to Welch's Grape Juice, a most delicious food-drink, and real tonic.

"Send stamp for full price list, in which you are sure to be interested."

Note 1. This small ad (3 inches high by 2.5 inches wide) is the earliest document seen (July 2009) (one of two ads on the same page) that mentions the "International Health Association," a Seventh-day Adventist organization, which was renamed Granose Foods in 1926. The IHA was an early (perhaps the earliest) manufacturer of health foods in England and the UK.

# HEALTH FOODS

THE foods included in the following list are called "Health Foods" because they are entirely free from all that is injurious, and contain just the elements required to build up the human system, both in health and disease. They are made from the purest materials, combined in the proper chemical proportions, and so perfectly cooked as to be easily digested by all.

## ◆ ◆ PRICE LIST. ◆ ◆

**Granose Flakes.**—The entire wheat berry perfectly cooked and ready for use, in the form of thin, crisp flakes. Can be eaten by persons with delicate digestion, infants, invalids, and athletes with equal advantage. A perfect food. In packets, containing about thirteen ounces, .....7½d.

**Granose Biscuits.**—The same as Granose Flakes, but pressed into biscuit form. Per box, .....7½d.

### **Toasted Wheat Flakes.**

—Sweetened with Malt Honey (Nature's Health Sweet). Thoroughly cooked thin wheat flakes, a preparation of the finest Malt Honey is applied, making a most delicious breakfast dish. May be made into a warm breakfast dish in two minutes. In 1 lb. Packets, .....8d.

**Avenola.**—A combination of choice grains, combined in the proper proportion to secure perfect nourishment. Makes porridge in one minute. Makes delicious puddings. Packed in air-tight canister. In 1 lb Package, .....7d.

**Nut Rolls.**—A nutritious food, made from whole meal and finely ground nut meats, shortened with sweet nut oil. Very suitable for those who have to put their dinners in their pockets. In 1 lb. box, .....5d.

**Gluten Meal.**—Gluten, or albumen, is the life element of the wheat, the proportion of gluten present determining the food value of the grain. Diabetics and people who cannot digest starch are obliged to depend largely upon gluten, and such will find our gluten preparation unexcelled for quality and cheapness. Per 1 lb. Package 20%, 10d; " " " 40%, 1/8.

**Nut Butter.**—Made from cooked nuts only. Can be used for shortening, flavouring soups, or for table purposes. When diluted with hot water it forms a delicate cream. In 1 lb. tin, .....1/-.

**Caramel Cereal.**—A healthful and fragrant substitute for tea and coffee, prepared from cereals. Easily made and exceedingly cheap. One pound will make nearly 100 cups. Packed in air-tight canister. Per package, .....8d.

**Protose.**—Vegetable Meat. A tasty, nutritious, and easily digested food. It provides the same elements of nutrition that are found in the best meat, without any impurities. Liked by almost every one from the first. Can be eaten cold or prepared in any way. Recipes furnished. In 1½ lb. tin, 1/4. In 1 lb. tin, 1/- . In ½ lb. tin, .....8d.

**Bromose.**—A combination of malted cereals and pre-digested nuts. Makes good blood very quickly. It is greatly superior to Cod Liver Oil for consumption and all other wasting diseases. Pleasant to the taste. In elegantly embossed box, containing about 1 lb., ....1/6.

**Fruit Bromose.**—The same food as Bromose combined with figs. Same price.

**Wheatmeal Biscuits.**—Shortened with Nut Oil and Sweetened. Per lb., .....5d.

**Oatmeal Biscuits.**—Sweet. Per lb., .....6d.

**Fruit Wafers.**—Made from the best flour and dried fruits, shortened with nut fats. Per lb., .....8d.

A package of assorted samples of the above foods will be sent, post paid, on receipt of One Shilling. Can also be obtained from your *Good Health* agent. Recipes furnished.

ADDRESS:

The International Health Association, Birmingham.

Note 2. This is the earliest document seen (July 2009) giving the name of a retail store that carries products manufactured by the International Health Association. Note that this retail store is located in London.

This same ad appeared in the Dec. 1902 (p. 228) and Jan. 1903 (p. 260) issues of this magazine. Address: 86 Gray's Inn Road, London, W.C. [England].

55. International Health Association. 1903. Health foods (Ad). *Good Health (London)* 1(10):319. March.

• **Summary:** A full-page 2-column ad with a large bold title. The introduction, spanning both columns, states: "The foods included in the following list are called 'Health Foods' because they are entirely free from all that is injurious, and contain just the elements required to build up the human system, both in health and disease. They are made from the purest materials, combined in the proper chemical proportions, and so perfectly cooked as to be easily digested by all."

Under the fairly large words "Price list" (also spanning both columns), the name of each of 14 foods appears underlined in large bold letters, followed by a detailed description and the price in regular size type. The foods are:

Granose Flakes (crisp flakes in packets containing about 13 ounces, 7½d.) Granose Biscuits ("The same as Granose Flakes but pressed into biscuit form." Sold in boxes). Toasted Wheat Flakes ("Sweetened with Malt Honey (Nature's Health Sweet)," Makes a "delicious breakfast dish." Serve warm or cold)."

Avenola (A combination of grains. "Makes porridge in one minute." Also tasty puddings. Packed in an air-tight canister). Nut Rolls (Made from "whole meal and finely ground nut meats, shortened with sweet nut oil. Very suitable for those who have to put their dinners in their pockets"). Gluten Meal (Made from wheat gluten for "diabetics and people who cannot digest starch").

Nut Butter ("Made from cooked nuts only. Can be used for shortening, flavouring soups, or for table purposes. When diluted with hot water it forms a delicate cream. In 1 lb tin"). Caramel Cereal ("A healthful and fragrant substitute for tea and coffee, prepared from cereals... One pound makes nearly 100 cups. Packed in air-tight canister. 8d.). Protose ("Vegetable Meat... It provides the same elements of nutrition that are found in the best meat, without any impurities. Liked by almost everyone from the first... In ½ lb. tin" 8d.). Bromose ("A combination of malted cereals and pre-digested nuts"). Fruit Bromose ("The same food as Bromose, combined with figs"). Wheatmeal biscuits. Oatmeal biscuits. Fruit wafers ("Made from the best flour and dried fruits, shortened with nut fats").

Across the bottom: "A package of assorted samples of the above foods will be sent, post paid, one receipt of One Shilling. Can also be obtained from your *Good Health* agent. Recipes furnished."

Note: This is the earliest ad seen (June 2009) for the various foods made or sold by the International Health Association of Birmingham. A few of these foods may be made in Battle Creek, Michigan, and imported into the UK. Address: Birmingham [England].

56. *Vegetarian Messenger (Manchester, England)*. 1903. The Vegetarian Society's food depot. Sept. p. 211-12.

• **Summary:** "A new price list of specialties supplied at the V.S. Food Stores has been prepared, and can be had on application, from 19 Oxford Road, Manchester. It contains a list of Health and Food-Reform publications as well, and the prices quoted will be found to compare favourably with those charged at other depots.

"It may be convenient to group the specialties [sic] under different heads so that readers may the more readily understand their nature.

"Substitutes for fleshmeat fittingly comes first. Under this head we have Protose, Meatose, Nuttolene, Almond Nut Meat, Vejola, Savoury, and Banana Nut Meats. These range from 5d. to ¼ per tin, and it is claimed for them that they look like meat, taste like meat, are less expensive than meat, and can be served in all the many ways that meat can be; and I can affirm that they are much more healthful.

"Amongst nut butters (which even these warmer months are having a very ready sale) are. Pea-Nut, Almond, Almond Cream, and Coconut Butters, and there are in addition, two varieties of 'Nut' Butters, each having a distinctive flavour of its own."

"The grain preparations include wholewheat meal, whole wheatmeal bread, and cracked wheat (all of which are fresh daily), whole red and pearled wheat."

"Among biscuits may be mentioned the V.S. health biscuit (a most relishable and healthful wholemeal biscuit) at 4½d. per lb."

"With the introduction of Plasmon Powder, Milk Proteid Foods became a household word—and necessity. Besides this brand the Depôt stocks others of a similar character, viz.: Casumen, Lacumen, and Milcose, the latter being a preparation produced specially for the Vegetarian Society's Stores."

57. *Good Health (Battle Creek, Michigan)*. 1904. Chart of food elements. 39(1):Insert after p. 48. Jan.

• **Summary:** This table lists 64 foods, both processed and unprocessed, with a standard serving size for each (both volume and weight), and the amount of proteid, fat, and carbohydrate per serving, plus the number of "food units" [apparently similar to calories] per ounce. Processed foods include: Granola, Granose, Graham crackers, Whole wheat wafers, Graham bread, Whole wheat bread, Gluten mush, Wheatose, Malted nuts, Bromose, Nuttolene, Protose, Stewed Nuttolene (½ water), and Kumyss. For example, Protose: 0.5 pint (4.2 oz) contains 21.3 [units not given]

protein, 10.2 fat, 2.8 carbohydrates, and 60 food units per oz. Butter has the highest number of food units per oz (217.6), followed by shelled almonds (189.6). Lettuce is lowest (5.2).

58. *Good Health (Britain) (Seventh-day Adventist)*. 1904. Formal health dinners: Suggestions for a somewhat elaborate meal on reform lines. 2(8):243. Jan.

• **Summary:** Contains a menu plus recipes. “Mock chicken Cutlets.—Run through the nut-mill two cupfuls of bread crumbs, and one cupful of shelled walnuts. Mix together in a basin, with a tablespoonful of grated onion juice, and a little salt. Heat in a saucepan a cupful of rich milk to which has been added a dessertspoonful of peanut butter or almond butter rubbed smooth in a few drops of water. When this boils, add the other ingredients, salt to taste, a well-beaten egg, and when removed from the fire, a little lemon juice. Stir well; allow to cool, then roll into balls dipped in bread crumbs and eggs, and bake.”

“Nut Gravy.—Heat to boiling a pint of water in which a tablespoonful of peanut butter has been dissolved. Thicken with one tablespoonful of browned flour and a half tablespoonful of Paisley digestive lentil flour. Cook thoroughly for five or ten minutes.”

59. International Health Association, Ltd. 1904. Our health foods reach to the ends of the earth: Have they reached you? (Ad). *Good Health (Britain) (Seventh-day Adventist)* 2(8):255. Jan.

• **Summary:** A full-page ad. This company sells (and perhaps makes) the following foods. A description and price of each is given. Granose flakes. Toasted wheat flakes. Avenola. Nut rolls. Whole wheatmeal biscuits. Oatmeal biscuits. Fruit wafers. Peanut butter. Pure almond butter. Caramel Cereal [a coffee substitute]. Protose. Nuttolene. Bromose. Malted nuts—in fine powder form.

“Send us One Shilling for a package of samples and cookery book, or ask your Good Health agent for these foods.”

Note: Most or all of these products were first developed by Dr. John Harvey Kellogg at Battle Creek, Michigan, and sold by Sanitas Nut Food Co. Address: Birmingham [England].

60. Fulton, Edwin Giles. 1904. *Vegetarian cook book: Substitutes for flesh foods*. Oakland, California: Pacific Press Publishing Company. 266 p. Index. 19 cm.

• **Summary:** The introduction, titled “Why I was impressed to write a cook book,” states: “The number of physicians and dentists increases each year at an alarming rate, but the aches and ills of the suffering people do not lessen. Thousands of people find themselves in a deplorable condition, with stomachs almost worn out, having depended largely upon predigested foods and a long list of so-called ‘dyspepsia cures.’

“The amount of patent medicines, ‘sure cures,’ consumed by the people in the United States is enormous, and is increasing every year...”

“Disease among cattle, poultry, and fish has increased so alarmingly in the last few years that we should no longer depend on the animal kingdom for food.” “In our efforts to teach how to live without the use of flesh foods, we find we have only begun to discover the inexhaustible resources of the great vegetable kingdom in the boundless wealth of varied hygienic foods.”

The chapter on “Entrees” (p. 67-114) contains only vegetarian recipes with names like Mock white fish, Fillets of vegetarian salmon, Mock turkey with dressing, Roast duck (vegetarian style), Vegetarian roast, Vegetarian hamburger steak (p. 113-14), or vegetarian sausage. Several commercial products are called for in many recipes: Protose, Nuttolene, and Nut Food—all made by the Sanitas Nut Food Co. of Battle Creek, Michigan.

The chapter on “Cereals” contains a recipe for Gluten-Granola mush (p. 184). The chapter titled “Toasts” states (p. 187): “Zwieback should be used as the foundation of all toasts, although ordinary toasted bread can be used.” Adjust the fire so as not to burn or singe the bread.

The chapter titled “Nut butter” (p. 239-45) states that “Nut butter can be easily made in the home... Peanuts and almonds are the nuts most suitable for making nut butter... The best variety peanuts for making nut butter is the Spanish shelled.” Three home-scale processes are given. The first is:

“Process no. 1: Put a layer of peanuts about one-half inch deep in a dripping-pan and place on perforated shelf in a moderate oven. Allow them to bake slowly for about one hour. Cook them until they are a light brown or straw color. Shake the pan or stir the peanuts every few minutes. When the kernels begin to crack and pop they brown very quickly, and should be watched closely.

“A splendid way to cook them is to fill a tight-covered dish about two-thirds full, place in the oven, and shake occasionally. When cooked this way, they are not liable to burn, and they retain their flavor better. When they have cooked sufficiently, spread out at once. When they have become quite cool, blanch as follows: This can be done by rubbing them in the hands, or what is better, a coarse bag, or take a piece of cloth and fold the ends together, forming a bag. Another good device is a screen made of coarse wire. Rub them until the skins are loose. The chaff can be removed by using a fan or by pouring them from one dish to another where the wind is blowing. Look them over carefully, removing defective nuts and foreign substances.

“The next step is to grind them. The most practical family mill we know of for grinding nuts, etc., is the Quaker City Mill (see cut [illustration] and description of same in this book).

“Always grind freshly cooked nuts, as they do not make good butter when left a day or two after being cooked.” Note

1. No salt is used in this recipe. And, it is clearly based on the recipe in Lambert (1899, p. 70-71, which see). Moreover, the term “peanut butter” does not appear in this book.

These recipes are followed by recipes for: Salted nut butter (“Prepare nuts as described in process No. 1. Sprinkle salt on the kernels when grinding. It is much more preferable to grind the salt in with the nuts than to mix it in the butter”). Almond butter (“more difficult to make than peanut butter, on account of the difficulty in removing the skins”). Brazil nut butter. Peanut meal. Nut butter for the table. Peanut cream (“Emulsify with water until it is the consistency of milk”).

Concerning “Nut butter for the table” (p. 245): “Put one-half the amount of butter required for the meal [p. 244] into a bowl and dilute with an equal quantity of water, adding a little of the water at a time, beating it thoroughly with a fork until it [sic, the mixture] is smooth and light. Enough water should be used to make it the proper consistency to spread nicely. An egg beater or a wire potato masher is an excellent utensil for mixing. A little salt can be added if desired. Nut butter when mixed with water does not keep but a few hours.”

Page 249 lists 25 U.S. and 2 overseas “Vegetarian Restaurants and Cafes” worldwide, each with a street address. USA: Vegetarian Restaurant, Los Angeles, California. Vegetarian Restaurant, Oakland, California. Vegetarian Cafe, San Francisco, California. Vegetarian Cafe, Colorado Springs, Colorado. Vegetarian Cafe, Denver, Colorado. Hygienic Dining Rooms, Washington, DC. Hygeia Dining Rooms, Chicago, Illinois. Vegetarian Restaurant, Des Moines, Iowa. The Hygeia, Battle Creek, Michigan. Vegetarian Restaurant, Detroit, Michigan. North Michigan Tract Society, Petoskey, Michigan. Pure Food Cafe, Kansas City, Missouri. Vegetarian Restaurant, Lincoln, Nebraska. Vegetarian Restaurant, Jamestown, New York. Health Restaurant, New York City, New York. The Laurel, New York City, New York. Hygienic Cafe, Philadelphia, Pennsylvania. Vegetarian Restaurant (Corner Church & Vine St.), Nashville, Tennessee. The Pure Food Cafe, Salt Lake City, Utah. Good Health Restaurant, Seattle, Washington. Vegetarian Restaurant, Spokane, Washington. Restaurant, Fairmont, West Virginia. Hygienic Cafe, Madison, Wisconsin. Hygienic Cafe, Milwaukee, Wisconsin. Hygienic Restaurant, Sheridan, Wyoming.

Foreign: Vegetarian Restaurant, Sydney, NSW, Australia. Vegetarian Restaurant, Copenhagen, Denmark.

Pages 250-52 contain a “Directory of Sanitariums,” 56 in all, worldwide. They are located in the USA (35), Australia (2; Wahroonga and Cooranbong, NSW), Canada (4; Vancouver and Victoria, British Columbia; Knowlton, Quebec; and St. Johns, Newfoundland), Denmark (2; Skodsborg and Frederikshavn), England (2; Caterham, Surrey, and Leicester), Germany (Friedensau, Bez. Magdeburg), India (Calcutta), Ireland (Belfast), Japan

(Kobe), Mexico (Guadalajara), New Zealand (Christchurch), Norway (Christiania), Samoa (Apia, [Western Samoa]), South Africa (Cape Colony), Sweden (Orebro), and Switzerland (Basle).

Page 252 gives a “Directory of Sanitarium Food factories: Battle Creek Sanitarium Food Company, Battle Creek, Michigan Sanitarium Food Company, Sanitarium, California. Portland Sanitarium Food Company, West Ave., Mt. Tabor, Oregon. Colorado Sanitarium Food Company, Boulder, Colorado. Union College Bakery, College View, Nebraska. Sanitarium Food Company, 228 Clarence St., Sydney, NSW, Australia.

Commercial food products made by these food companies and used in the recipes include: Gluten, Granose Flakes, Nuttolene, and Protose.

In the back are ads (on unnumbered pages) for: (1) Quaker City Peanut Butter Mill, made by A.W. Straub Co. at 3 locations: 3737-41 Filbert St., Philadelphia, Pennsylvania; Canal and Randolph Streets, Chicago, Illinois; Vegetarian Cafe, 775 Market St., San Francisco, California. (2) Sanitarium Food Company, Sanitarium [St. Helena?], California. Branch stores: San Francisco, Oakland, San Jose, and Fresno, California; and Salt Lake City, and Provo, Utah. They make bottled grape juice and apple cider. (3) Sanitas Nut Food Co., Ltd., Battle Creek, Michigan (makers of Protose and Nuttolene. “Nut foods were developed by the Sanitas Nut Food Co., Ltd., Battle Creek, Mich. Their manufacture is protected by patents... Sanitas Protose and Nuttolene are the only successful and scientific meat substitutes on the market. Sanitas Foods are sold by reliable dealers in all parts of the country... The Sanitarium Food Co., St. Helena and San Francisco, Cal., carry a full line of our products.”)

Note 2. This is the earliest document seen (Nov. 2014) concerning meat alternatives that contains the term “Mock turkey.”

A slightly revised edition was published later in 1904, containing 268 pages. A second edition was published in 1910.

61. Kellogg, Ella Ervilla Eaton. comp. 1904. *Healthful cookery: A collection of choice recipes for preparing foods, with special reference to health.* Battle Creek, Michigan: Modern Medicine Publishing Co. 299 p. Index. 19 cm.  
 • **Summary:** Contents: Methods in hygienic cookery: Healthful cookery. Measuring and combining ingredients. Breads. Unfermented, or aerated bread. Sandwiches. Toasts. Vegetable substitutes for flesh foods. Eggs. Porridges and breakfast dishes. Vegetables. Gravies and relishes. Salads. Soup. Soups with nut soup stock. Gruels and liquid foods. Desserts. The invalid’s meals. Seasonable bills of fare. Note 1. Soy is not mentioned.

“Peanut butter” is called for in various recipes: Nut cheese (p. 163), Nut cream (p. 164), Nut salad dressing (p.

171), and Vegetable soup (p. 181-82).

“Almond butter” is called for in: Fruit pin wheels (p. 49), Almond cream (p. 164), Nut cream (p. 164), Peach salad (p. 169), Sweet salad dressing (p. 172), Sour salad dressing (p. 172-73), Cream of almond soup (p. 179), Almond puree (p. 197), Hot nut milk (p. 197), Granola pie crust (p. 210), Almond pound cake (p. 231, incl. almond butter in the icing), Almond filling (for desserts, p. 233), Chocolate mold no. 1 (p. 239), Cocoanut almond cream sauce (p. 245), Almond whipped cream ([non-dairy], p. 246. “Reduce Almond Butter to the consistency of cream, and pour slowly over the well-beaten white of an egg. Sweeten and flavor to suit the taste. For persons who can not use cow’s cream, this makes an excellent substitute for whipped cream”).

Note 2. This is the earliest document seen (Oct. 2013) that discusses a non-soy, non-dairy whipped cream.

“Nut butter” is called for in: Granuto cakes (p. 44), Nut butter puffs (p. 45), Nut gluten rolls (p. 47), and other recipes on pages 55, 57, 58, 71, 78, 82, 86, 87, 88, 104-06, 126, 136, 157, 159-62, 169, 173, 177-79, 233, 245, 301. For “Nut butters” see Sandwiches (p. 53; “The butter, whether dairy or some one of the various nut butters, should be creamed and spread smoothly on the bread...”).

“Nut cream is called for in: Granuto cakes (p. 44; “Serve at once with dairy or Nut Cream, dairy or Nut Butter,...”), Nut gluten rolls (p. 47), Pease gravy toast (p. 65), Nut Lisbon steak, no. 2 (p. 75), and other recipes on pages 86, 99, 104-05, 121-23, 129, 132, 136-37, 141, 146, 151, 153, 155, 159-60, 164, 176, 192, 205, 217, 245, 253, and 283.

Gluten is mentioned throughout the book, as are gluten bread, gluten flour, 40% gluten flour, ½ cup gluten (p. 84), 20% gluten (p. 99, in Protose and gluten patties), gluten meal, and gluten gruel.

Note 3. This is the earliest English-language document seen (Nov. 2014) that mentions a kind of meatless burger or patty, which it calls “gluten patties” (one of two documents).

This is a vegetarian cookbook. In the chapter on flesh-food substitutes (p. 67+), “vegetarian” is mentioned in several recipe names: Vegetarian roast (p. 106). Vegetarian roast No. 2 (p. 107). Also: Vegetarian boiled dinner (p. 134). Major branded ingredients in this chapter are: Protose (“vegetable meat”), Nuttolene, Granola, and Nut Butter.

On page 84 is a recipe for “Vegetable turkey” which calls for “2 cups lentil pulp,... 2 eggs, 2 cups walnut meal,... ½ cup Granola, ½ cup Gluten, 1 onion, ¼ cup thick Nuttolene Cream.”

On the last 2 pages of the book is an ad: “This volume contains some six hundred recipes.” “For the preparation of Sanitarium foods. These foods are manufactured by the Battle Creek Sanitarium Co., Ltd., and the Sanitas Nut Food Co., Ltd., the two original health food manufacturers of Battle Creek. Our products are of world-wide reputation, some of them having been in use more than a quarter of a century [i.e., since about 1879]. The company makes

more than 49 food products. “Many good grocers carry only a few of them; some, a large line; more, none at all... Thousands upon thousands of grocers have never heard of our products.”

“To all express offices in the following States we prepay the express on orders of \$5.00 or more.” On orders of \$15.00 or more they also offer a 10% discount. The names of 23 states near Michigan are listed. Then the name, weight, packaging type, and price of every product is given.

The author is the wife of the famous Dr. John Harvey Kellogg. She lived 1852-1920. A slightly enlarged edition (313 p.) was published in 1908. Address: A.M., Battle Creek, Michigan.

62. Kellogg, Ella Ervilla Eaton. 1904. *Science in the kitchen: A scientific treatise on food substances and their dietetic properties, together with a practical explanation of the principles of healthful cookery; a thousand choice, palatable, and wholesome recipes.* Revised and enlarged edition. Battle Creek, Michigan: Modern Medicine Publishing Co. 508 p. [39] leaves of plates. Illust. Index. 24 cm.

• **Summary:** In this new edition, the wife of the famous Dr. John Harvey Kellogg discusses the principles and methods of the dietary system employed at the Battle Creek Sanitarium. Although this is a vegetarian cookbook (which includes the use of eggs and milk), that fact is not discussed anywhere in the book.

The “Preface to the fourth edition” (p. 4) begins “Cookery is a progressive science. Within the past few years several new and very valuable food products have been developed in the food laboratories of the Battle Creek Sanitarium and put upon the market, making necessary the evolution of many new recipes for their preparation for the table.”

The long chapter on “Meats” (p. 389-417) in the 1892 ed. has been replaced by an even longer chapter on “Nuts and nut foods” (p. 389-425). After that we find all new chapters: “Food for the sick” (p. 426-52), “The daily menu (p. 453-63), and “Appendix” (p. 464+) with many pages of nutritional analyses, copied from the “Battle Creek Sanitarium Diet List,” showing the “Food value of the large variety of foodstuffs when prepared for the table.”

In the new “Introduction,” the section on dairy products has been rewritten to deemphasize their use.

The long chapter on “Legumes” again notes that the Chinese “manufacture cheese [clearly tofu] from peas and beans” (p. 217-18).

The chapter on “Milk, cream, and butter” states (p. 369): “Various nuts, as almonds, filberts, and cocoanuts furnish products which make excellent substitutes for milk, and which can be utilized in cooking in early all recipes where milk is needed. These milk substitutes approach very closely the same composition as cow’s milk, thus affording equal nourishment, while they have the advantage of being

perfectly clean and free from germs. Recipes for their preparation are given elsewhere.”

The chapter on “Nuts and nut foods” begins with a description of the major nuts. The long section on “The peanut or groundnut” notes: “In this country they are more commonly roasted, but in this form are almost indigestible, for the peanut is really not a nut at all, but a legume, and requires thorough cooking... to render it digestible. Peanuts are, however, a very wholesome and nutritious food when properly cooked” (p. 393). Recipes include: To blanch almonds. To blanch peanuts. Coconut cream. Nut pulp (from well blanched and baked peanuts). Peanut butter (Blanch, then cook in a double boiler for 8-10 hours before grinding). The section titled “Nut preparations” states: “Within the last few years, various processes have been discovered whereby nuts of different kinds are converted into most valuable and palatable foods. Chief among these nut products may be named protose, or vegetable meat, almond and peanut butters, nuttolene, nuttose, nut meals, and nut soup stock” (p. 398). Then come subsections on: “Protose and nuttolene recipes” (p. 399-411, incl. 2 recipes for Vegetarian roast, Vegetarian chili sauce, Protose steak, Nut steak in gravy, Mock hamburger steak, Nuttolene cutlets, Nut fillets, Protose patties, and Rice and lentil croquettes). “Nut products with vegetables” (p. 411-16). Nut cream and butter (p. 416+, incl. Nut butter, Nut milk). Sandwiches (p. 214+, incl. with almond nutter or nut butter).

The Appendix showing nutritional value of foods (p. 464-84) includes all the new nut products. At the very end is a half-page table titled: “The following table shows clearly the inferior value of flesh foods.” The nutritional composition of 23 such foods (red meat, poultry, fish, and shellfish) is given. The book contains 31 excellent illustrations and 39 unnumbered pages of glossy black and white photos, each page printed on only one side.

Note 1. This is the earliest English-language document seen (Nov. 2014) that mentions a kind of meatless burger or patty, which it calls “Mock hamburger steak” and “Protose patties” (one of two documents).

Also discusses: “The superiority of bread made from the entire wheat or unbolted meal” also called “whole-wheat bread” (p. 112, 143). Many recipes throughout the book call for gluten. Diabetic biscuit (p. 452, made of Graham or entire-wheat flour). The following words do *not* appear in the Index: Animal, beef, bulk, fiber, fish, flesh, roughage.

Note 2. The 1904 date appears only on page 4 in the section titled “Preface to the fourth edition.” No mention of a 4th ed. appears on the title page. The copyright page gives only the 1892 date. Address: Battle Creek, Michigan.

63. Lemaréchal, J.M. 1904. Dictionnaire japonais-français [Japanese-French dictionary]. Tokyo: Librairie Sansaisha; Yokohama: Librairie Max Nössler & Co. viii + 1008 p. See p. 133. Illust. 26 cm. [Fre; jap]

66. The Times cook book—No. 3: 957 cooking and other recipes by California women... Brought out by the 1905 series of prize recipe contests in the Los Angeles Times. 1905? Los Angeles, California: The Times-Mirror Company. 224 p. Undated. No index. 24 cm.

• **Summary:** On the cover: “Los Angeles Times cook book—Number three: Toothsome cooking and other recipes contributed by noted chefs and housewives of the Southwest to The Times’ Prize Cooking Contest, including California, Spanish and Mexican dishes—Recipes of famous pioneer Spanish settlers.”

Contents: Introduction. Spanish dishes. Soups. Salads: Incl. Peanut salad (p. 44). Bread and rolls: Incl. Entire wheat bread (p. 59). Graham bread (p. 60). Whole wheat bread (p. 65, 83). Whole wheat gems (p. 70). Graham muffins (p. 74). Whole meal bread (p. 83). Cakes. Cookies, doughnuts, etc. Pies. Puddings: Incl. Graham pudding (p. 135-36). Fowl and game (fowl includes quail, wild ducks). Fish and shellfish. Meats and stews. Vegetables (incl. beans and grains): Vegetarian rice (p. 187). Mock turkey (vegetarian, p. 189). Tomato catsup (p. 191). Jams and marmalades. Hygienic dishes (p. 196-206): Incl. Graham cake (p. 200). Meatless stew (p. 201). Mock oyster soup (p. 202). Near meat (p. 202). Unleavened Graham bread (p. 205-06). Vegetarian stew (p. 206). Desserts, etc.: Incl. Home-made peanut butter (p. 217). Address: Los Angeles, California.

67. *Manchester Guardian (England)*. 1906. Correspondence: Vegetarian restaurants (Letter to the editor). Feb. 10. p. 15.

• **Summary:** “Mr. E.C. Chapman writes: ‘Your correspondent ‘Nut Cutlet’ will find one or more of the various nut foods on the bill of fare each day at the Vegetarian Restaurant and Health Food Stores. If he will give us a call we shall be glad to do all we can to assist him in following a vegetarian dietary.’” Address: 257, Deansgate [Manchester].

68. Fellows, Alfred. 1906. The vegetarian guest. *Living Age (Boston, Massachusetts)* 250(3240):346-53. Aug. 11.

• **Summary:** A humorous discussion of the trials and tribulations of inviting a vegetarian to dinner. During the past 10 years “a considerable number of young people have been struck by a few conspicuous examples of athletes breaking from the venerable conventions and traditions of diet... the prestige of the beef-and-beer school has suffered severe damage in consequence. This has been further undermined by the success of the Japanese against the Russians...”

The author gives advice on how to cope with the new

and difficult situation. First, the vegetarian guest should warn the hostess. Then the hostess should get information on the guest’s preferences—enough but not too much. “The time is certainly right for vegetarians to be properly classified,” but some individuals may be placed under two headings. The author believes (correctly) that those who eat poultry, game, or fish are not vegetarians. Vegetarians (or “inclusive vegetarians”) abstain from all flesh, but may eat cheese, milk, butter, and sometimes eggs. Those who exclude eggs could be called *eggs-clusive* vegetarians. Those who follow the advice of Dr. Alexander Haig are non-purin vegetarians; they avoiding uric acid and purins to cure gout or rheumatism, and thus avoid beans, peas, lentils, mushrooms, eggs, and asparagus—as well as meats. Most vegetarians eat grains, vegetables, milk and eggs. A few “literal or strict vegetarians” exclude eggs, milk, and milk products. Fruitarians eat fruit, nuts and seeds, but do not eat ordinary garden or root vegetables. To complete the list, there are “those exalted persons who will eat fresh fruit and nuts only and refuse food over which the fire has passed—a handful of occultists and mystics...” [i.e., they eat only raw foods].

“An unconverted stranger who enters a vegetarian restaurant may experience a mild amazement when he hears” words like “chops, steaks, fritters, and cutlets” in the bill-of-fare. Yet all are vegetarian dishes, such as rissoles.

Note: This is the earliest document seen (Nov. 2014) concerning meat alternatives that discusses chops in a vegetarian restaurant. We don’t know whether these are pork chops or lamb chops, etc.

The key to most meals is a good savory dish. The fabled myth that a vegetarian diet is monotonous is not true.

69. International Health Association, Limited (The). 1907. Do you want to be rich? The [key] to the secret (Ad). *Good Health (London)* 5(16):507. Sept.

• **Summary:** “Health is wealth! How many people unconsciously exchange health for money. How many violate the laws of nature in their efforts to gain a position in the world!

“Are you healthy? If so, allow us to offer you a few suggestions on the maintenance of strength and vigour. Are you sick? We believe we can help you get well.”

Perhaps “you are anxious to discard the use of flesh meats, but are at a loss to find a suitable substitute. We can remove this difficulty by offering you a Perfect Meat made from choice Wheat and Nuts, being therefore absolutely pure and wholesome. Our Protose is the best substitute for flesh meats ever produced... Protose is beneficial to the brain-worker, and will also impart strength and vigour to those engaged in manual labour.

“Supplied in three varieties: No. 1. The Original Protose. No. 2. Pine-Nut Protose. No. 3. Hazel-Nut Protose.” Price: 1½ lb., 1 shilling 4 pence. 1 lb., 1 shilling. ½ lb., 8 pence.

“Send six stamps for a sample tin. Health Food

Booklet sent free on application." Address: Legge Street, Birmingham [England].

70. Kellogg, John H. 1907. Food product. *U.S. Patent* 0,869,371. Oct. 29. 1 p. Application filed 24 Feb. 1906.

• **Summary:** "The main object of this invention is to provide an improved food product which is very palatable and nourishing and one adapted for use as a meat substitute. Second to provide a process of making such a product by which it can be economically and satisfactorily produced."

The ingredients and their proportions by weight are gluten (wet, 37%, made from wheat flour), casein (wet, 37%, precipitated from cow's milk with an acid), and vegetable oil (25%). The ingredients are shredded, mixed, put into cans, and cooked. The product may also be dried. Soy is not mentioned. Note: This patent was later widely cited by Anson and Pader in their meat analog patents of the 1950s. Address: M.D., Battle Creek, Calhoun Co., Michigan.

71. International Health Association, Ltd. (The). 1907. Monotony in diet tends to mal-nutrition (Ad). *Good Health (London)* 5(19):607. Dec.

• **Summary:** "A variety of sustaining breakfast foods eaten on alternate mornings is, for most people, better than the same kind morning after morning." Each of IHA's breakfast foods is perfectly cooked and ready to serve in two minutes.

They are: Granose Flakes and Granose Biscuits. Toasted Wheat Flakes. Avenola. Gluten Meal (I.H.A. brand).

"Can be obtained from all Health Food Stores, or direct from the makers. In districts throughout the United Kingdom where we have no agents we will send, carriage paid, a packet of each of the above five foods, also a tin of our delicious Malted Nuts, and a ½ lb. tin of Protose (Nut Meat), together with "One Hundred Hygienic Recipes," for 5/-.

Note: The first page of the December issue states: "Our seventh Christmas... Our edition this month is 80,000 copies. Six years ago it was 15,000." Address: Stanborough Park, Watford, Herts. [Hertfordshire, England].

72. Goodhue, Isabel. 1907. Meat substitutes. New York, NY: New York Magazine of Mysteries. 109 p. 19 cm. \*

73. Jaffa, M.E. 1907. Nuts and their uses as food. *Yearbook of the U.S. Department of Agriculture* p. 295-312. For the year 1906.

• **Summary:** The introduction (p. 296) notes: "The increased demand for nuts is due in the main to two causes, namely, a better appreciation of their appetizing qualities and the numerous ways in which they form a palatable addition to the diet of the average family, and, secondly, to their use by the vegetarians and persons of similar belief—a group small in proportion to the total population, but still fairly large numerically—who use nuts, and more particularly the peanut, as a substitute for meat and other nitrogenous and fatty

foods.

"Many special nut foods, such as malted nuts, meat substitutes, etc., have been devised and extensively advertised by the manufacturers for general use in the diet and for the special needs of vegetarians and fruitarians. It is said that some of these American nut products contain soy beans, but apparently the peanut plays a very important part in their composition. In either case, since the peanut, like the soy bean, is a legume, these preparations might more properly be compared with the bean cheese and other soy-bean products so much used in China, Japan, and other eastern countries than with such nuts as the walnut, almond, or cocoanut."

In the section titled "Description of nuts," page 297 states: "The chufa, nut grass, or earth almond is a small tuberous root of a sedgelike plant and perhaps should be classed with the vegetables rather than with nuts. It is not common, though sometimes eaten."

In the section titled "Composition of nuts" a table (p. 299) gives the following analyses of peanut butter and round steak: *Peanut butter*.—Water 2.1%, protein 29.3%, fat 46.5%, carbohydrates 17.1%, ash 5%, fuel value 2,825 calories per pound. *Round steak*.—Water 65.5%, protein 19.8%, fat 13.6%, carbohydrates 0%, ash 1.1%, fuel value 950 calories per pound.

These figures show that peanut butter contains 1.5 times as much protein, more than 3 times as much fat, nearly 5 times as much ash, and 3 times as much fuel value as round steak. Analyses are also given for: Chufa (earth almond), cocoanut, ginkgo nut (seeds), lichi nut, pignolia, cocoanut candy, peanut candy, cocoanut milk, cocoanut—desiccated, cocoanut flour, peanut coffee made from the entire kernel.

Cocoanut milk contains: Water 92.7%, protein 0.4%, fat 1.5%, carbohydrates 4.6%, ash 0.8%, fuel value 3,125 calories per pound.

"Nut butters: Within the last few years so-called nut butters have been used in increasingly large amounts, and at least one variety, namely, peanut butter, is made and sold in ton lots." Nut butters are commonly marketed in jars. "The nut butters are recommended by vegetarians as a substitute for butter in culinary processes and for use at the table. With persons who are not vegetarians they are commonly used for making sandwiches and in other ways for their agreeable flavor and for the pleasing variety which they give to the diet. Nut butter may be easily made at home." "The nut butters just mentioned are entirely different from cocoanut butter and from cocoa butter, which are expressed and purified fats. These 'butters' are of considerable commercial importance and are used for culinary purposes, though perhaps they are more commonly used in other ways."

A section titled "The pecuniary economy of nuts" (p. 309-10) states: "For the vegetarian or fruitarian, who looks to nuts as the chief source of protein in the diet, the peanut must be considered as much the most economical." A table

shows the price in cents per pound of various foods, the cost of 1,000 calories of energy, and the number of pounds of protein that 10 cents will buy: Peanuts 7, 3.6., 0.31. Peanut butter 20, 7.1, 0.15. Peanut candy 25, 11.8, 0.04. Porterhouse steak 25, 22.5, 0.07. Whole milk 4, 12.0, 0.8. Cheddar cheese 16, 7.5, 0.17. Address: Asst. Prof. of Nutrition, Univ. of California [Berkeley].

74. Williams, Howard. 1907. *The ethics of diet: A biographical history of the literature of humane dietetics, from the earliest period to the present day.* Abridged edition. Manchester, England: Albert Broadbent; London: Richard J. James. viii + 242 + [6] p. 19 cm.

• **Summary:** This abridged classic of vegetarian literature traces writings in support of vegetarianism from ancient Greece to the 19th century. Contents: Part I: Earlier ethical dietetics. Ad on unnumbered page: Brown & Polsons patent corn flour, and "Paisley flour" raising powder. 1. Hesoid and the Orphic Poems. 2. Pythagoras: The western founder of humaner living. 3. Sakya Muni [Shakyamuni] and Buddhism. 4. Empedokles: The prophet-poet of the humaner life. 5. Plato and the transcendental philosophy. 6. Asoka [Ashoka] and the Buddhist propagandism. 7. Publius Ovidus Naso and Italian ethics. 8. Lucius Annæus Seneca and humanitarianism. 9. C. Musonius Rufus; a distinguished eclectic. 10. Plutarch and extra-human rights. 11. Florus Tertullian and his protest against the materialistic diet. 12. Flavius Clemens and early Christian dietetics. 13. Porphyrius [Porphyry of Tyre] and Neo-Pythagoreanism. 14. Ioannes [John] Chrysostom and Christian dietetics.

Part II: Modern ethical dietetics. 15. Luigi Cornaro and the dietetic Renaissance. 16. Thomas More and his ideal community. 17. Michel de Montaigne and the humanitarian philosophy. 18. Pierre Gassendi and the scientific basis of the humane diet. 19. John Evelyn, with Milton and Ray, eloquent eulogist of the fruit-diet. 20. Philippe Hecquet and medical barbarism. 21. Bernard De Mandeville and the 'Fable of the Bees.' 22. George Cheyne and right methods of medicine. 23. Alexander Pope and his satire on anthropocentrism. 24. Antonio Cocchi and the diet reformation in Italy. 25. David Hartley on the callousness of carnivorousness. 26. Jean-Jaques Rousseau and the natural life. 27. Francois Marie Arouet de Voltaire and the humanitarian philosophy. 28. George Louis Leclerc de Buffon and his 'L'Histoire Naturelle'. 29. Oliver Goldsmith and his humanitarian essays. 30. William Paley and the utilitarian critic of pastoralism. 31. Bernardin St. Pierre and the first of idyllic romances. 32. Jean Baptiste Pressavin and the art of prolonging life. 33. Joseph Ritson and his reasons for 'Abstinence'. 34. William Lambe and hygienic dietetics. 35. John Abernethy and the dietetic treatment of cancer. 36. John Frank Newton and the return to nature. 37. Percy Bysshe Shelley the prophet-poet of humanitarianism. 38. Richard Phillips and his humanitarian labours. 39. William Cowherd, William Metcalfe, and the

religious-dietetic reformation. 40. Jean Antoine Gleizès and the new existence. 41. Alphonse De Lemartine as poet of the humaner life. 42. Jules Michelet and the historian's view of kreophagy. 43. Gustav von Struve and the first humane propaganda in Germany. 44. Edward Baltzer and the natural way of living. 45. Arthur Schopenhauer and the foundation of morality. 46. Henry David Thoreau and the simple life. 47. Richard Wagner and the aesthetic dietetics. 48. Anna Kingsford and the first prophetess of the humane life.

Ads on six unnumbered pages in the rear: [1] scientific food: Grape-Nuts. Selected "parts of wheat and barley are so treated by moisture, heat and time as to change the starch into grape sugar. This form of pre-digested starch is quickly taken up by the blood and deposited in the muscles and tissues." [2] Dr. Nichols' Food of Health. Brill's Sea Salt. Dr. Nichols' Soap. [5] Two good things—in three varieties. Granose: The ideal "Staff of Life." Granose flakes, Granose biscuits, Toasted wheat flakes (sweetened). Protose: The standard nut meat. The original Protose, Pine-nut Protose, Hazel-Nut Protose. "Protose is a wholesome meat, prepared from choice nuts and wheat. It resembles flesh-meat in appearance, taste, and chemical composition, and is superior to it in point of purity, digestibility and wholesomeness. Protose, being the best, is the standard nut meat, and is used by food reformers the world over." From: The International Health Association Limited, Legge St., Birmingham.

[6] The universal digestive tea. Sold by the Vegetarian Society, 257, Deansgate, M/r. "The Health Food Stores, 257, Deansgate, Manchester. Depôt for all vegetarian specialties. Pure wholemeal ground fresh daily, pure olive oil, pure dandelion coffee, shelled nuts, nut mills, wholemeal biscuits, etc."

The author lived 1837-1931. Address: M.A., Late scholar of St. John's College, Cambridge.

75. *Advertiser (The) (Adelaide, South Australia)*. 1908. Sanitarium Health Food. Feb. 27. p. 6.

• **Summary:** "A 'Sanitarium Health Food Cafe' was opened on Monday in cool, airy, and convenient premises at 28, Waymouth-street under the management of Mr. J. G. Fisher. Great success has attended the hygienic cafes established by the same institution in Melbourne, Sydney, Hobart, and Wellington [New Zealand], where the viands purveyed have grown in public estimation every day. It is claimed that sanitarium health foods are pre-eminently calculated to supply all that is required for the development of the human body. They are prepared from the choicest grains, nuts, and fruits, and so can be eaten without fear of contracting diseases sometimes conveyed by flesh meats. Everything

about the cafe is attractive, and the food is served in the most appetising way. The menu includes Macaroni cutlets, mock chicken soup, nut meat and tomato stew, and other vegetarian delicacies while the waitresses are expert and attentive. The cooking is, of course, in the hands of specialists. Meals are served at the ordinary hours, and it is asserted that in the food there are no free fats, coloring matter, or other injurious decoctions. If so desired palatable unfermented wine, the pure juice of the grape, can be taken with the meals.”

76. Jaffa, M.E. 1908. Nuts and their uses as food. *Farmers' Bulletin (USDA)* No. 332. 28 p. Oct. 23. [9 footnotes]

• **Summary:** This article is based largely on the author's article by the same title published in 1907 in the *Yearbook of the U.S. Department of Agriculture* (p. 295-312. For the year 1906). In the Introduction (p. 8) we read: “Many special nut foods, such as malted nuts, meat substitutes, etc., have been devised and extensively advertised by the manufacturers for general use in the diet and for the special needs of vegetarians and fruitarians. It is said that some of these American nut products contain soy beans, but apparently the peanut plays a very important part in their composition. In either case, since the peanut, like the soy bean, is a legume, these preparations might more properly be compared with the bean cheese and other soy-bean products, so much used in China, Japan, and other eastern countries than with such nuts as the walnut, almond, or cocoanut.”

The section titled “Description of nuts” states (p. 10): “The chufa, nut grass, or earth almond is a small tuberous root of a sedgeliike plant and may, perhaps, be classed more properly with the vegetables than with the nuts. It is not common, though eaten to some extent.” The Chinese olive (*Canarium* sp.) and closely related species of *Canarium* nuts (which are imported to some extent, but are by no means common) are also discussed.

The section titled “Nuts and nut products for diabetics” (p. 18) notes that “Nuts and nut products are often recommended as foods for diabetics and others from whose diet starch and sugar are excluded, or at least materially reduced.”

The section titled “Nut butters and nut milk” (p. 18-20) states: “Within the last few years so-called nut butters have been used in increasingly large amounts, and at least one variety, namely, peanut butter, is made and sold in ton lots.” “The nut butters are recommended by vegetarians as a substitute for butter in culinary processes and for use at the table. By persons who are not vegetarians they are commonly used for making sandwiches and in other ways for their agreeable flavor and for the pleasing variety which they give the diet.” Peanut butter may be easily made at home; for best results use the roasted rather than the raw nuts. “The process of making nut butters has been frequently described in journals and cookery books.” Describes how to make cocoanut milk and cream, which “are used to some extent

by strict vegetarians who do not care to use cow's milk. A similar nut milk or emulsion of nut fat made from Java almonds (a species of *Canarium*) is used in Java, apparently with considerable success, as an infant food” (p. 20).

Note: Briggs and Calloway (1979, p. 16) state: “As far as we know, the first professor of human nutrition in the United States was Professor M. Jaffa, in 1908, at the University of California, Berkeley. In 1912 he became chairman of the Department of Nutrition at the Berkeley College of Agriculture. This may have been the first department of nutrition in America.” Address: M.S., Prof. of Nutrition, Univ. of California [Berkeley].

77. Colcord, Anna L. (Mrs.). 1908. A friend in the kitchen: or What to cook and how to cook it. Containing 400 choice recipes carefully tested. 16th ed. Takoma Park Station, Washington, DC: Review and Herald Publishing Association. 112 p. Illust. Portrait. 20 cm.

• **Summary:** One chapter in this vegetarian cookbook, titled “Substitutes for meats,” contains many Biblical quotations opposing meat eating. The recipes are based mostly on nuts, lentils and peas.

Another chapter, titled “Specially prepared health foods: Nuts, oils, etc.,” gives recipes including: Peanut butter. Peanut cream. Peanut milk. Almond butter. Almond milk and cream. Cocoanut milk and cream. Home-made granola. Nutmeat. Protose steak. Protose cutlets. Nut gravy. Other chapters (p. 98-110) include “Simple dishes for the sick” (with recipes for Gluten gruel, Graham gruel, and Rice gruel), “Food for infants,” “Remember the Sabbath Day to keep it holy,” “Food combinations,” “Time required to digest various foods” (Rice, apples, and granola take the least time, 1 hour; Roasted pork takes the longest, 5 hours and 15 minutes; animal foods generally take longer than foods of plant origin), “How to become a vegetarian,” and “Vegetarianism in London.”

A photo of the author, a Seventh-day Adventist, and her signature faces, the title page. Note: This is the second earliest U.S. document seen (March 1999) that mentions almond milk. Soy is not mentioned in this book. Address: USA.

78. Battle Creek Foods. 1909. The only original health foods: A complete list of our products (Ad). *Good Health (Battle Creek, Michigan)* 44(3):Unpaginated. March.

• **Summary:** The company sells seven categories of products: 1. Cereals (15 products), incl. Toasted rice flakes, Granose flakes, Granola, Granuto, and Gluten meal (20 per cent, for gruels, mushes, and purees), Sterilized bran (a gentle laxative). 2. Bakery products (12 products), incl. Graham crackers (plain or sweetened), Sanitas wafers, Zwieback, Sanitas cookies. 3. Meat substitutes (10 products), incl. Protose (made of nuts and grains, ½- or 1-lb can), Savory Protose, Potted Protose, Protose roast, L-Protose (no nuts),

K-Protose (resembles veal, no nuts), X-Protose (resembles chicken), Nuttose (made from nuts, 1 lb can), Nuttolene (“Made exclusively of choice edible nuts. A vegetable butter for table use”).

4. Other nut products (5 products), incl. Peanut butter (1 lb can, unroasted), Salted peanut butter, Almond butter, Almond meal. 5. Condensed soups (4 products). 6. Savory sauces (3 products). 7. Beverages (3 products), incl. Malted nuts (large bottle), Noko (cereal coffee), Caramel cereal (“The original coffee substitute, containing no burnt molasses or artificial flavoring”).

Note: This is the earliest English-language document seen (March 2005) that uses the term “vegetable butter” but not to refer to margarine. Address: Battle Creek, Michigan.

79. Mill, Jean Oliver (Mrs. Mill). 1909. Reform cookery book: Up-to-date health cookery for the twentieth century. New and enlarged, 4th ed. Dundee, Scotland: J. Leng. 128 + [28] p. 19 cm. 1st ed. 1904 (Edinburgh, Menzies; 112 p.). 2nd ed. 1905. \*

• **Summary:** Pages 44-46: “A few of ‘Pitman’ 1001 delicious health foods. In place of meat and free from its dangers. Brazose Meat—Made from Brazils. Quite different from all other nut meats... Per ½-lb tins, 10d. Vigar Brawn—The superb cold dish. Tokio Baked Beans, with tomato and nut sauce. Baked Beans, with tomato sauce. Curried beans, with savoury sauce. Vegetable soups—in 12 varieties. Nutmarto Potted Paste—Far superior to meat and fish pastes. Vigar Gravy Essence—Delicious flavour. Add but a few drops to water. One Penny Packet Health Wafers with two ripe bananas insure a perfect meal.

“All those interested in Health Foods and Perfect Health should read ‘Pitman’ Health, from Food Library, No. 1 to 8. One penny each, post free... Full catalogue of health foods, with ‘Diet Guide,’ post free one stamp. A wise selection of health foods will give you Perfect Health and Digestion, and so enable you to perform the maximum amount of work—both mental and physical—with the minimum amount of fatigue.”

“‘Pitman’ Health Food Stores, 155 Aston Brook St., Birmingham [England]. (The largest health food dealers in the world).”

Page 66: “In addition to above, there are the products of the International Health Association [1899—Founded under the name The International Health Association Limited. 1926—Name changed to Granose Foods Limited], ‘the pioneer manufacturers of health foods,’ who have within the past year removed their works into the country (Stanborough Park, Watford, Herts). Then Messrs Winter, Birmingham, ‘Pitman,’ Birmingham, and Messrs Chapman, Liverpool, have a number of excellent nut meats, fuller reference and recipes for which will be found in the chapter on ‘Health Food Specialties’ at end of book.”

Pages 215-16. “Nut meat preparations, whereby one

can with very little contrive Nut meats for one’s self. There are four different kinds—walnut, white, and brown almond (free from pea nuts), and another containing pea nuts... ‘Pitman’ Savoury Nut Meat bears a name which guarantees its excellence. It is free from pea nuts, and is put up in ½-lb., 1-lb., and 1½-lb. tins.

“Quite the biggest development of the last year or two are the nut meats manufactured by R. Winter, Birmingham, of ‘Pure Fruit Fame.’” The products include: Nutton, and Legumon.

80. Rorer, Sarah Tyson (Heston). 1909. Mrs. Rorer’s vegetable cookery and meat substitutes. Philadelphia, Pennsylvania: Arnold and Company. 328 p. + 8 p. of unnumbered ads at end. Index. 20 cm.

• **Summary:** An early, detailed and savoury vegetarian cookbook. The long chapter titled “In the place of meat” (p. 39-62) includes recipes for: Peanut butter and peanut meal (p. 41-42). Mock veal roast (with roasted peanuts), Mock meat hash, Mock tenderloin steak (with 1 quart nut meats {English walnuts, peanuts, pine nuts and almonds in equal quantities}), Mock turkey, Mock goose (with black walnuts), Mock duck, Mock fish, Planked mock fish, Mock ham (with English walnuts, black walnuts, pecans, and almonds), and nut cheese (p. 43-47). Also includes: Peanut sandwiches [actually Peanut butter sandwiches] (p. 194). Section titled “Nut milks and nut creams” with recipes for Coconut milk. Almond milk (p. 245). Section titled Menus (p. 249+). The author was born in 1849.

Note 1. This is the earliest English-language document seen (Oct. 2014) concerning meat alternatives that contains the term “Mock ham.”

Note 2. This is the earliest document seen (Nov. 2014) concerning a meatless alternatives to the meat of a pig (ham). Address: Philadelphia.

81. Li, Yu-ying. 1911. Charcuterie de soja [Cold cuts and meatlike products from soya]. *French Patent* 428,718. 2 p. Application filed 20 April 1911. Granted 6 Sept. 1911. [Fre]

• **Summary:** A very interesting, innovative, and important French patent.

“This invention concerns the products of the pork-butcher’s shop (*charcuterie*) such as fresh sausages (*saucisses*), pâtés, etc. to which are added a soy-based product (*un produit à base de soja*) (*pois chinois*). The preparation of these products of the pork-butcher’s shop involves the use of tofu (obtained by the coagulation of soymilk) *fromage de soja* (*obtenu par la coagulation du lait de soja*) to replace ordinary meats in part or in totality, tofu being a sort of vegetal meat (*le fromage de soja constituant une sorte de viande végétale*).

Note 1. This is the earliest French-language document seen (April 2013) that uses the term *une sorte de viande végétale* to refer to tofu.

Note 2. This is the earliest document seen (Nov. 2014) in the Western world concerning soy-based meat alternatives or a soy-based meatless sausage.

The author then discusses how to cook tofu and use it in to make fresh sausages (*les saucisses*), large dry sausages or salami, (*saucissons*), pâtés, etc. Aromatics (*aromates*) which can be used for seasoning are soy sauce, salt, pepper, and the oil and juice of onions.

Likewise, tofu can be mixed with ordinary meat to obtain charcuterie products.

Note 3. This is the 2nd earliest French-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *Charcuterie de soja, viande végétale* (vegetal meat), *les saucisses* (fresh sausages), etc. Address: Resident of France (Seine).

82. Kellogg, John Harvey. 1911. Food product. *U.S. Patent* 1,001,150. Aug. 22. 2 p. Application filed 19 Oct. 1908.

• **Summary:** “The main object of this invention is to provide an improved food product which is very palatable and nourishing and one which is well adapted for use as a meat substitute.”

It is made from 3 parts each wet casein and wet wheat gluten, 3 parts vegetable oil (such as corn or nut oil, optional), plus yeast products from waste brewery yeast (either concentrated yeast extract or crude yeast product). After the ingredients are mixed and cooked in cans, the product has a meaty consistency and flavor, making it a “very satisfactory substitute for flesh foods. It is very nourishing and may be used in a great variety of ways.” Address: M.D., Battle Creek, Calhoun County, Michigan.

83. Loyer, Maurice. 1911. Déjeuner amical annuel de la Société d’Acclimatation [Annual friendly lunch of the Society for Acclimatization]. *Bulletin de la Société d’Acclimatation* 58:764-67. See p. 765-767. [Fre]

• **Summary:** This meal took place in a grand dining hall in Lyon. On page 765 is a full-page menu titled The friendly lunch of 15 May 1911 (*Déjeuner amical du 15 Mai 1911*). On the left half of the page are listed the various foods and beverages. The hors’ d’oeuvres include artichokes stuffed with soy meat (*viande de soja*). Roasts (*Rotis*) include sauteed soy sprouts (*Germes de soja sautés*) and salad of soy sprouts (*Salade germes de soja*). Dessert includes Biscuit mousseline with soya (*Biscuit mousseline au soja*) and Roquefort soy cheese (*Roquefort de soja*). After wine, as the last course, comes coffee without caffeine and whole wheat bread, regular or with soya (*Pain complet ordinaire et de soja*).

On the right half of the page is an illustration of a lovely African woman, naked from the waist up, holding atop her head a large lobster, with two goats standing beside her.

Starting at the bottom of page 766 and continuing to all of page 767 is a long discussion of the soybean and Li Yu

Ying. We are able to feature on our menu various vegetables, exotic or domesticated. But there is one that takes a remarkable variety of forms, appearing in our menu in the form of bread, of vegetal ham (*jambon végétal*), of vegetal meat (*viande végétal*), of salad, of condiment, to finally return one last time in the form of Roquefort cheese and of jams (*confitures*). These multiple transformations are those of an exotic bean, known and cultivated for centuries by the Japanese, the Chinese, the inhabitants of Indo-Malaysia, and of Indo-China. It is the bean of Manchuria, the *Soja hispida*, that one Chinese, Mr. Li Yu Ying has presented to us in these many different forms. Mr. Li Yu Ying is the technical director

of a factory for the preparation of various soyfood products (*produits à base de Soja*) located at Vallées, near Paris. The Society for Acclimatization was among the first to judge the qualities of these various preparations. The omelette with vegetal ham, the soy cheese have collected many votes, as well as the soy jams, which are closely analogous to those of chestnut flour; the salad and the sautéed soy sprouts were less well received than the soy bread, which is only lightly seasoned with salt.

Note: This is the earliest French-language document seen (Oct. 2014) concerning meat alternatives that contains the term *jambon végétal* (vegetal ham). Address: Director of Agriculture, Tonkin [Vietnam].

84. Nashville Sanitarium–Food Factory. 1911. High grade health foods (Ad). *Naturopath and Herald of Health (The New York City)* 16(12):Unnumbered page. Dec.

• **Summary:** “Made by expert bakers, from best selected materials, in a well-ventilated hygienic factory away out in the country, surrounded by farms and pure fresh air. Made by men who do things from principle.

“Contain no animal fat. Full line of nut foods, cereal foods... More than twenty-five kinds. Nutfoda is the great vegetable meat, pure, wholesome, delicious, a perfect meat substitute at 10, 15 and 25¢. for ½ lb., 1 lb and 2¼ lb. cans.

“Nutmaysa—similar to cheese, 1 lb. can—\$0.15.

“Nashville Malted Nuts, 1 lb. jar—\$0.35...

“Baked Beans, Tomato or Plain, 1½ lb. can—\$0.10.

Note: It is possible, but unlikely, that these baked beans are soybeans.

“Cereal Coffee, Superb, 1 lb. pkg.—\$0.10...

“Dixie Kernel (a Malted Breakfast Food) 1¼ lb. pkg.—\$0.15.

“20 per cent Gluten Meal, Well Cooked, 1 lb. pkg.—\$0.12.”

“On sale at Naturopathic Supplies Store, 465 Lexington Ave., New York, N.Y.”

Note: This organization is probably the same as that later known as Madison College; Madison was near Nashville, Tennessee. Address: Nashville, Tennessee.

85. Langworthy, C.F. 1911. Cheese and other substitutes for meat in the diet. *Yearbook of the U.S. Department of Agriculture* p. 359-70. For the year 1910. See p. 363-64.

• **Summary:** Physiologists “admit that meat is not essential to a well-balanced diet, and there are many who, for one reason or another, are interested to know the rational ways of lessening the amount of meat which they consume or of replacing it with other foods.” “Meat apparently supplies “a greater abundance than other foods of the substances which stimulate the normal or natural flow of the digestive juices” (p. 359).

The section titled “Dried beans and other legumes” (p. 363-64) states: “In Eastern countries, where conditions

differ from those in Europe and America, the lack of abundant supply of food animals has been responsible for the production of a series of food products made from legumes, chiefly the soy bean. By ingenious processes, the nitrogenous material and more or less of the fat which the beans contain are separated and made into a number of special articles of diet, for instance, bean cheese or bean curd, a white material not unlike cottage cheese in appearance, and soy, a thick brown sauce which is the common flavoring material as well as a condiment of millions of people who thus supply nitrogenous material and flavor to a diet of vegetables, rice, and other similar foods.”

The section titled “Commercial meat substitutes” notes: “There are on the market numbers of proprietary or patent foods recommended by their makers as meat substitutes. For some it is claimed that they are made from nuts, and judging from their flavor and other characteristics they may be prepared from the peanut or other nuts, in part at least. It has been suggested that some of these special foods contain wheat gluten. Undoubtedly considerable quantities of these foods are used by those who follow some one of the vegetarian systems of diet, but they are not used in any general way as substitutes for meat in the average home.” Address: Expert in Charge of Nutrition Investigations, Office of Experiment Stations [USDA].

86. Rorer, Sarah Tyson (Heston). 1911. Mrs. Rorer’s vegetable cookery and meat substitutes... London and Leipzig [Leipzig]: T. Fisher Unwin. 328 p. 8°. \*

• **Summary:** American editions of this vegetarian cookbook were published in 1909 and 1911. Address: Philadelphia.

87. Ward, Artemas. 1911. The grocer’s encyclopedia—Encyclopedia of foods and beverages. New York, NY: Published by the author. 748 p. Illust. (color). 29 cm.

• **Summary:** Soy-related entries: Bean (p. 49-54): “The bean of European history is the Broad or Windsor variety,...” “The principal beans of United States cultivation are the Kidney and Lima, both of them believed to be native to South America.

“The Kidney Bean is the Haricot of the French and in Great Britain is sometimes called the French bean.” The many varieties can be classified into “tough podded” and edible podded.” “The ‘tough podded’ class produces the bulk of the dried beans of commerce, variously known as ‘Kidney Beans,’ ‘Navy Beans,’ ‘Marrow Beans,’ ‘Black Beans,’ ‘Turtle Beans,’ etc., in many colors, shapes and sizes.” “‘Flageolets’ are cultivated with special regard to the consumption of the fresh seeds or beans.” To the “edible podded” class of kidney beans belong Wax or Butter Beans, the Cranberry Bean or Red Speckled Bean, String Beans, Snap Beans, French Beans. “Pea Beans are the Cowpeas of the agriculturist.” “Among numerous other ‘special’ varieties are the Soy Bean (which see), Asparagus Bean,

Frijole, Lab-lab (or Egyptian Kidney), Red Bean, and Scarlet Runner.” Asparagus Beans are known as *Tou Kok* by Chinese gardeners in California.

“Catsup, Catchup, Ketchup: a word derived from the name of an East Indian pickle, which was formerly applied specifically to the boiled spiced juice from salted mushrooms, but is now freely attached to various sauces (sold both bottled and in bulk) which consists of the pulp—bottled, strained and seasoned—of various fruits, as tomatoes, green walnuts, etc.” Note 1. At “Catchup” and “Ketchup” we are told to see “Catsup.”

Locksoy ([Lock Soy], p. 346): “Rice boiled into a paste and drawn into threads, imported from China. It is used to thicken soups.”

Nuts (p. 412-13): A table shows the nutritional composition of all major American nuts, including almonds, chincapin [chinquapin] or water chestnut, chufa (earth almond), cocoanut, peanut, and peanut butter. “Many special nut foods, such as malted nuts, meat substitutes, etc., have been devised and extensively advertised by manufacturers for general dietetic use and for the special needs of vegetarians and fruitarians. It is said that some of these products contain soy beans, but apparently the peanut is very important in their composition.

Sauces (p. 552-53): In bottled sauces, vinegar is the most common liquid ingredient. “Commercial sauces of the Worcestershire kind, if of good quality, generally have Soy (which see) as their chief character ingredient. A typical formula of Worcestershire-style includes, in addition to Vinegar and Soy, a considerable percentage of lime juice, onions and tamarinds and small quantities of garlic, fish (as anchovies or pickled herrings), red chilies and spices. The product, after cooking, is strained through fine hair sieves. Leicester Sauce resembles Worcestershire in general characteristics but is less pungent.”

Soy (p. 576): “A brown sauce, valuable to the commercial sauce market, made from the Soy Bean, a native of Southeastern Asia [sic] and widely grown in China and Japan. The beans are boiled, mixed with ground wheat or other grain, salt, etc., and allowed to ferment for a month or 6 months. The liquid is then strained off and clarified. Molasses is frequently added. In appearance it resembles Worcestershire Sauce, of which it is an important ingredient. It should not be too salt [salty] or too sweet, and although thick and syrupy, should be clear. When shaken in a bottle or glass it should, if it is genuine, leave a bright yellow film on the glass. Being a very desirable article, it is often counterfeited.”

Soy bean (p. 577): “Commercial and government circles, both in Europe and this country are devoting increased attention to the cultivation of the Soy Bean as a food product, as it contains a large percentage of protein and a fair amount of fat, thus resembling meat in general nutritive value. The cell-walls of the raw bean are very tough, but

thorough cooking makes it readily digestible. Boiled with bacon and other fatty broths until soft and then seasoned, the result is a vegetable dish very pleasing to the average palate. If the beans are dry, a preliminary soaking to remove the skins is necessary.

“The Soy Bean is largely consumed in Japan, China and other parts of Asia as an adjunct to rice and other foods, taking the place of meat in the popular dietary. It is most popular in these countries in fermented form, the best known types being *Shoyu* or Soy Sauce; *Tofu*, a kind of cheese; *Miso*, Soy Bean ‘Milk’ [sic]; *Yuba*, the evaporated product of ‘Miso’ [sic], and *Matto* [sic, *Natto*], a product obtained by simple fermentation of the boiled beans. The various degrees and styles of fermentation serve the double purpose of rendering the beans more easily digestible and producing new flavors, just as by the fermentation of milk and cream we produce the different flavors of cheese.

Note 2. This is the earliest English-language document seen (Aug. 2013) that uses the term “Soy Bean ‘Milk’” (regardless of capitalization) in to refer to soy bean milk.

“The plant is an annual, growing chiefly in bush form...” The different varieties are classified principally by the color of the beans: “Black, Yellow, White and Brown,... Types of all these four classes are grown to some extent in Germany, Austria, and Switzerland, and the first three also in this country, in North Carolina and other Southern States. Under favorable conditions a single plant may bear a hundred or more pods.

“Because of the fact that the beans contain little if any starch, they have been recommended as a desirable food for diabetics, and Soy Bean Bread and Soy Bean Meal are prepared for that purpose in Paris. The dried beans are also used in Switzerland and elsewhere as a coffee substitute.” An illustration shows the top of a soy bean plant, with leaves, pods, and flowers.

Note 3. This book is full of fascinating information about the food system in the USA in 1911, with entries such as cold storage (first attempted in 1860, it has grown to extraordinary proportions), coloring matter (great improvements, no longer harmful), ice and refrigeration (ice manufacture dates from about 1870; today nearly 200 companies produce ice for general sale, mostly using the compressor and anhydrous ammonia). Dictionary of food names in five languages (English, French, German, Italian, and Swedish, p. 710-724) and a dictionary in English of “Culinary and bill-of-fare terms” (p. 741-45).

Note 4. The author, Artemas Ward, lived 1848-1925. His father was Henry Dana Ward (1797-1884), his grandfather was Thomas Walter Ward (1758-1835), and his great-grandfather was Artemas Ward (1727-1800), the first Commander-in-Chief of the colonial troops before the arrival of George Washington (a little-known Virginia planter) on 3 July 1775. Thereafter he served as second in command after Gen. Washington and was a Major General in the American

Revolutionary War. Address: Formerly (from 1874) founder and editor of *The National Grocer*, 30 Union Square, New York.

88. Li, Yu-ying; Grandvoinnet, L. 1912. Le soja [The soybean]. *Agriculture Pratique des Pays Chauds (Bulletin du Jardin Colonial)* 12(106):28-38. Jan. [16 ref. Fre]

• **Summary:** Contents (continued): Soymilk (continued): Chemical properties, composition (comparison with 8 animal milks—in bar chart form showing protein, lipids, carbohydrates, and ash), action of ferments [enzymes] and diastases [diastatic enzymes] on soymilk (*Action des ferments et des diastases sur le lait de soja*) (1. The lactic ferments {kefir, yogurt, etc.} act in the same way on vegetable milk and on animal milks. 2. The ferments of certain European cheeses make analogous vegetable cheeses {*fromage végétal d'une façon analogue*}. 3. Rennet coagulates soymilk, but the optimum temperature is a little higher than for cow's milk. 4. The ferments that we have extracted from shoyu [Japanese soy sauce] coagulate animal milks in the same way as vegetable milk).

Uses of soymilk (p. 30): They are the same as those of the animal milks. We will note, mostly, its use in China as a substitute for mother's milk. (Footnote 1. One of our parents was nourished, from the first phase of life, with soymilk. He/she is now 37 years old and has always been in excellent health).

Residues of the [soy] dairy (*residus de laiterie*; okara).

Condensed soymilk (*lait de soja concentré*). Powdered soymilk (*lait de soja en poudre*). Fermented soymilk (Kefir, yogurt, etc. are increasingly used therapeutically. One can compensate for the lack of carbohydrates in vegetable milk by the addition of lactose {or levulose for diabetics}). Tofu—which Li calls *Caséo-Sojaïne (fromage de soja)*—meaning “tofu or soy cheese”: Method of production, coagulants used, perfected modern production methods at Li's factory (In this factory, tofu can be made into either non-fermented or fermented cheeses. The non-fermented cheeses {*Fromages non fermentés*} are of two types: Fresh and hard/firm. The fresh are white in color and the consistency of hard-boiled eggs. The hard/firm are of two types: In diced sheets {salted or unsalted}, and in salted, semi-dry pieces/morsels. The fermented cheeses {*Fromages fermentés*} may be of the Gruyere, Roquefort, or Camembert types), tofu yields, preservation and storage, composition of tofu (compared with 4 meats on a moisture-free basic, in bar chart form showing protein, lipids, carbohydrates, and ash), digestibility of tofu, culinary preparations based on tofu (tofu omelette with egg, smoked tofu with shoyu, tofu pâté, soy sausage—made like regular sausage except that meat and fat are replaced by fresh, hard tofu plus butter or cocoa butter). Soy casein (*Caséine de soja*; for food or industrial uses). Contains various tables and charts from other sources.

Residues of the [soy] dairy (*residus de laiterie*; okara,

p. 30-31): After filtering the [soy] milk, a slightly firm, aqueous oilcake remains in the filter cloth that is still very rich in nutrients (*substances alimentaires*). According to Dr. Bloch, it does not contain any trace of starch (our tests agree with this conclusion). Consisting of torn cells emptied of the largest part of their content, it would have the following percentage composition (see Bloch 1907):

Protein 0.248, water 88.75, ash 0.36, fat .04, other 10.85.

“The oilcake (*torteau*) obtained at the factory of ‘Soy-Casein’ (*Caséo-Sojaïne*) and analyzed at the municipal laboratory of Paris yielded:

Water 80.04, protein 33, fat 8.44, carbohydrates 22.63, mineral salts 4.24.

“This oilcake was very easily dried to 10% water. The milk can only be filtered after boiling, thus according to Prinsen [Geerligs]:

Proteins 29.38, oil 12.81, ash 4.66, carbohydrates that are convertible to sugar 26.80, fiber 11.10, cellulose 10.2.

“The oilcake can be diluted in water. The liquid thus obtained is used in grinding to make the second extraction of [soy] milk.”

Soy casein (p. 38): The casein or legumine of soymilk can be prepared by precipitation, purifying it by several dissolutions and precipitations, and finally drying it. One obtains a yellowish powder resembling animal casein obtained by the same processes.

It is generally admitted that vegetable albumins have a coefficient of assimilation greatly inferior to those of animal albumins. But confirmation of this is far from being definitive. The experiments of Messrs. H. [Henri] Labbé and Marchoisne have showed, in effect, that vegetable albumin is as well assimilated as animal albumin.

Legumine is different from animal casein, but the differences are of the same order as those which exist between the various animal caseins. The differences existing between the caseins of the various animal milks have been noted by many chemists.

The casein extracted from soymilk can be used in the same applications as casein from cow's milk. These are of two types: food and industrial. For food uses, one can point out the manufacture of powders, of lacteal flours (*farines lactées*, perhaps wheat flour enriched with soy casein), of whole-grain bread, etc.

Note 1. This is the earliest document seen (April 2001), worldwide, that mentions a Western-style soy cheese (Gruyere, Roquefort, or Camembert types), or a tofu sausage. This is also the earliest French-language document seen that mentions soy cheese, which it calls *fromage de soja*.

Note 2.

Note: This is the earliest document seen (April 2013) concerning the use of tofu in a second generation product.

Note 3. This is the earliest document seen, worldwide, that mentions powdered soymilk or dried soymilk.

Note 4. This is the earliest document seen, worldwide,

that mentions soy kefir. Address: 1. Conseiller de 1ere classe au Ministère de l'Agriculture de la Chine; 2. Ingénieur agricole (G.).

89. Li, Yu-ying; Grandvoinet, L. 1912. *Le soja: Sa culture. Ses usages alimentaires, thérapeutiques, agricoles et industriels* [The soybean: Its culture. Its food, therapeutic, agricultural, and industrial uses]. Paris: Augustin Challamel (Rue Jacob 17). 150 p. Illust. Index. 25 cm. Translated into French and expanded from the Chinese edition, published by la Société Biologique d'Extrême-Orient (1910). [151 ref. Fre]

• **Summary:** One of the earliest, most important, influential, creative, interesting, and carefully researched books ever written about soybeans and soyfoods. Its bibliography on soy is larger than any published prior to that time. It was first published as a series of eight articles in *Agriculture Pratique des Pays Chauds (Bulletin du Jardin Colonial)* from September 1911 to April 1912. Before being published as a book, it was revised slightly by adding a table of contents at the back, dividing the material into 5 parts with 19 chapters, and adding several photos (p. 16-17), a world map showing the distribution of soybean cultivation (p. 21), and an interesting 2-page table (p. 66-67).

Contents: The soybean: Origin and history. Part I: Soybean culture. 1. Species and varieties of soybeans: Botanical characteristics, species, varieties (Chinese, Japanese, Indian, Indochinese, Hawaiian, USA, European). 2. Needs of the soybean: Climatic, geographical area of the soybean by region worldwide, agrological/soil needs, fertilizers, soil preparation, the place of the soybean in crop rotations. 3. Soybean seeds: Study of seeds (by weight, by germination rate, selection of seeds), time of planting,

plant spacing, depth of seeding, rate of seeding per hectare, method of seeding (broadcasting, in rows, in mounds).

4. The soybean during its vegetative stage: Germination, transplanting, types of care (e.g., second dressings), irrigation, flowering and fruiting, enemies of the soybean (e.g., insects). 5. Harvest of soybeans: Time for harvest (forage or grain), methods of harvesting (forage or grain; mechanical mower), threshing (use of machine), yields of soybeans (forage and grain in various countries, ratio of seeds harvested to straw is about 1 to 2, yield of nutrients). 6. Fixation of atmospheric nitrogen by soybeans, and improvement of the soil. 7. The soybean in mixed cultures and alternate rows: With corn, cowpeas, rice, sweet sorghum, or millet.

Part II: Chemical composition of the soybean. 1. Composition of the plant: Minerals in the leaves and total plant. 2. Study of the seed: Composition, chemical composition, microscopic comparisons, table of analyses by 28 previous researchers, albumins, sugars, starch, dextrin or dextrine, diastase, lipids, ash/minerals.

Part III: The soybean as human food and animal feed. 1. The soybean as feed for animals: Green forage and hay. 2. The soybean in human feeding: From the viewpoints of physiology, economy, and gastronomy. The role of soya in special diets: Vegetarianism, remineralization, diabetic, and lactose intolerant.

Part IV: Food products based on soya. 1. Soymilk and its derivatives: Soymilk (Methods of manufacture, Chinese and modern at l'Usine de la Caséo-Sojaïne, nature and properties [physical and chemical] and composition of the milk, action of ferments and diastases (enzymes) on the milk, uses of the milk, the residue from the soy dairy [okara], condensed soymilk, powdered soymilk, fermented soymilk

(kefir, yogurt, etc.), tofu (called Caséo-Sojaïne, or fromage de soya; methods of production, coagulants, yield of tofu, storing tofu, composition and comparison with various meats, digestibility, culinary preparations made from tofu (smoked tofu, tofu pâté, tofu sausages)), Soy casein (food and industrial uses). 2. Soy flour and its derivatives: Soy flour, soy bread, wholemeal bread, other products based on soy flour (as biscuits and cakes for diabetic diets). 3. Soy oil and its by-products: Soy oil, physical and chemical properties, usage, residue of the oil mill: the cake, price, uses. 4. Use of the soybean as a legume: Whole soybeans (composition and digestibility), soy sprouts (*germes de soja*), green vegetable soybeans (*le soja frais*). 5. Fermented soy condiments: Solid condiments from Japan: Tokyo natto (*Le Tokio-Natto*) and Ping-Ming natto or tao-tche (*Le Ping-ming-Natto*; fermented black soybeans with salt, ginger, orange rind, etc. A similar product is made in China and called tao-tche). Paste condiments: Miso (four types and composition), tao-tjung (Chinese miso). Sauces: Shoyu (its production, varieties, properties, composition), chiang-yu (*tsiang-yeou*), ketjap [kechap, from Java], tuong (from Annam, with rice or corn), tao-yu (widely used in China and Japan, described by Prinsen Geerlig). 6. Confectionery products: Comparison with chestnuts, roasted soy flour to replace chocolate. 7. Soy coffee (with analysis by Kornauth). 8. Special fermented products: Kiu-tsee (a special commercial ferment from Canton described by Thiersant), fermented soymilks.

Part V: Industrial uses of soybeans. Oil based: soap, wax candles (*bougie*), and paint oils. Protein based: sojalithe or soy stone which corresponds to lactite, insulators for electrical apparatus, glue, etc. Conclusion. Addendum (*Complément*) to Part III, Chapter 1: Soybean straw and stems. Composition of various seeds, including soybeans. Soy flour. The cakes from oil mills. Soymilk and the cake from soy dairies (*tourteau de laiterie*, okara).

A very interesting table (p. 66-67, which does not appear in the original 8 articles) shows earlier nutritional analyses of the composition of soybeans by Steuf (from Hungary, Mongolia and China), Schroeder, Caplan, Pellet (from China, Hungary, Etampes), Muntz, Nikitin (black soybeans from Russia, 2 samples), Lipski [Lipskii] (yellow, from Russia), Giljaranski (yellow from Russia, China and Japan; black from China and Japan; green), König (*Hispida platycarpa* black, Tumida yellow, brown and black), Prinsen (white from Java and China), Goessmann, Kellner, USDA, Chemiker Zeitung (white from Java and China, 29 Jan. 1896), Scuff (misomame; miso soybeans), Zulkovski (yellow from China, reddish brown from Mongolia), Institut Agr. de Vienne (Austria; yellow from Vienna, reddish brown from Tirol), Ecole Imp. et Roy d'Ag. Hong (yellow from Mongolia and China, reddish brown from China), Chez M. Olivier Lecq (from Moravia), Lechartier (Etampes and black), Joulie (yellow), Stingl and Morawski, Bloch (yellow, green, and black), Balland, Cavendish Evelyn Liardet (yellow, brown,

green, black, and white), Jardin Colonial (Laos, Tonkin, China), Aufray (Tonkin, Yun-nan), Homes Laboratory (black from China, or white). Photos and illustrations are the same as those referenced in individual sections of the book, except for the following: A field of soybeans (p. 16). A soybean plant growing in Europe (p. 17). Color illustrations appear facing pages 12, 22, and 64. Address: Li is from Societe Biologique d'Extreme-Orient (Chine). Grandvoinnet is from Ingenieur Agricole (G.).

90. Snyder, Sherwood P. 1912. A treatise on foods: And their effects upon health and the physical and moral life. Also a complete list of recipes and instructions for the hygienic preparation of the common food products with special lists of menus. 5th ed. Revised and enlarged. Dayton, Ohio: Health Publishing Co. 192 p. Portrait. Index. 20 cm.

• **Summary:** The title on the cover: "The practical hygienic preparation of foods." The author is a vegetarian. His book focuses on the keys to a long and healthy life. Contents: Preface. Prescription for a long life. Wise and healthful sayings suggest healthful thoughts—So these little messages may cause someone to think (13 quotations, including many by Shaftesbury and one by Snyder: "All sickness and sin originate in disobeying nature's laws"). Introduction. 1. The preservation of health a sacred duty. 2. The dining-room. 3. Cereals. 4. Bread and bread-stuffs. 5. Soups. 6. Meats. 7. Meat versus vegetarianism. 8. Meat imitations and meat substitutes. 9. Gravies and sauces. 10. Eggs. 11. Fats and oils. 12. Vegetables. 13. Beans, peas and lentils. 14. Rice and macaroni. 15. Salads. 16. Nuts, nut preparations, nut butters & nut cream. 17. Pies. 18. Desserts. 19. Scientific cake baking. 20. Menus. 21. Ice cream and ices. 22. Miscellaneous subjects. 23. Baby's food and care of children. 24. Foods for the sick. 25. Mastication. 26. The value of steam cooking. 27. Composition of foods. 28. Exercising. Address: Food specialist.

91. Neuville, A. de. 1913. Les nouveaux aliments artificiels [The new artificial foods]. *Revue (La) (Paris)* 100(3):384-89. Feb. 1. 24th year. 6th Series. For translations see *Literary Digest* (8 March 1913, p. 509-510) and *American Review of Reviews*, April 1913 (p. 500-01). [Fre]

• **Summary:** Contents: Introduction. 1. Soymilk (*Le lait de soya*). 2. Meat alternatives (*La viandine*) developed by Belgian chemist M. Effront. 3. Miracle wheat. Note: The soybean is mentioned only in the section on soymilk.

By modifying the albuminoid and protein substances found in soy (*Soya hispida*, or Chinese pea), and extracting their proteids, we may obtain a milk that is similar to the milks secreted by the mammary glands of mammals. Soy is rich in nitrogen and in fatty matter. Made into flour it serves to make a bread that is prescribed for diabetes. A synthetic milk has been extracted from the beans, by a process that is still kept secret; it has the same nutritive effect as natural

milk. "The invention was introduced into Germany and France almost at the same time. The parts of the plant are broken up mechanically, then chemically triturated and reduced to a lactescent substance that is cheaper than the product of the cow and may replace it perfectly."

A farmer can get six times as much milk from the same piece of land by planting it to soy beans, than by growing grass and letting a milch cow eat the grass. "The economy realized is considerable. A cow requires nearly a acre of pasturage. She turns only 53 per cent. of it into effective nutriment and about 5 per cent. into milk... Two milkings a day give on an average 15 quarts, varying with the breed. Soy grown on a field of one-sixth an acre yields the same quantity of artificial milk. The expense is far less.

"This soy milk presents other advantages over natural milk. It is not exposed to contact with impurities, as so often happens in farm stables and dairies... Besides, cows are not exempt from bacillary infections... Artificial milk is not exposed to these dangers. It is made with apparatus kept so scrupulously clean that there can be no question of microbial infection."

Soy "is a very nourishing food, but of an oily taste that makes it disagreeable to Europeans. Made into milk the soy has none of these disagreeable qualities. It is digestible, pleasant to the palate, and leaves no taste in the mouth. Being a complete food like natural milk, it is suited to children and invalids and all who are following a diet." Address: Dr.

92. *Literary Digest*. 1913. Artificial meat. 46(21): May 24. Whole No. 1205.

• **Summary:** Excerpt from an article titled "The New Artificial Foods" in *Minerva* (Rome, April 1913) which begins by discussing soy milk, then states that a Belgian chemist named Effront has found a way to use spent brewers' yeast (from brewing beer) to make "Viandine," which he considers to be a complete substitute for meat—but one which is much less expensive. Experiments on both a man and on rats show that it has the same physiological effect on the digestive organs as real meat, and promotes growth as well or better than lean beef.

93. Cooper, Lenna Frances. 1913. *The new cookery: A book of recipes, most of which are in use at the Battle Creek Sanitarium*. Battle Creek, Michigan: The Good Health Publishing Co. [v] + 298 p. Illust. (10 photos). Index. 20 cm.

• **Summary:** This Seventh-day Adventist vegetarian cookbook, the first by Lenna F. Cooper, advocates a "low-protein" diet based on the research of Prof. R.H. Chittenden, dean of physiology, Yale University [New Haven, Connecticut]. It uses dairy products and eggs, but no meat, poultry, fish, shellfish or stimulants (such as coffee or tea).

The Foreword states: "Many 'food reformers' and faddists have attempted to prepare wholesome foods but have neglected the almost equally important requirement—

palatability. This combination of wholesomely prepared and palatable foods constitutes in a sense a New Cookery... which has for its object, efficiency of body and mind." She thanks "Dr. and Mrs. J.H. Kellogg, who first inspired her with a love for the study of foods and their scientific preparation and who have since been constant sources of help and encouragement." She also thanks Miss Clara B. Lambert and Mrs. Estella F. Ritter.

Recipes call for the use of Minute Brew (p. 10), cereal coffee (p. 10), Kaffir tea (p. 11), Sanitas / Health Koko (p. 11), yogurt buttermilk (p. 11-13), bran (p. 18), Graham flour (p. 20), Good Health Breakfast Food (Brose, p. 20), gluten (p. 20), granola (p. 22), fermented breads (p. 23+), Graham bread (p. 26-28), unfermented breads (p. 33+), bran and Graham biscuit (p. 41), bran gems (p. 43-44), peanut butter sandwiches (p. 49), Protose (p. 49, 71, 77, 79), cream soups made with almonds, lentils, white beans, lima beans, or split peas (p. 63-66), Savora (p. 73-74, 78-79).

Chapter 10, titled "Meat substitutes and entrees," begins (p. 81): "In many homes, meat forms the chief part of the meals,..." but this book calls for a "meatless dietary," which requires a "knowledge of the chemistry of foods." Recipes (p. 81-103): Roast Protose [canned] with dressing. Boiled Protose. Protose fillet. Nut fillet (with Protose and Nuttolene). Fillet of nut meat. Panned Protose. Nut or Protose cutlets. Braised Protose. Nut and apple pie. Normandy or mock veal loaf. Chipped Protose in cream. Nut and rice croquettes. Protose hash with rice and peas. Nut sausage (p. 87; with ¼ lb Protose, seasoned with "2 tablespoons Japanese soy [sauce] or 4 teaspoons Savora"). Nut and vegetable stew (with Protose). Protose steak with onions. Broiled Nuttolene. Nuttolene with mint sauce. Nuttolene cutlets. Nuttolene a la cream. Baked Nuttolene. Nuttolene fricassée. Nuttolene croquettes. Nut meat pie (with Protose). Pressed vegetable meat (with Protose). Rice a la Carolina (with Protose). Nut meat loaf (with Protose and Nuttolene). Vegetarian ham (with Nuttolene and Savora). Nut patties. Nut chops (with peanut butter). Pine nut roast. Peanut roast (with peanut butter). Walnut roast. Cereal roast (with granola). Chestnut roast. Creamed chestnuts. Chestnuts with tomato sauce. Baked beans (with white beans). Baked lima beans. Lima bean loaf. Bean croquettes. Bean soufflé. Savory roast or mock turkey (with lentils and granola). Peas patties. Baked lentils. Lentil and potato loaf. Hominy croquettes. Corn roast. Apple fritters. Prune fritters. Banana fritters. Rice patties.

Note: This is the earliest English-language document seen (Oct. 2014) concerning meat alternatives that contains the term "Vegetarian ham."

Chapter titles: 12 Eggs. 15. Salads and relishes (incl. Neufchatel or yogurt cheese, p. 168, 176. Salad dressings, p. 172+). 17. Fruits and fruit desserts (incl. Baked apples with Meltose dressing, p. 186. Vegetable gelatine desserts, p. 195+). 19. Frozen desserts (incl. Yogurt buttermilk ice

cream, p. 215). 20. Pastry and pies (most desserts call for lots of white or granulated sugar). 21. Cakes. 22. Cake fillings and icings [icing, frosting]. 23. Hot puddings. 24. Sauces for puddings. 25. Canning and preserving. 26. Invalid dishes. 27. Balanced menus (breakfast, dinner, supper). Lenna F. Cooper was born in 1875.

After the Index (p. 288-98) are advertisements: Perfection Biscuit Co. The Welch Grape Juice Co. Horlick's Malted Milk Co. Winorr Canning Co. (Winorr Kerneled Corn). Acme Preserve Co. (White A Condensed Tomatoes). Garis-Cochrane Household Dish-Washing Machine (motorized). Sprague, Warner & Co. (Richlieu Food Products). A.-B. Stove Co. (gas range). Wagner Manufacturing Co. (cast aluminum ware). The Kellogg Food Co. ("Protose: A vegetable meat." Minute Brew. Colax {relief from constipation}). McGraw Mfg. Co. (Servette [Lazy Susan]). Battle Creek Sanitarium School of Home Economics. National Onion Salt Co. American Thermos Bottle Co. Seely Fasco Fireless Cooker. Address: Director of the Battle Creek Sanitarium School of Home Economics, Head Dietitian of the Battle Creek Sanitarium.

94. Brainin, David. 1914. Article of food and process of producing the same. [Soy beans as meat substitute]. *U.S. Patent* 1,088,875. March 3. 1 p. Application filed 11 Dec. 1912.

• **Summary:** The author is a "chemist, a subject of the Emperor of Russia, residing at 61 Leibnitzstrasse, in the city of Charlottenburg, in the Kingdom of Prussia, German Empire." He processes "roasted soy beans to serve as a substitute for meat and having a nutritive value equivalent to that of meat." "The lightly roasted beans are ground or pounded and mixed" with ground rye and oats. Bananas or aromatic herbs may also be added. The food made with "lightly roasted soy beans" may be manufactured in powdered, granular, or tablet form. Address: Charlottenburg, Germany.

95. Nashville Sanitarium Food Factory. 1914. Offers a full line of health foods... (Ad). *Naturopath and Herald of Health (The)* (New York City) 19(4):Unnumbered page. April.

• **Summary:** "... such as meat substitutes, whole wheat preparations, nut butters,... baked beans, wholesale or retail.

"Same are for sale also at the Pure Food Store, 112 East 41st St., New York City." Address: Nashville, Tennessee.

96. *New York Times*. 1914. Teach housewives to study food cost: Mayor's committee's experts show how shopping can be done at small cost. Substitutes for meats: Bountiful supply of vegetables makes living cheap if done intelligently. Sept. 6.

• **Summary:** "The dry legumes, such as peas, beans, and lentils, are all equal to meat in nutrition, and can be made into many appetizing dishes—purees, stews, soups, &c.

And in planning your menu don't forget rice, especially the natural brown rice, which contains more nutriment than the polished rice... rice is a very valuable article of food."

97. Arnbrecht, Jacob. comp. 1914. Hygienic cook book: A collection of choice recipes carefully tested. College View, Nebraska: International Publishing Assoc. 318 p. 20 cm.

• **Summary:** The title page states that this vegetarian cookbook offers "Plain directions on healthful cookery; Nutritive value and digestibility of foods; Proper food combinations; Food for the sick; Weights and measures for the kitchen, etc."

In the section on Proteids, page 8 discusses gluten and how to make it at home. In the chapter on Entrees (p. 60-) is a long section titled "Substitutes for flesh meats." Many of these recipes are based on Protose or Nuttolene, with granola and nut butter also used, indicating that Mr. Arnbrecht may well have been a Seventh-day Adventist.

98. Cooper, Lenna Frances. 1914. The new cookery: A book of recipes, most of which are in use at the Battle Creek Sanitarium. 2nd ed., revised. Battle Creek, Michigan: The Good Health Publishing Co. [10] + 301 p. Illust. (10 photos). 20 cm.

• **Summary:** Soy is mentioned only once in this book, in the recipe titled "Nut sausage" (p. 89); this exact same recipe was on page 87 of the 1913 1st ed.

Note: This book contains a few more pages than the 1913 edition; 5 more pages of unnumbered front matter and 3 more pages of text. The title page is identical except that the words "Second edition—Revised" have been added. The index starts on p. 291, is more than 1 page longer, and ends near the bottom of p. 301. The ads at the rear are generally on different pages; some have been added and others deleted. Lenna F. Cooper was born in 1875. Address: Director of the Battle Creek Sanitarium School of Home Economics, Head Dietitian of the Battle Creek Sanitarium.

99. Sherman, Henry Clapp. 1914. Food products. New York, NY: The Macmillan Co. viii + 594 p. Illust. Index. 19 cm.

• **Summary:** Written shortly before World War I by one of America's leading nutritionists, this an important basic text. Chapter 9, titled "Vegetables, fruits, and nuts" also contains extensive information about legumes. The section on "Digestibility" of legumes (p. 312-14) cites two experiments concerning the soy bean. In the first, Oshima (1905, *USDA Office of Experiment Stations, Bulletin* No. 159) found that a preparation consisting mainly of soy bean protein had a digestibility of 96%. In the second, Mendel and Fine (1911, *J. of Biological Chemistry*, vol. 10, p. 435-38) fed a man with a simple mixed diet in which 90% of the protein was in the form of a "commercial soy-bean meal, which betrayed no cellular structure under the microscope." The coefficient of digestibility of the protein was 85.3 compared with 87.9

and 88.0 for mixed diets in which the protein came primarily from eat and eggs.

In the same chapter, in the section titled “Place of nuts in the diet” (p. 345), a footnote states: “To speak of nuts as ‘meat substitute’ is natural under present conditions and reflects the prominence which has been given to meat and the casual way in which nuts have been regarded for some generations. Looking at the matter in evolutionary perspective it might be more logical to speak of meats as ‘nut substitute’ instead.”

A major theme of this book and this chapter is the “balance of acids and bases” or of “acid-forming and base-forming elements.” In this chapter, in the section titled “The place of fruits and vegetables in the diet” he discusses (p. 355) the importance of this concept. “The balance of acids and bases per 100-Calorie portion of all common food articles is shown in a table at the back of this book [p. 561-75]... In the writer’s opinion it is distinctly preferable that the balance fall on the basic side. If an excess of acid-forming elements be permitted, it would seem that the excess should not exceed 25 units (the equivalent of 25 cc. of normal acid) per man per day... Since meat and eggs show a distinct excess of acid-forming elements, while in vegetables and fruits the base-forming elements predominate, it follows that the greater the amount of meat, fish, and eggs eaten the more important it is that fruits and vegetables be used liberally.” In the 15-page table referred to above, the last column shows the “balance of acid-forming and base-forming elements contained in the 100-calorie portion.” This subject as also discussed on pages 20, 139, and 204. Soy is not mentioned.

In the long chapter on edible fats and oils (p. 366-96), soybean oil is not mentioned. However oils from peanut, sesame seed, poppyseed, coconut, rapeseed, sunflower, and maize are among the “other edible oils” discussed.

Another long chapter titled “Food adjuncts” (p. 448-77; the German word is *Genussmittel*) includes: Salt, spices, flavoring extracts, tea, coffee, and cocoa, alcoholic beverages, and vinegar.

Also discusses: Almonds (p. 334, 338, 562). Lard substitutes (p. 387-88). Oleomargarine (p. 378-82). Peanuts, peanut butter, and peanut oil (p. 221, 329, 340, 345, 571). Sesame oil (p. 11, 386, 590). Vegetable fats as butter substitutes (p. 382-83). Vitamines [vitamins] (p. 22, 75, 199, 267, 356). Address: Prof. of Food Chemistry, Columbia Univ. [New York City].

100. Keith, M. Helen. 1916. Is vegetarianism based on sound science? Theories and results briefly reviewed. *Scientific American* 82(Supplement 2135):358-59. Dec. 2. Reprinted and condensed in *Literary Digest*. 1917. 54:66-67. Jan. 13. • **Summary:** Reviewing animal studies, the author states: “The general conclusion to be drawn from the scientific evidence is, therefore, that the meat-free diet is not as safe as the diet containing meat.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “meat-free” (or “meat free”). Address: Asst. in Animal Nutrition, Univ. of Illinois, Illinois.

101. Briggs, Frederick Mead. 1916. Meat substitutes. New York, NY: A.F. Campbell, printer. 16 p. 10 x 14 cm. • **Summary:** “In preparing this set of recipes, the object was to provide a means for supplying wholesome and substantial meals with a minimum of labor which would, at the same time, be appetizing and inexpensive. Next to meat, the more substantial foods are: Fish, eggs, cheese, nuts, cereals, certain vegetables; such fruits as figs, dates, raisins; also milk and cream.”

Contains brief recipes for shell fish and fish, in addition to eggs, cheese, beverages, cereal, muffins, soup, vegetables, salads, sandwiches, substantial [entrees], desserts, cakes, fruit.

102. Cooper, Lenna Frances. 1916. The new cookery. 3rd ed. Revised and enlarged. Battle Creek, Michigan: The Good Health Publishing Co. 412 p. 22 cm.

• **Summary:** This is a Seventh-day Adventist vegetarian cookbook. Contents: 1. Food values. 2. The art of preparing foods. 3. Beverages. 4. Cereals. 5. Fermented breads. 6. Unfermented breads. 7. Sandwiches. 8. Dairy products. 9. Cream soups. 10. Plain soups. 11. Meat substitutes and entrees. 12. Macaroni and Italian pastes. 13. Eggs. 14. Gravies and sauces. 15. Vegetables. 16. Salads and relishes. 17. Toasts. 18. Fruit desserts. 19. Custards and cold desserts. 20. Frozen desserts. 21. Pastry and pies. 22. Cakes. 23. Cake fillings and frostings. 24. Hot puddings. 25. Sauces for puddings. 26. Canning and preserving. 27. Special dishes for invalids. 28. Balanced menus.”

In the Foreword, the author states: “We are indebted to Professor Ivan Pawlow [Pavlov], of Russia, for demonstrating the relation between appetite and digestion.” “Many food reformers and faddists have attempted to prepare wholesome foods but have neglected the almost equally important requirement—palatability.” “The author wishes to express her indebtedness to Dr. and Mrs. John Harvey Kellogg, of the Battle Creek Sanitarium, who first inspired her with a love for the study of foods and their scientific preparation and who have since been constant sources of help and encouragement. She would also acknowledge her indebtedness to Miss Clara B. Lambert, who for several years was associated with the author and has contributed to this volume both by helpful suggestions and by numerous recipes.”

Soy is not mentioned in this Seventh-day Adventist vegetarian cookbook. The following commercial products are mentioned: Minute Brew (cereal coffee [coffee substitute], p. 32). Cereal coffee (p. 33). Kaffir Tea (p. 33). Sanitas Health Koko (p. 33). Yogurt buttermilk (p. 33-34).

Sterilized bran (p. 44). Gluten mush (p. 47). Graham bread (p. 54). Bran bread (p. 62). Bran gems (p. 76). Protose (p. 129-35). Gluten flour (p. 136). Nuttolene (p. 138-41). Peanut butter (p. 144-145). Nut chops (p. 144, with peanut butter). Savora (p. 145). Granola (p. 147). Mock turkey (p. 152). Salted almonds (p. 300). Strawberry gelee (p. 306, with Vegetable Gelatin and egg whites). Yogurt ice cream (p. 307). Meltose dressing (p. 361). Hot Malted Nuts (p. 386). Pour 3/4 cup boiling water into 1/4 cup dry Malted Nuts, stirring while so doing. Add salt if desired. It is ready to serve at once. Calories in the recipe: 34 from protein, 88 from fat, 61 from carbohydrate. Total 183. Note: Malted Nuts was a dry powder or meal. The resulting beverage was almost certainly a mixture of peanut milk and almond milk). Almond ice (p. 389, with “almond butter”). Gluten bread (p. 390). Gluten puffs (p. 391).

Note: This cookbook calls for abundant use of dairy products (milk, cream, butter), eggs, and sugar (up to 2 cups in some recipes). Address: Director of the Battle Creek Sanitarium School of Home Economics, Head Dietitian of the Battle Creek Sanitarium [Battle Creek, Michigan].

103. Waal, A.J.C. de. 1917. Over soja-producten [On soy products]. *Chemisch Weekblad* 14(15):344-56. April 14. (Chem. Abst. 11:2001). [22 ref. Dut]

• **Summary:** Describes the work done by men in different countries on various soybean preparations and includes a paper by Li Yu Ying (cited separately) titled “Procédés et Dispositifs pour la Transformation Intégrale du Soya,” including food and industrial uses of soybeans. A complex, full-page French-language diagram (p. 350) shows the basic processes by which the many food and industrial products that can be derived from the soy bean, and summarizes patents related to many of these. By milling and baking: soya meal (*soja-meel*) and soy bread (*soja brood*). Soya milk (*soja-melk*) and Western-style cheeses. Coffee and chocolate substitutes: Soy coffee (*soja-koffie*) and soy chocolate (*soja-chocolade*). Pork-butcher products, incl. soy sausages (*soja-worst*) in which one can use soy cheese (*soja-kaas*). Soy protein (*soja-eiwit*). Worcestershire sauce (*Worcestershire-saus*). Li is a resident of Seine France. This paper was presented on 11 Nov. 1911, and published on 20 Jan. 1912.

Note 1. This is the earliest Dutch-language document seen (March 2001) that used the term *soja-koffie* to refer to soy coffee.

Note 2. This is the earliest Dutch-language document seen (Aug. 2013) that uses the term *soja-melk* to refer to soymilk.

Note 3. This is the earliest Dutch-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *soja worst* (soy sausages). Address: s’ Gravenhage (The Hague), Netherlands.

104. Anderson, Hans Steele. 1917. Food and cookery.

Revised fourth ed. Mountain View, California, and Kansas City, Missouri: Pacific Press Publishing Assoc. 163 p. Index. 18 cm.

• **Summary:** This is a book about vegetarianism. Soy is mentioned on pages 45 (see Lesson 11, Soy bean-rice loaf; Soy bean-rice patties), 84, 85.

Soy-related recipes: Stewed soy beans (with whole soybeans, p. 84). Rice and soy bean loaf (with “1½ cups soy bean purée” and “3 tablespoons soy bean broth” plus “1 cup steamed natural rice,” p. 85). Rice and soy bean patties (using the “soy-bean-rice mixture described in the preceding recipe,” p. 85).

The author was born in 1877. Address: Food expert, Loma Linda Sanitarium, California.

105. Fuerstenberg, Maurice. 1917. Die Soja, eine Kulturpflanze der Zukunft und ihre Verwertungsmoeglichkeiten [The soybean, a cultivated plant of the future, and possibilities for its utilization. Part II (Document part)]. Berlin: Paul Parey. 40 p. 28 cm. [59 ref. Ger]

• **Summary:** Continued on p. 14. Ways of using the soybean in its homeland (East Asia, especially Japan and China): Note: In this section, starting on p. 15, the author repeatedly uses the word *Sojaspeisen* meaning “soyfoods.” The soybean probably originated in India. The Chinese and Japanese used it to fortify their rice-based, protein-poor diet. The practice came before the theory. The author says (incorrectly, p. 15) that all the basic soyfoods are fermented. He then gives a long description of koji and how it is made.

Shoyu or soy sauce (*Shoju oder Soja-Sauce*) (p. 15-17): In Japan, 540-720 million liters are manufactured each year so each Japanese uses 60-100 ml/year. The fermentation time is 8 months to 5 years. The best soy sauce is fermented for 3 to 5 years. He explains how, as soy sauce is fermented, the protein is broken down into amino acids such as leucine, tyrosine, and members of the “Xanthin” group.

Miso (vegetable cheese, p. 17-18): Miso is widely used in soups. More than half of the yearly Japanese soybean harvest is used for making miso. This is 30 million kg per year. Types of miso include *shiro miso* and Sendai miso. Winkler, in his small work titled “The Soybean of Manchuria,” mentions two other types of miso: Aka or red miso and nuka miso. Kellner investigated five types of miso; a table shows their composition. Loew reports that this vegetable cheese (miso) is consumed either raw or in soups. Kellner, Nagasaka and Kurashima report that, based on their investigations, the amount of amino-nitrogen increases 3-fold and the quantity of carbohydrates is significantly diminished through lactic acid and alcoholic fermentation. The carbonic acid created thereby rises significantly during fermentation (Loew).

Natto (p. 18): Discusses the findings of Yabe.

Japanese tofu or Chinese Tao-hu (p. 18-20): This is

the so-called “bean cheese” (*Bohnenkäse*). A table (p. 19, from König) shows the nutritional value of fresh tofu (84.8% moisture) and frozen tofu (17.0% moisture). E. Senft studied frozen tofu, a Japanese military preserved food (*Militärkonserve*) that is not canned; he found it had a beige color and a unique, slightly sour aroma which was at times reminiscent of dextrin. It has a uniform texture throughout, with many tiny pores. Winkler refers to five other types of soy cheese. Concerning the military preserved foods, they were highly regarded during the Russo-Japanese War and (according to Senft) played a key role in the war. (Footnote: The descriptions of the various preparations made from soya make E. Senft’s treatises (1906 and 1907) valuable; in them he published his investigations of a number of Japanese vegetable foods and military preserved foods or conserves). The well-known food manufacturer Maggi in Kempttal, Switzerland, has tried for many years to introduce a commercial miso-like product, but was not successful.

The soybean as an oil plant (p. 20-26): Winkler, in his brochure, discusses the uses of soybeans in Manchuria. After 1908, soybeans were sold in Europe at incredibly low prices which resulted in the expansion of imports and production. Then tariffs were levied on soybeans. There were some major problems in the Austrian oil industry.

Soybean flour (*Sojabohnenmehl*; p. 26-28): In recent years, various processes have been patented. One manufacturer is Soyamawerke in Frankfurt am Main, which makes *Soyama Kraftmehl*. Yellow soybeans are mechanically cleaned, washed, dried, and dehulled according to the process of Dr. Fritz Goessel. Agumawerke in Harburg also makes soy flour.

The soybean as a coffee substitute and extender (p. 28-31): Coffee is known to be detrimental to good health and void of nutrients. Rye, for example, has been used since the 17th century as a coffee substitute. Barley also plays a major role, especially as malt. A table (p. 30) shows the nutritional composition of ten coffee substitutes, including chicory, figs, lupin, and carob. Soy coffee tastes remarkably similar to real coffee. In Istria (*Istrien*), in the Austrian alps, in Switzerland as well as in Alsace (*Elsass*), the soybean has been used since its introduction as a coffee substitute. Haberlandt reported in his work that a teacher from Capo d’Istria told him that the soybean was used as a coffee substitute in Istria, and a friend told him that there was no difference between the flavor of the two. The Thunschen is used to make good soy coffee. The soybeans are mechanically cleaned, put into a trommel, agitated with water at 65-70°C, brushed and thereby freed of a large number of impurities which can leave a burned smell. The aroma of soy coffee can be improved by impregnation with an extract of largely decaffeinated coffee. It has roughly twice the nutrients of regular coffee and no harmful constituents.

Soybean milk (*Sojabohnen-Milch*, p. 32-33): The most popular vegetable milk is Dr. Lahmann’s Vegetable Milk

(*Lahmannsche Vegetabile Milch*), an emulsion made from almonds and nuts. In Japan, they make milk from soybeans; he describes the process, inaccurately, based on information from Winkler. This milk is also used to make cheese [tofu]. Also in Europe there have been successful attempts to make a soymilk adapted to European tastes, as in France by the Caseo-Sojaine at Vallées near Asnieres, and in England by the Synthetic Milk Syndicate. Using the process of Dr. Fritz Goessel, the latter company has a factory in Liverpool; it makes 100 liters of soymilk from: 10 kg ground soybeans plus 5 gm sodium phosphate, 2.4 kg lactose, 2 kg sesame oil, 6 gm common salt, and 60 gm sodium carbonate. Also the Soyamawerke in Frankfurt makes a soybean milk, named Soyama, as mentioned above (fresh and dried milk and cream). Recently Prof. Melhuish developed a new method using soybean, peanuts, and added coconut milk fat.

Soy meat substitutes (*Soja-Fleischersatz*; p. 33): Soyamawerke makes a product named *Soyama-Fleisch-Ersatz*.

Soybean as a chocolate substitute (p. 34): Haberlandt reports such a product.

Soya rubber substitute (p. 34): Goessel and Sauer have developed a rubber substitute made from soybean oil.

The utilization of soya in agriculture (p. 34-38): Use as fodder for cows. In 1880 Blasowicz [Blaskovics], Assistant at the Royal Hungarian Academy in Hungarian Altenburg, conducted fodder tests, whose results are given in various tables.

Conclusions (p. 38).

Note: This is the earliest document seen that uses the word *Ersatz* or the word *Fleischersatz*. They mean “artificial or inferior substitute” and “meat substitute” respectively. Though often associated with World War I, the word “ersatz” (which means simply “substitute” in German) was actually adopted into English as early as 1875, in reference to the German army’s “Ersatz reserve,” or second-string force, made up of men unqualified for the regular army and drawn upon only as needed to replace missing soldiers. Hence the meaning “inferior substitute.” Address: Frohnleiten, Steiermark [Austria].

106. Doddridge, Amelia. 1918. Liberty recipes. Cincinnati, Ohio: Stewart & Kidd Co. 106 p. Illust. No index. 21 cm.

• **Summary:** In the section titled “Yeast breads” we read (p. 17): “In place of part of the wheat flour, as used formerly, the following substitutes may be used: barley flour, buckwheat flour, corn flour, corn meal, potato flour, rice flour, soy bean flour, kaferita flour, tapioca or banana flours;...”

Pages 18-19 state: “As substitution for wheat flour is made by weight instead of by measure, the following table will be found helpful. Each measure given is equivalent in weight to 1 cup of wheat flour: Peanut flour—1 cup (scant),... Rice flour—7/8 cup,... Soy-bean flour—7/8 cup.” Note: Neither soy bean flour nor meal are called for as an ingredient in any

recipes.

In the section titled “Meat substitute dishes” (p. 46-47) is a recipe for Baked soy beans (with 1½ cups yellow soy beans, p. 56).

Peanut butter is also mentioned in several meat substitute recipes: Cottage cheese sausage (with ¼ cup peanut butter, p. 50). Hominy and peanut butter en casserole (with 4 tb. {tablespoons}, p. 51). Peanut Roast (with ¾ cup, p. 52). Other meat substitutes: Beans, shellfish, cheese, fish, cow peas, and hominy.

Photos show: (1, near front of book) Liberty Kitchen (Wilmington, Delaware) which was equipped by the Food Administration for demonstration purposes. Most of the recipes in this book were tested there by the author. (2, facing p. 17) “Wheat substitutes” in labeled glass jars; includes soy bean meal. (3, facing p. 33) “Lard & butter substitutes” incl. Wesson Oil, Mazola, Swift’s Premium Oleomargarine, olive oil, Crisco, Nut-Made brand Margarine. (4, facing p. 47) “Meat substitutes” incl. eggs, milk, fish, cheese, beans, peanuts. (5, facing p. 83) “Sugar substitutes” incl. maple syrup, molasses, honey, Karo [corn syrup], dried fruits. Address: Liberty Kitchen, Wilmington, Delaware.

107. U.S. Food Administration, Collegiate Section. 1918. *Food and the war: A textbook for college classes*, prepared under the direction of the Collegiate Section of the United States Food Administration with the cooperation of the Department of Agriculture and the Bureau of Education. Boston, New York, Chicago: Houghton Mifflin Co. 5 + 379 p. Illust. Index. 20 cm. [60\* ref]

• **Summary:** Herbert Hoover, head of the U.S. Food Administration, writes separate introductions for college women and college men. This book has two parts. Part I, titled “Food and the war,” is written by Katharine Blunt and Florence Powdermaker. Part II is by Elizabeth C. Sprague.

Chapter 7, titled “Protein-rich foods used in place of meat” states (p. 86) that “Fish, eggs, cheese, milk, beans, peas, and nuts are the chief foods used as meat substitutes.” The use of meat substitutes is important to save meat for the Army and the Allies, to reduce the food bill of individual Americans, and to “cut down on the use of grain for animal food.” “Many nuts and nut products are a cheaper source of protein and energy than some cuts of meat. For example: Twenty cents spent for sirloin steak (at 40 cents a pound) gives about 475 calories and 37 grams of protein. Twenty cents spent for peanut butter (at 30 cents a pound) gives about 1,825 calories and 88 grams of protein.

Chapter 8, “Fats and oils—Their value and use,” states (p. 104) that of the vegetable oils, cottonseed, corn, peanut, and olive oils are the most important in the USA. Butter substitutes include oleomargarine and nut or vegetable margarine. Lard substitutes include lard compounds and hydrogenated oils (p. 105).

Chapter 13, titled “Vegetables and fruits,” states (p. 195-

96) that legumes (incl. peanuts) are a good source of protein. “Soy beans, which have been much discussed lately, are high in protein (38%) and in fat (15%)—higher than other beans, but they are somewhat difficult to cook without a pressure cooker, unless made into meal.” Legumes can serve as substitutes for both meat and wheat (p. 202).

In Part II, the section on “Class work” recommends (p. 328): “Dried legumes... Cook by boiling or under pressure, dried soy beans, pinto beans, lima beans, peas, or other legumes.” Address: Washington, DC.

108. Eddington, Jane. 1919. *The Tribune Cook Book: Soy beans as human food*. *Chicago Daily Tribune*. Jan. 12. p. B4.

• **Summary:** Miss Eddington first got interested in the use of “soy bean flour” in the human diet about 5 years ago when she “first received samples of this flour for a medical manufactory.” During these five years “soy bean flour has come into wide use in hospitals and homes. From being used in the United States to renew worn out soil and then for hog feed, the soy bean has come to be used largely as a food for those who have worn out kidneys, the diabetics.”

“Soy bean cookery, especially the whole bean cookery, must be good, or the variety [of] vegetable meat contained in it is ruined, becoming as indigestible as white of egg cooked to a crisp.” The key is to cook the whole bean at a low temperature for a long time. “Baked soy beans must be cooked at least eight hours.”

“In Washington [DC], the government experts used 30 per cent soy bean flour with 70 per cent of wheat flour and called their product ‘a high powered bread.’” She then gives four wartime recipes for “Soy bean muffins.” Some call for “soy bean meal.” Note: This “meal” is probably soy bean flour.

“Used as a meat substitute:... The tofu, a sort of cheese which is fried in deep fat and used as a meat substitute, was exploited by the United States department of agriculture last year, along with other of the soy bean products...” She then cites (incorrectly): Morse, W.J. 1918. “The soy-bean industry in the United States.” *Yearbook of the U.S. Department of Agriculture* p. 101-11. For the year 1917. Then, from the section titled “Soy beans for human food,” she includes the recipes for “Soy-bean milk” and “Soy-bean cheese,” and the description of soy sauce. “Soy or shoyu sauce is a dark brown liquid prepared from a mixture of cooked and ground soy beans, roasted and pulverized wheat or barley, salt, and water...”

109. Armour and Company. 1919. Display ad: A talk on foods to housewives of Baltimore and vicinity. *Sun (Baltimore, Maryland)*. April 29. p. 7.

• **Summary:** “To thousands of Baltimore women the name ‘Armour’ has long stood for safety and dependability in the buying of all kinds of meats. But what many have not realized until recently is that the same great organization that

brings you these choice meats, also provides a hundred or more other top-grade foods...

“Armour’s oval label quality foods: Meat alternatives. Fish. Eggs. Cheese. Poultry. Peanut butter. Chili con carne. Spaghetti. Pork and beans.”

Note 1. This ad was published during World War I when there were meat shortages in the United States.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “meat alternatives” (or “meat alternative”—with any combination of hyphens or quotation marks). Similar terms were widely used during World War II.

110. Nashville Agricultural Normal Institute, Food Department. 1919. Re: Soy bean and peanut products. Letter to Mr. George Washington Carver, Tuskegee Normal and Agricultural Institute, Tuskegee, Alabama, April 29. 1 p. Typed, without signature on letterhead. [1 ref]

• **Summary:** “Yours of April 10 received. We have sent you two cans of our Soy bean product. We also can soy beans in three ways, plain, with tomato, and with nut meat.

“We do not know as anything we have would do to exhibit except our soy bean flour, and that you say you make yourself. We have never seen a sample of the milk though we have tried to make it many times. We would be much pleased to receive a little sample of you. Do you think you can make a success of producing milk from the soy bean? I hope the soy bean food reaches you O.K.” Initials Dp or Sp.

Handwritten note on bottom of letter: “Is the wood stain you made from the soy bean of much use? Would be pleased to hear how you are succeeding with these experiments.

Note 1. Names printed at the top of this letterhead are E.A. Sutherland, M.D., N.H. Druillard, W.F. Rocke [farm manager of the Madison school], and M. Bessie De Graw.

Note 2. Letter from Sam Yoshimura. 1981. March 19. When Sam attended Madison College from 1937-1943 Nut Meat was made from peanuts, water, and seasonings.

Location: Library of Congress, Washington, DC. Microfilm of The George Washington Carver Papers in the Tuskegee Institute Archives, Roll 6 #0152. Address: Madison, Tennessee (near Nashville). Phone: Walnut 1789-W.

111. **Product Name:** Nut Meat (Made from Peanuts).  
**Manufacturer’s Name:** Madison Foods.  
**Manufacturer’s Address:** Nashville Agricultural Normal Institute, Madison, Tennessee.  
**Date of Introduction:** 1919 April.  
**Ingredients:** Peanuts, water, seasonings.  
**Wt/Vol., Packaging, Price:** Can.  
**New Product–Documentation:** Nashville Agricultural Normal Institute, Food Department. 1919. April 29. Letter to Mr. George Washington Carver, Tuskegee Normal and Agricultural Institute, Tuskegee, Alabama. “Yours of April

10 received. We have sent you two cans of our Soy bean product. We also can soy beans in three ways, plain, with tomato, and with nut meat.”

Madison Survey. 1919. July 16. p. 4 “The Food Factory.” “A visitor finds the big oven full of crackers, and hundreds of pounds on the cooling racks... The steam cooker is filled with cans of nut meat; mills at the south end of the room are grinding peanut butter, hundreds of pounds; and the blancher, tended by one of the young women, is handling peanuts, not by the pound but by the ton.”

Madison Survey. 1922. March 8. p. 3. “Madison Food Factory products.” “The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat.”

Note: Madison Foods started in 1918. The first manager and treasurer was Mrs. Nellie Druillard (affectionately called “Mother D”). Mr. and Mrs. Andrew Wheeler were the first in charge of food production.

112. *Madison Survey (Madison, Tennessee)*. 1919. The food factory. 1(21):4. July 16.

• **Summary:** “A visitor finds the big oven full of crackers, and hundreds of pounds on the cooling racks... The steam cooker is filled with cans of nut meat; mills at the south end of the room are grinding peanut butter, hundreds of pounds; and the blancher, tended by one of the young women, is handling peanuts, not by the pound but by the ton.”

Note 1. Though soy beans are not mentioned, they were being canned at the food factory by April 1919.

Note 2. Some of this food is probably going to the Nashville Cafeteria.

113. Briggs, Frederick Mead. 1920. Meat substitutes. Brooklyn, New York: Chat Publishing Co. 16 p. 11 x 15 cm.

• **Summary:** Identical to the 1916 edition, except that the publisher is different.

114. Kellogg, John Harvey. 1920. The health question box, or a thousand and one health questions answered. 2nd ed. Battle Creek, Michigan: Modern Medicine Publishing Co. 907 p. Illust. Index. 21 cm. 1st ed. was 1917.

• **Summary:** “Foreword: For more than forty years, the writer of this volume has each week stood before an audience of invalids at the Battle Creek Sanitarium to open a popular question box. During a longer period the writer has supplied each month to the monthly journal *Good Health* several columns of answers to correspondents.” More than a thousand of these have been selected, with their answers, for this volume.

The following questions concern the soy bean (p. 350-53, 886; also 125, 200, 347, 349): In what respect is the soy bean superior to the navy bean and other varieties? What is soy bean curd or cheese (to-fu), and how is it made? What is the food value of the soy bean? What is the composition of the soy bean, especially in relation to the amount of

carbohydrate it contains?

Concerning peanuts (p. 348-49): Is the protein of the peanut equal to that of meat or eggs? Which is the more digestible, roasted or raw peanuts? Why is it necessary to cook peanuts to prepare them for digestion?

“In North China and various other countries where the peanut flourishes, it has long held a prominent place in the national dietary; but in this country its great value has been so little appreciated that it has been scarcely recognized as a food, having been eaten as a dainty or luxury.

“Although, since the writer—some twenty-five years ago [i.e., ca. 1895]—introduced the crushed nuts, or peanut butter, into the bill of fare of the Battle-Creek Sanitarium, the use of peanuts in this form has rapidly extended and it has found its way to many thousands of tables.”

One discovery has “placed the peanut upon a high pedestal among foodstuffs... It is the fact that the protein of the peanut belongs to a special class very rare among the products of the vegetable kingdom, known to the chemist as ‘complete protein.’ The complete protein is one which contains all the elements needed for making any of the many different kinds of tissue found in the human body. Very naturally these proteins are found in eggs, milk and meat, but they are not found in cereals or vegetables.” The almond and soy bean also contain complete proteins.

Concerning the natural diet of man (p. 96-109, 124-25): What was the diet of prehistoric man? Ans: Fruits and nuts. What is the natural diet of man? Ans: Fruits, soft grains, nuts, tender shoots and juicy roots. Man is not carnivorous. What was the Brook Farm experiment? What is the simple life? What is biologic living? Ans: Living in accord with the “great biologic laws... which rule our physical being.” What is Fletcherism? Ans: Thorough mastication. When eggs and meat are discarded what vegetable foods should take their place? Ans: No substitutes are needed. “Protose, Nuttolene and other vegetable meats are rich in protein. The newly introduced soy bean is more than a substitute for meat. It is rich in lime and vitamins which meat lacks. Its protein is ‘complete.’” Have human beings a natural appetite for flesh? Do scientific authorities admit that animal flesh is a necessary part of the human dietary? Ans: “All modern physiologists admit that flesh food is not an essential part...” Is a meatless diet capable of maintaining the body in a state of vigorous health? Is there any authority for the elimination of flesh foods from the dietary? Does a flesh diet injure the kidneys? Is it not true that laborers universally require a large amount of meat.

Concerning roughage, bran, and constipation (p. 197-99). Diabetic foods (p. 199-201, incl. soy bean and soy bean curd). Dietary oils and butter (p. 338-41, incl. nut oils, peanut oil, olive oil, malted nuts). Concerning tree nuts (p. 341-47, 354-59): What is the food value of nuts? Ans: The “most highly concentrated of all natural foods.” Tropical fats—Where do the natives of the tropics get their fat? Nuts

for nursing mothers—Is there any food which will increase the flow of her milk? Ans: Nut milks, Malted Nuts. How did the Jordan almond get its name? Ans: This choicest of all almonds came originally from Malaga in southern Spain. Almond milk—Is it possible to prepare a substitute for milk from vegetables? Ans: Yes. “The writer has made large use of almond milk for thirty years [i.e., since about 1890]. It is more easily prepared from almond butter.” “Almost equally good milk preparations may be made from the soy bean and the peanut.” Are nuts good food? Yes, incl. peanut butter. Nuts make good “meat substitutes.”

On the last page is a list of 18 health books by Dr. Kellogg, all published by the Modern Medicine Publishing Co. Address: M.D., Battle Creek, Michigan.

**115. Product Name:** Watson’s Vegetable Meat.

**Manufacturer’s Name:** Ferdinand (Claude C.), agent.

**Manufacturer’s Address:** 96th Fourth Place, Brooklyn, New York.

**Date of Introduction:** 1921 October.

**Ingredients:** -

**Wt/Vol., Packaging, Price:** -

**How Stored:** -

**New Product—Documentation:** Ad in *Naturopath and Herald of Health* (New York City). 1921. Oct. p. 515. “A perfect meat substitute: Watson’s Vegetable Meat. The best of all Meat Substitutes. Used by Naturopaths and Physical Culturists everywhere. Wholesale agent: Claude C. Ferdinand, 96 Fourth Place, Brooklyn, New York.”

**116. Product Name:** La Sierra Smoein (Bacon Flavored Smoked Soy Powder Seasoning).

**Manufacturer’s Name:** La Sierra Industries.

**Manufacturer’s Address:** Arlington, California.

**Date of Introduction:** 1921.

**Ingredients:** Smoked soybeans.

**How Stored:** Shelf stable.

**New Product—Documentation:** This was America’s first commercial soy-based meat alternative. Ad in *Health* magazine. 1934. 1(3):30. June. “La Sierra Soybean Products: Perfect Protein, High Alkaline Ash, Low Starch.” Ad in *Dorothea Van Gundy*. 1936. *La Sierra Recipes*. p. 46. Interview with Charlotte Van Gundy Holmes. “He soaked soybeans, put them in perforated flats, and smoked them over a hickory fire. When dry, he ground the beans to a powder, which he packed and sold in salt shakers.”

Note 1. This is the earliest known commercial soy product made by La Sierra Industries or T.A. Van Gundy.

Note 2. This is the world’s earliest known commercial meatless alternative seasoning with pork flavor (bacon).

Note 3. This is the earliest known commercial roasted soy flour in the Western world.

**117. Anderson, Hans Steele.** 1921. *Science of food and*

cookery. 5th ed. Mountain View, California: Pacific Press Publishing Assoc. 282 p. Illust. Index. 23 cm. [5 ref]

• **Summary:** This book, by a Seventh-day Adventist, advocates a vegetarian diet as “the natural diet of the human race.” The first one-third (p. 1-97) is a scientific discussion of the nutritional basis for such a diet; the last two-thirds (p. 98-268) is vegetarian recipes.

Chapter 4, titled “The natural food of man” (p. 37-52) has sections on: True food satisfies hunger. Vegetarian diet and longevity. Vegetable and flesh foods contrasted. Vegetarian diet and endurance. Flesh eating a cause of disease. Ethics of flesh eating. Cruelty of flesh eating. The section titled “Vegetarian diet and longevity” (p. 39-42) notes that in the Bible, before the fall, Adam was told to eat grains and nuts. After the fall herbs of the field were added to his diet. After the flood, when all vegetation had been destroyed by water, God permitted man to eat flesh. In the 9 generations before the flood, the average man lived to the age of 912 years, but in the 10 generations after the flood this was reduced to 317 years.

The section on “Vegetarian diet and endurance” (p. 45-48) contends that “the vegetarian diet is capable of developing the highest level of strength and endurance.” Soy-related recipes include: Stewed soy beans (p. 156). Rice and soy bean loaf (with soy bean purée, p. 156). Rice and soy bean patties (p. 156). Favorite soy bean coffee (p. 265).

A 6th edition was published in 1932, and a 7th edition in 1938.

Note 1. This is the earliest Seventh-day Adventist cookbook seen (Oct. 2004) that contains a recipe using soybeans or soy ingredients.

Note 2. This is the earliest document seen (Oct. 2004) concerning the Loma Linda Sanitarium (or Hospital) and its work with vegetarianism or soyfoods. Address: Dietitian, Medical Missionary College and Sanitarium, Loma Linda, California.

118. Rouest, Leon. 1921. *Le soja et son lait végétal: Applications agricoles et industrielles* [The soybean and its vegetable milk. Agricultural and industrial applications]. Carcassone (Aude), France: Lucie-Grazaille. 157 p. Illust. No index. 25 cm. [42 ref. Fre]

• **Summary:** Contents: Preface, by Louis Forest. Introduction—What is soya? 1. History of the dissemination of soya: In 1712 the naturalist Kaempfer introduced soya, introduction of soya to France and Europe, soya is cultivated in Austria in 1875 by Prof. Haberlandt, soya is the object of many trials in France from 1876 to 1881, the study and acclimatization of soya becomes widespread, the causes of setbacks in the cultivation of soya.

2. Cultivation of soya: Botanical characteristics of soya, the varieties of soya, Chinese varieties and soya in China, Japanese varieties and soya in Japan, American varieties and soya in America (varieties: Mammoth, Hollybrook, Ito

San, Guelph, Haberlandt, Medium Yellow, Wilson, Peking, Tokio, Mandchu [Manchu], Black Eyebrow, Barchet), soya in Europe—France and Italy, seven varieties of soya tested in France, soya in the experimental farms for new crops (*les Fermes Expérimentales de Néoculture*; Many varieties from the USA were tested, including Manchu, Wilson Five, Haberlandt, Tokio, Virginia, Hato [Hahto], Early Medium Green), the cultural and geographical appearance of soya, its production worldwide, planting soybeans, heat units (*degré thermique*) and the germination of soya, the importance of spacing between plants, number of seeds per hectare, soya during its vegetative stage, the vegetation of soya compared with that of the haricot at high altitudes, rolling the seeds and types of crop maintenance, growth of the plant, acclimatization, the enemies of soya.

3. Composition of the soybean plant. 4. Soya forage: Green soya forage, soya hay, soya as a plant for soil improvement. 5. Harvesting soybean seeds: Maturity of the seed, harvesting soya, the food value and composition of soya seeds. 6. Soya as an oil plant: Richness in oil, defatted soybean cake, imports and exports of soya cake from 1915 to 1919 (Imports to: Sweden, Canada, Korea, Japan, Formosa.

Exports from: England, China, Korea), production of soya cake from 1915 to 1919 (Denmark, Great Britain and Ireland, Netherlands, Sweden, USA, Japan, Formosa, Korea, Java and Madura).

7. Soymilk: Its manufacture (in 1910-1913 Li Yu-ying installed a factory named “La Caséo-Sojaïne” at Vallées {Asnière-Seine} near Paris. Rouest visited this factory and saw them make soymilk, which was filtered using a filter-press resembling those used in sugar refineries), its properties and composition, composition compared to other types of milk, powdered soymilk, soymilk in the nursing and feeding of animals, soymilk related to tuberculosis in animals and in humans, soymilk would allow the milk and butter from animals to be reserved exclusively for human foods and could be used for raising many piglets, manufacture of non-dairy milk in Canada (a factory is now under construction).

8. Soya in Industry: Soymilk and soy casein, Sojalithe (like Galalithe).

9. Soya in human nutrition: Soy flour and its applications (incl. Li Yu-ying’s usine de la Caséo-Sojaïne, and bread made of soya and wheat), soya compared to dry legumes (such as lentils, haricots, peas, beans), soya used as a legume (whole soybeans), the food value of soy sprouts, preserves and confections made from soya, soya chocolate and coffee, the amount of nutrients produced by soya and other crops from a unit of land, a meal of soya served in France (prepared and served some years ago by Li Yu-ying’s soyfoods plant La Caséo-Sojaïne for the major print media, the medical press, the National Society for Acclimatization, etc.; it consisted of 2 soups {one with ‘soya meat’ and one with soymilk}, 2 entrees {an omelet with smoked soya ham, and fritters stuffed with soy meat}, soy [actually mung bean, *liudou*] sprouts in a salad and sauteed, 3 desserts {soya cake, biscuits, and confection}, and soy coffee; a recipe for each is given; soya meat is smoked tofu).

10. Use of soya in East Asia: Tofu (*fromage végétal*), soy-based condiments (such as natto {Ping ming Natto and Tokio-Natto}, miso, Chinese miso or tao-tjung [doujiang], and shoyu {Soyou or Schozou}), making soy sauce in Kwantung, China (from Groff).

11. The opinions of several authors concerning soya (from the French medical and hygienic press): Introduction—E. Maurel. Soya and soy bread in diabetic diets—Dr. Dujardin-Beaumont, Dr. Bloch, Dr. J. Le Goff, L. Beille, M. Gautier. Soya used as a bean—M. Gautier. Soy sauce used in place of meat extracts. The state of cheese. The popularization of soya in Europe—A. Paillieux.

Conclusions: The influence of cultural technology on variation. Appendix: Advice to experimenters on the acclimatization of soya in France. Other methods of obtaining early-maturing soybeans.

The author concludes (p. 140): We must make every effort to acclimatize soya in France. We must develop the will and learn from past mistakes. Most soybean varieties

now available in France are too late. We must get varieties from Manchuria, whose climate is similar to that of southeastern France, and from the northeastern USA. It is urgent that, in the near future, we start a Soybean Experiment Station to take responsibility for this work. The setbacks since 1830 can be overcome by present science and genetics. The first step is to introduce better varieties.

On the last page is a full-page advertisement for various seeds sold by Mr. Rouest, including 30 varieties of soybeans (*Soja hispida*); the names of the individual varieties are not given.

Illustrations show: (1) A soy bean plant with many pods (title page). (2) Flowers and pods of the soy bean plant (p. 29). (3) Soy pods and beans (p. 30). (4) A soy bean plant drawn by a Chinese artist (p. 32, from Li Yu-ying). (5) Pods of the Hato [Hahto] variety of soy bean (p. 51). (6) Germinating soy bean seeds (p. 54, from Li Yu-ying). (7) Soy bean roots with nodules (from a photo by Dr. Le Goff; p. 73). (8) Soy bean pods, opened to show 3 beans in each (p. 82).

Tables show: (1) Production of soybeans by color in China in 1916 and 1917 (p. 35, in quintals, from the International Yearbook of Rome, Vol. 1, 1919): In 1917: Yellow 4,069,822. Other 953,012. Green 181,190. White 71,234. Black 40,066. Total: 5,315,324.

(2) Percentage composition of various oilseed cakes (p. 95, from Kellner). (3) Imports and exports of soybean cake, by country, from 1915 to 1919 (in quintals, p. 96). Imports are given for Sweden, Canada, Korea (from 1916), Japan, and Formosa [Taiwan]. Exports are given for England (6 quintals in 1915), China (including Manchuria, by far the biggest exporter, from 1916), and Korea (from 1916).

(4) Production of soybean cakes, by country, from 1915 to 1919 (p. 97, in quintals, based on statistics from the International Bureau of Agriculture, Rome, 1919). In descending order of production in 1915 (in quintals): Japan 5,439,337. Korea 3,209,238. Great Britain and Ireland: 1,513,059. Denmark 921,782. Java and Madura 503,025. Note that China is not listed. Netherlands 144,523. Formosa [Taiwan] 62,131. Sweden 1,733. USA 0, but 501,822 in 1916.

Note 1. When Alsace was occupied by the Germans during World War I, the Rouest family moved from Alsace to Paris. Mr. Rouest brought soybeans from Africa and adapted them to France. He paid for the publication of this book.

Note 2. On the title page of this particular book is the signature “L. Rouest” following the inscription “A M. Meunier, Hommages de l’auteur.” Address: Directeur des Fermes Expérimentales de Néoculture, Carcassonne (Aude), France.

119. Rouest, Leon. 1921. *Le soja et son lait végétal: Applications agricoles et industrielles* [The soybean and its vegetable milk. Agricultural and industrial applications].

Carcassone (Aude), France: Lucie-Grazaille. 157 p. Illust. No index. 25 cm. [42 ref. Fre]

• **Summary:** This is a summary of interesting points throughout this book. The main early use of soy in Europe was more therapeutic than nutritional (p. 3); it was used mainly in diabetic diets.

Nothing remains of the early trials conducted 20 years ago in France and Austria. The reasons for the crop's failure were lack of understanding of the laws of acclimatization and genetics, and the fact that soya (*soja*) was introduced as a new food legume, when actually it can only be utilized as a forage plant and industrially (for oil, cakes, and casein). Later, when the plant has been adapted, when it is understood that soya is not being propagated to compete with other dry legumes, that it is not being cultivated to extract from the seeds a vegetable milk for people, but simply as a forage plant—and the most remarkable one that exists (p. 3).

The English are trying to acclimatize soya to their colonies, especially those in southern Africa. In 1908 some 200,000 tonnes (metric tons) of soybeans were exported from China [including Manchuria] to Europe, followed by 500,000 tonnes in 1909. One can extract from soybean seeds a vegetable milk (*lait végétal*) which has the same value as animal milk for use in raising young animals. Its seeds and forage are also fine for raising farm animals and for industrial products. The author thanks all those who have helped him to acclimatize the soybean to France and to create new varieties of soya in France (p. 4).

Introduction of the soybean to France and to Europe (p. 6-7): A good but brief review of the literature on this subject. In 1739 Buffon was made director of the Jardin des Plantes in Paris. Shortly thereafter, Christian missionaries in China sent him specimens of seeds and plants. The soybean must have been among them. The soybean has very probably been cultivated at the Museum since 1779, certainly in 1779 and later from 1834 to 1880. In 1855 Baron de Montigny was charged by the Society for Acclimatization to distribute five varieties of soya sent from China by Mr. Montigny; these were from northern China. The plants first bore seeds in France in 1854; their acclimatization is assured. In 1857 Mr. Lachaume transmitted to the Society for Acclimatization details of the success he obtained at Vitry-sur-Seine with soy culture. The seeds were planted in 1856. In 1858 a report to the Society for Acclimatization indicated that the acclimatization of the soybean was complete. In 1859 Mr. de Vilmorin reported on cultural trials sent from China by Mr. Perny. The varieties matured too late. The same year Dr. Turrel harvested soybeans at Toulon. In 1862 the Society for Acclimatization received seeds from Mr. Guillemin; the yellow soybean was said to be used for making tofu. Following the events of 1870, the cultivation of the soybean in France was apparently discontinued. Note 1. The brief war of 1870 between France and Bismark's Germany ended in France's defeat and the ceding to Germany of Alsace-

Lorraine.

In the long section on Prof. Haberlandt's work with soya, starting with his cultivation of it there in 1875, is a quotation from him: "I don't know, in this history of cultivation, any example of a plant which has, in so few years and to such a high degree, excited such general interest" (p. 8).

From 1876 to 1881, the soybean was the object of numerous trials in France by the Society of Horticulture at Etampes (Seine-et-Oise). During this same period, one Dr. H. failed with varieties sent from Japan but succeeded in cultivating a yellow soybean sent from China, and used the latter to make his own tofu (*fromage végétal*) for use at home. In 1880 Messrs. Vilmorin-Andrieux introduced in their catalog a species cultivated in Austria-Hungary (p. 17-18).

In 1878, Japan, China, and the Indies (*les Indes*) presented all the varieties of Soya at the Universal Exposition, and their seeds filled more than 20 boxes. In 1880 the National Society for Acclimatization was able to distribute soy in France and tests were conducted in 24 regions; they were largely successful, especially in central and southern France (p. 19-22).

Tests were then abandoned from this time until about 1888, when the soybean started to grow in the southern states of the USA. That same year Messrs. Lecerf and Dujardin-Beaumetz first had the idea of using soy bread in diabetic diets (p. 22).

Causes of setbacks in soybean culture (p. 24-27): First, the varieties used matured too late and were not acclimatized in a progressive manner. We must choose varieties from northern China and adapt them to the south of France (*le Midi*) [which is on the same latitude as Toronto, central Wisconsin, or southern Minnesota]. From these, we must develop hybrids, and gradually move them northward.

The soybean has been ostracized in France. Major commercial, financial, and social interests have viewed with terror the production of an inexpensive food and have retreated into the egotistical "Malthusian agriculture." This is the truth! (p. 26).

Soy cheese is even feared by the cheese industry in France. They ask if they should abandon their excellent cheeses in order to adopt a vegetal cheese (*fromage végétal*).

A long quotation from the *Chinese Imperial Encyclopedia of Agriculture* (p. 34) gives the various colors of soybeans, including black, white, grey, and even some speckled / mottled with blue. The black ones can be used for medicine. And they are used as an ingredient in the condiment called fermented black soybeans (*Chi [douchi]*), made of soybeans, ginger, and salt.

In 1910-1913 a factory named "La Caséo-Sojaïne" was installed near Paris. I (Rouest) visited this factory in which were installed all the modern conveniences (*tout le confort moderne*), and presented the best guarantees of hygiene. The

milk was filtered using a filter press similar to those used in sugar factories (p. 99).

Note 2. Rouest has borrowed a great deal of material from earlier publications by Li Yu-ying, usually without acknowledgment and often arriving at very different conclusions, especially on the question of using soya to make human foods (Li) vs. foods and milk for animals (Rouest).

Rouest strongly recommends the use of soymilk to feed young domesticated animals. For us, soy will not replace green beans, milk or cheese. During World War I, the Germans were actively involved with the study of soymilk. A translation of an article from the *Schweizerische Milchzeitung* (Nov. 1918) tells how to make soymilk and tofu (p. 102). By using soymilk, there is no fear of transmitting tuberculosis. Address: Directeur des Fermes Expérimentales de Néoculture, Carcassonne (Aude), France.

120. *Madison Survey (Madison, Tennessee)*. 1922. Madison Food Factory products. 4(10):3. March 8.

• **Summary:** The factory's loaf of whole-wheat bread is riding a wave of popularity. "With many who are studying diet problems the first question is, 'What shall I prepare in place of meat?'"

"There are vegetable preparations just as rich in food elements as the flesh of animals, and not only more easily prepared than meats, but lacking in those undesirable points that are driving a good many people to give up the use of flesh foods. The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat.

"Recipes for dishes made from these vegetable meats are sent with every order.

"Much is being said and written against the free use of cane sugar, and cane sugar products."

Note: This is the earliest document seen (Aug. 2013) that mentions "Savory Meat" in connection with Madison College. This product may have been made with wheat gluten. The last mention seen of Savory Meat in the *Madison Survey* is on 2 July 1922, page 3.

121. **Product Name:** Soy Bean Meat.

**Manufacturer's Name:** Madison Foods.

**Manufacturer's Address:** Nashville Agricultural Normal Institute, Madison, Tennessee.

**Date of Introduction:** 1922 March.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** *Madison Survey*. 1922. March 8. p. 3. May 10. p. 3. Canned. Probably made from whole mature soybeans. It is not clear what ingredients (in addition to soy beans) were used or how it was made. This was America's second commercial soy-based meat alternative (meat analog).

Note: This is the earliest known commercial soy product made in Tennessee.

122. **Product Name:** Vej-Meat: A Vegetable Meat [Plain, Chicken, Chili, Bologna].

**Manufacturer's Name:** Vej-Meat Company.

**Manufacturer's Address:** 227 N. Manassas St., Memphis, Tennessee.

**Date of Introduction:** 1922 March.

**New Product–Documentation:** Ad in *Herald of Health and Naturopath*. 1922. March. p. 149. "Vej-Meat: A vegetable meat. Are you looking for a real meat substitute? One that not only looks and tastes like meat and has the food elements of meat, but really tastes good?" "Made from sun-kissed nuts, cereals and vegetable products... 50% more nourishing than meat. Satisfaction positively guaranteed or money refunded. Send 60¢ for a 1 pound can, or \$5.40 for a dozen delivered."

123. *Madison Survey (Madison, Tennessee)*. 1922. Instead of meat. 4(19):3. May 10.

• **Summary:** "The Food Department of the Madison School puts out a number of foods to take the place of flesh meats, such as Nut Meat, Soy Bean Meat and Savory Meat." Two recipes for serving Nut Meat or Savory Meat are given.

124. Guillaumin, A. 1922. Les variétés de soya d'Extrême-Orient: Origine probable du soya [The varieties of soybeans in East Asia: The probable origin of the soybean]. *Revue de Botanique Appliquée & d'Agriculture Coloniale* 2(10):254-58. June 30. [10 ref. Fre]

• **Summary:** "The soybean (*Le Soya; Glycine Soja* Sieb. et Zucc., *Dolichos Soja* L., *Soja hispida* Moench, *S. angustifolium* Miq.) has been cultivated in the Far East since antiquity. Shen-Nung (*le Shénon*), written up by Houandi in about 3,000 to 3,500 years before Jesus-Christ, already mentioned the soybean. Since then, its culture has expanded to Indochina, India, Malaysia, Europe, America, and Africa.

"Long ago, in Austria and in France, varieties such as *Soja d'Etampes*, were selected for their high yield. In America, efforts have long been made to obtain, for the diverse climates, both forage varieties and seed varieties. And the U.S. Department of Agriculture has assembled in its test fields more than 500 varieties, of which about 20 are currently in commerce. Among the forage varieties are (Ball 1907): Early Brown, Black Eye Brown, Peking, Wilson Five, Virginia, Barchet, Biloxi, Laredo, Atoo San [sic, Ito San?], Tarheel Black, and Wisconsin Early Black. Among those grown for their seeds are: Ito San, Manchu, Elton, Medium Yellow, Mikado, Hollybrook, Haberlandt, Mammoth, Tokyo, Guelph, Austin, Easy Cook, Morse, Hahto, Early Medium Green, Mandarin, and Chiquita.

Note 1. This is the earliest document seen (Aug. 2013) that mentions the soybean variety Black Eye Brown. However, it does not appear in Ball (1907) as stated, nor does any name even vaguely resembling it appear. The Black Eye Brown variety is mentioned in only 3 known documents,

all published in France in 1922.

“Note that the forage varieties all have black- or dark-colored seeds, whereas the seed varieties have yellow or greenish seeds.

“In Turkestan it seems that the only varieties are ovoid (5.7 x 3.7 mm), brilliant yellow, with brown hilum and traversed longitudinally by a bright line.” Note 2. Turkistan or Turkestan is an historical region of Central Asia, usually thought to comprise Turkmenistan, Uzbekistan, Kyrgyzstan, Tajikistan, southern Kazakhstan, western China, and northeast Afghanistan.

Note 3. This is the earliest document seen (April 2008) concerning soybeans in Turkestan, or the cultivation of soybeans in Turkestan (not including Chinese Turkestan). This document contains the earliest date seen for soybeans in Turkestan, or the cultivation of soybeans in Turkestan (not including Chinese Turkestan) (1922). The source of these soybeans is unknown. Unfortunately, it is not clear in which part of Turkestan the soybeans were grown.

“In India, soybeans are cultivated in the United Provinces and at the foot of the Hamalayas from Kashmir to Darjeeling.” David Hooper (1912) distinguished five different soybean races in India.

“In Cambodia, the only known variety is ovoid (6.3 x 4.2 cm), dull yellow, brown hilum, with a long, clear white line, known as *Sandek sieng* in Cambodian and *dau nanh* in Annamite. It is cultivated along the steep banks of the Mekong River.

“In Cochinchina, the soybean is cultivated only on the red soils of the provinces of Chau-doc, Baria, and Bien-Hoa; in the western provinces, cultivation is insignificant and the seeds come from Cambodia. It seems that there is only one variety, closely related to that of Cambodia, called *dau nanh* or *dau-xa*, but it is not well established / widely grown, for it bears black or brown seeds.

“In the province of Baria one can obtain two harvests in a wet year—one in September, the other in December-January. In the province of Bien-Hoa, there is only harvest.

“In Annam, there is one variety similar to that cultivated in the lower parts of the provinces of Bin-dinh, Thua-hien, Dong-hoi, and Tanh-hoa.

In Tonkin, the soybean is known as *dau tuong*; in the [Mekong] delta, one can distinguish a small, ovoid variety (5.1 x 3 mm), with a yellow seed coat and a hilum surrounded by a brownish black aura that sometimes overflows the sides. In the region of Lang-son, on the plateaus 100-500 meters in height, it is replaced by a larger variety, ovoid (7.1 x 5 mm), dull yellow, and a hilum that is uncolored [pale] or brownish; one variety is also cultivated at Lao-kay.

“In Laos, the soybean is known as *Mok toua kon* and *Ta tone*, according to Dr. Spire, but precise information is lacking.

In the territory of Kwang-cho-wan (French: *Kouang-*

*tchéou-wan*, in southeast China) the soybean is cultivated in the region of Taï ping, at an altitude of 30 meters. It is planted in the spring and harvested in the summer. One can distinguish two varieties here. One is very elongated (8 mm x 4.6 mm), dull yellow with a very clear brown hilum, called *Wong tao* or *Wong tao tsaï* in Cantonese. The other is small, flat (6.4 mm x 3.7 mm), dull black, with a large hilum, called *Hat tao* in Cantonese; it is absolutely the same as the variety *Nigra* cultivated at the botanical gardens of Cluz (Romania), and in Trieste (Italy), but different from that which is cultivated under this name at the botanical gardens of Cracow / Krakow (French: *Cracovie*) (Poland), Tabor (Czechoslovakia), and Delft (Netherlands), which is fatter, more round (7 mm x 4.8 mm) and of a velvety black color.

Note 4. This is the earliest document seen (Feb. 2005) concerning the cultivation of soybeans in Czechoslovakia (which became a country in 1918). This document contains the earliest date seen for the cultivation of soybeans in Czechoslovakia (June 1922). The source of these soybeans is unknown.

“In China, in Szechwan, only the yellow and green varieties are known. In the region of Shanghai, R.P. Courtois, of the Museum of Zi-ka-wei, has assembled an important collection of soybean varieties. Descriptions are given of varieties with the following colors and names: (1) Yellow: *Ta hoang téou* (large, yellow, almost round), *Kiu hoang téou* (ovoid, brilliant yellow). (2) Green: *Tsing pi téou* (roundish, 7.1 x 5.5 mm, clear green with clear hilum). (3) Brown: Large, ovoid (9.1 x 6.4 mm), reddish brown, with a slightly clearer hilum; no name given. (4) Black: Many varieties. (4A) Large ovoid seeds (9 x 4.3 mm), with large hilum; indigenous name unknown; (4B) A little smaller and bulging (8.3 x 5.4 mm), with ornate hilum and a longitudinal white line, named *Ta hé téou*; (4C) Ovoid (8.1 x 4.7 mm) with a wide hilum traversed by a white line, called *Hé téou*; (4D) Small (6.7 x 3.1 mm) and brownish black named *Siao hé téou*; (4E) And finally a very small, flat (6 x 2.7 mm), brownish black named *Ni téou*. By their shape, form, and color, the seeds of these last appear very similar to the American variety Laredo.”

“In Europe, soya has its apostles, but it will never amount to anything more here than a small-time vegetable. Despite the Caséosojaïne at Vallées near Paris, France (Li Yu-ying, 1911) and the Soyama Werke at Bockenheim, Germany (1914), the milk, cream, butter, and cheese [tofu] made from soya will never be more than ersatz. The “soy bread” is only good for diabetics and the “soy ham” (*jambon de Soja*) in nothing but a weak imitation of pork. Soybeans themselves are indigestible and require a very long time to cook—even the yellow or white varieties. Soy sprouts (*germes de Soja*), which enjoyed some popularity before the war and deserved it, for they are a nice hors d’oeuvre, are actually nothing but mung bean sprouts.”

Based on other sources (most of which are cited), the

writer also discusses the soybean varieties of Manchuria (Hosie 1901), and Japan (Lemarié 1910), and discusses soybeans briefly in Korea, Philippines, Netherlands Indies.

In Europe, the soybean has its apostles: Caséosojaïne at Vallé near Paris (1911), and Soyama werke at Bockenheim (Germany) (1914). The latter makes milk, cream, butter and cheese (*le fromage de Soja* [tofu]), which are nothing but imitations. Soy bread has a good taste, especially for diabetics. Soy ham (*jambon de Soja*) is but a vague imitation of the pork product. The seeds, themselves, are hard to digest and take a very long time to cook, even the yellow or white varieties. As for the soy sprouts (*germes de Soja*), which enjoyed some popularity before the war, which they deserved as an agreeable hors d'oeuvre, they are nothing but young mung bean sprouts (*de jeunes germinations du Haricot Mungo*).

Also mentions foods such as soy sauce, fermented tofu, and tofu, made from soybeans in India, Indo-China, China, and Japan. Tofu is known as *dau phu* in Annamite, *tao fou* in, Cantonese, *téou fou* in Chinese, and *to fou* in Japanese. A significant amount was being exported from China before the war. In Manchuria soybeans occupy 1/5 of the cultivated land. Speculates on the origin of the soybean. Address: Asst. to the Crop Service, Museum of Natural History (Assistant du Service de culture au Muséum d'histoire naturelle).

125. *Madison Survey* (Madison, Tennessee). 1922. Health foods manufactured at Madison. 4(26):3. July 2.

• **Summary:** “For the benefit of those who are inquiring about foods put on the market by the food department of the Madison School, we give the following list: Unleavened Breads—whole wheat fruit crackers, sweetened whole wheat crackers, unsweetened whole wheat crackers, bran crackers, whole wheat beaten biscuit, whole wheat beaten sticks, breakfast crisps.

“The vegetable meats, in cans of various sizes, are—Nut meat, Soy bean meat, Savory meat.

“There are soy beans, plain canned... Steamed whole wheat is put up in 16-ounce cans, and sterilized bran and forty per cent gluten flour are for sale.”

126. Kneipp Store. 1922. Health foods. Toilet articles (Ad). *Herald of Health and Naturopath* (New York City) 27(10):512-13. Oct.

• **Summary:** Under “Health foods: Breads and specialties. Diabetic foods and remedies (incl. Gluten bread). Laxative foods and remedies (incl. bran bread, crackers, wafers, and cookies). Cereal coffees (8 brands). Tea substitutes and health cocoas. Nut butters, honey and jellies (incl. Carqué’s almond butter, Lust’s peanut butter {roasted or unroasted}). Vegetable extracts, food additions and olive oil. Unfermented imported wines. Unsulphured, sundried fruits (incl. Black Mission Figs). Meat substitutes (Protose, Nuttose, Vegetable Meat or Roast, Vej-Meat or Vej-Roast, Watson’s Nut Meat,

Beans—Kidney, Soya, or Navy, Bromose—Nut or Fig, Mushrooms). Cereals (11 brands, incl. Carqué’s Natural Whole Rice).

Note: The “Health Foods” half of this add appeared in the Sept. 1925 (p. 854) issue of this magazine. Address: 110 East 41st St., New York City.

127. **Product Name:** Savory Meat.

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Nashville Agricultural Normal Institute, Madison, Tennessee.

**Date of Introduction:** 1922.

**New Product—Documentation:** *Madison Survey* (Madison, Tennessee). 1922. March 8. p. 3 “Madison Food Factory products.” “There are vegetable preparations just as rich in food elements as the flesh of animals, and not only more easily prepared than meats, but lacking in those undesirable points that are driving a good many people to give up the use of flesh foods. The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat.”

*Madison Survey* (Madison, Tennessee). 1922. May 10. “Instead of meat.” “The Food Department of the Madison School puts out a number of foods to take the place of flesh meats, such as Nut Meat, Soy Bean Meat and Savory Meat.” Two recipes for serving Nut Meat or Savory Meat are given. Note: Nowhere can we find any proof that Savory Meat contained wheat gluten. Yet it was a meat alternative that probably did not contain soy. The last mention seen of Savory Meat in the *Madison Survey* is on 2 July 1922, page 3.

Letter from Mavis Sutherland. 1994. July 3. “I may have solved the gluten question [What was the first commercial product made by Madison Foods that contained gluten?] but I can’t prove it. I will send copies of the *Madison Survey* which cause me to feel that gluten came on the scene in 1921 or 1922. It was called Savory Meat.”

Note: Madison Foods started in 1918. The first manager and treasurer was Mrs. Nellie Druillard (affectionately called “Mother D”). Mr. and Mrs. Andrew Wheeler were the first in charge of food production.

128. **Product Name:** Loma Linda Smoke (Seasoning).

**Manufacturer’s Name:** Sanitarium Food Co. (Changed name to Loma Linda Food Co. on 6 Feb. 1933).

**Manufacturer’s Address:** Anderson Street, Loma Linda, California.

**Date of Introduction:** 1922.

**Ingredients:** In 1973: Toasted soy powder, dried yeast, soy sauce, condensed wood smoke.

**Wt/Vol., Packaging, Price:** By 1969: 2.5 oz shaker bottles.

**New Product—Documentation:** Ad in *Health* (Mountain View, CA). 1934. April. p. 33. The product is now named Smotene.

*Today’s Food*. 1961. Summer. p. 6. “Smoke.”

Loma Linda Food Co. 1969. "Wholesale Price List." Smokene is now sold in 2.5 oz shaker bottles, which retail for \$0.30 each.

Interview with Charlotte Van Gundy Holmes. 1981. She says that this was produced as an imitation of the soy-based Smoein developed several years earlier by her father, T.A. Van Gundy, at La Sierra Industries in nearby La Sierra, California.

Karen Misko. 1973. *SeVa Longevity Cookery Cookbook*, p. 101. "Smokene: smoked seasoning spice made from toasted soy powder, dried yeast, soy sauce and condensed wood smoke. It is used for flavoring soups and sauces (Loma Linda Foods)."

Talk with Ty Myers of Washington state. 2004. Jan. 30. His aunt, who also lives in Washington, has a bottle of Smokene with some of the product still in it. She had it when he was a boy, and he is now age 40. He tried some not long ago. A powder, it adds a delicious smoky flavor when sprinkled on almost anything. Ingredients include soybeans and yeast. It comes in a glass bottle, 3 inches tall, with a shaker top and a metal cap. The design looks like it was made in the 1940s. He will send color photos to Soyfoods Center.

Phone call then e-mail from Jo Schwan. 2014. March 26. She sends Soyinfo Center digital color photos of an old

container she has of the product. Cylindrical paperboard shaker 3 3/4 inches high by 1 5/8 inches in diameter. The top part that twists is plastic, as is the bottom. White and orange letters on a metallic blue background. Illustration of an orange skillet with wisps of steam rising from it. Front panel: Loma Linda (orange). Smokene (large, white). Net wt. 2 1/4 oz. (small, white). Savory smoke seasoning (orange). The top is a typical twist-top used for herbs, etc. Back panel: "Ingredients: Toasted soy powder, dried yeast, salt, soy sauce, and condensed wood smoke.

"Only pure wood smoke could impart the genuine smoky flavor you enjoy with Smokene! Condensed wood smoke skillfully blended with salt and seasonings makes a savory favorite for many uses.

"For the gourmet touch add Smokene during the

preparation or after serving to impart a delicious smoky flavor to seafoods, casseroles, potatoes, gravies, sauces and stews.

“Manufactured by Loma Linda Foods, Riverside, California. Mount Vernon, Ohio, U.S.A. Oshawa, Ontario, Canada.”

Note 1. This is the earliest known commercial soy product made by Loma Linda Foods or its predecessors.

Note 2. This is the 2nd earliest known commercial roasted soy flour in the Western world (after Smoein).

Note 3. This is the earliest document seen (March 2014) that mentions “Smokene.”

129. Ambrecht, Jacob. comp. 1922. Hygienic cook book: A collection of choice recipes carefully tested. Revised and enlarged. Battle Creek, Michigan: Shaw Printing Company. 416 p. Index. 21 cm. [10 ref]

• **Summary:** This is a Seventh-day Adventist vegetarian cookbook (which includes dairy products and eggs), containing much basic information about nutrition and hygiene. A full-page table titled “Typical foodstuffs representative of each food nutrient” (p. 14) lists soy beans as a food that contains protein, but less than is found in eggs, meat, milk, or cheese. It also notes that soy beans are “Starchless.” A half-page table titled “Classification of proteins” (p. 18) states that the proteins legumin and glycerin [sic, glycinin] are found in soy beans. The chapter titled “Entrees” contains a recipe for “Soy bean loaf” which includes 1½ cups soy bean puree and ½ cup peanut butter. This is the only soy recipe in the book. This same chapter contains many recipes using “substitutes for flesh meats” (such as Protose, Nuttolene), and other innovative ingredients (gluten meal, ground nut meats, vegetable butter, nut butter) made by Seventh-day Adventist companies. Recipe names include: Vegetable meat. Vegetarian beefsteak. Mock veal pie.

Cellulose (p. 26): It “has no nutritive value, but because it is not digested in the human body it forms the larger part of the ballast or bulk of our food which is so necessary to a normal intestinal movement. It stimulates peristalsis by acting as a gentle mechanical irritant.” Those who have a tendency to “sluggish intestinal movement” may want to add bran to their food or consume a diet consisting of “a greater proportion of foods which contain a large amount of ‘roughage’ or ballast, such as green vegetables, fruits, and whole grain products.”

Note: This is the second earliest Seventh-day Adventist cookbook seen (Oct. 2004) that contains a recipe using soybeans or soy ingredients.

Also discusses: Lecithin (p. 28; soy is not mentioned). Food combinations (good, fair, and bad; p. 44). Acid and alkali forming foods (p. 48). Natural diet of man. Shall we eat meat? Dangers of disease in meat. Was flesh first used before or after the flood? (p. 50-55). Diet for constipation:

Lists of laxative foods to be recommended and avoided (p. 147-49). Sago is used in puddings (p. 237). Many desserts contain a great deal of sugar, plus eggs and milk; others use “vegetable gelatine” (p. 262). Pies use butter, peanut butter, granola, etc. Whole wheat bread/flour is different from Graham bread/flour (p. 293). Recipes for gluten bread, and Gluten biscuit or sticks (p. 301), and Gluten mush (p. 319). Chapter 32, titled “Nut preparations” (p. 375-77) contains a recipe for peanut butter using two processes, one of which calls for a Quaker City Mill. Recipes for Almond milk (p. 382). Peanut candy (p. 394).

130. Cooper, Lenna Frances. 1922. The new cookery. 8th ed., revised. Battle Creek, Michigan: The Modern Medicine Publishing Co. 449 p. Index. 23 cm.

• **Summary:** Contents: 1. Food values. 2. The art of preparing foods. 3. Beverages. 4. Cereals. 5. Fermented breads. 6. Unfermented breads. 7. Sandwiches. 8. Dairy products. 9. Cream soups. 10. Plain soups. 11. Meat substitutes and entrees. 12. Macaroni and Italian pastes. 13. Eggs. 14. Gravies and sauces. 15. Vegetables. 16. Salads and relishes. 17. Toasts. 18. Fruit Desserts. 19. Custards and cold desserts. 20. Frozen desserts. 21. Pastry and pies. 22. Cakes. 23. Cake fillings and frostings. 24. Hot puddings. 25. Sauces for puddings. 26. Canning and preserving. 27. Special dishes for invalids. 28. Balanced menus.”

Soy is not mentioned in this Seventh-day Adventist vegetarian cookbook; soy flour was mentioned in 9th edition (1924).

This book is dedicated to the author’s mother. Page 13 states: “The author wishes to express her indebtedness to Dr. and Mrs. John Harvey Kellogg, of the Battle Creek Sanitarium, who have inspired her with a love for the study of foods and their scientific preparation and who have since been constant sources of help and encouragement.”

With each recipe is given the calories in the recipe and per serving from protein, fat, carbohydrate, and total. Interesting items: Cereal coffee, Kaffir tea, and Health Koko (p. 33). Yogurt buttermilk and Orange yogurt (p. 34-36). Sterilized bran (p. 44). Graham mush with dates, Gluten mush, and Creamed gluten mush (with 1 cup 20% Gluten Meal, p. 47). Granola fruit mush (p. 49-50). Graham bread (p. 54-55). Peanut butter sandwiches (p. 84-85). Protose sandwiches (p. 85). Cream of almond soup (p. 104-05). Noodle soup with Savora (p. 126-27). Chapter 11, titled “Meat substitutes and entrees” contains many interesting recipes, including some commercial products made by SDA companies: Roast Protose with dressing (p. 129). Protose fillet (p. 130). Nut fillet (with Protose and Nuttolene, p. 131). Fillet of nut meat (with Protose and Cereal Coffee, p. 131). Nut meat loaf (with Protose and Nuttolene, p. 143). Vegetarian ham (with Nuttolene, Protose, and Savora, p. 143). Nut patties. Nut chops (with peanut butter, p. 144-45). Peanut roast (p. 145-46). Jellied peach (with 1 cup sugar,

p. 284). Spanish cream (with 3 cups hot milk, 3 eggs, and ½ cup sugar, p. 285). Hot Malted nuts (with ¼ cup dry Malted Nuts, p. 386). Hot Malted Milk (with 4 tablespoons Malted Milk, p. 386). Almond cream (p. 388). Meltose ice cream (with 1 cup Meltose, p. 389). Almond ice (with 6 tablespoons almond butter, p. 389). Frozen malted nuts (with 1½ cups Malted Nuts, p. 390). Gluten bread (with 3.75 cups 40% Gluten Flour, p. 390-91). Gluten puffs (with 1 cup 40% Gluten Flour, plus soda and hydrochloric acid p. 391). Note: In 1923 Lenna F. Cooper was secretary of the American Home Economics Association (see *Journal of Home Economics*, Oct. 1923, p. 588). Address: Director of the Battle Creek Sanitarium School of Home Economics, Head Dietitian of the Battle Creek Sanitarium [Battle Creek, Michigan].

131. Hamburger's Grocery Store. 1923. Go to Hamburger's Grocery Store for Health Foods (Ad). *Los Angeles Times*. Feb. 7. p. II20.

• **Summary:** "We carry the most complete line to our knowledge on the West Coast. Established 1881. 'Some ha' meat who canna' eat'—then it is they seek the most appetizing, most nutritious health foods. Hamburger's has searched this country and abroad to bring the best to you. One entire department is given over to health foods alone..." Two lines of health foods are advertised: Eugene Christian Vitamin Foods (Vegex brand), and Battle Creek Sanitarium Health Foods. For the latter: "- new goods arriving daily. Laxa—a combination of sterilized wheat, bran and Ceylon agar. Calax, Paramels, Paralax, Lactose, Dextrine, Acidophilus Lactose, Dialtetic [sic, Diabetic] Bran, Cooked Bran, Soy Biscuit, Black Fig, White Fig and Prune Marmalade, Gluten Meals, Malted Nuts, Yogurt Tablets. Among the many meat substitutes are Protose, Nuttose and Nuttolene."

"Free delivery, convenient charge account and special phone service." Groceries delivered free twice a day.

Note: A similar but larger ad appeared in 11 April 1923 issue, p. II22. Here we read "Diabetic Bran, Soy Biscuits." Address: Fourth Floor [Broadway at Eighth, Los Angeles]. Phone: Broadway 3940.

132. Piper, Charles V.; Morse, William J. 1923. Tofu or soybean curd (Document part). In: Piper and Morse. 1923. *The Soybean*. New York: McGraw-Hill. xv + 329 p. See p. 234-44, 273-78. [6 ref]

• **Summary:** Contents: Introduction. Method of manufacture. Coagulating agents. Manufacturing yields. Composition of soybean curd. Digestibility of soybean curd. Utilization of bean curd and manufactured products. Bean curd brains or *tofu nao*. Dry bean curd or *tofu khan*. Thousand folds (*chien chang tofu*). Fried bean curd (*tza tofu*). Fragrant dry bean curd (*hsiang khan*). Frozen tofu (*kori tofu*). Chinese preparation. Various dishes.

Tofu, "a sort of white cheese or curd,... is called "Teou fu" by the Chinese, 'Tofu' by the Japanese, and 'Dan Phu' by the Annamites [in today's Vietnam]. It is said to have been originated by the Chinese philosopher, Whai Nan Tze, before the Christian Era, and was undoubtedly introduced into Japan from China by the Buddhists."

"The coagulating agents most generally employed throughout the Orient are the concentrated mother liquid obtained from the manufacture of salt from sea water, burned powdered gypsum, and magnesium chloride... The junior author (Morse) has obtained successful results with rennet and 1 per cent. solutions of acetic, tartaric, and lactic acids. Sour milk has also given satisfactory results as well as the water [whey] drawn from the bean curd after coagulation. By the use of pure salts or rennet the bitter taste which is generally found in the curd made by Oriental methods is avoided."

Yields: In commercial tofu production, 1 pound of beans is said to yield about 3.57 lb of tofu (i.e., the yield is 3.57). Champion (1885) got a yield of 1.53 and Paillieux (1880) got a yield of 1.50. Morse conducted many tests to determine the yield of curd from 19 different soybean varieties. His yields ranged from 0.686 to 0.282—extremely low.

Different types of Chinese tofu: (1) Dry bean curd or *tofu khan*: bean curd squares are dipped in burnt millet-sugar sauce until rich brown in color. "Fine salt also has been rubbed on them. This form of cheese can be kept for several days and is generally eaten in soups."

Note 1. This is the earliest English-language document seen (April 2013) uses the term "bean curd squares" to refer to Chinese-style pressed tofu. And this is the earliest English-language document seen (April 2013) that uses the term "soybean curd" to refer to tofu, or that uses the term "Teou fu" (or "Teou-fu"), or the term "Dan Phu" (or "Dan-Phu") to refer to Chinese-style tofu.

(2) "Thousand folds (*chien chang tofu*): This product is prepared by placing very thin layers of the bean curds on cloths, on top of one another, and subjecting them to considerable pressure and allowing them to dry for a short time. The layers of bean curd are then removed and rolled together like a jamroll. It is said to be eaten cut into strips, like noodles, in soups. When allowed to mold for several days it is fried in sesame oil and has a meat like flavor."

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term "Thousand folds" or the terms "meat like" or "meat like flavor" used to refer to a meat alternative.

(3) "Fried bean curd (*tza tofu*): The fresh bean curd is cut into small squares and fried in deep fat. After a few minutes the bean curd pieces float on the surface and they are taken out. This product is often fastened on bamboo fibers (Fig. 65) and may be kept for several days. They may also be eaten with syrup as fritters." (4) "Fragrant dry bean curd (*hsiang khan*) [*wu-hsiang toufu kan*]: This form is made like

the ordinary bean curd but great pressure is applied to drive out as much water as possible. The squares (Fig. 66) are first soaked in a weak brine or bean sauce to which powdered spices and burnt millet-sugar have been added and then are thoroughly dried out. The curd becomes very hard and can be kept indefinitely. It is said to be eaten sliced in soups and in various vegetable dishes.”

(5) “Frozen tofu (*kori tofu*): Frozen bean curd is an excellent example of the application of the freezing process for the drying or concentration of a food. Fresh bean curd contains rather a high per cent. of water and is therefore a very unstable product. The fresh bean curd is cut into small pieces and exposed to severe cold weather. By freezing, the vegetable proteid shrinks and forms a porous cake permeated with ice crystals. This frozen cake can be readily thawed out and dried. It forms a product much resembling gluten bread in appearance. If the tofu is not frozen, it is difficult to dry and the resulting material is dense and horn-like...” (6) “Chinese preparation:... Tofu is quite generally preserved in loaves (100 to 150 grams) which are cooked in a decoction of turmeric roots. It is also preserved with salt. Often the curd is cut into small pieces and preserved in rice brandy [to make fermented tofu]. When smoked, the curd also keeps very well and can be wrapped in tinfoil for the market. Smoked curd is prepared by cooking the curd in a sauce diluted with water (80 per cent. and 20 per cent. soy sauce) and after cooking the curd is smoked in the same manner as meat.”

Various American- and European-style recipes: “When cut into small pieces and cooked with an egg, it furnishes an excellent omelet. It also may be used as the principal ingredient in baked stuffed peppers. The fresh tofu makes an excellent salad or sandwich filling if the curd is chopped finely and chopped olives, pepper, salt, and mayonnaise dressing are added. When cut into small pieces and cooked in tomato sauce or similar sauces, a very good meat substitute is obtained. Cooked with meat broth, the curd takes the flavor of the meat. It is readily seen that the fresh bean curd can be utilized in many ways and when the people of the western world become better acquainted with this simple method of manufacture, it will no doubt, become more generally utilized.”

Nineteen tofu recipes are given on pages 273-78.

Photos show: (1) “Large blocks of freshly made bean curd ‘Tofu’ ready to be cut up into squares and sold for breakfast.” (2) “A large bamboo tray full of various kinds of bean curd. In the little wooden tubs on the ground the watery sorts of curd are kept immersed in saline water.” (3) “Squares of fresh bean curd fried in oil and put on a string of bamboo fiber. Called *tza tofu* (fried bean curd) and said to supply a ‘snack’ in between meals for hard working Chinese laborers.” (4) “A semi-dry bean curd of the consistency of smoked sausage, called ‘*Hsiang khan*’ (fragrant dry) which is eaten sliced in soups, and with vegetable dishes.” Two

squares, each bearing a stamped mark, are shown next to an open pocket knife for size comparison. (5) “A semi-dry fresh bean curd, called ‘Lao to fu’ (old bean curd) said to be used by the poorer classes of Chinese for breakfast.” One square (with a cloth-like texture on the surface) on a small plate, and a broken half square are shown. (6) A room in which fermented tofu is being made. “A dark room of even temperature where wooden frames, full of squares of bean curd are piled, one on the other, the lowest resting on a layer of somewhat damp rice straw.” One tray is open, showing the rows of tofu cubes, each covered with a white mycelium. (7) “Large earthen jars, full of squares of bean-curd, which are covered over with spiced brine and soy-sauce. After several months’ curing a new product has been formed, called ‘*Foo-yu*’—Bean cheese [fermented tofu], which can be kept for many years and becomes better with age.”

Note 3. This is the earliest English-language document seen (Oct. 2011) that uses the term “*Foo-yu*” to refer to fermented tofu.

Note 4. Each of these 7 photos was taken (probably in China) by Frank N. Meyer, Agricultural Explorer, USDA.

Tables show: (1) Yields of bean curd obtained by William Morse from different varieties of soybeans. Variety #37062 gave the highest yield of tofu. 50 grams of soybeans yielded 34.3 gm of tofu and 30.5 gm of “*Cake*” [*okara*]. Note 4. This yield of 0.69 is very low; it should be at least 2.5. Variety #38462 gave the lowest yield, 0.28. (2) Composition of tofu and tofu products, compiled from various sources: Five samples of fresh tofu (6.0% protein on average), one frozen tofu (48.65% protein and 28.65% fat), and one fried tofu (21.96% protein and 18.72% fat).

## HEALTH FOODS.

**W**E manufacture an unusual line of HEALTH FOODS. Have thirty-four years of experience along the Naturopathic line. Our years of experience in Institutional feeding of the sick, as well as out of Institutions, watching the results obtained from feeding NATURAL PRODUCTS, has enabled us to present something to the public that is of infinite value.

Our prices are so reasonable that everyone can afford to use our foods.

We manufacture a line of foods that most perfectly takes the place of meat, milk, eggs and butter.

There are no animal products used in the manufacture of our foods. We have used no animal products in our home for over eight years, no meat for over thirty years.

We are just completing a book, which will be off the press in September, on Natural Products of the earth, giving not only the value of them and how to feed them, but the effects they have upon the system and how to prepare all these HEALTH FOODS in your own home.

There is valuable information on foods in this book that is not found elsewhere as far as the writer has been able to learn.

Nature's simple remedies with the right food bring unfailing results in the treatment of disease, even in the diseases that are called incurable.

In this book will be given the recipes for all the foods we manufacture and many recipes for good foods that are sold on the market for a very high price, which we do not manufacture, also many tried and tested NATURAL REMEDIES.

The regular price of this book is \$2.50. In order to get it before the people, we will set the price at \$1.75 postpaid, for all orders received before October 1st, 1923.

Send for price list of our health foods and complete description of our new book.

### JETHRO KLOSS HEALTH FOOD CO. BROOKE, VIRGINIA.

• **Summary:** The chapter in these essays titled "The meaning of mock turkey" critiques the philosophical viewpoints expressed in a vegetarian pamphlet.

135. Kellogg, John Harvey. 1923. Vegetable substitutes for meat (Document part). In: J.H. Kellogg. 1923. *The Natural Diet of Man*. Battle Creek, Michigan: The Modern Medicine Publishing Co. 385 p. See p. 334-36.

• **Summary:** "By the combination of nuts and cereals, a product very closely resembling meat may be prepared. The process for doing this was discovered by the writer many years ago in a series of experiments undertaken for the purpose by the request of Professor Dabney, then assistant professor in the Department of Agriculture. Recognizing that the increase of population would ultimately lead to an increase in the price of foodstuffs and particularly of meats, and possibly a scarcity of meats, Professor Dabney requested the writer to solve the problem by the production of a vegetable substitute for meat. The result of the experiment undertaken was Protose, a nut-cereal preparation, which to a considerable degree resembles meat in appearance, taste and odor, having a slight fibre like potted meat.

"Earlier experiments made by the writer led to the production of peanut butter, which has since developed into a great industry and has increased enormously the size and value of the peanut crop of the South. From a food standpoint, a pound of peanut butter is more than equal to the same amount of pork or meat of any sort.

"In Malted Nuts, another product of our experiments, is provided a product [probably peanut milk] resembling Malted Milk, which has been extensively used as a substitute for milk by those unable to tolerate cow's milk.

"No doubt the future will develop a large number of vegetable products which will so fully supply the place of various meat products and dishes that all of these unwholesome products may be dropped from the bill of fare without being missed. As a matter of fact, it is now recognized by the most eminent authorities in dietetics that the flavor of meats is about the only reason or apology which can be offered for their use." Address: Director, School of Hygiene and Public Health, Johns Hopkins Univ., Baltimore, Maryland.

136. May Co. (The). 1924. Battle Creek health foods! Have you tried them? (Ad). *Los Angeles Times*. Aug. 3. p. I25. Sunday magazine.

• **Summary:** "Others have had astounding results... If necessary you can make three delicious meals a day from these famous foods." The May Co. is "headquarters for Battle Creek health foods;... we have a dietician to advise you."

"Paralax—lubricates the intestinal walls. Acidone—supplies gastric acid when deficient. Acidophilus—combats autointoxication. Protose, Nuttolene and Nuttose—meat substitutes. Almond butter—for soups, sandwiches, etc. Soy biscuit—for diabetics."

Address: Broadway at Eighth, Los Angeles, California.  
Phone: BRoadway 3940.

137. *Japan Magazine (The): A Representative Monthly of Things Japanese*. 1924. Japanese child games: The “Oden-ya.” 15(1):10-11. Sept.

• **Summary:** Page 10: “*Oden* is a kind of Japanese popular food.” Among the many things it contains are *yaki-dofu* (broiled beancurd), *ganmodoki* (bean-curd fried with condiments), potatoes, etc., which are cooked in a soup of soy [sauce], after which they are skewered and eaten, usually with mustard. The seller of *oden* is called *oden-ya*.

In this game, “boys and girls imitate this familiar food hawking in their play. It is an outdoor game [played] by at least 6 or 7 children.

“There are two taggers chosen at first. One hawks *oden* and another buys, the rest forming the *hanpen*, *chikuwa*, *konnyaku*, *yaki-dofu*, *ganmodoki* and potatoes respectively. The *oden-ya* arranges in a line these foods beside him, waiting for one coming to buy them...”

Note 1. This is the earliest English-language document seen (April 2013) that contains the term *yaki-dofu* or the term “broiled beancurd.” Both refer to grilled tofu.

Note 2. This is the earliest English-language document seen (Oct. 2014) that contains the word *ganmodoki* (written as one word); it refers to deep-fried tofu burgers.

Note: This remarkable periodical was founded by Baron Hirayama, P.C., in 1910.

138. Cooper, Lenna Frances. 1924. *The new cookery*. 9th ed., revised. Battle Creek, Michigan: The Modern Medicine Publishing Co. 475 p. See p. 76-77. Index. 23 cm.

• **Summary:** The Preface (p. 12) states: “The author wishes to express her indebtedness to Dr. John Harvey Kellogg, of the Battle Creek Sanitarium, and to his wife, the late Mrs. Kellogg, both of whom have inspired her with a love for the study of foods and their scientific preparation and have been constant sources of help and encouragement.

In the chapter on “Unfermented breads,” the recipe for “Soy cakes and waffles” (p. 76) calls for “2 cups Soy flour.”

The section titled “Unusual foods referred to in this book” (p. 462-64) states that the following are made by the Battle Creek Food Company, Battle Creek, Michigan: Protose (a meat substitute made from cereal and nuts), Nuttolene (a pure nut product with the consistency of brick cheese), Savita (a pure vegetable meat flavoring), Meltose (malt honey), Meltose Sugar, Sanitarium Cooked Bran (an appetizing food that supplies the necessary roughage, stimulates intestinal activity, and is rich in vitamins), Vita-Wheat (rich in gluten, lime, iron, and Vitamin B—the anti-neuritic vitamin), Branola (breakfast food that is 2/3 bran and 1/3 wheat), Zo (a body-building, ready cooked cereal breakfast food), gluten flour (contains 44% of wheat gluten), Malted Nuts (“A delicious nut cream—Contains the same

nourishing food values as human milk and is even richer in its tissue building elements. It has an appetizing flavor and can be used with excellent results by those with whom cow’s milk is found to disagree. It is excellent for those who wish to gain weight”), Minute Brew (a cereal coffee), Kaffir Tea, B. Acidophilus Culture (Bacillus Acidophilus is the strongest known lactic acid producing organism), Vegetable Gelatine or Agar (Made “from Ceylon moss, a seaweed that grows off the coast of Japan.” It is “a form of cellulose resembling bran in chemical composition but somewhat like animal gelatine in physical appearance”).

Note 1. This is the third earliest Seventh-day Adventist cookbook seen (Oct. 2004) that contains a recipe using soybeans or soy ingredients.

Note 2. The first edition of this book was copyrighted in 1914, the 11th edition in 1929. There is no mention of soya in Mrs. E.E. Kellogg’s *Science in the Kitchen* (revised ed., 1892. Battle Creek, Michigan: Health Publishing Co.), nor in H.S. Andrews’ *Science of Food and Cookery* (1921. Pacific Press Publishing Co.), nor in George Cornforth’s *Good Food* (1920. Review and Herald Publishing Assoc.). Address: Dean of Home Economics, Battle Creek College; formerly, Head Dietitian of the Battle Creek Sanitarium; and later, Supervising Dietitian, United States Army (1918-1919).

139. Chesterton, Gilbert K. 1925. *Fancies versus fads*. 2nd ed. London: Methuen & Co., Ltd. See p. 35-45. \*

• **Summary:** The chapter titled “The meaning of mock turkey” (p. 35-45) critiques the philosophical viewpoints expressed in a vegetarian pamphlet.

140. Zlatarov, Asen. 1926. Die Soja und ihre Verwertung als Nahrungsmittel [The soybean and its use as food]. *Fortschritte der Landwirtschaft* 1(7):543-47. Sept. 1. [8 ref. Ger]

• **Summary:** On this document, the writer’s name is written “Prof. Dr. Assen Zlataroff.”

In Bulgaria as elsewhere in Europe, people have started to plant lots of soybeans. The soybean can serve as a source of healthy and rich nutrition, but also as a new source of income. There is much recent interest in Hungary and Germany.

Tables show: (1) Thirteen nutritional analyses of soybeans planted in Bulgaria between 1917 and 1922. (2) Nutritional analyses of black beans (non-soy), black peas, white beans, white lentils, Garbanzo beans (Chickpeas / chickpeas / *Kichererbsen*). And soybeans (*Soja*). The soybean is low in purines. (3) Soy oil constants (yellow variety, ether extract), including specific weight, saponification number, Reichert-Meissel number, iodine number, Hennersche number. (4) Nutritional composition of Papuda beans in 4 districts of Bulgaria in 1920 and 1921. (5) Weight of distilled water absorbed by 100 gm (800 beans) of soybeans after seven lengths of time ranging from 15

minutes to 12 hours. (6) Nutritional composition of soymilk (*Sojamilch*). (7) Comparative nutritional composition of various mammalian milks: Human milk, cow's milk, buffalo milk, sheep's milk, goat's milk. (8) Nutritional composition of tofu (*Tevu-fou*, *Sojakäse*, based on previous analyses by Champion and Lhote, Prinsen, and König {both fresh and dry}). He notes that tofu resembles quark. (9) Nutritional composition of soy casein (*Kaseo-Sojain*).

The value of the soybean as food: In China and Japan the soybean is used in large quantities as food. These foods include soymilk, soya cheese (*Sojakäse*), soya casein (*Sojakasein*), soybean meal, natto, miso, shoyu (*Schoyou*), Tao-you, Indonesian-style soy sauce (*Ketjap*), Vietnamese-style miso (*Tuong*), *Kiju-tze*, soya coffee (*Sojakaffee*), soya salad (*Sojasalat*), etc.

The soybean as a vegetable (green vegetable soybeans).

He then describes briefly how to make various soybean food products (based on Li Yu-ying and Grandvoinet) including soya flour (*Sojamehl*), soy dumplings (*Sojaglösse*), soymilk (*Sojamilch*, discovered by the Chinese philosopher Whai Nain-Tze), tofu (*Sojamehl*, made by coagulation of soymilk; he calls it *Sojamilchquark*, *Sojakäse*, *Tevu-fou* and notes that in China it is called "The meat without bones"). As far as taste is concerned, the writer has tasted tofu and he finds that this fresh cheese tastes very nice and the type of cheese made from it (by Li Yu-ying) such as Roquefort, Gruyere, Holländer, etc. are in no way inferior to the renowned real cheeses. Making tofu could be a new industry, which would be a good source of income for the nations where the soybean thrives and conducive to the nutrition of the people. Fresh tofu has many uses in cookery. With eggs it makes a fine omelet, likewise cheese dumplings and sausages. All these products have a fine taste and are very nutritious. In 1921 Dr. Assen Zlatoff (a nutritionist) and J. Trifoneff wrote (in Bulgarian) a brochure on the soybean, its cultivation, composition, and food value. Address: Sophia Medizinisch-chemisches Institut, Bulgaria.

141. Horvath, A.A. 1927. The soybean as human food. *Chinese Economic Journal* 1(4):415-25. April. [34 footnotes. Eng]

• **Summary:** Contents: Soybean curd (tofu) for food: Preparation and types ("The Chinese classical name for *tofu* is *li chi*, probably meaning 'the morning prayer'"), historical, present state (of tofu in China), chemical composition, digestibility, utilization (incl. frozen tofu and fried tofu).

Fermented soybean products for food. Soy sauce: Kibiki and sobiki tamari, composition of various soy sauces. Natto. Miso. Conclusion. Bibliography.

Tofu—Historical (p. 416): "The manufacture of soybean curd (*tofu*) was started in China in 164 B.C., during the reign of the Emperor Han Wen, by a man named Liu An, the duke of Hwai Nan. Liu An was a great friend of the Buddhist monks, and it seems quite probable that he made this bean

curd to provide a change or delicacy to break the monotony of the monastic ration (Adolph). *Tofu* was introduced into Japan from Korea for the first time during the Toyotomi government, and Buddhist priests and some other people used it for their daily food among others before it was generally used in Japan.

Tofu—Utilization (p. 418-19): "Both the composition and the digestibility of *tofu*, therefore, prove it to be a very nutritious food material. In the Orient *tofu* forms a very popular and almost indispensable dietary article for the Buddhist priests, as well as the strict adherents to Buddhism, who eat no animal food [i.e., are vegans]. A common saying in some parts of China terms 'bean milk the poor man's milk, and bean curd the poor man's meat.' *Tofu* is also called 'the meat without the bones.'

Note: This is the earliest English-language document seen (March 2014) that contains the phrase "the meat without the bones" (or a similar phrase containing the words "meat" and "bones"); it is used to refer to tofu, not to soybeans.

In Indo-China the daily consumption of *tofu* by an adult is about 3/4 of a pound. *Tofu* in its various forms is also used very extensively by all classes of Japanese. In the interior of the country where fish cannot be easily obtained, it is a most important source of protein.

"In the Orient *tofu* is eaten in a fresh condition simply with a little *shoyu*, though it is also frequently cooked in soup. Fried *tofu* is also a very popular article of food. Rape-seed oil, sesame oil or soybean oil are generally used in frying.

"*Tofu* may also be prepared for preservation and transportation. For this purpose fresh *tofu* is cut into smaller pieces and exposed to severe cold weather, to remove the water by freezing, and is then dried in an oven. As thus prepared it can be preserved for several years. When the *tofu* is frozen the water collects in fine needles of ice distributed throughout the mass. When the ice melts and the water runs out, it leaves the *tofu* porous and it may be easily dried. If it is not frozen, it is difficult to dry and the resulting material is dense and horn-like. The *tofu* also cooks very well if cooked in diluted soy sauce and smoked in the same manner as meat. The resulting product forms in the Orient the basis for the manufacture of various 'artificial meat' preparations.\*" Footnote: \* "In Germany, the Soyama factory prepared during the Great War [World War I] a meat supplement from soybeans. It was cheaper than beef, contained less carbohydrates and had a nutritive value of about 1500 Calories in 1 kilo."

"In Peking, at the Kai Cheng Bean Products Company, various preparations manufactured from tofu may be purchased, such as different kinds of soybean meat, soybean sausages, etc. The company has established a restaurant in Peking (at 86 Morrison Street, the name is written in Chinese characters) where one can get a Chinese dinner of numerous dishes prepared mostly from soybean products (chicken

meat, pork, ham and beef, manufactured from *tofu*).

Also discusses: “Dr. Yamei Kin, a Chinese dietitian, has become particularly well-known as an exponent of bean curd on her visits to the United States” (p. 419).

A note at the end of this April issue states: “A reprint of Dr. Horvath’s paper in booklet form may be obtained from the Bureau of Economic Information. Price \$1, Peking Currency.–Ed.” Thus, these six articles were reprinted in 1927 as part of an 86-page monograph titled “The Soybean as Human Food” (Peking, China). Address: M.D., Peking Union Medical College, China.

142. Bois, Désiré. 1927-1937. Les plantes alimentaires chez tous les peuples et à travers les âges. Histoire, utilisation, culture. 4 vols. [The food plants of all people across the ages. History, utilization, culture. 4 vols.]. Paris: Paul Lechevalier. See vol. 1, p. 119-30. Vol. 3, p. 153-55 (soy). (Encyclopedie Biologique, vol. I, III, VII, XVII. Fourth edition of *Le Potager d’un Curieux* by Paillieux and Bois). Illust. Index + Index of Illust. 25 cm. [12 ref. Fre]

• **Summary:** Vol. I. Phanérogames légumières. The section on the soybean (*le Soya*) (p. 120-130), discusses the history of the plant in various countries, the oil and its uses, the preparation of soybean cheese and soy sauce, the nutritive value of the soybean, the place of the soybean in the culture of various countries including the United States, yields of various varieties, and use as a forage crop.

At its annual lunch on 15 May 1911, following its tradition of introducing new products from little-known plants, the Society for Acclimatization (in France) served samples of various soyfoods (*plusieurs préparations à base de Soya*) prepared by Mr. Li Yu-Ying, technical director of a factory established on the outskirts of Paris for the preparation of various products from this legume: vegetarian ham (*jambon végétal*), soy cheese (*fromage de Soya*), soy preserves (*confitures de Soya*), soy bread (*pain de Soya*), etc. (p. 126).

Vol. III. Plantes à épices, à aromates, à condiments. The section on shoyu (p. 153-155) describes soy sauce and its preparation. Note: Désiré Bois lived 1856-1946. Address: Prof., France.

143. Lovell, Philip M.; Press-Lovell, Leah. 1927. Diet for health by natural methods: Together with health menus and recipes. Complete instructions for the cure of the sick without the use of drugs. Los Angeles, California: The *Times-Mirror* Press. xiii + 428 + [7] p. No index. 21 cm.

• **Summary:** Part I: Treatment and diet, by Dr. P.M. Lovell. Part II. The preparation of health foods, by Leah Press-Lovell (recipes, p. 129-428). Some of the recipes in this book first appeared in the “Care of the Body” section of the *Los Angeles Times*, which Dr. Lovell has edited for the past few years. “This is the pioneer health department of any newspaper in the country, undoubtedly the most widely

read and unique, in so far as it advocates drugless, natural therapy” (p. 4). “This book is based on vegetarian principles. Meat recipes... are not included.” Many reasons for this are given. Meat includes fish and fowl (p. 8-9).

Soy-related: “Soy sauce or shoyu is made from soy beans and can be bought at Japanese stores. It gives a tasty flavor to gravies and to cereals” (p. 134). Chop suey (3 types), each served with “Soy bean sauce” (p. 290-91). Soy gravy (with soy—also called soy sauce or shoyu, p. 305). Chapter 14, “Legumes” (p. 366-70) discusses chick peas (Garvanza), lentils, peanuts, and “Soy beans: Best known in China and India. Rich in oil. Contain almost no starch. Require slow cooking to bring out flavors. Hulls are difficult to digest. Therefore remove them by rubbing through a colander.” “About the soy bean: The soy bean is very important in the Orient. When three-fourths grown it makes a nutritious green vegetable [yes] known as ‘bean sprouts’ [no]. Products of soy beans are soy bean flour, soy bean milk, soy bean cheese (tofu), soy sauce, soy bean oil, sprouts, etc. Soy bean products can be bought at Japanese and Chinese grocery stores.” Contains 3 recipes: Soy roll or bread (replace 25% of the whole wheat flour with soy flour in any whole wheat bread recipe). Soy bean porridge (cook 1 cup soy bean flour with 3 cups water for 2 hours in a double boiler. Cool, slice, roll in corn flour and bake with butter or oil to make croquettes). Soy bean croquettes (with “1 cup soy bean porridge”). Soy bean milk (made from soy bean flour, p. 420; also almond milk and cocoanut milk).

Also discusses: Of the general advice given to patients, “the subject of diet occupies the leading position” (p. viii). Agar flakes (vegetable gelatine) are better than animal gelatine (p. 135). Almonds—How to prepare almond milk, cream, and meal (p. 152). Cocoanut—To prepare cocoanut milk. Peanuts—How to prepare raw peanut butter (p. 153). Garvaza [garbanzo] beans and meal (p. 308-09). Nut loaf (Vegetable turkey) (with peanuts, p. 315). Carqué’s unfermented whole wheat bread (p. 351). Carqué’s unleavened fruit bread (p. 351). Recipes using Graham flour (different from whole wheat flour, p. 356-59).

Ads on the last 7 (unnumbered) pages are for: (1) Lovell Health Offices. (2-3) Lovell’s drugless health library (39 titles on diseases and health problems; pocket edition size). (4) Health of the Child, by Dr. Philip M. Lovell. (5) Carqués California Pure Natural Food Products: Fruits—sun-dried and dehydrated without bleaches, fumigants or preservatives (incl. black mission figs), nuts, confections, stamina and laxative foods, nut butters, cereals and products (incl. soy bean flour), miscellaneous. And Carqué Pure Food Co., Inc. (6) Cubbison’s Cracker Co., 3419 Pasadena Ave., Los Angeles. And Cubbison’s Whole Wheat Flaxseed Crackers. Cubbison’s also sells Whole wheat crackers, and Whole wheat nut bread (See p. 32-33, 104). (7) The Cary Health Cooker (for steaming and baking; Elmer E. Cary Co., Los Angeles).

Note: This is the earliest published document seen (April 2004) that gives the address of Cubbison's Cracker Co. as 3419 Pasadena Ave. Address: 1. Dr., drugless practitioner, Health Offices, 238 Chamber of Commerce Bldg., 1151 So. Broadway, Los Angeles, California; 2. His wife. Phone: WEStmore 8275.

144. Stop & Shop. 1928. Buy your Sunday dinner at this store (Ad). *Chicago Daily Tribune*. Feb. 24. p. 12.  
 • **Summary:** One section is titled "Stop & Shop now offers Battle Creek Sanitarium Health Foods to you—Every day in the year a complete line of standard Battle Creek foods... Battle Creek expert always in charge of this department." Featured: "Savita—a valuable substitute for meat extracts; rich in vitamin—excellent for diabetics. Has the fine flavor of mushrooms and rivals the finest meats. 50¢ jar. Protose—looks like meat, smells like meat, tastes like meat; has the composition of meat yet is purely vegetable. 35¢ jar." An illustration shows 11 products, including Psylla [from psyllium], Gluten Flour, Malted Nuts, Lacto Dextrine, Zo, Savita, Protose, and Laxa. Address: 16 N. Michigan and 12 W. Washington.

145. Grey, Egerton Charles. 1928. The food of Japan. Geneva: League of Nations, Health Organisation. 161 p. May. Index. 24 cm. [82 ref. Eng; fre]  
 • **Summary:** Detailed information and analysis. Contents: Preface. 1. Quantity of food in Japan: Exports, imports, production and consumption of food in Japan in the year 1925. 2. Quality of food in Japan: Definition of quality. 3. Distribution of food in Japan: Natural and artificial distribution. 4. Chemical composition of Japanese foods as consumed: Methods of analysis. 5. Chemical composition of Japanese food as purchased. Appendices: I. Literature relating to the chemical and physical properties of the food of Japan, with list of authors. II. Food materials and the plants and animals serving as sources of food in Japan.

The Preface begins: "This work... was carried out in the Imperial Institute of Nutrition, Tokyo (director, Dr. Tadasu Saiki). It comprises statistical data relating to the food supply of Japan and analytical data derived from the writer's personal examination of the food materials."

Table 7 (p. 25) shows the amounts of major foods consumed in Japan. The percentage of the total food consumed is: Rice 50.83%, barley 10.15%, potatoes 8.63%, wheat 6.63%, soy bean 4.76%, other beans 3.71%, other cereals 3.24%, fish 1.72%, seaweed 1.23%.

On page 54, the author discusses the "Alkalinity of the ash [of foods]. This figure is of considerable importance as indicating the capacity of the food material to produce alkali in the body." On pages 61-111 the author lists the nutritional composition of all major Japanese foods, grouped by food type: 1. Cereals and cereal products. 2. Legumes, pulses, and legume products. 3. Roots, greens, and other vegetables.

4. Mushrooms and seaweeds. 5. Fruits, nuts, and seeds. 6. Vegetable oils. 7. Other vegetable products. 8. Dairy products. 9. Eggs. 10. Meat and animal fat. 11. Fish. 12. Condiments, beverages, etc. The name of each food is given in both English and French, usually with a brief explanation.

In a table (p. 65-69), in category "II. Legumes, pulses, and legume products," the section titled "Fresh legumes" includes (p. 64-65): Edamame (Soy bean in pod) = *Fève de soya en cosse*. The section titled "Dry legumes (pulses)" includes (p. 64-67): Azuki (Small red bean) = *Petit haricot rouge*. Dainagon (Small red bean) = *Petit haricot rouge Ao daizu* (Soy bean [with green seed coat]) = *Fève de soya*. Kuro daizu (Black soy bean) = *Fève de soya noire*. Shiro Daizu (White soy bean) = *Fève de soya blanche*. Rakkasei (Pea nut) = *Pistache de terre*.

The section titled "Bean products" includes (p. 66-69): Aburage (Fried-bean curd) = *Pâte de haricots frite*. Aka miso (Soy-bean paste) = *Pâte de fèves de soya*. Gammodoki (Fried-bean curd) = *Pâte de haricots frite avec mixture d'algues marines*. Kinako (Soy-bean powder) = *Poudre de fèves de soya*. Kori tofu = *Pâte de haricots séchée*. Namaage (Fried-bean curd) = *Pâte de haricots frite*. Natto (Fermented soy bean) = *Fève de soya fermentée*. Sarashian (Red-bean powder) = *Poudre de haricot rouge* [Sarashi-an from azuki beans]. Shiro miso (White soy-bean paste) = *Pâte blanche de fève de soya*. Tofu (Soy-bean curd) = *Pâte de fèves de soya*. Tofu kasu (Soy-bean residue) [okara] = *Déchets de fèves de soya*. To nyu (Soy-bean milk) = *Lait de fève de soya*. Yuba.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word *gammodoki* (spelled that way) which refers to deep-fried tofu burgers, or that contains the word *namaage*, which refers to deep-fried tofu cutlets.

Also: Mushrooms and seaweeds includes (p. 73-75): Arame, Asakusanori [Asakusa nori], aonori, hijiki, kanten, kombu, mozuku, ogonori, tororo kombu, wakame. Fruits, nuts and seeds includes (p. 77): Asanomi (Hemp seed), Goma (sesame, white and black). Vegetable oils includes (p. 79): Daizu yu (Soy bean oil) = *Huile de fève de soya*.

Condiments includes (p. 92-93): Hamana natto [fermented black soybeans]. Kiriboshi (Dried daikon). Misozuke [miso pickles]. Narazuke. Shoyu [soy sauce]. Takuan (Pickled radish). Umeboshi (pickled plum) = *Prune confite*. Beverages includes (p. 92-93): Amazake. Mirin (fermented rice). Sake (Rice wine).

For each food, the following values are given in both English and French: Water, protein (N x 6.25), fat, carbohydrate, ash, calories, alkali value, total nitrogen, water-soluble nitrogen, phosphoric acid (anhydrous), sodium chloride (salt), water-soluble ash, water-insoluble ash, alkalinity due to soda and potash, alkalinity due to lime and magnesia, calcium oxide, ferric oxide, factor for converting to dry food.

Note 2. In Japan, the typical person is well aware of

which foods are alkaline (*arukari-sei*) and which are acidic (*san-sei*). The alkaline foods are generally considered more healthful and health-protecting. For the alkaline values given by Grey for many basic Japanese foods, see SoyaScan Notes. 1991. Sept. 20.

Note 3. This is the earliest English-language document seen (March 2009) that uses the term “soy-bean paste” to refer to miso.

Note 4. This is the earliest English-language document seen (June 2009) that uses the term “Edamame” to refer to [green] soy beans in their pods.

Note 5. This is the earliest English-language document seen (April 2013) that uses the term “kori dofu” to refer to dried-frozen tofu.

Note 6. This is the earliest English-language document seen (Dec. 2006) that uses the term “pickled plum” to refer to umeboshi salt plums.

Note 7. This is the earliest English-language document seen (Nov. 2011) that uses the term “Hamana natto” to refer to fermented black soybeans. Address: M.A., D.Sc., F.I.C., M.R.C.S., etc.

146. Cooper, Lenna Frances; Barber, Edith M.; Mitchell, Helen S. 1928. Nutrition in health and disease [1st ed]. Philadelphia, Pennsylvania: J.B. Lippincott. viii + 546 p. June. Illust. Index. 21 cm. [37 ref]

• **Summary:** This is the first edition of this classic text. Contents: Part I: Principle of nutrition. 1. Nutrition and the health program. 2. Summary of digestion and absorption. 3. Water and cellulose. 4. Minerals. 5. Vitamins. 6. Carbohydrates. 7. Fats. 8. Proteins. 9. Energy metabolism. 10. Food value determinations. 11. Feeding of normal children. 12. Diet in old age. 13. Foods of the foreign born. 14. Cost of food. 15. Public health and the food supply.

Part II: Food selection. 16. The development of cookery and the service of food. 17. Menu planning and hospital dietaries. 18. Beverages. 19. Fruits. 20. Vegetables. 21. Cereals. 22. Salads. 23. Milk. 24. Eggs, cheese and other dairy products. 25. Meats and poultry. 26. Soups and gelatin. 27. Fish and shellfish. 28. Nuts and legumes. 29. Leavening agents, batters and doughs. 30. Desserts.

Part III: Diet in disease. 31. Diet in gastric disorders. 32. Diet in gastric disorders (continued). 33. Diet in diseases of the intestines. 34. Diet in diseases of the liver and biliary tract. 35. Diet in cardio-vascular-renal diseases. 36. Diet in diseases of the blood. 37. Diet in fevers and infections. 38. Diet in overweight and underweight. 39. Diet in gout and arthritis. 40. Diet in diabetes mellitus. 41. Diet during pregnancy and lactation. 42. Artificial feeding of infants. 43. Malnutrition. 44. Diets before and after surgical operations.

Part IV: Cooking for the sick and convalescent. Introduction. 45. Beverages. 46. Cereals and gruels. 47. Toasts. 48. Breads. 49. Soups and broths. 50. Meats and poultry. 51. Fish and shellfish. 52. Meat substitutes. 53. Eggs

and cheese dishes. 54. Gravies and sauces. 55. Vegetables. 56. Salads and salad dressings. 57. Frozen desserts. 58. Gelatin desserts. 59. Miscellaneous desserts.

Appendix. 1a. Table of approximate relative food values. 1b. Table of values of food materials in common measurements. 1c. Nutritive value in grams per 100 grams of food. 1d. 100 calorie portions of foods. 2. Reference books and magazines (bibliography).

This important early work on scientific nutrition is not vegetarian, even though both authors are Seventh-day Adventists; the word “vegetarian” does not even appear in the index. It is addressed more to homemakers than to trained nurses; the homemaker “is an all the year round nurse, in the new sense of the word—as an enlisted volunteer in the war against disease” (p. iii).

Also discusses Acid-base balance (with a large table) (p. 34-38). Fats in the diet (“There are numerous vegetable oils obtained from seeds namely, cottonseed oil, cocoanut oil, corn oil, olive oil, and peanut oil. These oils are sometimes hydrogenated,...” p. 72). Proteins (incl. incomplete proteins, p. 73-79). Chinese dietary habits (“The soy bean is grown abundantly and some thirty or more products are manufactured from it.” p. 124). Cost of food: Meat and dairy foods (Meat “is one of the most expensive of our foodstuffs” p. 133-35). Public health and the food supply: The federal “Pure Food Law, or the Food and Drugs Act, passed in 1906” designed “to protect its citizens against frauds, adulteration and deterioration.” The second federal food law of 1906, made operative under the Bureau of Animal Industry, USDA, provides for the examination of all animals intended for slaughter and an examination by a federal inspector of the carcasses of animals slaughtered (p. 143-49). Milk (Begins: “A quart of milk a day for every child and a pint for every adult’ should be the rule...” p. 214-15). Eggs, cheese and other dairy products are viewed as valuable foods (p. 223-25). Meat (“The per capita consumption of meat is very large in this country, a condition which can be traced to the generous supply [of game] which was available during the pioneering days” [and early patterns of meat consumption in England]. “Lamb is the meat of the immature sheep. Mutton is the meat of the mature animal.” Pork is relatively cheap but “contains more fat than any other meat.” p. 230-37). Diet in gout and arthritis (incl. uric acid and purines. A table shows the 16 foods with the highest content of purines, p. 352-53). Diet in diabetes mellitus (“Joslin is confident that overeating resulting in obesity is the chief predisposing cause of this disease.” “13. There are several standard soya bean flours on the market which may be purchased through local dealers. Soya bean flour may be prepared at home by buying soya beans and grinding them in a feed mill, or a small hand mill” p. 356-67). Meatless luncheon dishes (recipes, p. 456-59). Reference books and magazines (p. 528). Address: 1. Food Director, Univ. of Michigan; formerly Dean of School of Home Economics, Battle Creek College; Supervising

Dietitian, U.S. Army 1918-1919; 2. Writer and consultant, food and nutrition; editor, food column, *New York Sun*; 3. PhD, Prof. of Nutrition, Battle Creek College; Director of Nutrition Research, Battle Creek Sanitarium.

147. Littlejohn, C.M. 1929. The soya flour industry. *American Miller* 57(8):797. Aug. 1.

• **Summary:** Two months ago Mr. H.P. Chapman established Soya Millers in Seattle, Washington, for the exclusive milling of flour from the soy bean. The mill, located at 45 Broad Street, makes soy flour for food and industrial uses. For more than a quarter century, H.P. Chapman was with the Lilly mills in Seattle. "In establishing the new soy bean flour mill in the spring [of 1929], devoted exclusively to the transformation of flat, hard-pressed soy bean cakes received from the Chinese in Manchuria, he followed closely upon the usual flour milling process, with the exception of the breaker which converts the soy bean cake into a fine powder..."

"In Japan, Honolulu and Hawaii the soy bean flour is used extensively for cake baking and for cookie making."

The plant named Soya Millers is located at No. 45 Broad Street, Seattle, Washington—"on the waterfront, with large trackage facilities for shipment by either water or rail." The plant's soy bean flour is used for making glues, paints, and sprays—especially sprays used to protect orchards from insect parasites. Mr. Chapman met a gentleman from Decatur, Illinois, "who stated that he enjoyed the unusual experience of being served mock chicken once made from a stock gelatin and soy bean flour. With a seasoning combination, this gentleman declared it tasted quite a bit like chicken and was an excellent substitute for pressed chicken." Mr. Chapman said his plans "to engage in experimental growing of soy beans" near the mill.

"The Chinese press the oil from the bean and large slabs of greyish cake are shipped on vessels and sent to Seattle from the Orient. These cakes are about 30 by 14 inches in length and width and about two inches thick. Wrapped in gunny sacks, they weigh 249 pounds net." Five hundred tons of the cake are used each month. Working 24 hours a day, the plant "has been turning out 140 barrels a day. About half the products is the soy bean flour, and the other half, feed, is for dairy and poultry industries."

Photos show: (1) Mr. Chapman standing at the entrance to his mill. (2) The outside of the Soya Millers plant in Seattle.

Note: This is the earliest English-language document seen that uses the term "soy bean cakes" to refer to ground, defatted soybeans. Address: 431 South Dearborn St., Chicago, Illinois.

148. **Product Name:** La Sierra Sandwich Spread (Called Soy Spread by 1936).

**Manufacturer's Name:** La Sierra Industries.

**Manufacturer's Address:** Arlington, California.

**Date of Introduction:** 1929 November.

**Ingredients:** Incl. okara, salt, mace, and other seasonings.

**Wt/Vol., Packaging, Price:** 8 oz can.

**New Product–Documentation:** Ad in Health magazine. 1934. 1(3):30. June. "La Sierra Soybean Products: Perfect Protein, High Alkaline Ash, Low Starch." Ad in Health magazine. 1935. 2(9):31. Sept. "Soy Bean Products, La Sierra Brand: Complete protein, low starch, high alkaline ash." House of Better Living Catalog. 1936. March. p. 9. 8 oz. can for \$0.15. Ad in Dorothea Van Gundy. 1936. La Sierra Recipes. p. 46. "Soy Spread."

Two interviews with and two letters from Charlotte Van Gundy Holmes. 1981. This was canned okara or soy pulp, with salt, mace and other seasonings; it had a soft consistency and was said to taste and smell like "potted chicken."

Note: This is the earliest record seen (June 2013) showing the use of okara as an ingredient in a commercial soy product.

149. **Product Name:** La Sierra Soy Gluten (Meat Analog).

**Manufacturer's Name:** La Sierra Industries.

**Manufacturer's Address:** Arlington, California.

**Date of Introduction:** 1929 November.

**New Product–Documentation:** Two interviews with and two letters from Charlotte Van Gundy Holmes. 1981. This meat analog was made of Soy Spread mixed with ground gluten, resembling Dr. Kellogg's Protose, but with soy.

Note: This the earliest meatlike product seen, made by a Seventh-day Adventist food company, that contains gluten.

150. Dorsett, P.H.; Morse, W.J. 1930. Tofu in Tokyo, Japan (Document part). In: P.H. Dorsett and W.J. Morse. 1928-1932. Agricultural Explorations in Japan, Chosen (Korea), Northeastern China, Taiwan (Formosa), Singapore, Java, Sumatra and Ceylon. Washington, DC: Foreign Plant Introduction and Forage Crop Investigations, Bureau of Plant Industry, USDA. 8,818 p. Unpublished log.

• **Summary:** Page 3469 (8 Jan. 1930). Tokyo, Japan.

"Worked at the office until about 10 or 10:30 then took our camera and went out to get pictures and information about Tofu, soybean curd.

"We visited a place not more than half a dozen blocks from the Sankaido Building and got a nice lot of information about making tofu. Also secured a few pretty good pictures.

An elderly Japanese lady fried (or seared as we would say) the cakes about 3 by 9 by ½ to ¼ of an inch in thickness, over a charcoal fire [to make grilled tofu or *yakidofu*] on the street or side walk in front of their house.

"Detailed information about the making of this tofu will be found in the special report on soybeans and soybean products, which will be a special report added at the end of our exploration work.

"We saw for the first time fried Tofu which had had

chopped carrots added to it [ganmodoki]. We had not prior to this known of vegetables of any kind being added to or mixed with the bean curd or Tofu before frying.

Pages 3470 to 3471. Photos show: (1) “Soja max. Tofu, bean curd. Tokyo, Japan. A nearby view of an elderly Japanese lady frying Tofu on the street. Children and Mr. W.J. Morse are looking on.” (2) An elderly Japanese lady frying or searing Tofu. To the right, children are watching the operation, and so are Mr. Morse and Suyetake, in the background. (3) “A fairly nearby view of an old Japanese lady fanning a charcoal fire over which she is frying or searing tofu.” (4) “Cakes of soybean curd piled upon bamboo strip supporters [arranged on bamboo mats] and weighted to express the surplus moisture before frying. A metal two prong piece [skewer] is run through each to handle them with” (negatives #44714 to #44717).

Pages 3472 to 3473. Tofu in Tokyo. Photos show: (1) “A fairly nearby of an old Japanese lady turning the cakes of Tofu she is frying [sic, grilling] over a charcoal fire.” Note 1. The rectangular charcoal brazier appears to be about 14 inches long, 8 inches wide, and 8 inches deep. This is the same old Japanese lady described on pages 3470-3471. (2-3) “An old Japanese lady fanning a charcoal fire and frying [grilling] Tofu on the street, not far from the Sankaido Building.

(4) A nearby view of five large cakes of skewered tofu being grilled on a brazier over a charcoal fire. (Negs. #44718 to #44721).

Page 3476. “Oblong piece of fresh soybean curd which had been toasted over a charcoal fire... This is used in soups and also cooked with vegetable mixtures. Purchased from a bean curd factory, Tokyo, Jan. 8. The piece is 7½ inches long and 2½ inches wide” (Neg. #44736).

Page 3477. “*Phaseolus angularis*. Adzuki bean. Packages of adzuki bean flour purchased in a store, Tokyo, December 24, 1929. This is a sweet flour used in making sweet bean soup. Package 3 1/8 inches long; 1½ inches wide.

D. & M. #3100 (Neg. #44737).

Page 3478. Soybean. This soybean product is sold in tubs from Tokyo small stores, and is known as ‘Gomoku Mame.’ It consists of a mixture of five cooked products, namely: soybeans, lotus root, fish sausage, seaweed and burdock roots.” Purchased at a small grocery stand in Tokyo, Jan. 6. “It is eaten just as it is. Product is on bamboo leaf which measures 8 inches long and 5 inches wide” (Neg. #44738).

Page 3481 (8 Jan. 1930). “Fried soybean curd cakes. The round cake (D. & M. #3096) is known as ‘Ganmodoki,’ and is fresh bean curd mixed with chopped carrots. The cakes are fried in mustard [rapeseed] oil until brown and sell for three sen each. Each cake is 4½ inches in diameter and 3/8 inch thick. The oblong cake (D. & M. #3097) is known as ‘Aburage.’ It is a fresh bean curd mixed with chopped carrots and fried in mustard oil until brown. The cake is 8½ inches long, 3 inches wide, and 3/8 of an inch thick. Sell for three sen. These forms of fried bean curd are eaten when dipped in soy sauce and also in soups” (Neg. #44741).

Note 2. This is the earliest English-language document seen (April 2013) that contains the term “Fried soybean curd” or the term “Fried soybean curd cakes.”

Page 3532 (11 Jan. 1930). “A soybean preparation used as a health drink, ‘Almen: The Health Food Drink.’” Sold in a can whose front and back are shown. “Manufactured from soybeans by the Nippon Almen Shokuryo Co., Ltd., near Kobe, Japan. This form of flour is also used in making confections. Packages of 3 1/8 inches high and 2 1/8 inches wide” (Neg. #44758). Note 3. Soy flour is apparently used to make the canned health drink.

Page 3533. “Dried and frozen bean curd. The fresh bean curd is cut into small blocks, frozen and then dried. Used commonly in soups. Packages 2 5/8 inches high and 2 1/8 inches across” (Neg. #44759).

Note 4. This is the earliest English-language document seen (April 2013) that uses the term “Dried and frozen bean curd” to refer to dried-frozen tofu.

Page 3534. Photo of a package of cooked and sugared adzuki beans, 7½ inches long and 3¼ inches wide (Neg. #44760).

Page 3535. “Candied soybeans and other products. Sticks of candy in which are imbedded black soybeans (green germ), yellow soybeans, peanuts, peas and sorghum seed. Box 8½ inches long and 6 7/8 inches wide” (Neg. #44761).

Page 3537 (13 Jan. 1930). “Got down to the office pretty early and got the pictures made yesterday jacketed and the legends written.

“About 10 a.m. went to the American Consulate with 8 packages to go forward today in the diplomatic pouch to the office. Six of these 100 to 106, contain seed, 107 contains pamphlets and other publications.

“About noon we went down the street and made a few

pictures at a soybean curd factory. A little later we developed those, they were only fair, but are about as good as we can get in view of the conditions.

“In the afternoon we packed and sewed up two parcels of soybean products to go forward to Washington [DC] at the first opportunity. We are having really wonderful weather, not very cold and sunshiny and bright.”

Page 3538. “Soybean candy. Small cylindrical pieces of candy in which are imbedded medium small roasted soybeans. This picture is natural size” (Neg. #44762).

Page 3539. Adzuki bean flour. Box containing 24 small papers of sweetened adzuki bean flour which is used in making sweet soup” (Neg. #44763).

Page 3540. “Bean curd factory (soy). “View showing furnace and boiler where ground soybeans are being boiled for making soybean milk. To the left of the furnace is a tub, into which the milk is strained and made into curd. Tokyo” (Neg. #44764).

Page 3541. “Bean curd factory. View showing a stack of oblong blocks of fresh bean curd which are to be slightly roasted over a charcoal fire [to make grilled tofu / *yakidofu*] (Neg. #44765).

Page 3542. Bean curd factory. View showing stone mill for grinding soaked soybeans into a mash for making soybean milk and bean curd. Above the hopper is a small round tank of water from which flows into the hopper of beans, a small stream of water while the beans are being ground” (Neg. #44766).

Page 3543. Soybean curd factory. View showing the furnace and boiler where the ground bean mash [*gō*] is boiled in making soybean milk. To the left of the furnace is the wooden tub into which the milk is strained, and where the magnesium sulphate solution is added to form the bean curd. To the extreme left is the partitioned rectangular box into which the bean curd is dipped and pressed into blocks” (Neg. #44767).

Page 3544. “View inside soybean curd factory showing in background stone mill for grinding the beans; on the right the oblong charcoal fire box for roasting blocks of the fresh bean curd; and in the foreground and on the left stacks of blocks of bean curd ready to be roasted. The tub in the center is where the blocks of bean curd are placed” (Neg. #44768).

Page 3545. “Inside the bean curd factory showing a stack of oblong blocks of fresh bean curd with long handled forks [skewers with several prongs] in one end. These blocks are ready to slightly roast over a charcoal fire” (Neg. #44769). Address: Agricultural Explorers, USDA, Washington, DC.

151. *Guardian (England)*. 1930. Miscellany: Chemical “meat.” Feb. 10. p. 7.

• **Summary:** A correspondent writes: The movements to “Eat more meat” and “Eat more fish” may soon be followed by an “Eat more monosodium glutamate” campaign. “A few years

ago this queer chemical, made by hydrolysing gluten [sic] of soy beans with hydrochloric or sulphuric acid, was a mere academic fact.”

Lately, however, it has come to be manufactured on a huge scale in China and Japan because of its meatlike taste. In Japan, where it is called “Ajinomoto” (the Element [Basis] of Taste) it has come to be used almost as commonly as sugar or salt. Restaurateurs in China find they can substitute it for meat flavoring or extracts (it is much cheaper) without diners knowing the difference. Perhaps the meatless sausage or the fishless rissole have already begun to appear in our own teashops.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word “meatlike.”

Note 2. This is the earliest English-language document seen (Nov. 2014) uses the word “meatless” to describe a meat alternative.

152. Kellogg, John Harvey. 1930. Soybeans as human food. Paper presented to the American Soybeans Grower’s Association, Sept. 11. 20 p.

• **Summary:** Dr. Kellogg shows that he has an excellent knowledge of the world literature on soybeans and soyfoods, much of which he summarizes in this speech. “Many years ago (1899), the United States Department of Agriculture, called upon me to undertake the preparation of a vegetable meat. The Assistant Secretary, Dr. Charles Dabney, wrote me, suggesting that the navy bean might be used for the purpose. I found, however, as I expected, that this legume was not suited to the purpose. At that time the soybean was not grown to any extent in this country, I was wholly unacquainted with it, and so naturally sought to find in nuts, especially the peanut, a solution of the problem, and succeeded in producing a vegetable meat, Protose, of which several thousand tons have since been made and consumed. But the introduction of the soybean renders quite unnecessary any other substitute for flesh meats.” The author discusses his belief that primitive man subsisted wholly upon plant products (i.e. ate a vegan diet “according to Prof. Elliot of Oxford University, Prof. Ami of Montreal, and other distinguished paleontologists”), and the nutritional value of soybeans and their basic-ash quality. “All meats yield a highly acid ash. The excess of acid in these foods produces a lowering of the alkalinity of the blood and tissue fluids when they are freely used, a condition which is known as acidosis.” He also discusses soya sauce (which is now being manufactured in the USA), miso (which like soy sauce has a flavor resembling that of the osmazomes found in meat and meat sauces), roasted soy nuts (resembling roasted peanuts), pressure cooking whole soybeans, adding soy meal (flour) to breads, soy milk (which, in certain parts of China and Japan, “is made in quantities and distributed in bottles like milk in this country”), soy cheese [tofu], and the many health benefits of soy milk described in the medical literature, the

many health problems caused by consuming flesh foods.

“Von Noorden, the world famous German physician, has demonstrated that the soy bean is of very great service in changing the intestinal flora.” Note 1. This is the earliest document seen (June 2003) concerning soy and changing the intestinal flora. It is also the earliest document seen (June 2003) that uses the phrase “changing the intestinal flora” in connection with soy.

“In spite of the frantic efforts of vested interests to promote the uneconomic live-stock industry, it will no doubt gradually disappear as a true science of agriculture is developed and the country becomes more densely populated. The conversion of vegetable into animal protein by feeding to steers and pigs, is one of the most wasteful of all human activities. Armsby has shown that 100 pounds of digestible vegetable protein are required to produce 3 pounds of meat protein...”

Discusses Stefansson’s absurd so-called meat-eating experiment, which was really a publicity stunt. Stefansson took no more than 20% of his calories in the form of lean or muscle meat. The rest of his diet was fat. “Excessive meat consumption is one of the begetting sins of the people of this country. Our per capita meat consumption is 5 ounces per day, just 5 times that of Italy (1.0 oz.) and ten times that of North China (0.5 oz.), while the average native of South China eats no meat at all, and is one of the hardest and most industrious of workers.”

“Thanks to the efforts of our efficient Plant Introduction Bureau, the soybean is beginning to get a start toward recognition and appreciation in this country; but it is evident that a plant possessed of such superlative values and such astonishing versatility and adaptability should receive far more serious attention than has heretofore been given it by the agriculturalists of this country... There can be no doubt that it is destined to play a large part in the feeding of America’s millions...”

Note 2. This is the earliest English-language document seen (Dec. 2012) that uses the term “soy nuts” or the term “roasted soy nuts” to refer to soynuts. Address: Battle Creek, Michigan.

153. *Christian Science Monitor*. 1930. From the world’s great capitals–Moscow. Oct. 25. p. 20.

• **Summary:** The first section, titled “Soy-bean diet recommended,” notes: In Moscow, where “meat, butter, and milk substitutes are in great demand,” the soy bean is fondly called “our young revolutionary Chinese ally.” The newspapers urge: “Plant soy beans and you plant meat, milk, and egg omelettes.” Throughout the year, much effort has been made to introduce “soy bean dishes” to restaurants and homes. In Moscow, a “soy institute” has recently been organized, as well as a “special exhibition of soy foods at which 130 varieties of soy dishes, including cutlets, pastry, salads, candy, beef, were shown. A dinner, prepared entirely

of soy beans, was served to representatives of trade unions, factories, Red Army and the Soviet press. The food was unanimously declared excellent. Special courses to train cooks in the preparation of soy foods have been opened throughout the country,” and two books of soy recipes have been prepared for publication.

Note 1. This is the earliest English-language document seen (Sept. 2011) that contains the term “soy foods.”

Note 2. This is the 2nd earliest English-language document seen (July 2014) that contains the word “Soviet” in connection with soybeans—even though the Soviet Union was formed on 30 Dec. 1922.

154. Pehkoff, Suzanne. 1930. Salvation seen in soy beans. *Los Angeles Times*. Nov. 15. p. A4.

• **Summary:** A summary of: *Christian Science Monitor*. 1930. “From the world’s great capitals–Moscow.” Oct. 25. p. 20.

155. Kellogg, John Harvey. 1930. Soybeans as human food. I. *Good Health (Battle Creek, Michigan)* 65(12):5-7. Dec. Continued Jan. 1931. Paper first read at the meeting of the American Soybean Assoc., held 11 Sept. 1930 at Urbana, Illinois. [1 ref]

• **Summary:** Contents: Introduction. An age-long esculent. The soybean is richer in protein than beefsteak. An extraordinarily versatile food. The soybean replaces milk and eggs as well as meat in China.

“Many years ago (1899), the USDA called upon me to undertake the preparation of a vegetable meat. The Assistant Secretary, Dr. Charles Dabney, wrote me, suggesting that the navy bean might be used for the purpose. I found, however, as I expected, that this legume was not suited for this. At that time the soybean was not grown to any extent in this country. I was wholly unacquainted with it, and so naturally sought to find in nuts, especially the peanut, a solution to the problem, and succeeded in producing a vegetable meat, Protose, of which several thousand tons have been since made and consumed.

“But the introduction of the soybean renders quite unnecessary any other substitute for flesh meats. As a matter of fact, the protein rich foods of vegetable origin, such as nuts, which the soybean resembles, as Professor Sherman of Columbia University suggests, are not meat substitutes, but are the original meats for which the flesh of animals became a substitute when the glacial cold of the Ice Age drove our prehistoric forbears into the caves and grottoes of Southern Europe.

“The proteins of the soybean are, according to McCollum, distinctly more valuable from the point of view of nutrition than are those of the other legumes. The work of my own laboratory as well as that of others has shown that this bean is almost unique among seeds in its vitamin content.” Address: Battle Creek, Michigan.

156. **Product Name:** Zoybeans (Cooked Soybeans), Zoy Soup, Bacon and Zoybeans, Zoy Bouillon.

**Manufacturer's Name:** Madison Foods?

**Manufacturer's Address:** Madison, Tennessee?

**Date of Introduction:** 1931 December.

**New Product–Documentation:** W.L. Burlison and O.L. Whalin. 1932. *Journal of the American Society of Agronomy* Aug. p. 594-609. "The production and utilization of soybeans and soybean products in the United States." See p. 608. "Zoybeans," "Zoy soup," "Bacon and zoy beans," and "Zoy bouillon" are listed as soybean food products made and sold in the USA.

Question: What was the "Bacon" in "Bacon and soy beans," what company made it, and how was it made? Madison Foods, a maker of vegetarian foods at a vegetarian college, would almost certainly not sell real bacon made from a pig.

W.L. Burlison. 1936. *Industrial and Engineering Chemistry* 28(7):772-77. July. "The Soybean: A Plant Immigrant Makes Good." See Table II, p. 775. "Zoybeans (cooked beans). Bacon and Zoybeans. Zoy bouillon." States that these products were on the market during the latter part of 1931. They were probably made by Madison Foods in Madison, Tennessee.

157. La Sierra Industries. 1931? La Sierra soy bean products (Leaflet). Ontario, California. LSI. 3 panels each side. Each panel: 22 x 9 cm. Undated. [2 ref]

• **Summary:** Gives a 6-7 line description of each of the following products prepared by the company in Arlington: Soy Beans (canned, plain or with tomato sauce), Soy-Co, Soy Flour, Mamenoka [roasted soy flour], Soy Milk, Soy Cheese, Soy Loaf, Soy Bologna, Soy Sandwich Spread, Smoein, Soy Bean Butter [soynut butter], Soy Bean Breakfast Food. One of the panels (front and back) is "Mamenoka Recipes (Processed soy bean flour)."

"Smoein is a smoked vegetable protein made from legumes which have been toasted and smoked in the old fashioned way, giving the flavor of smoked meats. It is an excellent seasoning for soups, gravies, entrees, eggs and any food in which a smoked flavor is desirable.

"Soy Bean Butter is similar to peanut butter, however it does not contain any nuts. It may be served plain or mixed with water to dilute. A delicious spread is made by mixing equal parts of honey and soy bean butter." Note 1. This product is almost surely soynut butter. If so, this is the earliest English-language document seen (Dec. 2012) that uses the term "soy bean butter" to refer to soynut butter.

Note 2. This is the earliest published document seen (Sept. 2000) related to T.A. Van Gundy or his company, La Sierra Foods. Note 3. This is the earliest English-language publication seen (April 2013) that uses the term "Soy Cheese" to refer to tofu. T.A. Van Gundy coined and later

frequently used the term "soy cheese" to refer to tofu.

Note 4. This is the earliest English-language document seen (Nov. 2012) that uses the word "Mamenoka" to refer to roasted soybean flour. It is a variation on or misspelling of the Japanese term *mame no ko* meaning "flour of [soy] bean."

Note 5. This is the earliest English-language document seen (Nov. 2012) that uses the word "toasted" in connection with roasted soy flour. Address: Campus and Maitland, Box 203, Ontario, California.

158. **Product Name:** Vigorost (Fibrous-Textured Canned Meatless Steak). Renamed Vigoroast by 1965.

**Manufacturer's Name:** Madison Foods.

**Manufacturer's Address:** Nashville Agricultural Normal Institute, Madison, Tennessee.

**Date of Introduction:** 1932 September.

**Ingredients:** Wheat gluten, firm tofu and/or okara, whole peanut meal, seasonings.

**Wt/Vol., Packaging, Price:** 14 and 20 oz cans.

**How Stored:** Shelf stable.

**Nutrition:** Protein 19.4%, fat 8.6%, carbohydrates 12.3%, ash 2.1%.

**New Product–Documentation:** Madison Survey. 1932. Sept. 14. p. 140. Dec. 7. p. 179. For entrees, sandwiches, salads. Madison Health Messenger. V. 49-2. p. 5. Gray. 1936. All About the Soya Bean. p. 123.

Madison Survey. 1937. "The soy bean marches on." April 21. p. 59-60.

Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Vigorost is one of five basic food products made and sold by Madison Foods. Taylor. 1944. *The Soy Cook Book*. p. 201.

Note from Sam Yoshimura. 1981. March 19. When Sam attended Madison College from 1937-1943 Vigorost was made from wheat gluten, soy cheese [tofu], and seasonings.

Note 1. This is the earliest known commercial soy product that is a meat alternative resembling beef; it uses tofu and/or okara.

Note 2. This the second earliest meatlike product seen, made by a Seventh-day Adventist food company, that contains gluten.

159. La Sierra Industries. 1932. Soy bean (Ad). *Los Angeles Times*. Nov. 6. p. J20.

• **Summary:** This small, square ad reads: "One of the most perfect foods on the market today. Perfect in protein and practically free from starch, with an Alkaline Reaction.

"Soy bean products are offered in twelve different varieties: Soy-Co Breakfast Beverage [soy coffee], Soy Milk, Cheese [tofu], Butter, Bologna, Loaf, Spread, and Others.

"On sale at health food stores. Manufactured by the La Sierra Industries. 'Packers of superior foods.'" Address: Arlington, California.

160. Anderson, Hans Steele. 1932. *Science of food and cookery*. 6th ed. Mountain View, California: Pacific Press Publishing Assoc. 298 p. Illust. Index. 23 cm. [7 ref]

• **Summary:** This book, by a Seventh-day Adventist, advocates a vegetarian, natural foods diet. “Natural foods, just as they come from the garden, field, and orchard, furnish the elements best suited to the harmonious development and functioning of all the tissues and organs of the body...” (p. 11). It discourages consumption of cane sugar (which is not digested by saliva, p. 14) and encourages consumption of cellulose and bran (p. 15).

Chapter 4, titled “The natural food of man” (p. 37-52) has sections on: True food satisfies hunger. Vegetarian diet and longevity. Vegetable and flesh foods contrasted. Vegetarian diet and endurance. Flesh eating a cause of disease. Ethics of flesh eating. Cruelty of flesh eating.

Recipes include: Gluten bread (p. 112). Diabetic bread (strong in gluten, p. 112). Gluten biscuit (p. 112). Homemade Nuttose (incl. nut butter, flour, tomato pulp, p. 134). Stewed soy beans (p. 156). Rice and soy bean loaf (with soy bean purée, p. 156). Rice and soy bean patties (p. 156). Favorite soy bean coffee (p. 281).

In the chapter on “Diet and disease” is extensive information and tables about acid-forming and base-forming foods (p. 237-39).

A 5th edition (same publisher, number of pages, and size) was published in 1929, and a 7th edition in 1938. Address: Dietitian.

161. Orosa, Maria Y. 1932. Soybeans as a component of a balanced diet and how to prepare them. *Manila (Philippines) Bureau of Science, Popular Bulletin* No. 13. 53 p. [16 ref]

• **Summary:** Contents: Introduction. The cooking of soy beans (89 Filipino recipes, p. 7-35), incl. roasted soy beans, soy-bean soups etc.—most recipes use whole soybeans, but quite a few use tofu (*tokua*), soy sauce (*toyo*), soy-bean flour, or soy-bean milk, and a few use *tahuri* (brine fermented tofu) or soy-bean sprouts. Some common foods made from soy beans and methods of preparing them (p. 35-53): Soy-bean milk, condensed soy-bean milk, soy-bean milk powder, soy-bean casein, soy-bean curd (tofu; *tokua* or *toqua*). *Tahuri* or *tahuli* (fermented tofu). Frozen tofu. Bean curd brains or *tofu nao*. Dry bean curd or *topu khan* (tofu-kan, dipped in burnt millet sauce and rubbed with fine salt). Fragrant dry bean curd.

“Thousand folds: Thin layers of fresh bean curd are placed on cheesecloth, one on top of another, and then subjected to a great pressure. The thin layers of curd are dried partially and are rolled together like jamrolls. They are cut into strips and served in soup as noodles. On standing, the thousand folds mold and develop a meatlike flavor. This is fried in sesame oil and served in place of meat” (p. 44).

Fried bean curd. Soy sauce (called by the Chinese

“ch’au yau,” or drawing oil; or “pak yau” or white oil; by the Japanese “shoyu”; and the Filipinos, “toyo”). Natto. Hamanatto (p. 49). Yuba. Miso. Soy-bean flour. Soy-bean oil (used in the manufacture of lard and butter substitutes; also in paints, printing inks, etc.). Soy-bean meal. Soy-bean coffee. Soy-bean sprouts.

Note 1. This is the earliest English-language document seen (Oct. 2008) that uses the term “soy-bean casein” (or “soy bean casein” or “soybean casein”), probably to refer to soybean protein.

“When and by whom the soy bean was first introduced into the Philippines, no one can ascertain. The Filipino people have long known some important soy-bean preparations, such as soy sauce, or ‘toyo,’ bean curd, or ‘tokua,’ fermented bean curd or ‘tahuri,’ not knowing that they were prepared from this bean. The seed is known in some parts of the Philippines, where it is grown, as ‘utao.’”

“The main object of this pamphlet is to encourage the Filipino people to use more soy beans, and preparations made from them as food” (p. 3-4).

“Soy beans are grown in some parts of the Philippines. According to Doctor Roxas, Director of the Bureau of Plant Industry, 2,481 tons were grown in Batangas in 1921 and 4,218 tons, in 1930. However, the importation of soy beans in 1924 was 4,657 tons. Doctor Roxas says that soybeans can be grown in all parts of the Philippines” (p. 6). “Immature soy beans may be cooked in the same way as lima beans (*patani*)” (p. 7).

“The soy-bean curd was first produced by Whai Nain Tze, before the Christian Era and was introduced into Japan from China by the Buddhists. It was introduced into the Philippines by the Chinese and has become a very popular food in Manila and in places where there are Chinese who manufacture it for sale. ‘Tokua’ on account of its high fat, protein, and mineral content, is called by the Chinese as ‘meat without bone,’ or ‘the poor man’s meat.’” The Chinese use burnt gypsum (about 1.5% by weight) as a coagulant. In some cases, the curds are wrapped in individual pieces of fine cheesecloth about the size of a small handkerchief, then pressed lightly for a few minutes. They are “unwrapped, spread on shallow bamboo trays (*bilao*) and partially dried at room temperature. Then they are dipped in a weak solution of turmeric to coat the outside in light yellow coloring. Some manufacturers soak the small cakes of curd in brine solution for a short time, then dip them in a solution of burnt sugar or molasses and bake them slightly before putting them on the market.” 100 gm of dry soybeans typically yield 350 gm of tofu (*tokua*) (p. 41).

The section titled “‘Tahuri’ or ‘Tahuli’” begins with 2 paragraphs and ends with a table very similar to those from Gibbs and Agcaoili (1912): “‘Tahuri’ is manufactured in China and exported to the Philippines in large stone jars or in small tin cans. There are some ‘tokua’ manufacturers in Manila that manufacture ‘tahuri’ for local consumption.

Those that are imported from China are preserved in strong brine solution and the cakes are broken during the shipment so the liquid becomes like a thick emulsion containing pieces of the cured curd.” It then contains a new paragraph: “In Manila, the Chinese method of manufacture is to pack the large pieces of soy-bean curd, about 5 inches long, 4 inches wide, and 2.5 inches thick, with much crude salt, in empty gasoline cans. The curd is allowed to cure for a period of several months. During the curing period the bean curd changes from white to a brownish yellow color and develops a peculiar salty flavor to which the Chinese and many Filipinos are educated” (p. 42). Note 2. No information about a fermentation microorganism or process is given.

“The bean curd brains known to many Filipinos as ‘tojo’ is the unpressed soy-bean curd. The method of making ‘tojo’ is almost the same as the method used in making ‘tokua’, only that a smaller amount of the coagulating agent is used, and the very soft but solid mass formed is left undisturbed in the wooden container until used. The Chinese used to peddle this preparation in a wooden pail-shaped container, through different parts of Manila, but on account of the Philippine Health Service regulations, this product is now sold in the markets only. / “The ‘tojo’ is served with a few tablespoonfuls of medium thick brown-sugar syrup, which gives it flavor, the ‘tojo’ being almost tasteless. Sometimes it is eaten with sweet oil, sauce, and vinegar, or with finely cut meat and spices.” (p. 43).

Note 3. This is the earliest English-language document seen (April 2013) that contains the term “tojo” which is used to refer to unpressed curds made from soy-bean milk.

“Dry bean curd: The fresh bean curd when dipped in burnt millet-sugar sauce and rubbed with fine salt will keep longer than the ‘tokua’ and is called ‘topu khan.’ This preparation is usually eaten in soups.”

Fragrant dry bean curd or *hsiang khan* (“fragrant dry”) has the consistency of smoked sausage. “It is made by subjecting the fresh bean curd to great pressure, which eliminates much of the water content. The pieces of semidry curd are soaked in a weak brine solution in which is dissolved burnt millet-sugar and to which is added powdered spices. The curd is then dried to hardness. This preparation keeps indefinitely and is used in soup making and in vegetable dishes” (p. 43).

Note 4. Cruz and West (1932, p. 78) state that as part of a campaign by the Bureau of Science to encourage the Filipino people to use more soy beans, Miss Orosa “has made excellent cakes, cookies, puddings, sauces, soups, custards, ice cream, and other tasty preparations from Philippine soy beans.”

Note 5. The author pioneered the branch of the branch of the Home Extension Service in which home demonstrators helped women in solving their home problems. She started the organization as a food preservation unit under the Bureau of Science in 1923, starting with six home demonstrators

that she herself trained. That group became the forerunner of the Home Extension Service in the Philippines. For details on her work see: In: *A Half Century of Philippine Agriculture*. Manila, Philippines: Liwayway Publishing. p. 236-37. Address: Chief, Div. of Food Preservation, Bureau of Science, Manila.

162. *Boletin de Agricultura y Trabajo (Nicaragua Ministerio de Agricultura y Trabajo)*. 1933. Soya o soja (Soja Híspida Moench) [Soya or soja]. 5(48):19-20. June. 2nd Series. [Spa]

• **Summary:** Contents: Introduction and history of the soybean (“it is also called ‘soya’”), with its extension in the United States. Climate. Soil. Fertilizer. Inoculation. Varieties widely cultivated in the USA (Biloxi, Peking, Virginia and Wilson Five for hay and ensilage. Ito-San, Manchu, Mandarin, and Tokio [Tokyo] for seed. Hahto for use as a food legume at the table {*legumbre de mesa*}). Uses of the plant: Green manure, forage, pasture (*pastaderos*), hay, green forage. Food products made from the seeds: Flour, oil, soy sauce, cooked whole soybeans, coffee substitutes, soups, soybean roasts or steaks (*soyas asadas*), porridge or mush, soymilk (*leche vegetal*), condensed soymilk, fresh soymilk, casein, confections, soy cheese (tofu; fresh, dry, smoked, or fermented; *queso fresco, seco, ahumado, fermentado*).

Food products: Dry soybeans (*semillas secas*) are used to make soy sauce (*salsa de soja*), cooked soybeans (*sojas cocidas*), coffee substitutes (*sustitutos del cafe*), soups (*sopas*), roasted soybeans (*soyas asadas*), porridge / pap (*gacha*), vegetable milk [soymilk] (*leche vegetal*), condensed milk (*leche condensada*), fresh milk (*leche fresca*), casein (*caseina*), confections or sweets (*dulces*), and soy cheese ([tofu] fresh, dried, smoked, or fermented {*fresco, seco, ahumado, fermentado*}), and green vegetable soybeans (*semillas verdes*) are cooked and canned or served in salads. Enemies of the soybean.

Note 1. This is the earliest document seen (Feb. 2009) concerning soybeans in connection with (but not yet in) Nicaragua.

Note 2. This is the earliest Spanish-language document seen (Oct. 2011) that mentions fermented tofu, which it calls *queso fermentado*.

Note 3. This is the earliest Spanish-language document seen (Oct. 2011) that mentions roasted soybeans / soynuts, which it calls *soyas asadas*.

Note 4. This is the earliest Spanish-language document seen (June 2009) that uses the term *semillas verdes* to refer to green vegetable soybeans.

Note 5. This is the earliest Spanish-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *soyas asadas* (soybean roasts or steaks).

163. Modern Health Products. 1933. Swiss-Kriss, Nu-Vege-Sal, Correcol, Vitana, Meatless, Bouillon, Slim, Nutro-Links (Ad). *California Health News (Hollywood, California)*

1(21):3. Nov. 30.

• **Summary:** “California distributor. Edward Higgins, 133 N. Ave. 50, Los Angeles, California.”

Note: This is the earliest document seen (Sept. 2004) concerning Modern Health Products in Milwaukee. In the upper right corner is the symbol of the NRA (National Rifle Association), with the slogan “We do our part.” Address: Milwaukee, Wisconsin.

164. Hilcrest. 1933. Low price health products (Ad). *Signs of the Times* (Pacific Press, Mountain View, CA; *Seventh-day Adventist*) 60(48):15. Dec. 5.

• **Summary:** “Prepaid prices east of the Mississippi River. For west of the Mississippi add 6 cents per pound.

“Psyllium, best, white, absolutely clean—5 lbs. \$1.30.

“Colon food (lactose and dextrin)—5 lbs. \$2.90.”

“Soy bean foods—oil, flour, sauce, meat substitutes, etc. Send for free list.”

Note 1. In a search of the Seventh-day Adventist electronic archives ([www.adventistarchives.org](http://www.adventistarchives.org)), this is the earliest document seen (Dec. 2013) showing that Hilcrest—or any other Adventist-run small business in the United States—is selling “Soy bean foods.” Note 2. By 1936 this small Adventist company (at the same address) would be named “Hilcrest Health Products.” Address: 120 Carrol. Ave., Takoma Park, DC.

165. **Product Name:** Gud Fud Soya Beans, Soya Loaf, Soya Vegetable Onion Soup, Soya Rice Lunch, Soya Sandwich Spread, Soya Vegetable Stew, Soya Vegetable Bologna.

**Manufacturer’s Name:** California Food Kitchens.

**Manufacturer’s Address:** Los Angeles, California.

**Date of Introduction:** 1933.

**Wt/Vol., Packaging, Price:** 1 lb can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** Ad in Harry Finkel. 1933. *Seven Day Trial on Natural Food Diet*. Page 183 contains a full page ad for “Gud Fud ‘Good Food’ Soya Beans,” prepared in the laboratories of California Food Kitchens, Los Angeles, California. It reads: “Be full of life. Have a body aglow with good health. Gud Fud soya bean products mean the ultimate in nutrient constituents. Gud Fud products are high in protein—rich in vitamins. They contain the mineral salts the body needs and are sold by all food shops at a price within the reach of all... Endorsed by the Society for Public Health Education.” An illustration shows a can of Gud Food Soya Beans.

Note: This is the earliest known commercial soy-based meatless sausage.

• **Summary:** This manual of food reform discusses the importance of a simple vegetarian diet of natural foods, sunlight and sunbaths, fresh air, pure water, exercise and rest. Also talks about acid and alkaline foods, the influence of mind on health, the failure of synthetic foods, why refined sugar is injurious, the dietetic value of sea plants, table salt is unnecessary and harmful, fruit is man’s best food, sulphured and unsulphured fruits, nut butters, food preparation, and the treatment of disease.

“Dedicated to my dear wife, Lillian, who through her sincere and earnest spirit of cooperation has greatly assisted the author in his work of food reform.”

The germ theory of disease has not been proven since potentially harmful germs are omnipresent yet often fail to harm healthy individuals (Pasteur was a chemist and laboratory worker, not a physician. Germ action is always secondary; “when germs invade a living organism it is a sign that the organism is enervated and its chemistry perverted.” p. 114-15).

The section titled “‘Meat substitutes’ not essential” (p. 130) states: “Those persons who want to adopt a meatless diet should not look for artificially prepared meat substitutes as a source of protein. A food constituent required in such a limited amount as protein is easily supplied by the various products of the vegetable kingdom. Such combinations as ‘roast vegetable turkey’ or ‘vegetarian steak’ seem to be the result of the belief that meat is a necessary food and must be replaced in some form. Indeed, vegetarians, who live largely on foods in which the protoplasmic cells have been more or less disorganized by prolonged cooking, have very little advantage over mixed eaters.

“All other factors being equal, a judiciously selected meatless diet is far more conducive to health than the usual mixed diet, consisting, for the most part, of animal and starch-bearing foods deficient in alkaline elements. We should understand that the proteins of fruits and vegetables, supplemented by a small amount of the proteins of nuts, legumes (especially soy beans), or dairy products, are fully able to maintain health and efficiency. It is entirely feasible to live on an exclusive diet of fresh ripe fruits and green-leaf vegetables for many weeks and months, thereby purifying the blood and greatly improving the keenness of our senses. In fact, in many pathological conditions such a restricted diet is more helpful than an absolute fast.

“Among the legumes which contain a large amount of protein, the soy bean takes first place. Its protein content, nearly 40%, is higher than that of any other food. Moreover, this protein is of excellent quality, as valuable as the casein of milk; it contains all the essential amino acids. It contains a sufficiency of vitamins A and B, and in this respect it is superior to all seeds. It contains very little carbohydrate, only about 6%, and is practically free from starch. The soy bean fills the place of meat as well as milk in the dietary of many millions of sturdy Orientals; it is destined to become one of the great food staples, not only of this country, but of the world. A number of recipes for the preparation of the soy bean are given in Chapter XXI.”

The section titled “Fruit and nut confections” (p. 133-35) begins: “Fruit and nut confections made without refined sugar and glucose should take the place of candies.” These “sweet-meats”... “should be the only kind of confections allowed to growing children, which have a natural craving for sweets.” Recipes include stuffed dates, date caramels, nut fruitose, carob confection, raisin-nut balls, and honey cocoanut balls. For Nut fruitose: Mix dates, figs, raisins, almonds and walnuts. “Run through a food chopper twice. Press the mixture into a flat pan in a layer about 1 inch thick, let stand overnight, and cut into convenient sizes.” Note: Carque was a pioneer in the development of healthy, natural treats. The last recipe could be considered a forerunner of the less-healthy “nutrition bar” of the 1990s.

The next section, titled “Nuts and nut butters,” states that “salting and roasting greatly impair the nutritive

value of nuts and prevent their proper assimilation. The proteins become coagulated by roasting, and the fats split into glycerine and free fatty acids, while the vitamins are destroyed. Nut butters made from salted nuts should, therefore, have no place in our dietary.” Rather, the peanuts or almonds should be blanched (scalded or parboiled in water or steam). “Since few people, on account of defective teeth, can masticate nuts well enough to be acted upon by the digestive juices, the mechanical emulsification of nuts by means of nut butter mills is quite dispensable.”

The section titled “Melba toast” and “Melbettes” (p. 156) states: “These are delicious dextrinized whole wheat products made by the Cubbison Cracker Co., Los Angeles.” Melbettes are also made from whole rye. “Calavo Melba Toast is another tasty whole wheat product; it contains the natural fruit fat of the California Avocado or Alligator Pear as shortening.”

The section titled “Natural whole rice” (p. 156) notes: “Whole rice, also called brown rice, contains the bran, cuticle, and germ of the cereal. In milling nothing has been removed but the husk and dirt.”

The section titled “The Soy Bean, a Remarkable Food” (p. 158-61) discusses boiled soy beans, soy bean milk, tofu (“it is called by the Chinese ‘the meat without a bone...’ Other preparations of the soy bean, which are but little known in this country, are *natto*, *hamananatto* [*hamanatto*], *Yuba* and *Miso*. The principal use of miso, which is a slightly [sic] fermented mixture of soy beans and rice or barley, is for making soups and for cooking vegetables”), soy sauce, soy bean sprouts, and various recipes.

Under “Boiled soy beans” we read: “The dry beans are best soaked in soft water over night or for at least 20 hours and then cooked with sufficient water in a waterless cooker or Pressure cooker until tender. This may require as much as 2 hours or more, according to the variety of beans used. The best results are obtained if the beans are allowed to simmer rather than boil quickly. Onions, tomatoes, celery, parsley and other seasoning vegetables increase the palatability of the soy bean. A fireless cooker may also be used in preparing soy beans for the table.”

Under “Ready made soy bean products” (p. 161) we read: “As the preparation of the soy bean in the average household is often not convenient, the author has arranged to supply the following products at reasonable prices: Canned Soy Beans, Soy Bean Spread, Soy Bean Stew, Soy Bean Loaf, Soy Vegetable Onion Soup, Soy Bean Vegetable Bologna, Soy Bean Tasty Lunch, to which others will be added in the course of time. These products have met with ready approval, as they fill a long felt want for tasty, nutritious and wholesome vegetable protein foods to substitute meat and dairy products.”

The author’s signature appears at the end of the Preface. Address: Los Angeles, California.

167. Finkel, Harry. 1933. Seven day trial on natural food diet... containing a week's recipes and menus for breakfast, lunch and dinner. Also natural food sandwiches and health drinks. 1st ed. Los Angeles, California: Society for Public Health Education. 182 + [9] p. Recipe index.

• **Summary:** This "2nd ed." appears to be quite similar to the first edition, published the same year with the same number of pages. However some of the unnumbered pages at the rear are different.

A handwritten inscription on a blank page near the front reads: "March 22, 1934. To suffering humanity.

"Health is not an accident. Normal physiological conduct depends on the hygienic and dietetic habits of the individual.

"Nature's laws in relation to health and disease are infallible. Man abuses these laws and suffers disease.

"Natural foods only when properly prepared and combined hold the key to the solution of a healthy humanity.

"Hail-Hail-Hail-to a healthy and civilized humanity!!!

"With compliments from Dr. Harry Finkel, to the University of California at Berkeley."

Contents include: What is meant by natural foods (p. 154). The story of the health food store (p. 155-57). Explanation of general health foods catalog (p. 158-60; incl. Graham flour, soya bean flour, Carque's Wheatose, soy beans, Nut butters {almond, peanut, pecan, cashew, cocoanut}, Carque's mayonnaise, unsulphured dried fruits, meat substitutes {Protose, Nuttose, Nuttolene, Vita Meat, Savory Loaf, Nut Meat, Soya Loaf, Meatless bouillon cubes}, miscellaneous {health candies, carob meal, vegetable gelatine, agar-sea weed gelatine, St. John's bread, poppy seeds, sesame seeds}). How to prepare and cook natural foods (p. 161+; "It is said that because fruits and vegetables have been sprayed with poisons to destroy the insects which infest them, their outer coverings should be removed before eating... if one will wash and scrub them very thoroughly, the danger of being poisoned is removed,..."). The soya bean (p. 178-82).

Concerning the acid and alkaline reaction of the human body. Recently scientists concluded "that the normal or 'mean' of this condition should be fixed at the ratio of 80% alkaline and 20% acid. It is now definitely known that a deficiency in the alkaline reserve, or a marked increase in the acid content leads to many serious diseases." Refer to "Finkelgram No. 26 (A short thesis on acidosis)" to become familiar with the acid and alkaline reactions of various foods.

It "is very fitting to introduce one of the best foods Nature grows for mankind—the Soya bean. Because the Soya bean is practically starch-free, it is not only acid-free but is also one of the greatest aids in neutralizing an existing acid condition of the body and in maintaining the 80-20 balance of the two physiological conditions known as acid and alkaline reactions.

"Of late, scientists have made an extensive study of

this unusual type of natural food, and after making many experiments upon human beings in various stages of health and disease, pronounced the Soya bean one of the best foods of the vegetable kingdom. This they have concluded because of its very high percentage of protein which is by far superior to all animal protein, and also for the reason that it is in a form which is easy of digestion and assimilation. Besides being practically free from starch, they consider it one of the best foods for the human body, and find that it can very satisfactorily take the place of meat in the diet of man.

"The protein content of the Soya bean is nearly twice the amount of the average run of meat, and the remarkable feature of this unique food is that while it ranks extremely high in protein substance, yet its toxic properties are insignificant compared with the large amount of toxic properties all animal foods contain."

"Like many of the leading scientists who believe in the great food value of the Soya bean, so does this author share the same opinion. It is for this reason that he desires to familiarize the public with the many advantages of this nutritious and valuable food.

Health through eating lies mainly in three directions: First, in selecting natural, wholesome foods; second, in preparing them properly; and third, in arranging meals in which the foods are properly combined.

The following 10 menus are examples giving you an idea as to how to balance your meal using the various soya bean products. These menus are appropriate for either lunch or dinner as each of them is sufficient for a full course meal."

"Soya bean menus." These are not recipes, but menus for individual meals, each of which includes a soy recipe. The first, for example, reads: "Soya vegetable-onion soup. Finkel baked potatoes. Red cabbage, apple, and raisin salad with mayonnaise dressing. Sewed prunes. Cereal coffee. No bread."

"Soy beans are mentioned on page 74. Ads on unnumbered pages in the rear: Page 2. "Carque-Natural Foods of California: The symbol of trustworthy and unimpaired natural foods. Wheatose. Almond butter. Otto Carque. Established 1908. California's natural foods pioneer. 1315 S. Maple Ave., Los Angeles, Calif. Endorsed by the Society for Public Health Education."

168. Madison Food Co. 1933? Madison soy cheese. Madison, Tennessee. 6 p. Undated.

• **Summary:** Contains a brief introduction to tofu with 8 American-style tofu recipes. "The principal protein of the Soybean is much like the protein casein of milk, and when the bean is properly treated a milk quite comparable in

appearance, taste, and food value can be manufactured from it. From this milk, when allowed to become acid, or when a slight amount of a precipitating agent is added, a cheese can be prepared in consistency much like cottage cheese. This vegetable cheese (tofu) has been one of the principal articles of diet in the Orient for many centuries.

“In order that the people of America may have this most important food as an article of diet, a method of manufacturing and preserving has been perfected at the Madison Food Factory.

“For several years it has been used as a daily article of diet in the Madison Rural Sanitarium, Nashville Vegetarian Cafeteria, and many other Good Health places. It has proven its value as a diabetic food, and as a splendid meat substitute.”

Tofu recipes include: Soy cheese salad. Stuffed egg with soy cheese. Tomato soy sandwich. Soy sandwich filling. Soy croquettes. Soy cheese loaf. Soybean omelet. Soybean cutlets.

On the back panel is a list of “Health foods manufactured and distributed by Madison (Sanitarium) Food Company, Madison, Tennessee: Nut Meat, Vigorost, Peanut Butter, Fruit Sticks, Sterilized Bran, Psyllium Seed, Cereal Drink, Soy Flour, Soybeans (Dry), Malta (Malt Syrup), Soy Fruit Crackers, Soybeans (Canned with Tomato Sauce), Madison 3 Minute Breakfast Wheat, Sanitarium Baked Beans, Steamed Whole Wheat, Malted Breakfast Crisps, Whole Wheat Fruit Crackers, Sweetened Whole Wheat Crackers, Soybeans (Canned Plain), Soy Cheese (Bean Curd), Madison Fruit Candy, Regulose (composed of Lactose and Dextrine). Write for descriptive literature.”

Note 1. The company is now named “Madison Food Company.”

Note 2. Many of Madison’s publications about its foods are undated; this makes it very difficult to determine when a specific food was first made and sold commercially. Address: Tennessee.

**169. Product Name:** Loma Linda Smoteen, and Smotone.

**Manufacturer’s Name:** Loma Linda Food Co.

**Manufacturer’s Address:** Loma Linda, California.

**Date of Introduction:** 1934 April.

**New Product–Documentation:** Ad in *Health* (Mountain View, California). 1934. April. 1(1):33. “The Way to Health. Loma Linda Foods. Carefully Consider Your Diet.” The text reads: “Build a nonstimulating diet... Proteena and Nuteena, Smotone and Smoteen—to be used like meat.”

**170. Product Name:** La Sierra Soy Loaf (Meat Substitute).

**Manufacturer’s Name:** La Sierra Industries.

**Manufacturer’s Address:** Arlington, California.

**Date of Introduction:** 1934 June.

**Wt/Vol., Packaging, Price:** 8 oz can.

**New Product–Documentation:** Ad in *Health* magazine.

174. Madison Health Foods. 1934? Vegetable milk and cheese. How they are served. Manual No. 2. Madison, Tennessee. 21 p. Undated. 22 cm.

• **Summary:** Contents: Introduction. Composition of the soybean. Soybean—A food for infants. Salads: How to make a perfect salad (20 recipes, including 11 with soy cheese [tofu] and 7 with grated soy cheese): Tomato, pineapple, cheese salad (with grated soy cheese). Jellied soy salad (with grated soy cheese). Waldorf cheese salad (with grated soy cheese). Raisin and soy cheese salad (with grated soy cheese). Almond and soy salad (with grated soy cheese). Sliced fruit and cheese salad (with soy cheese). Soy peach salad (with

grated soy cheese). Tomato and soy salad (with soy cheese). Baked apple with soy sauce (with grated soy cheese). Pineapple and cheese salad (with grated soy cheese). Apple, carrot and soy salad (with grated soy cheese). Soybean salad (with whole soybeans). Soybean sprout salad (with soybeans sprouted until the sprouts are about 2 inches long). Cold sliced curd (with thin-sliced soy cheese). Potato soy salad (with grated soy cheese). Stuffed egg with soy cheese. Vegetable soy salad (with grated soy cheese). Cheese, cantaloupe, and tomato salad (with grated soy cheese). Mock chicken salad (with grated soy cheese). Pea soy salad (with grated soy cheese).

Sandwiches (9 recipes, incl. 5 with soy cheese and 4 with grated soy cheese; one recipe uses Vegex). Cooked vegetable dishes with soy cheese (40 recipes, all use soy cheese except 2 which use soybean puree). Other soy dishes (3 recipes). Desserts (1 recipe for Soy cream custard, with soy milk). Diabetic foods (4 recipes, each using soy meal [flour]). Soups (5 recipes, using soybeans, grated soy cheese, and soy milk or soybean milk). Breakfast dishes (4 recipes, using canned soybeans, soy meal, or grated soy cheese).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "grated soy cheese" to refer to grated tofu.

On the last page (inside rear cover) are listed "Products for sale by Madison Health Foods Inc. (Madison, Tennessee): Soy cheese, 14 or 30 oz. Soy beans, 14 or 30 oz. Soy milk, 14 or 30 oz. Soy meal, 5 or 10 lb. Also many other health products. Write for information and prices."

Two photos on the cover show: (1) Students at work inside the Madison food factory, with two long tables and a retort cooker. (2) Various food products made by the company.

Note 2. Although this booklet is undated, the two photos on the cover appear in the *Madison Survey* issue of 14 March 1934 (p. 31). Address: Madison, Tennessee.

175. *Argus (The) (Melbourne, Victoria, Australia)*. 1935. Adventists in camp: Rise early, dine cheaply. Jan. 18. p. 11.

• **Summary:** "Seventh Day Adventists in camp at West Preston are early astir. The rising bell is run at 6 a.m."

"Meals are cheap. Foods are obtainable at 1d. and 2d. a portion and a good dinner may be purchased for 9d. There is no meat and no tea in the diet. A typical menu is as follows—Savoury soup, macaroni, and nut meat, potato pie roast and mashed potatoes, cabbage, parsnips, and parsley sauce, beetroot, soja beans, steamed bread pudding, and creamed rice."

176. Dittes, Frances Linda. 1935. Food for life: The art and science of preparing food. Madison, Tennessee: Associated Lecturers, Inc. xii + 332 p. Spring. Recipe index. 23 cm.

• **Summary:** This early Seventh-day Adventist vegetarian cookbook contains more soyfoods recipes than any published

up to this time. The author, a soyfoods pioneer born in 1891, first attended Madison College in 1910 and joined the faculty in 1912. She did her graduate work in nutrition, specializing in soyfoods nutrition, at George Peabody College for Teachers (in Nashville, Tennessee), from which she received her MA degree in 1929. This book was printed by the “Rural School Press” (Madison College’s school press) and published in the spring of 1935.

Contents: Part I: Food and nutrition. Milk. The acid-base balance. Fruit acids. Balancing the food. Measuring food values. Menu planning. The art and science of food preparation (preceded by this quotation: “Food will be the medicine of the future”—Harvey W. Wiley). Food combinations. Condiments. Suggestions for flavoring. Garnishings. Measurements. Part II: Recipes (listed by recipe type such as breads {some recipes call for Crisco shortening}, soups, salads, desserts, etc.). One chapter titled “Dishes to take the place of flesh foods” (p. 149-65) contains many interesting recipes such as: Preparation of gluten. Gluten pot pie. Gluten loaf. Glutose (with 5 cups ground cooked gluten, plus potatoes, eggs, and cream). Cold sliced Nut Meat or Vigorost (Nut Meat is sold in 2-lb cans, Vigorost in 14 oz cans). Peanut roast. Chow mein (with soy cheese or Nut Meat). Boiled peanuts. Soy-related recipes are given below. Another chapter is “Nutritive value of the soy bean. Soy bean dishes” (p. 166-86).

Appendixes: A. Classification of carbohydrates. B. Canning. C. Sample menus. D. 100 calorie portions of foods. E. Approximate servings and values of a few common foodstuffs. F. Protein, calcium, phosphorus, and iron in 100 calories of food material. G. Ash constituents of foods in percentage of edible portion.

The author uses the term “soy cheese” to refer to tofu. Soy-related recipes include: Soy bread (20% soy flour and 80% white wheat flour; p. 96). Soy gems (18-20 muffins using soy flour; p. 108). Tomato-soy sandwich (with grated soy cheese; p. 114). Soy noodle soup (with grated soy cheese browned in butter; p. 122). Jellied soy salad (with grated soy cheese; p. 138). Potato soy salad (with grated soy cheese; p. 138). Tomato and soy salad (with soy cheese). Waldorf soy cheese salad (with grated soy cheese; p. 139). Lentil-soy loaf (with soy bean puree; p. 157). Savory soy loaf (with soy cheese). Soy souffle (with grated soy cheese browned in butter; p. 159). To fu chi (deep-fried soy cheese stuffed with rice and seasoned with soy sauce). Soy gravy (with 3 parts soy flour and 2 parts white wheat flour).

The chapter titled “Nutritive Value of the Soy Bean” (p. 167-86) discusses the general nutritional composition, then gives details on protein, fats (including lecithin), minerals (including tofu made with magnesium chloride or calcium sulphate). Recipes are given for: Cooked soy beans. Soy milk (after soaking 1 lb of Mammoth variety soy beans overnight in water, “Wash several times in hot water to remove undesirable taste.”). Soy milk no. 2. Soy acidophilus

milk. Soy bean cheese [tofu, curded with calcium sulphate]. Soy bean cake [okara] loaf. Browned soy cheese. Green soy beans. Escalloped green soy beans. Dried soy beans. Baked soy beans. Soy beans southern style. Roasted soy beans. Soy beans in tomato sauce. Chop suey (with soy cheese). Sauce (with soy sauce). Soy bean omelet. Lentil soy bean loaf (with soy bean puree). Soy bean loaf. Soy bean pie (with soy bean pulp). Soy bean meat.

Note 1. This is the 2nd earliest English-language document seen (June 2013) that calls for okara as an ingredient in a recipe.

Note 2. This is the earliest English-language document seen (June 2013) that uses the term “Soy bean cake” to refer to okara.

\* = made with soy bean flour. Soy bean muffins\*. Soy muffins\*. Soy biscuits\*. Soy bread\*. Soy nut bread\*.

Escalloped onions with soy cheese. Baked rice with soy cheese. Escalloped potatoes with soy cheese. Spaghetti and soy cheese. Stuffed pepper with soy cheese. + = with soy cheese. Left-over croquettes+. Soy croquettes+. Soy cheese with rice. Stuffed baked potato with soy cheese. Soy fritters+. Soy cutlets+. Savory soy loaf+. Spanish chop suey+. Soy souffle (with grated soy cheese browned in butter). Cream of soy soup. Soy noodle soup+. Soy soup+. # = made with soy milk. Soy cream of tomato soup#. Soy cream of pea soup#. Soy cream custard#. Jellied soy salad+. Waldorf cheese salad+. Potato soy salad+. Stuffed egg with soy cheese. Soy bean salad. Soy bean sprout salad. Soy Vegex sandwich+. Tomato-soy sandwich+. Egg and soy sandwich+. Soy and cucumber sandwich+. Celery and soy sandwich+. Banana soy sandwich+. Scrambled egg and soy cheese sandwich. Diabetic crackers (with soy meal). Diabetic pie crust (with soy meal). Diabetic soy bean mush\*.

Vegetables: Soy cheese sauce (with grated soy cheese and soy sauce, p. 195). Steamed cucumbers with soy cheese (grated, p. 201). Escalloped onion with soy cheese (p. 204). Spinach with soy cheese sauce (and Vegex, p. 207).

Desserts (p. 215-36), Cakes (p. 237-53), Pies (p. 255-60), Cookies (p. 261-68), and Ice creams and sherbets (p. 269-74). Some of these sweet recipes use agar-agar, gelatin, Malta (malt syrup), Health Koko, and Crisco. Some desserts call for 1-2 cups sugar per 4 servings and 1 pound of sugar is used in an icing for pound cake (p. 242). No soy is used in any sweet recipes. Note: It is surprising that Ms. Dittes and Madison had not discovered the use of tofu or soy milk in ice creams, other desserts, or dressings. Nor is peanut butter mentioned.

The chapter titled “Milk” (p. 17-21) states: “Since milk is an important food constituent, especially for children, those responsible for planning dietaries should see that each child has one quart of clean milk or its equivalent each day; adults, about one pint... *Grade A* is a raw milk from cows free from disease, having a bacteria count of not more than 100,000 per cubic centimeter at the time of delivery. *Grade B*

must be pasteurized and the bacteria count must not exceed 1,000,000 per cubic centimeter. It must also come from cows free from disease.” All other milk is Grade C.

The chapter titled “The acid base balance” (p. 23-24) states: “Most foods when burned in the body leave an ash in addition to the carbonic acid which is thrown off by the lungs. This ash may be either alkaline, neutral, or acid in reaction. The principal base-forming (alkaline) elements are calcium, potassium, magnesium, and sodium, while the chief acid-forming elements in foods are sulfur, phosphorus, and chlorine... A neutral or slightly alkaline condition will produce a feeling of buoyancy, health, vigor, and clear mental activity... In general, all fruits and vegetables (with a few exceptions) are potent in producing alkaline ash. Meat, eggs, breads, and cereals are acid-formers.”

The chapter titled “Condiments” (p. 51-52) states: “Spices, such as mustard, ginger, pepper, horseradish, curry, and cloves, are among the most irritating of the seasonings used. It would be better if these exciting substances were not added to the food... Vinegar contains acetic acid which is burned in the body with difficulty. Citric acid as found in the lemon juice is more easily oxidized in the tissues. Lemon juice, therefore, makes a good substitute for vinegar, both as to ease of oxidation and flavor.” Address: Director, Food and Nutrition, Nashville Agricultural Normal Inst., Madison Rural Sanitarium and Hospital, Madison, Tennessee.

177. Lager, Mildred. 1935. Food facts. Los Angeles, California: House of Better Living. 228 + 10 p. No index. 23 cm. [34 ref]

• **Summary:** Contents: 1. Purpose of food. 2. Classes of food. 3. Natural foods are best. 4. Acid-alkaline balance. 5. Minerals. 6. Vitamins. 7. Proteins. 8. Carbohydrates. 9. Fats. 10. Fruits. 11. Vegetables. 12. Beverages. 13. Better cooking. 14. Food combinations. 15. The mental side of health. 16. What is the “House of Better Living.”

Pages 67-68 contain a very positive section on soy beans and foods made from them, including whole soybeans, “curd cheese, resembling cottage cheese [tofu], and soy bean milk... Other soy food products are soy butter [no description is given; this is probably soynut butter from T.A. Van Gundy’s La Sierra Foods, but it could be margarine made from soy oil], soy loaf (combined with gluten), soy sandwich spread, soy bologna, soy oil, soy sauce, soy ready-to-serve breakfast foods, coffee substitute, as well as soy flour. Soy flour is yellow and fluffy, and can be used in all baking... Soy macaroni, noodles, spaghetti, bread, and pancake flour are also on the market. Soy beans are also sugar coated for candy and toasted as peanuts. They are a wonderful food for animals and have been used in that way in this country for years. Today the governments of Europe and America are devoting a great deal of attention to the soy bean as human food and the next few years will see an increased consumption, as well as many new soy products.”

Page 75 contains a nutritional analysis of soy beans.

In the chapter on Acid-alkaline balance (p. 22-25), foods with the most acid ash are egg yolk and oysters, followed by eggs, most fish and meats. Foods with the most alkaline ash are lima beans, string beans, dried beans, spinach, raisins, figs, dates, and dried milk, followed by soy beans, soy bean tea, and most vegetables. The author believes that one should keep an alkaline balance in the body. Sleep is a great alkalizer.

The subsection titled “Lima beans: states: “Dr. Sansum of Santa Barbara was instrumental in having lima bean flour made, and Bill Baker of Ojai, California pioneered this field, developing the original lima bean bread and lima bean pancake flour.”

This is not a vegetarian book. Meat and dairy products are discussed at length, and their consumption is not discouraged. However this is the earliest book seen that uses the term “natural foods” prominently—in this case as a chapter title.

Also discusses (see index for page numbers): Acidophilus milk, alfalfa (alfalfa tea has alkaline ash, p. 35), almonds, almond oil, aluminum, avocado, bran, carob beans, chufas, cottonseed, cottonseed oil, garbanzas, kephir, lentils, lima beans, linseed, margarine / oleomargarine, olive oil, olives, palm oil, palm kernel oil, peanuts, peanut oil, rape seed oil, sago, sesame oil.

Note 1. This is the earliest document seen (Sept. 2009) concerning Mildred Lager and soy.

Note 2. This is the earliest document seen (Jan. 2014) that contains the term “soy food products.”

Note 3. This is the 2nd earliest document seen (July 2005) that mentions a food or drink product (“alfalfa tea”) made from alfalfa. This is also the earliest English-language document seen (July 2005) that contains the term “alfalfa tea.” It was used for its alkaline ash. Address: House of Better Living, 1207 West 6th St., Los Angeles, California. Phone: Mutual 2085.

178. La Sierra Industries. 1935. Soy bean products, “La Sierra Brand”: Complete protein, low starch, high alkaline ash (Ad). *Health (Mountain View, California)* 2(9):31. Sept. • **Summary:** Ad for canned soybeans (plain with tomato sauce), soy loaf, soy spread, soy bologna, soy breakfast food, soy milk, soy cheese [tofu], soy butter [like a soynut butter, non-hydrogenated], Soy-Co (beverage), Smoein (flavor), soy flour (raw), soy flour (processed).

Note: Neither Mamenoka, noodles, nor oil are mentioned. Address: Box 203, Arlington, California.

179. **Product Name:** La Sierra Soy Bologna (Called Soy Vegetable Bologna by 1936).

**Manufacturer’s Name:** La Sierra Industries.

**Manufacturer’s Address:** Campus and Maitland, Box 203, Ontario, California.

**Date of Introduction:** 1935 September.

**Wt/Vol., Packaging, Price:** 8 oz can.

**New Product–Documentation:** Ad in Health magazine. 1935. 2(9):31. Sept. “Soy Bean Products, La Sierra Brand: Complete Protein, Low Starch, High Alkaline Ash.” House of Better Living Catalog. 1936. March. p. 9. 8 oz. can for \$0.15. Ad in Dorothea Van Gundy. 1936. La Sierra Recipes. p. 46. L.B. Breedlove. 1936. *Chicago J. of Commerce and La Salle Street Journal*. June 25. p. 14. “Soy bean—The magic plant. Article XI.” “La Sierra Industries, Ontario, California: Meat substitutes.”

180. **Product Name:** Granose Rissol-nut: Savoury Nut Mix.

**Manufacturer’s Name:** Granose Foods Ltd.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1935.

**Ingredients:** Cashew nuts, wholewheat flake, wheatmeal flour, rusk, onion, soya nuts, salt, herbs, spices.

**How Stored:** Shelf stable.

**New Product–Documentation:** *The British Vegetarian*. 1960. Sept/Oct. p. 249. Granose produces Rissol-Nut in packets, and this can be quickly made up into savouries, roasts, and pasties.

Manufacturer’s catalog. 1980. April. “A ground mixture which with the addition of water is ready for making into all types of rissoles, grills, roasts, and pasties.”

Note: Pasty (plural = pasties) is a British term (pronounced like the word *nasty*) that refers to a small meat pie or turnover. The term, first used in the 14th century, is derived from the word *paste* meaning dough.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1935. But a note says “Not Applicable.” This product does not contain any soy products and is still on the market. The ingredients are now peanuts, rusk, Wholewheat (wheat, sugar, salt, malt), wheat flour, salt, onions, herbs, spices. Label sent by Granose. 1990. July 11. Red, yellow, black, and white box. Soynuts are no longer an ingredient.

Note: This is the earliest known commercial soy product made by Granose Foods Ltd., which is presently (Dec. 2013) owned by the Haldane Foods Group Ltd.

181. Battle Creek Food Co. 1935? Appetizing health food recipes and menus. Battle Creek, Michigan. 25 p. Undated. Illust. 15 x 17 cm.

• **Summary:** On the cover of this booklet is a 3-panel illustration of a family seated at the table enjoying a meal; the daughter is in the left panel, the wife and husband (with suit and necktie) in the center, and the young son (also in suit and tie) in the right panel. The booklet promotes and shows how to use the vegetarian food products made by Battle Creek Food Co.

Contents: The story of Battle Creek Health Foods (and

its free diet service). Where these recipes are triple tested (the company’s modern test kitchen). Dinner menus and recipes (p. 4-7). Luncheon and tea menus and recipes (p. 8-11). Breakfast menus and recipes (p. 12-15). Reducing menus and recipes (p. 16-17). Wholesome diabetic foods (p. 18). Brawn-building menus and recipes (p. 19). A brief description of Battle Creek Health Foods (p. 20-21). Health candies (p. 22).

On almost every page of recipes is an illustration of one of the company’s products in its container/package, and in a prepared dish, followed by a description of each product on p. 20-21. The only two soy-related products are “Soy Biscuits—Best bread for diabetics. Contains less than 2% starch but is rich in protein and strength-building elements. (Also furnished in the form of a meal).”

Other products are: Agar (made from Japanese seaweed). Almond butter. Bran biscuits. Cooked bran (from wheat). Bran gluten flakes (crispy toasted breakfast cereal). Branola (hot cereal). Fig and nut bromose (with malt honey). Brose (hot cereal with dates, figs or raisins, and cream). Sanitarium canned fruits and vegetables. Chocolate nut bar. Cooked whole wheat. Fig bran. Fig bran flakes. Food ferrin (supplies dietary iron from green vegetables). Fruit crackers. Gluten bread (Low in starch, shipped in air-tight cans, ready to eat. A healthful reducing food). Gluten biscuit (40%, containing less than half the starch of ordinary bread; fine for diabetic patients). Gluten flour. Graham crackers. Health chocolates. Health koko. Kaffir tea (caffeine free). Lacto dextrin. Laxa (a biscuit with bran and agar). Malted nuts (increases the flow of milk in nursing mothers). Marmalades. Meltose (a malt sugar made from grains). Minute brew (A caffeine-free cereal beverage). No-fat (for use in place of butter). Nuttolene (“A nut meat product having the consistency of cream cheese. Makes healthful croquettes, cutlets, and stews”). Oatmeal wafers. Paralax with agar. Paramels. Peanut butter (made from steamed rather than roasted peanuts to make it easier to digest). Preserved figs. Protose (“The vegetable meat—makes savory sandwiches, salads, meat pies, and roasts. Rich in iron, lime and protein for body-building”). Psylla. Ripe olives. Savita (“A vegetable [yeast] extract with a rich, meaty flavor, excellent for soups and gravies, Rich in vitamins, and wonderful for blood-building”). Sal-Savita (A vegetable seasoning with a meat-like flavor). Savita-yeast (new yeast with a rich meaty flavor). Starchless bran. Toasted rice flakes. Tomato soup. Vegetable gelatin. Vegetable soup. Vitamet (A savory vegetable meat that is rich in Vitamin B and food iron). Vita wheat (creamy hot cereal). Whole wheat cream sticks. Whole wheat flour. Whole wheat wafers. ZO (“The vitamin breakfast food, ready to eat with cream and sugar. Made from whole wheat and barley and enriched with Savita... Supplies the daily vitamins and minerals”). Zwieback.

182. Battle Creek Food Co. 1935? How to make savory roasts, steaks, croquettes without meat: Protose—A vegetable meat (Leaflet). Battle Creek, Michigan. 4 panels each side. Each panel: 16 x 8½ cm. Undated.

• **Summary:** Printed with brown and light orange on white. Contents: A brief history of Battle Creek Sanitarium Health Foods. Protose: A substantial food around which you can build your menu (2 panels; "Here is one of the most interesting of all the Battle Creek Health Foods..."). Six recipes using Protose. About Savita with 1 recipe. Send for "Healthful Living" (60 p. book).

Photos show: (1) On the front panel: A young lady in a white apron slicing a casserole containing Protose. (2) Three prepared Protose dishes. (3) A can of Protose. (4) Inside: The huge Battle Creek Sanitarium. (5) The huge Battle Creek Food Co. (5) The front cover of a 60-page book titled

*Healthful Living.*

"A brief history of Battle Creek Sanitarium Health Foods: Battle Creek Sanitarium Health Foods were first made in 1899 for patients at the Battle Creek Sanitarium. Such Satisfactory results were obtained that soon outside demand made it advisable to stock them in leading grocery, drug, department and health food stores.

"At present there are over 100 Battle Creek Health Foods, including several groups covering almost every phase of diet—tasty vegetable meats, whole grain cereals, health confections, foods for the reducing diet and laxative diet, others for blood building, with a large assortment for diabetic and other conditions.

"Protose: A substantial food around which you can build your menu. Here is the most interesting of all the Battle Creek Health Foods.

This leaflet was apparently printed for an exposition in San Diego, California. At the bottom of the back panel

## A BRIEF HISTORY OF BATTLE CREEK SANITARIUM HEALTH FOODS

*The Battle Creek Sanitarium*

**B**ATTLE CREEK SANITARIUM Health Foods were first made in 1889 for patients at the Battle Creek Sanitarium.

Such satisfactory results were obtained that soon the outside demand made it advisable to stock them in leading grocery, drug, department and health food stores.

At present there are over 100 Battle Creek Health Foods, including several groups covering almost every phase of diet—tasty vegetable meats, whole grain cereals, health confections, foods for the reducing diet and laxative diet, others for blood building, with a large assortment for diabetic and other conditions.

*The Battle Creek Food Company*

Here are foods of highest quality supported by recognized authority and having a background of forty years' use that has met every test.

### • • PROTOSE LOAF • •

1 pound Protose	½ cup crumbs
1 onion	1 tablespoon Savita dissolved
2 eggs	in ½ cup hot water
Cheese — yellow	

Mash the Protose, stir all ingredients together, roll into loaf and place in pan. Place thin strips of yellow cheese across the top. Bake in moderate oven until brown. Serve with Savita Brown Gravy.

### • ROAST PROTOSE WITH BROWN POTATOES •

1 pound Protose	12 boiled potatoes
1 quart brown gravy	Butter

Remove Protose from can by first removing both ends of can. Cut the Protose in half lengthwise and make eight slices of each half. Arrange in buttered pan and cover with Savita Brown Gravy. Dip boiled potatoes in melted butter and arrange around the Protose. Bake in hot oven until potatoes are nicely browned.

### PROTOSE VEGETABLE SALAD

½ cup chopped carrots	½ cup chopped Protose
1 cup chopped celery	Salt
¼ chopped green pepper	Mayonnaise

Mix the chopped vegetables and add the Protose. Fold in the mayonnaise.

## PROTOSE

### A SUBSTANTIAL FOOD around which YOU can build Your . . . . MENU

**H**ERE is one of the most interesting of all the Battle Creek Health Foods, and it deserves a place on every table because of its goodness. It is different from so many others in that it is a protein food serving the same purpose in the diet as meat, milk and eggs. Protein is that part of the daily food supply which contains the needed building material. It is essential for growth and replaces the tissue wear which results from one's daily work. The growing boy or girl, the laborer, and all who indulge in vigorous exercise need an extra measure of protein. With a few cans of Protose in your pantry, the protein part of the daily bill of fare is assured. It is a most delicious food with flavors which appeal to everyone, and at the same time

lends itself to the preparation of a great variety of dishes.

Protose is made from the grains of choice nuts. It may be served cold just as it comes from the can but more often appears in the form of roasts, steaks, salads or a filling for sandwiches.

Protose is a substantial food containing materials needed for the heavier part of the diet. While it is easily digested and can be managed by the indoor worker of sedentary occupation, it supplies at the same time the sturdy staying qualities required by those leading a strenuous, active life.

Protose is an excellent food for those who cannot use meat.

You will enjoy the rich, meatlike flavor of Protose, and will find it a welcome addition to your regular food supply. Its convenience, wholesomeness and economy will appeal to you. It is not only a dependable source of protein but stands high in food minerals containing double the amount of iron found in meat dishes, five or six times as much lime, with appreciable amounts of vitamin B.

# • P R O T O S E •

## A VEGETABLE MEAT

is printed in large bold letters: "Vegetarian cafeteria. Battle Creek Section. California Pacific International Exposition. San Diego, USA. Palace of Foods and Beverages."

Note: This Exposition was held in 1935-36 at San Diego's Balboa Park. It opened on 29 May 1935 and closed on 9 Sept. 1936. Address: Battle Creek, Michigan.

183. *Good Health (Battle Creek, Michigan)*. 1936. The world famine. 71(2):48-49. Feb.

• **Summary:** "For the four hundred millions of China and several other hundreds of millions in the Far East, that most marvelous of food plants, the soy bean, supplies an abundance of protein and fat of the finest quality, far superior to the proteins and fats of flesh meats, and wholly free from the loathsome parasites, trichinae, tapeworms, etc., and the filthy colon germs which swarm in fresh meats of all sorts.

"From an economic standpoint, the soy bean offers

not only a more than complete substitute for meats, but salvation from the great economic evils to which flesh eating inevitably leads, evils so mischievous that they threaten destruction to the race by making the world uninhabitable." "The soybean contains 40 per cent protein of higher quality than that of the choicest meats. Its easily soluble protein resembles that of milk, and is more easily and quickly digestible. The proteins of the soy bean are of the basic or alkali-ash sort, while those of eggs and meat are acid-ash and so tend to cause acidosis, an evil to which the physiologic chemists have for many years been calling attention. This makes the soy bean a curative food instead of a cause of disease.

"In the market one can buy protein in the form of soy beans at one cent a pound, whereas protein in the form of meat costs from \$1.00 to \$2.00 a pound"

The "soy bean also improves instead of impoverishing

the soil. Its roots gather nitrogen from the air and so enrich the soil.

“The soy bean, which in the Orient fills in the diet the place of flesh, fish, fowl, eggs, milk, butter, and cheese, and suffices for infants as well as for adults, is beginning to receive some attention in this country. An excellent flour is now being made which, added to ordinary wheat flour, greatly improves the loaf in nutritive values, and at the same time improves its flavor and keeping properties.

“Condensed soy milk in tin cans is also now being made and various other most wholesome products, the use of which enables one, if he chooses to do so, to exclude all animal products from his dietary and not only without loss but with an actual gain.”

184. Lager, Mildred. 1936. *The House of Better Living Catalog*. Los Angeles, California: Published by the author. March. 14 p. March. 28 cm. Second expanded edition, March 1938.

• **Summary:** On the front cover is a large illustration of the exterior of the House of Better Living, and a 4-stanza poem about the House by Mildred Lager. Below the poem we read: “Catalog. The most unusual store in Southern California. Owned and operated by Mildred Lager, food economist, author, and radio lecturer.”

The first section, titled “The origin of the House of

Better Living!” (p. 1) begins: “Is it fate? Often the handicaps and obstacles that we have to overcome lead us into our life work, help us to find ourselves. A few years ago a young school teacher was forced to give up her chosen profession because of arthritis deformans. It was a severe obstacle to overcome, but it was that experience that led Mildred Lager into the study of foods and their relation to health, and led to the founding of the House of Better Living. No one *has* gained recognition as rapidly as Miss Lager. In a little over two years she has won her place among the ‘leaders,’ has received both national and international recognition, and has established the House of Better Living as an institution in Southern California... Her perfect radio voice reaches thousands who cannot attend her classes.

“Miss Lager is teaching the ounce of prevention, the health insurance that pays dividends in years of health and happiness. Her slogan is that Pure Air, Pure Water, Pure Food and Constructive Thought plus exercise and sunshine build health.

“The House of Better Living is more than a Health Food Store. It is a bureau of food information and a place and means where Miss Lager can conduct her classes free of charge—and *that* is her goal. Two years ago it seemed an impossibility—very few thought it would ever succeed. They did not know the sincerity and the spirit behind it... It is but two and a half years old. We cannot predict its future nor that of its charming founder—we can only wait and see, knowing that achievement and not time is the measure of success.—By one who has watched the growth from the start.”

At the top of page 2 in large letters: “The House of Better Living offers you: 1. The best of natural foods at reasonable prices. 2. Free delivery of all \$3.00 orders in Los Angeles. 3. Free cooking classes every Wednesday afternoon at 1:30. 4. Food classes Monday and Thursday afternoon at 1:30 (except during June, July and August). 5. Miss Lager’s Radio talks every Monday, Tuesday, Wednesday and Thursday morning at 7:45 over KFAC.”

Product categories and products mentioned include: Coffee substitutes (Soyco, Hollywood Cup, Breakfast Cup, Ficgo, Sipp). Broths (Vegebroth, Vegemineral Broth Concentrate, Hauser’s Meatless Bouillon). Nut butters—Freshly ground (Soy Bean Butter, Almond butter, Cashew butter, peanut butter—dextrinized). Whole grain flour, meal, etc. (Soy Bean Flour, Bill Baker’s Prepared Lima Bean Pancake or Waffle Flour, Bill Baker’s Prepared Soy Bean Pancake or Waffle Flour {2 lb for \$0.30}, whole wheat flour, wheat germ, bran, buckwheat flour, dextrinized flour, gluten flour, breakfast cereals—to cook {Cubbison’s cracked wheat}). Ready to serve cereals (Soy bean breakfast food, wheat germ). Macaroni, noodles, etc. (Soy bean macaroni, garbanza shells). Legumes (soy bean {imported}, garbanza peas, natural brown rice, sesame seeds). Melba toast, crackers, cookies, etc. (Bill Baker’s Soy Toast {\$0.30/lb}, Cubbison’s Melba Toast, Cubbison’s Melbets, Soy bean

gluten cracker, Cubbison's whole wheat crackers, Cubbison's Whole Wheat Dunkeretts, Cubbison's wheat soda cracker, Cubbison's honey wheat cookies, Cubbison's Melba cookies, Soy bean wafers, soy bean macaroons, Bill Baker's 100% Soy Bean Fruit Cookies {\$0.18/dozen}, Bill Baker's 100% Lima Bean Fruit Cookies {\$0.18/dozen}, Olson's soy bean bread, sliced {\$0.12}, Bill Baker's soy bean bread—unsliced {\$0.16}, Bill Baker's Lima Bean Bread, unsliced {\$0.16}). Natural aids (Agar, flaxseed, psyllium, Burbank kelp, kelp, Green kelp, Santay sea greens). Oils (Soy bean oil, sesame oil, Lindsay Cold Pressed California Oil). Meat substitutes (11 products, 5 with “Soy” in the name, such as Soyatose). Soy bean products (25 products! Makers incl. La Sierra, Loma Linda, etc.).

The 27 different soy products are: La Sierra Soy Beans, plain or with tomato sauce; Loma Linda Soy Beans, plain or with Proteena; Soy Beans, imported; Soy Beans, roasted; Soy Bean Loaf (meat substitute); Soy Bean Bologna; Soy Bean Spread; Soy Bean Butter (like peanut butter); Loma Linda Soy Mince Sandwich Spread; Soy Bean Sauce; Soy Bean Milk; Soy Bean Oil; Soy Bean Noodles, Macaroni, and Spaghetti; Soyco (Soy Coffee); Soy Bean Breakfast Food; Soy Bean Sprouts; Soy Bean Flour; Bill Baker's Prepared Soy Bean Pancake or Waffle Flour; Bill Baker's Soy Bean Bread; Olson Soy Bread (sliced); Bill Baker's Soy Toast; Bill Baker's Soy Bean Fruit Cookies; Soy Bean Macaroons; Soy Bean Wafers; Soy Bean Gluten Crackers.

Photos show: (1) A portrait of Mildred Lager smiling (p. 1). (2) Mildred conducting a free cooking class in her kitchen at The House of Better Living. Many men and women, all wearing hats, are seated around the perimeter of the kitchen (p. 6-7). (3) Packages of various “Bill Baker's Soy & Lima Bean Products” including Lime Bean Wafers, Pancake Waffle & Biscuit Lima-Bean “Neat Flour,” Lima Bean Toast, Pancake Waffle & Biscuit Soya-Bean “Neat Flour,” Lima Bean Bread, and Soy Bean Bread” (p. 10).

A small ad (3½ by 2¼ inches, p. 6) by the Cubbison Cracker Co. (3417-19 Pasadena Ave., Los Angeles, California) states: “Dextrinized and whole wheat products: Melba Toast, Melbetts, Cracked Wheat, Whole Wheat Crackers and Cookies.” Note: This is the earliest document seen (June 2004) concerning the work of Sophie Cubbison with soyfoods.

A ¼-page ad (p. 12) titled “Hain 100% pure foods,” describes Vege-Jell Puddings, Mal-Ba-Nuts (a powdered beverage), Potassium broth, and Col-Lax (whose ingredients are: Powdered psyllium, Powdered agar, and lactose). Address: 1207 West Sixth St., Los Angeles, California.

185. **Product Name:** Soyatose (Meat Substitute).

**Manufacturer's Name:** Unknown.

**Manufacturer's Address:** California?

**Date of Introduction:** 1936 March.

**New Product–Documentation:** House of Better Living

Catalog. 1936. March. p. 9. Ben Kahan does not know who made this.

186. *California Health News (Hollywood, California)*. 1936. Africans using flesh substitutes. April 3. p. 8.

• **Summary:** “Glendale–Ethiopia is learning to use meat substitutes. A shipment of several hundred pounds of Savory Loaf, nut and grain product manufactured by Hygienic Foods, was recently sent by Dr. Nicola to Addis Ababa. I.E. Siebert, head of Hygienic, has been distributing his natural foods throughout the United States for the past 14 years” [i.e. since 1922].

187. Kloss, Jethro. 1936. Re: Trip from Houston, Texas, to San Francisco. Letter to his daughter Promise Kloss, May 11. 1 p. Handwritten, with signature on letterhead. Facsimile printed in *Back to Eden*, 1981 ed. center insert section.

• **Summary:** This letter is of interest both for its contents—it shows a loving and caring father—and for its letterhead, which states in large letters: “Scientific Food & Benevolent Association.” Below that, next to a photo of Kloss is typewritten: Jethro Kloss, President. Herbalist, Public Lecturer, Food Scientist and Demonstrator. Manufacturers, Jobbers, and Distributors. Home address: Takoma Park Station, Washington, D.C. A typed description of the Association continues at the bottom of the page: “Distributors of non-poisonous herbs for medicinal and culinary purposes. A very practical course in nursing, including hydrotherapy. Scientific feeding for every purpose. Unexcelled substitutes for meat, eggs, cow's milk and butter—cooking, canning, baking and health foods. How to live better on less money. A marvelous line of foods made from the soy bean, and their cultivation. Send for description of new book ‘Back to Eden’ (revised edition) revealing astounding truths on prevention of disease and revolutionary food and health methods not published before.” Address: 913 Yale St., Houston, Texas.

188. *Madison Survey (Madison, Tennessee)*. 1936. Among the industries at Madison. 18(29):113-16. July 15.

• **Summary:** Madison stresses its industries not simply because they are a source of revenue for students. “If every student who enters this college were financially able to meet expenses with cash, still Madison would operate its industrial centers because they constitute one of the outstanding features of the educational system Madison fosters. Why? Madison is preparing men and women to fill places of responsibility in needy fields, in hard and trying places. It turns out to the world men and women capable of doing things worthwhile for the community in which they locate. Not all of these are by any means white-collar jobs. Labor itself is educational. Labor is needed to develop the whole man.”

The Madison Printing Department prints all of the

packages and labels for Madison Foods. Photos show the following products in paperboard boxes with labels: Date Stix, Fruit Stix, Breakfast Crisps, Bran Wafers, Thin-Things, Soy-Koff, Whole Wheat Wafers, and Minute Wheat. Labels for Vigorost and Kreme O'Soy [bread] are also pictured.

"One of the latest printing jobs is three thousand display units to accompany samples of Fruit Stix, Date Stix, Breakfast Crisps, and Soy-Koff."

"Kreme O'Soy Bread adds quality to every lunch and meal. You will enjoy its rich creamy nut-like flavor. Use it freely for toast, sandwiches, fillings, puddings, etc.

"Madison Kreme O'Soy Flour is used in this bread to reduce the starch content, to impart the creamy nut-like flavor, and to alkalinize the bread. Kreme O'Soy Flour is a rich food—a complete protein—containing only a trace of starch." Other products noted are Nut-Meat, Soy Beans with Tomato Sauce, and Soy Cheese.

189. Desai, Mahadev. 1936. Soya bean as a substitute for meat. *Harijan* 4(33):259. Sept. 26. [1 ref]

• **Summary:** Reprints parts of a review from "Vegetarian News" of a book titled *All About the Soya Bean* by Dr. Lieut. Col. Gray. Address: India.

190. Van Gundy, Dorothea. 1936. Soy beans in the human diet. *Proceedings of the American Soybean Association* p. 22, 24. 16th annual meeting. Held 14-16 Sept. in Iowa.

• **Summary:** "The introduction of the Soy Bean into the human diet is no experiment, for it was introduced thousands of years ago to the teeming millions of China, and has been of great success. Careful examination shows that their diet to be well balanced.

"In the occidental countries the soy bean in the diet has been practically unknown until the last few years." This is largely because there is an oversupply of high-carbohydrate foods, while a "careful examination of the diets of a large percentage of the population will show a decided shortage in edible fats and complete proteins. This is due largely to the high price of meat, eggs, and milk. This shortage is supplied in the soy bean.

"There are several reasons why the Soy Bean should increase in popularity in the human diet. These are: 1. Nutritional qualities. 2. Versatility. 3. Economy."

"One of the most outstanding nutritional points in connection with the Soy bean is its high alkaline ash. When added to the diet it builds the alkaline reserve in a remarkable way, thus building the resistance to disease and infection.

"The Soy is unique from the standpoint of versatility, for it can be used in any of the courses in the menu from soup to nuts. It lends itself very easily to methods of preparation that cover up the strong bean flavor usually present. The Orientals have hundreds of ways to prepare the Soy bean and can produce almost any flavor of meat, fish or fowl with various soy products. With such a variety of ways to serve

the Soy bean it may be introduced into the diet and used quite freely without becoming tiresome." Address: Manager, La Sierra Industries, Ontario, California.

191. **Product Name:** Saucettes (Meatless Sausages).

**Manufacturer's Name:** Battle Creek Food Co.

**Manufacturer's Address:** Battle Creek, Michigan.

**Date of Introduction:** 1936.

**New Product-Documentation:** Gray. 1936. All About the Soya Bean. p. 121.

192. Van Gundy, Dorothea. 1936. La Sierra recipes. Campus and Maitland, Ontario, California: Published by the author. 47 p. 19 cm.

• **Summary:** Most (but not all) of the recipes in this book call for soy-based ingredients. Contents: Dedication. "This book is lovingly dedicated to the memory of my father." Foreword: "Due to the increase of disease in the animal kingdom, the diet should be as free as possible from these elements, including meat, eggs, and milk." Approximate composition for La Sierra Products: Soy butter [soynut butter] (27.6% protein, 47.1% fats). Soy breakfast food. Soy

flour. Cooked soy beans. Soy loaf. Milk. Bean sprouts. Soy cheese [tofu]. Soy spread. Soy bologna. Dry soy beans.

1. The soy bean as a human food: Nutritional value, varieties of soy beans, flour, soy milk, soy milk from flour, soy milk from raw beans, soy cream (made by homogenizing / blending equal parts of soy milk and soy oil or other vegetable oil), soy cheese, soy bean sprouts, soy sauce.

2. Soups: Incl. Soyament bouillon. Many use Soyament (Soy Sauce), soy milk, or soy cream. 3. Entrees. Recipes incl. Soy croquettes (with Soy Bean Pulp and Smoein). Walnut Loaf (with Smoein and soy milk). Soy protose (with soy butter and Mamenoko flour). Gluten patties (with Smoein). Soy cheese with tomato sauce. Soy cheese croquettes. Soy cheese and Soyament sauce. Baked macaroni with La Sierra Vegetable Bologna. Soy loaf. Soy loaf a la king. Baked soy noodles. Chow mein (with La Sierra Soy Cheese). Lentil patties (with Smoein).

4. Sauces and gravies: Many use soy milk, Smoein, or soy sauce. 5. Vegetables. Incl. Creamed vegetables (with soy milk). 6. Salads and salad dressings. Soy recipes include: Carrot and soy cheese. Tomato and soy cheese. Pineapple and soy cheese. Stuffed celery (with soy cheese). Soy loaf salad. Cabbage and banana salad (with soy mayonnaise). Head lettuce (with soy butter dressing). Salad dressing (uses soy milk in place of eggs). Soy mayonnaise [Note: This is the earliest recipe seen for a soy mayonnaise]. Tomato mayonnaise (tomato juice beaten into soy mayonnaise). Thousand island dressing (with soy mayonnaise). Parsley and olive dressing (with soy mayonnaise; uses ¼ cup chopped olives, not olive oil). Soy cream dressing. Soy butter dressing [with soynut butter]. Cream golden dressing (with soy cream). French dressing (with soy oil or any vegetable oil).

7. Desserts. \* = with soy milk. + = with soy cream. Cream rice pudding\*. Rice pudding+. Blanc mange\*+ [Blancmange]. Orange cream pudding+. Lemon fluff+. Fruit fluff+. Cream tapioca\*+. Frozen pudding\*+. Vanilla Ice Cream\*+. Almond cream [Almond ice cream] (incl. 1 cup chopped almonds)\*+. Strawberry sherbet+. Raspberry sherbet+. Butterscotch chiffon pie+. Lemon pie+. Banana cream pie\*+. Pumpkin pie without eggs\*. Soy pastry with soy flour. Soy cookies+.

8. Bread: Soy bread (with 4 cups entire wheat flour and 1 cup soy flour). Entire wheat bread (with 2 cups soy milk). Entire wheat sticks (with 3 parts wheat flour and 1 part soy flour). Corn meal crisps (with 4 parts corn meal, 3 parts wheat flour, and 1 part soy flour). Short cake (with 2 parts soy milk, 5 parts wheat flour, 1 part soy flour). Waffles (with 12 parts wheat flour, 2 parts soy flour, and 7 parts soy milk).

9. Sandwiches: Soy bean filling. Vegetable bologna. Soy delight filling (with soy[nut] butter). Soy cheese and raisin sandwiches. Soy butter (soynut butter thinned with tomato juice). Soy butter and honey. Soy cheese and olive [chopped green olives]. Soy spread [Made by La Sierra]. Sandwich

salad (with many soy possibilities).

10. Beverages: "A very fine coffee substitute is made [by La Sierra] from the Soy Bean, and tastes remarkably like Coffee. It is particularly fine from an alkaline standpoint, and is particularly excellent to be used in connection with high alkaline diets." Soy-co (Beverage) Add 1 rounding teaspoon to 1 cup of water. "Percolate or boil until desired strength. Serve plain or with Soy Cream." Also delicious iced. Soy-co (Made with soy milk). Soy milk shake. Soy banana drink. Mamenoko drink (uses 3 tablespoons Mamenoko, which is processed soy flour). Soyament cocktail ("A very refreshing beverage may be made by using 1 to 2 tablespoons Soyament sauce to 1 cup of water").

11. Healthful confections: Beanut brittle (2 cups each Soy Beanuts and brown sugar). Victoria fudge (with "3/4 c Soy Milk").

Use of soy beans in the diet: Outline for 3 meals. Suggestion for 3 days' menus, using soy products.

La Sierra Industries manufactures the following 14 foods from soy beans: Canned soy beans, plain or with tomato sauce. Soy loaf. Soy vegetable bologna. Soy milk. Soy breakfast food. Soy butter [like peanut butter]. Soy-co (beverage) [coffee substitute]. Smoein (smoked meat flavor). Soy spread. Soy flour, raw and processed. Soy beanuts (parched soy beans).

Soyament brand bean sauce. This soya bean sauce is "prepared from soya beans by splitting up the bean protein by a special process which thoroughly decomposes it into Amino Acids. A number of Amino Acids, each possessing a sweet taste, is the most remarkable feature of the Soyament Sauce and makes it different from many of the so-called soy sauces... On sale at all grocery stores or write to Soya Bean Products Co., 3522 East Third St., Los Angeles."

In the section on "Soy milk" (p. 8) is a long quotation from Dr. [Walter] Siegmeister: "So well has the Soy bean served as a source of vegetable milk, that the records tend to show that it has proven superior to cow's milk in certain important respects. The most marked of these is the almost complete absence of rickets in China, which is quite probable in view of the fact that not only is the Soy bean rich in Vitamin D, but also in Calcium and Phosphorous, the chief requirements for healthy bone development."

Note: This is the earliest document seen (Dec. 2003) that mentions a soy-based shake. It is also the earliest English-language document seen (Dec. 2003) that uses the term "Milk Shake" to refer to a non-dairy soy milk shake or that contains the term "Soy Milk Shake" (p. 41). The recipe with that title states: "Soy Milk may be mixed with any of the fruit juices and beaten with a small amount of chipped ice. It fluffs up and is very palatable. Soy Milk and orange juice combine splendidly." Address: Dietitian, Box 203, Ontario, California.

193. Shih, You-Kuang. 1937. Study on the molds concerned

in the fermentation of wheat gluten in China. *Lingnan Science Journal* 16(1):27-38. Jan. 13. [21 ref. Eng; chi]

• **Summary:** The author begins by discussing the research of others on “the well known foodstuff *Fu-Yu* [fermented tofu, 2 Chinese characters are given] or preserved soy bean curd. Wei (1930) isolated the same species of *Mono-Mucor* from different samples obtained from Shaoshing of Chekiang [province] and Suchow of Kiangsu Province.

He adds that P.W. Liu, in his unpublished work, “isolated a species of *Mucor* from Mei-Tou-Cha [meitauza; Chinese characters are given], or naturally fermented dregs of soy bean curd [i.e., naturally fermented okara], which is a common foodstuff in Wuchang and Hankow.” It is prepared by frying in vegetable oil or animal fat.

“No mention of the so-called Minchin [W.-G. *mien chin*, pinyin *mianjin*] fermentation has been made as yet in literature. Minchin is, chemically speaking, the gluten of wheat.” Rich in protein, it has a delicious taste. In some districts it is commonly eaten as a substitute for meat by Buddhists who do not eat meat. It is also occasionally used as a palatable dish at banquets. “Although we do not know definitely when it came to be used as an article of diet, it probably was at least hundreds or even thousands of years ago. Recently it has become a canning industry in large cities, San-Loh Wusih Minchin of Kiangsu province being a well-known example.”

The author then gives a detailed description of how raw wheat gluten is made in China. To the high-protein wheat flour, about 0.5% to 1% by weight of table salt is added before any water is added in a large earthen jar. The dough is allowed to stand for 1-2 hours under water before the starch is removed in a strainer. A high grade of minchin is one that is almost free of starch content, pale in color, and very sticky and flexible.

Raw wheat gluten is typically made into one of four end products: (1) Fresh minchin: The raw minchin is kneaded into desirable shapes then boiled and seasoned for eating. When prepared for sale at a market in hot weather, it is usually preserved in water to prevent rapid spoilage by bacteria; (2) Roasted minchin is prepared by roasting raw minchin in a flat pan over a fire. A small mass of raw minchin will bubble up into a large globose shape with a very loose and porous texture. It is usually used to prepare soups, or cooked with other foods, and can be purchased even in small grocery stores in some localities; (3) Fried minchin is prepared by frying raw minchin with vegetable oil and seasoning. Recently the preparation of this kind of minchin has become a canning industry, as noted above. It has an excellent taste and is especially appropriate for travelers; (4) Fermented minchin (fermented wheat gluten) is made by putting fresh minchin into a suitable container, usually an earthen jar, and covering it tightly. After 2-3 weeks at room temperature, it will be overgrown with molds and bacteria. Then an excess amount of table salt (sodium

chloride), more than 10% by weight of the molded minchin is added. After thoroughly mixing the salt into the minchin, it is allowed to stand for 2 more weeks to age. It is then commonly cut into thin strips and used as a condiment with other foods. Usually the fermentation is carried on during the winter because in hot weather it spoils rapidly due to bacteria.

Minchin is most commonly eaten by the people in northern China, however fermented minchin is rarely heard of except in Wuchang, Hankow and Hanyang of Hupeh Province so far as the author knows. According to the “Investigation of diet nutrition of Chinese in Manchuria” by Lu (1934), the average amount of Minchin consumed a day by one person of different classes, and its nutritive value are as follows (Table 1): Physicians 14.4 gm of minchin, 3.2 gm of protein; Members of the bank 13.8 gm, 3.1 gm of protein; Officials 11.2 gm, 2.5 gm of protein; School teachers 3.7 gm, 0.8 gm of protein; Middle class families 1.8 gm, 0.4 gm of protein.

Minchin appears to contain a mixture of molds including *Paecilomyces varioti*, *Aspergillus flavipes*, *Cladosporium elegans*, *Fusarium orthoceras*, *Syncephalastrum racemosum*, *Trichothecium roseum*, and *Penicillium* species.

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term “Fu-Yu” to refer to fermented tofu.

Note 2. This is the earliest document seen (Sept. 2011) concerning okara tempheh (which it calls Mei-Tou-Cha), and the earliest English-language document seen (Sept. 2011) that uses the term “Mei-Tou-Cha” to refer to okara tempe. Address: Lab. of Applied Mycology, College of Agriculture, Hokkaido Imperial Univ., Sapporo, Japan.

194. *Chicago J. of Commerce and La Salle Street Journal*. 1937. Ice cream, milk from soy beans: Tennessee scientists start new industry. Oct. 13. p. 9, col. 8.

• **Summary:** In a small group of buildings located a few miles from Nashville, a small group of chemical and agricultural scientists are doing “big things with the soy bean...”

It all started some 25 years ago when some agricultural chemists at the small, self-supporting the Nashville Agricultural Normal Institute started experimenting with the soy bean, then used mainly as forage.

Today, in a small group of buildings housing the 3-month old industry, E.M. Bisalski, his staff of assistants, and Dr. Philip Chen (a research chemist from China) are making “milk, meat, coffee, and automobile accessories from the vegetable.”

Chen says there was soy bean milk in China 3,000 years ago, yet it has taken the scientists about 25 years to “neutralize the bean flavor and approximate that of the cow.” Experiments in the institute laboratory showed that many generations of rats living exclusively on soy bean milk grew

strong and produced prolific offspring. The scientists believe that the “bean milk can be produced more cheaply than dairy milk and that it can be produced under conditions of chemical sterility, almost germ free.”

Having developed good milk, the group next “sought to compete with cattle as food producers in the form of beef.

“A product called soy-burger has been produced. It tastes like hamburger.

“The scientists have made ice cream and buttermilk and even chocolate flavored milk. They also have a cheese [probably tofu] which is said to be the closest thing to pure protein known to chemistry. It tastes like Swiss cheese but costs only a fraction as much.”

Note 1. This is the earliest document seen (Nov. 2014) concerning a meatless burger made from soy.

Note 2. This is also the earliest English-language document seen (Nov. 2014) that contains the term “soy-burger” (hyphenated).

195. Kellogg, John Harvey. 1937. Special health values of the soybean. Paper presented before the Section of Food and Nutrition at the American Public Health Assoc., 68th meeting. Oct. 5. 7 p. typescript. Reprinted in 1937 by Soya Foods Ltd., Rickmansworth, England. 6 p. [9 ref]

• **Summary:** This paper begins: “The rapid development of the production and use of the soybean (*Soja hispida*) in this country within the last quarter of a century, and the multitudinous uses to which it is being put, fully justify the name ‘wonder bean’, which it has been called by American writers, and the appellation, ‘little honorable plant’, by which it is known in China.

In South China, the soybean so completely replaces other sources of protein that there is no dairy industry, and meat, fish and even eggs, are very little used. The soybean is the chief source of protein for the common people and is referred to as ‘the poor man’s meat.’

“Studies of this most remarkable of food products, especially in the United States and Germany, have shown it to possess not only extraordinary nutrient properties, but also some highly important prophylactic and therapeutic values, knowledge of which ought to be popularized as rapidly and widely as possible.

“Although botanically classed with legumes, the soybean rather closely resembles the nut in its very low content of starch and high percentage of protein. It easily takes precedence over all other natural foodstuffs in the great percentage of protein which it contains, and protein of such superior quality that in animal feeding experiments it has proved itself to be capable of replacing proteins of all other sorts, even milk proteins. The soybean protein content is 40%, nearly twice that of average meat and four times that of eggs, three to four times that of wheat and other cereals, five to six times that of bread, twice that of lima and navy beans, walnuts, filberts and most other nuts. The protein of

the soybean (glycinin) is of high quality, like that of milk, containing certain amino acids of which the proteins of nearly all other legumes and all cereals are deficient.”

Contains a long discussion of soy acidophilus milk, changing the protective flora, and the experience of Dr. Dafoe with the Dionne quintuplets in Canada.

“Forty years ago, I was requested by Dr. Dabney, then Assistant Secretary of the United States Department of Agriculture, to prepare from plant sources a substitute for meat, and found in a combination of the gluten of wheat with peanuts a product having not only the essential nutrient values of meat, but a fairly close approximation in flavor and appearance. The soybean solves the problem so completely and so satisfactorily that with the proper development of its culture and use, there need be no fear of protein shortage and no need of a substitute. There is, indeed, evidence that Americans might profit greatly as the Chinese have by giving the soybean a large place in the national bill of fare.

“A few years ago (1923), Dr. Arthur Hunter, Chief Actuary of the New York Life Insurance Company, in an international study of blood pressures, found the systolic pressure of the average Chinaman to be ten points lower than that of the average American and gave conclusive evidence that the cause is to be found in the difference in the dietary habits of the Chinese and Americans. In concluding an address before the American Life Underwriter’s Association, Dr. Hunter said, ‘Taking the population of the United States as a whole, I believe that a better adjusted diet, with less animal food, would result in a lower blood pressure and in greater longevity with an equal ability to carry on their occupations.’

“In view of the facts cited in this paper, is it not reasonable to believe that the general use of the soybean in this country would tend to lessen the mortality rate from intestinal infections and many other acute and chronic disorders, and to increase individual life expectation?”  
Address: M.D., LL.D., F.A.C.S., Medical Director of the Battle Creek Sanitarium, Battle Creek, Michigan, and of the Miami-Battle Creek, Miami Springs, Florida.

**196. Product Name:** Soy-Burger. Renamed Soyburger or Soyburger Loaf in 1939 (Canned Meatless Loaf, Sandwich Spread, or Entree). Renamed Zoyburger in 1939.

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1937 October.

**Ingredients:** Soybeans [actually okara], wheat gluten, raw peanut meal, tomato paste, vegetable seasonings.

**Wt/Vol., Packaging, Price:** No. 2 can, 20 oz.

**How Stored:** Shelf stable.

**Nutrition:** Protein 12.5%, fat 6.7%, carbohydrates 19.0%, ash 1.4%, calories 187/100 gm.

**New Product–Documentation:** *Chicago J. of Commerce.*

1937. "Ice cream, milk from soy beans: Tennessee scientists start new industry." Oct. 13. p. 9, col. 8. Having developed good milk, the group next "sought to compete with cattle as food producers in the form of beef. A product called soyburger has been produced. It tastes like hamburger."

Madison Health Messenger. 1939. "Soyburger." Ad in House of Better Living. 1940. May. p. 4. "Soyburger."

Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Soyburger is one of five basic food products made and sold by Madison Foods. Madison Health Messenger. V. 49-2. p. 5. Taylor. 1944. Soy Cook Book. p. 201.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Zoyburger contains 20.90% protein, 3.10% fat, and 11.85% carbohydrate.

Letter from Sam Yoshimura. 1981. March 19. Okara was used in the Madison Zoyburger exclusively. The product consisted of wheat gluten, okara, tomato paste and seasonings. It was a canned, meat loaf type of product.

Note: This is the earliest known commercial vegetarian "burger" (with the word "Burger" or "Burgers" in the product name) made in the Western world.

197. **Product Name:** Tofu, Yaki-dofu (Grilled Tofu), and Ganmodoki (Fried Tofu Patties).

**Manufacturer's Name:** Azumaya Tofu Seizo-sho (Azumaya Co.).

**Manufacturer's Address:** 1636 Post St. between Buchanan and Laguna, San Francisco, CA 94124. Phone: 415-285-8500.

**Date of Introduction:** 1937.

**Ingredients:** Soy beans, water, calcium sulfate.

**Wt/Vol., Packaging, Price:** 21 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Interview with George and Bill Mizono. 1989. Oct. 31. During the first year of ownership in 1937 Azumaya made bulk tofu, yaki-dofu, ganmodoki, and agé.

Note: This is the earliest record seen (July 2011) showing Azumaya making types of tofu other than regular tofu.

Note: This is the earliest Japanese-language document seen (Nov. 2014) that mentions a meat alternative or a meatless burger, which it calls *ganmodoki* (mock goose or deep-fried tofu burger).

198. Lager, Mildred. 1938. *The House of Better Living Catalog: Finer natural foods*. Los Angeles, California: Published by the author. 36 p. March. 23 x 10 cm.

• **Summary:** The single most important document showing the creative development of commercial soyfoods in California in the late 1930s. This catalog contains a large section on Diabetic Foods, consisting mostly of soyfoods, and an even larger section titled "Soy Bean Products."

The Foreword (p. 1) begins: "The House of Better living is as unusual as its name. Its aim is to teach better living, and has made possible Mildred Lager's free educational program by radio and class work. Become a member of our ever-growing family. Secure one of our creed cards—Realize life can be a game and not a battle, and if you give to the world the best you have, the best will come back to you."

"The House of Better Living has grown in four years from what was called a brain storm to an institution. It is outstanding, unique, and built on the ideals of sincerity and service. It is teaching the ounce of prevention—the health insurance that pays dividends in years of health and happiness. It carries for you, Finer Natural Foods, selected by Mildred Lager."

A full page of delivery and order information (p. 2) shows that Mildred was shipping foods (such as California nuts and fruits, fresh and dried) all over the United States.

This catalog contains a total of 42 soyfood products, including 26 such products not found in the 1936 catalog. Soy (and other interesting) products are listed as follows (prices and weights are given for each): Beverages—Coffee substitutes: Radcliff's soy bean, Soy-Co. Other beverages: Dr. Fearn's Proteinized Cocoa, Radcliff's Malted Soya Milk, Radcliff's Soya Bean Cocolette, Soy-Malt (plain or chocolate). Sugars and syrups: Radcliff's Golden Soya Honey Spread (4-oz. glass). Natural sweets—Candies: Carque's health candies, bar, 5¢, Halvah bars, Sesame brittle, Soya candy sticks, 1¢ each, Soy milk "chocolate" bars, in Bavarian, coconut, mint, cherry, pineapple, and creme de mint flavors, Soy milk "chocolates," ½-lb. box or 1-lb. box, Soy chocolate, 1¢ square, ½-lb, 1 lb, 60¢, or bulk.

Desserts: Agar—Parfait mix, Agar—Hain Vege-Jell, Agar—Sanitarium vegetable gelatin. Diabetic foods: Gluten flour, Soy bean flour, 10¢ lb, Soy Bean Pancake and Waffle Flour (Bill Baker's Prepared; 2-lb. pkg. 30¢), Dr. Fearn's

Soya Cereal, Dietetic Soyrina Cereal, Dr. Fearn's Soya-Date Breakfast Food, Battle Creek Dietetic Bran, Battle Creek toasted gluten bran flakes, Soy breakfast food, Cubbison's soy-gluten crackers, Soy-gluten wafers, Loma Linda soy bean wafers, Bill Baker's 100% soy-fruit slices, Bill Baker's soy bean bread, Olson's soy bread, Soy bean macaroni, spaghetti and noodles, Soy beans—imported, Soy beans—cracked, Soy beans—red, Soy beverages (without sweetening), Bill Baker's soy melba toast, Cubbison's soy melba toast.

Nut butters: Almond butter, Almond meal, Cashew butter, Peanut butter (dextrinized or raw), Pecan butter, Soy bean butter (1b or 8-oz. can). Whole grain flours, meals, etc.: Lima bean flour, Soy bean flour (1 lb, 3 lbs, or 10 lb), Soy bean pancake and waffle flour (Bill Baker's prepared), Soy bean pancake and waffle flour (Mrs. Hauser's), Whole wheat flour, wheat germ. Breakfast cereals (to be cooked): Mildred Lager's quick cooking cracked soybeans, Dr. Fearn's soya cereal, Dietetic Soyrina Cereal. Breakfast cereals (ready to eat): Battle Creek Zo, Dr. Fearn's soya-date breakfast food, Soya breakfast food, Bill Baker's 10% soya cereal. Melba toast, crackers, cookies: Cubbison's soy toast, Bill Baker's soy toast, Cubbison's Soy-Gluten crackers, Soy-gluten crackers, Loma Linda soy bean wafers, Cookies: Cubbison's soy cookies, Bill Baker's 100% soy fruit slices. Bread: Olson's soy bean bread (sliced loaf), Bill Baker's soy bean bread (unsliced loaf 16¢). Macaroni noodles: Soy bean macaroni, spaghetti and noodles. Legumes: Soy beans—imported, Soy beans—cracked, Soy beans—red. Meat substitutes: Nuteena (7 oz. can 15¢), Nut Meat, Nuttose (Battle Creek), Proteena, Protose, Soy bean butter (30¢ lb.), Soy mince sandwich spread, Soy bean spread, Soy bean ravioli (12¢ and 20¢ can).

Soy bean products (40 products; those mentioned above may be omitted here): Loma Linda soy beans (plain or tomato flavored, No. 1 can), Loma Linda soy beans with Proteena (No. 1 can), Dry soy beans (quick cooking red), Soy bean spread, Soya bean honey spread, Loma Linda soy mince sandwich spread, Soy bean sauce (5 oz for 18¢ or 2 oz bottle for 10¢), Soy bean oil (45¢ pint bottle), Soyco (Soy coffee), Soya bean milk powder, Milk of soya bean (6 oz or 12 oz can), Soy-Malt, Proteinized cocoa, Radcliff's 100% soya bean beverage (1 lb package), Cubbison's soy bean cookies, Cubbison soy-gluten crackers, La Sierra Soy breakfast cereal, Diamel Soyarina cereal, Diamel breakfast cereal. Salad dressings: Imitation Worcestershire sauce (Carque's, 5 oz bottle for 25¢). Powdered dry vegetables: Dulse, Dulse leaf, Irish moss, Kelp, Kelp—fancy, Sea lettuce (leaf or powdered), Soy-banana powder. Laxative foods: Agar, Psyllium, Swiss Kriss, Sym, Tam (laxative jam). Natural aids: Savita yeast tablets, Sesame seeds, Theradophilus (4 oz bottle 75¢, 8 oz bottle \$1.25). Electric appliances: Electric juicers are not yet on the market. Index (p. 36).

There are ads for the following: Battle Creek Sanitarium Foods (p. 5; ask for literature). Ficgo coffee substitute (display ad, p. 6). Racliffe's Soya Products (p. 9, 21). Mildred Lager's quick cooking family (incl. cracked soy beans), Bill Baker's soy and lima bean products (photo display, p. 16). Therapy, Ltd.—Foods for Better Living (Theradophilus, soy bean milk, p. 19, 29).

A photo (p. 1) shows Mildred Lager.

Note. This is the earliest English-language document seen (Aug. 2013) that contains the term “soya bean beverage,” which probably refers to powdered soya milk. Address: 1207 West Sixth St., Los Angeles, California.

199. *Madison Health Messenger (Madison, Tennessee)*. 1938. Soy bean milk, coffee, meat, and cereal. 1(1):1, 4, 6. Spring.

• **Summary:** “More versatile than any other food is the soy bean. Previously used as stock feed, it has gradually won its way into many wholesome foods that are distinctly different, yet palatable and reasonable.

“Madison Foods, in conjunction with Madison College, has spent years in experimental research developing soy bean foods. Dr. Philip S. Chen, Professor of Chemistry at Madison College, a native of China who received his doctorate degree in chemistry at Michigan State College, together with Dr. Frances L. Dittes, Professor of Nutrition at Madison College, whose doctorate degree is also in the field of Chemistry and Nutrition, have successfully exploited the ancient bean, discovering its versatility as is evidenced by the possibilities of its use as milk, coffee substitute, meat substitute, breakfast cereal, flour, etc.”

Kreme O'Soy Milk is the only homogenized soy bean milk on the market to date; it is made of soy beans, added soy bean oil, dextrose, and organic calcium. Zoy-Koff is an alkaline coffee substitute made from soy beans and grains. Kreme O'Soy Crisps is Madison's new ready-to-eat alkaline breakfast cereal. It is made of whole soy bean flour, whole wheat, and malt.

Foods made by Madison Foods that contain soy as an ingredient, described in this first issue are: Soy-Koff (with photo of front of package in front of Mr. Hubert Henken, assistant production manager of Madison Foods, from Albia, Iowa, and a “strict vegetarian”). Thin Things (a new soy wafer). Date-Stix (a natural sweet, with Kreme O' Soy Flour). Fruit Stix (a soy flour biscuit). Breakfast Crisps / Kreme O'Soy Crisps (with photo of front of package). Soyburger Loaf. Soy Beans (in 5 oz, 14 oz and 30 oz cans, with tomato sauce or plain). Soy Cheese [Tofu]. Vigorost (“Madison's finest protein food representing the ‘steak’ of its variety.” A photo shows Vigorost sliced and ready to serve on a platter). Kreme O'Soy Flour. Kreme O'Soy Milk.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the word “Soyburger” (spelled as one word, regardless of capitalization) or the term

“Soyburger Loaf.”

200. Melick, Weldon. 1938. Self-supporting college. *Reader's Digest*. May. p. 105-08.

• **Summary:** About Madison College in Tennessee. “In 1904 the Nashville Agricultural Normal Institute at Madison, Tennessee, consisted of 11 students and some dilapidated farm buildings on 400 acres of worn land purchased with the last cent of its founders—Dr. E.A. Sutherland and four other teachers. In addition, however, it had one invaluable asset: Dr. Sutherland’s idea that a college education should be made available to any boy or girl willing to work for it.”

Today “Madison’s curriculum includes 27 campus industries, run by the students to support the college and themselves... 15 years of research in food chemistry have resulted in new food products too useful to confine to campus menus.

“Hence, Madison Foods—an industry that is largely responsible for making the soy bean appetizing to Americans. The school’s food chemists, experimenting with 200 varieties of soy beans, eliminated objectionable taste and produced savory breakfast foods, bread, coffee substitute, condensed milk, and meat substitutes which look and taste like beef but are even more nutritious and digestible. Vigorost, made from soy loaf after the milk is extracted [i.e. okara], is featured by a cafeteria chain in New York City. More than \$60,000 worth of Madison’s packaged and canned foods was sold in 27 states last year, and the Institute runs its own health-food cafeterias in Nashville and Louisville.

“Madison Foods have developed soy milk until it is now not only cheaper than cow’s milk but, on the authority of the American Medical Association, better for babies. Observers have come from Africa, India, and other countries where milch cows are scarce, to study the methods of Madison’s soy bean ‘dairy.’ ...

“With twice as many applicants as can be provided for, Madison as a rule accepts only those who could not otherwise arrange for a college education.”

Note 1. As a result of this article, the school received nearly 5,000 inquiries concerning the school plus a flood of student applications. The next year was the highest in the history of the College with a total of 450 college students enrolled.

Note 2. This is the earliest article on soy seen (Aug. 2002) in *Reader's Digest* magazine.

201. Chen, Philip S. 1938. The aristocrat among foods: The soybean. *Health (Mountain View, California)* 5(7):14-16. July. [4 ref]

• **Summary:** This article begins: “For thousands of years, China, by the use of the soybean, has demonstrated to the world that animal products are not necessary to a well-balanced diet, for the majority of the Chinese people make no use of dairy products, and consume a very small amount

of meat. When the soybean was subjected to chemical analyses and feeding experiments by scientists in various countries during the last few decades, it was found why the Chinese maintain health. We now know that the soybean owes its superiority over the other legumes and cereals to its remarkable richness in protein, fat, mineral matter, and vitamins. The average percentage composition of the soybean is approximately as follows: Protein, 40 per cent; fat, 18 per cent; nitrogen free extract, 25.9 per cent; ash, 4.6 per cent; crude fiber, 3.5 per cent; moisture, 8 per cent.

“On account of its high protein content, the soybean has been recognized as the most nearly perfect vegetable substitute for meat known. The yield of protein from soybeans, weight for weight, is approximately twice that of meat; four times that of eggs, wheat, and other cereals; five or six times that of bread; twice that of Lima and navy beans, walnuts, filberts, and most other nuts; and twelve times that of milk.

“Not only is the protein of the soybean higher in percentage than that of the other legumes, but it is also of a much superior quality. In spite of a vegetable origin, the protein of the soybean resembles animal proteins more closely than vegetable proteins.

“The fact that the soybean protein is capable of promoting growth has repeatedly been demonstrated by various feeding experiments, which are of even greater importance than chemical analyses in determining the nutritional value of the soybean. Osborne and Mendel of Yale University found that on a dietary containing either soybean meal or commercial soy cake as the sole source of protein, together with soybean oil and protein-free milk, several broods of young rats have been produced, and the young grew normally. These investigators cite this as a demonstration of the nutritive efficiency of the soybean, in contrast with the adverse results obtained with kidney beans and garden peas.” Address: Ph.D.

**202. Product Name:** Mary McBride’s Pure Soya Bean Crusties (“Vegetable Meat”).

**Manufacturer’s Name:** McBride Products Company.

**Manufacturer’s Address:** 811 Fairview Ave., South Pasadena, California. Phone: PY. 1-1314.

**Date of Introduction:** 1938 July.

**Wt/Vol., Packaging, Price:** 1 lb or 5 lb boxes. Wholesales for \$0.45 or \$1.74 respectively.

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet/catalog/price list. 1938. 12 by 17 inches. Blue and red on beige. “McBride’s Soya Foods.” A photo shows the box. The front panel shows the prepared product on a plate. “Modern Nutrition. Fully Prepared. The best in soya foods. Contains no salt.” The poster states: “For making meatless meat loaf, nut loaf, vegetable roast etc. May be used many ways in making salads and soups. It also makes a delicious cereal

when served with milk or cream; fruits may be added. Soya Crusty's are rich in 'complete' protein, vitamins and minerals. It is starch free and less than 1½% of reducing sugar. The protein is biologically fully equal to that of meat muscle and is the only vegetable protein that can be called 'complete;' i.e. sufficient to promote growth and the repair of tissue waste. It also has an advantage over meat protein, in that it does not contain nucleo-protein or purin bodies which are considered to be the forerunners of uric acid. One pound of Soya Crusty's contains 2½ times as much protein as is found in 1 pound of beefsteak."

203. George, S.E. 1938. New industries: The versatile soya bean. *Nature's Path to Health (Melbourne, Australia)*. Oct. 1. p. 17, 38.

• **Summary:** Discusses utilization of soya beans throughout the world to make soya bean oil and meal, industrial products (glycerine, paints, soaps, linoleum, rubber substitute, printing inks, explosives, etc.), bean-milk, bean-curd or tofu, salted bean-curd (resembles Roquefort cheese), coffee substitutes (sold today in America and Europe), soya bean flour, and beef-like extracts for use in soups ("one of the most famous European brands of soup-cubes has a soya-bean base"). "Sacks of [soya] beans make excellent substitutes for sandbags [in wartime], as was proved in the recent Manchurian struggle. Buddhists in China use bean-curd [probably yuba], shaped in molds, to make many products that resemble animal products: fish with sauces, a whole chicken swimming in a golden chicken soup. A number of other products made from soya beans are listed. Discusses the work of the Ford Motor Co. with growing and using soybeans in England and the USA.

A cartoon shows a figure of "The Versatile Soya Bean" smiling and dancing with hands on hips.

Note 1. This is the earliest document seen (April 2003) that mentions a meat alternative which is described as an alternative to fish or seafood. Address: Australia.

204. **Product Name:** Soya Beans in Tomato (In glass jar. Canned by June 1940. Renamed The Versatile Soyabean in Tomato Sauce by 1953).

**Manufacturer's Name:** Roberts (F.G.) Health Food Products.

**Manufacturer's Address:** 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.

**Date of Introduction:** 1938 October.

**Ingredients:** Incl. soya beans, tomatoes.

**Wt/Vol., Packaging, Price:** 12 oz jar. Canned by June 1940.

**How Stored:** Shelf stable.

**New Product–Documentation:** Ad in *Nature's Path to Health (Melbourne, Australia)*. 1938. Oct. Half-page ad. "For your health's sake, eat Soya Beans in Tomato. The Protein food with the high Vitamin content, prepared under Hygienic conditions, hermetically sealed by F.G.R. Health

Food Products (Registered), 40 Chapel Street, St. Kilda. Directions for use. Place jar in water and heat. To open, lever lid with coin. Obtainable from Roberts Health Centre, 284 Post Office Place, Melbourne, C.1. Phone: Central 3394." A photo shows the jar and label. At the bottom of the label is written: "Manufactured at 40a Chapel St., St. Kilda."

Ad in *Nature's Path to Health*. 1940. June. p. 26 "Just what you've waited for! Better health foods." An illustration (line drawing) shows the four canned products, with the Soy Bean & Tomato in the smallest can. Ad in NPH. 1940. July. p. 8. "Roberts' Better Nut Foods." An illustration (line drawing) shows the four canned products, with the Soy Bean & Tomato in the smallest can. Small ad in Aug. 1940 issue, p. 5. "Roberts' Soy Bean in Tomato." "Packed in a new style in tin in convenient sizes and sold at all Roberts' Health Food Shops throughout Australia."

Ad in *Nature's Path to Health*. 1940. Nov/Dec. p. 30. "Roberts' Soy Nut Recipes." Same line drawing as in July issue. "Supplies always available at the Roberts Health Food Shops Throughout Australia."

Letter (fax) from Paul Smith of Soy Products of Australia. 1995. March 14. From 1940 to 1954 these soybeans were contract canned outside the Roberts' plant. From 1954 to 1974 they were canned in house. The product had to be discontinued in 1974 due to falling sales, its high labor cost and low profitability, and the lack of capital to further automate the process. Long before 1954 the Sanitarium (Adventist) retail shops sold this product under the Roberts brand name. Sanitarium studied the product then introduced their own version of it as a logical extension of their extensive range of canned vegetarian "meat analog" type products. They had economies of scale which Soy Products of Australia lacked. As Sanitarium Sales increased, ours declined. Beans in Tomato were processed continuously from 1940 to 1974 by SPA and previously under the F.G. Roberts brand.

205. **Product Name:** Roberts' Soy Nut Roast.

**Manufacturer's Name:** Roberts (F.G.) Health Food Products.

**Manufacturer's Address:** 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.

**Date of Introduction:** 1938 October.

**Wt/Vol., Packaging, Price:** Tin-plated steel can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Ad in *Nature's Path to Health (Melbourne, Australia)*. 1938. Oct. Rear cover (p. 50). A photo shows the label: "The ideal meat substitute. 10 ozs. Nett. Another Roberts 100% protective health food."

Note: The same page shows that Roberts also made a coconut ice cream named Robert's Cocoanut; it was apparently a non-dairy product.

206. Hastings, Milo. 1938. A college that feeds itself.

*Physical Culture*. Nov.

• **Summary:** About Madison College near Nashville, Tennessee. About 500 people now live on the campus, of which 300-350 are students. About 90% of the vegetables (including soybeans) consumed by all these people are grown by student labor. The college has its own mills for whole-grain products and its own bakery, “which also serves whole-wheat and soy-bean bread to over one hundred retail stores in the nearby city of Nashville.”

“The address Madison College, Tennessee, has become familiar to patrons of health food stores as the place of origin of a distinctive line of products made from soy-beans.” The reason for that grew out of an interesting combination of circumstances. First, the college was founded upon the idea that the “students should by their own labor produce as nearly as possible all their own food supply for a completely nourishing diet. Second: Madison College and Sanitarium are strictly vegetarian, and, as at the Battle Creek Sanitarium, the vegetarianism has been worked out as part of the school dietary as well as the sanitarium dietary. To students and patients alike the importance of proper food for the body is emphasized.

“Third: one phase of the work at Madison College has to do with the training of medical missionaries. That has not only brought to the teaching staff people who have had experience in the Orient, but has also brought students from those countries. (At present there are six Japanese and ten Chinese students.)

“Out of these circumstances came the development of a new line of foods which we may call the Americanization of the second most important food material in the Eastern world and the greatest of all vegetarian sources of protein—the soy-bean.”

To Madison College, with its interest in perfecting a vegetarian diet, came Perry A. Webber, as professor of chemistry. He had taken his doctor’s degree at Michigan State College after a fourteen years’ residence in Japan. It was a happy combination of circumstances, and the American chemist, with his Japanese experience, set to work to Americanize the soy-bean as a source of human food.

“It also happened that one of Dr. Webber’s Chinese friends, Philip S. Chen, was a fellow student of chemistry at Michigan State College, having come to America to study science. When he had completed his chemical work for a doctor’s degree at Michigan, he entered Madison College as a special student to take up practice teaching in the Department of Chemistry under Dr. Webber. The two men, each with a knowledge of soy-beans as used in the Orient, now worked together as chemists in the American college.

“After two years of this cooperation Dr. Webber was called back to Japan to become the head of a school there. Dr. Chen then became the professor of Chemistry at Madison College and continued to work on soy-bean products.”

Though Dr. Chen says soy-bean milk has been used in

China for 3,000 years, the type made at Madison “is new because it is different and superior to the older forms of the Oriental product.” It has been made “more acceptable to American tastes and to the more exacting demands of present-day nutritional science. This also applies to the substitutes for meat and the cheese products made from soy-beans, and to the use of soy-bean flour as an ingredient in bakery and cereal products. Today all this is of special interest to vegetarians and to those who follow the latest forms of health foods. These advances in food science will later become of far greater significance.”

Dr. Frances L. Dittes, head of the Department of Nutrition, specializes in soybeans, “both in nutritional research and menu applications. Thus, the new food products developed from soy-beans, along of course with other vegetarian dishes, were worked out and tried out in the students’ dining hall and also in the Madison Sanitarium. Patients cured at the sanitarium naturally wished to continue the use of the food products after returning home. This gave the nucleus of a health food manufacturing business.

“This, in turn, provided another campus industry for the work-your-way college, giving occupation for the students in which they could take an especial interest and pride, since the business grew out of the research work of the college and was closely tied in with both their agricultural and their health work.”

Note: This article is reprinted near the back of the 1989 edition of *Madison—God’s Beautiful Farm*.

207. *Madison Health Messenger (Madison, Tennessee)*. 1938. Price list. 1(3):6. Fall-winter.

• **Summary:** See next page. This is the earliest known list of foods made by Madison Foods. The name of each food that contains soy as an ingredient is preceded by an asterisk (\*). The foods are divided into categories and the flavor, size and price of each size are given.

The categories are: Breakfast cereals. Beverages. Crackers. Canned protein foods. Flour.

The foods containing soy as an ingredient are: Kreme O’Soy Crisps. Soy-Koff. Kreme O’Soy Milk (plain and chocolate). Thin-Things. Fruit Stix. Date Stix. Soyburger Loaf. Vigorost (3 sizes of cans). Soy Cheese seasoned (3 sizes of cans). Soy Beans with Tomato (3 sizes of cans). Kreme O’Soy [whole soybeans]. Kreme O’Soy Flour.

208. **Product Name:** Loma Linda Gluten Burger (with Soy Flour).

**Manufacturer’s Name:** Loma Linda Food Co.

**Manufacturer’s Address:** Loma Linda, California.

**Date of Introduction:** 1938.

**Ingredients:** Incl. soy flour.

**Wt/Vol., Packaging, Price:** 14 oz, 28 oz, and 30 oz can (1971).

**How Stored:** Shelf stable.

**New Product–Documentation:** Loma Linda Food Co. Price list. 1938.

Note 1. This is the second earliest known vegetarian “burger” (with the word “Burger” or “Burgers” in the product name) made in the United States. It is also the earliest known product made by Loma Linda Foods that contains wheat gluten.

Note 2. Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains numerous recipes calling for “gluten burger” which is sold in 14 oz, 28 oz, and 30 oz cans.

209. **Product Name:** Soymilk, Tofu-Pimiento Spread, Okara Spread, and Gluten Cutlets.

**Manufacturer’s Name:** Miller’s Soy Foods.

**Manufacturer’s Address:** Utica, New York. Washington, DC.

**Date of Introduction:** 1938.

**Wt/Vol., Packaging, Price:** Soymik: Bottled. Gluten

products: Canned.

**New Product–Documentation:** Herbert P. Ford. 1958. *The Life Story of Dr. Harry W. Miller*. p. 131. “In 1939 Dr. Miller returned to the United States having been so thoroughly convinced of soy milk being destined to have world-wide acceptance... His son, Harry Willis Miller, Jr. had returned preceding his father and had started a small soy milk plant in Utica, New York, where he made and bottled soy milk and also made and canned some of the protein foods out of wheat gluten for which they had developed recipes. This plant was later moved to Mt. Vernon, Ohio, after they started the soybean plant at Mt. Vernon.”

Interview with Willis Miller. 1981. After he returned to the USA from Shanghai, Willis started this company, named Miller’s Soy Foods, in Utica, New York, in 1938. Later that year he moved it to Washington, D.C. and was successfully making and marketing canned soymilk, tofu used in a tofupimiento spread, okara spreads, and gluten cutlets. When Dr. Miller returned to the U.S. he suggested that he and his son go into business together. Willis liked the idea.

210. Montagné, Prosper. 1938. *Larousse gastronomique* [Larousse gastronomique]. Paris: Librairie Larousse. 1087 p. See p. 989-90. [Fre]

• **Summary:** The following are defined under “*Soja ou Soya*”: Introduction. Tofu (*fromage de soja*), soymilk, (*lait de soja*), soy sauce (*sauce ou extrait de soja*), soy meat (*viande de soja; viande végétale*). The soy meat, which resembles smoked ham, is said to be very complicated to make, requiring industrial equipment. An illustration (p. 990) shows a soybean plant, including enlarged insets of the flowers and pods.

Note: This is the earliest French-language document seen (Nov. 2014) that uses the term *viande de soja* or *viande végétale* to refer to meat alternatives. Address: France.

211. Photographs of Madison College in Madison, Tennessee. 1938? Undated.

• **Summary:** These black-and-white prints were sent to Soyfoods Center in 1983 by Ed Bisalski. Most are pasted onto heavy brown cardstock paper in a 3-ring scrapbook, which has a neat, handwritten description of each photo in black ink.

The photos are: (a) A display of Madison Foods featuring Soy-Koff (“coffee flavor without coffee effects, alkaline,” 20 cents for 25 cups), Kreme O’Soy Milk (“a pure tasty vegetable milk,” plain or chocolate, homogenized, 15 cents or 25 cents) and Kreme’O-Soy Crisps (ready-to-eat, malted soy crumbles, 13 cents or 2 for 25 cents).

(b) “Madison Foods college industry. Bread molding. specializing in the manufacture of soy bean foods—bread, crackers, cereals, flour, cheese, milk, coffee substitute, canned soy beans, meat substitutes. Sold in 48 states—Health Food Stores, Department stores, Specialty Grocers, etc.”

(c) Madison Foods plant.

(d) The 400-acre farm provides for the stock [animals], for the college kitchen, sanitarium kitchen, and campus store. A female student in the “Soy bean patch.”

**212. Product Name:** Not-Meat (Smooth-Textured Loaf for Meatless Entrees or Sandwiches or Salads).

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1939.

**Ingredients:** Whole peanut meal, soy flour, seasonings.

**Wt/Vol., Packaging, Price:** No. 2 can. 20 oz.

**How Stored:** Shelf stable.

**Nutrition:** Protein 13.4%, fat 19.2%, carbohydrates 5.4%, ash 2.1%, calories 248/100 gm.

**New Product–Documentation:** Madison Health Messenger. V. 49-2. p. 5.

Mildred Lager. 1940. Madison Health Messenger (Madison, Tennessee) 2(3):1-4. “Foods for summer health.” Not-Meat is made with unroasted peanut meal and seasoning.

Ad (2¼ by 3 inches) in *Nature’s Path* (USA). 1941. July. p. 273. “A treat without meat.” Not-Meat is one of five basic food products made and sold by Madison Foods.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in “Not-Meat (Nutrition International Corporation).” They are: Peanuts, processed soybeans, yeast extract, salt, hydrolyzed vegetable protein. Note: By 1971 Nutrition International Corp. had become part of Worthington Foods. The plant at Madison had been closed in Aug. 1970.

**213. Product Name:** Stake-Lets (Meatless Meat Loaf in a Rich Meatlike Sauce) [Sliced, or Bite-Size].

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1939.

**Ingredients:** Gluten, soybeans, soy sauce, seasonings. In 1960 the ingredients were gluten, whole wheat, soy flour.

**Wt/Vol., Packaging, Price:** No. 2 can. 20 oz.

**How Stored:** Shelf stable.

**Nutrition:** Protein 18.2%, fat 4.3%, carbohydrates 2.1%, ash 0.5%, calories 120/100 gm.

**New Product–Documentation:** Ad (2¼ by 3 inches) in *Nature’s Path* (USA). 1941. July. p. 273. “A treat without meat.” Stake-Lets is one of five basic food products made and sold by Madison Foods.

Madison Health Messenger. V. 49-2. p. 5. Taylor. 1944. *The Soy Cook Book*. p. 201.

**214. Product Name:** Proast (Meatless Gluten-Based Meatloaf).

**Manufacturer’s Name:** Special Foods, Inc. Renamed Worthington Foods, Inc. in Dec. 1945.

**Manufacturer’s Address:** Worthington, Ohio.

**Date of Introduction:** 1939.

**Wt/Vol., Packaging, Price:** 8 oz, 17 oz, and 30 oz can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Wholesale price list. 1941. Oct. 1. 8 oz retails for \$0.20 and 30 oz for \$0.55. This dark gluten-based meatloaf analogue, made with wheat gluten, peanuts, and a little defatted soy grits or flakes, resembled

Battle Creek's Protose.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Proast contains 25.40% protein, 8.88% fat, and 9.28% carbohydrate. *Chopletter* (Worthington Foods, Ohio). 1960. "What you should know about Worthington Foods." April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Proast.

Note: This is the earliest known food product made by Special Foods, Inc. It is also their earliest known products that uses wheat gluten as a major ingredient or soy (soy flour) as a minor ingredient.

215. Kloss, Jethro. 1939. *Back to Eden: A book on herbal remedies for disease, and other natural methods of healing*. 1st ed. [Washington, DC]: Published by the author. vii + 667 + [25] p. Illust. Portrait. Index. 21 cm.

• **Summary:** This treasury of herbal lore and vegan cookbook (it uses no dairy products or eggs, replacing them with soy products) is one of the most creative and original sources of early soyfoods recipes. Contents: Foreword. 1. Personal experiences. 2. Soil. 3. History of medicine. 4. Fresh air and exercise. 5. Fasting. 6. Effects of devitaminized, adulterated foods on the body. 7. Fruit diet. 8. Meat-eating. 9. Foods. 10. Diet. 11. Aluminum utensils. 12. Cooking under steam pressure. 13. Disease of animals. 14. History of water cure. 15. Water. 16. Water-effects and treatment. 17. Water-its effect in sickness. 18. Baths. 19. Compresses and fomentations. 20. Massage. 21. High enemas. 22. Nursing. 23. Fruits. 24. The eliminating diet. 25. Minerals found in the body. 26. Herbs. 27. Medical trees. 28. Tonics. 29. Herbs (Their description and use in treating disease). 30. Definitions of medicinal properties of herbs. 31. Herbs indicated for specific diseases. 32. Directions for use of non-poisonous herbs. 33. Treatment of disease. 34. Food preparations of various kinds. 35. Oranges. 36. Potatoes; gathering and preserving of herbs.

The Foreword states: "This book contains tried, safe, and inexpensive remedies for the prevention of disease and sickness, remedies which are the result of my own practical experience of nearly forty years." "No matter how many germs get into the body, if the blood stream is clean and the blood corpuscles are in a healthy condition, you will be safe. Everyone comes in contact with many kinds of germs, but these organisms will not harm you or cause you sickness and death unless they have a place in which to propagate themselves." Sickness and illness are "caused by violating the laws of nature and health. "If then they would resort to simple means and follow the basic laws of health that they have been neglecting—proper diet, use of pure water, fresh air, sunshine, rest, and nature's remedies, herbs, etc., nature would restore the body to its original health." "God has provided a remedy for every disease that might afflict us."

"The fundamental principle of true healing consists of a return to natural habits of living."

Virtually all of the information on soybeans and soyfoods is in chapter 34, "Food Preparations of Various Kinds" (p. 582-633). First come two sections of text: "The nutritional value of the soybean" (p. 582-84; "Taken from an address delivered by Dr. J.A. LeClerc, before the annual meeting of the American Soybean Association. Sept. 15, 1936"). "Uses of the soybean for industrial purposes" (p. 585).

Then comes an introduction soy-related recipes (p. 585-87): "The knowledge of the value of the soybean here in America is one of the greatest things that was ever launched in the food line in the history of the nation, and at this time of great poverty [the Great Depression], want, and disease, it is the most important thing that could be given the people." "Soybean milk can be made from soybeans at home for less than two cents a quart." Soybean milk "is not only a good food, but a real medicine." It is easily digested and highly alkaline. "I have experimented with soybeans for fifteen years [since about 1924] and have produced a fine, acceptable soybean milk as well as many other soybean products." "I use soybeans in more than fifty dishes."

Then come recipes (p. 587+): Soybean cheese (fermented soybean milk, peanut butter, and tomato puree, p. 587). Soybean cream cheese (from fermented soybean milk, p. 588). Nut cheese no. 1 (fermented soybean milk, peanut butter, and soybean butter {see p. 613}, p. 588). Nut cheese no. 2 (raw peanut butter, ground oatmeal flour, water and salt [no soy], p. 589). Nut milk (made with raw peanut butter and cow's milk [no soy], p. 590). Canned soybeans (p. 592). Soybeans and rice (with sprouted soybeans). Baked beans with tomato sauce (incl. soybeans, p. 593; "Soybeans are, no doubt, the best of all beans, but the flavor is not as pleasant. This can be overcome by using various seasonings, such as tomato sauce, a little onion, and celery). Vegetable protein (wheat gluten seasoned with soy sauce, p. 597). Nut loaf (seasoned with soy sauce). Kloss' granola (with soybean milk and soybean mash [okara], p. 599). Baked rice (natural brown rice baked in soybean milk, p. 600). Soybean coffee plus 2 recipes for Cereal coffee based on rye or wheat bran [real coffee with caffeine is not included]. Soybean broth (with soybean milk and oatmeal, p. 604-05). Oatmeal broth (with soybean milk). Soybean buttermilk (fermented, p. 605-06; "Buttermilk is an excellent article of diet for everyday use, but is especially beneficial in malnutrition, tuberculosis, toxic conditions, and intestinal infections. Soybean buttermilk has the advantage of producing an alkaline effect and is more nourishing than ordinary buttermilk. It is rich in minerals and very palatable. More nourishing than yogurt buttermilk used under various names."). Soybean cheese (fermented soybean milk, raw peanut butter, and tomato puree). Soybean cottage cheese (fermented soybean milk, p. 608). Soybeans and rice (with sprouted soybeans, p.

608-09). To sprout soybeans, lentils, or grains (p. 609). Soy patties (with soybean pulp [probably ground soybeans, not okara] and soy sauce). Gluten patties (seasoned with soy sauce, p. 610). Soybean loaf. Soybean cottage cheese loaf. Soybean milk. Soybean milk no. 2 (made from “soy meal, p. 611). How to curd [soybean] milk (p. 612). Soybean jelly (soybean milk jelled with agar-agar flakes and sweetened with malt sugar). Soybean butter (made with 1 cup water, 2 tablespoons soybean flour, and 2 cups soybean oil, p. 613). Soybean cream (blend rich soybean milk and soybean oil). Soybean ice cream (made with 2 quarts rich soybean milk, 2 lbs. malt sugar, ½ pint soybean butter or soybean mayonnaise, and 1 tbsp. agar-agar). The yolk of an egg (made with soybean flour, p. 614). Pancakes (with cornmeal and soybean mash [okara]). Tomato soup (with soybean flour, soybean flour, soymilk, and/or soy sauce, Savita, or Vegex, p. 618). Cream of tomato soup (with soybean milk, p. 620). Cream of celery soup. Cream of lentil soup. Vegetable oyster soup (with rich soy milk, p. 622). Eggplant soup (with soybean milk). Cream of spinach soup. Potato soup. Soybean gravy. French toast (made with soybean bread soaked in soybean milk, p. 624). Soy oil mayonnaise (with soy oil and finely ground soy flour, p. 628). Vanilla sauce (with soybean cream, p. 632). Vegetable gelatin (with agar-agar and soybean cream dressing, p. 632). Orange jelly (with soybean cream). Strawberry jelly (with soybean cream). Rice pudding (cooked in soy cream, p. 633). Cream tapioca (with soy cream and soybean milk). Soybean bread no. 1 (with whole wheat flour, soybean mash or soybean flour, p. 648). Soybean bread no. 2. Soybean buns or cinnamon rolls (with soybean meal, p. 650). Cornmeal gems (with soybean milk, p. 651). Oatmeal or soybean gems (with soybean meal). Soybean gems (with soybean mash [okara] out of which soybean milk has been washed, p. 652). Pones (with soybean milk). Beaten biscuit (with soybean milk). Unleavened pie crust (with soybean flour or mash, p. 655). Raised pie crust (p. 656). Soybean pumpkin pie (p. 656). Fig marmalade pie (with soybean milk, p. 657). Mashed potatoes (with rich soybean milk, p. 666).

This book does not call for the use of dairy milk or eggs. Concerning cow’s milk, Kloss states (p. 75): “Cow’s milk is not suited for human consumption. Half the invalids in the world suffer from dyspepsia, and milk should not be taken. Milk causes constipation, biliousness, coated tongue, headache, and these are the symptoms of intestinal auto-intoxication. Soybean milk and nut milks are excellent substitutes, and have practically the same analysis, and the danger of disease is removed.” A recipe on page 614 uses a mixture of soybean flour and soya bean oil as a substitute for the yolk of an egg.

This book contains the same detailed information on the possible dangers of aluminum cooking utensils found in the 1935 edition.

Dominion Herbal College, Vancouver, BC, Canada. (2) “Horta” Pure Vegetable Extract. “Of strong aromatic meat flavor, though made from leguminous materials only.” F. Behrend, Inc., New York, NY. Established 1886. (3) Old-fashioned Quaker mill. No. 4 Quaker City Mill. Ad: Enterprise No. 69, Hand Mill. A.W. Straub Co., Philadelphia, Pennsylvania. (4) Nature’s Original Food Co., Falmouth, Virginia. “Nuts, grains, fruits and vegetables are Nature’s original foods for men. Animal flesh has been substituted. If you want health, don’t use it. “Try our [canned vegetarian] meats—see the difference.” Meatose. Vegetose. To-Meta.

Note 1. This latter company was almost certainly founded and is owned by Jethro Kloss.

According to Doris Gardiner (Oct. 1990), the original book (of which she and her aunt each have copies) has a green hard cover. The first printing was probably done by a Mr. Brunck, who worked for the College Print Shop in Takoma Park, Maryland. She thinks Jethro self-published the book. He paid for the printing and sold the books himself. Jethro and his wife moved to Coalmont, Tennessee. There they lived with the Hiatt family, and Mr. Hyatt, owner of Longview Press (renamed The Message Press by 1964) became the book’s first legitimate publisher. His wife died in 1944. Jethro died in 1946 at age 83. The page numbers from the 1939 edition are unchanged in later editions.

Note 2. This is the earliest English-language document seen (Oct. 2013) that uses the term “Soybean cream cheese” to refer to soy cream cheese.

Note 3. This is the earliest English-language document seen (June 2013) that uses the term “soybean mash” to refer to okara.

Note 4. This is the earliest English-language document seen (Oct. 2013) that contains the term “Soybean cottage cheese” or that has a recipe for it. Address: Washington, DC.

216. Xiaoxiaosheng; Wang, Shizhen; Egerton, Clement C. trans. 1939. The golden lotus: A translation from the Chinese original novel, *Chin p’ing mei*. 4 vols. London: Routledge & Sons. See p. 179-80. 23 cm. \*

• **Summary:** The most food-conscious work of Ming dynasty fiction is the famous novel of sexuality and sensuality, the *Chin-p’ing mei* (first printed in 1621-27) known in Egerton’s translation as *The Golden Lotus*. For details see Hsiao-Hsiao-Sheng (Xiaoxiaosheng) (1621-27).

217. Lager, Mildred. 1940. Healthful philosophy. *House of Better Living (Newsletter, Los Angeles)* 11(49):2. Jan.

• **Summary:** New items include “Canned Soy Cheese. Soyburger. Full line of Madison Foods.”

“We carry liquefiers at four different prices: \$29.95, \$19.95, \$14.95 and “13.95.” Contains a recipe for Carrot soy milk. Ingredients: 1 cup carrot juice, add 1 tbsp. soy flour or milk powder, 1 tsp honey or plain Joyana.

“Liquefied foods have become popular with the new

## ... and here are the famous MADISON HEALTH FOODS approved by The Madison Health Messenger

**SOY-KOFF.** A delightfully satisfying beverage containing no coffee nor caffeine. Prepared the same as coffee. No jangled nerves or upset stomach. Price.....25¢

**WHEATASOY.** A high quality breakfast cereal, made of sun-ripe whole wheat and soy

Price.....10¢ and 25¢

**SOY CHEESE.** In salads, sandwiches, croquettes, omelets or soups adds a delightful zest. Many diabetics use this alkaline food, low in starch and rich in protein.

Price.....10¢ and 25¢

beans, malted and dextrinized, easily digested and alkaline. Price.....13¢

**SOY BEANS.** A rich alkaline food. A low starch food with tomato sauce ready to eat. Delicious tasting and containing rich supplies of phosphorus, calcium, copper and iron. Price....7¢ and 15¢

**SOYBURGER.** Used in place of meat for steaks, cutlets, roasts, salads. An economical, complete, protein food—easy to digest. Contains no animal products. Price .....23¢ and 46¢

**WHOLE WHEAT WAFERS.** A thin crisp and flaky whole-grain wafer rich in the nourishing elements found in sun-ripe whole wheat. Blended with honey and baked, a truly delicious wafer. Price.....12½¢

### Try These Soyburger Sandwiches

Brown slices of Soyburger a half-inch thick on a griddle till well done, then place in bun or between slices of bread and spread out to cover the entire slice or bun. Place in griddle and toast. After removing from the toaster, you may add onion or a vegetable relish.

electric mixers. They are fine and a boon to the person with poor assimilation and digestion..." A number of combinations are given, all starting with fruit juice. "Soy flour or soy milk powder may be added to juice or broth for soy milk drinks." A portrait photo shows Mildred Lager.

Note 1. A section titled "Soyburgers" on p. 4 explains that the Soyburger and Canned Soy Cheese mentioned above are both made by Madison Foods of Tennessee. Separately, soy chocolate is mentioned.

Note 2. A small ad on p. 3 is for waffles: Soy wheat-wheat germ. Soy corn (contains no wheat). Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

218. Madison Foods. 1940. Free! \$1,000.00 in valuable prizes (Ad). *Madison Health Messenger (Madison, Tennessee)* 2(3A):2. Undated.

• **Summary:** This ½-page ad contains a photo that shows the

front panel of each of 13 products made by Madison College; a brief description of each food is also given.

The text above the ad reads: "Contest closes at 12 midnight, February 15, 1940—and here are the famous Madison Health Foods approved by the Madison Messenger."

Those not mentioned in the previous issue are Wheatasoy (a breakfast cereal). Soyburger (new name for Soyburger Loaf). Stake-Lets (a gluten-soy loaf).

A price list, similar to but expanded from that in the last issue, appears on page 6. Address: Dept. HMM-1, Madison College, Tennessee.

219. *Madison Survey (Madison, Tennessee)*. 1940. Rapid growth of Madison health food production and consumption. 22(5):17-19. March 13.

• **Summary:** "When, the last of November in the year just past, a carload of health foods started for the Pacific Coast—the first shipment of that size—it seemed that a decided

step had been taken in the advancement of the health food industry. Milo Frank, Los Angeles, is jobber distributor for the South Pacific. He services 250 health stores in California. The North Pacific region, Western Canada, and Alaska are served by Western Natural Foods, Seattle [Washington].

“Coming east, we find Health Food Jobbers, Chicago [Illinois], serving metropolitan Chicago; Sherman Foods, serving metropolitan New York; and Modern Foods, Wollaston, Massachusetts, serving metropolitan Boston.”

Madison Foods’ products mentioned in this issue are: Nutmeat, Soy Beans, Soyburger, Soy Cheese, Soy-Koff, Vigorost, Wheatasoy.

Periodicals mentioned include: (1) *Health News Reporter*, winter issue, 1939-1940. (2) *Health Foods Retailing* (Chicago), edited and published by Lelord Kordel; it is a bi-monthly trade journal for the health food industry.

220. De Weese, C.W. 1940. The “vegetable cow.” *National Food Distributors’ Journal* 14(4):5-6. March. Reprinted in *Madison Health Messenger* (Madison, Tennessee) 2(3):1-3 (1940).

• **Summary:** “Suppose there were suddenly to occur a complete disappearance of all meats, milk, eggs, cheese, potatoes, wheat, and grains. Suppose further, that we were deprived of every other food known, with the exception of one vegetable. What single vegetable would you choose to live on if such an even should happen?”

The author would choose the Soy Bean. The people in the land where it originated call it the “Vegetable Cow.” He discusses industrial uses of soybeans (plastics, paint, etc.), soy bean flour, “roasted soy bean nuts,” and the many important nutrients found in soy beans.

Note: This is the earliest English-language document seen (Dec. 2012) that uses the term “soy bean nuts” or “roasted soy bean nuts” to refer to soynuts.

“Alkaline preparations are used daily by millions; perhaps they are necessary as we certainly are a nation of excess acid human beings. Most of the foods we eat form acid in the digestive process. Therefore, the alkalinity of the Soy Bean is good news and particularly so because when properly cooked they are delicious to eat in many different ways. Apparently they provide a diet that is adequate and well balanced.”

“In Washington, DC, a milk route has been established for Soy Bean milk. Soyburgers have made their appearance. Pancake flour, cereals, cheese, substitute for egg whites, flour for baking, ground meal, coffee, baked and boiled beans, and many other foods can now be had or are in the process of going on the market.”

221. Lager, Mildred. 1940. Summer foods for health. *Madison Health Messenger* (Madison, Tennessee) 2(3B):1-4. Undated.

• **Summary:** A large photo shows Miss Lager, next to a

KFAC microphone. For 6½ years she has been broadcasting over the radio four times a week on station KFAC in Los Angeles. “She is the founder of the House of Better Living, and a tireless worker for better living. Her weekly free classes draw hundreds of people for instruction in healthful cookery and healthful living.”

She writes that now is a good time “to cut down on rich foods and the acid-forming foods, using instead the alkaline-forming foods and the bulk foods for the natural eliminative effects... With a liberal intake of the alkaline-forming foods, one may be assured of the natural alkalizers which neutralize body acids and in this way assist in the protection of health... Acid wastes produce fatigue; alkaline-forming foods neutralize the acid wastes to restore the normal body tone and stamina.

“The summer diet must necessarily contain adequate complete proteins, for protein foods are necessary for cell repair and growth... A lack of protein may cause retarded growth, lack of vigor, and poor appetite... The vegetable proteins are nuts, soy beans, legumes, and in general they are found in all vegetables. The proteins of nuts and soy beans are classed as complete proteins and are therefore especially desirable. The animal proteins are acid-forming, whereas the vegetable proteins are alkaline-forming. Animal proteins are also more putrefactive than vegetable proteins. The soy bean and nuts can be used in a great many tasty ways.”

Among the many recipes for summer the following include soyfoods: Cocktails—Soy milk and carrot (“Soy milk is a fine, alkaline, soft food. Excellent for those with sore conditions of the digestive tube.”) Protein salads—Soy bean salad. Soy cheese [tofu] tomato salad. Mock shrimp salad (with Zoyburger). Entrees—Soy cheese cutlets. Zoyburger and mushroom sauce. Mock turkey legs (with Vigorost as the main ingredient). Broiled Vigorost with ripe olive sauce. Platter of cold cuts (Vigorost and Zoyburger). Hot Zoyburger sandwich. Stake-Lets (canned) for picnic dinner. Alkaline breakfast food—Wheatasoy. Alkaline beverage—Zoy-Koff (coffee substitute). Soy bean milk (Kreme O’ Soy). Complete protein foods: Zoyburger, Vigorost, Stake-Lets, Not-Meat (made with unroasted peanut meal and seasoning), Soy Cheese, and Soy Beans. A brief description, nutritional analysis, and price is given for each product. “None of the Madison Foods contain animal products.” A portrait photo shows Mildred Lager next to a KFAC radio microphone. The caption states that for 6½ years Miss Lager been broadcasting over the radio in Los Angeles. “She is the founder of the House for Better Living, and a tireless worker for better living. Her weekly free classes draw hundreds of people for instruction in healthful cookery and healthful living. Miss Lager is the author of *Food Facts*.”

Note 1. This is the earliest document seen (Oct. 2014) that mentions or gives a recipe for a soy-based meatless turkey. Vigorost, a meatless / vegetarian roast introduced by Madison Foods in 1932, used wheat gluten and tofu as its

two main ingredients.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the word “Zoyburger,” an early, popular vegetarian burger in the United States.

Although this issue is not dated, it contains the reprint a current article published in March 1940.

222. Madison Foods. 1940. Price list [of products made by Madison Foods] (Ad). *Madison Health Messenger (Madison, Tennessee)* 2(3B):5. Undated.

• **Summary:** Breakfast cereal: Wheatasoy (9 oz).

Beverages: Zoy-Koff (No caffeine [caffeine]; 12 oz.).

Kreme O’Soy Milk (plain, liquid, 15 oz and 29 oz; chocolate, liquid, 29 oz). Crackers: Thin-Things \*\* (5 oz). Whole wheat wafers \*\* (5 oz). Bran wafers \*\* (6½ oz).

Canned protein foods (used in place of meat): Zoyburger (14 oz, 30 oz). Stake-Lets (14 oz, 30 oz). Not-Meat (5 oz, 14 oz, 30 oz). Vigorost (5 oz, 14 oz, 30 oz). Soy cheese [tofu] seasoned (5 oz, 14 oz, 30 oz). Soy Beans with Tomato (5 oz, 14 oz, 30 oz). Kreme O’Soys, plain (14 oz).

Flour: Kreme O’Soy Flour (2 lbs, 5 lbs).

Note 1. Asterisks in the printed list indicate that all products except Whole wheat wafers, bran wafers, and Not-Meat are “Soy Bean Foods.” \*\* = Wheat germ added.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the word “Zoyburger” (or “Zoyburgers”).

Although this issue is not dated, it contains the reprint of a current article published in March 1940.

223. *Eat For Health (Rosenberg’s, San Francisco)*. 1940. The versatile soy bean: Food of a thousand uses. Spring. p. 6-9.

• **Summary:** “Man’s search for the perfect food, like his search for the Fountain of Youth, has never been entirely successful. As usual, it took the Orientals to discover the qualities of the almost-perfect one—the soy bean.” This bean, which is rich in high-quality protein, can be used to make soy flour for use in preparing “richer soups and in the baking of excellent breads; meat substitutes in the nut form are very appetizing; the oil is good in salad dressings, and the sprouted seed is a tasty vegetable.

“The Chinese were the one to introduce sprouted soy beans as a vegetable; practically everyone who has eaten chow mein knows the succulent shoots contained therein.” Soy sauce is, of course, “the standard flavoring for chow mein, imparting a salty tang. The legume is very good cooked liked lima beans [as a green vegetable], too, and is even more alkaline than the latter.

Soy milk “is richer than cow’s milk in calcium, phosphorus and iron.

“In spite of the large percentage of its fat, the soy bean does not induce obesity. Instead of being stored in the body, as are other oils and fats, soy bean oil is immediately useable

by the bodily metabolic process.” Moreover, “the soy bean has practically no starch, so those keeping a careful eye on their weight can derive the full benefits of its other qualities without worrying about gaining.

“This lack of starch is a distinct advantage to the diabetic too,” and many diabetic foods can be prepared from soy beans.

“Solidified [hydrogenated] soy oil is an excellent shortening for cakes and pastry;... Soy bean oil is also “capable of use as butter.”

When soy beans are cooked, then put through a good grinder or coarse sieve, they become “soy bean pulp,” which offers many possibilities to the venturesome cook.

“Green soy beans are a very good salad vegetable after steaming and chilling.” And “the soy bean is a delightful snack when eaten as the peanut is. Toasted, it has much the same flavor and is just as energizing.”

“Editor’s note: We carry a large variety of soya bean foods—practically everything from soya oil and flour to those delightful toasted ‘soya nuts’ that make a hit wherever served. Come in soon—we’ll be glad to show you.

Contain three “Delicious soy recipes”: Soy mock turkey (with “½ cup soy cracks” [cracked soya nuts] and “½ cup browned soya flour”). Soy bean soup (with “1 cup soy bean pulp” [ground, cooked whole soybeans]). Soy-wheat biscuits (with “½ cup soy bean flour”). Soy bean salad (with “2 cups cooked soya beans”).

A small photo shows “water-sprouting of soy beans”—four stages in the process of transforming whole dry soy beans into sprouts. Address: Rosenberg’s Original Health Food Store, 1120 Market St., San Francisco, California. Phone: MArket 3033.

224. Madison Foods. 1940. Satisfying meatless entrees (Ad). *House of Better Living (Newsletter, Los Angeles)* 11(53):4. May.

• **Summary:** “Soyburger. Stake-lets. Vigorost. Not-meat. Soy cheese [tofu]. These foods have been designed by a group of experts in the field of nutrition to adequately take the place of meat.

“Get a free copy of the *Madison Health Messenger*, for complete list of foods and recipes.” Address: Madison College, Tennessee.

225. **Product Name:** Roberts’ Soy Nut Brawn, Soy Nut Cheese.

**Manufacturer’s Name:** Roberts (F.G.) Health Food Products.

**Manufacturer’s Address:** 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.

**Date of Introduction:** 1940 May.

**Wt/Vol., Packaging, Price:** Tin-plated steel can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Article in *Nature’s Path*

to *Health (Melbourne, Australia)*. 1940. May. Article in *Nature's Path to Health (Melbourne, Australia)*. 1940. June. "Just what you have waited for! Better health foods." A large illustration (line drawing) shows the four canned products, with the Soy Nut Roast in the largest can (1 pound) and the Soy Bean & Tomato in the smallest. "Among the more recent additions to the many lines of food produced by F.G. Roberts is a line of Better Nut foods. Very shortly now this line of health foods will be available for the purchasers of Nut Foods in all the Roberts Health Food Shops, and later in other wide awake grocer shops."

Ad in *Nature's Path to Health*. 1940. July. p. 8. "Roberts' Better Nut Foods." The same line drawing described above is shown. The cheese, brawn, and roast are described briefly in non-specific terms. "Packed in three sizes: 16 oz., 8 oz., 4 oz." Ad in Aug. 1940 issue, p. 6. "Roberts' Better Nut Foods." A photo shows the cans. The same photo and a similar ad appeared in the May/June 1943 issue, p. 26, and the Oct/Nov. 1946 issue, p. 24. However in these last two issues, only Soy Nut Roast and Soy Nut Cheese are described in the ad text.

Ad in *Nature's Path to Health*. 1940. Nov/Dec. p. 30. "Roberts' Soy Nut Recipes." The same line drawing described above is shown. The following recipes are given: Quick cutlets (made with Soy Nut Roast). Tomato stew (made with Soy Nut Roast). Nutmeat mince (made with Soy Nut Roast). Roast soya nut cheese (made with Soya Nut Cheese, which is sold in ½-lb or 1-lb tins). "Supplies always available at the Roberts Health Food Shops Throughout Australia."

**226. Product Name:** Protone-Soytone-Nutone.  
**Manufacturer's Name:** Hain Health Foods.  
**Manufacturer's Address:** Los Angeles, California.  
**Date of Introduction:** 1940 June.  
**New Product–Documentation:** Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 42. "Hain's Products: Hollywood Foods (Meat Substitutes)–Protone-Soytone-Nutone. 7½ oz. can \$0.15. 14 oz. can \$25."

**227. Product Name:** Gluten Steaks.  
**Manufacturer's Name:** Loma Linda Food Co.  
**Manufacturer's Address:** Loma Linda, California.  
**Date of Introduction:** 1940 June.  
**New Product–Documentation:** Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 52. "Loma Linda Foods: Vegetarian Meats. Gluten Steaks. \$0.15. \$0.35."

**228. Rosenberg's Original Health Food Store and Whole Wheat Bakery.** 1940. Catalog of health foods and manual of valuable health information. San Francisco, California. 76 p. Undated. Illust. 17 cm. Index

• **Summary:** Cover title: "Health from foods." Also on title

page: "Eat to get well. Eat to keep well." "Where good health originates." "No branch stores." Contents: About your health, by Morris Rosenberg, president. Shop by mail. Parcel post scale. Eat to get well–Eat to keep well (rules and guidelines, p. 4). Vitamin chart (for each: Functions, results of deficiency, most reliable sources, p. 5-8). Biological chemistry of foods–Minerals (p. 9-10). List of products available, by product type, with weight and price. Incl. Soy bean bread, Soy toast, Soy bean wafers, Soy cookies (p. 12). Natural brown rice. Sun-dried, unsulphured California fruits. Salted nut meats (almonds, peanuts, cashews, pecans, p. 16), Nut butters (unroasted and unsalted: Almond butter, Nut cream butter {Carque}, Peanut butter, Cocconut butter, Smucker's apple butter, Peanut oil (2 brands). Parkelp (minerals of the sea). Salt substitutes.

List of products available, by manufacturer or source, with weight and price. Incl. Battle Creek Health Products [Michigan] (p. 18-19): Beverages (SoyKee, Kaffir Tea), Gluten biscuit, Vegetable meats (Protose), Savita yeast, Psyllium seed. Cellu Dietetic Products: Canned vegetables (Soy bean oil, Soy bean spread, Soy flakes, Soy grits). Di-Mel (dietetic food products): Gluten crackers, Soy-Rina cereal (to be cooked). Alberty Food Products: Cero-Fig coffee substitute. Modern Diet Products [Gayelord Hauser], incl. Juicex (electric juicing machine), and Fletcherizer (juicers). Radiance Health Products (Los Angeles, p. 30-31). Tam Products (Joyana, the remarkable soybean health drink, plain or chocolate flavor). McCollum Laboratory Products (Soy-A Granules–Soy breakfast food). Penna Soya Products (soy foods): Tenderized whole soybeans, Toasted soy flakes, Toasted soy nut butter (8 or 16 oz), Soy malt–chocolate flavor, Creamee Soy Best (soy milk powder). Mrs. Hauser's Soya Products: Hot cake and waffle mix, Pancake and muffin mix, Soya cereal. Hain's Products (Hain Pure Food Co.): Nature's Best Foods: Assorted candy bars, Fruit juices (6 types), Vegetable juices (7), Hollywood Foods (Meat substitutes: Protone-Soytone-Nutone, SoyBean with Tomato Sauce, SoyBeans T.S. & Protone, Soya sandwich spread), Nut butters (raw–Almond, cashew, pecan). Nut butters (roasted–Almond, cashew), Olive oil (California virgin). Hain's vitamins. Alvita Products. Live Food Products (Paul C. Bragg). Books by Paul C. Bragg (*Paul C. Bragg's Personal Health Food Cook Book. Building Health and Youthfulness Nature's Way. Awaken Health and Happiness. The Art of Feminine Loveliness. Health Cocktails, The New Way to Health, Beauty and Youthfulness. The Chart of Scientific Diet*. Note: The first 4 books cost \$1.00 each. The last two cost \$0.25 and \$0.10, respectively). Loma Linda Foods (Tasty, wholesome, nutritious): Cereals (5), Soy products (Soy beans–plain, Soy beans with tomato, Soy beans with Proteena, Soy milk, Soy mince sandwich spread, Soy milk, Soy mince sandwich spread, Soy weet wafers, Fruities, Fruit wafers, date sandwiches), Vegetarian meats (Proteena {plain, smoked flavor, or mushrooms}), Nuteena,

Gluten steaks), Other choice foods (Garbanzos, Savory lentils, Wheat kernels, Savorex). Radcliffe's Famous Soya Products: Diabetic soya bars (flavors—maple, mocca, dark), Soya bon bons (light or dark), Soya candy bars, Soy milk powder, Soy milk powder—Cello, Cocoanut milk powder (8 or 16 oz), Soya malt (8 or 16 oz, 5 lb; Flavors—Nut, mocca, banana, plain chocolate), Soya beverage—coffee, Malvitose beverage (8 or 20 oz), Soya paste [pasta?] (7 or 14 oz), Soya ravioli, spaghetti, macaroni (7 or 15 oz, 2 lb), Unsweetened soya bean chocolate. Cubbison's whole wheat products. Bill Baker's flour: Lima and pancake flour, Soya and wheat flour, Lima bean cookies, Soy bean cookies. Figco instead of coffee. Carque's natural foods. Carque natural brands. Books by Carque. Therapy, Ltd. (Pasadena): Theradophilus (a pure condensed acidophilus culture in soy bean milk). Health publications (22).

Health recipes (p. 68-71): Soya cup cookies. Soya loaf with rice. Soya cup custard. Soy bean goulash. Soy bean bread. Soy flour applesauce cake. Soy bean vegetable soup. Soy macaroni, noodles, or spaghetti. Baked soy bean croquettes.

Key to calories. The four types of foods: Regulatory, body-building, energizing, heating. Index.

On the rear cover is an ad for the Juicex ("makes fresh, pure, undiluted vegetable juices"—\$49.50. A photo shows this modern-looking electric juicer. Fruits and vegetables as pushed—using a wooden pusher—into a small hopper on top. The juice runs out of a spigot into a glass) and Fletcherizer [electric blender] ("The new 1940 model has all the latest improvements in construction and appearance. It liquidizes, whips, mixes, and chops..." \$14.95). Across bottom of ad: "See these products demonstrated at our store."

Note: This 1940 date, plus other internal evidence, gives us a good estimate for the date of this undated catalog. Address: 1120 Market St., San Francisco, California. Phone: MArket 3033.

**229. Product Name:** Miller's Mien Jing. Renamed Savory Vegetable Cutlets. Renamed Miller's Vegetarian Cutlets by Sept. 1946, then Miller's Vegetarian Cutlets (Mien Jing) by Jan. 1946, and Miller's Vegetarian Gluten Cutlets by 1948.

**Manufacturer's Name:** International Nutrition Laboratory.  
**Manufacturer's Address:** Mt. Vernon, Ohio.

**Date of Introduction:** 1940 November.

**Ingredients:** Incl. wheat gluten and probably soy sauce.

**Wt/Vol., Packaging, Price:** Canned, No. 10, 30 oz. or 20 oz.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** *Ohio Farmer*. 1940. Nov. 30. p. 10. "Now it's soybean milk!" At their plant in Mt. Vernon, Ohio, Dr. Miller and his sons make Mien Jing, based on the "gluten of wheat flour, to which is added fresh vegetables and soya sauce, making a nutritious food with a meat-like flavor."

International Nutrition Laboratory. 1940? "Miller's Soy Bean Foods." Undated 12-page leaflet. 4. Miller's Mien Jing: Wheat "gluten, or cereal protein, is the basic food element in Miller's Mien Jing. Mien Jing is the Oriental name meaning processed gluten. A high protein wheat flour is washed free of starch, and small slices of the remaining gluten are processed with fresh vegetables and soya sauce, making a highly nutritious food, quite meat-like in taste. This gluten food was first introduced into this country by us, and our Mien Jing, or gluten cutlets, has the genuine flavors that have popularized this food in the Orient... It requires only a little cooking to make Mien Jing into many savory dishes, such as stews, croquettes, entrees, and also Oriental dishes such as Chow Mien and Chop Suey."

Ad in *Soybean Digest*. 1942. Sept. p. 16. "Miller's Soya Products." Ad in *Soybean Digest*. 1944. Sept. p. 61. "Meet the Vegetable Cow." International Nutrition Laboratory now sells Miller's Vegetarian Cutlets in uniform slices or diced form. This popular product has a high protein value.

Ad in *Soybean Digest*. 1946. Sept. p. 79. "No meat?—Try Cutlets." A large photo shows the can of "Miller's Vegetarian Cutlets (*Mien Jing*). The front panel states: "Delicious when grilled or broiled. Protein food for meat pies, grills, chop suey." The ad text reads: "You may be one of those many folk who will consider Vegetarian Cutlets as a more satisfactory article of diet than fish, fowl, or meat. This tender meat-protein substitute is manufactured from a selected portion of the wheat [gluten], healthfully prepared and tastily flavored, providing a highly nutritious and tempting food for any meal. Cutlets are very low in starch, high in body building qualities, resemble meat in taste.

"Miller's Cutlets may be prepared and served in many ways—lightly grilled as they come from the can—dipped in egg and rolled in cracker crumbs, corn meal, or potato flour and browned—used in stews, pot pies, and chop suey. With these delicious cutlets a quick meal, balanced in protein, can readily be prepared.

"Miller's tenderized cutlets are packed in three sizes: No. 10, 30 ounce, 20 ounce. If your dealer does not have Miller's Cutlets, write for information."

Note: The Chinese name on the label probably indicates that Dr. Miller learned about this gluten-based product during his years as a physician in China, and that he was marketing it to Chinese-Americans (as well as Caucasians) in the USA.

*Soybean Blue Book*. 1948. p. 84.

Talk with Clarence Miller. 1986. The best seller at Mt. Vernon was Miller's Vegetarian Cutlets, a canned gluten entree, but they were not so profitable since they cost so much to make. 100 lb of flour yielded only 30 lb of gluten and 70 lb of starch. The latter was sold for wallpaper glue.

230. Lager, Mildred. 1940. New items not listed in our catalog. *House of Better Living (Newsletter, Los Angeles)* 12(59):4. Nov.

• **Summary:** Items are listed by category in 2 full-page columns. Bakery goods: Penna 100% soy cookies, pkg. 18¢ (Lemon, almond, vanilla and chocolate flavor). Soy orange drops, doz. 15¢. Bill Baker's 100% soy bean cookies, pkg. 10¢.

Breakfast foods: Soy grits, lb. 20¢.

Coffee substitutes: Brevy. Nuveco. Figo in bags, box 25¢. Soy Koff, regular or drip, pkg. 25¢. Kofy Sub, Dr. Jackson. Cassa Fistula Bean. Date sugar.

Figs: Black Mission. Kadota. Calimyrna.

Dulse tablets, Thompson. Cereophyl tablets or powder (powdered grass [like chlorophyll]).

Juices—unsweetened: Soy and carrot juice, 8-oz. 10¢; 16-oz. 15¢.

Kitchen equipment: Zippy juicer, \$49.50. Juice-O-Mat, \$3.29. Hollywood Liquifier, \$24.75. Note 1. This is the earliest English-language document seen (July 2006) that uses the word "Liquifier" to refer to an electric blender, or that mentions the "Hollywood Liquifier," an early brand of electric blender, or that contains the word "Hollywood" in the name of an electric blender.

Meat substitutes: Vegelona, 10¢, 25¢ can. Yum, 10¢, 25¢, 50¢ can. Gluten steak, 17¢, 27¢ can. Note 2. This is the earliest English-language document seen (Feb. 2005) that contains the term "Gluten steak."

Noodles: Pfaffman [Williamsport, Pennsylvania] soy noodles, pkg. 13¢; 2 for 25¢. Gluten noodles, pkg. 25¢. Peanut oil, unrefined.

Penna Soya Products: Toasted soy nuts, pkg. 5¢; ½-lb 20¢; 1-lb. 36¢. Tenderized soy bean, 1-lb pkg. 25¢. Rokusun soy bean, lima type, 1-lb. pkg. 25¢. Soya puffs, ½-lb. can 25¢. Soya malt, ½-lb. 23¢; 1-lb. 43¢. Soya cocoa malt, ½-lb. 23¢. Soya cocoanut, ½-lb. 23¢. Soya banana, ½-lb. 30¢. Soya milk powder, plain, 1-lb. can 25¢. Soya milk powder, sweetened, 1-lb. can 25¢. Soya roast, 15-oz. 25¢. Soya loaf, 15-oz. 25¢. Soya sauce, 4-oz. 12¢; 8-oz. 19¢; 16-oz. 35¢. Soya virgin oil, 4-oz. 15¢; 8-oz. 23¢; pint 37¢; quart 67¢; ½-gallon \$1.05; gallon \$1.95. Soya cookies, 100%, pkg. 18¢.

Salt: Bragg Sprinkle, can 50¢. Soy-B-Malt, Cubbison, 8-oz. 25¢.

231. **Product Name:** Yum (Bologna-Like Canned Meatless Loaf with Tofu).

**Manufacturer's Name:** Madison Foods.

**Manufacturer's Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1940 November.

**Ingredients:** Soybeans, gluten, soy cheese [tofu], whole peanut meal, seasonings.

**Wt/Vol., Packaging, Price:** No. 2 can. 20 oz.

**How Stored:** Shelf stable.

**Nutrition:** Protein 19.1%, fat 11.1%, carbohydrates 11.5%, ash 2.5%, calories 221/100 gm.

**New Product–Documentation:** Ad (2¼ by 3 inches) in

*Nature's Path* (USA). 1940. Nov. p. 428. "Yum, a new food." "For years Madison Laboratories have been experimenting with this new food to make it very tasty and yet being ever careful not to season it to the point of limiting its appeal to those who like the very spicy foods... Compounded from wheat gluten, soy beans, nut meal and vegetable seasonings, this new food... is right on the front row of body-building protein foods." Gives two recipes: Yum meatless balls. Breaded Yum cutlet. "Free: the *Madison Health Messenger* with new health news, soy bean information, new recipes, charts, etc. Obtain from your health food store or write to: Madison Foods, Madison College, Tennessee."

Madison Health Messenger. V. 49-2. p. 5. Can be used hot or cold. Taylor. 1944. *The Soy Cook Book*. p. 201.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Yum contains 16.00% protein, 5.20% fat, and 11.26% carbohydrate. Not listed in the 1965 *Diet Manual*.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in "Yum (Madison)." The ingredients are now: Wheat protein [wheat gluten], processed soybean, peanuts, soya flour, rolled oats, soy sauce, vegetable oil, tomato puree, onions, yeast extract, salt, garlic, MSG, hydrolyzed vegetable protein, sage.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned product resembling cold cuts, made from wheat [protein] soy, and peanuts. It can also be used in salads or sandwiches. Now made by Worthington Foods.

232. **Product Name:** Soy Roast or Soy Loaf.

**Manufacturer's Name:** Penna Soya Products.

**Manufacturer's Address:** Williamsport, Pennsylvania.

**Date of Introduction:** 1940 November.

**Wt/Vol., Packaging, Price:** 15 oz can.

**New Product–Documentation:** House of Better Living. 1940. Nov. p. 4. 15 oz. can for \$0.25.

233. **Product Name:** Granose Protose (Formerly named Nutmeat).

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1940.

**Ingredients:** Wheat protein, cashew nuts, peanuts, wheat flour, soya flour, yeast, salt, hydrolysed vegetable protein.

**New Product–Documentation:** Manufacturer's catalog. 1980. April.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1940. It has been discontinued.

234. **Product Name:** Granose Saviand (A Meatless

Savoury).

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1940.

**Ingredients:** Wheat protein, cashew nuts, soya flour, yeast, salt, hydrolysed vegetable protein, onion, caramel.

**Wt/Vol., Packaging, Price:** 284 gm (10 oz) can.

**New Product–Documentation:** *The British Vegetarian*.

1960. Sept/Oct. p. 249. Granose produces Savian, containing wheat gluten, ground nuts, yeast extract, onion, and caramel.

Manufacturer's catalog. 1980. April. "A product similar to Protose but with the addition of onion flavouring."

Form filled out and Label sent by Granose Foods Ltd.

1990. June 13. States that the product, made by Granose, was introduced in 1940. Label. 1990. 8.5 by 3.75 inches. Orange, black, and yellow on white. Two color illustrations of a Savoury (like a U.S. turnover, with a crust) on a plate with a spatula underneath it. "A blend of wheat protein and nuts. Contains no animal products. Savian is a delicious savoury which is ready to serve either cold with salads or hot in pies, hot pots, etc. Slice or dice it. Ingredients: Wheat protein, water, peanuts, soya flour, yeast, salt, hydrolysed vegetable protein, onion powder, caramel. Dietary analysis upon request." This canned product is similar to Spam or Nuttolene. It is not sold in the pastry crust.

235. **Product Name:** Miller's Soya Loaf (Meat Substitute).

**Manufacturer's Name:** International Nutrition Laboratory.

**Manufacturer's Address:** Mt. Vernon, Ohio.

**Date of Introduction:** 1940.

**Ingredients:** Incl. soy pulp [okara], gluten, and seasonings.

**New Product–Documentation:** International Nutrition Laboratory. 1940? "Miller's Soya Bean Foods." Undated 12-page leaflet. 6. Miller's Soya Loaf: "Made from especially selected high protein edible soya beans, low in fat and carbohydrates. This food will be found to be a very pleasing entree that can be served as it comes from the can, or made into appetizing roasts, pot-pies, sandwiches, and other meat substitute dishes."

Ad in *Soybean Digest*. 1942. Sept. p. 16. "Miller's Soya Products."

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. International Nutrition Laboratory / Miller's Soya Foods makes Soya Loaf. "Distribution scattered throughout the United States by Health Stores."

Taylor. 1944. *The Soy Cook Book*. p. 201.

236. *Mariposa*. 1940. Hollywood glamour cook book. Miami, Florida: Glamour Publications. Distributed by M. Barrows & Co. xviii + 427 p. Portrait. No index. 21 x 16 cm. [3 ref]

• **Summary:** The author presents herself as a glamour girl, who lives in Miami, Florida. She is "Your 'Mystic Pot, with herbs and spice. I charm your meals and make them nice.'" "Foreword: You must have wondered how the Movie Stars keep so glamorous, vivacious, young-looking and slender, they seem more like gods and goddesses than real people. No wonder they are fairly worshipped by the Movie Fans! This book will disclose to you the beauty secrets of the Movie Stars..." The key is a healthy diet and herbs.

Recommended foods: Whole wheat and soy bean spaghetti, La Choy Soy Sauce and La Choy Molasses Sauce, Soy bean crackers, goat's milk (not cow's milk), all seafoods, fish, poultry, rabbit, venison, lamb, frogs' legs. Foods to avoid: White bread, white flour, white sugar, white rice, spaghetti etc, made of white flour, beef, veal, pork, lard, suet, grease, sulphur dried fruits, table salt ("free running," iodized, but "bag salt" is OK), most soda fountain drinks, "pop" or any drink put up with carbonated water, gassed, dyed, or faked foods. Soy-related: "Legumes" include soy beans (p. xi). Soy honey bread (with soy bean flour and soy milk, p. 7). Soy honey rolls (p. 8). Soy corn sticks (with soy bean flour, p. 22). Soy vegetable flour sticks (p. 23). Soy waffles (p. 24). Soy [pie] crust (p. 35-36). Soy short cake (p. 52). To make soy bean milk and corn milk (from soy bean flour, p. 78-79). Soy milk and carrot juice (p. 79). Soy bean coffee (p. 83). Coffee substitutes (incl. soy, p. 85). Canapes d'amour (with soy bean bread, p. 102). To cook Soy Sea Shells or Soy Macaroni (p. 122). Soy kidney pie (p. 132). Soy macaroni or spaghetti (with soy or Savita Sauce, p. 200). Soy beans—highlights (p. 213-14). Soy baked beans (p. 214).

Proteins (incl. soy, p. 386-87).

Also discusses: Garbanza pie crust (p. 36, 212). Electric vegetable juicer (p. 68). Importance of alkaline diet (p. 68-69, 238-39, 388-91). A table (p. 101), titled "Raw nut butters," lists 12 types: "Peanut, butternut, lychees, almond, pecans, pignolia nut, pistachio nut, paradise nut, cocoanut, hazelnut, beechnuts, cashew, walnut, chestnut, Brazil nut, and sesame tahini. Note: These butters are sold at the fancy grocer's or Health Food Stores." Note: This is the earliest English-language document seen (Oct. 2014) that mentions "tahini" or "sesame tahini"—a smooth paste of sesame seeds. According to *Webster's Dictionary*, the word "tahini" comes from the Turkish *tâhin* and was first used in English in about 1899.

Carrot peanut butter canape (p. 101). Mock liverwurst. Vegetarian dinner party (p. 287).

Glamour guide (p. 360-61). Planetary foods and menus (by astrological sign, p. 277-341). Tables showing the best food sources of various vitamins and minerals (p. 365-417).

In the chapter titled "Snacks and Beverages" is a recipe (p. 76-77) for a Date and goat's milk shake, which is "better than any soda treat" and which calls for use of an "electric blender." The recipe for "Orange honey nanny shake" (p. 77) states: "For a more frothy drink, whip with electric blender..." See recipe for soymilk made from soy flour. Recommends buying foods and herbs in health food stores.

In the section titled "Recognition and gratitude" (p. 392) near the end of the book, she thanks "Henry Lindlahr, M.D.," "Otto Carqué, Mausert, M.D.," and many other lesser-known people.

Talk with Chef Akasha Richmond. 2004. June 5. Akasha has been able to find out very little about the author of this book, who she thinks self-published it. Although she lives in Florida, she talks about "glamour girls" and Hollywood. Address: 1265 S.W. 11th St., Miami, Florida.

237. White, Julius Gilbert. 1940. *Abundant health: A digest of the "Learn-how-to-be-well" lectures*. Madison College, Tennessee: Published by the author. ix + 317 p. Illust. 28 cm. [soy ref]

• **Summary:** Advocates a vegetarian diet. Note that Madison College is a Seventh-day Adventist college and sanitarium. One section, titled "The Soy Bean—The Wonder Food," introduces the many benefits of soybeans, discusses their low cost, and describes (in fairly specific terms, but without recipes), how to use soybeans in baking, as cooked or canned beans, in commercial "meat substitutes," as soybean milk (good for those with allergies to cow's milk), as cheese (tofu), as greens (soybean sprouts), or in commercial "coffee substitutes." Note: The author lived 1878-1955. Address: Madison, Tennessee.

238. International Nutrition Laboratory. 1940? *Miller's soy bean foods* (Brochure). Mt. Vernon, Ohio: International

Nutrition Laboratory. 12 panels. Each panel: 19 x 10 cm. Undated.

• **Summary:** A description (probably written by Dr. Harry W. Miller) of each of the following foods is given: 1. Miller's Soya Lac: A liquid milk packed in 13 oz. and 30 oz cans. It is available in both natural and chocolate flavors. 2. Miller's Soy-A-Malt: A spray-dried powder available in both natural and chocolate flavors, packed in 1-pound cans, which make 1 gallon of "vegetable milk." 3. Miller's Soya Curd: "This delicate protein food is made by coagulating Miller's Soya Lac with lactic acid and then blending this soft curd with tomato puree, pimento and Soya Sauce. It is a pleasing protein addition to salads, or for spreading crackers and sandwiches."

4. Miller's Mien Jing: Wheat "gluten, or cereal protein, is the basic food element in Miller's Mien Jing. Mien Jing is the Oriental name meaning processed gluten. A high protein wheat flour is washed free of starch, and small slices of the remaining gluten are processed with fresh vegetables and soya sauce, making a highly nutritious food, quite meat-like in taste. This gluten food was first introduced into this country by us, and our Mien Jing, or gluten cutlets, has the genuine flavors that have popularized this food in the Orient... It requires only a little cooking to make Mien Jing into many savory dishes, such as stews, croquettes, entrees, and also Oriental dishes such as Chow Mien and Chop Suey."

5. Miller's Soya Sauce: "Produced in South China where the finest soya sauce is made, insuring a pure and highly concentrated product. It should be used in flavoring all protein dishes where a meat-like flavor is desired." 6. Miller's Soya Loaf: "Made from especially selected high protein edible soya beans, low in fat and carbohydrates. This food will be found to be a very pleasing entree that can be served as it comes from the can, or made into appetizing roasts, pot-pies, sandwiches, and other meat substitute dishes."

7. Miller's Soya Spread: This canned product can facilitate the making of tasty and nutritious sandwiches. 8. Miller's Whole Soya Bean Flour: This flour "is not made from oil extracted 'bean cake,' but fresh selected edible soya beans are ground to produce this rich golden flour. Wheat flour is classed among the acid foods while soya bean flour is strongly alkaline... One part of Soya Flour will neutralize the acidity of four parts of wheat flour." 9. Miller's Green Soya Beans: These delicious canned green beans "are an abundant source of Vitamins A, B, and G, and a splendid source of calcium, phosphorus and iron... rich in protein, they can be served just as they come from the can. They make a splendid addition to a vegetable salad. They combine well with many of the vegetables in cooking. Surprise your family and friends by serving this new food."

10. Miller's Giant Soya Beans: These soy beans are high in protein (43.18%) and low in fat (18.7%). "Miller's

soy beans are processed so that the nutlike flavor is brought out and they are rendered entirely digestible. The eating of the soy bean creates an alkaline reserve so necessary for the healthful functioning of the body.” 11. Miller’s Soya Beans with Tomato Sauce: Edible soy beans are canned with tomato puree and malt. “This is truly a treat for the picnic lunch.”

This brochure contains 8 recipes using Miller’s products. Three panels discuss the “Dietetic advantages of the soy bean;” across the bottom is written in large letters “Alkalinize with Miller’s Soy Bean Foods.” These panels note of the soya bean: “So highly does it stand in the list of foods from the vegetable kingdom that the International Nutrition Laboratory is devoting 95% of its effort to the output of foods made from the soya bean.” Edible Soy Beans are a remarkable food, a complete protein with adequate calcium for optimum metabolism, a ready alkalizer, rich in Lecithin and Cephalin—the nerve foods, and “The only vegetable protein that is biologically able to substitute for animal protein... It is indeed unfortunate that so little interest has been aroused here in America in the culture of the so-called vegetable or edible type of soy beans... The International Nutrition Laboratory uses only these edible beans for canning and food manufacture.

“This institution now located at Mount Vernon, Ohio, first began its work in Shanghai, China, where extensive nutrition experiments were carried out in the feeding of infants, children and adults on soya milk. It operated a Soya Bean Dairy, providing daily milk distribution of plain and chocolate soya milk to thousands of persons. But as this plant was practically demolished during the recent war in the Orient, it was organized again in 1939 in Mount Vernon, Ohio as the International Nutrition Laboratory, and is producing from the edible soya bean all the valuable foods described in this folder.”

Another panel describes the “Advantages of vegetable milk.” Large letters across the bottom state: “Alkalinize with Miller’s soy bean foods.”

Note 1. This is the earliest document seen (April 2002) with the term “soy bean foods” in the title.

Note 2. This is the earliest document seen (Aug. 2013) that uses the term “Soy Lac” to refer to a soymilk. Address: Mt. Vernon, Ohio.

239. Madison Foods. 1940? Featuring Madison Foods Quartet (Leaflet). Madison, Tennessee. 1 p. Single sided. 28 cm. Undated.

• **Summary:** A photo shows cans of four products: Madison Burger—Vegetarian. Not-Meat. Cheze-O-Soy. And Dinner Morsels. Each appears to be dancing, with musical notes as its feet.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Madison Burger.” This meatless burger was apparently launched at about this time by Madison Foods. Address: Madison, Tennessee.

240. *Scotsman (Edinburgh)*. 1941. Vegetarians want cheese rationed. Feb. 22. p. 8.

• **Summary:** Yesterday a deputation of vegetarians made a plea to Lord Wolton at the Ministry of Food for the rationing of cheese and for permission to exchange their unused meat or bacon and ham for a weekly allowance of cheese.

The deputation complained that they were not receiving their quota of cheese, and that dealers were rationing cheese on their own account and apparently reserving it for customers registered with them for other foods. “On the basis of food value, they argued, cheese required less shipping space than meat. Alternative sources of proteins, especially nuts and soya beans, were also discussed.”

Note: During World War II in Britain, some foods were rationed.

241. Monahan, James. 1941. Little honorable plant. *Elks Magazine*. Feb. p. 14-17, 45-48.

• **Summary:** An overview of the soybean in America. Discusses industrial uses of soybeans as in glues, paints, varnishes, and plastics, the USDA Regional Soybean Industrial Products Laboratory at Urbana, Illinois, the very important work of William J. Morse, presently senior agronomist at the USDA Bureau of Plant Industry (Morse began work at USDA in 1907 under Charles Vancouver Piper), the use of the flakes of soybean meal in brewing to give beer more body and a sturdier, creamier “collar” of white foam, the work of Henry Ford in developing large-scale industrial uses of soybeans, soybean trading on the Chicago Board of Trade, food uses of soybeans (such as green-shelled soybeans, soybean flour, the Soyburger, and soybean bread). Contains 7 photos.

242. Grand Central Public Market. 1941. During Lenten season enjoy: Madison Foods. *Los Angeles Times*. March 7. p. A6.

• **Summary:** See next page. “Soyburger. Vigorost. Stakelets. Soy Cheese [tofu]. Nut Meat. Soy beans.

“Delicious foods that make Lent a season of real eating enjoyment... See them on display at Jones Grain Mill today!” Address: Between 3rd & 4th Streets, Broadway to Hill, Los Angeles.

243. Hain. 1941. Delicious protein dishes in Lent (Ad). *Health News (Hollywood, California)* 9(5):5. March 14.

• **Summary:** “Each of Hain’s delicious nut-meats contain almost twice the protein value of meat, without being acid-forming. Any or all of these will make Lenten dishes deliciously tempting and heartily nourishing for all appetites! Hain Protone, Soytone and Nutone, together with Soy Sandwich Spread and Hain Soy Beans, are the finest foods prepared! Nearly twice the protein value of meat is contained in these excellent foods and, unlike meat, they are not acid-

forming. Hain's variety of Soy and Nut Meats offers you a never-tiring combination of rich protein foods.

"Look for the Hain label at all Health Food Stores. It's your Guarantee."

244. **Product Name:** Stakelets (Vegetarian Beefsteak).  
**Manufacturer's Name:** Madison Foods.  
**Manufacturer's Address:** Nashville Agricultural Normal Institute, Madison, Tennessee.  
**Date of Introduction:** 1941 May.  
**How Stored:** Shelf stable.  
**New Product—Documentation:** Ad in *Los Angeles Times*. 1941. March 7. p. A6. During Lenten season enjoy: Madison Foods. Includes "Stakelets."

245. Madison Foods. 1941. A treat without meat (Ad). *Nature's Path* (New York City). July. p. 273.

• **Summary:** "Steaming hot or cold, you may have delectable foods without using meat of any kind. From these five basic food [products]—Soyburger, Stake-Lets, Vigorost, Not-Meat, and Yum—dozen of tasty entrees may be served to the delight of the most fastidious guests. Duplicate your favorite meat dish... All five basic foods contain complete protein... All five of these foods are hermetically sealed in enameled cans. Prices range from 10¢ for a 5-ounce can to 50¢ for a

39-ounce can. Available at health food stores and health food departments.

"Free—new issue *Madison Health Messenger* with newest information about soy beans, recipes, etc. Copies available at health food stores." Address: Madison College, Tennessee.

246. Special Foods Incorporated. 1941. Retail order blank. Worthington, Ohio. 1 p. Catalog. Oct. 1.  
 • **Summary:** See next page. Products include: E-Z-Lax (smooth bulk and lubrication for constipation). Beta Broth (Meat-like flavor—dissolves instantly). Tastex (Yeast extract—meat-like flavor). Spread (Tasty sandwich spread). Protein foods (used in place of meat): Choplets (Cutlets in 8 oz, 17 oz, or 30 oz), Proast (Dark, in 8 oz, 16 oz, or 30 oz), Numete (Light, in 8 oz, 16 oz, or 30 oz). Soy Beans with Tomato Sauce (17 oz or 30 oz). Soy Beans, Plain (17 oz or 30 oz).

Note 1. This is the earliest document seen (Nov. 2013) concerning Worthington Foods and soy.

Note 2. Worthington was named Special Foods from its founding in 1939 until it was incorporated as "Worthington Foods, Inc." in Dec. 1945. Address: Worthington, Ohio.

247. **Product Name:** Choplets (Resembling Pork Chops).  
**Manufacturer's Name:** Special Foods. Renamed Worthington Foods, Inc. in Dec. 1945.  
**Manufacturer's Address:** Worthington, Ohio.  
**Date of Introduction:** 1941 October.  
**Ingredients:** In 1971: Wheat protein slices [wheat gluten] in broth consisting of extract of Brewer's yeast and vegetables, soy and other hydrolyzed vegetable proteins, mushroom broth, MSG, salt, dextrose, corn oil, caramel coloring.  
**Wt/Vol., Packaging, Price:** 8 oz, 17 oz, and 30 oz can. 10 oz can retails for \$2.75 (7/90, California).  
**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Wholesale price list. 1941. Oct. 1. 10 oz retails for \$0.20 and 30 oz for \$0.60; Ad by Worthington Foods, Inc. in *Health*. 1947. Feb. p. 2. “Good foods for every occasion.” Choplets are mentioned.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Chaplets + their liquid contain 15.62% protein, 0.56% fat, and 5.40% carbohydrate. *Chopletter* (Worthington Foods, Ohio). 1960. “What you should know about Worthington Foods.” April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Choplets.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in “Choplets (Worthington).”

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 175. The ingredients in “Choplets (Worthington)” are “wheat protein slices in a broth consisting of water, HVP, yeast extract, soy sauce, dextrose, L-lysine mono-hydrochloride, mushrooms, salt, corn oil, caramel color.”

Interview with James Hagle? 1983. The name Choplets was suggested by Dr. George Harding’s 11-year-old son. Choplets resembled Dr. Harry Miller’s Cutlets. They were a unique best-seller into the 1960s.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27. Ingredients are the same as those listed below.

By July 1990 the product had been reformulated to include textured soy protein concentrates.

248. *New York Times*. 1941. U.S. gives thanks for its strength in world at war. Nov. 21. p. 1, 12.

• **Summary:** The very last paragraph of this long article states: “While these thousands of turkey dinners were being relished, 125 members of the Vegetarian Society of New York sat down to a six-course meal at Schildkraut’s Vegetarian Restaurant, 4 West Twenty-eight Street. The meal consisted of spinach loaf, molded into turkey shape, with carrot legs; vitamin cocktail of sauerkraut and tomato juice; vegetable bouillon with whole wheat noodles; combination raw vegetable salad; oyster plant and whole wheat cookies.”

249. **Product Name:** Light Numete.

**Manufacturer’s Name:** Special Foods, Inc. Renamed Worthington Foods, Inc. in Dec. 1945.

**Manufacturer’s Address:** Worthington, Ohio.

**Date of Introduction:** 1941.

**Wt/Vol., Packaging, Price:** 8 oz, 17 oz, and 30 oz can. 19 oz can retails for \$2.65 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Wholesale price list. 1941. Oct. 1. 8 oz retails for \$0.20 and 30 oz for \$0.55.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 19 oz (538 gm) can. The ingredients for Numete (“Light” is not mentioned) are now: Water, peanuts, white corn flour, soy flour, salt, monosodium glutamate, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

250. Berolzheimer, Ruth. ed. 1941. *The American woman’s cook book*. New York, NY: Garden City Publishing Co., Inc. viii + 816 p. Illust. (incl. many full-page color). Index. 21 cm.

• **Summary:** The paragraph titled “Soy-beans” (p. 390) notes that of the many varieties of soy-beans grown in the USA, the yellow variety is most widely used for cooking, although black and green soy-beans are also used, and are especially good in soups. Soy-beans require longer cooking than white beans, but the cooking time can be decreased if the beans are first soaked for 12 hours. Soy-related recipes include: Baked soy-bans (2 cups yellow soy-beans plus ¼ lb fat salt pork, p. 390).

The introduction to the long section on “Vegetarian dishes” (p. 351-59) states that such dishes add variety to the diet and often reduce the food bill. “They are welcome in any household where the program of using meat only once a day is being followed.” This section contains no soy recipes, but does contain many that use peanuts or peanut butter, such as: Peanut balls. Peanut scrapple. Peanut butter cutlets. Baked peanuts. Peanut souffle. Peanut chops. Bean roast. Peanut and carrot loaf. Peanut roast. Cottage cheese and peanut loaf.

Note: This book was apparently published shortly before the USA entered World War II in December 1941. Address: Director, Culinary Arts Inst.

251. Klein, Ida. 1941. *Neuzeitliche Kueche: Fleischlose Gerichte fuer alle Verhaeltnisse* [Modern cookery: Meatless dishes for all occasions]. Hamburg, Germany: Vollmer & Bentlin. 144 p. 8 color plates. 20 cm. [Ger]

• **Summary:** Discusses vegetarianism, vegetarian cookery, and nutrition. Pages 70-72 discuss soybeans and give recipes for cooking whole soybeans (#197), and the following in which soy flour is often used in place of the traditional ingredient of animal origin: Pancakes without eggs (#198). Cakes without eggs or milk (#199). Short pastry for a tart shell (*Tortenböden*) or small pastries (*Kleingebäck*) without eggs (#200). Meatless roast made with soy flour (and Granola, #201). Patties made with soy flour (#202). Mayonnaise without egg (#203).

Page 85 has a meatless-meat recipe for “Soy-flour meat” (Sojamehl-Fleisch, #256).

Note 1. This is the earliest German-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *Sojamehl-Fleisch* (Soy-flour meat).

Note 2. This is the earliest German-language document seen (Nov. 2014) that mentions a meatless burger—" Patties made with soy flour." Address: Germany.

252. Davis, Adelle. 1942. *Vitality through planned nutrition*. New York, NY: The Macmillan Co. xii + 524 p. Sept. Illust. Index. 22 cm.

• **Summary:** This book is written for young people. Soybeans and their nutritional value are discussed throughout.

"Dedicated to the high-school student who appreciates both the immediate and the future values of full health."

Of the 23 amino acids, all but 10 can be made by the body. These ten are called "essential amino acids" and must be obtained from food. Protein foods "containing all ten of the essential amino acids in generous amounts are called complete proteins, or proteins of high biologic value." "The proteins of eggs and milk have the highest value." The proteins in glandular meats (liver, kidney, etc.) rank second in value. "Proteins from nuts, soybeans, wheat, especially wheat germ, and cottonseed flour and meal are complete proteins" (p. 58-59).

"Proteins and vegetarianism. Many thousands of people in the world, particularly the Eskimos, Laplanders, and nomad tribes, eat little or no proteins from vegetable sources. Other thousands eat only vegetable proteins, because of poverty or religious scruples, such as the millions of people in India and China. Races which have a high animal-protein intake appear to have excellent physiques and virility and a capacity for endurance which far surpasses the energy and physiques of those eating only vegetable proteins.

"When the complete proteins of wheat, soybean, cottonseed, peanuts, and other nuts are eaten, and the diet is planned with utmost care, it is possible to supply the body with sufficient amounts of the essential amino acids. Some of the world's leading athletes have been vegetarians. If milk and eggs are generously added to an otherwise vegetarian diet, it can be made adequate in proteins though it is likely to be deficient in iron. There is no argument against a person's being a vegetarian, except that unless he is trained in nutrition, he is likely to become an unhealthy vegetarian." (p. 67, 71).

Many vegetable proteins, such as those in soybeans and other legumes, are not well digested unless heated (p. 69). Boys age 13-15 require 85 gm/day of protein, increasing to 100 gm/day for boys age 16-20. Adult women need 60 gm/day and adult men need 70 gm/day (p. 70).

Soybeans (and soy flour) are a good source of B-complex vitamins, including thiamin (p. 160), niacin (p. 186-87), pyridoxin [pyridoxine] (incl. soybean oil; p. 193), pantothenic acid (p. 194). Since vitamins of the B complex cannot be stored in the body, "the daily diet must be carefully

planned if full health is to be maintained." "Buy only wheat breads and cereals with 100 per cent whole grain marked on the labels. Use wheat-germ breads... and soybean bread whenever possible." Also blackstrap molasses and brewers' yeast. "Use soybeans, baked or in a loaf or patties, as meat substitutes... Cultivate a taste for liver, brain, kidney, heart and sweetbreads and use them more frequently than other types of meat (p. 208-09).

"Salted peanuts and roasted soybeans are ideal candy substitutes which build rather than destroy health. Both are excellent sources of vitamins of the B complex" (p. 210).

Wheat germ is the richest natural source of vitamin E, which is "also found in cottonseed oil, corn oil, sesame oil, soybean oil, and peanut oil" (p. 286-87). There are at least three forms of vitamin E, which are called the vitamin-E complex: alpha-, beta, and gamma-tocopherol. "Alpha-tocopherol is the most active and has been made in the laboratory."

Calcium: "Many Oriental races obtain their calcium principally from soybeans and soybean curds [tofu], which form a staple food."

Note: This is the earliest English-language document seen (April 2013) that uses the term "soybean curds" to refer to tofu.

Bones are used as a major source of calcium by Eskimos, Africans, and (formerly) American Indians. Adults should consume at least 750 mg/day of calcium, the amount found in 3 glasses of milk (p. 312-15). "Another vegetable which is rich in calcium is the soybean, a food all too little used in America. Soybean flour is fourteen times richer in calcium than refined wheat flour, and baked soybeans are many times richer in calcium than baked navy beans. Every person should learn to enjoy this highly nutritious food and make it an important part of his diet." (p. 319).

In Chapter 29, "The functions of the blood" (p. 328-30), Davis discusses the effect of acid and alkali, but in a much different way than former health food advocates. She does not advocate alkaline foods, but shows how the body keeps its fluids near neutrality, or very slightly alkaline. "Soybeans are extremely rich in iron, of which 80 per cent reaches the blood. In a mixed diet as a whole, only about 50 per cent of the iron in foods is available" (p. 340).

Iodine is necessary to prevent goiter. "Since early times, the eating of seaweed has been known to affect goiter favorably" (p. 350). Salt (sodium chloride) is essential to good health. In very hot weather and dry air, so much can be lost through perspiration that death results. "Death due to salt deficiency occurred during the first years of work at Boulder Dam... In milder forms, a lack of salt causes heat cramps or heat stroke," which is "accompanied by nausea, dizziness, general exhaustion, and muscular cramps in the legs, back, and abdomen. Without salt, the more water drunk, the worse the condition becomes." "During very hot weather salty foods such as salted peanuts, popcorn, or soybeans, salty

cheeses, or potato chips should be kept near the drinking water” (p. 367).

The section titled “Your body’s requirements” (p. 386-89) lists 8 food groups or foods that are the best sources of required nutrients. These include: “7. One serving of meat, fowl, fish, eggs, or a meat substitute such as baked navy beans or soybeans,....”

“Dried fruits should be the main candy substitute... Other health-building candy substitutes are unsweetened chocolate, salted peanuts or soybeans, chocolate-covered peanuts, and cracker jack made with black molasses” (p. 400-01).

A table (p. 484-85) gives the nutritional composition of soybeans: (1) dried, cooked; (2) dried, uncooked. Address: A.B., M.S., consulting nutritionist, Los Angeles, California.

253. International Nutrition Laboratory. 1942. Miller’s Soya Products (Ad). *Soybean Digest*. Sept. p. 16.

• **Summary:** This quarter-page black-and-white ad states: “The International Nutrition Laboratory are pioneers in soya bean processing of the choice edible varieties and of soya protein utilization in the human dietary. Our distinctive achievements are: 1. Flavor improvement. 2. Ready digestibility. 3. High protein yield. 4. Lower cost of man’s protein dietary requirements.

“Send for catalogue of Miller’s tasty soya foods including soya milk, liquid and powdered, delicious green soya beans, soya meat substitutes, such as Miller’s savory vegetable cutlets, soya loaf, sandwich spread and soya

cheese. Processed and packed by the International Nutrition Laboratory.” Address: Mt. Vernon, Ohio.

254. *Madison Health Messenger* (Madison, Tennessee). 1942. Soy bean exhibit at National Health Foods Convention. 4(4):3. Undated.

• **Summary:** ‘The World of Tomorrow in Soybeans’ was the theme of the Madison Foods exhibit at the National Health Foods Convention in New York City. A picture of this very beautiful exhibit is shown at the bottom of this page.

“Many new varieties of soybeans were shown to health food dealers from all over the United States, who saw for the first time at the National Health Foods Convention a comprehensive exhibit of various soybean products. There were small black soybeans, brown soybeans, green soybeans, yellow soybeans, of various sizes, shapes, and varieties. There were breakfast foods ready-to-eat and cooked. Other items in the exhibit consisted of soy flour, various kinds of soy oil, soy hydrogenated shortening, soy lecithin, stock feed, poultry feed, dog and cat foods; canned soybeans plain, canned soybeans in tomato sauce, meat substitutes, soy cheese, soy milk, soy albumin, soy bread, soy muffins, soy toast, soy coffee substitute, soy macaroni, soy noodles, soy sauce, linoleum, and plastics.

The exhibit was finished in an automobile lacquer with a photographic smear of soybeans covering the entire front of the exhibit around the display of sample bottles of various soybean products on the right wing of the exhibit, and the Madison Foods products on the left wing of the exhibit, the

soybean smear was finished in a sepia tone to approximate the natural color of the soybean, and the lettering on the top of the exhibit was cut-out wood, raised letters, finished in automobile lacquer. It was one of the most outstanding exhibits ever shown at a National Health Foods Convention from the standpoint of its educational value as well as its artistic layout and beautiful finish. Visitors to the exhibit were profuse in their commendatory comments of the exhibit, and E.M. Bisalski, Manager of Madison Foods, and Ulma Doyle Register, Chemist, were busy receiving visitors to the exhibit, who came from all parts of the forty-eight states to attend the National Health Foods Association Convention, Hotel McAlpin, New York City, August 26-29.

“Next year the convention will be held in Los Angeles, California, at approximately the same time.”

255. *Let's Live*. 1942. Vegetable meat balls. Dec. 30. p. 10.  
 • **Summary:** Contains a recipe for meatless meat balls, based on ground almonds and cooked egg plant [eggplant]. It is not necessary to use soybeans when making meat substitutes. Rationing is now in force in America during World War II.

256. **Product Name:** ViM-eat Soy-Nut-Loaf (Vegetarian Meat).

**Manufacturer's Name:** Butler Food Co.

**Manufacturer's Address:** P.O. Box 4, Cedar Lake, MI.

**Date of Introduction:** 1942.

**Wt/Vol., Packaging, Price:** 8- or 16-oz can.

**New Product–Documentation:** Manufacturer's catalog. 1942. In 8- or 16-oz cans. “Appeals to those who like the meat flavors. Soy-Nut-Loaf is a highly nutrient [sic] food, containing a complete protein. It can be prepared in many delicious ways: in stews, roasts, vegetable pies, hash, and sandwiches. It is also tasty just as it comes from the can.” Recipes are given: Soy-Nut Steak with onions. Macaroni with Soy-Nut-Loaf. Savory Soy-Nut-Loaf.

257. **Product Name:** ViM-eat Soy-Nut-Cheese (Vegetarian Meat).

**Manufacturer's Name:** Butler Food Co.

**Manufacturer's Address:** P.O. Box 4, Cedar Lake, MI.

**Date of Introduction:** 1942.

**Wt/Vol., Packaging, Price:** 8- or 16-oz can.

**New Product–Documentation:** Manufacturer's catalog. In 8- or 16-oz cans. “A highly nutritious food which can be used in a variety of palatable dishes. Rich in protein and fat. Easily digested.” Two recipes are given, including Soy-Nut-Cheese croquettes.

258. **Product Name:** Vegetable Chili Con Carne. Renamed Vegetarian Chili Con Carne by 1948.

**Manufacturer's Name:** International Nutrition Laboratory.

**Manufacturer's Address:** P.O. Box 388, Mt. Vernon, Ohio.

**Date of Introduction:** 1942.

**Ingredients:** Incl. wheat gluten.

**Wt/Vol., Packaging, Price:** 16 oz jar.

**New Product–Documentation:** Ad in Leaflet titled “Optimal Nutrition in Infant Feeding.” Undated. “Rich in all-vegetable protein of soya beans and wheat gluten; processed in tasty sauce. 16-oz. jars.” Soybean Blue Book. 1948. p. 82.

259. **Product Name:** Vegetable Chop Suey. Renamed Vegetarian Chop Suey by 1948.

**Manufacturer's Name:** International Nutrition Laboratory.

**Manufacturer's Address:** P.O. Box 388, Mt. Vernon, Ohio.

**Date of Introduction:** 1942.

**Ingredients:** Incl. soya beans, wheat gluten, green fresh vegetables (soy sprouts).

**Wt/Vol., Packaging, Price:** 16 oz jar.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Ad in Leaflet titled “Optimal Nutrition in Infant Feeding.” Undated. “Soya beans, wheat gluten, green fresh vegetables.”

International Nutrition Laboratory, dealer's order blank. 1946. Jan. “Chop Suey (Mein Jing) Vegetarian.” 16 oz can.

Soybean Blue Book. 1948. p. 82. Note: The word “chop suey” was first used in English in 1888.

260. **Product Name:** Breakfast Food, and Meat Substitutes.

**Manufacturer's Name:** Tastee Soy Foods.

**Manufacturer's Address:** 254 E. Girard Ave., Philadelphia, Pennsylvania.

**Date of Introduction:** 1942.

**New Product–Documentation:** *Soybean Digest*. 1941. Feb. p. 12. This company sells “edible soybeans.” USDA Bureau of Plant Industry. Div. of Forage Crops and Diseases. 1942. Firms manufacturing or handling soybean food products. p. 3. This company is listed as making or handling 15 soy products. It is not clear whether this company is a manufacturer or a handler.

Soybean Blue Book. 1947. p. 69, 71.

261. Glotzhober, Clem. 1942. Annual report (August–December). Dearborn, Michigan: Food Laboratory (Ford Motor Co.). 14 p.

• **Summary:** Research was conducted on a coffee substitute made from roasted soybeans mixed with other plants, patties made from pre-cooked soybeans, and the effects of hydrochloric acid and sodium hydroxide on the pH of solutions of “soy protein.”

The last section, titled “Hard soy cheese,” describes the author's attempt “to make a similar cheese from soy milk. Several batches of soy milk were curdled by several methods including acetic acid plus heat, and lactic acid plus pepsin, and then the curds were pressed.” The cheese was then cured for 3 months or more.

Note: This is the earliest English-language document seen (Oct. 2013) that uses the term “Hard soy cheese” to

refer to a Western-style soy cheese. Address: Food Lab.

262. Rotondi, Pietro. 1942. *Vegetarian cookery*. Los Angeles, California: Willing Publishing Co. 151 p. Recipe index. 23 cm. 2nd edition 1948 (150 p.).

• **Summary:** This book, dedicated “To Humanity,” is basically a vegan cookbook—except for the use of a little honey. It uses no dairy products or eggs, and views a raw food diet as the ideal—although many recipes call for cooking. Following the dedication is this quote: “The human body is the temple of God and as real as God himself, because He dwells in it...”

Under “Substitutions” (p. 21) the author notes that “Soy milk may be substituted for cow’s milk...” Under “For the infant” we read: “Advice to the mother—Almond milk is the most perfect and ideal food for the infant both in nutritional value and digestibility.” Soy sauce (p. 70-71, etc.), Savita, and Vegex are widely called for a seasonings. The soy-related recipes in this book seem extremely original and innovative; they include: Baked lima beans (with soy bean milk, p. 58). French-fried onions (with soy bean milk, p. 61). Peas cooked with potatoes and soy bean milk (p. 67). Whole wheat or barley chowder (with soy bean milk, p. 68). Ripe olive croquettes (with soy milk, p. 71). Vegetable hamburgers (with soy bean milk, p. 72). Carrot loaf I (with soy milk, p. 73). Tofu (fried in flour breading, p. 74). Tofu loaf (baked, p. 74). Tofu omelet (p. 74). Tofu and garbanza [garbanzo] beans (p. 75). Gluten steak (with 1 cup soy sauce, p. 75). Chop suey (with [mung] bean sprouts and soy sauce, p. 78). Savory lima patties (with soy bean bread, p. 85). Soy bean loaf (with cooked and ground soybeans, p. 85). Soy gravy (with soy milk and soy sauce, p. 87-88). Wholewheat bread and rolls (p. 89-92; many call for the use of soy milk). Tofu cake I (like a baked cheesecake with shredded coconut, lemon, and agar, but no crust, p. 99). Tofu cake II (like a cheesecake with a wholewheat or graham cracker crust, p. 99). Note: This is the earliest document seen (Oct. 2003) that mentions a tofu cheesecake, and the earliest recipe seen (Oct. 2003) for a tofu cheesecake.

“All Bran” muffins (with bran and soy milk, p. 112). Soy wheat germ muffins (with soy pastry flour, p. 113). Corn meal muffins (with soy milk, p. 113-14). Soy bean chocolate frosting (with “2 squares soy bean chocolate,” p. 116). Soy bean chocolate date pudding (with 5 oz “soy bean chocolate” and 1 tablespoon soy bean milk, p. 120). Rice pudding deluxe (with 1 quart soy milk, p. 121). Soy bean chocolate ice cream (with 1/3 pound soy bean chocolate and a pint coconut milk, p. 127). Fruit ice cream, Maple sugar candy, Maple fudge (each with soy milk, p. 129). Soy bean chocolate fudge (with 1 cup “grated soy bean chocolate” and 3 tablespoons soy milk). Peanut butter fudge (with soy milk, p. 130). Soy bean chocolate caramels (with 3 squares soy bean chocolate and ½ cup “soy milk,” p. 131).

On pages 141-43 are two charts: (1) Alkaline, acid and

neutral foods (soy beans [dried or fresh], soy bean bread, and soy bean milk are listed as having an alkaline ash, whereas flesh foods, eggs, cheese, and most nuts are listed as having an alkaline ash). (2) Vegetable protein vs. animal protein. Divides various foods that are high in protein content into vegetable and animal, then ranks them in descending order of protein content. Included in the vegetable protein are: 1. (highest) Soy bean flour 39.5%, 4. soy beans 34.0%. The highest ranked animal product is dried beef 39.2%. The average protein content of 26 vegetable foods is 25.89%, compared with 21.79% for 26 animal foods.

The author, a chiropractor, died in about 1986 in a fire at about age 92. A videotape of him has been produced by the Rotondi foundation in Los Angeles.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Vegetable hamburgers” (or “Vegetable hamburger”). Address: Los Angeles, California.

263. International Nutrition Laboratory. 1942? *Soyalac: Optimal nutrition in infant feeding*. Mt. Vernon, Ohio. 12 p. Each page 22 x 10 cm. Undated.

• **Summary:** Contents: Mothers milk simulated in Soyalac. Solves feeding problems (“While Soyalac is an ideal food for non-problem infants, it becomes tremendously important in cases of milk allergy”). Composition of Soyalac (two forms: Soyalac dry powder {22.31% protein}, and reliquified Soyalac {2.79% protein}). Preparation of baby’s feedings (always add the powder to water, not water to powder). 24 hour feeding formulas. Canned liquid Soyalac. Soyalac hypoallergenic. Laxative correction. Supplementary feeding (starting 3rd month). Soyalac benefits mothers. Quick, nourishing for children and adults. Medical supervision. The home of Soyalac (photo of large brick building at Mt. Vernon, Ohio). You can get Soyalac (“mainly through health food stores”). Miller’s high protein soya foods: 1. Soyalac All Purpose spray dried soya milk. 2. Soyalac Malt Flavor. 3. Soyalac Liquid. Soyalac Chocolate. Soyalac Infant Food—Powder (1 lb cans). Soyalac Infant Food—Liquid (20 oz cans). Miller’s Cutlets. Cutletburger. Giant Green Soya Beans. Soya Beans in Tomato Sauce. Soyaspread (“Delicious sandwich filler”). Vegetable Chili Con Carne (with soya beans and wheat gluten). Vegetable Chop Suey (with soya beans and wheat gluten). Address: Mt. Vernon, Ohio.

264. *Science News Letter*. 1943. Meat substitute: Sprouted soy beans suggested as one solution to shortage. Are high in protein, fat, minerals and vitamins. Require no ration points. 43:326. May 22.

• **Summary:** For nearly a year, Dr. C.M. McCay of the School of Nutrition at Cornell University has worked on the problem of meat substitutes with Dr. Peng Cheng Hsu, a Chinese student stranded at Cornell. They used the light-colored Seneca soybean variety, which is grown extensively

in New York by dairymen. They developed a quick and easy way of sprouting soybeans in 3-5 days. They say the big job is to familiarize Americans with this valuable food. Dr. McCay's research even led him to New York City's Chinatown to observe methods of sprouting beans in local cellars.

A program of test marketing is planned in Ithaca and McCay hopes to "extend use of sprouted soys throughout the state, particularly in New York City, to relieve the meat woes of harassed housewives."

Note. This is the earliest English-language document seen (Jan. 2013) that uses the term "sprouted soys" to refer to soy sprouts.

265. *New York Times*. 1943. Soybeans protein rich: Vegetable may substitute in food value for hamburger. May 23. Section 8. p. 6.2.

• **Summary:** "A ten-cent soyburger to replace the royal hamburger has been listed as a possible substitute for America's meatless days." In Pullman, Washington, at Washington State College, Prof. Harold P. Singleton, superintendent of the Prosser irrigation station, has been growing "green edible soybeans." The plant, which grows hardily in irrigated regions of Washington, is being studied by the college's horticulture department.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the word "soyburger" written in all lowercase letters.

266. *Atlanta Constitution (Georgia)*. 1943. New 'Soysage,' war-born food, gets preview: With soybean base, it includes peanut flour, etc. June 12. p. 5.

• **Summary:** "A substitute for sausage made of peanuts, soybeans and cottonseed will be one of the items for sampling by two groups of peanut processors and distributors meeting here June 14 and 15."

The manufacturer calls it 'a treat in place of meat' and says it's very good with eggs or hot cakes for breakfast." However the product itself, named "Soysage," looks quite like dry oatmeal.

The two groups meeting in Atlanta concurrently are the National Peanut Council (a promotional organization) and the Southeastern Peanut Association (composed mostly of peanut crushers and sellers).

The ingredients in the "Soysage" are soy flour, peanut flour, cottonseed flour, wheat bran, wheat germ, dehydrated onion, spices, yeast and sugar. It is made by a Chicago, Illinois, company. There is no danger of spoilage and the product can be easily packaged and distributed.

"Miss Modane Marchbanks, of Atlanta, executive secretary of the council, said the sausage substitute is similar to products sent abroad through lend-lease."

267. **Product Name:** Soysage (Dehydrated Mix for

Meatless Sausage Made with Soy- and Peanut- and Cottonseed Flours).

**Manufacturer's Name:** Hodson's Pantry Products. Imperial Brands Co.

**Manufacturer's Address:** 537 S. Dearborn St., Chicago, Illinois.

**Date of Introduction:** 1943 June.

**Ingredients:** Soy flour, peanut flour, cottonseed flour, wheat middlings, wheat germ, yeast, vegetable protein, seasoning.

**New Product–Documentation:** *Atlanta Constitution (Georgia)*. 1943. "New 'Soysage,' war-born food, gets preview: With soybean base, it includes peanut flour, etc." June 12. p. 5. The ingredients in the "Soysage" are soy flour, peanut flour, cottonseed flour, wheat bran, wheat germ, dehydrated onion, spices, yeast and sugar. It is made by a Chicago, Illinois, company. There is no danger of spoilage and the product can be easily packaged and distributed.

Holt, Jane. 1943. "News of food: New products made from soy beans include a flour, cooking oil and bread." *New York Times*. July 29. p. 22. The first food produced, named Soysage, is made by the Imperial Brands Company of Chicago. It comes in the form of a yellow flour that contains soy flour, peanut flour, cottonseed flour, wheat bran, wheat germ, dehydrated onion, and spices. A dry mix, it is designed to be used as a substitute for sausage. The *New York Times* kitchen developed (and printed) its own recipe for making the Soysage in place of the one on the package.

Ad in *Nature's Path* (New York City). 1944. Jan. p. 16. "Try this new modern product from Hodson's Pantry." "Farm style breakfast Soysage. A treat in place of meat. Rich in nourishing proteins. New! Just add water and cook. Delicious. Contains no meat. America's new taste thrill! Modern! In dehydrated form. Quick and easy to prepare (Three small illustrations show how, and a large illustration shows the finished sausage-like products, steaming with potatoes, on a serving platter). About 3½ times the protein of pork sausage. Economical—Always ready—No waste. A treat in place of meat—49¢." A small photo shows Walter J. Hodson, who says: "Have a Hodson's Pantry in your home."

Taylor. 1944. *The Soy Cook Book*. p. 179, 199. Cloud. 1981. *Soyfoods*. Summer. p. 40. "Very little is known about the venture, however, since the trademark was renewed for only a short time; after six years of inactivity, the product lapsed into oblivion." Note: This is the earliest commercial product seen that was called "Soysage."

268. *New York Times*. 1943. Governor is host at soy bean lunch: Party for 67 at Albany is to demonstrate value of meat substitutes. Recipes are available. June 15. p. 24.

• **Summary:** "Albany, June 14—A war-diet luncheon, dominated by the humble soy bean, was served to sixty-seven guests in the State dining room of the Executive Mansion today in an effort to convince New York's housewives that palatable and nutritious substitutes for the dwindling meat supply are available.

"The luncheon, which included soy beans in seven different forms, was served to Governor and Mrs. Dewey, members of the State Emergency Food Commission and representatives of newspapers, magazines and the radio. It was prepared by the regular mansion kitchen staff and pronounced good by the guests, who were asked to comment on the food.

"The menu consisted of apple juice, tossed green salad, soy bean sprouts and chicken soufflé, sprouted soy beans and onion, soy bean bread, assorted unrationed spreads, milk and strawberry shortcake." The use of soy beans reduced by 75% the amount of chicken needed for the soufflé.

"The soy bean bread, developed by Food Commission experts at Cornell, will be placed on the market." The recipe, printed on the luncheon menu, is given in full. H.E. Babcock, chairman of the Emergency Food Commission, noted that sprouted soy beans are practically a fresh vegetable. Two large chains, it was said, are planning to carry the sprouted beans. Unsprouted soy beans retail for 6 to 7 cents a pound.

"Governor Dewey told his guests that the State's official family has been using soy beans in increasing quantities since Jan. 1. 'We had some soy bean gingerbread the other night,' he said. 'It was excellent. We also have enjoyed soy bean muffins and breadsticks.'"

269. Ma, Roberta. 1943. Rich peas and beans: Chinese varieties may be grown here as substitutes for meat. *Washington Post*. June 27. p. X17.

• **Summary:** "In view of the shortage of meat and the need for good health in the nation, Victory gardeners may well take a tip from the Chinese and plant an abundance of peas and beans." "The most common beans used in all parts of China are soybeans (*Glycine max*) and mung beans (*Phaseolus aureus*)." One of the writer's favorites is called the yard-long bean (*Dolichos sesquipedalis* or *Vigna sinensis* var. *sesquipedalis*). Address: USDA.

270. Ma, Roberta. 1943. Rich peas and beans. Chinese

varieties which may be grown here are substitutes for meat. *New York Times*. June 27. Section 2. p. 17.2.

• **Summary:** "In view of the shortage of meat and the need for good health in the nation, Victory gardeners may well take a tip from the Chinese and plant an abundance of peas and beans... Most Chinese people eat very little meat—often only once in five to ten days—yet their general health is good because they eat so many kinds of peas and beans, which they know how to prepare in many different ways."

"The most common beans used in all parts of China are soybeans (*Glycine max*) and mung beans (*Phaseolus aureus*)." After describing how to plant and grow these beans, the author notes: "Since not all the pods ripen at the same time, the young fresh green beans may be picked for shelling and cooking while the dried beans are gathered for winter use."

271. Holt, Rackham. 1943. *George Washington Carver: An American biography*. New York, NY: Doubleday Doran & Co. 342 p. 2nd ed. 1963, 360 p. [18\* ref]

• **Summary:** This is considered by some to be the best biography of Carver. The author is a woman. There are ten entries on soy in the index of the 1963 second edition.

Dr. Carver was born a slave in Missouri, around 1864. After working his way through school by washing clothes, Carver applied for registration at the University of Iowa and received a letter of acceptance. However, when he arrived, and officials learned that he was a Negro, he was rejected. Later he attended Simpson College at Indianola, Iowa, and then Iowa State College, where he was appointed to the faculty after graduation. In 1896 Carver accepted Booker T. Washington's invitation to come to Tuskegee Institute in Alabama, where he stayed until he died. The Iowa State College of Agriculture and Mechanic Arts was already an eminent institution in 1891. "It was the seed bed from which sprouted 3 men who were to rule the agricultural destinies of the United States for 28 years.

"James G. Wilson, director of the Agricultural Station, was soon to become Secretary of Agriculture in the cabinets of McKinley, Theodore Roosevelt, and Taft; Henry Cantwell Wallace was Assistant Professor of Agriculture, later to become Secretary of Agriculture in the cabinets of Harding and Coolidge until he died in 1924. His son, Henry Agard Wallace, was to fill the same post during the first 2 administrations of Franklin D. Roosevelt." The school term had already started when George Washington Carver arrived in May.

Before the turn of the century, Carver was preaching that the South should balance its agriculture by growing peanuts and sweet potatoes. He later developed more than 300 uses for the peanut.

Shortly after arriving at Tuskegee in Oct. 1896, Prof. Carver started experimentation on various relatively new members of the legume family, which he felt could enrich

the soil and serve as valuable additions to the diets of livestock. "In 1896 there was no crimson clover anywhere in the county, nor for many counties roundabout. He planted this and the cowpea and hairy vetch. In '97 [1897] he secured a pint of velvet-bean seed which yielded fully three pecks. He experimented with the peanut, which was no more considered a farm crop than was parsley; the children liked to eat peanuts, so a few families had a few vines.

"Developing agriculture means keeping an eye out for new things. The soja pea, now known as the soybean (*Glycine soya*), the little honorable plant and the main dependence of China for its food supply, was said to have been brought back by Commodore Matthew C. Perry, but nothing had been done about it in this country. This, too, Professor Carver planted" (p. 168). He would make every effort to educate away from the one-crop system. A photo (p. 169) shows young Carver at Tuskegee.

In 1901 Carver noted the occurrence of a fungus, which he designated as *Cercospora canescens* E. & M., on soybean and several other unrelated hosts. This appears to be the earliest reported occurrence of a *Cercospora* on soybean in America." It was not recorded in the U.S. again until 1924. In 1903 Professor Carver's exhibit in the capitol drew crowds to see his dried foods and soja peas and demonstrated the value of sweet potatoes and cowpeas.

With the notable exception of Professor Carver, few people in the U.S. had heard of the soybean until 1907 when the Department of Agriculture instituted experimentation on imported plants and tried adapting it to American soils and climatic conditions. Professor Carver had already successfully tried his own hand at experimentation. He was lecturing on the soybean and the derivatives he had found—flour, meal, coffee, breakfast food, oil, milk—long before it had been picked up by Midwestern growers. He could not emphasize the soybean for industrial purposes, however, because of Southern unfamiliarity. He concentrated his efforts, therefore, on the peanut.

Concerning peanuts, page 237 notes that "Professor Carver had started publishing recipes for cooking peanuts for the table before 1913, but these were constantly being augmented, and the bulletin was in its sixth edition by 1916, carrying directions for growing and 105 ways of preparing it for human consumption." During this time he was teaching senior girls at Tuskegee Institute how to cook with peanuts. The girls served a 5-course luncheon to Booker T. Washington and nine guests—"soup, mock chicken, creamed as a vegetable, salad, bread, candy, cookies, ice cream, coffee—all from peanuts."

Pages 239-40 describes a conversation, in "God's Little Workshop," between Prof. Carver and God in which Carver asks God about the meaning of the universe, of human life, and of the peanut. Responding only to his third question, God replied that "my mind was too small to know *all* about the peanut, but He said He would give me a handful of

peanuts. And God said, 'Behold I have given you every herb bearing seed, which is upon the face of the earth... to you it shall be for meat...' Then God instructs Carver what to do with peanuts in order to unravel their mysteries and uses. Page 242 describes Carver's preparation of peanut milk. "Cream would rise upon it which could be turned into butter without souring. The cream could be removed to produce buttermilk, and from either an inexpensive, palatable, and long-lasting cheese could be manufactured; where a hundred pounds of cows' milk made ten pounds of cheese, the same amount of peanut milk made thirty-five pounds. This milk proved to be truly a lifesaver in the Belgian Congo. Cows could not be kept there because of leopards and flies, so if a mother died her baby was buried with her; there was nothing to nourish it. Missionaries fed the infants peanut milk, and they flourished."

On 22 Jan. 1921 Carver spoke at the hearings of the General Tariff Revision before the Committee of Ways and Means of the House of Representatives. Given 10 minutes to speak, he was found to be so interesting and persuasive that his time was extended to 105 minutes. He showed the Committee a bottle of peanut milk on which the cream had risen, a bottle of rich peanut milk for ice cream, plus samples of buttermilk and evaporated milk. He explained that Secretary of Agriculture Wilson had been his instructor at Iowa State College for 6 years.

William Jay Hale, a chemist, coined the term "chemurgy," which first appeared in print in 1934 in his book *The Farm Chemurgic*. "Chemi," the root from which "chemistry" was derived, originally meant the black earth of Egypt; "ergon" was the Greek word for work. Hence "chemurgy" could be defined as "chemistry at work," an implied the application of this work to the soil.

In his book *Pioneers of Plenty*, author Christy Borth called Carver the first and greatest chemurgist. Carver later became close friends with Henry Ford.

272. Holt, Jane. 1943. News of food: New products made from soy beans include a flour, cooking oil and bread. *New York Times*. July 29. p. 22.

• **Summary:** The soy bean has been called the "vegetable meat" because its protein is of such excellent quality.

The first food produced, named Soysage, is made by the Imperial Brands Company of Chicago. It comes in the form of a yellow flour that contains soy flour, peanut flour, cottonseed flour, wheat bran, wheat germ, dehydrated onion, and spices. A dry mix, it is designed to be used as a substitute for sausage. The New York Times kitchen developed (and printed) its own recipe for making the Soysage in place of the one on the package. It may also be used for breading cutlets, and two tablespoons can be added to a basic recipe for muffins or other quick breads, or to pancakes or waffles, to improve the nutritive value. It sells for about \$0.50 a package that is said to make 35 one-ounce patties. It is sold

at Lust's Health Food Store, 343 Lexington Ave., and at Kubie's Health Food Shop, 136 East 57th Street.

The 2nd product is a golden-brown loaf of bread sold under the trade name of Vita-Soya, which contains soy bean flour, and which made its debut in June at a luncheon given by Governor and Mrs. Thomas E. Dewey under the sponsorship of the New York State Emergency Food Commission. G.P. Wuest, who is both a chemist and a baker, spent about six months developing this bread, which contains about 20% soy flour. He reported that the chief difficulty lay in blending the soy flour, which is too low in gluten to provide a well-leavened loaf when used alone, with wheat flour, which has plenty of gluten. "The bread is firm, fine-grained and yellow-beige in color." Because of the high fat content of the soy flour it is said to stay fresh for at least a week. The maker claims that it contains 40% more protein than regular white bread and much less starch. It costs \$.20 a loaf and is undeniably "filling."

The 3rd item is Royal Cook, a blend of soy, corn and cottonseed oils.

273. Manners, Marian. 1943. Book gives new system of shopping: Pocket-size guide solves nutrition and ration problems. *Los Angeles Times*. Aug. 13. p. A6.

• **Summary:** This book, titled "The Flexible Buyer," by Elsie is published free by an evaporated milk company, and is available free of charge.

For example, if you are shopping for meat and it is not available, the book suggests twelve alternatives and lists the protein value of each as compared with meat. There is also a "list of foods to serve with the protein food to make up for lacking minerals and vitamins found in meat not present in the meat alternative."

Note 1. This article was published during World War II when there were meat shortages in the United States.

Note 2. This is the 2nd earliest English-language document seen (Nov. 2014) that contains the term "meat alternative" (or "meat alternatives"—with any combination of hyphens or quotation marks). Similar terms were widely used during World War I.

274. *New York Times*. 1943. Vegetable 'steak' declared at hand: And many Americans will get soybean milk shakes, says Dr. Burkholder at Yale. Meat shortage stressed. It will force us to rely on plants with high protein content, he says in radio talk. Sept. 6. p. 12.

• **Summary:** New Haven, Connecticut: The remarks of Paul R. Burkholder, Associate Professor of Plant Physiology at Yale University, were broadcast on radio station WTIC. Edible strains of soybeans can be grown in home gardens and served like baby lima beans. He also recommended bean sprouts, which the Chinese have eaten for centuries; they have a fine flavor and high nutritive value. Other "substitutes for meat" include "potent yeasts harvested from brewery

vats."

275. *Time*. 1943. Down with meat. Sept. 27. p. 70, 72.

• **Summary:** "The U.S. Department of Agriculture warned the U.S. people to prepare for big changes in their diet in 1945. Example: they will get a lot less meat, a lot more beans.

"Harvard doctors, after a two-month feeding test, announced that an active adult can get along perfectly well with no more than an ounce of meat a day."

Food scientists are working to develop supplementary and substitute foods. "For almost two years a notably thorough analysis of possible meat substitutes has been conducted by Yale Botanist Paul Rufus Burkholder. He and others have found a number which on almost every food count (protein, vitamins, calcium, carbohydrates) are as good as or better than beefsteak; even whole wheat compares well with meat."

The researchers state that soybeans rival meat in protein, cost only about one-fourth as much, and that from soybeans one may secure a great variety of foods—from milk shakes to steaks. Soybean sprouts can be grown at home "indoors in a pot or jar, they can be raised the year round from dried field soybeans, sprout in five days or less, can be cooked as quickly as a pork chop, have several times as much vitamin B complex as the bean itself, rival tomatoes in vitamin C. A crisp, tasty dish, they have been a staple of the Chinese diet for centuries."

Other good sources of protein are cottonseed, peanuts, vegetable steaks [meatless] (Already on the market are "Soyage, Stakelets, Proteena, Victory Chops"), yeast, and germs [bacteria].

276. Hauser, Gayelord. 1943. Delicious and nutritious food for the duration. *Diet Digest (Beverly Hills, California)* No. 17. p. 40-41, 62.

• **Summary:** Recipes include: Delicious baked soya beans. Soya bean loaf. Soya butter (toast whole soya beans then grind very fine. Add soya oil and a pinch of salt until the consistency of peanut butter). Soya and peanut butter patties. Soya sprouts. Soya bean milk. Soya wheat germ waffles (with soya flour). Wheat germ soya muffins (with soya flour).

The article ends: "Note: For the duration it will be wise for you to go to your health food store and secure several pounds of wholewheat germ, wholewheat pastry flour, and soya flour (preferably toasted)." Plus several supplements sold by Hauser's Modern Products in Milwaukee, Wisconsin.

Note 1. This is the earliest English-language document seen (April 2012) that clearly uses the term "soya butter" to refer to soynut butter.

Note 2. This is the earliest English-language document seen (Jan. 2013) that uses the term "soya sprouts" (or "soya sprout") to refer to these sprouts. Address: 9889 Santa Monica Blvd., Beverly Hills, California.

277. International Nutrition Laboratory. 1943. Miller's soya foods (Ad). *Soybean Digest*. Sept. p. 35.

• **Summary:** "Miller's International Nutrition Laboratory are among the largest growers of the Edible Soya bean, as also processors of high protein yielding foods from the Soya Bean. They possess both Eye and Flavor Appeal. Miller's Laboratory is a demonstration that Soya Beans are a delicious food for humans.

"Miller's Soya Foods Include:

"1. Canned liquid Soya Milk.

"2. Spray dried Soya Milk Powder (natural, malted and chocolate flavors).

"3. Superb canned Giant Green Soya Beans.

"4. Delicious meat substitutes and extenders in appearance, and taste, like bologna, veal cutlets, etc.

"Price and detailed information supplied to interested individuals, address,..."

Note: This is the earliest English-language document seen (March 2003), published in the USA by a manufacturer of soybean foods, with the term "soya foods" in the title.

Address: Box 326, Mt. Vernon, Ohio.

278. Miller, Harry W. 1943. Soybeans and the Orient. *Soybean Digest*. Sept. p. 18, 44.

• **Summary:** "It was my privilege during 23 years of residence in the Orient to travel very extensively through the provinces of China, and to acquaint myself with all eastern Asia relative to soybean production. I found that while the central and northern provinces of China including Manchuria are the principal soybean producing areas of the Orient, that soybeans are widely used by all the groups of Orientals, save

the Filipinos, and the Malays, and are universally used by the Chinese, and that wherever they emigrate in any part of the world, the one universal food of the Chinese is soybeans, and not rice, as so often claimed.

"There are millions of the Chinese who do not live in the rice producing territories. The Chinese and many of the Oriental people have come to understand by common experience rather than scientific deduction that soy protein is an essential to livelihood and cannot with safety be dispensed with from their diet. Wherever in Chinese occupied territories soil and climatic conditions are at all favorable to the production of soybeans, they will be found as one of the staple crops. However the yield in the tropical portions of China is rather small. They have depended on importing beans from Manchuria and northern China. The same is true of the South Sea Islands.

"Foundation: Much that we have learned concerning handling soybeans and preparing them into food materials we must credit to the knowledge gained through studies made and travels in the Orient, chiefly in China, Korea, and Japan. Like their handling of many other things, they have developed the soybean culture and processing up to a certain point and there they stand. We have built upon their foundation, and have carried research in the agricultural field, as also processing methods several steps farther, and have made soya food products not only better but far more digestible, and therefore nutritionally more available, and found out that the bean can be made tasty as well.

"You may ask how are the Oriental people using the soybean. There are many ways. If you were to visit the Chinese markets during the late summer and early autumn months you would be able to purchase shelled green soybeans. You would also be able to purchase the unshelled beans, that is in the pods just like you buy peas in the pod. Some people prefer to purchase them in the pods, cook them in the pods in salt water, and then squeeze out the beans and eat them from the pod. There have been no canning facilities available to the Chinese for any of their products in years past, and so the use of the green soybean is only seasonable. You might expect that since the Chinese have stone mills everywhere to grind their wheat and their corn into flour and meal that they would be grinding their soybeans into a flour. But soy flour is largely an Occidental product. It would be very difficult for you to pick up in any of the markets of China a pound of soy flour.

"Curd: The Chinese have learned through long experience that the greatest value nutritionally from the soybean is obtained through a water extraction of its protein. This milky liquid after it is strained is coagulated into a cheese [tofu]. Ninety percent and possibly even higher of the nutrition the Oriental obtains from the soybean is taken in the form of this cheese. Of course they have many ways of dealing with this soft gelatinous curd, which has a very high water content. They press it into cakes, about the thickness of

a large slice of bread. This then is placed in a brine solution or other flavored liquid, and later sliced up like we at times dice cheese. Again it is pressed into thin sheets that are about a sixteenth of an inch in thickness. These are also diced up and eaten like a relish or a salad.

“Another common product is a thin semi-transparent sheet of protein [yuba] made by a slow heating vat filled with this soya milk. A heavy scum will come to the surface, which they lift off at intervals and suspend to dry. These sheets are later on used as food wrappers. They can use these sheets which are pure protein, like we can use cellophane sheets, but instead of wrapping parcels with them they stuff them with certain vegetables, imitating the body and legs of a fowl, or the form of a fish, or they can represent almost anything in the way of an animal, and by submitting them to a little baking, give the same nice brownish hue by the use of a little oil, so you could hardly tell whether you were eating actual turkey or an artificial one.

“When you go to the market where the soybean producer delivers his finished products, you will see a great variety of foods made from soybeans. As I say, you can buy the bean curd in squares, or you can buy the patties, or you can buy the thin sheets of soya cheese, or you can buy these large semi-transparent sheets of soya protein. These in turn can be incorporated into many tasty and highly nutritious dishes, by the skill and ingenuity of the cook, and has also the likeness of meat in flavor and appearance. Naturally nutritionally we know of the high value of these proteins for a proper substitute for meat, fish, fowl, eggs, and the protein of animal milk.

“Of course the Chinese have as one of their big industries the making of oil from the soybean, and that is true of the Koreans and the Japanese. They heat the bean, grind it, and put it into wooden presses and extract the oil by driving wedges into their oil presses, bringing a tremendous pressure to bear upon the roasted beans. This oil is all used for edible purposes.

“The residue of the bean cake contains about 6 percent of oil, and has been exported in recent years to great extent. But the Chinese have in certain localities ground it up and used the bean cake meal for food, although much has been used in China and exported for fertilizer.

“The soybean is also extensively sprouted, and these sprouts are used in their vegetable food mixtures and eaten as bean sprouts.

“I shall not attempt at all to discuss the varieties of soybeans found in the Orient. I have seen almost every color, every shape and size, running from a small shot sized bean to the large jumbo sizes, such as we have in our edible list. All the beans that I have seen that come from India have been of a very small size. When we buy beans in China we go to the market and ask for soya beans. If we are not satisfied with what they have we go to another shop, and see if we can find a bean of superior size and quality. We never purchase

soybeans in China by name of any variety.

“As is well known, China and most parts of the Orient grow from two to three crops per annum on the same ground. In some areas when they harvest a rice crop they plant a soybean crop on the same soil. In other areas when they harvest a wheat crop they put in a crop of soybeans. We believe in many of our central states, and certainly this would be true of the southern portions of our central states, that it would be quite practical to harvest a crop of peas, and disk the land, and plant and harvest a crop of soybeans” (Continued).

279. Kollmorgen, Walter M. 1943. The soybean goes to college. *Tennessee Planner* 4(1):15-20. Sept/Oct.

• **Summary:** The author was invited to lunch at Madison by E.M. Bisalksi, who is in charge of the food research and production program. The menu, typical of the meatless meals served on the campus, included: Meatless meat balls (Yum), fresh soymilk, Zoy-Koff (coffee substitute), margarine (75% soybean oil), and bread (made in part from soybean flour). “It should be noted that in the above menu animal foods and animal products are completely absent, with the exception of a small portion of cream used in the Zoy-Koff... Cans of Madison Foods substitutes for milk and meat carry the words “Contains no animal products.” These food were not developed to stretch meat ration points during the war; some of them are nearly 20 years old.

Large photos on a 2-page spread show the following Madison products: Wheatasoy, Kreme O’Soy (sliced bread), Kreme O’Soy (canned soymilk), bottled soymilk, Yum, Zoyburger, Soy Cheese, Kreme O’Soy Butter Muffins, Stake-Lets, Not-Meat, Vigorost, and Zoy-Koff.

“Dr. Floyd Bralliar, Vice President of Madison College, has for years conducted experiments with soybean varieties. In this work he is closely associated with experts in the United States Department of Agriculture. Dr. Bralliar believes that Tennessee farmers can profitably devote more acreage to the soybean. He holds that canneries will do well to can more fresh soybeans...” Address: Research Director, Tennessee State Planning Commission.

280. *Washington Post*. 1943. Lowly soybean achieves new honor as inexpensive meat substitute. Nov. 12. p. B7.

• **Summary:** “Here’s a question to whet the intelligence of homemakers: What vegetable rivals meat in essential nutrients and tomatoes in vitamin C, is high in protein and fat, and contains calcium, iron, and appreciable amounts of B vitamins?”

“Give up? Well, it’s none other than the lowly soybean, now being given honors... due to experimental work by Dr. Clive McCay of the Cornell School of Nutrition and others.” Contains recipes for: Soybean dinner in one dish (with whole soybeans). Soybean loaf (with 3 cups cooked, ground soybeans).

281. *Soybean Digest*. 1943. Soybeans... and people: Some flashy new packages [for soy flour]. Nov. p. 8.

• **Summary:** Includes: Stoy Soy Flour (A.E. Staley Manufacturing Company). Durkee's Soyarich Flour and Durkee's Soya Bits (Durkee Famous Foods). G.L.F. High Fat Soybean Flour, and Toasted Soybean Flakes/Grits (Cooperative G.L.F. Farm Products, Inc.). Lauxsoy Soy Meats (I.F. Laucks, Inc.). VivaSoy (Commander Larabee Milling Co.). Pre-Cooked Soy Flour (P.D. Ridenour Co., Chicago) (PDR, Little Major). Vee-Bee Soy Flour, Muffin Mix, and Krums (Vee-Bee Co.). A photo shows most of the packaged products.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term "Soy Meats" or "Soy Meat" (with any combination of capitalization or quotation marks).

Note 2. This is the earliest document seen (Nov. 2002) concerning packaging innovations for soy products.

282. **Product Name:** Soy Protose (Meatless Potted Meat with 32% Soya).

**Manufacturer's Name:** Battle Creek Food Co.

**Manufacturer's Address:** Battle Creek, Michigan.

**Date of Introduction:** 1943.

**New Product–Documentation:** USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. The company sells Soy Protose, containing 32% soya (it is not clear in what form). Distributed through health food stores.

Taylor. 1944. *Soy Cook Book*. p. 200. *Soybean Blue Book*. 1947. p. 71.

283. **Product Name:** Loma Linda Proteina (Meat Analog).

**Manufacturer's Name:** Loma Linda Food Co.

**Manufacturer's Address:** Loma Linda, California.

**Date of Introduction:** 1943.

**New Product–Documentation:** Wholesale price list. 1943.

284. General Mills, Inc. 1943. Your share–How to prepare

appetizing, healthful meals with foods available today: 52 menus, 226 recipes, 369 hints on food buying, preparation, meal planning, and serving. Minneapolis, Minnesota. 48 p. Illust. Index. 21 cm.

• **Summary:** This booklet, with a red, white, and blue cover, developed during World War II, has a foreword by Betty Crocker (with her signature and color portrait) and the Home Service Staff of General Mills. Some foods (such as meat) are rationed and the U.S. government has established a system of "ration points." In the section on meats is a recipe for "Nutburgers (meatless)" (with pecans, p. 7).

In the section titled "Cultivating dried peas and beans" (p. 21) is the following poem: "Are you looking for proteins with point value low? / If so, the legumes you'll enjoy. / All the Navy Beans, Lima and Kidney you know, / And don't forget Pinto and Soy!..." For recipes follow, but none contains soy.

Two pie charts (p. 25) show the percentage contributions of foods to the calorie and to the protein content of the American diet: Flour and cereals (28.8% / 29.8%). Meat, fish and poultry (15.0% / 33.0%). Vegetables (8.4% / 10.0%). Milk, cheese and eggs (12.3% / 25.3%). Fats & sugars (31.3% / 0%). Fruits & nuts (4.2% / 1.9%).

Note: This is the earliest English-language document seen (Nov. 2014) that uses the word "Nutburgers" to refer to a type of meatless burgers.

Also discusses: Victory gardens (p. 40). Rationed foods: Sugar, butter, sausage, bacon, wieners, hamburgers (p. 41). On the rear cover is a large circle showing the "Basic Seven Food Groups." Address: Minneapolis, Minnesota.

285. House of David. 1943. *Vegetarian cooking*. 4th ed. Benton Harbor, Michigan: House of David. 55 p. In a 4-ring binder. 24 cm.

• **Summary:** Contents: Foods and their values. Quick breads: Biscuits, muffins, griddle cakes. Soups. Meat substitutes: Nut dishes, cheese dishes, egg dishes. Sauces for meat substitutes & vegetables. Vegetables. Salads and dressings. Cakes and gingerbreads. Cake frostings and fillings. Cookies and small cakes. Pies. Puddings and desserts. Sauces for desserts.

In the "Table of food values" (unnumbered page near front of book), "Beans, dry, soy" are mentioned.

Soy recipes include: Soybean muffins (with "1 cup soy flour," p. 11). Soybean sausage (with "2 cups cooked soybeans," p. 13).

Note: A so-called 5th edition (with the same number of pages, and the same text on the same pages) was published in 1951. Address: Benton Harbor, Michigan.

286. Holt, Jane. 1944. News of food: Soy grits are utilized in new mixture. *New York Times*. Jan. 10. p. 14.2.

• **Summary:** Once again soy bean come to the fore as Joseph Tetley & Co., Inc., introduces a mixture of soygrits, flour, dehydrated onions, and other seasonings under the trade

name Beanburger. "This powderlike preparation may be used 'as is' to make patties or it may be employed as an extender for meat in hamburgers, croquettes, loaves, etc." A 4-ounce packet retails for 9 cents at A. & P. stores in Manhattan, New York City.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the word "Beanburger" to refer to a soy-based meatless burger.

287. **Product Name:** Ration Roast (Dehydrated Meat Substitute).

**Manufacturer's Name:** Hodson's Pantry Products. Imperial Brands Co.

**Manufacturer's Address:** 537 S. Dearborn St., Chicago, Illinois.

**Date of Introduction:** 1944 January.

**New Product–Documentation:** Ad in *Nature's Path* (New York City). 1944. Jan. p. 16. "Try this new modern product from Hodson's Pantry." "Ration Roast: Appetizing meatless dish—49¢."

Taylor. 1944. *The Soy Cook Book*. p. 199.

288. *Nature's Path* (New York City). 1944. Directory of health aids (Ad). Jan. p. 37-38.

• **Summary:** On page 38, column 1: "Edible soybeans. A protein food, full of vitamins, minerals, nutty flavor, easy to cook. New crop, 10 lbs. for \$1.50. Soybean flour, 5 lbs. for 75¢. 10 lbs. for \$1.30. 30 recipes included with order. Not postpaid. Frances M. Schmidt, Plainfield, Illinois."

On page 39, column 2: "Soya bean products. Dried soya beans, 10 lbs.—\$1.00. Low fat soya flour, 5 lbs.—\$0.75. High fat soya flour, used as milk powder, 4 lbs.—\$1.00. Soya flakes (Cereal), 4 lbs.—\$1.00. Soya bean oil, 1 gallon (send 40 meat points)—\$2.00. Postage not included in these prices. Also Soya Cookies, Soya Bread, Noodles, Butter, Grits, Lecithin, Coffee, Candles, Sausages, Nuts, Milk, Crackers, Sauce, etc. All made from Soya Beans, Huni Health Products, 205-207 East 87th St., New York, N.Y."

Note: The Sausages probably contain no meat, but we are not told what their ingredients are.

289. **Product Name:** Beanburger.

**Manufacturer's Name:** Tetley (Joseph) & Co.

**Date of Introduction:** 1944 January.

**Ingredients:** Incl. soy grits, flour, dehydrated onions, seasonings.

**How Stored:** Shelf stable.

**New Product–Documentation:** Holt, Jane. 1944. "News of food: Soy grits are utilized in new mixture." *New York Times*. Jan. 10. p. 14.2.

\*

290. Holman, Ross L. 1944. Know your soybeans. *American Mercury* 58:177-79. Feb.

• **Summary:** Used as a raw material in industry, the soybean can provide automobile bodies, steering-wheels, paints, buttons, rubber, candles, linoleum and explosives. It makes excellent wool for clothing when spun into fiber. Future uses as a plastic include: clocks, chairs, houses, fountain pens, and all the other synthetic industrial products devised by modern chemistry.

Soy flour is mixed with bread, cereals, doughnuts and cakes. "Oil extracted from the bean is made into margarine, and in its pure form has helped replace the imported oils and fats lost to us when the Japanese overran Malaya and the Netherlands' Indies." Soy sausages are 25% cheaper than those made from pork and "are an important item in our lend-lease supplies to Great Britain." Robert Boyer, Henry Ford's engineer at Highland Park, perfected a method of making soy fiber which can be manufactured into a cheaper textile than yet produced in America. It yields a wool which costs less than half as much as sheep's wool. Ford's pilot plan went into production several months ago and produces 1,000 pounds of soy fiber daily. 2 acres of land used for sheep grazing will produce 8 to 10 pounds of wool a year. The same acres planted to soybeans will produce 400 pounds of protein suitable for fiber, according to Boyer. Address: Tennessee.

291. Paddleford, Clementine. 1944. Food for conversation. *Los Angeles Times*. March 12. p. F14.

• **Summary:** "Beanburger is a meatless meat, packaged as a powder." Ingredients include "soybean grits, wheat flour, cracker meal and dehydrated onion." Just mix with water, form into patties, and fry like hamburger.

A new seasoner, called "sodium glutamate," gives a true chicken flavor. It is a by-product of processing wheat or molasses for industrial alcohol, "and is now used to improve the taste of the dehydrated stews and hashes developed to feed the liberated peoples" during World War II.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "meatless meat" (or "meatless meats," regardless of hyphenation).

292. Butler Food Products. 1944. New foods from the wonder bean (Ad). *Soybean Digest*. Sept. p. 11.

• **Summary:** A full page ad. "Mean a greater demand for soybeans and high prices for soybean growers." "Butler's Soya Butter was developed to meet the specific need of those who have allergic reactions to dairy products and for those who wish to maintain a strictly vegetarian [vegan] diet. Only Butler's Soya Butter can fill the above specific need. Butler's Soya Butter is available only to Health Food Stores and other outlets catering to those whose diet requires specialty foods." Photos show cans of each of these five Butler products: Butler's Soya Cheese [tofu]. Butler's Vegeburger. Butler's Soya Nut-Loaf. Butler's Vegetarian Chops. Butler's Soya-Butter.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the word “Vegeburger” to refer to a meatless / vegetarian burger. Address: Cedar Lake, Michigan.

293. **Product Name:** Butler’s Vegeburger.  
**Manufacturer’s Name:** Butler Food Products.  
**Manufacturer’s Address:** P.O. Box 4, Cedar Lake, Michigan.  
**Date of Introduction:** 1944 September.  
**Wt/Vol., Packaging, Price:** 1 lb can.  
**New Product–Documentation:** Ad in *Soybean Digest*. 1944. Sept. p. 11. “New Foods from the Wonder Bean.” Sold in 1-lb cans. Note: This is the earliest commercial food product seen that bears the name “Vegeburger.”

294. **Product Name:** Butler’s Vegetarian Chops.  
**Manufacturer’s Name:** Butler Food Products.  
**Manufacturer’s Address:** P.O. Box 4, Cedar Lake, Michigan.  
**Date of Introduction:** 1944 September.  
**Wt/Vol., Packaging, Price:** 1 lb can.  
**New Product–Documentation:** Ad in *Soybean Digest*. 1944. Sept. p. 11. “New Foods from the Wonder Bean.” Sold in 1-lb cans.

295. **Product Name:** Battle Creek Steaks, Battle Creek Skallops, and Meatless Wieners.  
**Manufacturer’s Name:** Battle Creek Food Co.  
**Manufacturer’s Address:** Battle Creek, Michigan.  
**Date of Introduction:** 1944 October.  
**Ingredients:** Skallops in 1971: Wheat protein [wheat gluten], water, salt.  
**New Product–Documentation:** These three meat alternatives, introduced during the early 1940s, were made from varying combinations of nuts (mainly peanuts), wheat gluten, and natural flavorings. None of them contained any soya. Worthington Foods, Inc. 1960. Oct. 15. “Battle Creek Food Company, authorized dealer price list.” “Vegetable Skallops” and “Vegetable Steaks, regular or small cuts” are listed. Note: This is the earliest commercial meat alternative seen which has a name clearly indicating that it is an alternative to fish, shellfish, or other seafood products.

Richard W. Schwarz. 1970. John Harvey Kellogg, M.D. p. 122. “The doctor’s interest in new vegetarian meatlike protein foods continued active until shortly before his death. Among some of the more popular creations later developed in his laboratories were Protose, Battle Creek Steaks, and Battle Creek Skallops. Various combinations of nuts and wheat gluten composed the principal ingredients in the imitation meats.”

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in “Skallops (Battle Creek–by

Worthington).”

Letters from Charles R. MacIvor or Hendersonville, North Carolina. 1981. March 4 and April 28. Battle Creek Steaks and Battle Creek Skallops were launched sometime before 15 Oct. 1944, as they were listed in the 1944 dealer retail price list. Neither of these products contained any soya.

Talk with Allan Buller of Worthington Foods. 1994. July 14. Battle Creek Steaks was mainly a gluten product, which was part of the product line that Worthington took over in 1960.

296. *Soybean Digest*. 1944. Grits and flakes from the industry: Loma Linda Food Co. and Vegemeats. Oct. p. 16.  
**• Summary:** The Loma Linda Food Co. is now preparing for an advertising campaign to broaden acceptance of its Vegemeats line, made of soybeans and select grains. The company will try to reach consumers first, then food processors. “Vegemeats were first introduced to consumers at the Golden Gate International Exposition” [Feb. 1939 to Sept. 1940]. The company now offers “a complete line of Vegemeats, including ‘steaks’ and ‘burger,’ as well as Vegemeats for loaves, roasts, and spreads.”

297. **Product Name:** Soy-B Prep Vegemeat (Meat Substitute or Extender).  
**Manufacturer’s Name:** Natural Health Products.  
**Manufacturer’s Address:** 143 W. 41st St., New York 18, New York.  
**Date of Introduction:** 1944.  
**New Product–Documentation:** Taylor. 1944. *The Soy Cook Book*. p. 201.

298. Hauser, Bengamin Gayelord. 1944. *Diet does it*. New York, NY: Coward-McCann, Inc. 248 p. Index. 20 cm. Rev. ed. 1951 (117 p., 28 cm), and 1952.

**• Summary:** In the preface, the author states that for 20 years he has been a pioneer in the field of scientific eating. The author does not advocate a vegetarian diet, but he does recommend use of soya beans, and consumption of plenty of vitamins and whole (unrefined) grains. For example, at the start of chapter 3 titled “Normal Nutritional Regime” is a section on “Proteins Come First.” It says: “Protein foods are of two kinds, spoken of as first class and second class proteins. The first class proteins keep the body in excellent repair. Such proteins are found in egg yolk, cheese, milk, yogurt, and glandular meats such as liver, kidney, brain, and sweetbreads. The muscle meats which we eat as roasts, chops, and steaks are also first class proteins but are less valuable to the body than glandular meats. A few vegetable foods contain first class protein: soya beans, nuts, wheat, especially wheat germ...” An active man should eat 75 gm of protein daily to maintain buoyant health. Half of the amount should be supplied from animal protein. “Recent studies have revealed that about 60% of the people in America

obtain too little protein to build full health. With the higher costs of eggs, fish, and meat, protein deficiencies of a more severe nature may be expected. For that reason you should acquaint yourself with 'the honorable soya bean' or the 'meat without bones' as it is called in the Orient. Prepared correctly as directed in the 'New Health Cookery,' Chapter 20 [sic, 21, of this book], soya beans can be delicious and fortunately contain first class protein."

Cooked soya beans are a good source of vitamin B-1 (p. 32). "Buy only whole wheat or soya bean macaroni, spaghetti, and noodles which are sold at stores specializing on health-building foods. Use brown rice rather than the white variety. Eat soya beans, baked, in "meat" loaves and patties" (p. 34).

Soy-related recipes include: Cream of soya soup (with cooked soya beans, p. 217). Soya nut croquettes (with baked soya beans mashed, p. 224). Soya bean loaf (p. 224). Soya and peanut butter patties (with cooked soya beans, p. 224). Delicious soya muffins (with soya flour, p. 228). Soya cream waffles (with soya flour, p. 229). Soya nut waffles (p. 229). Delicious soya cake (with soya flour, p. 229). Soya cookies (with soya flour, p. 230). Whole soya flour pie crust (p. 232; with "½ cup whole wheat flour and 1½ cups soya flour" etc.). Soya bean sprouts (homemade, p. 234; "They are also often used with soya bean curd and vegetables in chop suey."). Soya bean milk (homemade, p. 235). Address: Beverly Hills, California.

299. Miller, Harry W. 1944. The story of milk from the soya bean (Continued—Document part III). Mount Vernon, Ohio: International Nutrition Laboratory. 37 p. See p. 12-18.

• **Summary:** Continued. "Encouraged to Produce a Vegetable Milk: Having arrived at these conclusions which were based on extensive feeding experiments, we set about to get milk from a vegetable cow. However, my colleagues shook their heads saying, 'You might make something that looks like milk, but will it have those living properties that fit the requirements of a growing life in the form of a human individual?' But I have only to remind them that in the early days we thought of vitamins as living principles that evaded analysis, causing reactions but perishing with attempts at investigation, subsequent years have erased this argument and we can now analyze vitamins as well as manufacture them, as they have a chemical formula.

"I could easily have become discouraged in trying to bring out a substitute for animal milk because of the well established dairy business in America where sixteen per cent of United States industry flourishes, except that all the while I had in mind the people of the Orient in behalf of whom I had dedicated my life for service as a young man. Millions die annually for the lack of a suitable balanced food beverage to take the place that animal milk occupies in the American dietary, and as many more suffer lifelong weakness and ills because of faulty nutrition, especially in the early years of

life. I was also well aware that in America we have many who cannot take animal milk, either dislike it, are fearful of it, or are allergic to it, who are ill nourished for lack of a milk substitute. And even yet cow's milk is not available to all the inhabitants of the Americas.

"As I pondered over what a suitable milk food would mean to the Oriental races, where there was such a lack of that kind of food, I felt that humanity was throttled at its start. I was also aware of the dangers to health and life that lurk in the lacteal secretions of animals and the way milk is handled in dairy yielding countries. Consider also the economic food waste, in view of the enormous amount fed to animals and the little protein return. Think of what this well-processed vegetable protein would mean were it fed to the starving millions of this world. I determined to work out the problem of a vegetable milk. It occurred to me that if wool could be made direct from vegetable protein instead of feeding protein to the sheep, we could make milk without the digestive laboratory of the cow.

"I first investigated to see what had been accomplished, and discovered that two groups of child specialists, one in Baltimore, the other in Cleveland, had fed infants a gruel made from soy bean meal, and the reported results were very satisfactory. In America, all experimental feeding work was done with mixtures made from milling the soy bean into flour, although the fiber of the meal was a drawback. Yet because of the high nutritive value of soya protein and its alkalizing properties, it possessed remarkable values as reported in infant feeding by these authorities.

"We made the acquaintance of two men prominent in soy bean work of the U.S. Department of Agriculture, Dr. W.J. Morse, Chief of the Soy Bean Division of the Department of Agriculture, and Dr. J.A. LeClerc, Chief Senior Chemist of the Bureau. These men filled me with inspiration, enthusiasm and information. Throughout the succeeding years, we have had several interviews, and both of these men have made frequent visits to our Nutrition Laboratory at Mt. Vernon, Ohio.

"My preliminary studies made me aware that I would be confronted with many problems in producing from the soy bean an easily digested, tasty, wholesome milk that would meet a popular demand.

"My thirteen years spent at the nation's capital as surgeon and Medical Superintendent of the Washington Sanitarium and Hospital gave me a preliminary foundation in research methods for the years to follow in China. These years, from 1913 to 1925 were synchronous with the time of the beginning of modern dietetics. [Elmer] McCullum at Johns Hopkins University in Baltimore was neighbor to us, and he was actively pursuing the study of vitamins and their dietetic value. I was intimately acquainted with this pioneer worker and in fact at the Government Bureaus in Washington there was a great arousal on the importance of dietetics and cooking advances, to which work I had ready

access, as well as utilizing the marvelous Surgeon General's and the Congressional Library facilities, seeking the latest publications on food, processing and nutritional work.

"It was during this year I published my first book entitled, *The Way to Health*, which has enjoyed a wide circulation.

"During all these studies, my thoughts were focused on the Soy Bean, the world's great protein yielder, and how to best utilize it, and incorporate it into the American dietary as a substitute for meat, fish, milk, eggs and cheese. Early and late we were running experiments at the little food plant we erected in connection with the Washington Sanitarium and Hospital. We realized that the large things in soy bean utilization in America, as also in the Orient, remained to be worked out in the future, and that our work was the first real effort to be recorded relative to a soy bean milk suitable for infant feeding and as a complete beverage milk.

"Further Studies in China: Finally in 1925 the opportunity came for me to return to China. My employing organization, the Seventh-day Adventist Church, sent me to establish a sanitarium at Shanghai. During the early years after my return to China, my time was fully occupied with medical and surgical work and the building of the Shanghai Sanitarium and Clinic, and assisting in the establishment of numerous other medical units in different parts of the Orient. However, simultaneous with this work, my son and I began to carry forward the assembly of a soy bean plant at the Shanghai Sanitarium. My work necessitated my return to America for a brief period about every two or three years and this gave me the chance to discuss my problems with chemists as well as investigate suitable processing machinery.

"In my contacts, while traveling in China, Korea and Japan, I discovered that a milky looking solution, a water extraction of soya protein, oil and its contained vitamins and minerals, had been tried out in infant feeding in some hospitals, in some instances with satisfactory results, but for the most part with quite disappointing results.

"The method used in its manufacture in most cases was to soak the beans, grind them in a stone mill with a stream of running water and this milky solution was filtered through a cotton cloth and then boiled, sugar added, and various flavors tried out to cover the beany taste, but flavor control was not possible by the strongest essences. As I examined this milk, it was apparent that something must be done to overcome the beany taste, and I concluded the reason the people were using bean curd rather than drinking the milk from which the curd was made, was that it tasted better after it was coagulated than before. Further, it needed to be farther processed to make it more digestible, and until we could add sugar and additional oil to it, we could not have a balanced milk as is found in human milk.

"Being familiar with the process of constituting cow's milk from skim milk powder, and sweet butter, through

melting the butter, mixing it with the dissolved milk powder, and then homogenizing it, I concluded that we could do the same with this water-extracted solution from the hydrated soy bean.

"Since I knew that soy milk was a colloid liquid just the same as animal milk, and would hold a suspension of emulsified oil, I lost no time in getting a colloid mill that would do this same work, and could now constitute a liquid of any formula of protein, fat and sugar, so the resulting solution would be a colloid liquid as animal milk. Yet, I was far from having a milk that gave satisfactory results as to digestibility and could be borne by infants without too great looseness of the stools; and while you could sweeten it up so babies would take it, the older group would take a sip and turn it aside because of its bitter taste. To get rid of that beanish taste seemed far off, but to process it so that it could be more digestible, I thought was surely possible. Much work had been done at Ames, Iowa, in experimental animal feeding. Not only did these experiments show that thorough cooking under pressure of soy beans raised the availability of soy protein to 95 per cent absorption, but that weight and growth records in feeding of pigs and fowls were far superior to those of animals fed ordinary cooked beans, and thorough processing caused a disappearance of digestive disturbances."

Note. This is the earliest English-language document seen (Dec. 2013) that contains the word "beanish" or the term "beanish taste" used as the word "beany" or the term "beany taste" are used today (Continued). Address: Mt. Vernon, Ohio.

300. Miller, Harry W. 1944. The story of milk from the soya bean (Continued—Document part VI). Mount Vernon, Ohio: International Nutrition Laboratory. 37 p. See p. 30-34.

• **Summary:** Continued. "After all, protein is an important component of our clothing and many articles we commonly use. The soy bean is nature's greatest protein yielder. From 35 to 52 per cent, or almost one-half the weight of the dried soy bean, is protein. Next in value is the oil. By way of comparison with navy beans, peas, lentils and lima beans, the soy bean has 300 per cent more protein and ten times as much oil content.

"In making up our dietary requirements, we pay eight times as much for our protein as we do for carbohydrates and three times as much for protein as we do for oil. This may impress the reader with the great economic wealth in the soy bean. Nitrogen or protein is of first importance to the growth and maintenance of the human race, as well as the entire animal kingdom. While mankind has often depended on the flesh and products of animals, such as milk and eggs, for this protein supply, the animals had to basically depend on vegetables for their nitrogen. It is only vegetation. that can utilize the nitrogen of the air and inorganic sources of nitrogen and place it in accessible form for animal life. For

instance, we exhale every atom of nitrogen of the air that we inhale. None is utilized or stored in our tissues. Therefore, whether we drink animal milk, eat animal flesh, or take only vegetation, we get our edible protein solely from plant life, and there is no superiority in the animal stored protein, to that eaten by the animal and which is primarily available to the human from vegetation. So, as the sheep makes wool from the protein it eats, so the cow makes casein from the protein she eats. Unless the animal gets protein, there would be no wool or casein. But it is not necessary to use the animal digestive laboratories to make either wool or milk, for we can take the products the animal eats to make wool or milk by means of laboratory technique, and that under sanitary conditions.

“The chief and outstanding product of the International Nutrition Laboratory is soy milk, put out under the names of Soyalac and Soy-A-Malt, names having originated in the early days of our experimental work while pioneering in this field. Soy-A-Malt is put out under the registered trade mark No. 390909 U.S. Patent Offices and Soyalac registered trade mark is 389131 U.S. Patent Office.

“However, the Laboratory is concerned in making a large variety of foods from the soy bean and already has a score of such products on the market utilizing the entire bean, which is all valuable in human nutrition. Since milk has a wide variety of uses, we are making a beverage liquid Soyalac put up in tin cans, of 13 ozs. and 30 ozs. respectively. A chocolate flavored Soyalac is also put up in 13 oz. tins. A modified infant food powder, called Soyalac, is put up in one pound glass containers, which meets all the requirements of the growing infant from birth onward to the end of the nursing period, after which it is used to supplement the child’s diet. This infant food has as its chief constituent vegetable oils homogenized, a combination of sugars including dextrose, maltose and dextrin, and supplemented by vitamin A and D with calcium, phosphorus and iron added. Hundreds of babies in America and other countries with allergy, weak digestion and intestinal disturbances, are now being most satisfactorily nourished by Soyalac, a complete infant food including all known requirements for infant nutrition.

“Miller’s Soy-A-Malt is now a country-wide known beverage milk sold in either natural malt flavor or chocolate flavor and packed in one-pound, four-pound and twenty-pound containers, possessing all values of the soy bean nutritionally but without the bean flavor. Many who want a milk more nearly the animal milk flavor call for All Purpose Soyalac. This is packed in containers same as Soy-A-Malt, and can be used for cooking purposes as well as beverage the same as animal milk. Until we brought out these vegetable milks which are rapidly taking their place in the market beside cow’s milk, soya milk was chiefly demanded for certain specific diseases such as correcting acid states, intestinal upsets, and for diabetics. The composition of all

soya milk powders will be found on the labels as well as directions for using them.

“Frozen soya milk desserts and soya ice cream are now quite popular. Recipes are given for the home refrigerator.

“This little pamphlet concerns itself with the history of soya milk development rather than trying to cover the field of the International Nutrition Laboratory, for this soy food processing institution is the largest plant in the world devoting its entire efforts to human nutrition from the soy bean and for making meat substitutes. Foods that look like and taste like meat are made with high protein values. Our canned soya beans are among the most delightful and tasty vegetables. The soy bean is nature’s highest protein yielder and the International Nutrition Laboratory engages in the manufacture of these fine protein foods from the edible varieties only.

“No claims are made that soya milk has yet been developed by us to its final possibilities, but at least these twenty-five years of painstaking study and experimentation has resulted in a food second to none as an essential to strong body building and health. So much progress has been made in changing the extracted milk liquid of the soy bean used for millenniums by the people of China for making cheese [tofu] into a complete food of inviting appearance and delicious taste, with food values the equivalent of either human or animal milk that we feel rewarded for the effort and expense. Our soy milk can be made into a sour milk resembling buttermilk, it can be made into a cheese, and this cheese can be treated so as to have the appearance and flavor of meat. We have not tried to enter into the comparative values of soya milk and cow’s milk. There is much to be said regarding the value of soya milk and the story of Soya Milk would not be complete without a summary of the many virtues and nutritional values of soy food products. The soy bean, often called these days the ‘wonder bean,’ is just as wonderful as a food supplier as in the oil industry, or when used for plastics.

“The protein of the soy bean possesses all of the indispensable aminoacids [sic] and therefore is a complete dietary substitute for milk, eggs and meat, and stands as the only vegetable protein that is biologically equal to meat proteins. By our extraction process we are able to obtain 85 per cent of this edible protein in a soluble form that means that it is very readily digested. Truly, it is a wonder bean, for it does wonders in the nourishment of the well as also the sick. It is good for growth and excellent for body maintenance” (Continued). Address: Mt. Vernon, Ohio.

**301. Product Name:** Miller’s Veja Links (Meatless Wieners).

**Manufacturer’s Name:** International Nutrition Laboratory.

**Manufacturer’s Address:** Mt. Vernon, Ohio.

**Date of Introduction:** 1944?

**Ingredients:** Incl. seasoned okara or soy flour, and wheat

gluten.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** Herbert P. Ford. 1958. *The Life Story of Dr. Harry W. Miller*. p. 130-31. Dr. Miller developed a “vegetarian wiener” [Veja Links] containing raw vital wheat gluten, soy flour, seasonings, and flavors. He stuffed these into wiener casings, submitted them to a smoke house and to cooking, then peeled off the casings / skins and canned the wieners. He developed these at the Mt. Vernon slaughterhouse.

In the mid-1940s Dr. Miller developed Veja Links, the world’s first meatless wiener or hot dog, made of seasoned okara and wheat gluten, packed in a sausage casing.

302. Special Foods. 1945. Institutional and restaurant order blank. Worthington, Ohio. 1 p. Catalog. Feb. 15.

• **Summary:** Products include: Beta Broth (Meat-like flavor–dissolves instantly). Tastex (Yeast extract–meat-like flavor). Protein foods (Alternates for meat): Choplets, Choplet-Burger, Proast, and Numete. Tastex food yeast (For enriching and flavoring cooked foods). Wheatlets (Delicious whole wheat cooked breakfast cereal).

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the word “Choplet-Burger,” an early, popular vegetarian burger in the United States. Address: Worthington, Ohio.

303. **Product Name:** Numete (Meatless Cold Cuts Made from Peanuts and Soy Flour).

**Manufacturer’s Name:** Special Foods, Inc. Renamed Worthington Foods, Inc. in Dec. 1945.

**Manufacturer’s Address:** Worthington, Ohio.

**Date of Introduction:** 1945 February.

**Ingredients:** In 1975: Peanuts, corn and soy flour, salt, MSG, niacin, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Special Foods. Institutional and restaurant order blank. Feb. 15. *Chopletter* (Worthington Foods, Ohio). 1960. “What you should know about Worthington Foods.” April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Numete.

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Numete contains 13.10% protein, 16.90% fat, and 11.10% carbohydrate. One serving, ½-inch slice, weighs 65 gm.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned peanut product resembling cold cuts. Can also be used in salads or sandwiches.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet*

Interview with James Hagle. 1983. The Choplet Burger was the company's first product and meat analog with soy as a main ingredient. Sold in 30 oz. cans it had a texture like hamburger. It could be shaped into patties and fried.

Worthington Foods. 1989. “The Tradition of Healthy Choices.” April. A photo (p. 17) shows a can of “Choplet Burger.” Though no details are given in the text, the product's famous predecessor, Choplets, are discussed in detail.

305. *Madison Survey (Madison, Tennessee)*. 1945. *Madison health foods*. 27(16):63. Aug. 29.

• **Summary:** “A letter written some weeks ago from Addis

Ababa, Ethiopia, by Mrs. Della Hansen, housekeeper in the Emperor's palace, addressed to Madison Foods, says:

“His Majesty, the Emperor of Ethiopia, has seen your advertisement in *Life and Health*, and has asked me to write requesting a sample of each of your products.”

“Samples of Zoyburger, Yum, Vigorost, Soy Cheese [tofu], Stakelets, Not Meat, and Soy Koff were sent to the Emperor via the Ethiopian minister in Washington [DC].

“Never before in the history of the food manufacturing department of Madison has there been such evident interest in foods that meet the protein needs of the family dietary.”

Note: This is the earliest document seen (Aug. 2009) concerning soybean products (canned meatlike products from Madison Foods) in Ethiopia. This document contains the earliest date seen for soybean products in Ethiopia (1945); soybeans as such had not yet been reported by that date.

306. Butler Food Products. 1945. Nutritive value of the soybean (Ad). *Soybean Digest*. Sept. p. 58.

• **Summary:** The company's main product is Butler's Soya-Butter [a non-dairy margarine made from soy oil], which contains 97.2% fat, 1.8% carbohydrates, and 1% protein. “Non Fattening: The fat of soybeans is of a particular quality and it is not stored in the body as is animal fat, therefore you may eat freely of Butler's Soya-Butter without the fear of putting on additional weight... No Contamination: There is no animal product of any kind in Butler's Soya-Butter...”

Other Butler Foods: Butler's Vegetarian Chops. Butler's Soya-Nut Loaf. Butler's Vegeburger. Butler's Meatlike. Butler's Soy-Nut-Cheese. A photo shows H.O. Butler. Address: Cedar Lake, Michigan.

307. *Madison Health Messenger (Madison, Tennessee)*. 1945. *Madison Foods–Madison College, Tennessee*. 7(1):4. Undated.

• **Summary:** A full-page photo shows the following canned products, with a brief description of each and the price: Stake-Lets (a combination of gluten and soy beans). Not-Meat (a meatless loaf for cutlets, roasts, patties, croquettes, salads, etc.). Yum (a mild Bologna flavor. Contains soy beans, wheat gluten, and seasonings). Zoyburger (excellent for sandwich spreads or served like a steak with onions). Vigoroast (a vegetable steak). Wheatasoy (an alkaline breakfast food, ready to eat. Contains rich grain malt, whole wheat, and soy-bean flour). Zoy-Koff (Prepare like coffee. No trace of caffeine. No nerve stimulants. Two grinds—regular and fine). Kremlé O'Soy (a soy milk for those allergic to cow's milk and for special diets. A liquid not concentrated). Soy Cheese (soy curd (tofu) seasoned for croquettes, salads, sandwich spreads, etc.).

A separate photo across the top of page 1 of this issue shows a ground-level view of the “Madison College Campus, Home of Madison Foods.”

**STAKE-LETS**, a combination of gluten and soy beans. They are already sliced in the can. Serve in the place of a meat portion.

**NOT-MEAT**, a meatless loaf for cutlets, roasts, patties, croquettes, salads, etc.

**YUM**, a mild bologna flavor. Contains soy beans, wheat gluten, and seasonings.

**SOY CHEESE**, Soy curd (Tofu) seasoned for croquettes, salads, sandwich spreads, etc.

**KREME O'SOY** for those allergic to cow's milk and for special diets. A liquid not concentrated.

**ZOY-KOFF**, not a trace of caffeine. No nerve stimulants. Two grinds—regular and fine. Prepare like coffee.

## Protein Sources The World's Food Problem

In the world's stupendous problem of feeding the peoples of devastated countries, "the hopeful fact," says Paul De Kruif (*The Reader's Digest*, September, 1945), "is that modern famine-fighters no longer think of food in terms of meat, milk, butter, eggs, vegetables, but rather in nutritive essentials—calories, proteins, minerals, and vitamins. Calories can come from any food. Proteins do not have to come from meat, eggs, or milk, but can be gotten from a combination of legumes and cereals."

### The Soybean—A Major Food Crop

For thousands of years the soybean has been a staple food in the Orient. Quoting further from Paul De Kruif:

"It is ten to fifteen times richer than wheat flour in minerals; five to ten times richer in the principal B vitamins; and four times richer in proteins."

"It contains protein very nearly as good as that in the best cut of beef."

Since the soybean has not been proven a complete protein, by supplementing it with milk and eggs it does become a perfect substitute for meat.

In its laboratories MADISON FOODS has developed palatable products from the soybean and other protein bases. Try them.

Madison College and Madison Sanitarium and their affiliated institutions serve a fleshless diet.

Medical staffs and dietitians recommend these substitutes for flesh food. Patients respond favorably. Meatless days do not concern the personnel.

**ZOYBURGER**, excellent for sandwich spreads or served like a steak with onions. Recipe on the can.

**VIGOROST**, a vegetable steak to be prepared like meat, also for sandwiches and salads.

**WHEATASOY**, an alkaline breakfast food, ready to eat. Contains rich grain malt, whole wheat, and soy-bean flour.

**MADISON FOODS — MADISON COLLEGE, TENN.**

308. *Madison Survey (Madison, Tennessee)*. 1945. Food-manufacturing industry. 27(19):76. Oct. 17.

• **Summary:** “Again Madison Foods has made a carload shipment of nearly 65,000 pounds to the Pacific Coast, to distributors in Los Angeles [California] and Seattle [Washington]. This car contained Zoy Koff, the cereal drink, 350 cases of Kreme O’Soy Milk, and 1,350 cases of the protein foods-Vigorost, Yum, Zoyburger, Not Meat, Stakelets, and Soy Cheese.”

“It is now an established fact that we are not dependant on flesh foods for the protein content of the daily rations.” After discussing an article about soybeans in *Reader’s Digest* titled “How we can help feed Europe’s hungry” (Sept. 1945, p. 50-52), the *Madison Survey* concludes: “Madison is fortunate at such a time as this to be able to manufacture and market products that are helping in the solution of the greatest food problem the world has known.”

309. Lager, Mildred. 1945. Madison College (Document part). In: Mildred Lager. 1945. *The Useful Soybean: A Plus Factor in Modern Living*. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 106-07.

• **Summary:** “There are several large and small Seventh-day Adventist food concerns in this country that manufacture a complete supply of soy products, most of which are cooked and ready to use.

“As pioneers, all these Adventist concerns have done considerable research on soybeans, and most of them employ chemists who have had firsthand experience with the beans in China. These men know the food value of the bean, what it has meant nutritionally elsewhere, and they strive to perfect formulas for well-balanced and complete vegetable protein foods to take the place of meat. Most of these concerns also manufacture soy milk, fortified to equal dairy milk in food value. Their meatlike products at first were for the use of their own people, their hospitals and institutions; but demands for vegetable protein have brought them into health-food stores and food specialty shops. Sales on these products have been steadily increasing with a rapid rise in the last 3 years, climaxed by meat and cheese rationing...”

“Perhaps the best known of the pioneer institutions is Madison College, Tennessee. It is doing an outstanding job in maintaining a self-supporting college and a sanitarium and in developing a complete line of soy products that are being sold on an international scale. Madison’s curriculum includes 27 campus industries run by the students to support the college and themselves. A 900-acre college farm is operated entirely by student labor and is also self-supporting. The student canning factory was started when the college was in its infancy, almost forty years ago; and several years of research in food chemistry have resulted in many new products built around the soybean. Madison College is largely responsible for making soybeans appetizing.

They have developed a soy milk that has received world recognition; observers have come from Africa, India, and other countries where milch cows are scarce, to study the methods of Madison’s soybean dairy. They also make soy cheese [tofu] and several meat substitutes, as well as a soybean beverage. These foods are now well distributed over the United States and some foreign countries, including South Africa.”

Note. This is the earliest English-language document seen (Aug. 2013) that uses the term “soybean beverage” to refer to soy milk. Address: Southern California.

310. Lager, Mildred. 1945. Loma Linda Foods (Document part). In: Mildred Lager. 1945. *The Useful Soybean: A Plus Factor in Modern Living*. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 107-08.

• **Summary:** “The Loma Linda Food Company of California was originally established to supply nutritious vegetarian foods to institutions and hospitals, but it soon outgrew that field. Its sales in the last 3 years has grown by leaps and bounds. The first 6 months of 1943 almost double 1942; and today the company has national distribution of a complete group of soy products including canned beans, soy milk, cheese, several meat substitutes, a soy coffeelike beverage, and soy-fortified cereals.” Address: Southern California.

311. International Nutrition Laboratory. 1946. Dealers order blank. P.O. Box 388, Mount Vernon, Ohio. 1 p. Catalog. Jan.

• **Summary:** Lists 14 Soyalac products (all-purpose in 4 sizes, malt flavor in 4 sizes, chocolate in 3 sizes, infant food, natural liquid, and chocolate liquid), Giant Green Soya Beans in 3 sizes, Giant Select Soya Beans, Soya Beans with Tomato Sauce in 2 sizes, Soya Spread, Chili Con Carne (Vegetarian; with wheat gluten, no soy), Chop Suey (Mein Jing, Vegetarian, with soy sprouts), Cutletburger (Vegetarian; with wheat gluten, no soy), and Cutlets (Vegetarian, 4 sizes, no soy). Address: Mount Vernon, Ohio.

312. *Madison Survey (Madison, Tennessee)*. 1946. Fitting students to meet life’s problems at Madison College: A training center for Christian self-supporting workers. 28(12):50-56. June 30.

• **Summary:** A good overview of Madison College (“Nashville Agricultural Normal Institute”), with 15 photos. One photo shows E.A. Sutherland, Dr. Perry Webber, and two other men (probably students) standing in a field of soybeans examining a soybean plant. The caption: “Madison’s food manufacturing plant, utilizing vegetable protein as meat alternates, is an attractive phase of the industrial program of the college. In these times of flesh food shortage, men are learning that nature grows protein foods in the open field. One of the most promising of these is the soybean.

“Madison Foods, operated on the college campus, gives

employment to students in training.”

A second photo (p. 56) shows the food manufacturing plant, apparently under construction.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “meat alternates” (or “meat alternate”—with any combination of hyphens or quotation marks).

313. Worthington Foods, Inc. 1946. Dealer order blank. Worthington, Ohio. 1 p. Catalog. Aug. 1.

• **Summary:** See next page. Products include: Mung bean sprouts. Soy beans in tomato sauce. Beta Broth. Tastex. Tastex food yeast. Protein foods (Alternates for meat): Choplets (vegetable fillets packed in savory sauce). Choplet-Burger (vegetarian ground meat with a texture like hamburger). Proast and Numete (dark or light vegetable meatloaf). Soy sauce (table). Wheatlets (Delicious whole wheat cooked breakfast cereal). A fairly detailed description of each product is given. Address: Worthington, Ohio. Phone: 2-5359.

314. Hauser, Gayelord. 1946. The Gayelord Hauser cook book: Good food, good health, good looks. New York, NY: Coward-McCann, Inc. viii + 312 p. Illust. 21 cm.

• **Summary:** This is a health food (but not a vegetarian) cookbook; it uses meats, poultry, and fish. Soy-related recipes include: Soya tomato soup (with soya flour, p. 48). Soya soup (with soya flour and soy sauce, p. 49). Soya cheese sticks (with soya grits, p. 111). Roasted soybeans (p. 115; p. 114 notes that the soybean is a first-class protein food). Cranberry soya pudding (p. with soya flour, p. 154). Caramel soya custard (with soya milk, p. 163). Rice pudding (with soya milk, p. 164). Soya ice cream (with soya milk and agar-agar, p. 167).

In the chapter on baked goods, p. 179 shows that soya flour is rich in protein, vitamin B-1, riboflavin, and niacin. And pages 180-81 give a detailed discussion of the benefits of soya flour and how to use it. Page 182 discusses gluten flour. Recipes include: Whole-wheat soya bread (p. 183). Soya nut waffles (p. 186). Soya muffins (p. 188). Steamed soya bread (p. 189). Four nutritious sandwich spreads with ½ cup soya flour (p. 191). Delicious soya cake (p. 193-94). Quick service cake (p. 195-96). Soya-flour pie crust (p. 197). Soya cookies (p. 204). Soya sand tarts (p. 206).

Fletcherizer (p. 221, a type of electric blender). Fletcherized drinks: Cream of soya milk (with soya flour, p. 222), vege-nut milk (with soya flour), almond-, pecan-, walnut-, filbert-, or cashew milk. Cream of soybean soup (p. 224).

In the chapter titled “Yogurt, brewer’s yeast, and other special foods” is a long section on soybeans and gluten (p. 237-42) including basic information on soybean oil, soya flour and grits, soy flakes, soy meats (split or coarsely ground soybeans), soybeans as a vegetable [fresh-green soybeans],

soybean milk, and soybean curd or tofu. Instructions are given for making soybean sprouts at home. Recipes include: Boiled soybean sprouts. Fried soybean sprouts. Green soybeans. Baked soybeans. Soybean milk. Soybean parsley croquettes. Soybean nut croquettes. Vanilla soya ice cream. Homemade gluten dough. Gluten steaks or chops. Address: Beverly Hills, California.

315. Worthington Foods, Inc. 1947. Good foods for every occasion (Ad). *Health* 14(2):2. Feb.

• **Summary:** Ad for Choplet Burger, Beta Broth, Soy Sauce, Soy Beans, Tastex, Choplets, Numete, Proast, Tastex food yeast. Photos show each package and ready-to-serve product. Address: Worthington, Ohio.

316. Bragg, Paul C. 1947. Paul Bragg’s health cookbook [1st ed.]. New York, NY: Alfred A. Knopf. xii + 402 + xxx p. Index. 21 cm.

• **Summary:** Contents: Section I: Flavor. 1. Flavor, the soul of food. Section II: Recipes. 2. Salads (7 types). 3. Salad dressings. 4. Soups. 5. Vegetables. 6. Meats. 7. Fish. 8. Poultry and game. 9. Vegetarian entrees and cheese dishes. 10. Eggs and egg dishes. 11. Cereals. 12. Bread, rolls, and muffins. 13. Pancakes and waffles. 14. Pies and fillings. 15. Cakes and frostings. 16. Cookies. 17. Desserts (fruit desserts, other desserts). 18. Sauces. 19. One world cookery (“Health” foods in many lands, Mexican, Creole, From France, the Near East, the Far East, etc.). 20. Candies. 21. Drink health the new way (“cocktails” made without alcohol, from fresh fruit and vegetable juices). 22. Canapés. 23. Sandwiches and fillings. 24. Canning.

Section III: Special-purpose recipes. 25. Reducing. 26. Gaining. 27. Food allergies. 28. Invalid food or bland diets. Appendixes. Herb chart. How to grow a savory herb garden. The window-box herb garden. Organic gardening: Good nutrition starts in the ground. How to make a compost pile.

Soy-related recipes: Substitutes. Soybean milk for cow’s milk. Beans and especially soybeans for meat. Whole-grain flours for white flour (p. 5). Sprouted soybean salad (p. 45). Soybean soup (with “1 cup {dry} soybeans,” p. 72). Black soybean soup (p. 72-73). Sour-cream bean soup (p. 73).

In the chapter on “Vegetables” there is a section titled “Soybeans” (p. 92-95) with this contents: Introduction (“The soybean is one of the richest of all foods in protein and in minerals, and it also makes a very delightful addition to good meals... but only in recent years have Americans and Europeans become awakened to its possibilities as a meat substitute and also its great value as a food staple”). How to make soybean sprouts. Soybean sprouts en casserole. Sprouted soybean omelet. Soybean sprouts with onions and mushrooms. Soybean recipes (“for preparing the magic soybean”). Green soybeans (in pods). Dried soybeans. Canning recipes. Soybeans used as meat substitutes. Soy milk. Soybean cheese [tofu].

**WORTHINGTON FOODS:**

Every one of the items offered under the Worthington label is guaranteed to be pure, wholesome, and of superior quality. Worthington Foods are famous for their distinctive taste appeal.

You can speak with confidence when you tell your customers, "There's nothing in Worthington Foods!"

**SOY BEANS IN TOMATO SAUCE:**

Select quality soy beans, cooked and packed in delicious tomato sauce. Serve like baked beans. Excellent for either lunches or dinners.

**BETA BROTH:**

Instant broth at its finest! Full-bodied, meat-like flavor, but meat free. Made from Brewer's yeast and vegetable extract. It's granulated to dissolve instantly. Makes an excellent gravy stock!

**TASTEX:**

Tastex makes wonderful gravy, bouillon, soup. TASTEX keeps indefinitely without refrigeration, has a definite meatlike flavor, and is made in a concentrated paste form. It's rich in the Vitamin B complex. Economical!

**TASTEX FOOD YEAST:**

Many cooked dishes, as well as pastries and baked goods, can be enriched by adding a small amount of this pleasant tasting yeast. Contains all the natural B complex as found in yeast and a 42-46% protein. Send for a sample.

**CHOPLETS:**

Delicious, high protein, vegetable fillets packed in savory sauce! Easily prepared in numerous ways and economical, too. They provide the sturdy main course which is so often lacking in vegetable plates. Recommended for meatless diets, Friday menus, Lenten dishes, vegetable plates, sandwiches. Choplets never fail to satisfy!

**CHOPLET-BURGER:**

This product answers the many calls for a vegetarian "ground meat." It's coarse in texture, like hamburger, and can be shaped into patties for frying. With the popular Choplet flavor and the convenient "burger" style, this item meets hearty approval of customers.

**PROAST AND NUMETE:**

For a delightful vegetable "meat loaf," your customers will appreciate Proast (dark) or Numete (light). Both are distinctive in flavor and rich in pure, nutritious protein. They are excellent sandwich fillers, or can be diced and used in salads.

**SOY SAUCE:**

The finest available soy sauce, packed attractively in a convenient table-size bottle.

**WHEATLETS:**

A toasted, whole wheat cereal which can be quickly cooked for a wholesome, healthful breakfast dish!

Chapter 9: Vegetarian entrees and dishes. Lentil loaf with milk or soy milk. Soybean loaf (with dry soybeans and soy milk). Soybean macaroni loaf. Vegetable and soybean stew. Soy vegetable roast (with 1½ cups cooked soybeans). Vegetable hash (with soy sauce). Boston baked soybeans. Stuffed peppers with soybeans. Vegetarian sausages (with cooked soybeans). Vegetarian chop suey (with soy sauce and gluten steaks). Soybean cheese (homemade tofu made from soy milk allowed to curdle in a warm place; cut and serve with soy sauce).

Whole-wheat soy bread (with soy flour, p. 195). Soybean waffles (with soy flour, p. 212). Whole-wheat soy pie crust (with soy flour, p. 213). Canned [green vegetable] soybeans (p. 324, 336). Soybean waffles (wheatless, with soy flour, p. 369). For those with food allergies: Soy milk and Soybean cheese (see p. 95).

In this book, Bragg uses the word “aminos.” “The link between protein and body tissues is the amino acids. When the aminos enter the blood stream, they are carried to every part of the body, where they set to work repairing, rebuilding, and maintaining body tissue, building up rich red blood, and ‘conditioning’ the various organs” (p. 6).

Note 1. This is not a vegetarian cookbook; there are chapters on meats, fish, poultry and game. Throughout his life, Paul Bragg seems to have had an ambivalent feeling about eating and recommending the consumption of red meat and poultry. In his later years, fish became his favorite flesh food.

Note 2. This book contains no autobiographical information about Paul Bragg. Address: P.O. Box 428, Burbank, California.

317. *Chopletter: The Magazine of Worthington Foods News and Views*. 1948-1969. Serial/periodical. Worthington, Ohio: Worthington Foods, Inc. Vol. 1, No. 1. April 1948. Quarterly. • **Summary:** By April 1960 the circulation was about 65,000. Beneath the title on page 1 was written: “The Magazine of Worthington Foods News and Views.” Worthington bills itself as “Makers of Famous Choplets.” The editor is Opal Hoover Young. It is published quarterly. The last issue was March/April 1969. The title changed in May/June 1969 to *Tomorrow's Foods for Today's Homemaker*. Address: Worthington, Ohio.

318. **Product Name:** Tofu, aburaage, and ganmodoki. **Manufacturer's Name:** Itaya Tofu-ten (Tofu Shop). **Manufacturer's Address:** Rt. 6 Box 273, French Camp, near Stockton, California. Phone: 3-8042. **Date of Introduction:** 1948 May. **New Product–Documentation:** Entry in *Nichi Bei Times*. 1948. Evacuation-Resettlement Report. Directory of manufacturers, p. 138 (top left center). In Japanese: Itaya Tofu-ya. In English: Itaya Tofu Ya, Rt. 6, Box 273, Stockton, California. Phone: 3-8042.

Ad (1/8 page) in same *Nichi Bei Times* 1948 Report. p. 143. Lower right center. The top one-fourth of this ad is in English: Itaya Tofu Ya. Tofu, aburaage, soy beans products and vegetables. Rt. 6, Box 273, Stockton. Phone: 3-8042. In Japanese: Itaya Tofu-ya. Tofu. Aburaage. Ganmodoki. Haarei (Harry?) Itaya Toshio.

Ad (1/8 page) in *Hokubei Mainichi Year Book*. 1951, p. 310. All in Japanese: Itaya Tofu-ten. Making and selling tofu and aburaage. French camp. Mr. Harry Itaya. Phone: 3-8042. Directory entry, p. 311. Under “Grocery.” Itaya Tofu-ten, Itaya Tofu Co., Rt. 6 Box 273, Stockton. Phone: 3-8042. Note: French Camp is located about 4 miles south of the center of Stockton.

319. *New York Times*. 1948. All the ‘trimmin’s,’ with turkey absent, give vegetarians a joyous Thanksgiving. Nov. 26. p. 25, col. 6.

• **Summary:** The 17th annual Thanksgiving dinner held by the Vegetarian Society of New York was attended by about 150 members at the Farmfood Restaurant, 104 West 40th Street in New York City. The main course was “nut meat roast” accompanied by cranberry sauce and pumpkin pie. The principal speaker at the dinner was Dr. Jesse Mercer Gehman, a naturopath physician from Paterson, New Jersey, and president of the American Vegetarian Union.

Note: The first annual Thanksgiving dinner held by this society was apparently in Nov. 1932.

320. *Madison Health Messenger (Madison, Tennessee)*. 1948. Soybeans—A wonder food: Madison College works with the soybean. Fall. p. 1, 3-4.

• **Summary:** The soybean originated in China. However this “food of the ancients now seems destined to turn its antiquity into one of the most valuable foods in the modern world.

“The first actual mention in the literature of this wonder bean is recorded in Emperor Chen Nung’s *Materia Medica*, written under date 3838 B.C. In the Legendary period of China the story of bandits attacking a merchant caravan has been handed down through generations in which it is said that the miracle wonder food, soybeans, were the lifesavers of some merchants, who, being surrounded and besieged by bandits until their own provisions were exhausted, noticed a vinelike plant bearing a legume which they had never seen before from which they made flour and baked cakes. Energized therewith, they fought off the enemy until help came. So the legend goes, soybeans became the staff-of-life in the great nation of China which still ranks first in population in all the world.”

Soybean “oil is used extensively in Margarine in which it is used up to 80% in certain brands (Sure Good, sold by A. & P., and Nu-Maid, sold by Kroger).” Many brands of margarine contain 20-80% soybean oil.

Discusses the work of Henry Ford with soybeans and soyfoods. “His research staff made soybean milk and cheese,

VOL. VI

JUNE 1953

NO. 2

Aerial View of Worthington Foods Factory

soybean-nuts, canned green soybeans, soybean sprouts, and a hundred other things.”

“With the knowledge of widespread disease in the animals used for food by man, the founders of Madison College adopted a vegetarian diet supplemented with dairy products and eggs. For over 44 years this has been strictly adhered to in the food preparation for the students, faculty, workers, and patients at its 165 bed sanitarium and hospital... For over 30 years [since 1918 or before] Madison has been growing soybeans. They have occupied a place of prominence in its menus for many years.” Then Madison began to manufacture soybean food for the public. More and large equipment was added. “In 1941 a new plant was started and today Madison Foods are produced in a fine daylight plant of modern design and construction...”

A list of Madison’s foods is given, together with the weight of the can or bag in which each is sold: Kreme O’ Soy, Zoy-Koff, Stake-Lets, Yum, Zoyburger, Vigorost, Not-Meat, Soy Cheese [Tofu].

**321. Product Name:** Granose Sausalatas (Meatless Sausages Canned in Brine) [Plain, or Smoked].  
**Manufacturer’s Name:** Granose Foods Ltd.  
**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.  
**Date of Introduction:** 1948.  
**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** *The British Vegetarian*. 1960. Sept/Oct. p. 249. Granose makes Sausalatas, which contain wheat protein, mixed nuts, rusk, wholemeal flour,

vegetable oils, yeast extract, onion, and seasoning.

Manufacturer’s catalog. 1980. April.

By 1980 the product had been reformulated to include textured soy flour.

**322. Product Name:** Miller’s Vegetarian Cutletburger [Regular, or Smokene Flavors].  
**Manufacturer’s Name:** International Nutrition Laboratory.  
**Manufacturer’s Address:** P.O. Box 388, Mt. Vernon, Ohio.  
**Date of Introduction:** 1948.  
**Ingredients:** Incl. wheat gluten.  
**Wt/Vol., Packaging, Price:** Can.  
**New Product–Documentation:** Soybean Blue Book. 1948. p. 84. Ad in *Soybean Digest*. 1949. Aug. “Miller’s Cutletburger for Picnics, Too!” This canned product is sold in Regular and Smokene flavors. Note: The product is gluten-based. The word “Smokene” was apparently derived from T.A. Van Gundy’s Smoein or from Loma Linda Foods’ Smokene.

**323.** Sherman, Henry Clapp. 1948. Food products. 4th ed. New York, NY: The Macmillan Co. vii + 428 p. Illust. Index. 22 cm. [400+\* ref]

• **Summary:** The author is one of America’s leading nutritionists. The dry residue of foods consists of combustible matters (organic substances) and ash (non-combustible, the “so-called mineral elements”) (p. 1). The fats are all glycerides, i.e., substances consisting of combinations of glycerol with fatty acids. As the molecular weight of fats increases, so does their boiling or melting points, while their solubility decreases. Butter is the only fat that contains all the fatty acids. Seed oils used for food include cottonseed oil, soybean oil, peanut oil, corn oil, etc. After food fat is digested and absorbed by the body, it appears in the blood in the form of “glycerides collectively called neutral fat” (p. 810).

The three basic types of proteins are: Simple proteins (albumins, globulins, glutelins, etc.), conjugated proteins (nucleoproteins, glycoproteins, phosphoproteins, lecithoproteins, etc.), and derived proteins (primary {proteans} or secondary {proteoses, peptones, peptides}) (p. 11-13).

Children from ages 3 to 13 should drink a quart of milk a day (p. 82-83). Pork is the main meat produced in America, followed by beef. Veal is mainly a by-product of the dairy industry. In the USA, veal calves must be at least 3 weeks old when slaughtered; in most parts of Europe they may be younger. The term “meat packing” derives from the “early days of the industry when farmers or local butchers cured and smoked surplus meat, packing it largely in barrels, for local use, for supplying ships, and for export trade.” This industry began in about 1830, with companies packing pork in Cincinnati, Ohio, which was the center of the corn belt.” For a full account of the history of the industry see *American*

*Livestock and Meat Industry*, by Clemens. (p. 137-39). Table 13 shows the percentage of free, bound, and total purines in different meats (p. 155).

In Chapter 9, titled “Vegetables,” the section on “legumes” (p. 233) states: “Soybean flour and related products (“soya”) constitutes in the United States a ‘new’ addition to the dry-legume food group; but one of great potential importance. As yet this important potential resource has been given but slight and slow recognition as human food by the peoples of either the United Kingdom or the United States.” Soybean flour typically contains 30-45% protein. The “chemical composition or amino-acid make-up of soybean and peanut proteins is much like that of meat proteins...” Table 26 shows the “Percentages of individual amino acids in legume proteins” including glycinin (soybean). The large increase in soybean production in the USA during World War II “has shown that our supply of mature legumes and their products as human food can readily be increased several-fold whenever this seems likely to meet the needed support of consumer demand.” In 1946 soybean flour was recognized by the Food and Drug Administration as an alternative to added wheat gluten, “gum gluten,” in macaroni products.

A major theme of this book is the “balance of acids and bases” or of “acid-forming and base-forming elements,” however it is given less space than in the 1917 edition. The base-forming elements are sodium, potassium, calcium, and magnesium (p. 76). Eggs have a “considerable preponderance of the acid-forming elements...” (p. 128). “Meats contain a decided excess of the acid-forming over the base-forming elements” (p. 156). Fruits and vegetables “render the body two important services in helping it to maintain a good intestinal hygiene and a wholesomely liberal level of alkaline reserve (or surplus of potentially base-forming mineral elements) (p. 281-82).

Oils can be classified according to the way they are pressed. Peanut oil is prepared from the less choice nuts and from the germs, which are a by-product of making peanut butter. “In the *expeller press*, the nut meats are only slightly heated in the conveyor which carries them to the press. The meats are run through rolls which crush them and release the oil from the oil cells. By this method there is produced a small quantity of high quality oil known as *cold-press* or *virgin* peanut oil which when filtered is suitable for table purposes without any drastic refining treatment. With the *hydraulic press*, the ground nuts are heated thoroughly to facilitate expulsion of the oil.” Peanut butter was first produced commercially in about 1907 (p. 293).

Chapter 12, “Edible fats and oils” notes that “peanut (arachis) oil and soya bean oil” come from the seeds of leguminous plants (p. 303). Before the war, cottonseed oil and coconut oils were the vegetable oils most use in margarine manufacture in the USA. “During the Second World War the supply of coconut oil was almost entirely

cut off, while our domestic production of peanut oil was notably increased and that of *soybean oil* was very greatly accelerated.” In fact more than 3 times as much soybean oil was used on average each year during 1943-46 as in 1937-41 (p. 312). Important edible vegetable oils in the USA are the oils of coconut, corn, cottonseed, olive, peanut, sesame seed, palm kernel, poppy seed, rape seed, soybean, and sunflower. There follows a long discussion of only two of these oils: olive oil then of cottonseed oil. The term “salad oil” when used alone is understood by law to mean olive oil. Under cottonseed oil: The two main types of expression equipment in general use in this country are the hydraulic press and the Anderson expeller. “The latter is more modern and is continuous in operation. It depends for its action on a spiral screw...” “The so-called *cold-pressed* or expeller oil differs mainly for the *hot-pressed* (hydraulic presses) oil in that the former requires longer agitation with caustic soda solution before heating in the subsequent refining operation.” Refining, wintering, and hydrogenation / hardening are then described (p. 314-16). Table 45 (p. 408) gives the thiamine content of various foods, including soybeans.

Also discusses: Peanuts, peanut butter, and peanut oil (p. 291-96, 299-301). Almonds. Margarine (p. 310-12). Shortenings (p. 317). Address: PhD, ScD, Mitchill Prof. Emeritus of Chemistry, Columbia Univ. [New York City].

324. *Soybean Digest*. 1949. Plan soy foods for use in Germany. March. p. 24-25. [3 ref]

• **Summary:** The food nutrition laboratory of Archer-Daniels-Midland Company, Minneapolis, Minnesota, is developing two new foods (tasty soybean “sausages”) based on soy flour, for use in postwar Germany. One sausage is a mixture of 50% meat and 50% soya and vegetables. The other contains no meat, only soya and vegetables.

A photo shows Geo. M. Strayer (American Soybean Assoc. Secretary-Treasurer), Dr. William Bening (a German nutritionist from Frankfurt), and R.G. Brierley (Archer-Daniels-Midland Co., Minneapolis).

325. *Madison Health Messenger (Madison, Tennessee)*. 1949. Summer foods for health. Vol. 49-2. p. 1-3. Undated.

• **Summary:** Note: This issue of the *Madison Health Messenger* is smaller than its predecessors—only 20 cm (vs. 28 cm) tall but still 6 pages. Some recipes are featured—as for Zoyburgers. New products include Yum (made from soybeans, gluten, and soy cheese [tofu]) and Bite-Size Stake-Lets (made from gluten and soybeans). A chemical analysis of 8 Madison products is given.

326. Madison Foods 1949. Madison Foods featured recipes (Leaflet). Madison College, Tennessee. 2 panels each side. Each panel: 22 x 14 cm. Undated.

• **Summary:** “For real eating pleasure—Nu-Steak—Vegetarian.” On the cover is a photo of a table setting with

**DESCRIPTION—**

**INGREDIENTS**

**ZOY-KOFF**—A coffee alternate used in place of coffee. Contains no coffee—no nerve stimulants. Two grinds—regular and fine. Prepare like coffee. Ingredients—soybeans, bran and molasses. Packed in 1-lb. paper bags.

**NU-STEAK**—An all-gluten vegetarian steak. So easily prepared. Uniform in size. Special process makes it one of the best. You will be delighted with its texture and flavor. Ingredients—Wheat gluten in tastily seasoned broth.

**MADISON BURGER**—This tender burger textured product is already a favorite with many. Can be used to form the base for so many of the Vegetarian protein dishes. Make your own Meat Balls—vegetarian—easily prepared and economical. Ingredients—processed Wheat gluten ground to burger texture, tastily seasoned.

**MOCK CHICKEN**—These all-gluten chunks with a distinct seasoning will surprise you. Can be fixed in a variety of ways—see recipes on can label. Ingredients—Wheat gluten in seasoned sauce.

**SANDWICH LOAF**—A tasty loaf, easily sliced. Ideal for sandwiches. Ingredients—Wheat gluten, garbanzos and seasoning.

**STAKE-LETS**—A combination of wheat gluten, whole wheat and soy flour prepared in meat-

like sauce. These vegetarian steaks, uniform in size, are easily prepared. Ingredients—Wheat gluten, whole wheat and soy flour and seasoning.

**CHEZE-O-SOY**—An excellent diabetic food, low in carbohydrates. Nice for sandwiches and salads. Ingredients—processed soy beans, nicely seasoned.

**NOT-MEAT**—A smooth-textured loaf. This is well liked by many. Ingredients—peanuts ground into meal, soy grits, and seasoning.

**YUM ZOYBURGER VIGOROST.** These three high-protein foods are excellent body builders. Each has its distinct flavor. A favorite with many for years. Can be prepared in many ways to simulate meat. Ingredients—Wheat gluten, processed soy beans, peanuts, garbanzos, and seasoning.

**TYPICAL ANALYSIS**

	Calories Per Ounce	Protein	Fat	Carbo- hydrates	Ash
Zoy Koff Liquid 1 6-oz. cup	.1	.08	.004	.98	.12

roses in a vase, food on 3 plates, a napkin and glass. On page 2-3 are recipes for using Madison Foods, which include: Nu-Steak or Steak-Lets. Mock Chicken. Madison Burger. Not-Meat. Cheze-O-Soy (tofu). Zoyburger. On page 4 are descriptions of 11 Madison Foods Products” Zoy Koff, Nu-Steak, Madison Burge4, Mock Chicken (all gluten chunks), Sandwich Loaf, Stake-Lets, Cheze-O-Soy, Not-Meat (with peanuts ground to a meal, soy grits, and seasoning), Yum, Zoyburger, and Vigorost.

A table gives a nutritional analysis of each. Note: These are vegetarian recipes, featuring meat alternatives made by Madison Foods.

327. *Madison Health Messenger (Madison, Tennessee)*. 1949. The story of Madison Foods. Vol. 49-3. p. 1-6. Undated.

• **Summary:** “Over 45 years ago [actually in 1904] a group of educators founded an institution in Madison, Tennessee, where special study was given to healthful living. They began by operating a school on a farm. Later a sanitarium was built. And, finally, a food production department was opened, now known as Madison Foods... People who came

to the sanitarium were helped by the treatments and the plain wholesome food. However, because when they returned to their homes, they were unable to obtain some of the foods which proved helpful, many sent their orders to us for these foods. The popularity of the foods increased and now they are available in many stores throughout the 48 States.”

“In 1941 a building program was started to completely rebuild the Madison Foods plant on the original site. Modern offices, adequate storage and shipping facilities, a five story production section, complete revamping of processing equipment, and a re-arrangement of the plant were realized step by step, and now the Madison Food plant, built of concrete, blocks, and steel, with tile and plastered interior, and a building of modern design for greater efficiency, stands as a monument to the devotion of its founders and the perseverance of those who carried the torch onward.

“A character builder: As part of the vocational training program at Madison College, Madison Foods is primarily concerned with building strong physical bodies and strong minds.”

Photos show: (1) East side view of the new Madison Foods plant. (2) A can (with label) of Stake-Lets (the original gluten-soy product, a complete protein food, sold in 14, 20, and 30 oz sizes). (3) A young man standing next to a large autoclave used for cooking canned foods. (4) Four young ladies hand picking peanuts to insure quality. (5) Front view of the new Madison Foods plant ranging from 2 to 5 stories in height. (6) A can of Yum (14 oz, made with grains, legumes, and vegetables). (7) A young man operating an homogenizer that is homogenizing Kremlé O’Soy. (8) A student operating a machine that is labeling cans.

Page 5 contains a description of the various products, with their ingredients, made by Madison Foods: Zoy-Koff—an alkaline beverage used in place of coffee. Contains no coffee—no nerve stimulants. Two grinds—regular and fine. Prepare like coffee. Ingredients: Soybeans, bran, brown sugar. 1 lb bag.

Kremlé O’Soy—a rich-bodied, homogenized soy beverage. May be used in place of milk. Ingredients: Soybeans, soy oil, dextrose, calcium phosphate, sodium chloride. 20 oz cans.

Zoyburger—excellent for sandwich spread, serve like steak with onions. Ingredients: Soybeans, gluten, raw peanut meal, vegetable seasonings. 14 & 20 oz

cans.

Stake-Lets—a combination of gluten and soybeans sliced in meatlike sauce. Ingredients: Gluten, soybeans, soy sauce, seasonings. 14, 20 & 30 oz cans.

Not-Meat—a smooth-textured loaf for vegetable roasts, salads, sandwiches, etc. Ingredients: Whole peanut meal,

soybeans, and seasonings. 14 & 20 oz cans.

Vigorost—a fibrous-textured vegetable steak used like meat. Also for sandwiches, salads, etc. Ingredients: Gluten, soy cheese, whole peanut meal, seasonings. 14 & 20 oz cans.

Yum—a mild bologna-like-flavored, meatless loaf, used hot or cold. Ingredients: Soybeans, gluten, soy cheese, whole peanut meal, seasonings.

Cheze-O-Soy—a curd made from soybean milk, to be used in salads, sandwiches, spaghetti, etc. Ingredients: Coagulated soybean proteins, seasonings. 14 & 20 oz cans.

Bite-Size Stake-Lets—gluten and soy bits in rich sauce simulating stewed bits of beef in rich gravy. A choice food. 20 oz cans.

“A statement of ingredients, use and recipes is on each package and can of Madison Foods.”

328. *Soja-Briefe fuer die Deutsche Soja Vereinigung Frankfurt-Main*. 1949. Sojawurstprogramm [The soya sausage / wurst program]. No. 2. p. 38-39. Oct. [Ger]  
**• Summary:** Note: This is the 2nd earliest German-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *Sojawurst* (soy sausage). Address: Frankfurt am Main, Germany.

329. **Product Name:** Malted Milk (Soy milk), and Meat Substitutes.

**Manufacturer’s Name:** Brilliant Foods (Formerly named Taste Soy Foods).

**Manufacturer’s Address:** 354 E. Girard Ave., Philadelphia, Pennsylvania.

**Date of Introduction:** 1949.

**New Product–Documentation:** Soybean Blue Book. 1949. p. 102. Not clear whether this company is a manufacturer or a handler.

330. **Product Name:** Loma Linda Nuteena (Meatless Luncheon Loaf or Cold Cuts Prepared from Raw, Ground Peanut Butter and Soy Flour).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1949.

**Ingredients:** In 1971: Water, peanut meal, 100% wheat meal, soy flour, salt, yeast extract, onion, MSG, lepine, celery extractives.

**Wt/Vol., Packaging, Price:** 19 oz (538 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 1988: Per ½ inch slice (2.4 oz–67 gm): Calories 160, protein 8 gm, carbohydrate 5 gm, fat 12 gm, cholesterol 0 mg, sodium 120 mg, potassium 200 mg.

**New Product–Documentation:** Loma Linda University, School of Dietetics. 1949. *Lesson Outlines in Nutrition & Cookery*. 2nd ed. Mountain View, California: Pacific Press Publishing Assoc. p. 119. Gives the nutritional composition

of the product.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Nuteena contains 11.99% protein, 13.85% fat, and 11.00% carbohydrate.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in “Nuteena (Loma Linda).”

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned peanut product resembling cold cuts. Can also be used in salads or sandwiches.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 176. The ingredients in “Nuteena (Loma Linda)” are “peanut meal, soy flour, corn flour, rice flour, dried yeast, salt, yeast extract, HVP, malt extract, L-lysine, DL methionine, celery extractives.” Water, raw peanut butter, soy flour, rice flour, corn flour, natural (vegetable) flavors, salt, onion powder, L-lysine, DL-methionine, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

331. **Product Name:** Loma Linda Proteena (Meatless Peanut or Gluten Loaf or Cold Cuts).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1949.

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Loma Linda University, School of Dietetics. 1949. *Lesson Outlines in Nutrition & Cookery*. 2nd ed. Mountain View, California: Pacific Press Publishing Assoc. p. 119. Gives the nutritional composition of the product.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Proteena contains 19.06% protein, 8.00% fat, and 29.50% carbohydrate. See also 1971 version, which contains soy flour.

Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains numerous recipes calling for “Proteena” which is sold in 14 oz cans.

332. **Product Name:** Vegemeat Burger (or Vegemeatburger).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1949.

**New Product–Documentation:** Loma Linda University, School of Dietetics. 1949. *Lesson Outlines in Nutrition & Cookery*. 2nd ed. Mountain View, California: Pacific Press Publishing Assoc. p. 119. Gives the nutritional composition

of the product.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Vegemeatburger contains 17.10% protein, 7% fat, and 6.50% carbohydrate. Not listed in the 1965 *Diet Manual*.

Talk with Warren Hartman, who worked for Worthington Foods since early 1946. 1992. Nov. 5. He thinks that this product was made by Loma Linda Foods.

**333. Product Name:** Vegemeat Steaks.

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1949.

**New Product–Documentation:** Loma Linda University, School of Dietetics. 1949. *Lesson Outlines in Nutrition & Cookery*. 2nd ed. Mountain View, California: Pacific Press Publishing Assoc. p. 119. Gives the nutritional composition of the product.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Vegemeat Steaks contain 13.80% protein, 7% fat, and 85.40% carbohydrate. Not listed in the 1965 *Diet Manual*.

Talk with Warren Hartman, who worked for Worthington Foods since early 1946. 1992. Nov. 5. He thinks that this product was made by Loma Linda Foods.

**334. Product Name:** Meat Substitutes.

**Manufacturer's Name:** Nutrisoy Company.

**Manufacturer's Address:** 71 Reservoir Ave., Port Jervis, New York.

**Date of Introduction:** 1949.

**New Product–Documentation:** Soybean Blue Book. 1949. p. 102.

**335. Product Name:** Soyloin Steaks (Meatless).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 2-2539.

**Date of Introduction:** 1949.

**Ingredients:** Incl. gluten, defatted soy grits or flakes.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Wholesale price list. 1950. July 31.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Soyloin Steaks contain 16.70% protein, 0.10% fat, and 5.95% carbohydrate. Not listed in the 1965 *Diet Manual*.

Letter from Allan Buller. 1981. Made by mixing ground gluten pieces not suitable for Choplets with defatted soy grits or flakes, then reshaping the mixture into patties. Sold in 19-oz. cans.

**336. Product Name:** Wieners (Meatless; Renamed Veja-Links in 1954).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 2-2539.

**Date of Introduction:** 1949.

**Wt/Vol., Packaging, Price:** Canned.

**New Product–Documentation:** Wholesale price list. 1950; July 31. Letter from Allan Buller. 1981. April 29. Made of wheat gluten with soy flour or grits to complement the former's very low quality protein and to work as a filling and binding agent.

Ziamba. 1966. *Food Engineering*. May. p. 82-93. "Let soy proteins work wonders for you." Photo of package. American Soybean Assoc. 1974? "Soybeans: From America's fertile soils the world's versatile protein resource." A photo shows a can and a flat pack of Veja-Links.

Lesson outlines in nutrition & cookery. 2nd ed. Mountain View, California; Brookfield, Illinois; Cristobal, Canal Zone; Omaha, Nebraska; Portland, Oregon: Pacific Press Publishing Assoc. 128 p. 20 cm. [13 ref]

• **Summary:** "Foreword: The purpose of this little book is to serve as a guide in the study of simple facts about nutrition and healthful cookery, primarily prepared to be used in community nutrition classes." The guidelines, in outline format, are also helpful in teaching the principles of healthful vegetarian nutrition and cookery.

Also discusses: Soybeans as a good source of high quality protein (p. 29). The meatless diet: Meat is not a nutritional necessity, disadvantages of flesh foods (animals are diseased; rich in nitrogenous waste products, which kidneys must eliminate. These act as a stimulant; poor source of most vitamins and calcium; expensive), importance of knowing how to make proper substitution when discontinuing a meat diet, protein content of average servings of some [non-flesh] foods (including soybeans) (p. 31-33). Homemade Vegex (with ½ pint soya sauce, p. 113). Protein foods (gives the composition of soybeans, p. 118). Loma Linda Foods (nutritional composition of their commercial products; Vegemeat Burger, Vegemeat Steaks, Nuteena, Proteena, Peanut butter, Vegex; p. 119). Calcium content of foods (incl. turnip greens, mustard greens, soy bean curd, kale, dry soybeans; p. 120). Iron content of foods (incl. mustard greens, soybean curd). Address: Loma Linda, California.

**338. Soja-Briefe fuer die Deutsche Soja Vereinigung**

*Frankfurt-Main*. 1950. Das Wurstprogramm [The soya wurst program]. No. 4. p. 52-53. April. [Ger]

Address: Frankfurt am Main, West Germany.

**339. Worthington Foods, Inc. 1950.** Wholesale price list and

order blank. Worthington, Ohio. 1 p. July 31.

• **Summary:** Products include: Beta Broth. Tastex. Soy sauce. Tastex food yeast. Lacto-psyllium. Protein foods (Alternates for meat): Soyloin Steaks. Meatless Wieners. Choplets. Choplet Burger. Proast. Numete. Veelets.

Worthington breading meal. Sav-Ree brown gravy. Honey bear peanut butter. Kel-jel.

Note: A wholesale price list dated 10 Dec. 1950 shows that Worthington was selling the following line of Miller's Foods products (purchased from Harry W. Miller of Mt. Vernon, Ohio): Miller's Cutlets, Miller's Cutlet Burger (regular and smoke flavors), Vegetable Stew.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "Cutlet Burger" (or "Cutlet Burgers"). Address: Worthington, Ohio.

340. *Soybean Digest*. 1950. Soy foods from a unique college [Madison]: This little Tennessee college has long been noted for its soy foods. Nov. p. 14-15.

• **Summary:** This is the second in a series of articles by the Soya Food Research Council. Photos show: (1) "Attractive packaging of soy foods which have been pioneered by Madison College." These include: Kreme O'Soy (sliced bread), Stake-Lets, Kreme O'Soy (canned soymilk), Cheeze-O-Soy, Zoy-Koff, Yum, Not-Meat, Zoyburger, Vigorost, Kreme O'Soy Muffins. (2) Dr. E.A. Sutherland, standing, writing in a notebook. (3) A young man operating an homogenizer that is homogenizing Kreme O'Soy.

"Down in Tennessee nearly a half century ago Dr. E.A. Sutherland was obsessed with an irrepressible idea. He believed that any boy or girl willing to work for a college education should not be denied the right. He set out to achieve that end and succeeded against overwhelming odds.

"Madison College, at that time styled Nashville Agricultural Normal Institute, had only these assets: 11 students, some tumbled down buildings, and 400 acres of tired, soil-depleted land. Those acres had been bought by Dr. Sutherland and a small group of teachers with their last dollars.

"Today Madison College at Madison, Tennessee, has 400 students from 40 odd states and many foreign lands. Without endowment, as such for operating expenses, it

has poured almost a million dollars from its own earnings into buildings, lands and farm equipment. Down south it is referred to as 'the college with a soul.'

"Soy Spotlighted: Of course Madison College lacks some of the gay social activities and other distractions that drain time and energy of students in many big-name institutions of learning. But students at Madison enjoy life. They are a determined lot, dead set on acquiring an education. The curriculum includes a variety of campus industries, in which students cooperate to support the college and themselves. Soy has a spot-lighted place in the over-all program.

"Under the Madison plan as set up by Dr. Sutherland every student must work for at least half, and preferably all of his academic expenses. Two-thirds of the students enter the college with only the required fee of \$50. They complete a 4-year college course for a B.S. degree and may graduate with the original deposit intact. In all that time the efficient hard-working student need receive no outside help. Moreover, he will leave the college well equipped to do more than a single job.

"Before launching his experiments at Madison, busy Dr. Sutherland had been president of two colleges. At the outset his chief problem was to provide an income for the new school. This he did by farming and establishing a sanitarium. This permitted the training of health workers as well as the care of ill students. To do the job right, he discovered, he

should be fully qualified as a medical scientist. He had set a rugged course for his students—they work 5 hours and study 5 hours a day the year round—and he was even less considerate of his own schedule. On top of all other duties he studied medicine for 4 years at Vanderbilt University Medical School and the University of Tennessee Medical School and finally, at the age of 50, received his M.D. It is inspiring today to go through the Madison Rural Sanitarium and Hospital with its large staff of physicians, its patient capacity of 165 and its complete modern medical equipment. Much of the work of the institution is done by students who earn while they learn. The best hospitals snap up the graduate nurses. Many of its students have matriculated in medical schools, colleges and universities and have been awarded Baccalaureate, Masters, and Doctorate degrees.

“Of the foresighted Dr. Sutherland it has been said: ‘In any field, in any land, he would have been a great success.’

“By Student Effort: His enthusiasm and determination were infectious. That helps explain how the many college and sanitarium buildings, cottages and dormitories on the 900-acre grounds have been built with students supplying much of the brawn and brain; how the biology class grows many of its excellent specimens; how physics students have built much of their own equipment; and why there are more student applicants than can be admitted.

“Madison is justly proud of its school farm, which is as important economically as its Sanitarium, with its sprawling acres of gardens, fruit trees, vineyards, its greenhouses of flowers for hospital rooms, and its fine dairy.

“Madison is also noted for its 27 years of practical research in special foods development. This research has distinguished the institution as a unique center and pioneer of soy food development primarily intended for human use.

“Long ago it became evident that the new foods being

fashioned at Madison—where good health and strong bodies always have been a chief aim—were too useful to be confined to campus menus. Accordingly, Madison Foods was founded, and has grown steadily over the years.

“It came about in this way. Dr. Sutherland and his associates believed in a simple life. They were convinced that plain wholesome foods—such as whole wheat bread and whole grain cereals, fresh fruits and vegetables, nuts, dates, honey and soy protein—helped patients to early recovery and contributed to permanent good health. Many of these patients, after returning to their homes, ordered these foods in ever-increasing volume. Demand grew until it became necessary to put them into retail stores and now they may be purchased in all 48 states.

“Convinced long ago of the high nutritive value of soy protein, Madison food chemists experimented with more than 200 varieties of soybeans. They solved the taste factors, and went on with the creation of savory breakfast foods, bread, coffee substitutes, soy milk, various meat substitutes, and other products.

“Through measured scientific research they developed soy milk until now it is not only as economical as special formula cow’s milk but, according to the American Medical Association Journal, better for some babies. From Africa, India, and other countries where dairy cows and cattle are scarce, observers have come to study the methods of Madison’s soy milk ‘dairy’ and its ‘vegetarian slaughter house.’

“Today many authorities believe that a properly prepared dry soy milk powder would help to solve the child feeding problems in protein-starved nations of the Orient and in Latin-American countries, and research to that end is in progress.

“More Frontiers: Food scientists at Madison, dipping deeper and deeper into the protein mysteries of the soybean, are convinced that new frontiers will be pierced, and that the astonishing progress already made is but a prelude to a much greater future.

“Meantime, 85-year-old Dr. Sutherland, the man who made a dream come true, has lightened his daily load, but still carries on many duties. He is president of the Layman Foundation, member of the board of directors of Madison College and of a half dozen other rural schools in the South which he was instrumental in developing.

“In Dixieland they say ‘the college with a soul’ is but the lengthened shadow of a great man, a man with the courage to fight for an ideal.”

**341. Product Name:** Lange’s Chops.

**Manufacturer’s Name:** Lange Foods.

**Manufacturer’s Address:** Portland, Oregon.

**Date of Introduction:** 1950.

**Ingredients:** Incl. wheat gluten.

**New Product–Documentation:** Talk with Mr. Lange.

1981. This private company was in business from 1960 to 1968 in Portland, Oregon. Mr. Lange was a Seventh-day Adventist, and it was a one-man operation making Lange's Chops, Lange Breakfast Style Vegetable Links, and other gluten-based meatlike products, which contained little soy. In 1968 the food production business was sold to Cedar Lake, although it was still a wholesale food distributor in 1981. By 1971 the manufacturer of the former Lange products was "Nu Vita."

342. Bush, Maxine Conwell; Fewer, Edward Patrick. 1951. *Diet for health!* Mehoopany, Pennsylvania: Published by the authors. xi + 83 p. Portrait of the authors. 24 cm.

• **Summary:** Advocates a vegetarian diet. Pages 73-75 compare the old way of eating (to be avoided) and the new way. The old way uses flesh foods; the new way uses grains and "legumes, especially lentils and soybeans. Gluten dishes and gluten steaks. Nut loaves..." Other undesirable foods, according to the authors, are eggs, dairy products (replace them with vegetable and fruit juices made fresh in their *Liqua-Dizer*), white bread, white rice, white sugar, white flour foods, lard, strong hot spices or condiments, canned foods, alcohol. The authors also advocate proper "food combining."

Maxine Bush was born in 1907. Edward was born in 1908. Address: 1. D.C., PhD, N.D., nationwide lecturer for more than 25 years on practical psychology, physiology, pathology and nutrition, chiropractic and naturopathic philosophies; 2. D.C., PhC, N.D., national lecturer on biochemistry and nutrition, formerly Prof. of Anatomy and Physiology, Dean and Clinical Director of the Standard Chiropractic School. Both: Mehoopany, Pennsylvania.

343. Hui Manaolana Foundation (formerly Niji-no-Kai). 1951. *Japanese foods (Tested recipes)*. Honolulu, Oahu, Hawaii: International Institute, Y.W.C.A. 122 p. Illust. (some colored). Index. 24 cm.

• **Summary:** The Hui Manaolana was formerly named Niji-no-Kai and is affiliated with the International Institute of the Y.W.C.A. The book was inspired by Mrs. Isaac M. Cox (Catherine E.B. Cox), an educator and volunteer advisor to the Y.M.C.A. Almost all the recipes in this book have been submitted by members of the group, and that woman's name appears next to the recipe title. Shoyu is called for in many recipes.

Following a preface and an introduction, the recipes are organized by type. The many interesting ads related to soyfoods, scattered throughout the book, are cited elsewhere. Helpful hints (p. 12): "To prevent tofu from crumbling, soak in salted water for a while before using." On p. 15 are 4 menus each for breakfast, lunch or supper, and dinner. Soups: Chiri (Fish & tofu soup). Kenchin (Vegetable soup with tofu). Basic miso soup. Satsuma jiru (Miso soup with chicken & vegetables). Oio fish dumplings in miso soup.

Miso soup with long rice. Rice: Azuki meshi (Rice with red beans). Sekihan (Steamed azuki rice). Inari zushi (Sushi rice in aburage).

Fish and seafoods: Ebi no teriyaki (Barbecued shrimp). The sauce consists of: 3/4 cup shoyu, 1 teaspoon gourmet powder [Ajinomoto], 1/2 cup sugar, 1 teaspoon grated ginger, 1 clove garlic [crushed]. Mix well). Katsuo no miso yaki (Tuna broiled with miso sauce). Katsuo teriyaki (Broiled fresh tuna). Meat and chicken: Sukiyaki (with tofu). Pork and tofu. Tofu: Gan modoki [Ganmodoki]. Ankake tofu (Boiled tofu with thick sauce). Tofu with crab meat egg roll. Tofu tempura. Okara (Bean curd residue dish). Iri dofu. Okara nira (with aburage). Yudofu with goma [sesame] miso sauce. Fried tofu cooked in miso. Koya dofu (Frozen soybean curd cooked in shoyu).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "Koya dofu" (regardless of capitalization) to refer to dried-frozen tofu.

Note 2. This is the earliest English-language document seen (April 2013) that contains the term "Gan modoki" (regardless of hyphenation); it refers to deep-fried tofu burgers.

Vegetables: Kiriboshi and aburage. Nikomi oden with yakidofu. Cabbage with mustard & miso sauce. Shira ae–Watercress (With tofu dressing). Shira ae (Vegetable with tofu sauce). Daikon sumiso ae (Turnips in miso). Nikomi oden (Vegetables with miso). Nishime (with tofu). Nasu no shigiyaki (Fried eggplant with miso sauce). Negi–nuta (Green onions with miso sauce). Green pepper–miso yaki. Kuromame (black soybeans). Noodles: Kitsune udon (With aburage). Relishes: Konbu no tsukudani (Seasoned seaweed). Tekka miso (Fried miso with gobo). Kaibashira no tsukudani (Scallops cooked in shoyu). Shoyu turnips. Desserts: Ohagi (rice cake with bean paste and kinako). Many with kanten, azuki beans, and azuki koshi an (Sweetened bean paste).

Glossary (p. 97-98) includes: Aburage (fried bean curd). An (red bean paste). Azuki (red beans). Edamame (soybeans). Fu (gluten cake). Gourmet powder (monosodium glutamate). Kanten (gelatin made from agar-agar). Karashimiso (mustard miso). Kinako (yellow soy bean powder). Kirazu (bean curd residue). Konbu (seaweed). Kuromame (black soy beans). Miso (fermented rice and soy beans). Nori (sea weed). Okara (bean curd residue). Shira-ae (vegetables with mashed tofu). Shoyu (soy sauce). Sumiso (vinegar and miso sauce). Sushi. Tare (thick shoyu sauce). Tempura (fritters). Teriyaki (barbecue). Tofu (bean curd). Ume (pickled plum). Wakame (sea weed). Yakitofu [yakidofu, broiled or grilled tofu].

Note 3. This is the earliest English-language document seen (April 2013) that uses the term "Yakitofu" to refer to grilled tofu.

Note 4. This is the earliest English-language document seen (June 2013) that uses the term "bean curd residue" to refer to okara.

Note 5. This is the earliest English-language document seen (Nov. 2012) that uses the term “yellow soy bean powder” to refer to kinako [roasted whole soy flour]. Address: International Institute Y.W.C.A., Honolulu, Hawaii.

344. White, Julius Gilbert. 1951. *Abundant health: Expounding the Learn-how-to-be-well system of daily living*. 5th printing. Pine Mountain Valley, Georgia: Health and Character Education Institute. xix + 477 p. Illust. 24 cm. See p. 367-82. [25 ref]

• **Summary:** About vegetarianism, diet, and hygiene. Note that the author was formerly (for 11 years) head of the Lecture Bureau at Madison College, a Seventh-day Adventist college and sanitarium. A portrait photo (p. vi) shows Julius G. White.

One chapter titled “The soybean: The wonder food of the world” (p. 367-82) discusses (with some recipes) the nutritional value of soybeans, Soybean milk and the pulp left after making it, soy flour, whole soybeans, vegetable meat (meat substitutes), soybean cheese [tofu], home-made soy butter (made from 4 tablespoons each soy flour and water, 1 cup of oil, a little salt and butter color if desired), soy mayonnaise, soy acidophilus milk, soy sprouts, soy sauce, soy coffee, and soy protein substitute for egg-white.

345. Learmonth, E.M. 1952. *Soya in Britain. Soybean Digest*. Sept. p. 30-32, 42. [4 ref]

• **Summary:** “Ignorance, prejudice, and the well-known conservatism of the British public mean that the development of soya as a protein food is a long and arduous task. Nevertheless we have made some progress. The post-war production of full-fat soya has ranged around 23 million pounds per annum with a peak in 1947-48 of 31 million pounds.” All of soya produced in Britain after World War II has been full fat. Most is “debittered full-fat flour and meal though there is a small but persistent demand for enzyme-active soy flour for bread making.” An estimated 50% of the debittered product goes into baked goods (cakes, biscuits, bread), and 20% goes to grocery products (soup powders, canned goods, salad creams). Recently the government restriction on the use of soya in manufactured meat products was removed so demand is growing in this area. Smaller quantities are used in the sugar confectionery industry and in ice creams.

In the early days the soybean was acclaimed as the wonder bean, and many falsely inflated claims were made. This has hurt the soya industry. “The true merits of the soya bean are still not widely recognised.” Soya flour sells well to the bakery industry because it confers 3 types of advantages on baked goods: technical (protection against oxidative rancidity), commercial (it extends the shelf life of baked goods), and organoleptic. American bread contains much more fat and sugar than its British counterpart.

Before World War II full-fat debittered soya, made in

England, was becoming increasingly popular as a high-protein binder in sausages and butchers’ small goods. During the war, as meat became less available to sausage manufacturers, a government regulation required that every sausage had to contain 7½% of soya grits. The British soya industry was unable to produce enough grits, so large quantities were imported from the USA. “The quality of those soya grits has done more harm to the name of soya in the United Kingdom than anything in the history of the industry... What an opportunity was lost to the soya industry by the fiasco of soya grits.”

A portrait photo shows E.M. Learmonth. Address: British Soya Products, Ltd., London.

346. Miller, Harry W. 1952. Re: Infant feeding. Letter to Miss Dorothea VanGundy at 11784 Bonita Ave., Arlington, California, Dec. 14. 1 p. Typed, with signature. [1 ref]

• **Summary:** “Under separate cover I have mailed you a copy of the book ‘Infant Feeding.’ I am sure that you will be very interested in reading it through from cover to cover. It is written in very simple language and well within your vocabulary as a dietitian... It is a resume of the latest on infant feeding and familiarizes one with all of these various infants’ foods. It also makes a very ready reference book in case any questions come up.

“I plan that you will have to do with a good deal of correspondence that comes in regarding infant feeding in the future... You will gradually get familiar with our Soyolac and its use... Of course, our scope of work goes way beyond infant feeding because we are working on the feeding of the masses of people, obtaining our nutrition from vegetable sources... Yours very sincerely, H.W. Miller, M.D., Research Director, International Nutrition Research Foundation.”

Note 1. This letter is typed on the letterhead of the International Nutrition Laboratory, Inc. Above the Laboratory’s name are printed: “Miller’s Soya Foods. Soyolac–Sandwich Spread–Vegetable Cheese–Green Soya Beans–Cutletburger–Cutlets.” Above that is hand-stamped: “International Nutrition Research Foundation, P.O. Box 388, Mt. Vernon, Ohio.”

Note 2. In November 1952 Miss Dorothea Van Gundy began to work for Loma Linda Foods in Arlington, California, as a dietitian and food demonstrator. In August 1960 she was married (her first marriage) to Ed Jones, a health food salesman and distributor, who was 13 years older than she. Ed had previously been married to Mildred Lager. Address: M.D., International Nutrition Lab., Inc., P.O. Box 388, Mt. Vernon, Ohio. Phone: 1195.

347. Battle Creek Food Co. 1952. *Battle Creek Steaks: Get your proteins cheaper. Taste better than meat!! (Ad). Diet Digest (Beverly Hills, California) No. 42*. Inside front cover.

• **Summary:** This full-page black-and-white ad shows illustrations of a can of “Battle Creek ‘Steaks’—a vegetable

product,” and of a plate containing two of the steaks with a baked potato and vegetables. The text reads: “For nutrition and economy—steaks are unbeatable. New—tenderized. A tasty meat substitute. Used and recommended by the Battle Creek Sanitarium and the Miami Battle Creek Sanitarium” [Florida]. Address: Battle Creek 23, Michigan.

348. Sandborn, William Cruzan. 1953. History of the Madison Food Factory (Document part). In: W.C. Sandborn. 1953. PhD Thesis, Dep. of Education, George Peabody College for Teachers, Nashville, Tennessee. 201 p. See p. 123-27, 159. Aug. 28 cm. [1 ref]

• **Summary:** The Food Factory (formerly a “large flakefood factory” built at Edgefield, near what is now Edenwold) was purchased in 1917, dismantled, and in 1917-18 moved from Edgefield near Amqui, a nearby community, to its present location [Note: This food factory had formerly been operated by Jethro Kloss.] It began operation at Madison [Tennessee] in 1918 (p. 123; the 1918 date was verified by Elmer Bush who helped move the factory). Mr. and Mrs. Andrew Wheeler were in charge of the work, under the direction of Mrs. Druillard, who had had years of experience in other institutions. The principal foods manufactured are protein foods made from gluten, soy beans, and peanuts. “Some of the trade names today are Zoyburger, Yum, Mock Chicken, Nu-Steak, Not-Meat, Vigoroast, and Ches-O-Zoy. A cereal substitute for coffee is Zoy-Coff” [Zoy-Koff] (p. 124). The meatless protein foods serve as substitutes for meat in the diet of vegetarians. Both the College and the Sanitarium hold to a meatless diet. The College ran a successful vegetarian cafeteria in Nashville.

“Some of the men who played an important part in the later growth and development of the food factory were Joe Hansen, C.H. Dye, T.A. McFarland, Captain Calvin Bush, Edwin Bisalski, George Norris, Leslie Brooks, John Brownlee, H.M. Mathews and Frank Holland. Of this group, H.M. Mathews and John Brownlee played a very important part in experimentation and development of the foods. E.M. Bisalski was outstanding in the group as a promoter and sales-manager. It was during Mr. Bisalski’s term as manager of the Food Factory that great expansion took place. A practically new plant, with one section four stories in height, was constructed in 1941. Shortly after, the sales began to drop off, and it has never been necessary to use the new building to its capacity. The Food Factory (now known as Madison Foods) is operating, on a much smaller scale than formerly, under the management of Mr. Frank Holland. The Madison Foods Company also operates a bakery, making whole wheat and soy bread. A daily bread route is served in Nashville.

“Another type of health work carried on by the Madison School was the operation of a treatment room and vegetarian cafeteria in Nashville, Tennessee. Workers drove back and forth each day from the School to Nashville to carry on the

work. The work was started in 1917, in rented quarters. After five years, because of advancing rents, it was thought best to close down the work and build a new building on a permanent location at 151 Sixth Avenue, North. This was done at the end of the year 1922. The new location was occupied in the spring of 1923. [It opened on April 23.] A successful work was carried on in the new location for over a decade” (p. 125).

“The Food Factory was remodeled, in fact, practically a new structure was built, in 1942. The work actually started in November, 1941, and was completed in October, 1942. E.M. Bisalski was the prime mover in promoting the project, which cost between \$30,000 and \$40,000” (p. 159). Address: George Peabody College for Teachers, Nashville, Tennessee.

349. Nichols, Andrew J. 1953. The soya wurst program: A case study. Washington, DC: USDA/FAS. 17 p. Oct. 28 cm.  
• **Summary:** This is “A case study of the attempt to introduce a new food item in West Germany.”

Contents: Introduction. Development of a program. Appearance of obstacles and opposition groups. Factors in the outcome. Repercussions in the United States. Retrospect—Through the eyes of a military government officer. Lessons for the future. Future possibilities of the program.

A German law of 1887 forbade the mixing of meat and other ingredients without declaring it. Some German states had even older laws that specified what could or could not be added to meat in manufacturing sausages. During the 1930s, before World War II, Germany “had ‘bratlings,’ meatless hamburgers, which the soldiers and population had relished. They were vegetable hamburgers made from cereals, yeast, and full-fat soya flour. But by 1941 [Germany’s] soybean stocks were exhausted and the ‘bratlings’ had to be made without soya flour. The people did not like the taste of these nonsoya hamburgers and blamed their unpalatability on the soya content, not realizing that the problem was the lack of soya” [p. 14].

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “meatless hamburgers” (or “meatless hamburger”).

German consumers had their next unfortunate experience with soya during the early years of World War II, when the German army had experimented on a large scale in the use of a product made of soya flour mixed with meat. During the course of these experiments, large numbers of German men had been fed various soya-meat products, none of which they found particularly palatable.

A third negative experience had come when the Military Government and the German administration of food and agriculture tried to improve the bread supply by adding soya flour and corn meal to wheat and rye flour. This effort also ended in failure. Thus, by 1948 the word “soya” was very unpopular with many German consumers.

In the early spring of 1949 a new soya product, named

Soya Wurst, appeared on the market in Western Germany. It was the result of a project that for months had joined the efforts of the officials of the German Administration of Economics and Food, Agriculture and Forestry, and the Allied Military Government. The primary objective of the project was to correct a serious protein deficiency in the German diet. The plan was to extend meat sausage with high-quality vegetable proteins.

Five people came to play leading roles in the soya wurst program: Gwynn Garnett, F.D. Mitchell (Mr. Garnett's assistant and an Englishman), Heinrich Hensen, William Bening (head of the German Soybean Institute, and also a representative of the American Soybean Association, which was trying to increase exports of soya flour to Germany), and Karl Nerger (of Kellinghausen, near Hamburger, a leading German meat manufacturer).

At the beginning of the program 3,000 butchers were participating; a year later, in early 1950, only 100 were selling the product. In that year less than 30,000 tons of soya worst had been made and sold. By the summer of 1950 the program had completely collapsed. This program analyzes the complex reasons for its failure.

Mr. Nerger "finally succeeded in getting a proper product, which he called Soya Fleisch [Soya Meat], and this he mixed with meat to produce the soya wurst. The soya wurst could contain various amounts of Soya Fleisch, up to 90% of its composition.

"After some difficulties Mr. Nerger succeeded in developing a soya wurst of excellent quality" (p. 4).

"Best of all the new product was cheap; a pound of regular liver sausage retailed at 2.40 DM (Deutsche Marks); the soya sausage could be sold for 1.60 DM" (p. 4-5).  
Footnote: One DM is approximately 24 cents.

**350. Product Name:** The Versatile Soyabean in Tomato Sauce.

**Manufacturer's Name:** F.G. Roberts' Health Foods.

**Manufacturer's Address:** 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.

**Date of Introduction:** 1953.

**Ingredients:** Incl. soybeans, tomato sauce or puree.

**Wt/Vol., Packaging, Price:** Tin-plated steel can.

**New Product-Documentation:** Letter from Paul Smith of Soy Products of Australia Pty. Ltd. 1981. Vincent R. Smith was a soyfoods pioneer in Australia. From 1953-54 to 1974-75 he canned soybeans in tomato sauce or puree. In 1956 he founded Soy Products of Australia Pty. Ltd.

Talk with Paul Smith. 1995. Feb. 20. The soybeans were soaked overnight, then pre-cooked in a steam-jacketed vessel. Then the cooked beans and tomato puree were put in can, the can was lidded, then the whole can was autoclaved, then labeled. Sanitarium Foods took a keen interest in this product, then copied the product from F.G. Roberts' Health Foods. Paul remembers how his company used to

supply the product to the many Sanitarium retail health food stores. His father had a little creamy white Ford panel van with green stripes on the sides. They used it to deliver their products to places like The Original Nature, the first vegetarian restaurant in Melbourne, down in the basement in Little Collins Street. The restaurant served salads and grated carrots, and fresh squeezed carrot and celery juice, and fruit juices. They also made and served vegetarian burgers.

**351. Product Name:** Loma Linda Tender Rounds (Meatless), and Tender Bits (Fish-like).

**Manufacturer's Name:** Loma Linda Food Co.

**Manufacturer's Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1953.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, brown rice, vegetable oil, oat flour, soy flour, salt, yeast extract, MSG, onion powder, flavorings, lecithin, lysine.

**Wt/Vol., Packaging, Price:** 19 oz (1 lb 3 oz) can. Retail for \$2.60 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Price list. 1953. "with soy."

Loma Linda Food Co. 1969. "Wholesale Price List."

Tender Bits are now sold in 14 oz, 20 oz, and 50 oz cans.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in "Tender Bits (Loma Linda)."

Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains several recipes calling for "Tender Bits" which are sold in 20 oz cans.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Tender Bits is a canned fish-like products based on spun soy protein fiber. Note that the product had been reformulated by 1973.

**352. Product Name:** Loma Linda Linketts, Little Links, Big Franks (Meatless Hot Dogs).

**Manufacturer's Name:** Loma Linda Food Co.

**Manufacturer's Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1953.

**New Product-Documentation:** Price list. 1953. "with soy."

*Today's Food* (Loma Linda Foods, Arlington, California). 1960. Spring. p. 4. Linkettes are used in a recipe. Loma Linda Foods has recently switched from using vegetable shortening in this product to using liquid corn oil (p. 7).

By 1979 this product was reformulated with textured soy protein.

**353. Product Name:** Loma Linda Redi-Burger (Meatless Hamburger).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1953.

**New Product–Documentation:** Price list. 1953. By 1979 this product was reformulated with textured soy protein.

354. Pohl, Frederik; Kornbluth, C.M. 1953. *The space merchants*. New York, NY: Walker and Company. 158 p. See Chap. 2, p. 16.

• **Summary:** “The Conservationists [Consies] were fair game, those wild-eyed zealots who pretended modern civilization was in some way ‘plundering’ our planet. Preposterous stuff. Science is *always* a step ahead of the failure of natural resources. After all, when real meat got scarce, we had soyburgers ready. When oil ran low, technology developed the pedicab... We wanted Venus colonized by Americans.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the word “soyburgers” (or “soyaburger”).

355. Boyer, Robert A. 1954. High protein food product and process for its preparation. *U.S. Patent* 2,682,466. June 29. 5 p. Application filed 6 May 1952. [6 ref]

• **Summary:** This landmark patent, which describes the preparation of textured meatless foods from spun vegetable protein, started the spinning of soy protein filaments. The patent begins: “This invention relates to a food product and is a continuation-in-part of my copending application, Serial No. 118,445, filed September 28, 1949. In particular it relates to synthetic meat and to methods of producing synthetically foodstuffs which will have the flavor, coloring, taste and ‘chewiness’ of meat. By the term meat I mean to include not only the meat of mammals, but also the meat of fish, fowl, shell fish and crustaceans.”

“The stumbling block up to this point has been in the reproduction of the texture and appearance of natural meat, the texture of course involving the factor of ‘chewiness.’ Vegetable chops using wheat gluten as a base have a certain amount of ‘chewiness,’ but they do not duplicate the fibrous character of meat; and they fail to give that satisfaction that comes from the breakdown in the mouth during the mastication of a piece of meat.”

“Artificial textile fibers have been made synthetically from vegetable protein such as soy beans, corn, or peanut protein, as well as from animal proteins such as casein and keratin.”

Filaments were prepared by dispersing the protein material, forcing the dispersion through a porous membrane such as a spinneret of the kind used in the production of rayon, coagulating the emerging streamlets in an acid bath, and stretching the oriented filaments to develop desired fiber strengths, each fiber commonly having an average thickness of about 20 micrometers / microns. One spinneret was

capable for forming several thousand individual filaments or fibers which are very fine and which when taken together exist as a group having an overall diameter of perhaps one-quarter inch. “If a battery of spinnerets or dies as above outlined are provided, there will be a considerable number of bundles or groups of filaments which, when assembled together, may constitute what I have hereinafter called a ‘tow’ of filaments, which tow, depending upon the number of dies or spinnerets used, may be conveniently three to four inches in diameter.”

The formed filaments are then placed in a salt solution to prevent them from dissolving. The pH of this solution is typically adjusted to be in the range of 5.6 to 6.4—the same as most meats. In this way a palatable food product can be produced without the use of binders or fats. The fibers are stretched in this salt bath using a take-away reel or godet wheel. “In practicing my invention with soy bean protein I have applied stretching tensions satisfactorily as high as 400%.” To summarize: This is a process of preparing synthetic meat by preparing a quantity of filaments of protein material, such as “filaments of soy bean protein material.” It is: “A meat-like product comprising oriented edible fibers” or “edible filaments.”

Note 1. This is the earliest document seen (June 2013) concerning the spinning of soy protein isolates to make spun soy protein fibers for food use.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “synthetic meat” (or “synthetic meats”—with any combination of hyphens or quotation marks). The phrase “The process of preparing synthetic meat...” is used repeatedly in this patent.

Note 3. This is the earliest English-language document seen (June 2013) that uses the word “filaments” or the term “edible filaments” to refer to edible spun soy protein fibers.

Note 4. This is the earliest English-language document seen (June 2013) that uses the word “spinneret” (or “spinnerets”) in connection with edible spun soy protein fibers.

Note 5. This is the earliest English-language document seen (June 2013) that uses the word “tow” (or “tows”) in connection with edible spun soy protein fibers. The definition of a “tow” is given above.

Note 6. This is the earliest document seen (June 2013) concerning the etymology of textured soy protein isolates. Address: Cincinnati, Ohio.

356. Worthington Foods, Inc. 1954. Wholesale price list and order blank. P.O. Box 190, Worthington, Ohio. 1 p. Nov. 15.

• **Summary:** New products include: Soyamel–soy milk. Entree (in tomato sauce or mushroom gravy). Veja-links.

Note: This is the earliest English-language document seen (Aug. 2003) that uses the term “links” or “Veja-links” to refer to meatless soy sausages. Address: Worthington, Ohio. Phone: 2-5359.

357. **Product Name:** Sanitarium Health Foods Soya Beans in Tomato Sauce.

**Manufacturer's Name:** Sanitarium Health Food Co.  
**Manufacturer's Address:** Sydney, N.S.W., Australia.  
**Date of Introduction:** 1954.

**Ingredients:** Soya beans, tomato, sucrose, salt, onion, paprika.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 1980, undated. "A delicious protein-rich vegetable." Two recipes on label. Recipe brochure. 1981, undated. "Imagination in cooking... with Sanitarium." Photos show: Canned Soya Beans in Tomato Sauce, Vegetarian Rediburger, Bologna, Tender Bits. Label. "Delicious protein-rich vegetable." Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1954. Ingredients now read: "Soya beans, sauce, water added."

Note: This is the earliest known commercial soy product made by Sanitarium Foods in Australia.

Note: This is the English-language document seen (Nov. 2014) that contains the term "Rediburger" (or "Rediburgers").

358. **Product Name:** Meat Substitutes.

**Manufacturer's Name:** Sterner's Special Foods.  
**Manufacturer's Address:** Route 2, Birdsboro, Pennsylvania.

**Date of Introduction:** 1954.

**New Product–Documentation:** Soybean Blue Book. 1954. p. 105. "Manufacturer of meat substitutes." Soybean Blue Book. 1960. p. 89. The only manufacturer of meat substitutes listed.

359. **Product Name:** Entree [in Tomato Sauce, or Mushroom Gravy].

**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 2-2539.

**Date of Introduction:** 1954.

**Wt/Vol., Packaging, Price:** 20 oz or 4.5 lb can.

**New Product–Documentation:** Wholesale price list. 1954. Nov. 15. Sold in 20 oz or 4.5 lb cans.

*Chopletter* (Worthington Foods, Ohio). 1960. "What you should know about Worthington Foods." April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Entree.

360. **Product Name:** Veja-Links (New name for Meatless Wieners).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 2-2539.

**Date of Introduction:** 1954.

**Wt/Vol., Packaging, Price:** 19 oz can. Retail for \$2.70 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** *Chopletter* (Worthington Foods, Ohio). 1960. "What you should know about Worthington Foods." April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Veja Links.

Soybean Blue Book. 1965. p. 1121.

Letter from Allan Buller. 1981. April 29. Made of wheat gluten with soy flour or grits to complement the former's very low quality protein and to work as a filling and binding agent.

361. Vollmer, Marion W. 1954. Food: Health and efficiency. Lessons in nutrition and healthful food preparation. Prepared for use in Home health education classes under the direction of the Medical Dept. of the General Conference of Seventh-day Adventists. Nashville, Tennessee: Southern Publishing Assoc. 111 p. 24 cm.

• **Summary:** This Seventh-day Adventist book on vegetarian nutrition (with recipes) mentions soy in several places. To help make breakfast a hearty meal, waffles may be "reinforced with soy" (p. 19). When cooking processed breakfast cereals, "they can be made more nutritious by adding wheat germ, rice bran, soy flour, etc." Soybeans are given as the first example of a high-protein food that should be eaten daily (p. 26), and soybeans, soybean products, and gluten are listed as good sources of protein (p. 31). A table showing the protein content of common foods includes Soyalac (dry soy milk), meat substitutes (commercial gluten steaks, Proteena or dark meat substitutes, Nuteena or light-meat substitutes), and soybeans (p. 32).

The following recipes are given: Baked soybeans (p. 34). Gluten (how to prepare and serve at home, p. 35-36). Gluten, mushroom, and potato pot pie (p. 36). Holiday loaf (with Vegemeat Burger or other ground gluten, p. 37). Mushroom dressing with gluten slices (p. 37).

A second edition was published in 1964.

362. Lager, Mildred. 1955. Suggestions for the arthritic, with menus and recipes. Burbank, California: Published by the author. 46 p. Aug. No index. 20 cm. Saddle stitched.

• **Summary:** The dedication page states: "Dedicated to all arthritics—everywhere." Copyright 1938 by Mildred Lager. Seventh edition (Revised and enlarged) May 1948. Eighth edition [printing] January 1951. Ninth edition May 1952. Tenth edition August 1955.

Contents: Part I. Introduction. Types of arthritis

(inflammation of the joints; rheumatoid and osteo-arthritis). Causes of arthritis. Suggestions. Foods for the arthritic (diet can make a big difference). My own case. Juice diet. Kind of juices. How to take juices. Limited diet: Breakfast, lunch, dinner. Salisbury diet. General diet: Breakfast, lunch, dinner, dessert. Other suggestions: Heat, baths, sweats, etc., massage, digestive aids (natural laxative foods and bulky foods), supplements, vegetarian diet. Mental attitude (positive mental attitude and healthy emotions are very important). Additions August 1955 (p. 28; "It is now more than 30 years since I began my battle with arthritis... Thanks to my diet I have led a very active life. I am still on the fundamental diet because I do not know of anything better... Cortisone and ACTH have been heralded as miracle drugs. I do not believe these drugs are the solution to the problem. In many cases they have brought temporary relief...").

Part II. Menus (p. 29-31). Vegetarian menus (p. 31-32). Approximate carbohydrate content of fresh fruits. Carbohydrate content of dried fruits. Carbohydrate content of fresh vegetables. Recipes (p. 33-46).

"My own case" (p. 10-14). Note: Mildred M. Lager was born on 19 Dec. 1900 at Superior, Wisconsin, of Swedish parents, who immigrated to America. In 1925 she started her lifelong battle with arthritis. "As diet was the greatest factor in my recovery, I am going into detail about my experience." After graduating from college, she began teaching. She continued trying every possible cure for more than two years. "As a last resort, I half-heartedly turned to diet. I found, to my surprise, that when I left out starches and sweets I felt better, but I still did not realize that I must make an about face and a complete change in my eating habits. I became very interested in food, however, and read every book and article I could read on the subject... I don't know how long I would have continued in this half way stage had not my doctor bluntly told me *the truth* as he put it He said that nothing could be done and I might as well know it. By this time my elbows were locked (ankylosed)" and my wrists, hands, knees, ankles, and feet were badly affected. "I felt as if my body were nothing but 'sore joints.'"

So she started a strict diet of natural unsweetened fresh fruit juices only. She found orange, grapefruit, tomato, pineapple, and apple to be the best for her. One month later she took a teaching job in northern Michigan, arriving there in twenty degrees below zero. Within 9 months she had won her battle. There follows a list (p. 13) of six foods to avoid plus two general tips. Also, when using dried fruits, use only the unsulphured kind. "Liquified [sic] drinks: A liquefier is a blessing to any one who for some reason cannot tolerate raw green leafy vegetables" (p. 35).

By 1955 Mildred had already authored two books on soybeans and soyfoods, the first one (*The Useful Soybean*, 1945) a classic. This book contains soy in many of the menus and recipes: Soy oil for salad dressing (p. 18-19). Soybean melba toast (p. 20, 29, 31). The best sources of

vegetable protein in a vegetable diet include soybean protein (p. 27). Baked soybeans for dinner (p. 31). Cooked soy grit cereal for breakfast (p. 32). Soy melba toast with avocado for lunch (p. 32). Recipes for: Soy bread, soy melba toast, soy gluten bread (p. 37). Meat substitute dishes (p. 39-42): Cooked soybeans with soy sauce. Canned or baked soybeans (available in most markets and all health food stores). Soy loaf (with cooked soybeans and melba toast crumbles). Soy grits. Cooked soy grits. Soy vegetable hash. Soy cheese or tofu. Tofu steak. Mock fish tofu. Gluten steak. Nut butters. Almond butter. Pecan spread. Nut sauce or gravy. Cashew gravy. Almond hamburgers.

Note 1. This book advocates a vegan diet, free all animal products.

Note 2. This is the earliest English-language document seen (April 2013) that contains the term "Tofu steak." Address: Burbank, California.

363. Lager, Mildred. 1955. Nutritional news and recipes: The power of gratitude. *Let's Live* 23(11):22-23, 53. Nov.

• **Summary:** "We all have so much to be grateful for, as there is an abundance of wonder and loveliness in the world if we will but look at it. Gratitude brings both healing and comfort. Start your day with gratitude..."

Discusses nuts as food, with recipes, including: Almond breakfast with "raw almond butter." Almond milk. Peanut butter mayonnaise. Vegetables in nut gravy (with "raw or toasted cashew butter"). Almond hamburgers [meatless] (seasoned with soy sauce). Address: Los Angeles, California.

364. Adachi, Isamu. 1955. *Kinsei Nihon shokumotsushi* [Recent history of Japanese foods]. Tokyo: Takahashi Shoten. 483 p. [Jap]

• **Summary:** Soyfoods are discussed on the following pages: Tofu (p. 52-53, 68-69, 150, 178-79, 188, 190-91, 194, 196-97), fried tofu-hiryozu and ganmodoki (p. 88-deep-fried tofu burgers), fried tofu-aburage or deep-fried tofu pouches (p. 96-97, 150), black soybeans (p. 140).

Note: This is the earliest (and only) English-language document seen (Nov. 2014) that contains the word *hiryoze*; it refers to Kyoto-style deep-fried tofu balls.

365. Boyer, Robert A.; Saewert, Harold E. Assignors to Swift and Company (Chicago, Illinois). 1956. Method of preparing imitation meat products (pH control). *U.S. Patent 2,730,448*. Jan. 10. 2 p. Application filed 2 Feb. 1953. [7 ref]

• **Summary:** "The present invention relates in general to the treatment of edible protein material preparatory to forming the same into food products. This invention represents an improvement over the method disclosed and claimed in the earlier-filed application of Robert A. Boyer, Serial No. 118,445, entitled 'Synthetic Meat,' filed September 28, 1949, and now abandoned, and in the continuation-in-part thereof, Serial No. 286,447, filed May 6, 1952, now Patent No.

2,682,466.”

In “the production of synthetic meat” soy protein is formed into fibers or filaments through the use of a “spinneret.” Groups of these “protein filaments” “are formed into bundles or tows and then freed from excess liquid by squeezing or centrifuging. The bundles of filaments are then mixed with a suitable binder...” Example II starts with “A tow of soybean fibers...”

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “imitation meat” or “imitation meat products” (with any combination of quotation marks).

Note 2. This is the earliest English-language document seen (Dec. 2004) that uses the term “protein filaments” to refer to edible spun soy protein fibers.

366. Chen, Philip S.; Chen, Helen D. 1956. Soybeans for health, longevity, and economy. South Lancaster, Massachusetts: The Chemical Elements. xii + 241 p. Illust. Index. 21 cm. 2nd ed. Jan., 1962, 242 p. [24 ref]

• **Summary:** A comprehensive review of the subject. Contents: Preface, by the author (South Lancaster, Massachusetts, July 1956). Foreword, by Geo. M. Strayer, Vice-President and Secretary-Treasurer, American Soybean Association. Introduction. Part I: Nutritive value of the soybean. 1. Protein (incl. Dr. Wolfgang Tiling of Hamburg, Germany; Dr. Harry Miller). 2. Fat (incl. phosphatides, sterols and hormones). 3. Carbohydrates and caloric value. 4. Minerals. 5. Vitamins. 6. Soybeans and world population. 7. Soybeans and disease (incl. Dr. Wolfgang Tiling of Germany).

Part II: Soy products. 8. Soybean oil: Composition and properties, processing and refining, reversion, uses, phosphatides, margarine, mellorine (vegetable frozen dessert). 9. Soybean oil meal: Heat treatment, Gelsoy, Multi-purpose Food. 10. Soy flour: Uses, soy bread vs. enriched white bread. 11. Soy milk. 12. Soy cheese (or soybean curd, “aptly described by the Chinese as ‘the meat without

bones”)—incl. pressed tofu sheets and yuba). 13. Soy sauce: Preparation of kojis, brine fermentation, production yields, microorganisms are available. 14. Soybean sprouts.

Part III: Soybean culture and preservation. 15. Soybean culture: Two types of soybeans (commercial field vs. edible or vegetable varieties), inoculation, fertilizer, cultivation, harvest. 16. Preservation of soybeans: Shelling, canning, freezing, dehydration, harvesting dry mature soybeans.

Part IV: Recipes. 17. Soybeans and soybean pulp: Green or fresh soybeans, dry soybeans, soybean pulp (“prepared by pressing cooked soybeans through a coarse sieve or by grinding them in a food grinder”), recipes (incl. Soyburger, Scalloped green soybeans, and Roasted soybeans—dry roasted or deep-fried (p. 151). Describes how to make wheat gluten at home and praises monosodium glutamate for its ability to improve the flavor of recipes—though its use is called for only in the recipe for Soyburger). 18. Soy flour: Breads, cakes, cookies, pies, soups, other recipes (A recipe for Wafers, p. 180, calls for “½ cup roasted soybeans, finely chopped”).

19. Soy grits and soy flakes. 20. Soy milk. 21. Soy cheese. 22. Soybean sprouts.

Appendices: A. Soybean utilization (chart). B. Manufacturers and handlers of soy foods (Source: 1956 *Soybean Blue Book*). C. References.

Chapter 1, “Protein,” begins: “The soybean is best known for its high protein content (p. 7). It then discusses the work of Dr. Harry Miller (p. 14-15).

Chapter 15, “Soybean Culture,” describes how to grow soybeans in a garden. Pages 126-27 discuss the two types of soybeans: the commercial field type and the edible vegetable type. Five major differences between the two types are discussed (p. 126). The edible varieties are larger in size, do not yield as heavily (though they yield more heavily than snap beans or lima beans), are more prone to shatter as they near maturity in the field, are superior in flavor, texture, and ease of cooking, and some edible varieties are also superior in the manufacture of soybean flour, soybean milk, roasted beans and other products. Table 31 (p. 130) lists eleven varieties of edible soybeans: Very early—Giant Green. Early—Bansei, Fuji. Midseason—Hokkaido, Jogun, Willomi. Late: Illington, Imperial, Funk Delicious, Emperor, Higan. Commercial—Illini.

Chapter 16, “Preservation of Soybeans,” describes how to preserve “green soybeans” by canning, freezing, and dehydration.

Photos show: (1) A sack of Lincoln soybeans (facing p. 1). (2) Soybean plants, showing pods and leaves (p. 3 and 4). (3) A beam balance with a small amount of soy flour balancing many animal products. “The protein value of soy flour: 1 lb. of soy flour contains protein values equal to 2 lbs. beef, or 34 eggs, or 6 quarts milk.” Source: Health and Character Education Institute (p. 6). A similar photo (p. 24) states: “1 lb of soy flour contains food calories equal to 3½ lbs beef, or 3 quarts milk, or 29 eggs. (4) Two views of a

child. Left, suffering from marasmus. Right, after six months on a soy milk diet. Courtesy Dr. Wolfgang Tiling (p. 62). (5) A machine at the Northern Utilization Research Branch of USDA treating soybean oil with alkali (p. 72). (6) The distribution of MPF [Multi-Purpose Food] to starving Indian children (p. 91; Courtesy Meals for Millions Foundation). (7) Quaker City No. F4 grinding mill (p. 102; Courtesy Straub Co., 4059 Ridge Ave., Philadelphia, Pennsylvania). (8) Early soy cheese (tofu) production in the United States (p. 108; perhaps at Madison Foods). (9) The Northern Utilization Research Branch, Agricultural Research Service, USDA—shows outside of the huge building (p. 113). (10) How to grow soy sprouts in a glass jar at home (p. 119). (11) Well nodulated soybean roots (p. 129; Courtesy The Nitragin Co.). (12) Baked soybeans in a crock (p. 144). (13) Soy flour used in numerous baked products (p. 159; Courtesy ADM). (14) Griddle cakes [pancakes] made with soy flour brown quickly (p. 173). (15) Soy peanut butter cookies (incl. peanut butter and soy flour; p. 185). (16) Soy grits in a glass jar (p. 198). (17) Freshly-cooked crisp soybean sprouts in a raw vegetable salad (p. 219).

Note 1. The first printing of this book (1956) was dedicated “To Li Yu Ying and William J. Morse, *The Soybean Champions of the Eastern and Western Hemispheres*,” but by the second printing (April 1957) the dedication had changed “To William J. Morse and Harry W. Miller, *The Soybean and Soy Milk Champions of Our Time*.”

The publisher of this third printing was unable to sell all the books printed, so Chen apparently arranged for a company named “Outdoor Pictures” (Box 1326, Escondido, California) to sell them. On the title page, Outdoor Pictures pasted their name and address over that of “The Chemical Elements.”

Note 2. According to the *National Union Catalog*, Philip Stanley Chen was born in 1903. The rear cover states that he was born in China and is now a naturalized U.S. citizen. He is a graduate of Emmanuel Missionary College [in Berrien Springs, Michigan] and Michigan State University. Before writing this, his first book on diet, health, or soybeans, he wrote several books on chemistry: (1) *The Chloro Derivatives of m-cresol*. 1933. Easton, Pennsylvania: Mack Printing Co. 7 p. (Abstract of his PhD thesis, Michigan State College of Agriculture and Applied Science); (2) *The Chemical Elements, Rev. ed.* 1948. South Lancaster, Massachusetts: Chemical Elements (fold chart). (3) *500 Syntan Patent Abstracts, 1911-1950*. 1950. South Lancaster, Massachusetts: Chemical Elements. 125 leaves. (4) *Syntans and Newer Methods of Tanning*. 1950. South Lancaster, Massachusetts: Chemical Elements. 128 p.

In 1962 Chen wrote *A New Look at God*, published by Chemical Elements (288 p.). Address: 1. Prof. of Chemistry, Atlantic Union College, South Lancaster, Massachusetts; 2. National Science Foundation Fellow, Cornell Univ.

367. Shefferman, Maurice. 1956. *Foods for longer living*. New York, NY: Whittier Books, Inc. 181 p. No index. 22 cm. • **Summary:** This is a book about diet and nutrition by one of the founders (in New York City) of Balanced Foods, the major health food distributor. Although it contains few original ideas, it helped to introduce soybeans as a healthy food, and meatless meals, during the late 1950s.

Contents: Preface. 1. Living a balanced life. 2. How well nourished are we? 3. Who gets our best food? 4. Your bloodstream is your lifeline. 5. Vim, vigor and vitamins. 6. A vitamin primer. 7. Minerals in your diet. 8. Cook, spare those nutrients. 9. Natural seasonings. 10. Fresh juices are staple foods. 11. The five basic foods. 12. Everybody needs more vitamin C. 13. Overweight—Our national health problem. 14. Don’t live on your nerves! 15. Are you tired? 16. Relax and invite your health. 17. “Having a wonderful time!” 18. Your summer diet. 19. Design for winter living. 20. Recipes.

Shefferman wrote this book so it “would make sense to a lot of people who have a very hazy idea that right food has any direct relationship to their health.” The “eating habits of the average American family, or individual, are not good.” Many foods “have been depleted of much of their valuable nutrients; we eat too much,” too many hot and highly spiced foods, and too much meat. The “vegetarians eat entirely too much starchy foods and are usually, as a result, on an unbalanced diet. As a nation we have retrogressed from the days when our forbears lived on natural, live, whole foods.” “I believe that my viewpoint on ‘natural’ foods will find ready acceptance by intelligent people who are genuinely interested in helping themselves to maintain sound health all the days of their life” (Preface, p. 5).

Also discusses: The growing interest in the practice of organic gardening in the USA (p. 25). “Acid conditions of the soil are as unhealthy as acidity in the human system” (p. 26). “Under ideal conditions we can obtain all the vitamins and minerals we need through natural foods and correct eating.” Yet today our soils are depleted of minerals and excessive processing further reduces the nutritional value of our foods (p. 35).

The human body is composed of about 66% oxygen, 18% carbon, 10% hydrogen, 2% nitrogen, and the remaining 4-5% is made up of minerals and trace elements. “Under ideal conditions, a perfect diet which includes the four main minerals—calcium, phosphorus, iron, and iodine—in abundance, will furnish all the other trace elements in sufficient amounts. The lesser minerals are sodium, potassium, magnesium, manganese, chlorine, and sulphur (p. 38, 52). Soy beans are a good source of thiamin (vitamin B-1, p. 42), riboflavin (B-2, p. 43), folic acid (p. 46), and choline (p. 46).

There “is always the possibility of getting too much of the proteins in the diet, especially proteins of meat, and that is one of the best reasons in the world why all persons should change over to meatless meals as often as possible. Now this

is not an appeal for the reader to become a vegetarian, for it is the writer's firm belief that meat and fish foods are vitally necessary to complete the diet. On the other hand, it is an appeal to meat eaters not to eat an excess of animal foods, for this may throw too much of a burden upon the system... Among the better known protein foods are soy beans, dried beans, lentils, nuts, cheese, eggs, milk, mushrooms... All of these are less costly than animal foods and certain varieties of fish and other sea foods" (p. 61).

Brown rice is an excellent food. It was used in an 1897 experiment "which was to mark a high point in modern nutritional history." It proved that beri-beri could be cured by substituting whole rice for polished rice (p. 62-63). One of the best sources of lecithin in the soy bean. Its benefits are discussed. Realize that "proteins of all kinds are being made from this alkaline-producing soy bean..." It cultivation has been promoted by the USDA, thereby making it a major crop. Soy beans are discussed at length. "The protein of soy beans is used in meat replacement dishes," Soy cheese [tofu] and "soy bean drinks" [soy milk] are good protein sources. For lunch, use "soy sandwich spreads" and "soy bean and wheat germ bread..." The main body of your meatless dinners can be made up of various combinations, including "soy bean loaf, "gluten steak," "green soy beans," "whole wheat or soy bean macaroni or spaghetti, or eggs "on soya toast." Use soya flour as a binder or serve baked soy beans with tomato sauce (p. 64-67).

Natural seasonings include "soy seasonings and natural herbs and spices." Use herb teas and herbs in cookery (p. 68-69). The five basic foods are blackstrap molasses, brewer's yeast, skim milk powder, wheat germ, and yogourt. They are "wonder foods" (p. 81). The Metropolitan Life Insurance Company's ideal weight chart shows, for example, that a man 6 feet tall should weigh 152-164 lb (small frame), 161-173 lb (medium frame), or 169-185 lb (large frame) (p. 97).

Shorter working days and modern labor-savings devices have transformed most Americans into a new "leisure" class (p. 108). Scientific experiments by Dr. Fisher at Yale University [New Haven, Connecticut] have shown that a meatless diet can provide sufficient protein for the body's needs. "Vegetable proteins such as almonds and soybeans are excellent protein foods. Soybean products supply essential amino acids without creating the toxic end-products of the meat diet. The residue from the digestion of meats is acid and toxic forming. Vegetable proteins leave a neutral or alkaline ash. Vegetable entrees are wonderful meat replacements for the summer menu. A savory vegetable steak or roast is just as hearty, just as satisfying as meat and a good deal easier on the digestive system. The deliciously rich flavor of meat substitutes is particularly appealing when appetites need tempting during the summer months" (p. 125-26).

People with a definite allergy to cow's milk—as is quite common among children and adults—"can use soy bean milk or goat's milk." Soy bean milk is "an excellent substitute

for milk products of animal origin. Crushed soy beans have been used as a source of milk by the Chinese for centuries. Soy milk is approximately the same chemical composition as dairy milk. It resembles cow's milk in consistency and appearance, and its calcium content is about equal to human milk. For infant feeding, in cases of special diets, digestive ailments and malnutrition, soy milk has proven highly beneficial. Soy bean milk is definitely alkaline and easily digested. The soy curd prepared from the milk is eaten as a soft, cottage-cheese-like food" (p. 128).

"Far too many individuals eat too much starch and not enough of the fresh fruit and vegetables." The "one man who should know better—the strict vegetarian—is often the worst offender" (p. 129). Recipes (p. 135-81) include: Soy casserole (meatless main dish, with cooked soy beans, p. 134). Cheese-bean casserole roast (p. 139). Baked soy beans (p. 151). Soy bean salad (with 2 cups "drained green canned soy beans," p. 158).

368. Dudman, Ruth K. Assignor to Swift & Company (Chicago, Illinois). 1957. Method of making high-protein food products [Meat analogs]. *U.S. Patent 2,785,069*. March 12. 2 p. Application filed 5 Oct. 1953. [1 ref]

• **Summary:** Describes the preparation of a meat substitute made from protein filaments which are fused using heat alone. One object of this invention is "to provide a method for preparing food products from man-made, edible protein fibers without the use of extraneous binders." An additional object is "to utilize the protein fibers themselves as the binding agent..." In this invention, "edible, man-made protein fibers" are subjected to the action of heat alone, causing them to fuse.

The author considers this process superior to the Boyer process. "Example 2. Soybean fibers... with a pH of 5.2 and a salt concentration of 3%, were squeezed to remove excess moisture. One hundred grams of these fibers were shaped into a 1 inch diameter bundle and placed on a rack in an uncovered pan in a 185°F oven. Fusion required 2 hours of heating at this temperature. A similar run in a 240°F oven required 1 hour of heating to produce fusion."

369. Worthington Foods, Inc. 1957. Wholesale price list and order blank. P.O. Box 190, Worthington, Ohio. 1 p. April 1.

• **Summary:** New products include: Soyamel (soy milk; Instant or instant malt). Soy milk (powdered or regular). Fry-Sticks. Ground wheat gluten. MC (Sliced Miller's Cutlets). MC Ground (Miller's Cutletburger). VP (Vegetable Protein). Sweet dill pickles. Address: Worthington, Ohio. Phone: Tuxedo 5-5359.

370. Anson, Mortimer Louis; Pader, Morton. Assignors to Lever Brothers Company (New York, NY; a corporation of Maine). 1957. Method of making protein food products and the resulting product. *U.S. Patent 2,813,025*. Nov. 12. 5 p.

Application filed 14 May 1954. [5 ref]

• **Summary:** This is a continuation of U.S. Patent No. 2,739,923. “The present invention relates to protein food products which resemble meat and meat products from the standpoint of taste, texture, general appearance and nutritional value and to a method of making such products.” The process involves the use of a chewy gel binder (made from either peanut or soya meal) with protein filaments.

“A process of making simulated meat or simulated meat products from animal and vegetable proteins which are capable of being formed into filaments... has been proposed in British Patent No. 699,692.” An “aqueous alkaline protein solution is spun or extruded” to create “protein filaments.”

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “simulated meat” (or “simulated meats”) or “simulated meat products” (with any combination of quotation marks).

Note 2: This is the earliest English-language document seen (March 2009) that uses the word “spun” in connection with soy protein food ingredients created by spinning. Address: 1. New York, NY; 2. West Englewood, New Jersey.

371. Anson, Mortimer Louis; Pader, Morton. Assignors to Lever Brothers Company (New York, New York; a corporation of Maine). 1957. Protein food product. *U.S. Patent* 2,813,024. Nov. 12. 3 p. Application filed 14 May 1954. [5 ref]

• **Summary:** “This application is a continuation-in-part of our co-pending application Serial No. 304,844, filed August 16, 1952.” “The present invention is directed especially to a protein food product which simulates the potted meat products or spreads such as deviled ham and meat paste which are commonly sold in food stores, and to a process for the preparation of such products... We have discovered that products very similar in nutritive value, taste, and texture to the ordinary meat spreads can be made from relatively inexpensive proteins isolated from such plentiful sources as the soybean and the peanut. For the manufacture of such products, the present invention is particularly concerned with the utilization of gel precursors.” Heating converts the gel precursor into a chewy protein gel. The first step in preparing the gel precursor is to either isolate soybean protein from soybean meal or to purchase a good quality edible isolated soy protein. It should be noted that soy protein as it exists in soy meal contains a gel inhibitor of unknown composition which sometimes interfered with the gelation of isolated soy protein.

The final product resembling a meat spread, but made with soybean protein, is in a flavorful binder. Peanut protein can also be used. Note: Cogan et al. 1968 cite this when describing how isolated soy protein is made. Address: 1. New York, New York; 2. West Englewood, New Jersey.

372. *Science Digest*. 1957. Meatless hamburger. Nov. p. 94.

• **Summary:** According to a patent issued to M.L. Anson of New York City, and assigned by him to Lever Brothers Co. of New York, “meatless hamburgers, meatless meat-loaves, and meatless luncheon meats” can be made from soybeans and wheat. “The synthetic meat is a mixture of a chewy protein gel obtained from the oilseed of either soybeans or peanuts and a dough made of wheat or rye flour. To this blended mixture is added flavoring and coloring materials.”

373. **Product Name:** Compro (Canned Meatless Meat with Tofu).

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1957.

**Ingredients:** Wheat gluten tofu, seasonings.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sam Yoshimura. 1981. March 19.

374. **Product Name:** Fry-Sticks (Like Chicken Drumsticks; Spelled Fry Sticks by 1971).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: Tuxedo 5-5359.

**Date of Introduction:** 1957.

**Ingredients:** In 1971: Wheat protein [wheat gluten], soya, potato meal, powdered whole eggs, hydrolyzed vegetable proteins, dehydrated onion and garlic, plant extractive flavorings, MSG, salt, water.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Wholesale price list. 1957. April 1. Sold in 12 oz and 4 lb 12 oz cans. No description of the product is given.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 163. Lists the ingredients in “Fry Sticks (Worthington).” This is an institutional product.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned chicken drumstick-like product based on spun soy protein fiber.

375. Zerfing, Sally D. 1957. Sally’s recipes. Glendale, California: Published by the author. vi + 221 p. Illust. No index. 25 cm.

• **Summary:** A remarkable vegetarian cookbook with a Christian message and references to many Biblical passages. It would be vegan, except for the use of honey. The author is a devout Christian and is probably a Seventh-day Adventist since (1) Ellen G. White is quoted on several pages (p. 2, 214-17, etc.), (2) it contains so many soy recipes at a

relatively early date, and (3) it mentions some brands of soy products (e.g. Madison Health Food Company's Cheze-O-Soy = tofu) made by Adventist companies. Page 14 has a short section on soy oil and page 14 a long section on soy beans, including soy milk. Soy-related recipes include: Soy beans (p. 44). Soy paste (with soy milk powder, p. 50). Soy-whole wheat noodles (with soy flour, p. 62). All purpose soy milk no. 1, no. 2, and no. 4 (made with El Molino Soya Milk Powder, p. 66-67). All purpose soy bean milk no. 3 (made from whole soy beans). Hot carob drink (with soy milk, p. 66). Almond milk. Cashew nut milk. Sesame milk (p. 67). "Liquefy together: 1 cup sesame seeds and 2 cups water. Then strain the milk through a fine cloth; squeeze to get out all the milk. Then liquefy with a little honey, salt, oil, or liquid lecithin").

Note: This is the earliest English-language document seen (Aug. 2013) that contains the term "sesame milk"—or a recipe for making it at home.

Scrambled tofu (with Chef Bonneaus Aminotone, p. 73). French toast (with soy milk, p. 73). No. 2 health burgers (with tofu, p. 79). Scrambled tofu sandwich (p. 80). Creamed tofu and nut spread. Soy cream and olive sandwich on Boston bread (with soy creamed cheese, p. 80). Cheze-O-Soy sandwich (p. 81). Sesame tahini cheese spread (with Sally's Soy Mayonnaise, p. 81). For other tahini recipes, see p. 82 and 111. For other sesame seed recipes: Sesame cream cheese (p. 82). Sesame salad dressing (p. 85). Sesame wheat germ candy (p. 148).

Soy creamed cheese (p. 82). Soy mayonnaise. Thousand island dressing (with soy mayonnaise, p. 83). Cucumbers with tofu cream dressing (p. 90). Homemade tofu cottage cheese (p. 91). Tofu cottage cheese (p. 91). Tofu vegetable jello-salad (p. 92). Tofu and rice croquettes (p. 100). Soy and rice patties (with ground soybeans, p. 101). Soy and eggplant patties (with ground soybeans, p. 101). Tartar sauce (with Sally's Soy Mayonnaise, p. 104). Baked macaroni and soy cheese (with tofu). Cheze-O-Soy and millet hash. Baked soy beans (p. 104). Soy and millet loaf (p. 105). Thanksgiving loaf—Wheat, tofu and nut combination (p. 107). Cheze-O-Soy patties (p. 108). Spanish-style scrambled tofu (p. 115).

Note: This is the earliest document seen (Feb. 2012) that contains the term "Scrambled tofu" or that contains a recipe for "Scrambled tofu." The book actually gives 3 recipes for scrambled tofu (pages 73, 80, and 115).

Ravioli (noodles made with soy flour and filling made with Cheze-O-Soy, p. 116). Bean sprout entree (with Cheze-O-Soy, p. 117). Scalloped corn (with tofu). Tofu Chick Pea Foo Young (p. 117). Wonder of the sea loaf (baked, with tofu, p. 118). Chew mein vegetarian style (with soy sprouts, p. 119). Tofu and Sally's homemade tofu (p. 118-19; curded with lemon juice and sea salt). Homemade soy cheese (made with El Molino Soya Powder, p. 119). Tofu gravy (p. 120). Non-dairy ice creams (p. 149-53; most recipes call for 2 tablespoons El Molino soya milk powder). Banana split,

Maple nut sundae, Fruit Sundae (each topped with "soy whipped cream," p. 151).

Note 1. We are unable to find a recipe or definition for "soy whipped cream" anywhere in this book.

Note 2. This is the earliest English-language document seen (Oct. 2013) that contains the term "soy whipped cream" (regardless of capitalization).

Date shake (with "2 cups soy milk No. 3 or No. 1," p. 152). Carob soy malt (with "2 cups all purpose soy milk No. 3," p. 152). Ice cream pie (topped with soy whipped cream, p. 153). Carob-wheat germ banana shake (with soy milk, p. 153). Soy pie crust (with "¼ cup stirred soy flour," p. 154). Pineapple soy cheese pie (with "1¼ cups tofu and "¼ cup soy milk powder," p. 156). Baby's soybean formula (p. 196). Composition of ¼ cup soy powder (p. 196). Tofu for babies (p. 200).

Chapter 18, "Grandma's remedies" is about fasting, including "A week or fourteen day fast" (p. 204). A large portrait photo on the front cover shows Sally Zerfing. Address: 24629 N. Arch St., Newhall, California.

376. **Product Name:** [GranoVita Cutlets].

**Foreign Name:** GranoVita Phag-Schnitten.

**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1958.

**Wt/Vol., Packaging, Price:** 270 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** Form filled out and Label sent by DE-VAU-GE. 1990. June 11. Note: This is the earliest document seen (Oct. 2004) concerning DE-VAU-GE and soy. This is the earliest known commercial soy product made by DE-VAU-GE.

377. **Product Name:** Sanitarium Health Foods Vegecuts (Vegetarian Steaklets).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1958.

**Ingredients:** Wheat protein, casein, soya beans, peanuts, cornflour, Marmite, onion powder, salt, monosodium glutamate, sucrose, curry.

**Wt/Vol., Packaging, Price:** 1 lb can.

**How Stored:** Shelf stable.

**New Product—Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color. "Vegetable Protein—Ideal for grills, casseroles, stews, salads." Recipes for Vegecuts Ambrosia and Sukiyaki.

Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1958.

Note: This is the earliest soy product seen that uses casein as an ingredient.

378. **Product Name:** Sanitarium Health Foods Vegetarian Sausages.

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1958.

**Ingredients:** Wheat protein, peanuts, tomato, soya beans, Weet-Bix, dried yeast, Marmite, herbs, cloves.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color.

Photo shows frankfurter-like sausages on a bed of rice.

“Vegetable Protein” Recipes for Sweet & Sour Sausages and Sesame Veg-Sticks.

Letter and Label sent by Sanitarium Health Food Co.

1990. June 25. Gives product introduction date as 1958.

379. Circle, S.J.; Johnson, D.W. 1958. Edible isolated soybean protein. In: A.M. Altschul, ed. 1958. *Processed Plant Protein Foodstuffs*. New York: Academic Press. xv + 955 p. See p. 399-418. Chap. 15. [93 ref]

• **Summary:** Contents: Introduction. Isolated soy protein compared to soy flour. Availability and forms of edible soy protein isolate: Soy protein and soy proteinate, modified forms of soy protein isolate, partial isolates of soy protein and by-products. Properties of unmodified isolated soy protein: Methods of dispersing protein and proteinate, viscosity behavior—effect of high temperature, flavor. Nutritional value of edible isolated soybean protein: Nutritional value for human beings and animals (isolated soy protein, soybean oil meal, soybean milk, soybean curd, and Oriental products), amino acid composition, supplementation (mutual supplementation, isolated soy protein as a source of lysine). Food uses of edible isolated soy protein: Dairy-type products (including recipes for All-vegetable coffee “cream,” All-vegetable whipped topping, All-vegetable “cream cheese,” Non-milk chocolate frozen dessert [ice cream], All-vegetable high-protein chocolate drink, All-vegetable high-protein non-starch chocolate pudding) meat-type products (including recipes for All-vegetable “meat loaf,” and All-vegetable “frankfurters”), baked and cooked products based on dough, cereal-type products, macaroni-type products, oriental-type foods, specialty foods, confections and preserves, coatings, feed uses, modified soybean protein products, summary and conclusions. Address: The Glidden Co., Chicago, Illinois.

380. Ford, Herbert P. 1958. The life story of Dr. Harry W. Miller. Unpublished manuscript. 169 p. Unpublished manuscript. 28 cm.

• **Summary:** This manuscript is the slightly edited second draft of the transcript of a single 7-8 hour interview that Mr. Ford did with Dr. Miller in 1958 in Chicago. According to Mr. Ford, Dr. Miller later gave a copy of the manuscript to Raymond S. Moore PhD, a Seventh-day Adventist educator, with the understanding that Moore would use it as the basis for a book. The book, titled *China Doctor*, was published in 1961. Dr. Miller was not very happy with the way the book turned out.

Pages 122-35 give a much more detailed account and history of Dr. Miller's work with soy milk, tofu, yuba, other soyfoods, meatlike products, and wheat gluten than is found in the finished book, *China Doctor*.

Concerning wheat gluten: Dr. Miller's company in Mt. Vernon, Ohio, International Nutrition Laboratory, “had protein foods in which they used wheat gluten and made meat patties and various kinds of stews, sprouted the green soybeans and made a chili with them and wheat gluten.” They also developed a vegetarian wiener [Veja Links] containing raw vital wheat gluten, soy flour, seasonings, and flavors. They stuffed these into wiener casings, submitted them to a smoke house and to cooking, then peeled off the casings/skins and canned the wieners. He developed these at the Mt. Vernon slaughterhouse.

“Soy milk manufacture in the U.S.A. (p. 131). In 1939 Dr. Miller returned to the United States having been so thoroughly convinced that soy milk was destined to have world-wide acceptance... His son, Harry Willis Miller, Jr. had returned preceding his father and had started a small soy milk plant in Utica, New York, where he made and bottled soy milk and also made and canned some of the protein foods out of wheat gluten for which they had developed recipes. This plant was later moved to Mt. Vernon, Ohio, after they started the soybean plant at Mt. Vernon. The plant was rather small at first as their capital was very limited. They had to build up the food plant out of his surgery earnings. As these products were mostly for export, the firm was called the International Nutrition Laboratory. It was called International because they didn't think of having any particular market for soy milk in the United States but anticipated making and packing soy powder which they could ship over to China, Japan, Korea, and other fields. Since the United States is a dairy country, they just thought they would have all kinds of difficulty getting it introduced over in America. They gave their attention largely in the early part of the work to making some products that went over quite well, which could be sold locally such as meat patties—vegaburgers. They would take the wheat flour, wash the starch from it, and make gluten patties. They actually built up a very fine product that was netting them earnings. The earnings of that, together with Dr. Miller's medical and surgery fees, to finally get together a spray dryer which they built with the aid of the know-how assistance of the Rogers Company, who sold these spray dryers... and through this home-made outfit they daily spray

dried considerable powdered soy milk and placed it on the market. They made some ice cream mixes and they shipped out in barrels to the Philippines soy milk powder and also shipped consignments of the powder to Shanghai where they had formerly introduced a soy milk to the Shanghai Settlement. Thus they kept soy milk going up until the time of the world war in 1941 which cut them off from shipping to the Orient.”

Note: This is the earliest document seen (Jan. 2014) concerning soy milk in international trade (for imported or export).

In the United States they found “an interest on the part of doctors in feeding babies that were covered with various kinds of rashes which they called atopic dermatitis. Many of these babies had asthma, diarrhea, projectal vomiting, nervous irritability and were unhappy babies, all because of the allergy to cow’s milk formula.” Doctors began to realize that babies with allergies and other sicknesses responded well to soybean milk; the market soon increased. Eggs and milk are the chief causes of allergy, but some vegetable proteins like wheat, corn, and some legumes also cause allergic reactions in some cases. Then doctors began to ask for evidence that the milk was safe. They suggested that it be submitted to the American Medical Association [AMA]. So at once Dr. Miller contacted Dr. Earl Baxter, Professor of Pediatrics at the Ohio State University Medical School, and he agreed to conduct some feeding experiments with soy milk. These studies showed that “babies could be nourished as well on soy milk.” In Tokyo, Dr. Choei Ishibashi (later president of the Japan Medical Society) also did meticulous feeding tests with infants, using the powdered soy milk Dr. Miller had sent after World War II. Over a period of many months, he compared the blood, measurement, and growth records of babies fed soy milk with those fed animal milk [cow’s milk]. Then Dr. Miller took the results of the studies in Japan and at Ohio State and submitted them to the Council on Food and Nutrition of the American Medical Association. The Council has 15 members, the very best scientists on food and nutrition. “They examined the [soy] milk, examined the claims for it, looked over the research, and then gave the seal of approval which was placed on every can of soymilk thereafter.”

“Now that they had this seal of approval, they went to medical conventions and canvassed the doctors; the sale of soy milk grew very rapidly.” The plant began to get larger; it made great demands and there were many details to look after. These facts and his lack of capital to carry on this work adequately made Dr. Miller realize that he must do one of two things. He must either organize a corporation, issue stock, and enlarge the company greatly, or he must dispose of the plant and give his time and attention to research.

During this time, Dr. Miller received valuable help from the U.S. Department of Agriculture [USDA]. Dr. J.A. LeClerc (Senior Chemist, Agricultural Chemical Research

Division) and Mr. L.H. Bailey, who investigated the use of “soybean milk in making breads” and made the results and analyses available to Dr. Miller. “Thus they got themselves very well established in this country as having a milk for people who did get along with cow’s milk.”

However the secretary of the AMA told Dr. Miller that he should not claim or advertise that his soy milk was a good alternative to cow’s milk for all babies, but only “for those babies who do not do well on cow’s milk.” However he added: “If you can take care of babies that cow’s milk does not take care of, there is no reason why you could not take care of the other babies that cow’s milk does agree with too.” This was his diplomatic way of counseling them not to make unfriendly comparisons with cow’s in a dairy country—even if those claims are valid. By following his advice, Dr. Miller was able to work well with the dairy industry without any conflicts.

The Loma Linda Food Company in California showed an interest in acquiring Dr. Miller’s company in Ohio. “They had been making some soy milk in the liquid form, but they were interested in getting an Eastern branch.” So in 1950 they purchased the [soy] milk plant in Mt. Vernon and have been operating since that time. This took a great burden off Dr. Miller’s shoulders and left him free to do medical and nutritional research work. “It was then decided to start the International Nutrition Research Foundation and Dr. Miller was asked to be the Director of this Foundation. He placed a larger part of the purchase price of the factory into this Foundation, which would be devoted to food research only. From the day this research institution was started it has attracted a great deal of attention from all parts of the world; among those interested parties has been the World Health Organization of the United Nations. They came to the conclusion that soy milk had great possibilities in countries of low economic conditions where they could not afford to buy imported [cow’s] milk,” and in protein-deficient countries. They came to Mt. Vernon to investigate both the soy milk plant and the experimental research. Dr. Miller educated them on the many benefits of using protein from soybeans instead of from animals. As a result, the United Nations constructed a large soy milk plant in Djojakarta [Jogjakarta / Yogyakarta] Indonesia. It was built with the advice of Dr. S.S. De (who has headquarters in Bangkok, Thailand) and the support of the Government of Indonesia, FAO, UNICEF, and WHO.

381. Motoyama, Tekishu. 1958. *Inshoku jiten* [Encyclopedia of food and drink]. Tokyo: Heibonsha. 604 p. Illust. 27 cm. [Jap]

• **Summary:** Includes listings for the following soy-related terms: Aburage (deep-fried tofu pouches), aemono (Japanese-style salads), agedashi-dofu, daizu (soybeans), dengaku, fu (wheat gluten; but the term “seitan” is not listed in this book), ganmodoki (tofu burgers), gisei-dofu, goma-

dofu (sesame tofu), goma-miso (sesame miso), inari-zushi, iri-dofu (scrambled tofu), kenchin-jiru, miso, namemiso, natto, oboro-dofu (soymilk curds), oden (stew), okara, shirae (tofu salad), shoyu, sukiyaki, tekka, teriyaki, tofu, tonyu (soymilk), tsuto-dofu, unohana (okara), yakimiso (broiled miso), yuba.

Separate entries, with detailed information, are given for some of the above words or terms.

382. Granose Foods Ltd. 1959. Fine foods for physical fitness (Ad). *British Vegetarian*. Jan/Feb. p. xi.

• **Summary:** This half-page black and white ad shows packages of the following: In cans: Meatless Steaks, Saviand, Nuttolene, Sausaltas. In glass bottles: Yex (Yeast Extract), Kwic-Bru, Peanut Butter. In paperboard cartons: Rolls (starch reduced), Sunnybisk (breakfast cereal), Granobisk. Address: Stanborough Park, Watford, Hertfordshire.

383. Frank, S.S.; Circle, S.J. 1959. The use of isolated soybean protein for non-meat, simulated sausage products Frankfurter and bologna types. *Food Technology* 13(6):307-13. June. [35 ref]

• **Summary:** Discusses products processed under various conditions. Contents: Introduction. Simulated meat products. Frankfurter and bologna characteristics. Materials and methods. Results. Discussion. Photos show the effect of the following variables on the appearance of the cross section of 6 cooked soy protein "frankfurters": (1) pH. (2) Fat content. (3) Water content. (4) Cooking temperature. (5) Protein particle size.

Note: While doing pioneering work on edible soy protein isolates (Promine) at the Glidden Co., shortly before Glidden's Chemurgy Div. was sold to Central Soya, Sidney Circle hired Steve Frank, who had a MSc degree in food technology from Cornell University, New York, to help him develop new food applications using Promine. Frank stayed with Central Soya for only about 1 year before leaving to work for Campbell Soup Co., where he worked for many years. Campbell sent him to work at one of their subsidiaries in Australia for a while. Address: Chemurgy Div., Research & Development Lab., Central Soya Company, Inc., Chicago 39, Illinois.

384. Battle Creek Food Company. 1959. Eastern authorized dealer price list. Battle Creek, Michigan. 1 p. Sept. 1.

• **Summary:** Products of interest on the list include the following; those followed by an asterisk (\*) contain soya: Soya Flakes\* (5 oz). Veg. Burger, Prime (20 oz or #10). Nuttose (10 or 20 oz). Protose (10, 20, or 28 oz). Vegetable Skallops (10, 20, or 28 oz, or #10). Vegetable Steaks (10, 20, or 28 oz, or #10). Vegetable Steaks, small cuts (20 oz or #10). Vegetable Steak, low sodium (20 oz). Gluten Flour (5 lb or 100 lb). Malted Nuts (14 oz or 5 lb). Savita (3, 7, or 14 oz, 8½ lb or 50 lb). Savita Soup Cubes (10 cubes). Soy

Beans\* (15½). Soy Flour\* (2 or 5 lb). Brewers Yeast (10 oz). Lacto Dextrin (16 oz, or 4 lb). Address: Battle Creek, Michigan.

385. *Soybean Digest*. 1959. Central Soya Co. marks 25 years of progress. Dec. p. 14-15.

• **Summary:** Gives a brief history of the company, but focuses on Promine, the company's new "commercial isolated soya food protein. The opening of the new Promine plant Oct. 27 [at 1825 N. Laramie in Chicago, Illinois] marked the latest milestone in the 25-year story of progress by Central Soya since it was founded in 1934. Officials of the company are very optimistic about their new product and the possibilities of uses are unlimited. Dr. Edwin Meyer, chemurgy research director, stated, "If we could convert the entire [U.S.] soybean crop into Promine it would supply our nation with enough protein for one year to maintain our present high protein diets."

Dale W. McMillen founded Central Soya in the midst of the depression when he was age 54. "Mr. Mac" will soon celebrate his 80th birthday. Today Central Soya ranks 81st in gross sales and 4th in sales per employee among America's 500 largest industrial corporations.

"Examples of present-day foods being improved by the addition of Promine include many baby foods, cereals, bakery products, confections, pressure dispensed whipped toppings, many types of prepared meats, and other high protein foods." At the ceremony opening the new plant, samples of an "all vegetable 'Hot Dog' were dispensed" to visitors.

Central Soya researchers were the first "to developed the commercial isolation of a food grade soya protein in 1949." Their first commercial isolated soya protein product was "Alpha" protein, launched in 1937, for use as an adhesive in pigment coated paper by the paper industry. New edible soy flours include Soyafuff, Soyalose, and Soyarich. Spraysoy, Prosein, and Prosoy have been developed for industrial use in plywood glue, wallpaper coating, and in light duty abrasives. Lecithin is used in margarine as an anti-spattering ingredient. A granular type RG Lecithin is being used as an aid in lowering blood cholesterol.

Photos show: (1) An aerial view of the Chemurgy Division of Central Soya Co. in Chicago, including the recently completed Promine plant. (2) Promine being filled into 50 lb bags labeled "Promine D Edible Isolated Soya Protein." (3) American Soybean Association's president Carle G. Simcox and Central Soya's founder Dale W. McMillen shake hands at the opening of the firm's Promine plant on Oct. 27 in Chicago. (4-6) Small portraits of Dale W. McMillen, Harold W. McMillen, and Edwin W. Meyer.

Note: This is the earliest document seen (Feb. 2002) that contains the term "food grade" in connection with soy.

386. **Product Name:** Veelets.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, Ohio. Phone: 2-2539.

**Date of Introduction:** 1959.

**New Product–Documentation:** *Chopletter* (Worthington Foods, Ohio). 1960. “What you should know about Worthington Foods.” April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Veelets.

Note: This is the earliest known commercial meat alternative product that bears a Kosher label as having been Kosher certified.

387. Egami, Tomi. 1959. Typical Japanese cooking. 1st ed. Translated by V.A. McKenzie Skillman. Tokyo: Shibata Publishing Co. Ltd. Exclusive distributors: Japan Publications Trading Co., Ltd (Tokyo). [viii] + 146 p. Illust. (incl. color photos by Yoshikatsu Saeki). Index. 27 cm.

• **Summary:** Foods marked with an asterisk (\*) are exported from Japan to the USA. Many recipes include “soy sauce” and monosodium glutamate (Ajinomoto). Soy related recipes include: Aburage \* (“fried soy bean curd”—4 recipes). Broiled soy bean curd [*yakidofu*] (3 recipes). Sukiyaki, Yasainabe, Osechi). Chu-miso paste \* (“made from soy beans, salt and rice malt [koji], seasoning for miso soup”—2 recipes). Ganmodoki \* (“fried soy bean curd and vegetables”—Nikomi oden). Nama-age (“half fried soy bean curd”—Boiled vegetables).

Note: This is the earliest English-language document seen (April 2013) that contains the term “fried soy bean curd” or the term “half fried soy bean curd.”

Okara (“soy bean curd leftovers”—Yoshino sushi). Red miso paste \* (“made from soy beans, salt and rice malt [koji], seasoning for miso soup”—2 recipes). Soy bean (3 recipes). Soy bean curd \* (14 recipes, incl. Gizeidofu / Gisei-dofu, p. 39). Soy bean powder \* [kinako] (2 recipes; Kinakomochi, Kushi dango). Soy sauce (“Kikkoman”). White miso paste (“made from soy bean, salt and rice malt [koji], seasoning for miso soup”—2 recipes). Worcestershire sauce (Skewer nibblers).

Other interesting recipes include: Amazake. Azuki-sarashian (“red bean powder”—7 recipes). Black sesame seed (in Sekihan). Mochi rice. Red bean [azuki] (Sekihan). Rice cake (“made of mochi rice”). Seaweeds (kanten / agar-agar, kombu / konbu, nori / green laver & purple laver, wakame). White sesame seed. Yamaimo (“Japanese yam”). Tomi Egami was born in 1899. Address: [Japan].

388. Thompson, Edna. 1959. The yoga cook book. New York, NY: Philosophical Library. 156 p. Index. 19 cm.

• **Summary:** The Yoga diet, as presented here, is not vegetarian. This book contains recipes for meat (liver, heart), fish, and shellfish. “Yogans” are said to eat at least some

food each day which carries the life principle (fresh, raw food), to prefer whole foods in modest amounts, to avoid inert demineralized foods (such as white flour and white sugar), and alcohol. Yoga is not a religious movement; its followers practice self discipline in eating, without fasting. The rear dust jacket states: “This book banishes the idea that the modern Yogin as an ascetic with caveman dietary habits.” The true Yogin regards his food as sacred and has heightened powers.

Soy-related recipes include: Soybean soup (p. 18). Shoyu sauce (soy sauce, p. 26). “Auxin” salad (freshly sprouted mung beans sprinkled with soy oil, etc., p. 48). Eggs foo yung (with bean sprouts, water chestnuts, green onion, celery, 4 beaten eggs, salt to taste. “Brown desired size patties of the mixture in soy oil.” Serve with a brown sauce made with cornstarch, soy sauce, monosodium glutamate, sugar, and salt. p. 58-59). Vegetable sukuyaki (with Tofu {bean curd} and shoyu sauce, p. 65). Soyburgers (with mashed cooked soybeans, p. 66). Vegetable chop suey (with soy oil, bean sprouts, and soy sauce, p. 68). Korean soybean noodles (made with soybean flour, p. 72). Soy spoon bread (with soy flour and soy oil, p. 97-98). Making soy bean cheese (tofu, coagulated with vinegar, p. 104). Yoga puddings and desserts (white flour is replaced by soy flour and lard is replaced by soy oil, p. 114). Chinese sweet soy beans (p. 122). Manchurian soy bean milk drinks (p. 136).

Also discusses: Japan yokan cakes (with red beans [azuki], p. 116-17). Oat peanut butter wafers (p. 123). Red bean cake (Korea, with red kidney beans [azuki], p. 131-32).

389. *Chopletter* (Worthington Foods, Ohio). 1960. What you should know about Worthington Foods. 13(2):3. April.

• **Summary:** Worthington makes both liquid and powdered Soyamel. Soy-based Kreem Chee has exactly the same fat (36.9%) and protein (9.0%) content as dairy cream cheese. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label are Choplets, Choplet Burger, Vegetarian Burger, Proast, Numete, Sandwich Spread, Soyamel, Veelets, Veja Links, VP, and Entree.

New and improved Vegetarian Patties are now available. A product named New Vegetable Burger is also available.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Vegetarian Burger” (or “Vegetarian Burgers”), or the term “Vegetable Burger” (or “Vegetable Burgers”).

Note 2. This is the earliest document seen (Jan. 2009) that uses the word “Kosher” or the word “Pareve” in connection with meat alternatives or with soy products. Address: Worthington, Ohio.

390. **Product Name:** Vegetarian Burger.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1960 April.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, yeast extract, salt, soy sauce, Brewer's yeast, MSG, seasonings, algin, caramel color.

**Wt/Vol., Packaging, Price:** 20 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** *Chopletter* (Worthington Foods, Ohio). 1960. "What you should know about Worthington Foods." April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Vegetarian Burger.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in "Vegetarian Burger (Worthington)."

Ad in Whole Foods. 1983. Sept. p. 45. in 20 oz. cans. This product and Vegetable Skallops are being promoted as "Salt Shakers." Both are available in versions with and without salt and MSG. For the hypertensive and sodium-conscious. A black-and-white photo shows the can and label. The text reads: "Contains no meat. A vegetable protein product. No added salt or MSG."

Worthington Yesterday and Today. 1984. p. 11. Nutrition Action Healthletter. 1987. Oct. p. 13. Critical treatment of this product which contains 790 mg of sodium vs. only 65 mg for lean beef. Much of the sodium comes from MSG. The "no salt added" label is highly misleading though technically legal. It also contains caramel coloring. Thus it is not necessarily more healthful than beef.

391. **Product Name:** Loma Linda Dinner Cuts (Meatless Cutlets) [With Salt, or with No Salt Added].

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Arlington, CA 92505.

**Date of Introduction:** 1960 May.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, soy sauce, yeast extract, salt, MSG, dextrose, powdered onion, celery and parsley extracts.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 2 dinner cuts (3.5 oz–100 gm): Calories 110, protein 21 gm, carbohydrate 4 gm, fat 1 gm, cholesterol 0 mg, sodium 30 mg, potassium 75 mg.

**New Product–Documentation:** *Today's Food* (Loma Linda Foods, Arlington, California). 1960. Spring. p. 4. *Today's Food*. 1964. Autumn. p. 7. 20 oz. can retails for \$0.74, serves 5, and provides 65 gm of protein; Ad. 1981, undated. "Try improved Dinner Cuts. It's no longer a tough choice. Let's face it, our old Dinner Cuts—as delicious as they were—took a lot of chewing. We took a lot of kidding... Dip in batter and wheat germ and brown in a skillet."

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Dinner Cuts contain 18.79% protein, 1.00% fat, and 3.49% carbohydrate. One serving, 1 patty, weighs 125 gm.

Loma Linda Food Co. 1969. "Wholesale Price List." Dinner Cuts are now sold in 14 oz, 19 oz, 28 oz, and 48 oz cans. A version with no salt added is sold in 20 oz cans.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in "Dinner Cuts (Loma Linda)."

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned steak or burger-like product based on wheat protein.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 175. The ingredients in "Dinner Cuts (Loma Linda)" are "wheat protein, soy sauce, yeast extract, MSG, salt, powdered onion, L-lysine, dextrose, celery, parsley extract."

Label sent by Loma Linda Foods. 1988. Oct. 5. The ingredients are now, for "No salt added": Wheat gluten, water, oat flour, wheat flour, soy protein isolate, caramel color. Broth: Water, natural (vegetable) flavors, onion powder, mono potassium glutamate, dextrose, L-lysine, spice. This product was introduced in 1963.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

392. Van Gundy, Dorothea. 1960. Man-sized meals in mere minutes... for homemakers in a hurry! *Today's Food* (Loma Linda Foods, Arlington, California) 5(1):4-6. Spring.

• **Summary:** Commercial food products made by Loma Linda Foods include: Vegemeats (with gluten). Vegeburger. Dinner Cuts. Loma Linda Green Soy Beans. Linketts. More information about these products is given on pages 3 and

7 of this 8-page magazine. A photo shows Dorothea Van Gundy. Address: Dietitian, International Nutrition Research Foundation, 11503 Pierce Place, Arlington, California.

393. Worthington Foods, Inc. 1960. Battle Creek Food Company, authorized dealer price list. Worthington, Ohio. 1 p. Oct. 15.

• **Summary:** See next page. Battle Creek Food Company in Battle Creek, Michigan, is now a division of Worthington Foods, Inc. in Worthington, Ohio. Products of special interest on the list include the following; those followed by an asterisk (\*) contain soya: Veg. Burger, Prime. Nuttose. Protose. Vegetable Skallops. Vegetable Steaks, regular or small cuts. Gluten Flour. Malted Nuts. Savita. Savita Soup Cubes. Soy Flour\*. Brewers Yeast Powder. Lacto Dextrin. Address: Worthington, Ohio.

394. *British Vegetarian*. 1960. Vegetarian foods. Sept/Oct. p. 248-49.

• **Summary:** The main protein foods used by vegetarians are nuts, cheese and pulses. In addition, all Health Food Stores sell a wide variety of tinned nutmeats, including the following:

Granose Foods Ltd. makes: Nuttolene (peanuts and cashew nuts). Sausalene (wheat protein, mixed nuts, etc.). Saviand (Wheat gluten, ground nuts, etc.). Meatless steaks (wheat gluten, etc.). Savoury Pudding (wheat protein, wheatmeal flour, groundnuts, etc.). Nutmeat (wheat gluten, cashew nuts, wheat flour, etc.). Sausalatas (wheat protein, mixed nuts, etc.). Soya Beans (soya beans, tomato puree, brown sugar, vegetable shortening, onion, yeast extract, wholemeal flour, seasoning). Peanut Butter. Cashew Nut Cream. Granose was founded in 1898 under the name International Health Association Ltd. and is now at Stanborough Park, Watford. Note: This is the earliest document seen (July 2000) concerning the work of Granose Foods Ltd. with soya beans.

Mapleton's Nut Food Co. Ltd. makes: Maplemeat (cashew nuts, wheat risk, etc.). Savormix and Frittermix (incl. groundnuts); these are in packets for making savouries. They also make numerous tinned nutmeats, plus a wide range of nut and soya butters [probably margarines], savoury spreads and pastes, nut creams, fruit and Dundee cakes. Mapleton's was started in 1897 by the two Mapleton brothers who were processing cracked nuts in a large house on Dolphin Street, Manchester. By 1907 Mapleton's had become a public limited company and occupied a mill at Wardle, Lancashire, later moving to Garston, near Liverpool. The company opened a second factory in Hamburg, Germany, which flourished until 1914, when it was confiscated. A fire gutted the their Garston mills in 1932 but in 1933 the factory and offices were rebuilt.

Many tons of organically grown produce are grown in the UK and overseas using compost.

395. **Product Name:** Vegetable Steaks.

**Manufacturer's Name:** Battle Creek Food Co.

**Manufacturer's Address:** Battle Creek, Michigan.

**Date of Introduction:** 1960.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, yeast extract, salt, flavorings, MSG, caramel color.

**Wt/Vol., Packaging, Price:** 20 oz can. Retails for \$2.70 (7/90, California).

Linda Vegeburger.”

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Vegeburger contains 17.75% protein, 0.92% fat, and 4.08% carbohydrate. See also reformulated 1971 version that contains textured soy protein.

Loma Linda Food Co. 1969. “Wholesale Price List.” Vegeburger is now sold in 14 oz, 20 oz, 30 oz, and 51 oz cans. A version with no salt added is sold in 20 oz cans.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word “Vege-Burger” (or “Vege-Burgers”).

**397. Product Name:** Loma Linda Vegelona (Meatless Bologna-like Loaf).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1960.

**Ingredients:** Wheat gluten, water, dried yeast, corn oil, salt, soy flour, vegetable mono- and di-glycerides, caramel color, natural (vegetable) flavors, oat flour, onion powder, L-lysine, wheat flour, artificial colors, soy protein isolate, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per ½ inch slice (2.4 oz–67 gm): Calories 100, protein 18 gm, carbohydrate 6 gm, fat 1 gm, cholesterol 0 mg, sodium 210 mg, potassium 100 mg.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Vegelona contains 25.38% protein, 5.45% fat, and 7.22% carbohydrate.

Loma Linda Food Co. 1969. “Wholesale Price List.” Vegelona is now sold in 14 oz, 20 oz, and 30 oz cans.

It’s Your World Vegetarian Cookbook. 1973. Glendale,

California: Seventh-Day Adventist Church. p. 118. This is a canned bologna-like product.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1963.

**398. Product Name:** Cho-Pats.

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison, Tennessee.

**Date of Introduction:** 1960.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Cho-Pats contain 16.50% protein, 0.10% fat, and 6.22% carbohydrate.

Talk with Warren Hartman, who worked for Worthington Foods since early 1946. 1992. Nov. 5. He thinks that this product was made by Madison Foods.

**399. Product Name:** Chic-Ketts (Meatless Chicken).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: Tuxedo 5-5359.

**Date of Introduction:** 1960.

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Chic-Ketts contain 18.45% protein, 0.21% fat, and 6.70% carbohydrate.

By 1973 this product was reformulated to contain textured soy protein concentrate and isolate.

Note: This is the earliest commercial meat alternative seen which has a name clearly indicating that it is an alternative to chicken or poultry.

**400. Product Name:** Cutlets.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1960.

**Ingredients:** In 1971: Wheat protein [wheat gluten], extract of Brewer’s yeast, hydrolyzed vegetable proteins, MSG, salt, caramel coloring, water to process.

**Wt/Vol., Packaging, Price:** 50 oz (1417 gm) can. Retail for \$6.25 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Cutlets plus their liquid contain 15.50% protein, 0.62% fat, and 4.94% carbohydrate. Not listed in the 1965 *Diet Manual*.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in “Cutlets (Worthington).”

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 175. The ingredients in “Cutlets (Worthington)” are “wheat protein, yeast extract, HVP, soy sauce, mushrooms, MSG, salt, lysine, dextrose, corn oil.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

By 1990 this product had been reformulated with textured soy protein concentrates.

**401. Product Name:** Cutlets in Gravy.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1960.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Cutlets in gravy contain 14.37% protein, 3.68% fat, and 8.34% carbohydrate. Not listed in 1965 *Diet Manual*.

**402. Product Name:** Vegelinks (Meatless).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: Tuxedo 5-5359.

**Date of Introduction:** 1960.

**Ingredients:** In 1971: Soy protein (Fibrotein spun soy protein fibers), oats, corn oil, vegetable shortening, [egg] albumin, salt, corn syrup solids, soy sauce, vegetable gum, hydrolyzed vegetable protein, flavorings, U.S. certified color, water.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual*. 1st ed. p. 95. Vegelinks and its liquid contain 22.10% protein, 10.70% fat, and 9.19% carbohydrate. The manufacturer's name is not given.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Vegelinks (Worthington)." This is an institutional product.

Note: This is the earliest English-language document seen (Aug. 2003) that uses the term "Vegelinks" to refer to meatless soy sausages.

**403. Joya, Mock.** 1960. *Things Japanese*. Tokyo: Tokyo News Service, Ltd. [vi] + 782 + xlv p. Index. 21 cm.

• **Summary:** In Chapter 7, titled "Food, 'Sake' and Tobacco" (p. 275-331) the following may be of interest: Asakusa-nori (includes shoyu), azuki (incl. soybeans, tofu, miso, shoyu, natto), bento and kashi, cattle, chameshi, chawan-mushi ("somewhat similar to Western custards." Make katsuobushi {shaved dried bonito} soup stock, cool, pour into individual *chawan-mushi* bowls {each has a cover}. Mix in an equal quantity of beaten eggs. Add additional flavoring ingredients, cover, and steam until set. "One of the few Japanese dishes that resemble Western dishes in taste").

Chazuke, cooking (incl. sukiyaki and tempura), daikon (incl. miso), drinking cups and customs, eel-eating day (eels are broiled, steamed, then put in a specially prepared shoyu

and broiled again), ginnan (ginkgo nuts), gobo (burdock, incl. miso soup and shoyu), gohan (boiled rice), kabayaki (eel), kamaboko, kashi (confections and sugar), katsuo-bushi (incl. shoyu), kawara-senbei (incl. miso), konnyaku (its shredded form, called shirataki, is used in sukiyaki), manju, matsutake mushrooms (widely used in sukiyaki in the fall), menrui (noodles, incl. soba, udon, shoyu), mikan (mandarin oranges), misoshiru (miso soup, incl. tofu, shoyu, tekka-miso, tai-miso, yuzu-miso, wakame), mochi, mochi-tsuki (pounding), myoga (*Zingiber mioga*), oden (with tofu, miso, and shoyu), one-sided fish, red rice (*sekihan*, made with azuki = red beans), ringo (apples), sakana (fish, incl. shoyu and tofu), sake drinking, sake eating, sashimi (incl. shoyu and mirin), satsuma-imo, seaweeds (sea vegetables), shinchu (new tea), shoyu (Japanese-style soy sauce; per capita consumption is nearly 4 gallons a year), snake eaters, soba (incl. shoyu), souvenir cakes, sugar, suimono (clear soup, incl. miso and shoyu), sukiyaki (incl. tofu and shoyu), sushi (incl. Inari-zushi made with fried tofu), sweets in season, tea varieties, tea water, tempura (incl. sesame oil and shoyu), tobacco tradition, tofu (incl. bitter/nigari, yaki-dofu, aburage, ganmodoki, Koya-dofu, fried tofu, hiyayakko, sukiyaki, dengaku, miso, miso-shiru, shoyu), tokoroten (kanten, tengusa), tsukemono (pickles, incl. miso), umeboshi, wasabi (incl. shoyu), yasai (vegetables), yokan, and yonaki-soba. Note: Different types of yokan (yōkan, a paste made of azuki beans and sugar) include: mizu-yokan (soft azuki-bean jelly) and mushi-yokan (steamed yokan). Yokan-iro is a liver or rusty color.

Other subjects related to soy: Home cures (p. 66-67, for burns, apply the white of an egg or shoyu). Setsubun (p. 119, incl. mame-maki or throwing roasted soybeans). Brother mountains (p. 192, the most loved one, Fudo-iwa, was fed azuki or red beans but the unloved Gongen-yama was fed soya beans). Fox messengers (p. 207-08, aburage or fried tofu). Kuyo (p. 373-74, incl. hari-kuyo or mass for broken needles—but tofu is not mentioned). Azuki (p. 276-77). Red rice (*sekihan*, p. 303). Lunar calendar (p. 400, setsubun and bean throwing). Bamboo (p. 410, incl. bamboo shoots served with shoyu). Hi-no-kami (p. 474, incl. amazake). Sacred rice (p. 504, incl. setsubun and throwing roasted soybeans). Shoulder-chipped Jizo (p. 517, concerns the stone statue of Jozo at the Kiunji Temple, Tozaki-machi, Bunkyo-ku, Tokyo, and foxes and a tofu shop). Inari-san (p. 616-17, Inari-sushi and aburage). Address: Japan.

**404. Seventh-day Adventist Dietetic Assoc.** 1960. *Diet manual*. 1st ed. Main Office: 1720 Brooklyn Ave.. Los Angeles 13, California. 106 leaves. 22 cm.

• **Summary:** The title page reads: "Prepared by the Department of Dietary Service, White Memorial Hospital, College of Medical Evangelists, in cooperation with the Seventh-day Adventist Dietetic Association" (SDADA). It was published and distributed by the SDADA. Editions

published after 1971 (later listed as 1970, i.e. 1975, 1978, 1982, 1990) were prepared by the SDADA.

A comprehensive loose-leaf handbook for the planning, selection, and coordination of vegetarian diets. Although this book is undated, subsequent editions give the publication date as 1960.

Table VI, titled “Protein, fat, and carbohydrate composition of some meat alternates” (p. 95), lists 27 product names alphabetically. Most (perhaps all; the names of the manufacturers are not given) are made by Seventh-day Adventist food companies, especially Loma Linda Foods and Worthington Foods. These products are: Chic-Ketts, Cho-Pats, Choplets—liquid, Chopletburger, Cutlets—liquid, Cutlets in Gravy, Garbanzos, Nuteena, Nutmeat, Proast, Proteena, Protose, Sandwich Spread, Soyloin Steaks, Soybeans—green, Steaklets—liquid, Vegebunger, Vegechee, Vegecuts, Vegelinks—liquid, Vegelona, Vegemeatburger, Vegemeat Steaks, Vegetable Cheese, New Wieners—liquid, Yum, Zoyburger.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Chopletburger” (or “Chopletburgers”). Address: California.

405. Madison Foods. 1960? Everybody loves Madison Foods: Recipes. Madison, Tennessee. 32 p. Undated. 10 x 15 cm.

• **Summary:** Contents: The story of Madison Foods (a division of the famous Madison College located near Nashville, Tennessee). Tasty, healthful Madison foods (listing and photo). Vegetarian vs. meat diet. Vegetable

fats vs. animal fats. Vegetable proteins vs. animal proteins. Nutritional analyses of Madison Foods products. List and description of Madison Foods. Recipes (at least one for each product; a photo accompanies each).

This little (6 by 4 inch) booklet focuses on the various innovative Madison Foods vegetarian products, which are packed in 14 oz, 19 oz, and No. 10 cans. The undated booklet was published after Jan. 1960, since page 6 cites an article from *Nutrition Reviews* published that month.

Madison’s products are: Cheze-O-Soy (tofu), Com-Pro (“Madison Foods’ latest and best.” No ingredients given), Dinner Morsels (all-gluten, resembling chicken), Kreme-O-Soy, Madison Burger, Madison Links, Soy beans in tomato sauce, Not Meat (with peanuts and soybeans), Meatless Nu-Steak (all-gluten), Soyburger, Meatless Stake-Lets (with wheat gluten, whole wheat, and soy flour in a meatlike sauce), Vigorost, Yum, and Zoy-Koff (1 lb bags). Coming soon: Madison Links (hot dogs; photo shown).

Photos on the last two pages show: A student operating a canning machine. Madison Links on half-buns on a tray. The Madison Food factory. Dr. A. Perry Webber, food consultant, with Madison’s products.

Note 1. This is the earliest English-language document seen (Aug. 2003) that uses the term “Madison Links” to refer to meatless soy hot dogs or sausages.

Note 2. This is the earliest document seen (Jan. 2013) that mentions “Com-Pro” or “Madison Links”—protein foods made by Madison Foods. Address: Madison, Tennessee.

406. Diser, Gleason M. comp. 1961. Glossary of soybean

terms. *Soybean Blue Book*. p. 61-64.

• **Summary:** This is the earliest known glossary with this title in the *Soybean Blue Book*. However in the first *Blue Book* (1947, p. 17-19) there was a somewhat similar section titled “Terminology: Definitions and product descriptions for the soybean industry.”

The following terms are defined in this glossary: Soybean(s), soybean processor, soybean processing (solvent extraction, mechanical pressing, hydraulic pressing), soybean oil, crude soybean oil, edible crude soybean oil, refined soybean oil, edible refined soybean oil, hydrogenated soybean oil, degummed soybean oil, winterized oil, technical grade refined soybean oil, soybean fatty acids, soybean soapstock, acidulated soybean soapstock, soybean lecithin, break material, sludge.

Soybean products: Ground soybeans, soybean hay meal, soybean flakes, 44% protein soybean oil meal, dehulled soybean flakes, 50% protein solvent extracted soybean oil meal, soybean proteins, soy flour, soy grits, soybean oil meal, defatted soy flour, low-fat soy flour, high-fat soy flour, full-fat soy flour, lecithinated soy flour, protein, isolated protein, toasting. Oriental soy foods: Soy sauce (shoyu), soy milk, miso, frozen tofu, aburaage, kinako, namaage, ganmodoki, tempeh, natto, yuba, moyashi (soybean sprouts). Address: Archer-Daniels-Midland Co., Minneapolis, Minnesota.

407. Worthington Foods, Inc. 1961. Wholesale price list—order blank. Worthington, Ohio. 1 p. May 1.

• **Summary:** New products in the Worthington Foods line include: Barbie Sue. Patties. Big Pat. Safflower oil. Kreem-chee (natural white or pimiento). Ripe green olives. Chili.

Worthington now owns the Battle Creek line of foods including: Burger, Veg. Prime. Nuttose. Protose. Vegetable Skallops. Vegetable Steaks. Gluten Flour. Kaffir “Tea.” Malted Nuts. Savita. Savita soup cubes. Soy flour. Natural wheat germ. Acidone tablets. Brewer’s yeast. Lacto dextrin. Laxo. LD-Lax. Psyllium seed blond. Sugarless sweetener.

Worthington now has warehouses in Portland, Oregon, and San Leandro, California (near Oakland). Address: Worthington, Ohio. Phone: Tuxedo 5-5359.

408. *Today’s Food (Loma Linda Foods, Arlington, California)*. 1961. [Commercial food products made by Loma Linda Foods]. 6(2):5-6, 8. Summer.

• **Summary:** Loma Linda food products include: Smoke. Savorex. Vegeburger. Nuteena.

Also mentioned as generic names are: Soy mayonnaise, and soy milk. Address: 11503 Pierce Place, Arlington, California.

409. **Product Name:** Patties.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: Tuxedo 5-5359.

**Date of Introduction:** 1961.

**New Product—Documentation:** Wholesale price list. May 1.

410. Hunter, Beatrice Trum. 1961. *The natural foods cookbook*. New York, NY: Simon and Schuster, and Pyramid Books. xvi + 296 p. Index. 22 cm. Pyramid Books pocketbook ed. published in 1967.

• **Summary:** This very early and important natural foods cookbook contains more than 2,000 recipes. The Introduction is written by Dr. Clive M. McCay, Professor of Nutrition, Cornell University, New York, and Dr. Jeanette B. McCay, nutritionist. The pages numbers are those in the original 1961 hardcover edition. The author calls tofu “soy cheese” and uses it in many recipes, including mashed in a recipe for “soy cheese sherbet” (p. 204). This book is not vegetarian (some recipes call for beef, chicken, fish, etc.), but was quite influential in the early days of the U.S. natural foods movement.

Soy-related recipes include: Soy spreads (p. 14-15): Soy flour spread. Soybean spread (in blender). Soy cheese [tofu] spread. Soy butter (made from soy flour, regular or roasted, and oil). Smoothies (p. 26-29). Soybean-cheese salad (p. 35). Soybean-vegetable salad. Soybean molded salad. Soy butter dressing (with soy butter, p. 41). Soy cheese dressing. Eggless mayonnaise (with soy flour). Soybean soup (p. 49). Cream of soy soup (with soybeans in blender). Soy-vegetable soup (with soy milk in blender, p. 54). Soy noodles (with soy flour, p. 59). Green soybeans in pods (p. 70). Steamed green soybeans. Soy grits stuffing (for fowl, p. 127). Homemade soy cheese (also known as soybean curd or *tofu*; from soy milk or soy flour, p. 137).

Soybeans (p. 142-44): Basic soybean filler. Broiled soyburgers. Soybean ring (in blender). Baked soybean croquettes. Soybean casserole. Baked soybeans. Soybean-lentil loaf. Stewed soybeans. Soybean soufflé. Soybean squares. Roasted soybeans (dry-roasted). Leftover soybeans. Soy-oatmeal porridge (with soy grits, p. 162). Soy-cornmeal porridge. Soy sprouts (p. 163). Soy breads (p. 179-80): Kneaded soy-wholewheat bread. No-knead soy-wholewheat bread. Soy spoon bread. Unraised soy biscuits (p. 184). Soy-gluten popovers (p. 189). All-soy pancakes (p. 192). Soy waffles (p. 195). Soy cheese sherbet (with tofu, honey, vanilla, and nutmeg, p. 204). Soy cookies (p. 238). Flourless soy cookies. Soy-wholewheat cookies. Soy-cheese piecrust (with soy flour). Spiced soybean pie (with boiled, pureed soybeans, p. 250).

The section titled “Smoothies” (p. 26-29) contains the following recipes (those followed by an asterisk { \* } contain dairy products and no soy unless stated in recipe name; the directions for all recipes in this section is “Blend all ingredients”): Homemade soybean milk (from whole soybeans, or from soy flour). Spiced soy milk. Soy-fig shake (with soy milk). Milk-soy smoothie (with soy flour)\*.

Almond milk. Peanut milk. Cashew milk. Milk-wholewheat shake\*. Orange-coconut milk\*. Coconut milk. Milk fruit shrub\*. Strawberry smoothie.\* Apricot shake\*. Anise milk\*. Milk smoothie\*. Fruit milk shake\*. Banana smoothie\*. Lemon egg nog\*. Honey egg nog\*. Carob milk\*. Carob smoothie. The recipes followed by an asterisk contain 2-4 cups cow's milk and no soy. Note 1. This is the earliest document seen (July 2013) that mentions "smoothie" or "smoothies" in connection with soy. All of the 22 recipes in the category titled "Smoothies" contain some kind of milk (either cow's milk or milk made from a seed-soy milk, almond milk, peanut milk, cashew milk, coconut milk, anise milk). About half of the smoothies contain fruits or fruit juices (orange juice, fresh berries, strawberries). None of the smoothies contain ice cream, frozen yogurt, or any other frozen dessert or frozen food. Therefore a smoothie seems to be like a milk shake but without the ice cream.

The recipe for "Milk-Soy Smoothie" (p. 27) reads: 4 cups milk. ½ cup soy flour. 4 tablespoons molasses. 2 eggs, raw. ½ teaspoon pure vanilla extract. 3 tablespoons nutritional yeast. Blend all ingredients. Serves 4-6.

The section titled "Nut butters (p. 29-30) gives a recipe for homemade peanut butter with "Variations: Homemade nut butter may be made from raw almonds, filberts, pignolias, walnuts (English and black), cashews, Brazil nuts, etc. Most of these nuts have enough oil so that no extra oil need be added." On p. 30 is a recipe for "Homemade peanut-sunflower seed butter."

By the time of the 19th printing, in Jan. 1974, this book had sold over one million copies.

Note 2. This is the earliest document or book seen (Dec. 2001) after 1960 with the term "natural foods" in the title.

Note 3. An advertisement for this book appeared in the July 1965 issue of *Natural Food and Farming* (p. 40). Address: White Mountains, New Hampshire [by July 1965: Hillsboro, NH 03244].

411. Montagné, Prosper. 1961. *Larousse gastronomique: The encyclopedia of food, wine & cookery*. New York, NY: Crown Publishers, Inc. 1101 p. See p. 925. Illust. Index. 26 cm. [Eng]

• **Summary:** The following are defined under "Soya Bean. *Soja*" (p. 925): Introduction. The soya bean is "the richest and cheapest source of vegetable protein." 1. Soya bean curd. *Fromage de soja*. Gives a completely inaccurate and useless description of how to make tofu at home. 2. Soya meat. *Viande de soja*. This "vegetarian meat," which resembles cooked ham, is said to be too complicated to make at home, but requires industrial equipment. 3. Soya milk. *Lait de soja*. 4. Soya sauce or extract. *Sauce, Extrait de soja*.

Note: This English-language edition is a translation from the original 1938 French-language edition by Nina Froud, Patience Gray, Maud Murdoch, and Barbara Macrae Taylor. Address: France.

412. *Chopletter (Worthington Foods, Ohio)*. 1962. A new concept in foods. 15(3):1, 3. July.

• **Summary:** "A new concept in protein foods has recently been announced by Worthington Foods. After years of research involving a unique process in the spinning of protein fibers, the Company has been successful in producing a food product with a texture and nutritional quality that are new and revolutionary. The new product is called *Fibrotein*, a name coined to identify the product and suggest its important qualities." Fibrotein is spun soy protein fibers, made under a patented process.

"Worthington Foods has already been successful in utilizing Fibrotein to make vegetarian protein foods that resemble fried chicken, white meat of turkey, roast beef, and various other kinds of meats. Several of these products are already on the market. Others are to be introduced during the next few months."

"As a direct result of the development of fibrotein, and new line of *Entrees* has been introduced by Worthington Foods. A line of canned vegetarian proteins is also being developed to be marketed under the trade name *Soyameat*. All of these products contain the basic ingredient of *Fibrotein*."

"The enthusiasm of customers who have already tried Worthington *Minute Entrees* and Worthington *Soyameat* indicates a bright future for this type of food.

A photo titled "Three New Fibrotein Products by Worthington" shows: (1) Sliced Whitemeat Style (Worthington Minute Entrees–Frozen; paperboard box); (2) Fried Chicken Style (Worthington Minute Entrees–Frozen; paperboard box); (3) Worthington Soyameat–Fried Chicken Style (9½ oz can).

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word "Soyameat" (with any combination of capitalization or quotation marks).

Note 2. This is the earliest document seen (Nov. 2010) that contains the word "Fibrotein" which is Worthington's registered trademark used to refer to spun soy protein fibers. Address: Worthington, Ohio.

413. **Product Name:** Worthington Minute Entrees–Fried Chicken Style (Meatless Chicken–Frozen).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio.

**Date of Introduction:** 1962 July.

**Ingredients:** Incl. Fibrotein spun soy protein fibers.

**Wt/Vol., Packaging, Price:** 6 oz. paperboard box. Or 15 lb.

**How Stored:** Frozen.

**New Product–Documentation:** *Chopletter (Worthington Foods, Worthington, Ohio)*. 1962. July. p. 1, 3. "A new concept in foods." This product, made with Fibrotein [spun soy protein fibers], is already on the market. A photo shows

the product.” Note: This is the earliest commercial soy product seen (one of three chicken alternatives introduced this month) in which Fibroprotein is used as an ingredient.

Wholesale price list. 1962. Oct. 1. Sold in 6 oz. portions (24 per case for \$9.90, or 15 lb bulk for \$1.25/lb). Note: No mention is made on this sheet of spun soy protein fibers.

George D. Kyd. 1963. *Food Processing*. May. p. 123-26. “Edible soy protein fibers promise new family of foods.” The author, an employee of Ralston Purina Co., states that this product, which contains Textured Edi Pro (spun soy protein fibers made by Ralston Purina) is already on the market. Page 126 describes the product as “frozen fried-chicken style Minute Entree.” These “are new but already fast-selling products, distributed largely through health food stores.” No photo of the package is shown.

Note: This is one of the world’s first three food products to contain a modern textured soy protein product.

**414. Product Name:** Worthington Minute Entrees–Sliced Whitemeat Style (Meatless Chicken White Meat–Frozen).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio.

**Date of Introduction:** 1962 July.

**Ingredients:** Incl. Fibroprotein spun soy protein fibers.

**Wt/Vol., Packaging, Price:** 6 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Chopletter (Worthington Foods, Worthington, Ohio). 1962. July. p. 1, 3. “A new concept in foods.” This product, made with Fibroprotein [spun soy protein fibers], is already on the market. A photo shows the product.”

Wholesale price list. 1962. Oct. 1. Sold in 6 oz. portions (24 per case for \$9.90 or bulk rolls, frozen, for \$1.25/lb). Rolls weigh approximately 8 lb. each and a packed 6 rolls per box. Note: No mention is made on this sheet of spun soy protein fibers.

George D. Kyd. 1963. *Food Processing*. May. p. 123-26. “Edible soy protein fibers promise new family of foods.” The author, an employee of Ralston Purina Co., states that this product, which contains Textured Edi Pro (spun soy protein fibers made by Ralston Purina) is already on the market. A photo shows the package—a thin paperboard box about 8 by 10 by 3/4 inch thick. The label states: “New frozen food concept. Serve hot or cold. Contains no meat.” A photo shows three meatlike slices on a plate. These “are new but already fast-selling products, distributed largely through health food stores.”

Soybean Blue Book. 1965. p. 112. “White Meat Style.”

Note: This is one of the world’s first three food products to contain a modern textured soy protein product.

**415. Product Name:** Soyameat–Fried Chicken Style (Canned).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio.

**Date of Introduction:** 1962 July.

**Ingredients:** In 1965: Specially processed soybean protein (Fibroprotein), corn oil, [egg] albumen, isolated soybean protein, salt, monosodium glutamate, vegetable gum, starch, hydrolyzed vegetable proteins, seasonings.

**Wt/Vol., Packaging, Price:** 9½ oz can. After 1965: 13 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Chopletter (Worthington Foods, Worthington, Ohio). 1962. July. p. 1, 3. “A new concept in foods.” This product, made with Fibroprotein [spun soy protein fibers], is already on the market. A photo shows the product.”

George D. Kyd. 1963. *Food Processing*. May. p. 123-26. “Edible soy protein fibers promise new family of foods.” The author, an employee of Ralston Purina Co., states that this product, which contains Textured Edi Pro (spun soy protein fibers made by Ralston Purina) is already on the market. A photo shows the can. The label states: “Worthington Soyameat. Vegetarian. 9¼ ozs. avd.” A photo, above the photo of the can, shows chunks of the chicken-like product on a plate. The caption below this photo reads: “Fried-chicken style shown above has realistic texture; it came from the can shown below.” These “are new but already fast-selling products, distributed largely through health food stores.”

Soybean Blue Book. 1963. p. 98. Wholesale price list. 1966. Dec. 1. Hartman. 1966. *Food Technology*. 20(1):39-40. “Vegetarian protein foods.” “The first textured soybean protein fiber product marketed in the U.S. is Worthington’s frozen ‘Fri-Chik,’ an extruded formulation simulating a small fried portion of white chicken meat. This same formulation was next canned in a light gravy and called ‘Soyameat–Fried Chicken Style,’ and was also later marketed as frozen and canned ‘White-Chik’ in large rolls for slicing, dicing, etc. The approximate analysis of these simulated chicken products: protein 20-26%, fat 18-25%, and carbohydrate 2-3%.”

Ziamba. 1966. *Food Engineering*. May. p. 82-93. “Let soy proteins work wonders for you.” Photo of 6 cans.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118.

“Soyameat–Fried Chicken-like flavor” is a canned chicken-like product based on spun soy protein fiber.

Note: This is one of the world’s first three food products to contain a modern textured soy protein product.

Label sent by Dr. Walter Wolf. 2000. July. Since the first ingredient is Fibroprotein (spun soy protein fibers), this label is probably from about 1965. Red, dark blue, and light blue on white. A small color photo shows two pieces surrounded by sprigs of parsley on a blue dish. “Vegetarian. The quick

and easy dish with a chicken-like flavor and texture. A new concept in foods.”

416. Worthington Foods, Inc. 1962. Frozen foods wholesale price list–order blank. Worthington, Ohio. 1 p. Oct. 1.

• **Summary:** Only two frozen products are available: Minute Entree–Fried Chicken Style (24 x 6 oz, or 15 lb). Sliced Whitemeat Style (24 x 6 oz or 8 lb rolls). Address: Worthington, Ohio. Phone: 885-5359.

417. *Soybean Digest*. 1962. New ADM research center. Dec. p. 24.

• **Summary:** “A promising area for Archer Daniels Midland Co. research is the fabrication of new foods from pure vegetable protein, said ADM vice president Dr. James C. Konen in an address at the dedication of ADM’s new Thomas L. Daniels Research Center at Bloomington, Minnesota, Oct. 31.

“‘Ground beef’ that looks and tastes like the real thing but is made from the soybean already is being test marketed, Dr. Konen said. In the laboratory, ADM has gone even further and turned out ‘baked ham’ and ‘turkey breast’ from soy protein.”

A photo shows the new center which has more than 100 laboratories, offices, and conference rooms, and facilities for 260 scientists, engineers and technicians.

418. **Product Name:** Madison Burger.

**Manufacturer’s Name:** Madison Foods.

**Manufacturer’s Address:** Madison College, Madison, Tennessee.

**Date of Introduction:** 1962.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Madison Burger contains 11.08% protein, 0.47% fat, and 4.67% carbohydrate. One serving, ½-inch slice, weighs 76 gm.

Letter from Sam Yoshimura. 1981. Feb. 20.

419. **Product Name:** [Seitan].

**Foreign Name:** Seitan.

**Manufacturer’s Name:** Marushima Shoyu K.K.

**Manufacturer’s Address:** Kamigata-dori Ko 881, Uchiyumi-cho, Shodo-gun, Kagawa-ken, Japan.

**Date of Introduction:** 1962.

**Wt/Vol., Packaging, Price:** 3.5 oz jar.

**How Stored:** Shelf stable.

**New Product–Documentation:** Note: This is the world’s earliest known commercial seitan product. It was first imported to the USA by Erewhon Trading Co. in 1969.

Talk with Aveline Kushi. 1992. April 9. The first seitan imported to America was made by Marushima Shoyu Co. on Shodoshima in Japan. George Ohsawa went to visit the company, talked with Mr. Mokutani (who is still the chairman, and a close friend of the Kushis, and a great

admirer of Ohsawa), and showed him how to make it. Marushima began to make seitan commercially in the late 1960s. It was imported to America by Muso Shokuhin at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. This seitan probably started to be imported to America in about 1969.

Letter (fax) from Yuko Okada of Muso Co. Ltd., Japan. 1992. July 2. “I remember the term ‘seitan’ since I was a kid; it was probably coined by George Ohsawa. *Sei* means ‘is’ and *tan* is the first character in the Japanese term *tanpaku*, which means ‘protein.’ So *seitan* means something like ‘right protein substitute.’ Marushima Shoyu Co. developed seitan commercially in Japan and Muso has carried their seitan since Feb. 1966 when we started. We shipped seitan to Erewhon on a regular basis from 1968. [Note: Kotzsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] We also exported it to Chico-San [in the USA]. In Europe, we exported seitan to Paris, France.” This seitan went to Institut Tenryu, which had a little macrobiotic food shop in Paris run by Madame Françoise Riviere. The first seitan Muso exported to Australia went to Spiral Foods.

Muso Shokuhin. Pure Heart–Muso general catalogue. 1990 July. p. 41. A color photo shows a 180-gm jar of Seitan. The product name is written in English (i.e., in roman letters). Under that, it is written smaller in katakana. Above the company name and address is written: “Sakurazawa Nyoichi shido” which means, “Made under the guidance of George Ohsawa.”

Talk with Mr. Kiyoshi Mokutani, president of Marushima Shoyu K.K. in Japan. 1992. July 12. “The invention and development of seitan in Japan.” He invented seitan in 1961-62 and took a sample to George Ohsawa, who coined the term “seitan” upon seeing it. Commercial production began in 1962. For details, see interview.

420. Madison Foods. 1962? The story of Madison Foods. Madison, Tennessee. 17 p. Undated. 22 x 10 cm.

• **Summary:** Contents: The early history of Madison and the story of Madison Foods. Early pioneers (with photo taken in about 1909 including W.C. White, Ellen G. White, Mr. and Mrs. Edson White, P.T. Magan, Mother Druillard, and E.A. Sutherland). Industries. Madison hospital offers you. Tasty, healthful Madison Foods: High in proteins (cans of the following are shown): Cheze-O-Soy, Com-Pro, Dinner Morsels, Kreme-O-Soy, Madison Burger, Madison Links, Not Meat, Soy Beans in Tomato Sauce, Nu-Steaks, Stakelets, Soyburger, Yum, Vigorost, Zoy-Koff.

The home of Madison Foods. Dr. Claxton (former U.S. Commissioner of Education) says. Dr. P.A. Webber. Madison College is vegetarian. Madison meat alternates for

all. Kreme-O-Soy (a new double-strength milk-like canned beverage).

J.B. Craw (with photo), manager of Madison Foods, says: "New life has come to Madison Foods! The expansion program is moving forward. In fact, the entire food factory is being remodeled; new equipment is steadily and carefully being installed, and new products manufactured.

"Kreme-O-Soy, double strength liquid, is now on the market. It is an entirely New soy milk, an entirely New Formula... in a little while we will have a powdered soy milk.

"We are glad to have H. Willis Miller, Jr., the son of H.W. Miller (China Doctor) with us. Willis is doing a wonderful job of engineering in the placing and manufacturing of newly designed equipment to fit our special need for the new products that will be coming out one by one. We will soon have a modern plant of which we can be very proud."

Other new products: Madison Links, Com-Pro. A message from the president: Ralph M. Davidson (with photo).

Note: He was president of Madison College from 1961 to 1963).

President Davidson notes: "Madison Foods, an integral part of the college educational program accomplishes a three-fold mission. First, the food factory furnishes remunerative work for students to earn their way in school. Secondly, it provides a laboratory where the student may learn to do useful work with his hands, thus giving him a balance to his educational program. Thirdly, the successfully operated food factory will bring in means to subsidize the educational and instructional departments of the college."

Other photos show (see next page): (1) The Madison Foods factory. (2) Various other school buildings. (3) E.A. Sutherland. (4) Ellen G. White. (5) Students making foods in the food factory. (6) Dr. Perry Webber with many canned Madison Foods. (7) Four close-ups of a can of Kreme-O-Soy. (8) Group photo: Sam Yoshimura (production manager), P.A. Webber (PhD, consultant in chemistry and nutrition), J.B. Craw (manager), Dr. Harry W. Miller (the China Doctor), and Frank Miller (sales dept.). Address: Madison, Tennessee.

421. Kyd, George H. 1963. Edible soy-protein fibers promise new family of foods. *Food Processing (Chicago)* 24(5):122-26, 138. May.

• **Summary:** "Products amazingly like meat such as the ham-like product shown below and the chicken-style products shown on page 124 can be fabricated from protein fibers shown opposite" (in a full-page photo), magnified slightly more than two times. Ralston Purina now makes "Textured Edi Pro," an edible spun soy protein fiber made from "an isolated edible soy protein that is almost pure protein. It contains no fat."

Page 124 has the heading: "Is the web of spun soy-protein fibers first of the modern superfoods? Meat-like production. These Textured Edi Pro foods—already on the market—look, taste, and chew amazingly like the meat item they so closely resemble, yet they may have a fat content as low as a fraction of one per cent, and a protein content of almost any level desired." Photos show packages and labels of Chicken Style Roll (Minute Entrees, refrigerated roll), Worthington Soyameat Fried-Chicken Style (canned), Worthington Sliced Whitemeat Style (Frozen Minute Entrees). Shown without a package or label are a ham-shaped, ham-like product [Wham].

Page 126 states: "Tons of the textured product [Textured Edi Pro] each week go into the following products made by Worthington Foods: canned 'Soyameat': refrigerated Chicken-Style Roll; frozen fried-chicken style Minute Entree; and frozen chicken whitemeat style Minute Entree. These products resemble chicken meat in taste and texture. They are new but already fast-selling products, distributed largely through health food stores."

"The edible soy protein work is being carried on under the direction of Dr. H.L. Wilcke, Purina Research Vice

President, and D.B. Walker, Vice President in charge of the Soybean Division. Two nationally known scientists who have pioneered soy development have performed much of the development work. They are Robert A. Boyer and Francis E. Calvert. Both at one time were associated with Henry Ford, and, through him, with Thomas A. Edison.

“The work has been coordinated under supervision of W.E. Tjossem, Manager of Purina’s Special Soy Products Department, and W.B. Brew, Manager of Special Products Research. Ralston Purina is the largest manufacturer of animal rations, and one of the principal processors of soybeans in this country [USA]. Textured Edi Pro and Edi Pro are developments of Ralston Purina Company, Checkerboard Square, St. Louis 2, Missouri.”

“Fifty million people in the U.S... are not able to eat the meat of animal or fowl some or all of the time by reason of their religions, restrictions of their doctors, or by personal preferences. For these many millions who for one reason or another cannot eat meats, the Textured Edi Pro meat-like products will supplement the supply of food items which they approximate... The versatility and adaptability of these new edible soy products make them ‘the most exciting and most promising group of new foods of this decade,’ says Purina vice president D. B. Walker. ‘They are so characteristic of present health theories that they are likely to establish themselves in diets of the future. And the meat-like products will find an eager market among those 50 million who can’t eat real meat.’”

Note: This is the earliest English-language document seen (March 2009) that mentions Textured Edi Pro, made from spun soy protein fiber. Address: Ralston Purina Co., St. Louis, Missouri.

**422. Product Name:** Chicken Style Roll–Worthington Minute Entrees (Meatless; Resembles White Chicken Meat).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085.

**Date of Introduction:** 1963 May.

**Ingredients:** 1990: Textured vegetable protein (soy protein isolate and concentrate), egg whites, soybean and/or corn oil, salt, flavorings (hydrolyzed vegetable protein, onion powder, turmeric, spice extractives), monosodium glutamate, carrageenan, niacinamide, iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), artificial color, vitamin B-2 (riboflavin), vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** George D. Kyd. 1963. *Food Processing*. May. p. 123-26. “Edible soy protein fibers promise new family of foods.” The author, an employee of Ralston Purina Co., states that this product, which contains Textured Edi Pro (spun soy protein fibers made by Ralston Purina) is already on the market. A photo shows

the product—a cylindrical roll about 2½ inches in diameter and 10 inches long. The label states: “Chicken Style Roll–Worthington Minute Entrees.” One end of the roll has been sliced, slivered, and diced. Page 126 describes the product as “refrigerated Chicken-Style Roll.” These “are new but already fast-selling products, distributed largely through health food stores.”

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Chicken Roll is a frozen product based on spun soy protein fiber. Each roll weighs 72 oz.

Manufacturer’s catalog. 1984, undated. Frozen Products. Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

423. Rosenvold, Doris; Rosenvold, Lloyd. 1963. Rx recipes: A guide to healthful food preparation. Montrose, Colorado: Rosenvold Publications. Citadel Agencies, P.O. Box 135, Fairfield, Washington 99012. vii + 186 p. No index. 23 cm. Spiral bound.

• **Summary:** This vegan cookbook contains no foods from animal sources except honey. It was developed primarily to help patients with food allergies and cardio-vascular problems. Soy milk, soy flour, soy grits, and [whole dry] soy beans are used extensively throughout the book.

Chapter 9, “Milk and Cream Substitutes,” gives recipes for pecan milk, unsweetened walnut milk, almond cream, coconut milk, homemade soybean milk, Loma Linda Soyagen (powdered), cashew cream, cashew milk, and walnut milk.

Chapter 11, “Entrees,” contains recipes for: Creamed soy beans. Green soy beans. Supreme loaf (with Vegeburger plus Yeastex or Savita). Walnut roast (with rich soy milk). Scrambled “eggs” with Smokene (and soy cheese/To-fu). Scrambled “eggs” with chives (with soy cheese [tofu] and soy milk). To-fu with mushrooms. Baked rice and cheese (with to-fu). Scrambled “eggs” plain (with soy cheese [To-fu] and rich soy milk). Soy beans (boiled). Soy bean croquette (with “2 c. soy bean puree”). Soy bean loaf (with “2 c. mashed cooked soy beans”). Soy bean patties (with “1 c. soy cheese” [tofu]). Baked soy beans.

Chapter 19, “Foreign Dishes,” contains a recipe for “How to make to-fu” (using Loma Linda Soyagen powder, curded with lemon juice), plus two tofu recipes. The companion volume to this book is titled *Nutrition for Life*.

**424. Product Name:** Prosage (Meatless Sausage Based on Spun Soy Protein Fibers) [Links, Patties, or Roll].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1963 October.

**Ingredients:** In 1971: Water, wheat protein [wheat gluten],

soya protein, corn oil, albumin [egg protein], dextrose, salt, hydrolyzed vegetable protein, MSG, vegetable gum, flavorings.

**How Stored:** Frozen.

**New Product–Documentation:** Soybean Blue Book. 1965. p. 112. “Prosage.” Buller & Klis. 1965. *Food Processing*. 26(9):115-17, 120. Sept. “Spun Soy Protein Foods Get Supermarket Sales Test.” Prosage, a meatless sausage resembling pork sausage, is made with spun soy protein fibers. A photo shows a man rolling a rack of Prosage into a room for quick freezing. “A 1½ ounce of Prosage can be fried without any loss in size or weight, as contrasted with 30 to 40 per cent shrinkage of pork sausage.”

Ziamba. 1966. *Food Engineering*. May. p. 82-93. “Let soy proteins work wonders for you.” Photo of package.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 163. Lists the ingredients in “Prosage (Worthington).” This is an institutional product.

Ad (½ page) in *Better Nutrition*. 1974. Dec. p. 43. “New meatless Prosage Links.” A photo shows the package.

Manufacturer’s catalog. 1984, undated. Frozen Products. Label reads: “Vegetable Protein Food. Artificial Sausage Flavor.” Spot in *Soybean Digest*. 1970. April. p. 9. “50% less calories and 75% less fat in Prosage.” The product is being test marketed in Columbus, Ohio and South Bend, Indiana.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a frozen sausage-like product based on spun soy protein fiber.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 176. The ingredients in “Prosage, frozen (Worthington)” are “wheat protein, corn oil, soy protein concentrate, oats, albumen [egg protein], corn syrup solids, artificial flavors, soy protein, yeast extract, salt, HVP, malt extract, vegetable gum, sucrose, caramel coloring, niacin, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.”

Worthington Foods. 1989. “The Tradition of Healthy Foods” (50th anniversary booklet). p. 21-22. Worthington’s first products made with spun soy protein fibers were White Chik, Beeflike, Prosage, Stripples, and Holiday Roast (with a plastic wishbone). All were hits and sales took off. These products were sold frozen. In “October 1963 a series of television, radio and newspaper advertisements featuring the new frozen foods was introduced.”

Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18.

Talk with Ron McDermott of Worthington Foods. 1992. Oct. 23. In 1968-70 Worthington developed a new generation of products containing wheat gluten; the first of these was Prosage (rhymes with “Sausage”). For the first time, fresh (not dried) wheat gluten was combined with spun soy protein fibers and textured soy protein concentrates to give improved texture, flavor, and nutritional value (through

protein complementarity). Later the spun soy protein fiber was removed but the textured concentrate remained. Miles Laboratories, which bought Worthington in March 1970, did a lot of further development on Worthington’s products; Breakfast Links, Breakfast Patties, etc. Morningstar Farms Breakfast Patties, a meatless sausage, which are an improved version of Prosage, were introduced to the mass market in 1974, still featuring the gluten-soy combination.

425. **Product Name:** White-Chik (Meatless Chicken Based on Spun Soy Protein Fibers–Frozen).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085.

**Date of Introduction:** 1963 October.

**Ingredients:** Specially processed soybean protein (Fibrotein), corn oil, [egg] albumen, isolated soy protein, salt, monosodium glutamate, vegetable gum, trisodium phosphate, seasonings.

**Wt/Vol., Packaging, Price:** Paperboard box or canned.

**How Stored:** Frozen.

**Nutrition:** Protein 20-26%, fat 18-25%, carbohydrate 2-3%.

**New Product–Documentation:** Buller & Klis. 1965. *Food Processing*. 26(9):115-17, 120. Sept. “Spun Soy Protein Foods Get Supermarket Sales Test.” “White-Chik” is “simulated white meat chicken” based on spun soy protein fiber. A photo shows the thin paperboard box in which it is sold, frozen.

Hartman. 1966. *Food Technology*. 20(1):39-40. “Vegetarian protein foods.”

“The first textured soybean protein fiber product marketed in the U.S. is Worthington’s frozen ‘Fri-Chik,’ an extruded formulation simulating a small fried portion of white chicken meat. This same formulation was next canned in a light gravy and called ‘Soyameat–Fried Chicken Style,’ and was also later marketed as frozen and canned ‘White-Chik’ in large rolls for slicing, dicing, etc. The approximate analysis of these simulated chicken products: protein 20-26%, fat 18-25%, and carbohydrate 2-3%.”

Ziamba. 1966. *Food Engineering*. May. p. 82-93. “Let soy proteins work wonders for you.” Photo of box.

Worthington Foods. 1989. “The Tradition of Healthy Foods” (50th anniversary booklet). p. 21-22. Worthington’s first products made with spun soy protein fibers were White Chik, Beeflike, Prosage, Stripples, and Holiday Roast (with a plastic wishbone). All were hits and sales took off. These products were sold frozen. In “October 1963 a series of television, radio and newspaper advertisements featuring the new frozen foods was introduced.”

Talk with Dick Leiss, Director of R&D at Worthington Foods. 1993. June 30. This was an early product that contained spun soy protein fiber but was not deep fried. The un-fried product was sold in 2 forms: A large frozen roll (3-4 lb) or slices of it canned in a light broth.

Label (undated) sent by Dr. Walter Wolf. 2000. July. Since the first ingredient is Fibroprotein (spun soy protein fibers), this package is probably from about 1965. Red and white on dark blue. A large color photo on the front panel shows slices of White-Chik served with a few vegetables on a serving dish. On the front panel: “Minute main courses. Foods for 4. New frozen food concept. Contains no meat. Like white meat? Yes ma’m!”

**426. Product Name:** Soya Meat–Beef Like, or–Chicken Like (Based on Spun Soy Protein Fibers).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085.

**Date of Introduction:** 1963 October.

**Ingredients:** Incl. spun soy protein fibers.

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104. Soya Meat–Beef like and Chicken each contain 17.23% protein, 13.61% fat, and 6.37% carbohydrate. One serving, 1 slice, weighs 35 or 36 gm, respectively.

Soybean Blue Book. 1965. p. 112. “Canned and frozen soyameats, white meat style, fried chicken style, prime, prime-smoked and chipped, prosage, saucettes, wham, and veja-links.”

Worthington Foods. 1989. “The Tradition of Healthy Foods” (50th anniversary booklet). p. 21-22. Worthington’s first products made with spun soy protein fibers were White Chik, Beeflike, Prosage, Stripples, and Holiday Roast (with a plastic wishbone). All were hits and sales took off. These products were sold frozen. In “October 1963 a series of television, radio and newspaper advertisements featuring the new frozen foods was introduced.”

**427. Product Name:** Loma Linda Sandwich Spread (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1963.

**Ingredients:** In 1975: Minced olives, peanut meal, legumes, tomato puree, soy flour, flaked 100% wheat meal, bell peppers, soy sauce, yeast extract, salt, MSG, onion, flavoring.

**Wt/Vol., Packaging, Price:** 14 oz (397 gm) can. Retail for \$2.40 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104. Sandwich Spread contains 12.90% protein, 16.50% fat, and 7.4% carbohydrate. One serving is 3 tablespoons.

Loma Linda Food Co. 1969. “Wholesale Price List.” L.L. Sandwich Spread is now sold in 4.75 oz and 14 oz cans.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The ingredients in “Sandwich Spread (Loma Linda)” are given.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. The ingredients are now: Water, olives, peanut butter, garbanzos, tomato puree, soy flour, red peppers, natural (vegetable) flavors, salt, dextrose, onion powder, caramel color, vitamins [niacinamide, D-calcium pantothenate, thiamine (vitamin B-1), vitamin B-6, riboflavin (vitamin B-2), vitamin B-12], spices. Label printed Sept. 1989.

**428. Product Name:** Loma Linda Little Links (Meatless Frankfurters).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce Place, Riverside, CA 92515.

**Date of Introduction:** 1963.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, vegetable oil, brown rice, defatted wheat germ, dried yeast, soy protein, salt, potato flour, onion powder, MSG, lecithin, caramel color, hydrolyzed vegetable protein, garlic powder, lepine, seasonings.

**Wt/Vol., Packaging, Price:** 14 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104. Little Links contain 16.60% protein, 12.17% fat, and 5.82% carbohydrate. One serving, 2 links, weigh 47 gm.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan. 3rd ed.* p. 161. Lists the ingredients in “Little Links (Loma Linda).”

Note: This is the earliest English-language document seen (Aug. 2003) that uses the term “Loma Linda Little Links” to refer to meatless soy hot dogs.

**429. Product Name:** Loma Linda Linketts (Meatless Frankfurters). Renamed Linketts by 1965.

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA

92515.

**Date of Introduction:** 1963.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, vegetable oil, dried yeast, salt, soy flour, MSG, caramel, onion powder, lysine, garlic, U.S. certified color, seasonings.

**Wt/Vol., Packaging, Price:** 20 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 1988: Per 2 links (2.6 oz–74 gm): Calories 150, protein 15 gm, carbohydrate 5 gm, fat 8 gm, cholesterol 0 mg, sodium 340 mg, potassium 75 mg.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual, 2nd ed.* p. 104. Linketts contain 18.70% protein, 10.38% fat, and 5.70% carbohydrate. One serving, 1 link, weighs 42 gm.

Note: This is the earliest English-language document seen (Aug. 2003) that uses the term “Loma Linda Linkettes” to refer to meatless soy hot dogs.

Loma Linda Food Co. 1969. “Wholesale Price List.” Linketts are now sold in 13 oz and 20 oz cans. Big Franks are sold in 20 oz cans. And Little Links are sold in 14 oz cans.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 161. Lists the ingredients in “Linketts (Loma Linda).”

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned frankfurter-type product.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 4th ed. p. 175. The ingredients in “Linketts (Loma Linda)” are “Wheat protein [wheat gluten], soy oil, dried yeast, salt, HVP, soy protein concentrate, flavoring, defatted soy flour, mono- and diglycerides of vegetable origin, lecithin, L-lysine, onion powder, caramel, artificial color, garlic powder, hickory smoke flavor.”

Recipe booklet. 1979.

Label sent by Loma Linda Foods. 1988. Oct. 5.

Ingredients for Linketts are now: Wheat gluten, corn oil, water, dried yeast, soy protein concentrate, artificial and natural (vegetable) flavors, soy flour, vegetable mono- and di-glycerides, soy lecithin, L-lysine, onion powder, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Broth: Water, salt. This product was introduced in 1982. A less sophisticated version of this product with the same name was introduced in 1953.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan.* 7th ed. Appendix A.6-27.

**430. Product Name:** Loma Linda Stew-Pac (Meatless Stew).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1963.

**Ingredients:** Wheat gluten, corn oil, water, oat flour, soy protein concentrate, dried yeast, onion powder, soy lecithin, caramel color, natural (vegetable) flavors, L-lysine, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin.)

Stew broth: Water, natural (vegetable) flavors, salt, dextrose, L-lysine, onion powder.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 2 oz (57 gm): Calories 70, protein 10 gm, carbohydrate 4 gm, fat 2 gm, cholesterol 0 mg, sodium 220 mg, potassium 60 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1963.

**431. Product Name:** Loma Linda Redi-Burger (Meatless Hamburger).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1963.

**Ingredients:** Wheat protein [wheat gluten], soy oil, defatted wheat germ, yeast extract, brown rice, soy flour, salt, potato flour, onion powder, MSG, lecithin, caramel color, HVP, garlic powder, L-lysine, flavoring.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per ½ inch slice (2.4 oz–68 gm): Calories 130, protein 14 gm, carbohydrate 5 gm, fat 6 gm, cholesterol 0 mg, sodium 370 mg, potassium 120 mg.

**New Product–Documentation:** A less sophisticated version of this product was first introduced in 1953. Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Redi-Burger contains 21.80% protein, 12.20% fat, and 8.58% carbohydrate. One serving, ½-inch slice, weighs 75 gm.

Loma Linda Food Co. 1969. “Wholesale Price List.” Redi-Burger is now sold in 19 oz cans.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 176. The

ingredients in “Redi-Burger (Loma Linda)” are given.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1963. A less sophisticated version of the same product with the same name was introduced in 1953. The ingredients are now: “Wheat gluten, corn oil, water, wheat germ, rice flour, dried yeast, soy flour, natural (vegetable) flavors, potato flakes, onion powder, oat flour, caramel color, salt, soy lecithin, wheat flour, garlic powder, L-lysine, soy protein isolate, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).”

**432. Machida, Yoshiro.** 1963. Daizu tanpaku sooseeji seizô-hô [Production of a soy protein sausage]. *Japanese Patent* 319,141. [Jap]\*

**433. Tanaka, Heihachi; Nicholas, Betty.** 1963. The pleasures of Japanese cooking. Englewood Cliffs, New Jersey: Prentice Hall, Inc. viii + 247 p. Illust. Index. 22 cm.

• **Summary:** Contents: Introduction. 1. A chat about Japanese food: Seasonings and flavorings, table settings and utensils, kitchen utensils, etiquette, cooking and serving a Japanese meal. 2. Appetizers. 3. Soups. 4. Broiled dishes. 5. Steamed dishes. 6. Saucepan foods. 7. Fried foods. 8. Salads. 9. Vegetables. 10. Rice and noodle dishes. 11. Thirst-quenchers. 12. Desserts. 13. Festival foods. Glossary [of Japanese foods and utensils]. List of retail outlets for Japanese food products (national chains and alphabetically by state in the USA).

The book begins (p. 1): “To many Westerners, the cuisine of Japan consists almost entirely of *sukiyaki*, *tempura*, rice and soy sauce. Nothing could be further from the truth.”

Vegetables “are harvested at the height of their season,” when tender and full of flavor, then cooked lightly and used (for example) “as an ingredient in *misoshiru* (thick soup [miso soup]) or pickled” (p. 3).

“If one were to single out the most important vegetable cultivated in Japan it would be the soybean. For this legume,... is such a versatile food that it is served in some manner at practically every Japanese meal.

“In the hilly interior of the country where fish is scarce, or in the vegetarian menus of the Buddhists, soybeans are called the ‘fish of the field’ and relied upon as a valuable source of protein. A favored way of preparing the green soybean is simply to boil and hull it. Dried soybeans are ground [sic, soaked before grinding], soaked in water, cooked and mashed, sieved through silk, and finally cooked again to produce bean curd or *tofu*.

“Steamed and fermented beans become *natto*. *Miso*, a bean paste made by boiling soybeans, mashing them, adding wheat ferment [sic] and salt and allowing this mixture to ferment for several months, lends itself to use in countless dishes. *Moyashi*, the tender young sprouts of the soybean, are

cultivated on indoor racks to conserve precious space in the fields.” In a few days, a single cup of soybeans will produce 3-4 pounds of succulent sprouts (p. 3-4).

“Queen of Japanese seasonings is *shoyu* or soy sauce, a dark, red-brown, thirst-provoking liquid made from wheat or barley, soybeans, salt and water. *Shoyu* is loved by the Japanese for its piquant flavor and its use is so extensive that almost no dish is conceivable without it.” A brief history of *shoyu* and its forerunner, *hishio*, and the process for making *shoyu* are given. *Shoyu* “mash is allowed to ferment and mature naturally for a full eighteen months when it is pressed and the sauce obtained pasteurized to become refined *shoyu*.”

“Another multi-purpose seasoning and foodstuff is *miso*, a paste made from fermented rice and soybeans.” Most *miso* “lasts for years without spoiling or deteriorating. There are two types of *miso*—red and white. Both are widely used in Japan but western palates seem to prefer the white type. Both are highly nutritious and are used in literally hundreds of ways: as a seasoning, a main dish and the basis of many hearty, potage-type soups” (p. 5-6).

“For centuries [sic] Japanese cooks have used a dashi of *aji-no-moto*, a seaweed or vegetable protein derivative, to intensify the natural flavors of the foods they cooked. Translated, *aji-no-moto* means ‘essence of taste’ (it is often referred to as taste powder) because the minute white crystals heighten the inherent flavors of foods,... but lending no flavor of their own” (p. 6).

Yakimono are broiled foods. “Flavor broiling includes *yakitori* (broiled chicken), *teriyaki* (fish marinated in a sauce containing *shoyu* and then broiled),... Miso-broiling is used for such vegetables as eggplant as well as for fish or meat” (p. 13).

“Inasmuch as *shoyu*, or soy sauce, is such an all-important seasoning and is called for in almost every Japanese recipe, it should be noted that the use of genuine *shoyu* is quite essential. Most other soy sauces, while excellent for other types of cuisine, really don’t do justice to Japanese cooking” (p. 19). Also discusses wasabi, sesame seeds, sesame oil, katsuobushi, konbu, sake, and various mushrooms (p. 20-22).

“*Tofu*, or soybean curd, is such a versatile foodstuff—it may be boiled, fried, steamed, sautéed or marinated—that it is included as an ingredient in many recipes in this cookbook. Fresh *tofu* is sold in cakes; refrigerated, it will keep about one week. It is also available in cans and, while the processed product is not quite as tender as the fresh, it does make a satisfactory substitute. The consistence of *tofu* resembles thick custard and it should be handled carefully to avoid breaking and crumbling. Western taste buds seem to find *tofu* bland and a bit flavorless, but when deftly sauced it is very delicious—and also nutritious. Note: *tofu* must not be overcooked or it will toughen and develop a rubbery texture” (p. 24).

Recipes include: Norimaki-Sushi (with nori, *shoyu*,

and sashimi). Tiny teriyaki (ingredients: 2 pounds beef tenderloin, 1 cup *shoyu*, 3/4 cup water, 1/2 cup mirin, 3/4 cup honey, 1 clove garlic, crushed, and 1 one-inch piece fresh gingerroot, grated; p. 46). Liver tsukudani (with *shoyu*; p. 55). Fish and tofu stew (p. 69). Oyster miso (p. 71). Vegetable and noodle miso (p. 72). Shrimp or prawn miso (p. 73).

Chapter 4 is titled “Broiled foods.” “... almost all cooking in Japan is done over a charcoal fire,...” “Without a doubt, the most popular of all broiled dishes with the Japanese people is *yakitori*, or broiled chicken... Almost as popular as *yakitori* is *teriyaki*, usually fish marinated in a *shoyu* sauce, arranged on long skewers, and then broiled over charcoal. *Teriyaki* means ‘glaze broiled’—*teri* meaning ‘shiny’ and *yaki* ‘broiled’ or ‘roasted.’ Actually any meat may be *teriyaki*,” but all have in common “the marinade of *shoyu*, sake, and sugar” (p. 75-76). Recipes include: Salmon teriyaki. Shrimp teriyaki. Stuffed beef teriyaki (p. 88-90). *Shoyu* marinade basting sauce (p. 93). Sukiyaki (with tofu and *shoyu*; p. 110). Tempura sauce (with *shoyu*, p. 121). Fried tofu with sauce (p. 127). Pickled seaweed (with konbu and *shoyu*, p. 140). Sesame-*shoyu* dressing (p. 151). Vegetables with *tofu* sauce (p. 154). Cabbage with mustard-*miso* sauce (p. 157). Eggplant with *miso* sauce (p. 164). Azuki meshi (red beans and rice; p. 181). Domburi soboro (with *tofu*; p. 182-83). “Red bean paste (sweetened).” Ingredients: “2 cups red beans (azuki). 2 cups sugar. 2 teaspoons salt.” (p. 203.) Also called “sweetened red bean paste” (p. 200; Jap. *azuki an*; p. 200-203). Yokan (with “1 1/2 cups strained red bean paste”—*koshi-an*; p. 204). Hikishamanju (Bean jam buns with strained red bean paste; p. 207). Shiruko (Red bean soup [azuki] with rice cakes {mochi}; p. 209). Zoni (Rice cake soup, with mochi; p. 215-16). Sweetened soybeans (for New Year’s, p. 217-18).

The glossary includes abura-age, azuki (“red beans”), azuki-an (“red bean paste”), daizu (soybean), ganmodoki, kanten, konbu, konnyaku, miso (aka miso, shiro miso), misoshiru, mochi, mochigome, mochiko, nori, shiru-miso, *shoyu*, teriyaki, *tofu*, wakame, yakidofu.

Note: This is the earliest English-language document seen (March 2006) that uses the term “sweetened red bean paste” to refer to sweet azuki bean paste [*azuki-an*] or that uses the term “strained red bean paste” to refer to strained azuki bean paste [*koshi-an*]. Address: 1. Head Chef, Japanese Cuisine, Japan Airlines.

**434. Product Name:** Pro-Dell Protein Loaf: A Ham Flavored Protein Food (Meatless & Ready to Use).

**Manufacturer’s Name:** Brown’s Frosted Foods.

**Manufacturer’s Address:** Philadelphia, Pennsylvania.

**Date of Introduction:** 1964 January.

**Ingredients:** Soy bean protein (spun soy protein isolate), dried egg white, skim milk powder, sugar, hydrolyzed vegetable protein, dried yeast, salt, water, carrageenan,

vegetable mono and diglycerides, monosodium glutamate, sodium phosphate, artificial coloring and flavoring, propylparaben (added as a preservative).

**How Stored:** Refrigerated.

**New Product–Documentation:** *Quick Frozen Foods*. 1964. “Protein controlled simulated meat concept opens unlimited frozen potential: Food of tomorrow, today.” Jan. A black-and-white photo shows two large loaves of the refrigerated product based on spun soy protein fiber, which is produced under a license from Ralston Purina Co. The Label is clearly visible but the list of ingredients is not legible. However the article lists the product’s ingredients.

435. *Quick Frozen Foods*. 1964. Protein controlled simulated meat concept opens unlimited frozen potential: Food of tomorrow, today. 26(6):79-82. Jan.

• **Summary:** A whole array of new simulated meats are made from edible soy protein, in the form of spun soy protein fibers, as the basic ingredient. Two companies are presently marketing these new foods: Worthington Foods, Inc., Worthington, Ohio, and Brown’s Frosted Foods, Inc., Philadelphia, Pennsylvania. A table lists nine “Major advantages of soy protein ‘meat.’”

Worthington has registered the trademark “Fibrotein” to identify its edible soy fibers, which are produced thanks to the aid of a “revolutionary, scientific breakthrough which has converted the soy bean into a magic wonder-bean capable of playing a number of profitable roles.” Worthington’s president James L. Hagle discusses the nutritional and economic advantages of his company’s new foods. Allan R. Buller, general manager, describes how Fibrotein is made using a viscous liquid of soy protein that is “extruded under pressure through platinum spinnerettes having holes 1/4000th of an inch in diameter.” The resulting fine filaments of protein are “formed into a ‘tow’ which can be cut, twisted, chopped, or rolled into various forms for use in foods.”

Note: This is the earliest English-language document seen (March 2009) that uses the word “spinnerettes” (or “spinnerette”) in connection with edible spun soy protein fibers.

Mr. Buller’s firm has been successful in using Fibrotein to make frozen vegetarian foods that resemble fried chicken (Fri-Chik, 8 oz carton), white turkey meat (White-Chik, 8 oz carton), roast beef slices (Prime, 8 oz carton), and ham (Wham). Worthington has entered the frozen field with a new line of vegetarian foods it calls “Minute Entrees.” Worthington also makes Prosage (like sausage) packed in 1 pound casings.

Worthington is also making seven frozen foods for the institutional market, including chicken style rolls (8 lb roll), chicken sliced or diced white meat (5 lb packages), and fried chicken style (1¼ oz portions). The firm also makes a canned line under the brand “Soyameat.”

Photos show: (1) Prime, smoked and chipped, in a 4 oz

transparent pouch. (2) A Chicken Style Roll next to a deli slicer. (3) An 8 oz carton of Fri-Chik. (4) An 8 oz carton of Prime. (5) A roll of Prosage.

436. **Product Name:** Prime (Slices), Prime-Smoked and Chipped (Meatless Meats).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1964 January.

**Ingredients:** Fibrotein (soybean protein), water, corn oil, vegetable shortening, [egg] albumen, hydrolyzed vegetable protein, salt, caramel coloring, monosodium glutamate, flavorings, U.S. certified color.

**Wt/Vol., Packaging, Price:** 8 oz. Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** *Quick Frozen Foods*. 1964. “Protein controlled simulated meat concept opens unlimited frozen potential: Food of tomorrow, today.” Jan. Fibrotein is the basic ingredient in Worthington’s new “Meat-like but meat-free foods.” A photo shows a package of “Prime” identical to that sent by Dr. Wolf in July 2000.

Soybean Blue Book. 1965. p. 112.

Buller & Klis. 1965. *Food Processing*. 26(9):115-17, 120. Sept. “Spun Soy Protein Foods Get Supermarket Sales Test.” A photo shows the thin paperboard box in which Prime is sold, frozen, and a plastic bag in which it is sold in granular form.

Ziamba. 1966. *Food Engineering*. May. p. 82-93. “Let soy proteins work wonders for you.” Photo.

Label (undated) for Prime (slices), Beef flavor sent by Dr. Walter Wolf. 2000. July. Since the first ingredient is Fibrotein (spun soy protein fibers), this package is probably from about 1964. Red and white on dark blue. A large color photo on the front panel shows the slices served with a few vegetables on a white serving dish. On the front panel: “Minute main courses. Foods for 4. New frozen food concept. Contains no meat. Like beef? Yes ma’ m!”

437. Madison Foods. Div. of Worthington Foods, Inc. 1964. Wholesale price list–order blank. Worthington, Ohio 43085. 1 p. July 1.

• **Summary:** Products in Madison Foods line (now owned by Worthington Foods) include: Cheze-O-Soy [canned tofu]. Com-Pro. Dinner Morsels. Madison Burger. Not Meat (plain or tomato). Nu-Steaks. Stake-Lets. Vigorost. Yum. Zoyburger. Kreme-O-Soy [canned soymilk]. Soy Beans (Boston). Zoy-Koff (regular, or fine grind).

Worthington now has warehouses in Portland, Oregon; Oakland, California (actually San Leandro); Washington, DC; and Madison, Tennessee. Address: Worthington, Ohio. Phone: 614-885-9511.

438. Jones, Dorothea Van Gundy. 1964. Quick ‘n easy dishes

for picnics or patio. *Today's Food (Loma Linda Foods, Riverside, California)* 9(2):7-8. Summer.

• **Summary:** Loma Linda ingredients in the recipes (p. 7) include: Vegeburger. Kidney Beans. Linketts. Garbanzos. Boston Style Baked Soybeans. Smokene. Soyagen milk. A photo (p. 8) shows nutritionist Dorothea Van Gundy Jones standing by a table.

439. Edwardy, Fredrik W. 1964. The food fit for the Gods [soybeans]. *Today's Food (Loma Linda Foods, Riverside, California)* 9(3):3,7. Autumn. [1 ref]

• **Summary:** Begins with a fanciful account of the early history of the soybean in China. "A fundamental rule in farming was to count the number of persons in the family and plant 5 acres of soybeans for each person."

"The father of our Nutritionist Dorothea Jones, T.A. Van Gundy, became interested in the nutritional value of soybeans while attending the World's Fair in San Francisco in 1915, where he saw them featured in an Oriental exhibit. So far as we know, he became the first person on the Pacific Coast to develop a line of commercial foods from the wonder bean. Soybean foods were virtually unknown at this time, and it took courage and perseverance to put them across."

Loma Linda Foods at present manufactures some twenty-five products which incorporate the use of the soybean in their ingredients—most of them providing a most economical means of adding more protein to the diet." These products include: Loma Linda RediBurger (19 oz can, 6 servings and 116 gm protein, costs \$0.72; a blend of soy and other vegetable proteins). Loma Linda Dinner Cuts (20 oz can, 5 servings and 65 gm of protein, costs \$0.74).

Note: The Panama Pacific International Exposition took place in San Francisco in 1915. Scores of documents were written about it and an official catalog describing it was published.

440. **Product Name:** Loma Linda VegeBits.

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce Place, Riverside, CA 92505.

**Date of Introduction:** 1964.

**New Product—Documentation:** *Today's Food*. 1964. Note: According to the Soybean Blue Book and to *Today's Food*, the name of the city in which Loma Linda Foods was located was Arlington, California, before 1964 and Riverside, California, after 1964.

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Vegebites contains 14.60% protein, 8.31% fat, and 5.95% carbohydrate. One serving, 5 bits, weighs 70 gm.

441. **Product Name:** Loma Linda RediBurger.

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1964.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** *Today's Food*. 1964.

Autumn. p. 7. A 19 oz. can of Rediburger retails for \$0.72, serves 6, and provides 116 gm of protein.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned steak or burger-like product based on wheat protein.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "Rediburger" (or "Rediburgers").

442. **Product Name:** Nabisco Chicken Fry and Fish Fry (Breading).

**Manufacturer's Name:** National Biscuit Co. (Renamed Nabisco in about 1972).

**Manufacturer's Address:** 425 Park Ave., New York, New York.

**Date of Introduction:** 1964.

**New Product—Documentation:** Soybean Blue Book. 1964. p. 111.

443. **Product Name:** Vigorost. Renamed Vigoroast by 1965.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1964.

**Ingredients:** Wheat gluten, firm tofu and/or okara, whole peanut meal, seasonings.

**Wt/Vol., Packaging, Price:** 14 and 20 oz cans.

**How Stored:** Shelf stable.

**Nutrition:** Protein 19.4%, fat 8.6%, carbohydrates 12.3%, ash 2.1%.

**New Product–Documentation:** Madison Foods. Division of Worthington Foods, Inc. 1964. July 1. Wholesale price list–order blank. Lists Vigorost.

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104. Vigoroast [sic, Vigorost] contains 12.70% protein, 8.00% fat, and 15.60% carbohydrate. One serving, ½-inch slice, weighs 80 gm.

444. Schwarz, Richard William. 1964. John Harvey Kellogg: American Health Reformer. PhD thesis in modern history, University of Michigan. vi + 504 p. 23 cm. [234 + 1,308 footnotes]

• **Summary:** This is one of the finest examples of recent Adventist scholarship. John Harvey Kellogg was born on 26 Feb. 1852 in rural Tyrone Township, Livingston County, Michigan. His parents were John Preston Kellogg and Ann Stanley, his second wife. His birth was spaced almost midway between those of his seven half- and eight full brothers and sisters. Contents: Preface. 1. The making of a health reformer. 2. “What manner of man.” 3. Biologic Living: The Kellogg “Gospel of Health.” 4. Kellogg and the Battle Creek Sanitarium. 5. Lecturer, author, publisher. 6. Surgeon and inventor. 7. His brother’s keeper. 8. Kellogg’s break with the Adventist church. 9. Food manufacturer and eugenist. 10. Concluding years. Bibliography: Primary sources (Manuscript collections, books by John Harvey Kellogg, articles by John Harvey Kellogg, newspapers and periodicals, official reports and records, interviews, other primary sources, secondary sources).

Concerning the invention of peanut butter: (p. 283–84): “Another important item in the modern American diet first introduced by Dr. Kellogg was peanut butter. Shortly after 1890, John Harvey had a quantity of roasted peanuts ground up into a paste for use by patients who had difficulty in masticating nuts well enough to digest them properly. Later the doctor decided that roasting caused the fat content of the nuts to begin to decompose and that this irritated the digestive organs. From that time forward Sanitarium peanut butter was made from nuts which had been steam-cooked rather than roasted. Kellogg devised a variety of other nut butters which he claimed were ‘sweeter, more palatable, and more digestible’ than regular butter. He directed that these nut butters be used as shortening in the preparation of all baked goods produced at the Sanitarium. John Harvey made no attempt to control through patents the production of either peanut butter or any of his other nut butters. He announced that he believed that these were products that ‘the world ought to have; let everybody that wants it have it, and make the best use of it.’” Address: Univ. of Michigan.

445. Vollmer, Marion W. 1964. Food: Health and efficiency. Lessons in nutrition and healthful food preparation. Revised ed. Nashville, Tennessee: Southern Publishing Association. 136 p. 23 cm.

• **Summary:** In this Seventh-day Adventist vegetarian cookbook, soy-related recipes include: Farmer soy breakfast hash (with Proteena, p. 34). Granola (with soy flour, p. 34). Bit o’ soy waffles (with soy flour, p. 35). Cashew milk (p. 52). Soy nut milk (with soy milk powder, almonds & cashews, p. 52). Baked soybeans (with cooked whole soybean, p. 62). Gluten—how to prepare and serve it (incl. Gluten stroganoff, gluten cheeseburgers, 64–67). Soy cheese—how to make and serve it (tofu made from full fat soy flour and curded with lemon juice, p. 67–68). Soy cheese loaf (with tofu, p. 69). Soy cheese croquettes (with tofu, p. 69). A note on p. 69 states: “Tofu is fresh soybean curd. Sold in blocks under water in Oriental and some other markets. Canned soy cheese called Vegechee, Cheez-o-Soy, etc., may be substituted.” Note: An earlier edition was published in 1954.

446. Buller, Allan R.; Klis, John B. 1965. Spun soy protein foods get supermarket sales test: Duplicating meat fibers, protein value. Improved meat substitutes, recently established in health food stores, win chain-store distribution. *Food Processing (Chicago)* 26(9):115–17, 120. Sept.

• **Summary:** “Health food stores have been the traditional outlets for meat-alternate products, but Worthington Foods, Inc. Worthington, Ohio, has taken the initial steps toward moving these products into general distribution.

“Using spun soy protein fiber as the basic ingredient, Worthington Foods has developed a full line of products that look, taste, and chew like chicken, pork and beef products. Test marketing of two items is being done in three chains in Columbus, Ohio—Alber’s, Big Bear, and Kroger. The two spun soy protein foods, Wham, a ham-like product, and White-Chik, simulated white meat chicken, are both being well received by consumers in these marketing tests... Use of the fibers in foods is subject to a patent owned by Ralston Purina Company. In Columbus, both Wham and White-Chik are priced at \$0.69 for an 8-oz package. New foreign distribution, principally in Norway and Sweden, has already added some volume.”

A large photo bears the caption “Worthington’s line of spun soy protein meat-like products are packed in canned, frozen, and dehydrated forms.” Frozen products in thin paperboard boxes include White-Chik, Fri-Chik, Prime, and Wham. Canned moist products include Veja-Links, Soyameat (many flavors), Saucettes. Meat Loaf Mix is a dry canned product. Prime is in a plastic pouch.

A newspaper ad for frozen Wham stresses the product’s low fat content (“65% less fat than cured ham”), convenience, and the fact that it contains no meat.” A photo shows a rack of meatless Prosaage, which resembles a pork

sausage made by Worthington, ready for quick freezing. Prosage does not shrink when fried.

“Edible spun soy protein fibers, sold under the trademark Fibrotein, are supplied in fresh frozen and dehydrated forms to the food processing industry by Worthington Foods, Inc., 900 Proprietors Rd., Worthington, Ohio 43085. The company also supplies imitation meats made from Fibrotein in fresh, frozen and dehydrated forms. The imitation meats are available in slices, cubes, chips, granules, round rolls, square logs and in other shapes and sizes.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “imitation meats” (with any combination of quotation marks). Address: 1. General Manager, Worthington Foods, Inc; 2. Assoc. Editor.

447. **Product Name:** Wham (Meatless Ham) [Slices, or Rolls].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1965 September.

**Ingredients:** In 1965: Specially processed soybean protein (Fibrotein), corn oil, egg albumen, hydrolyzed vegetable proteins, salt, lactose, brown sugar, monosodium glutamate, vegetable gum, flavorings, U.S. certified color. In 1971: Soybean protein, corn oil, albumin [egg protein], hydrolyzed vegetable protein, corn syrup solids, salt, MSG, flavorings, U.S. certified color.

**Wt/Vol., Packaging, Price:** 8 oz paperboard box or can.

**How Stored:** Frozen or canned (Sept. 1965).

**New Product–Documentation:** Soybean Blue Book. 1965. p. 112. Buller & Klis. 1965. Food Processing. 26(9):115-17, 120. Sept. “Spun Soy Protein Foods Get Supermarket Sales Test.” Wham, a ham-like product, is made with spun soy protein fiber. A photo shows the thin paperboard box in which Wham is sold, frozen, and the large can in which it is sold in canned form. An ad announces that Wham contains 65% less fat than cured ham. “What a menu-maker for Lent and meatless days.”

Ziamba. 1966. Food Engineering. May. p. 82-93. “Let soy proteins work wonders for you.”

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in “Wham (Worthington).” This is an institutional product.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned or frozen product based on spun soy protein fiber. The frozen slices are available in 8 oz. or 24 oz. sizes.

Photo. Manufacturer’s catalog. 1984, undated. Frozen Products.

Label (undated) for “New Wham imitation ham” sent by Dr. Walter Wolf. 2000. July. Since the first ingredient is Fibrotein (spun soy protein fibers), this package is probably

from about 1965. Red and white on dark blue. A large color photo on the front panel shows slices of Wham served a white serving dish surrounded by sliced pineapple rounds with a red cherry at the center of each. On the front panel: “Contains no meat. 65% less fat than cured ham.”

448. **Product Name:** Veja-Links (Made with Spun Soy Protein Fibers—Canned or Frozen).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 614-885-9511.

**Date of Introduction:** 1965 September.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Canned or frozen.

**New Product–Documentation:** Buller & Klis. 1965. Food Processing. 26(9):115-17, 120. Sept. “Spun Soy Protein Foods Get Supermarket Sales Test.” Photos show: (1) The can in which Veja-Links are sold; the caption says that they contain spun soy protein fibers. (2) Two women packing

**449. Product Name:** Skippy Peanut Butter with Smoky Crisps (or Bits).

**Manufacturer's Name:** Corn Products Co., Best Foods Div.

**Manufacturer's Address:** -

**Date of Introduction:** 1965 October.

**New Product-Documentation:** National Provisioner. 1965. Oct. 9. p. 17. "New foods from spun protein." "Smoky Bits' simulating bacon are being test marketed in peanut butter."

Odell. 1966. *Cornell Hotel and Restaurant Administration Quarterly*. Aug. p. 24 "Meat analogues: A new food concept." A product closely similar to General Mills' Smoky Chips "is being supplied to the Best Foods Division of Corn Products as 'Smoky Crisps' for inclusion in a new version of Skippy Peanut Butter."

Wall Street Journal. 1969. Oct. 2. p. 1. "Meatless 'meats.'" "One of the first products to use analogs, Skippy Peanut Butter with Smoky Crisps (simulated 'bacon' bits), was dropped last year after little more than a year in test markets."

**450. Product Name:** Bac\*O's (Meatless Fried Bacon Bits from Spun Soy Protein Fiber).

**Manufacturer's Name:** General Mills, Inc.

**Manufacturer's Address:** Minneapolis, Minnesota.

**Date of Introduction:** 1965 December.

**Wt/Vol., Packaging, Price:** Frozen or dried (3.25 oz jar).

**New Product-Documentation:** Ziemba. 1966. *Food Engineering*. 38(4):58-60. April. "Create new foods with textured soy proteins." General Mills is test marketing this product as Bacon Bits (as garnish or condiment) in Bac-O-Chips for the institutional trade and Bac\*Os under the Betty Crocker consumer label. GMI has registered these textured meat analogs under the name Bontrae. They are made from spun soy protein fibers. "These spun monofibrils are then blended with supplementary ingredients (fats, egg solids, sugars, etc.), binders, flavors, and colors. They are then cooked (to heat-set) and shipped frozen (55 to 60% moisture) or dried (2% moisture). A.D. Odell is manager of the GMI Isolated Protein Program. A photo shows the label of a jar of Betty Crocker Bac\*Os. "New. Net wt. 3.25 oz. Say 'BAY-kôz. Crispy bits with a flavor like smoke-cured bacon. High

in vegetable protein."

Ziemba. 1966. *Food Engineering*. May. p. 82-91. "Let soy proteins work wonders for you." *Business Week*. 1966. July 23. p. 82-87. "Soybeans move up on the menu."

David Sanford. 1968. *New Republic*. May 18. p. 13-15. "Unfoods: Do you know what you're eating?" Indicates that test marketing of Bac\*Os in Denver, Buffalo, and Sacramento began in about Dec. 1966 and that they are about to be advertised nationally. The label now reads "Bac\*Os-Crispy Bontrae bits with a flavor like bacon." They are made with spun soy protein isolate fibers.

*Soybean Digest Blue Book*. 1969. p. 114, 112. Bac\*O's are made from spun soy protein fiber. Company is at 9000 Plymouth Ave. N., Minneapolis, Minnesota 55427. Head office at 9200 Wayzata Blvd., Minneapolis. American Soybean Assoc. 1974? "Soybeans: From America's fertile soils the world's versatile protein resource." A photo shows the jar.

Talk with Pam Becker of General Mills in Minneapolis (Phone: 612-540-2470). 1989. Dec. 13. She reads from an undated internal company publication compiled by the Consumer Relations Dept. and titled "Consumer Foods Products Information." This product was introduced to test markets in December 1965. The introduction was the result of extensive R&D work which began in the late 1950s. Foreseeing the future problem of increased worldwide malnutrition, General Foods acquired a patent license for a process then only in the initial stages of development to spin soy protein fibers (like the techniques used for Nylon or Rayon) into a fibrous material similar in form and consistency to meat. The fibers were combined with such binding ingredients as egg albumen and wheat gluten with oils, flavors, and dyes to produce a high protein food. After considerable consumer research, the decision was made to first market isolated soy protein in the form of bacon (Bac\*O's). Bacon was a popular food with consumers but was considered to be expensive and often a nuisance to prepare. In Dec. 1965 Bac\*O's was test marketed in Buffalo and Syracuse (New York), Sacramento, Stockton, and Fresno (California), and Denver (Colorado). It was extremely convenient, required no cooking or refrigeration, and there was no waste. It contained 67% more protein, 42% less fat, and 19% fewer calories than bacon. It contained no animal or meat fat and was kosher. 1 tablespoon (¼ oz.) contained 35 calories, 2 gm of fat, 3.6 gm of protein and no cholesterol. It was sold in glass jars. A variety of recipes were developed with the crispy vegetable protein bits including egg dishes, salads, and sandwiches. It was expanded out of test market to all areas but the West Coast in 1968, and it became available nationally in Dec. 1969.

In 1983 Bac\*O's was reformulated to improve flavor and color. It had a less salty, milder, and less smoky flavor. In March 1985 Bac\*O Bits were introduced nationally. They were smaller sized pieces which could be used as a more

subtle seasoning.

Dawson Foods bought the Bontrae spinning line, plus exclusive rights to General Mills soy isolate and patented spinning technology, equipment, and frozen spun products marketed to food processors and institutional customers. Central Soya got a long term leasing and licensing agreement for exclusive rights to General Mills' patented steam textured vegetable protein technology, equipment, and products to market to institutional customers and food processors. The company archivist, who knows history well, is Jean Toll (X-2679).

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. The ingredients in "BacO's (General Mills)" are soy protein, vegetable oil, salt, HVP, sugar, dried egg white, artificial flavor, artificial color.

**451. Product Name:** Prime Vegetable Burger. Renamed Prime Vegetarian Burger by 1971.

**Manufacturer's Name:** Battle Creek Foods. A Div. of Worthington Foods.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 614-885-9511.

**Date of Introduction:** 1965.

**Ingredients:** Wheat protein [wheat gluten], water, yeast extract, salt, soy sauce, Brewer's yeast, MSG, seasonings, algin, caramel color.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Prime Vegetable Burger contains 15.60% protein, 0.20% fat, and 3.70% carbohydrate. One serving, ½-inch slice, weighs 66 gm.

**453. Product Name:** Soya Bean Luncheon Loaf, and Savoury Roast (Meat Substitutes).

**Manufacturer's Name:** Soy Products of Australia Pty. Ltd.

**Manufacturer's Address:** 69 Power Road, Bayswater, VIC 3153, Australia. Phone: 729-1738.

**Date of Introduction:** 1965.

**Ingredients:** Incl. soybeans, tomato sauce or puree.

**Wt/Vol., Packaging, Price:** Tin-plated steel can.

**New Product–Documentation:** Letter from Paul Smith of Soy Products of Australia Pty. Ltd. 1981. Vincent R. Smith was a soyfoods pioneer in Australia. Between 1965 and 1974-75 Mr. Smith developed and manufactured two soyabean meat substitutes—Soya Bean Luncheon Loaf, and Savoury Roast—for Bellevue Health Supplies, as part of his product range within F.A. Robert's Health Foods Proprietary Ltd. This latter company has since been absorbed within Soy Products of Australia Pty. Ltd.

**454. Product Name:** Saucettes (Meatless Sausage-like Links).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1965.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, corn oil, soya protein (Fibrotein spun soy protein fibers), albumin [egg protein], dextrose, salt, hydrolyzed vegetable protein, MSG, seaweed extractive, flavorings, U.S. certified color.

**Wt/Vol., Packaging, Price:** 19 oz can. Retail for \$2.85 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Note: This product was originally introduced by Battle Creek Food Co. in about 1936. Buller & Klis. 1965. *Food Processing*. 26(9):115-17, 120. Sept. "Spun Soy Protein Foods Get Supermarket Sales Test." A photo shows the small can in which Saucettes are sold. A caption states that the product contains spun soy protein fibers. Soybean Blue Book. 1965. p. 112. Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Saucettes (Worthington)." This is an institutional product.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned frankfurter type product based on spun soy protein fiber.

Shurtleff & Aoyagi. 1983. *History of Worthington Foods*. p. 11.

**455. Product Name:** Fri-Chik (Meatless Chicken Based on Spun Soy Protein Fibers—Frozen).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1965.

**Ingredients:** Water, textured soy protein isolate, egg whites, soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, onion, turmeric, spice extractives, disodium guanylate, disodium inosinate), modified corn starch, salt, monosodium glutamate, carrageenan, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), artificial color, vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 25 oz can. Retail for \$4.89 (12/80). 12.5 oz can retails for \$2.35 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

Chicken Style,' and was also later marketed as frozen and canned 'White-Chik' in large rolls for slicing, dicing, etc. The approximate analysis of these simulated chicken products: protein 20-26%, fat 18-25%, and carbohydrate 2-3%."

Ziemba. 1966. Food Engineering. May. p. 82-93. "Let soy proteins work wonders for you." Photo of box. Consumer Reports. 1980. June. p. 357-65. The protein PER is 2.60. Sensory comments: Too moist. Perceived as chickenlike or spongelike.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27. Contains no cholesterol. Certified Kosher/Pareve. Shelf life is approximately 3 years under proper storage conditions.

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual*. 2nd ed. p. 104. Frozen Fri-Chik contains 25.61% protein, 25.06% fat, and 2.04% carbohydrate. One serving, 2 pieces, weighs 84 gm.

Hartman. 1966. Food Technology. 20(1):39-40. "Vegetarian protein foods." "The first textured soybean protein fiber product marketed in the U.S. is Worthington's frozen 'Fri-Chik,' an extruded formulation simulating a small fried portion of white chicken meat. This same formulation was next canned in a light gravy and called 'Soyameat–Fried

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 12.5 oz can. The main ingredients are now: Textured vegetable protein (soy protein isolate and concentrate), egg whites, soybean oil, corn oil, natural and artificial flavors from non-meat sources, salt, dextrose, vegetable gum, onion, turmeric, celery, niacin, iron, etc.

Talk with Dick Leiss, Director of R&D at Worthington Foods. 1993. June 30. This was an early product that contained spun soy protein fiber and was deep fat fried.

**456. Product Name:** Vegetable Skallops (Regular, or Without Added Salt or MSG).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1965.

**Ingredients:** Regular: Skallops: Textured vegetable protein (Wheat gluten, soy protein concentrate). Broth: Water, salt, monosodium glutamate, L-lysine hydrochloride (an essential amino acid).

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) can. Regular retails for \$2.60, and "No salt or MSG" retails for \$2.70 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104. Vegetable Skallops contain 16.80% protein, 0.60% fat, and 10.70% carbohydrate. One serving, 3 pieces, weighs 62 gm.

*It's Your World Vegetarian Cookbook.* 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned fish-like product based on spun soy protein fiber.

Ad in *Whole Foods.* 1983. Sept. p. 45. in 20 oz. cans. This product and Vegetarian Burger are being promoted as "Salt Shakers." Both are available in versions with and without salt and MSG. For the hypertensive and sodium-conscious. A black-and-white photo shows the can and label. The text reads: "Contains no meat. A vegetable protein product. No added salt or MSG."

Products with Labels purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. The

regular flavor is red, white, yellow, and blue. The "No added salt or MSG" is blue, black, and yellow on white.

Soyfoods Center Product Evaluation. 1992. Feb. 16. This product is delicious when prepared as follows: Drain, break large pieces into smaller ones, dust in wheat flour, dip in beaten egg, dust in Japanese bread crumbs (which are made without sugar, and are bigger and flatter than their Western counterparts), then deep fry. Serve with Japanese-style Tonkatsu sauce or tartar sauce.

Talk with Dick Leiss of Worthington Foods. 1993. July 30. This was an old Battle Creek Foods product. Dick is quite sure that it never contained spun soy protein fibers. It was also based on gluten.

457. **Product Name:** Big Pat.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 614-885-9511.

**Date of Introduction:** 1965.

**Ingredients:** In 1971: Wheat protein [wheat gluten], mushrooms, dehydrated onion, pecan meal, salt, rolled oats, soy grits, sunflower seeds, MSG, garlic powder, hydrolyzed vegetable protein, starch, corn oil, natural extractive flavorings.

**New Product–Documentation:**

Seventh-day Adventist Dietetic Assoc. 1965. *Diet Manual. 2nd ed.* p. 104.

Big Pat contains 21.80% protein, 8.00% fat, and 16.60% carbohydrate. A serving, 1 Pat, is 64 gm.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 160.

Lists the ingredients in "Big Pat (Worthington)."

458. Brandemuhl, William. 1965. Soybean utilization in Japan: Figures (Document part). San Francisco, California. xxii + 478 p. Unpublished manuscript. 28 cm. [189 ref]

• **Summary:** 1. Black soybeans from Japan's Tanba region and American Harosoy soybeans. 2. Soybeans growing on a dike. 3. Soybean plants drying on rack. 4. Soybean plants drying just prior to harvesting. 5. Soybean plants drying just prior to harvesting. 6. Soybean harvester. 7. Depodding rack and pod filled stalk. 8. Depodding soybeans. 9. Entrance to the Red Chinese Trade Fair held in Tokyo, during April, 1964. 10. One of the agricultural exhibits at the Chinese Trade Fair (corn and soybeans). 11. Soybeans and soybean plants exhibited at the Chinese Trade Fair. 12. Soybeans and other bean products that Red China is capable of exporting

(exhibition at the Red Chinese Trade Fair). 13. Soybeans on display at retail store. 14. Soybeans on display at retail store. 15. Barge unloading of soybeans at oil mill. 16. Barge unloading of soybeans at oil mill. 17 Soybean tank receiver at oil mill. 18. Multi-spout soybean feeder at barge side. 19. An oil gift assortment.

20. Selling oil at a small oil retail shop. 21. Dispensing oil. 22. Selection of oil at oil retail shop (notice birds in cage at right). 23. Vegetable oil displayed with petroleum products. 24. Vegetable oil displayed with petroleum products. 25. Bottling facilities at oil wholesaler's. 26. Bottling facilities at oil wholesaler's. 27. Prepackaged oil products displayed at wholesaler's. 28. Seafood fried in soybean oil. 29. Selling soybean oil fried products. 30. Temperature controlled fryer. 31. At a chicken farm. 32. Handling 20 kilograms bags of chicken feed. 33. Soybean meal on top of other components of mixed feed prior to hand mixing. 34. Bag fastener for mixed feeds packed at wholesaler. 35. Fermenting agent for bakery (contains equal quantities of soybean flour, yeast, and water). 36. Silk worms eating mulberry leaves. 37. Silk worms eating soybean protein mixed with mulberry leaves. 38. Tofu. 39. Soybean grinder.

40. Soybean grinder. 41. Soybean grinder. 42. Open pit live steam cooker. 43. Open pit wood-stoked cooker. 44. Okara tank and press. 45. Outdated okara press. 46. Tonyu [soymilk] receiving tanks (precipitation tanks). 47. Removing water from precipitating curd. 48. Pressing tofu with stone weights. 49. Yakidofu. 50. Yakidofu being dipped into a shaping box. 51. Mechanical press for pressing yakidofu. 52. Cutting yakidofu. 53. Roasting yakidofu. 54. Kinugoshi tofu. 55. Aburaage. 56. Aburaage prior to being deep fried. 57. Frying sushiage, a product similar to aburaage. 58. Frying aburaage. 59. Hiroso: left front; atsuaage: right front; sushiage: left rear; aburaage: center rear.

Note 1. This is the earliest English-language document seen (April 2013) that uses the word "Hiroso" to refer to Kyoto-style deep-fried tofu treasure balls.

Note 2. This is the earliest English-language document seen (April 2013) contains the word *atsuaage* or the word *sushiage*; they refers to types of deep-fried tofu.

60. Okara for use as cattle feed. 61. Okara for food use. 62. Overall view of production portion of tofu plant. 63. Tofu peddler. 64. Tofu on display. 65. Bagged tofu. 66. Miso-shiru soup. 67. Dengaku (yakidofu covered with miso and placed over low heat). 68. Aburaage formed as a bag with rice inside. 69. Yudofu, Japan's most famous but not often eaten tofu dish. 70. Yudofu. 71. Miso. 72. Fermentation starting material (rice inoculated with bacteria). 73. The first step in making home miso. 74. Mashing soybeans for home miso. 75. Rice koji being used for home produced miso. 76. Salt being added to soybean and koji for the making of home miso. 77. Mixing home miso components. 78. Mixing home

miso components. 79. Freshly made home miso.

80. Home miso after one year natural fermentation. 81. Koji maker. 82. Koji filled boxes. 83. Autoclave for steaming soybeans. 84. Koji mixed with salt. 85. Wooden vat for miso fermentation. 86. Weights for pressing miso. 87. Removing miso from fermentation vat. 88. Mixing and grinding miso. 89. Degraining [grinding] miso. 90. Miso on display. 91. Miso packing and sealing instrument. 92. Packing miso in a plastic bag. 93. Beef and rice miso preserver. 94. Seafood and rice miso preserver. 95. Receiving soybean meal at shoyu factory. 96. Saline solution for shoyu production. 97. Fermenting moromi. 98. Equipment used for bubbling moromi. 99. Temperature control of moromi.

100. New moromi. 101. Moromi which has fermented nearly one year. 102. Hydraulic press for pressing moromi. 103. Running moromi into filter cloth. 104. Filter cloth containing moromi. 105. Raw shoyu storage tank. 106. Open press for previously pressed moromi. 107. Opening moromi filter cloth. 108. Removing shoyu kasu (shoyu presscake) from filter cloth. 109. Bagging shoyu kasu for sale as cattle food. 110. Quick method shoyu kasu. 111. Shoyu sterilization instrument. 113. Shoyu bottler. 114. Bottling shoyu by hand. 115. High speed labeling. 116. Hand labeling. 117. Preparing sauce for shipment. 118. Shoyu cold sauce. 119. Filling plastic bottles with shoyu for use in box lunches.

120. Broiled chicken coated with shoyu. 121. Fish marinated in shoyu. 122. Fish baked with shoyu. 123. Grilled eels basted with shoyu. 124. Daitokuji natto (look like raisins spread on a sheet of paper).

125. Cooker for steaming soybeans for natto. 126. Pressurized container for inoculating soybeans. 127. Inoculating soybeans for natto. 128. Traditional method of packing natto. 129. Traditional method of packing natto. 130. Incubation rack and traditional packages of natto. 131. Packaging inoculated soybeans prior to incubation. 132. Packaging inoculated soybeans prior to incubation. 133. Inoculated soybeans in recently introduced containers. 134. Natto incubation room. 135. Natto on display at egg shop. 136. Overall view of frozen tofu factory. 137. Precipitation containers for frozen tofu tonyu. 138. Smoothing frozen tofu curd. 139. Frozen tofu curd flowing into shaping box.

140. Shaping box for frozen tofu curd equipped with sheet metal guide. 141. Removing formed frozen tofu curd from sink. 142. Cutting formed curd into freezing size. 143. Sized curd in -20°C freezer. 144. Sized curd in -5°C degree freezer. 145. Defrosting frozen tofu. 146. Removing frozen tofu curd from centrifuge. 147. Inspecting frozen tofu curd for dryness. 148. Drying frozen tofu. 149. Grinding frozen tofu into marketable size. 150. Packing frozen tofu. 151. Frozen tofu on display. 152. Cooked frozen tofu displayed in food shop. 153. Cooked frozen tofu mixed with vegetables. 154. Packing kinako. 155. Kinako on display. 156. Covering

pounded rice cake [mochi] with kinako. 157. Yuba. 158. Yuba hanging on rack above tonyu tank. 159. Lifting yuba from tonyu tank.

Black soybeans in pounded rice cake [mochi].

Map of Japan. Address: San Francisco, California.

459. Brandemuhl, William. 1965. Tofu (including Aburaage and related products): History, use of soybeans, manufacture (Document part). In: William Brandemuhl. 1965. Soybean Utilization in Japan. San Francisco, California. xxii + 478 p. See p. 137-201, Unpublished manuscript. 28 cm. [18 ref]

• **Summary:** "History: Tofu, the coagulated protein and fat of ground cooked soybeans (see Figure 38) according to an ancient Chinese book was invented by a philosopher, prince *Hamintze* of the Han dynasty, while another source attributes the invention of Tofu to another Chinese philosopher *Whai Nain Tze*. Manufacture was supposedly begun in China in 164 B.C. during Emperor *Hwai Wen's* reign by *Liu an*, duke of *Hwai an*. *Liu an* was a good friend of the Buddhists monks so it is believed he started manufacturing Tofu, so as to give them a somewhat more varying diet. Tofu come to Japan (probably through Korea) for the first time during the Toyotomi period (880 years ago). Although not completely documented, Buddhist priests probably were the transmitting agents as the priests used Tofu long before it was in general use.

"Use of soybeans: Throughout Japanese history domestic soybeans were used to make Tofu, however Chinese soybeans began to be used after trade began between Japan and China. During and at the end of World War II all soybeans were in short supply, however in the early fifties U.S. soybeans began to be used for Tofu. This use developed so that now Tofu accounts for the largest Japanese food use of U.S. soybeans. The Tofu makers would use domestic soybeans if they were not too expensive however. Some makers still use a certain percentage of domestic beans although such practice is becoming less popular. More

often used are U.S. specialty beans such as Illinois, Indiana, Ohio, Hawkeye, or select No. 2 ordinary even though such soybeans are higher priced than regular soybeans. Chinese soybeans are again starting to be used for Aburaage although because of custom U.S. soybeans are not likely to be replaced in the foreseeable future. The existence of over 60,000 Tofu makers consuming over 200,000 MT of soybean per year with each maker consuming between 15-300 kilograms per day presents somewhat of a problem regarding soybean purchasing. Each particular maker is too small to purchase directly from anyone but the smallest wholesaler where the price of soybeans is too high for efficient operation. The Japanese people are association minded with the Tofu makers being no exception. The Tofu makers authorize their local association to purchase soybeans in large lots for future distribution to individual makers. The Tofu makers do not especially like to purchase through the association as the association charges for handling, however the makers have a desire to support the association so accept purchasing through it. The association deals with the importer, crusher, and large wholesaler, selecting whichever seller will give the best terms.

"The numerous Tofu makers that do not belong to the association (about 1/6) as well as members whose association does not purchase usually work out an arrangement with the smaller wholesalers. Soybeans are delivered to the maker by truck with the maker receiving material for a number of weeks each time he receives. The shipment is kept in bag form until the day before use.

"Manufacture—Regular Tofu (white Tofu): The manufacturing procedure described below is for the most used type of Tofu, 'Shirodofu' (white Tofu) as is seen in Figure 38. Other related products such as Yakidofu, Kinugoshi dofu, Aburaage, Hiroso, and others are processed in much the same way. Additional or different methods of processing these latter products are described in respective sections.

"The process of making Tofu consists of ten steps, that is, soaking, cooking, filtering, coagulating or precipitating, shaping, pressing, submerging [in water], cutting, and again submerging.

"Soaking: Depending upon season of year, 5-15 hours before processing, clean whole soybeans are put in containers of any size but most used are metal drums, wooden barrels or 20 liter tins. Water is added to the container until the soybeans in the container are completely submerged. Although length of soaking is not such a strict factor, generally soybeans are soaked 10-14 hours in winter and 5-10 hours in summer. Soybeans soaking in any one container should be of uniform size as soaking would not be even. Because of their small size, U.S. soybean are soaked for less time than Hokkaido soybeans. In winter Hokkaido soybeans may require as much as five additional hours of soaking. There seems to be to guides besides experience that

indicate when soaking is sufficient, that is, the appearance of bubbles rising to the surface of the water and the whiteness of them inside of the soybeans.

“Grinding: Tofu processing usually begins at 3:00-5:00 in the morning so that the final product may be ready for use during that day. Processing is initiated by the removing of unabsorbed water from the containers. After that between five and eight kilograms of the soaked soybeans are put into an electric powered grinder of the types shown in Figures 39, 40, and 41. The type of grinder pictured in Figure 39 is the most popular. Water is run into the grinder’s intake container and the grinder is started. After ground as small as possible the soybeans in the form of thick white cream (see bottom of Figure 41) enter a container positioned at the outlet of the grinder. The cream could be called more paste-like than a liquid although it flows. If it cannot water is added. If the cream is too thin, the residue after filtering will contain too much of the protein. For a batch of approximately seven kilograms of soaked soybeans the volume of creamy substance should be around 54 liters.

“Cooking: The type of cooker used depends upon the economic situation of the maker. Two of three types of cookers commonly used are shown in Figure 42 and 43. Although, wood (Figure 43) or oil stoked cookers are used, use of a steam boiler is slowly replacing all other methods. Either a small steam pressure cooker or a live steam open pit steam cooker (Figure 42) might be used if the factory has a steam boiler. To indicate that making Tofu is a cottage type industry very often makers with steam boilers will use same for heating their bath. The ground soybeans and water are usually drawn into the cookers by negative pressure but this procedure may also be done manually. Such is necessary if the maker does not have a steam boiler. After the cream is pulled into the cooker, water is added to the container to collect the residue remaining on the container’s surface. This thin solution is also drawn into the cooker. Cooking lasts about four or five minutes or until pressure reaches approximately 10-12 pounds per square inch or the equivalent of it if another type of cooker is used. Cooking is very important for removing distasteful flavor, protein, causing good or bad cohesiveness and water holding capacity, although it is done without gauges, meters, or time control by the experienced Tofu maker. As an indication of the time of operation the cooking of 35-40 different batches may be completed by 6:00 a.m.

“Filtering: After cooking, a valve is opened. This valve is connected to a 1½ inch diameter pipe which bends upward so that it is positioned over a container usually around 24 inches square and made of metal although wood and tile are also used. A tile tank is shown in Figure 44. At the end of the pipe a coarse nylon bag is attached. The opening of the outlet valve with pressure still fed to the cooker causes the cooked material to be forced through the looped pipe and into the nylon bag filter. Steam flow is then terminated then started

again to force out what remains in the cooker.

“At some factories gravity may be used to remove the material from the cooker and such also might be accomplished by hand. The tank which the bag rests in also has an outlet at its bottom so the liquid (called Tonyu [soymilk]) which can readily pass through the coarse filter makes its way by pipe to a container. The temperature of this material is 100°C when it leaves the cooker, however it drops to 80°C by the time it reaches the container. The material that does not flow through the nylon filter is called Okara. As soon as all the material is forced out of the cooker and what liquid there is flows to the precipitating container a quantity of cold water (15-20 liters) stored in a tank above the container is dumped upon the nylon filter dropping the temperature of the Okara to 60°C so that as much protein as possible can be removed. At some places this water may run directly into the cooker after the initial liquid was forced out.

Note 1. The author and his wife, Tomoko, did most of their tofu research in Kyoto. Companies they visited and observed in the spring of 1963 (listed alphabetically) were: Hamano Tofu Co., Hamamoto Tofu Co., Namikawa Tofu Co., Ryo Tofu Co., Shimamoto Tofu, and Uno Tofu. They also learned much from the Tofu-Aburaage Association (Kyoto). And they visited and observed Sasanoyuki Tofu Restaurant (Tokyo, 11 June 1963).

Note 2. The word *Shirodofu* is occasionally (but rarely) used to distinguish “white tofu” from non-white tofu (such as deep-fried tofu, grilled tofu, dried-frozen tofu, etc.). This is the earliest English-language document seen (April 2013) that contains the word *Shirodofu*. (Continued). Address: San Francisco, California.

460. Brandemuhl, William. 1965. Tofu (including Aburaage and related products): Frying Aburaage, Atsuage, Hiroso / Ganmodoki, Okara, Soybean Milk (Continued—Document part IV). In: William Brandemuhl. 1965. Soybean Utilization in Japan. San Francisco, California. xxii + 478 p. See p. 137-201, Unpublished manuscript. 28 cm. [18 ref]

• **Summary:** (Continued). “Frying Aburaage: Aburaage is usually fried in rapeseed oil with soybean oil being occasionally used. Frying is accomplished in two stages as Figure 56 indicates. The containers used to fry are usually housed with bricks and heated by oil and blower although wood is sometimes used. A wood stoked fryer has the disadvantage of uncontrollable temperature. The oil containers are provided with hoods but as seen in Figure 57 cleanliness is difficult to maintain.

“The number of double oil containers varies with the size of the maker with a slightly larger than average maker processing about 1,000 Aburaage at a frying rate of about 120-150 per hour so at least two vats are needed. Each of the double containers are about 28 inches square and 2½ inches deep. Although it seems that the containers are completely separated by a partition actually a three millimeter space

exists between the bottom of the oil vat and the partition so that a certain amount of oil circulates between the two vats.

“Although most vats are as pictured in Figure 57 some have slanting sides for easier insertion of the raw Aburaage and conservation of oil. To insure even frying on both sides of the Aburaage as well as to increase speed of frying one of the two vats used for frying the same Aburaage has a wire mesh rack that is constructed to fit inside the vat. Such mesh is hinged to the container at the rear so by suitable attached wire or rope, the mesh can be easily controlled. A weight is put on the mesh so that the buoyancy of the frying Aburaage will not raise the mesh and defeat its purpose. In addition to the above equipment three hand utensils are used for frying Aburaage, one is a dipper (seen in foreground of Figure 57), for pouring oil over the Aburaage, another is a wire mesh spatula about 10 inches in diameter (see Figure 58) used to turn and individually press certain Aburaage, and the third is a long metal forceps for removing the Aburaage from the oil. Although equipment is supposedly cleaned everyday the oil in use is unusually dark although clean oil usually stored in a tank above the working area delivers large quantities of oil quite often.

“Given the above equipment Aburaage are fried in the following fashion. About 12 Aburaage are taken by hand four at a time from the trays shown in Figure 56 and inserted into the number one vat of oil. The oil in this vat has a temperature of around 100°C. Immediately upon insertion the Aburaage sink to the bottom of the oil. Two and one half minutes later they rise to the surface and at that time another batch of Aburaage are inserted in the same vat but the latter do not interfere with the frying of the first batch because they sink. As soon as the first batch rises they are turned and selectively pressed with the wire mesh spatula and the dipper mentioned above is used to pour oil from vat number two at 180-210°C onto the uncooked side of the Aburaage. About five minutes after insertion the Aburaage are transferred to vat number two and pressed under the surface of the oil with

the hinged wire mesh and weight. About three to four minutes later the golden brown Aburaage are removed with the metal forceps and placed on a slanting wire rack adjacent to the number two vat. The length of frying time varies with the temperature of oil that each maker might use so that generalizations cannot be made, however each maker attempts to produce the largest Aburaage possible given the size of raw Aburaage used. If frying is successful the Aburaage will first become very puffed and then collapse having then a skin-like surface. The void space may then be used after suitable cutting for holding rice, one of the most popular ways to prepare Aburaage. The 1.8 liters of oil that are absorbed into 100 Aburaage make the protein rich Aburaage very rich in oil also. One reason why the use of meal has been successful for Aburaage is that oil absent from raw Aburaage is replaced in great part by frying.

“After excess oil has dripped from the Aburaage on the wire tray, they are removed and placed on another wire tray and stored in a wooden rack until marketed. The form the 240 gram Aburaage takes is as shown in the center rear of Figure 59.

“Sushiage is made using exactly the same materials and procedures as Aburaage except that Sushiage is less than one half the size of Aburaage as can be seen when comparing both in Figure 59 and Figure 57 (Sushiage) with Figure 58 (Aburaage). Length of frying Sushiage has to be compensated so that total frying time is usually less than eight minutes.

“The Japanese people delight in consuming a slice of raw fish set upon a small ball of rice but since fish is expensive a quantity of rice packed inside a split Sushiage often acts as an inexpensive substitute.

“Atsuage (see right front, Figure 59) may best be described as being two different products although marketed as the same. Standard Tofu which cannot be sold on the day it is processed is on the next day cut into triangular pieces one inch thick with legs about two and one half or three inches long. This product when fried only in the hot oil vat for a short time is called Atsuage. Since it is small it can easily be used when a piece of Aburaage is too large for the required use. Demand for Atsuage is usually higher than what can be made from the varying quantity material remaining each day so Atsuage also has to be made from regular batches of Aburaage resulting in products of two different qualities but not distinguished as such. A little known fact is that Tofu makers make nearly as much profit on cutting old regular Tofu into four pieces, frying, and selling as Atsuage as they do on selling regular Tofu.

“Hiroso (also called Ganmodoki) is pictured in Figure 59 on the left front. It is composed of old regular Tofu, old Yakidofu (after the roasted surface is removed), the

trimmings obtained when cutting Aburaage products, a shredded vegetable (usually carrots), ground yam, and sesame seeds. The first three materials are put into a cotton bag and pressed with a stone or the mechanical press if it is free so that a great portion of the water is removed.

“After removing the material from the press, the shredded carrots, ground yam, and sesame seeds (the sesame seeds may also be placed in the top of the material after formed) are mixed together by hand. Then the paste-like material is shaped into balls the size of one scoop of ice cream. In fact an ice cream scoop is sometimes used for shaping; otherwise it is done by hand. The balls are then put in the low temperature oil vat and allowed to remain submerged for a short while, then transferred to the high temperature oil (180-200°C) and fried until golden brown. Hiroso is more often used by poor people than other Aburaage products but not limited to same.

“Okara, as mentioned before, is the residue of the various filterings [sic] of the raw Tonyu. It is usually sold to dairy farms for feed at \$.01 (four yen) a kilogram. Figure 60 shows a farm owned truck with Okara from a number of Tofu shops located in the farm’s milk market. Not all Okara is fed to cows however, as it is also a popular food for rabbits, and Tofu delivery people also carry it for selling as dog food. Although for cleaning purpose other commercial products have replaced Okara, it can be used as a floor and hand cleaner. A small amount is also sold for human food (see Figure 61) with very poor people accounting for most of the food use.

“Soybean milk: Although other places in Asia use soybean milk with large and small scale factories producing same for a milk deficient population, in Japan soybean milk is not significantly consumed, although one modern factory is producing a similar product, however initiation of production is too recent to tell if this product will be successful. The Tonyu of Tofu production would seemingly be marketed but it is not because of the availability of fresh milk. Such was not the case up to about 25 years ago when nearly every Tofu shop sold Tonyu for direct human consumption and even for enriching other food products such as bakery goods.

“The Tofu factory: Figure 62 shows the production area of a Tofu factory employing six persons and producing the following amount of Tofu per day:

“Products. Pieces  
 “Regular Tofu 560  
 “Yakidofu 150  
 “Aburaage 1,200  
 “Sushiage 2,700  
 “Atsuage 400

“This factory is much larger than average yet for the above Production only 140-200 kilograms of soybeans are used. It might be imagined that to employ six people, hand work is the rule rather than the exception” (Continued).

Address: San Francisco, California.

461. Brandemuhl, William. 1965. Tofu (including Aburaage and related products): The Tofu factory, marketing Tofu, preservation (Continued—Document part V). In: William Brandemuhl. 1965. Soybean Utilization in Japan. San Francisco, California. xxii + 478 p. See p. 137-201, Unpublished manuscript. 28 cm. [18 ref]

• **Summary:** (Continued). Although all members of the family help the business in some way, labor cost is not yet so high (Tofu worker receive \$60-75 per month live in salary) and the Tofu industry makes use of much inexpensive equipment. With the development and rapid expansion of food and other industries, Tofu production is becoming far behind with respect to modern methods so cost of production is increasing, forcing many Tofu makers into bankruptcy. The number of Tofu makers is decreasing in still another way and that is at present the sons of Tofu makers observe that making Tofu is not a desirable job, either prestige or condition wise, so are refusing to assume ownership of the shop at the suitable time.

“This creates somewhat of an advantage for the young people who do enter the business as the older men running their own business can neither maintain quantity of production as they increase in age or handle young employees to maintain same so the young producer can slowly increase his sales by capturing the local market from an old maker. Also young aggressive makers are in a much better profit position as the profit margin seems to be high but more volume than a few bushels a day is needed to insure a comfortable financial position.

“Although Tofu makers as a whole believe that modernization and automation cannot be accomplished with Tofu in the form it is because of its distribution, a few individual makers are making real progress, such as frying Aburaage while it continuously moves through an oil container on a stainless steel conveyor.

“Unfortunately as with many traditional industries in Japan, old methods are adhered to as if they were part of the maker. This is fact is partly true but such makers are going to suffer the most when innovation is finally realized. A traditional industry in Japan is bound by a great number of customs and rules that are not written but not bound as yet to scientific measuring, weighing, testing, and providing adequate sanitation, even though there is one government inspection per year. The latter seems to be especially important as Japan’s large modern industries are showcases of sanitation but yet people do not have concern when they are handed a piece of Aburaage with the same hand that a moment before connected a fuel oil pipe to the boiler.

“Marketing tofu products: For Tofu products these are five chief sales places or ways of selling:

- “(1) Directly at the shop
- “(2) By Tofu peddlers (carrying particular sounding

horns to announce their presence and pulling carts by hand or bicycle as seen in Figure 63)

“(3) Maker owned sales outlets in market places

“(4) At shops in and outside of markets where other foods are also sold (see Figure 64)

“(5) To institutions, school, and factories

“Because of the nature of Tofu, its manufacture is not conducted in the manufacturing section of a city or village but rather in an area of dense population. This indicates the lack of zoning laws that Japanese citizens live with but such is necessary for the Tofu maker. So located, the housewives of the immediate area stop at the Tofu shop on their way home from shopping for other foods, or as is the case in the morning, go directly from their home and buy Tofu, to put in the every day soup, *Miso-shiru*. Most often the housewife carries a pan to carry the wet Tofu, but at present a machine which seals plastic around an order for about \$.006 (0.5 yen) is becoming popular. This machine is becoming used for a great number of foods although \$.006 is still a high cost for packing Tofu.

“If a particular shop is small the owner himself may take care of peddling Tofu door to door. If somewhat larger his employees will do same and if in the wholesale class, independent peddlers will buy and sell for themselves. The independent peddler can buy Tofu from the wholesaler for \$.041 (15 yen) and sell it for \$.056 (20 yen) so can make more money counting other related products than he could working in a factory. There is no equivalent of the Tofu peddler in the U.S. except possibly the milk deliverer but the Tofu man may pass each area three times a day and deals personally with his consumers although always maintaining the status of a peddler. More progressive Tofu makers may own one or more shops in a market place and have one or two employees handle his entire line. This type of venture probably earns the greatest amount of money for the maker as more people can be contacted with less effort and time. Unfortunately there are so few market places in relation to the number of Tofu makers in any particular area.

“The Tofu wholesaler and even retailer sells Tofu at wholesale prices to many shops such as the one pictured in Figure 64. This type of sale is not so profitable for the maker or for the end seller as volume is so small and delivery must be every day. As the number of markets increase this type of seller will decrease in number.

“Sales to hospitals, schools, and factories offer volume outlets but since such sales are so competitive, custom necessitates discounting, so profit is not large although demand is somewhat predictable. Many of the firms that only wholesale Tofu aim for this market. Food sales to factories assume an unusual proportion compared with counterpart industries in the U.S. because as job fringe benefits, dormitories, breakfast, lunch, and dinner are often provided. The quality of such benefits is somewhat debatable but it is sure that Tofu products are used so that less meat need be.

“Preservation: One of the greatest disadvantages of Tofu is that it cannot be stored for a great length of time. By test if regular Tofu is kept in water that is under 5°C it lasts for one week, if stored in 10°C water it will last two days. If stored in water above 15°C it will only last for one day and except for certain winter days the latter is the most real case so every day delivery is necessary. Aburaage is easier to market especially in winter as it lasts about one week however in summer it lasts the same as regular Tofu. Besides taste, preservation is the only other major problem confronting the automation of the Tofu industry. Quantitative production could most likely be achieved but distribution would have to be conducted in the same way so increased delivery cost would most likely outweigh the costs of local production that is now prevalent. The only solution seems to be what numerous places have tried without success and that is for many small makers in one area to combine, incorporate, and construct an automated factory with each of the combined members assuming a directorship. Delivery is still within the area covered by the makers acting separately while economies of scale are achieved because of size and such a method is probably the only way that capital could be raised. Outside investors including most banks do not consider the prospects of the Tofu industry favorably so will not invest. An individual maker even if successful does not have but a small part of the money necessary for constructing and operating an automated factory. One problem that constantly exists wherever these combines are formed is that the individual maker after having decided all business matters himself for many years cannot adjust to group decision making by the corporate board. This problem has until the present caused the combines to fail

“Price: The price of Tofu has been increasing but it is still a low cost item on the food budget. Regular Tofu sells for \$.06 (20 yen), production costs approximately \$.03 (11 yen) with the wholesale price at \$.042 (15 yen). This would seem to indicate that the makers who own outlets have quite wide profit margin while those that only wholesale have to operate on a much narrower margin. Such wholesalers producing around 560 regular Tofu per day would only earn \$6.23 (2,240 yen) with quite a large amount of capital investment given the Tofu industry. Yakidofu although taking less time to produce has to be handled more (roasting) sells at the wholesale and retail level at the same price as regular Tofu. Yakidofu also contains less water. It is unsure why the makers make such sacrifice but probably demand for Tofu would decrease if that type was not available at the same price as Shiradofu [Shirodofu?]. Housewives could not substitute regular Tofu in the place of Yakidofu so they might very well substitute a completely different product. One of the 24 pieces of Kinugoshi contained in the Kinugoshi tank sells for \$0.44 (16 yen). Aburaage retails at \$.056 (20 yen) but because of the oil used in frying, cost of production is \$.033 (12 yen) in contrast to \$.03 (11 yen) for regular Tofu.

This is compensated for by the fact that Aburaage lasts longer than regular Tofu so there is less waste. Both Hiroso and Atsuage wholesale for \$.014 (5 yen) and retail for \$.019 (7 yen).

“As mentioned previously profit margin appears to be adequate (considering all products over 35 percent) however volume is a real problem” (Continued).

Table 16 (p. 189) gives the chemical composition of tofu and aburaage (per 100 grams). Table 17 (p. 190) gives the quantity of soybeans and soybean meal used in Japan for making tofu and aburaage products (1956-1963, year starting April 1). The amount of whole soybeans used increased from 143,800 metric tons (tonnes) in 1956 to 285,100 tonnes in 1963. The amount of [defatted] soybean meal used increased from 3,200 tonnes in 1956 to 65,000 tonnes in 1963.

Address: San Francisco, California.

462. Brandemuhl, William. 1965. Tofu (including Aburaage and related products): Recently developed Tofu products, Tofu as a food, concluding remarks (Continued—Document part VI). In: William Brandemuhl. 1965. Soybean Utilization in Japan. San Francisco, California. xxii + 478 p. See p. 137-201, Unpublished manuscript. 28 cm. [18 ref]

• **Summary:** (Continued). Recently two revolutionary Tofu products were developed improving some of the defects of Tofu in its present form. The first product (bagged Tofu; see Figure 65) is more akin to regular Tofu in that it can easily be made in the ordinary Tofu shop if a few additional pieces of equipment are procured. This equipment is now available commercially so most makers that are interested purchase it. Tonyu is prepared in the same way as for regular Tofu and then stored in drums without being precipitated. It is then put into a machine that delivers a certain quantity of Tonyu at 20-25°C into a plastic bag along with a small quantity of precipitating agent. The bag is then bound by wire with a manually operated machine or bound by hand with a multi-looped rubber band. With this process the Tonyu plus calcium sulfate is compressed into a tight round cylinder so that only a few air bubbles remain. Then a large number of the bags are put in a barrel of water heated with live steam and cooked for 30 minutes at a temperature slightly under boiling which precipitates the Tonyu into curd. The finished product is a very smooth round shaped piece of Tofu 250 grams in weight which need not be stored in water and lasts one week without deterioration. Such a product might retail for \$.069 (25 yen), wholesale for \$.05 (18 yen) and costs about \$.044 (16 yen) to make. If too much calcium sulfate is added the curd separates from the water and if too little the Tonyu does not solidify, however an element of standardization can be effected in making this product even in the small shop.

“Another product called “Proton” is very similar as an end product although a soybean meal processed specifically for Tofu is used to make the Tonyu and factories producing

Proton operate on a automated mass production scale. Proton has most of the advantages of bag Tofu and many additional ones.

“Both of these products are experiencing only a small degree of success however as the tradition based Tofu industry is not supporting such products to any great extent, especially Proton which potentially could put many small Tofu makers out of business. In addition the taste of both bagged Tofu and Proton is supposedly inferior to regular Tofu and consumers greatly hesitate accepting a round shaped piece of Tofu in place of the usual rectangular one. In recent years Japan has increasingly accepted completely new products, however when such product is a substitute for a traditional one such new product only slowly gains acceptance. All of the above factors inhibit the growth of the enterprising firms that are developing new Tofu products, ones that with slight modification will become the future Tofu of Japan.

Tofu as a food: One might say that Tofu products can be used in nearly all Japanese food dishes although a few uses account for most of Tofu consumption. Both regular Tofu and Aburaage are used more than any other way in the every day breakfast soup Miso-shiru (see Figure 66) a dish that has Miso as a base with Tofu, Aburaage, and vegetables also contained.

“Nearly all Yakidofu is used in that famous Japanese dish Sukiyaki. Although it may occasionally be used as shown in Figure 67, that is, covered with Miso and placed over low heat for an item called Dengaku. Besides Miso-shiru, Aburaage in its various forms is eaten with rice shaped as shown in Figure 68 or in the same way that raw fish is eaten with rice. Another important way in which Aburaage products are used is as a protein source for the many types of noodle soups that exist in Japan. Aburaage is particularly suited for a 100 percent wheat noodle called Udon.

“A very famous regular Tofu dish (Yudofu) originated in a Buddhist temple and is now also often eaten at home. A large casserole dish is filled with water, heated (very often over charcoal in temples) while a sheet of dried sea tangle [konbu] clings to the bottom inside surface and a jar of Shoyu-based sauce standing upright in the center of the container (see Figure 69). A few minutes is all that required to cook Tofu (Tofu should not be overcooked as it becomes porous) after which it is put into a small bowl of the sauce which contains Shoyu, green onions, and ginger (see Figure 70). A small number of restaurants specialize in preparing only Tofu but although all quite famous by preparing 60 dishes made from Tofu. Such places are not common dining places as when served as an only food Tofu becomes boring even for the Japanese. Such traditional restaurants may be reserved two to three weeks in advance because of their uniqueness. Japanese housewives sometimes use the near tasteless Tofu as an extender putting it into meatballs, hamburgers, or scrambled eggs, while the fish sausage

companies use Tofu as a fish extender for cheaper fish sausages.

“Kinugoshi is the only kind of Tofu which is usually eaten without cooking as it is served from ice water into a dish which contains Shoyu, ginger, and possibly green onions.

“The above indicated a great variety of uses for the easily digested Tofu products. In addition, Tofu or Aburaage may be used as the main ingredient of many other dishes as in the examples below,

“Tofu:

“Tofu pudding

“Whale meat rolled in Tofu

“Tofu and vegetables boiled with tomato sauce

“Tofu dumplings and meat,

“Tofu hamburgers

“Tofu vegetable soup

“Tofu salad

“Aburaage:

“Okara stuffed Aburaage

“Fried Hiroso with vegetables

“Concluding comments: Tofu the product that has survived hundreds of years of Japanese history is now experiencing somewhat of a crisis as Japan’s economy and most industries are expanding at a rate that is without equal. Per capita demand for Tofu is decreasing so if population increase was not causing absolute quantity consumed to increase soybeans would slowly decline in importance as the chief soybean food. Japan’s population growth has been quite high but efforts have been undertaken to stabilize growth so even Tofu may feel the effects.

“Tofu being such a well known food never had to be advertised, but recently to compete with the heavily advertised western type foods Tofu producers have had to. For a small Tofu maker, advertising is impossible so the local association is used but its economic situation is not the best either so advertisement assumes a completely different form than the advertisement of the large food companies. The latter most often uses expensive television spots while it is doubtful whether Tofu has ever been advertised on television. Instead the Tofu association may solicit funds from their raw material suppliers (large companies) to publish a small pamphlet for distribution by the maker in proportion to his share of production relative to total production of all members. This is generally true however the large makers will support such advertisement even if the smaller maker is favored.

“Another method of advertising is to engage a temple to create a festival honoring an aspect of Tofu. This results in free newspaper space as most always such festivals are covered by a feature writer (a number are sure to be invited). How effective each advertisement is a debatable question but it is sure that such efforts will not eliminate the increasing need for modernization and rational business decisions.

If such is not achieved economic factors will cause much suffering among thousands of Tofu makers. Tofu making can no longer remain the family business it is when a large productive unit such as a few that do exist successfully and efficiently produce if originally founded in a correct way. Progress may have been long in coming for the Tofu industry but the climb has started. The question that remain however is whether most Tofu makers will join.” Address: San Francisco, California.

463. Seventh-day Adventist Dietetic Assoc. 1965. Diet manual, utilizing a vegetarian diet plan. Revised edition. Loma Linda, California: Seventh-day Adventist Dietetic Assoc.

• **Summary:** The title page reads: “Prepared by the Department of Dietary Service, White Memorial Medical Center, Los Angeles, California. In cooperation with the Seventh-day Adventist Dietetic Association” (SDADA). Revised Edition, edited by Phyllis Acosta, M.S., Ardis Beckner, M.S., Esther Lee, M.S., Darlene Manullang, M.S., Martha Miller, M.S., and Elizabeth Wenz. It was published and distributed by the SDADA. All subsequent editions (1971 (later listed as 1970), 1975, 1978, 1982, 1990) were prepared by the SDADA.

A comprehensive loose-leaf handbook for the planning, selection, and coordination of vegetarian diets.

Table VI, titled “Protein, fat, and carbohydrate composition of some meat alternates” (p. 104), lists 39 product names alphabetically. Most (perhaps all; the names of the manufacturers are not given) are made by Seventh-day Adventist food companies, especially Loma Linda Foods, Worthington Foods, and Madison Foods. These products are: Big Pat, Burger, Chic-ketts, Chili, Cho-Pats, Choplets, Com-Pro, Dinner Cuts, Dinner Rounds, Entree, Frozen Fri-chic, Linketts, Little Links, Meatless Nu-steak, Madison Burger Miller’s Main Course, Numete, Nuteena, Nut Meat, Prime Vegetable Burger, Proast, Proteena, Protose, Redi-Burger, Sandwich Spread, Soya Meat–Beef Like, Soya Meat–Chicken-like, Vegebites, Vegeburger, Vegechee, Vegecuts, Vegecona, Vegetable Skallops, Vegetable Steaks, Vegetarian Patties, Vegetarian Products, Vega-Links, Vigoroast, Zoyburger.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the term “Soya Meat” to refer to a meatless meatlike product made from soy. Address: Main Office, Box 75, Loma Linda, California.

464. Sweet-Escott, Bickham. 1965. Baker Street irregular. London: Methuen & Co., Ltd. 278 p. See Chap. 7, p. 200. Index. 23 cm.

• **Summary:** This is a book personal account of five years (from April 1940) the author spent in the S.O.E. (Special Operations Executive), a secret British paramilitary organization organized to fight World War II. The

organization's headquarters was at No. 64 Baker Street from Nov. 1940 until the end of the war. In Jan. 1943 the author traveled from Cairo (Egypt) to various North African Airports (such as Casablanca, Fez, Rabat, and Marrakesh [all later in Morocco]), then finally to London, where he enjoyed being home again.

"By the middle of February [1943] I was back once more in Cairo with an even wider knowledge of North African cities and an unrivalled experience of the various methods of cooking that unspeakable dish, the soya link, the staple diet of the British in the Mediterranean campaign."

Note: This is the earliest English-language document seen (Aug. 2003) that uses the term "soya link" to refer to a soy sausage. Address: [England].

465. Worthington Foods, Inc. 1965? A food plan for fitness (Leaflet). Worthington, Ohio. 2 p. Undated. Front and back. 28 cm.

• **Summary:** This glossy color leaflet contains a "Daily food guide for growth, energy, maintenance and resistance." It recommends a vegetarian diet containing: 4 or more servings daily of fruits and vegetables. 3 or more servings daily from the milk and cheese group (incl. Soyamel—A Powdered Soy Milk). 2 or more servings daily of protein foods (incl. many canned or frozen Worthington products). 4 or more servings daily of breads and cereals. Limited servings daily of "Plus foods" such as oils and fats, sweets, desserts, etc.

On the back panel is a description of the vitamins and minerals needed in a healthy diet. Color photos show: Prime, White-Chik, Big Pats, Soyameat, Chili, Choplets, Veja-Links, Entrée, Prosage. Address: 900 Proprietors Rd., Worthington, Ohio 43085.

466. Worthington Foods, Inc. 1965? Recipes: Delight the family with Worthington... "Foods of the future" today! (Brochure). Worthington, Ohio. 12 panels. Undated. Each panel: 21 x 10 cm.

• **Summary:** On the cover of this brochure, printed with dark blue ink on white, is a woman holding up an oval serving plate on which are round sliced meat-like products. The Worthington products called for in these recipes and shown in these photos are all made with Fibrotein, which Worthington's registered trademark used to refer to spun soy protein fibers. Photos shows five cans of Soyameat in Fried Chicken Style, Sliced Chicken Style with Gravy, Diced Chicken Style, Beef Style Slices with Gravy, and Diced Beef Style. They also show three frozen products in cartons: White-Chik, Fri-Chik, and Wham (like ham). Prime—Smoked & Chipped is in a plastic pouch, and Prosage is in a 1 lb sausage-shaped chub pack. Recipes are given for each. On the back panel is information about these products and Fibrotein, which is produced under U.S. Patent No. 2,682,466. Address: 900 Proprietors Rd., Worthington, Ohio 43085.

467. Worthington Foods, Inc. 1965? Typical analyses—New Fibrotein products (Leaflet). Worthington, Ohio. 2 p. Undated. Front and back. 14 x 22 cm.

• **Summary:** This is a table, printed with black ink on glossy white paper, with 3 holes punched along one of the long sides. For each product is given the nutritional composition: Product name, serving size and weight of one portion, slice, link, etc., protein, fat, carbohydrate, ash, fiber, moisture, iron, calcium, sodium, calories, diabetic exchange list values.

Side 1: Worthington frozen products: Fri Chik, White Chik (roll), White Chik (diced), Prime (roll & sliced), Prosage, Veja Links, Wham (like ham).

Side 2: Worthington canned products—Soyameat label: Fried Chicken Style, Diced Chicken Style, Sliced Chicken Style, Beef Style with gravy, Veja Links.

Dehydrated product: Meat Loaf Mix. Address: 900 Proprietors Rd., Worthington, Ohio.

468. Hartman, Warren E. 1966. Vegetarian protein foods. *Food Technology* 20(1):39-40. Jan.

• **Summary:** "Early Worthington products bore the mark and influence of John Harvey Kellogg and the Seventh-Day Adventists. In 1866 the Adventists established the forerunner of the Battle Creek Sanitarium and the Battle Creek Food Company, in Michigan. Continuous experimentation with materials and methods to provide a wholesome palatable non-flesh diet led to the invention of breakfast cereals, peanut butter, cereal coffee substitutes, and decaffeinated coffee. It is not generally realized that these products, now a regular part of the diet of both meat-eaters and vegetarians, emanated from the vegetarian habits of the early Adventists."

"Until recently, the majority of the U.S. population was totally unaware of the so-called vegetarian protein food products, and the food industry gave them little more than passing attention. Undoubtedly, the greatest contribution to the present technology and status of vegetarian protein foods was that of Robert A. Boyer and his method of processing edible protein, first by solubilizing and then utilizing textile spinning techniques to orient the molecules in continuous filaments. Convinced of a future for vegetarian protein foods, Worthington obtained a license in 1957 under the Boyer patent..."

"In 1960, Worthington acquired Battle Creek Food Company, pioneer of the vegetarian protein foods industry. And in line with its modernization and diversification policy, Worthington has recently acquired Nutrition International Corporation and its subsidiary, Madison Foods, Tennessee. Prime interest focused on 'Infa-soy,' Nutrition International's highly palatable hypoallergenic liquid soy formula for infants. Another important addition to the Worthington complex is the new Research and Development Center..."

"The first textured soybean protein fiber product marketed in the U.S. is Worthington's frozen 'Fri-Chik,'

an extruded formulation simulating a small fried portion of white chicken meat. This same formulation was next canned in a light gravy and called ‘Soyameat–Fried Chicken Style,’ and was also later marketed as frozen and canned ‘White-Chik’ in large rolls for slicing, dicing, etc. The approximate analysis of these simulated chicken products: protein 20-26%, fat 18-25%, and carbohydrate 2-3%.”

Note: This is the earliest English-language document seen (Dec. 2004) that uses the term “soybean protein fiber” to refer to edible spun soy protein fiber. Address: Worthington Foods, Inc., Worthington, Ohio.

469. Ziemba, John V. 1966. Create new foods with textured soy proteins. *Food Engineering* 38(4):58-60. April.

• **Summary:** The subtitle reads: “Spending big money on meats in formulation of new products? Then consider using meat analogs which have texture and flavor resembling regular meats—beef, ham, bacon, chicken, seafood.”

Discusses Bac\*Os and Bontrae. Textured soy proteins recently developed by General Mills, Inc. (GMI) are already being used commercially as a “Smoky Crisp” ingredient in Corn Products’ Best Foods Div. Skippy peanut spread. General Mills is test marketing them as Bacon Bits (as garnish or condiment) in Bac-O-Chips for the institutional trade and Bac\*Os under the Betty Crocker consumer label. These products are “textured meat analogs, which GMI has registered under the name Bontrae.” They are made from spun soy protein fibers. “These spun monofibrils are then blended with supplementary ingredients (fats, egg solids, sugars, etc.), binders, flavors, and colors. They are then cooked (to heat-set) and shipped frozen (55 to 60% moisture) or dried (2% moisture). A.D. Odell is manager of the GMI Isolated Protein Program.

Label are shown for a jar of Bac\*Os and a jar of Skippy Peanut Butter with Smoky Crisps.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word “analog” (or “analog”) or the term “meat analogs” (or “meat analog”).

Note 2. This is the earliest document seen (Oct. 2001) that mentions “Bontrae,” General Mills’ new line of textured soy protein products based on spun soy protein fibers. Address: Senior Assoc. Editor, Food Engineering magazine, Chicago.

470. **Product Name:** Bontrae (Meat Analogs Based on Spun Soy Protein Fibers) [421-01 Ground Beef Analog, 637-00 Diced Ham Analog, or 837-00 Diced Poultry Analog].

**Manufacturer’s Name:** General Mills, Inc.

**Manufacturer’s Address:** Minneapolis, MN 55427.

**Date of Introduction:** 1966 May.

**Wt/Vol., Packaging, Price:** Costs 1/3 to 2/3 the cost of the corresponding cooked meat.

**Nutrition:** 40% spun protein fibers, 10% protein binding system, 20% fat, 30% flavors, colors, and supplemental

nutrients.

**New Product–Documentation:** Ziemba. 1966. Food Engineering. May. p. 82-91. “Let soy proteins work wonders for you.” Ziemba 1966. Food Engineering. 38(4):58-60. “Create New Foods With Textured Soy Proteins.” Thulin and Kuramoto. 1967. Food Technology. Feb. p. 64-67. “Bontrae: A New Meat-Like Ingredient for Convenience Foods.”

471. Tawa, Andre. 1966. Soy oil to help meet UAR demand. *Soybean Digest*. May. p. 80-81.

• **Summary:** SCA has maintained its showcase in Cairo and participated at the Cairo Third Industrial Fair. The SCA “theme was ‘Soy products serve UAR industry.’ The fair was visited by over 1 million people and the Council “stand was seen by 150,000 inquirers, some of whom tasted ‘taamia’ (beanburgers) fried in soy oil. The fair was so successful that it was extended 30 days.”

The Egyptian poultry industry is expected to consume 4,000 tons of soybean meal in 1966, increasing to 10,000 tons in 1967.

Photos show: (1) Andre Tawa. (2) The Soybean Council stand during the winter of 1966. “‘Taamia’ (beanburgers) made with soybeans fried in soybean oil were much appreciated.” Address: Director for UAR, Soybean Council of America.

472. Ziemba, John V. 1966. Let soy proteins work wonders for you. *Food Engineering* 38(5):82-84, 87-90, 93. May.

• **Summary:** The subtitle reads: “With far better quality and functional properties, soy proteins are finding ever-increasing uses in foods. You can ‘engineer’ new foods or improve your current products—at more profit, too.”

Contents: Introduction to soy proteins—flours, concentrates, and isolates. Soy flours and grits. Who’s supplying what. Benefits in quality, cost. Values of soy concentrates. Varieties of concentrates. Highest protein: Isolates. Soy proteins added to egg albumen. Versatility of isolates. Foams and gels. Fiber technique emerges: Worthington’s accomplishments (“First textured soy protein fiber product marketed as Worthington’s frozen Fri-Chik—an extruded formulation simulating a fried portion of white chicken meat”), problems ahead. Texturizing in other ways.

“New process techniques have been ‘engineered’ into making soy proteins better so far as quality and function are concerned... Last year about 250 to 300 million lb of soy flours and grits went into formulating food products. About 7 million lb of concentrates and 9 million lb of isolates were used. Present estimates indicate that flours and grits are increasing at a 5% per year rate, concentrates and isolates at about 10% each.” Who supplies what? Soy flours and grits: ADM, Central Soya, Crest Products, Staley. Soy protein concentrates: ADM, Central Soya, Crest, Griffith, Gunther Products, Ranell Labs., Swift & Co. Isolated Soy Proteins: Central Soya, Crest, Gunther, Ralston Purina. Spun isolate

fibers: ADM, General Mills, Ralston Purina, Worthington Foods. Textured Soy Proteins (extruded grit-type): ADM, H.B. Taylor.

“Archer Daniels Midland is currently researching with a patent-applied-for extrusion process. Product (about 50% protein) can be shaped into many fibrous, textured forms—chips, chunks, flakes, slabs, wafers, or puffs. But whole meat-resembling pieces can’t be formed.

“Company’s selling product-development lots in various sizes, shapes and flavors. Customers are planning or test-marketing ADM’s ‘fabricated protein’ in stews, chili, and casserole products. Potential market for chunky, ground or snack-type products is likely to be much greater than the one for simulated whole meats.” Note: This is the earliest document seen (Sept. 2003) that mentions textured soy flour or grits produced by an extrusion process—later widely known by its ADM trademark as TVP.

“Worthington’s simulated meats made from spun soy protein fibers (Fibrotein) come in cubes, slices, chips, granules, rolls, square logs, or other shapes and sizes. They are in fresh, frozen, or dehydrated forms” (p. 93).

Photos show: (1) Soy protein fibers, plus chunks and cubes made from fibers. The caption reads: “Simulated meats can be ‘engineered’ readily from soy protein fiber shown in the center of these General Mills products.” At lower left, going clockwise: ‘bacon’ chips, ‘beef’ granules, ‘chicken,’ ‘beef’ chunks, ‘ham,’ and ‘seafood.’ (2) Many of Worthington Foods’ packaged meatless foods made from textured soy protein fiber; they are canned, frozen, smoked, diced, sliced, or formed into rolls or sausages. (3) Spun soy protein fiber coming out of a spinnerette head (in a glass beaker). (4) Joseph Rakosky operating an electrophoresis apparatus at USDA’s Northern Regional Laboratory (NRRL, in Peoria, Illinois). (5) Edible soy protein foam on a meringue pie, developed by USDA at NRRL. (6) A.K. Smith watching Tokuji Watanabe making “tofu cake” by an improved process at NRRL. Address: Senior Assoc. Editor, Food Engineering magazine, Chicago.

473. *Time*. 1966. Commotion in the bean pit. 88:77-78. July 8.

• **Summary:** The soybean is now “the hottest item in the seething U.S. commodities market. Last week futures for soybeans, soybean oil and soybean meal set seasonal records after a month of wild trading.” Prices tripled during the month.

“Introduced to the U.S. from Asia in 1804, the soybean did not become a significant agricultural product until World War II cut off normal U.S. imports of fats and oil. From a crop of 193 million bu. in 1945, output rose to 843.7 million bu., worth nearly \$2.5 billion last fall. Soybeans are the U.S.’s most valuable agricultural export, ranking ahead of wheat and corn...

“Worthington Foods Inc. takes edible soybean

fiber produced by Ralston Purina, turns it into meatless frankfurters, roast beef and fried chicken, sells them to Seventh-day Adventists and vegetarians. Archer-Daniels-Midland Co. is testing a soy beverage to be sold in powder form, and Central Soya has developed an ice cream-like frozen dessert made of soybeans.

“What interests researchers the most about the soybean is its high protein content (up to 50%), and this month Central Soya will begin mass production of Promine, an isolated soybean protein, at a new Chicago plant. Promine binds and emulsifies pulverized meats, such as sausages, meat loaf and bologna.”

474. *Business Week*. 1966. Soybeans move up on the menu. July 23. p. 82, 84, 87.

• **Summary:** “General Mills, under its Betty Crocker Red Spoon trademark (A.D. Odell in charge), is test marketing the first of a series of projected foods spun out of a protein isolated from soy. Called Bac\*Os, it is designed as a condiment and looks and tastes like lean, crumbled, cooked bacon. Priced at \$0.69 for 3.25 ounces, the jar is equal to 1 lb of cooked bacon.” Corn Products’ (CPC) Best Foods Div. is marketing Skippy peanut butter containing the product. “Thomas J. Lipton, Inc., a Unilever subsidiary, recently launched four dried gourmet main dish meals including beef stroganoff and chicken la scala. Lipton has patented a process to use isolated soy protein (ISP) as a binder for dried meats... Ralston Purina has developed a series of spun soy protein foods resembling ham, chicken, and turkey out of ISP. It is selling its spun ISP base, Edi-Pro, to Worthington Foods Inc. Worthington has developed its own line of chicken and ham-like products for sale to religious groups.

“Central Soya makes an isolated soy protein binder called Promine, which goes into sausage and other processed meats. Sales of the binder at \$0.35/lb—twice the cost of the binder it is replacing—are so promising that production will be doubled to 2.5 million lb monthly when a new plant opens in Chicago next month... In addition the company this fall hopes to start exporting a frozen soy dessert to tropical countries with no dairy industries.” General Mills, Ralston, ADM, Central Soya, and Worthington combined spend some \$4 million annually on research. Half of this sum is going into basic research and half into product development. ADM recently shipped 3 million lb of a new protein rich soy beverage to Latin America and the East Asia under a USDA program.

475. *Cornell Hotel and Restaurant Administration Quarterly*. 1966. Man-made “meat.” Why? 7:19-20. Aug.

• **Summary:** The article begins: “Why should U.S. scientists develop meat-like products from vegetable protein? And will meat-eating countries accept this food? American scientists are developing simulated meats from soybean and other oilseed proteins to help alleviate the world’s protein

shortage... These protein ‘meats,’ however, can upgrade the diet of countries with high meat prices, protein shortages, and religious taboos against meat-eating as in southern India.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Man-made ‘meat’” (or “meats,” with any combination of quotation marks or hyphens). Address: Cornell Univ.

476. Odell, A.D. 1966. Meat analogues: A new food concept. *Cornell Hotel and Restaurant Administration Quarterly* 7:20-24. Aug.

• **Summary:** “Despite spectacular increases in food production, the stupendous growth in total world population spells drastic food shortages ahead.” Food science is focusing efforts on the development of new solutions to the food dilemma. The conversion of “feedstuffs by animals into meat is often less than, and seldom better than, 10 percent.” We can shorten the food chain by developing new man-made protein sources. “One such candidate is the new class of textured, high-protein foods which has been made possible by the application of textile technology to the purified proteins which may be extracted and isolated from soybean meal, for example.”

“The name Bontrae has been coined for General Mills’ spun specialties.” A diagram shows how Bontrae granules, cubes, bits, and slices are made from “protein spinning dope” by spinning to give “protein fibrils.” Photos show: (1) A “tow” or “tissue” of “16,000 individual, endless monofilaments, spun from soy protein through a spinneret with holes of 0.003 inch diameter” [by General Mills]. (2-4). Smoky Chips (a soy product tasting like crisp bacon), ham, chicken, and fish analogs, Sloppy Joe, etc. A product closely similar to General Mills’ Smoky Chips “is being supplied to the Best Foods Division of Corn Products as ‘Smoky Crisps’ for inclusion in a new version of Skippy Peanut Butter.”

“The Isolated Protein Program of General Mills represents a major research effort involving nearly fifty people, which is dedicated to the above objectives. Although currently still in the research phase, various Bontrae items are now emerging into the commercial test market. Full scale commercialization, if warranted, will probably not be achieved before early 1968. Other commercial firms, notably Ralston-Purina Company and Worthington Foods, are engaged in similar programs.”

Note 1. This is the earliest English-language document seen (Nov. 2014) that uses the term “meat analogues” (or “meat analogs”) in the title.

Note 2. This is the earliest English-language document seen (Dec. 2004) that uses the word “monofilaments” to refer to edible spun soy protein fibers. Address: PhD, Manager, Isolated Protein Program, General Mills, Inc., Minneapolis, Minnesota.

477. *British Vegetarian*. 1966. “Soya Steaks.” Sept/Oct. p. 411. [1 ref]

• **Summary:** This article is excerpted from *SCATS Sentinel, Journal of the Southern Counties Agriculture Trading Society*, June 1966.

A recent technical report from Trouw & Co., N.V., of Amsterdam, states that products resembling steaks, chickens, and ham are now being made from soya, using spun soy protein fibers. In the USA, General Mills, Ralston Purina Co., and Worthington Foods (Ohio) are working on spinning, and in England Unilever is reported to be interested. Worthington Foods has developed a full line of products that look, taste, and chew like chicken, beef, and pork products. Wham is a ham-like product and White Chic is simulated chicken. A photo shows a label of Worthington Soyameat Salisbury Steak Style.

478. Worthington Foods, Inc. 1966. Dealer wholesale price list—order blank. Worthington, Ohio 43085. 1 p. Dec. 1. 36 cm.

• **Summary:** New products in the Worthington Foods line include: Soyameat [or Soya-Meat] (Fried chicken, sliced chicken, diced chicken, sliced beef, diced beef, Salisbury steak). Bakon Yeast.

Worthington now owns the Madison Foods line of products including: Cheze-O-Soy, Dinner Morsels. Madison Burger, Not Meat (Regular or tomato). Nu-steaks. Yum. Zoy burger. Kreme-O-Soy. Infasoy.

Worthington now has warehouses in Battle Creek, Michigan; Dallas, Texas; Denver, Colorado; Los Angeles, California; Madison, Tennessee; South Lancaster, Massachusetts; Oakland, California (actually San Leandro); Portland, Oregon; Washington, DC. Address: Worthington, Ohio. Phone: 614-885-9511.

479. **Product Name:** Loma Linda Chili Beans (Meatless with Pinto Beans and Soy Protein).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1966.

**Ingredients:** Water, pinto beans, tomato puree, textured soy granules, corn oil, salt, paprika, spice, natural (vegetable) flavor, wheat flour, onion powder, sugar, monosodium glutamate, garlic powder, soy lecithin.

**Wt/Vol., Packaging, Price:** 15 oz or 48 oz cans.

**How Stored:** Shelf stable.

**New Product—Documentation:** Manufacturer’s catalog. 1987, undated. “Meatless chili with a zesty flavor. Made of pinto beans and tasty soy protein. Heat and serve.”

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1966.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix

A.6-27.

**480. Product Name:** Loma Linda Big Franks (Meatless Hot Dogs).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Wheat protein [wheat gluten], vegetable oil, water, dried yeast, wheat germ, garlic, paprika, soy flour, MSG, onion, flavorings, caramel and U.S. certified color.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per one frank (1.8 oz–51 gm): Calories 100, protein 10 gm, carbohydrate 4 gm, fat 5 gm, cholesterol 0 mg, sodium 220 mg, potassium 75 mg.

has been added.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1966. The ingredients are now: Wheat gluten, corn oil, water, dried yeast, soy protein concentrate, artificial and natural (vegetable) flavors, wheat germ, soy flour, onion, vegetable mono- and di-glycerides, garlic powder, salt, soy lecithin, caramel color, L-lysine, paprika, artificial color, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Broth: Water, salt.

A less sophisticated version of this product with the same name was introduced in 1953.

**481. Product Name:** Soyameat (Meatless Meats) [Fried Chick, Sliced Chick Style, Diced Chick Style, Sliced Beef, Diced Beef Style, or Salisbury Steak].

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** Beef: Slices: Textured soy protein isolate, egg whites, soybean oil, wheat flour, partially hydrogenated soybean and cottonseed oil, yeast extract, flavorings (hydrolyzed vegetable protein, monosodium glutamate, onion powder, artificial flavor), caramel color, corn syrup solids, salt, dextrose, niacinamide, iron (as ferrous sulfate), artificial color, vitamin B-1 (thiamine mononitrate), disodium guanylate, disodium inosinate, vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12. Broth: Water, modified corn starch, soybean oil, yeast extract, flour, flavorings (onion powder, celery extract), dextrose, caramel color.

**Wt/Vol., Packaging, Price:** 13 oz can. Sliced Beef Style (13 oz) retails for \$2.20. Sliced Chick (13 oz) retails for

\$2.30. Diced Chick (13 oz) retails for \$2.45 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening. Or, Frozen.

**Nutrition:** Per 2 slices (56 gm drained): Calories 90, protein 8 gm, carbohydrate 4 gm, fat 5 gm, cholesterol 0 mg, sodium 290 mg, potassium 45 mg.

**New Product–Documentation:** Soybean Blue Book. 1965. p. 112. "Canned and frozen soyameats, white meat style, fried chicken style, prime, prime-smoked and chipped, prosage, saucettes, wham, and veja-links." Worthington

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 160. Lists the ingredients in "Big Franks (Loma Linda Foods)."

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned frankfurter-type product.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. Lists the ingredients in "Big Franks (Loma Linda)." Lysine

Wholesale price list. 1966. Dec. 1.

W. Hartman. 1966. *Food Technology*. 20(1):39-40. "Vegetarian protein foods." The first textured soy protein fiber marketed in the U.S. was frozen "Fri-Chik." "This same formulation was next canned in a light gravy and called "Soyameat–Fried Chicken Style," as was also later marketed as frozen and canned "White Chik" in large rolls for slicing, dicing, etc."

Ziamba. 1966. *Food Engineering*. May. p. 82-93. "Let soy proteins work wonders for you." Photo of 6 cans.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 163. Lists the ingredients in "Diced Beef Style Soyameat (Worthington)." This is an institutional product. The ingredients are now: Water, soybean protein (Fibrotein), vegetable shortening, corn oil, albumin [egg protein], yeast extract, hydrolyzed vegetable proteins, salt, flavorings, caramel color, MSG, starch, U.S. certified color.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. "Soyameat–Salisbury Steak-like flavor" and "Soyameat–slices with beef-like flavor" are canned beef-like products based on spun soy protein fiber.

Product with Label purchased at Adventist Book Center, Pleasant Hills, California. 1990. July 8. Sliced Chicken is now called Sliced Chik, Diced Chicken is called Diced Chik, and Sliced Beef is called Sliced Soyameat–Sliced Beef Style. The main ingredients for Diced Chik are now: Textured vegetable protein (soy protein isolate and concentrate), egg whites, water, soybean oil, natural and artificial flavors from non-meat sources, modified food starch, salt, vegetable gum, onion, turmeric, celery, niacin, iron, etc.

482. **Product Name:** Salisbury Steak.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, textured soybean protein, vegetable shortening, oats, albumin [egg protein], yeast extract, hydrolyzed vegetable protein, plant extractives, flavorings, caramel color, MSG, vegetable gum, U.S. certified color.

**How Stored:** Frozen (in 1975).

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 176. The ingredients in "Salisbury Steak, frozen (Worthington)" are "wheat protein [gluten] and soy protein, Fibrotein [spun soy protein fiber], corn oil, vegetable shortening, albumin [egg protein], mushrooms, modified corn starch, yeast extract,

artificial flavorings, salt, HVP, caramel color, MSG, dextrose, vegetable gum, wheat and soy flours, sucrose, niacin, U.S. certified food color, iron, thiamin, vitamin B-6, pantothenic acid, riboflavin, vitamin B-12."

483. **Product Name:** Soyameat–Beef Style with Gravy.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Water, soybean protein, vegetable shortening, albumin [egg protein], yeast extract, hydrolyzed vegetable proteins, salt, plant extractive flavorings, caramel color, monosodium glutamate, starch, U.S. certified color.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Soyameat–Beef Style with Gravy." This is an institutional product.

484. **Product Name:** Soyameat Diced Chick Style.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Water, textured soybean protein [Fibrotein spun soy protein fiber], corn oil, albumin [egg protein], soybean protein, salt, monosodium glutamate, vegetable gum, starch, hydrolyzed vegetable proteins, flavorings.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Soyameat Diced Chick Style (Worthington)." This is an institutional product.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. The ingredients in "Chick Style, canned plain (Worthington)" are: Fibrotein [textured soy protein fiber], corn oil, egg white solids, HVP, starch, soy protein, salt, seasoning, MSG, carrageenan, certified color.

485. **Product Name:** Soyameat Fried Chick.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Water, textured soybean protein [Fibrotein spun soy protein fiber], corn oil, egg albumin, soybean protein, salt, MSG, vegetable gum, starch, hydrolyzed vegetable proteins, flavorings.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian*

*Diet Plan*. 3rd ed. p. 164. Lists the ingredients in “Soyameat Fried Chick (Worthington).” This is an institutional product.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. The ingredients in “Chick Style, fried (Worthington)” are “Fibrotein [textured soy protein fiber], corn oil, egg white solids, HVP, modified corn starch, soy protein, salt, MSG, artificial flavoring, carrageenan, niacinamide, thiamin, iron, vitamin B-6, U.S. certified color, riboflavin, vitamin B-12.”

**486. Product Name:** Soyameat Sliced Chick Style.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966.

**Ingredients:** In 1971: Soybean protein [spun soy protein fiber], corn oil, albumin [egg protein], isolated soybean protein, salt, MSG, vegetable gum, hydrolyzed vegetable protein, seasonings.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in “Soyameat Sliced Chick Style (Worthington).” This is an institutional product.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. “Soyameat–Sliced Chicken-like flavor” is a canned chicken-like product based on spun soy protein fiber.

**487. Product Name:** Chickettes (Meatless Chicken).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1966?

**Ingredients:** Incl. tofu, gluten, seasonings.

**New Product–Documentation:** Chickettes are based on Sam’s Chicken (developed by Sam Yoshimura), which was made from tofu, gluten and seasonings. Worthington substituted soy protein for the tofu.

**488. Fischer, R.W. 1967.** The use of soy in food products. *Soybean Digest*. May. p. 29, 31-32, 35-36, 38.

• **Summary:** An excellent overview, with considerable history. Contents: Introduction. Grisly hand of hunger. Soybean oil. Oriental soy foods. Soy flour and grits (with a good history of Berczeller, A.E. Staley, Shellabarger, Allied Mills, J.R. Short Milling Co. and Wytase). Isolates and concentrates. The war years (during and immediately after World War II, soy flour and grits come to be widely disliked). New products and know-how.

“Oriental soy foods:... In the Orient soybeans have, for centuries, played an important part in human diets as soy

milk for infants, shoyu, or soy sauce as we call it, miso, tofu, tempeh, kinako, natto, yuba, etc.”

“Isolates and concentrates: In the mid-1930’s processes for further refining the protein factors of soy began to appear. The first 70% soy protein concentrate was turned out by Mead Johnson Co. using the Bonato process of sulfur dioxide and sulfurous acid extraction, but was discontinued for lack of adequate markets for the product. In 1936 the Glidden Co. began working on the production of an isolated protein [90-100% protein] from extracted soy flakes for industrial uses. Glidden, as a major manufacturer of resin, wanted the isolate as a stabilizer for the resin used in sizing paper to provide wet strength. By 1939 Glidden was producing an enzyme hydrolyzed isolated protein to be used with egg albumen for its whipping capacity in producing food toppings... Over the years soy protein isolates have found their greatest application in the industrial field, particularly as paper coatings for high gloss products.”

A photo shows cans of Worthington Choplets, Soyameat (3 varieties), and Numete—all made from spun soy protein fibers. Address: Soypro International Inc.

**489. Odell, Arthur D. 1967.** Meat analogues from modified vegetable tissues. *USDA Agricultural Research Service*. ARS-71-35. p. 163-69. May. Proceedings of International Conference on Soybean Protein Foods. Held 17-19 Oct. 1966 at Peoria, Illinois. [7 ref]

• **Summary:** Discusses work on spun soy protein fibers (“protein monofilaments”) and meatlike products made therefrom. This program has been underway at General Mills for 4 years. Gives a detailed description of the process and equipment used to produce the bundles of fibrils, or “tows.” Bontrae is the registered trademark of General Mills, Inc. for spun protein food. A bacon analog named Bac\*Os is discussed and shown in a photo. There are also photos showing analogs of a diced ham, chicken, seafood, sloppy joe, and hamburger. A typical finished product contains (on a dry weight basis) 60% protein, 20% fat, 17% carbohydrate, and 3% ash. Roughly 1/3 to 2/3 of the finished product (on a dry weight basis) is spun protein fibers. “The balance is composed of vegetable or animal fats or both, flavors, supplemental nutrients such as vitamins and minerals, an all-important thermo-setting binding system [such as egg albumin], and other edible materials almost at the whim of the fabricator.” Address: Central Research Labs., General Mills, Minneapolis, Minnesota.

**490. Horton, Yvonne. 1967.** Soybean products: Candid consumer. *Christian Science Monitor*. July 6. p. 10.

• **Summary:** Increasingly sophisticated edible plant proteins are now available to American consumers, after getting their start in institutions.

Synthetic bacon bits, named Bac-Os, made by General Mills, Inc. from isolated soy protein under the trade name

Bontrae, resemble crisp fried pieces of lean bacon without fat. They are being test marketed in Buffalo and Syracuse, New York; in Sacramento and Stockton, California; and in Denver, Colorado.

Before being test marketed at retail outlets, Bac-Os were used for salads on Eastern Airlines flights and for bacon, lettuce and tomato sandwiches in restaurant chains, university dining halls, etc.

Another high-protein product made from Soybeans by General Mills is Modern Protein Food (MPF), also called Multi-Purpose Food; it is recommended by the maker for stocking fallout shelters, for stretching food budgets, and for vegetarian or other special (religious) diets.

Many other food manufacturers are doing research on “vegetable protein products.” Archer Daniels Midland Co. of Minneapolis [Minnesota] makes TVP (Textured Vegetable Protein), which contains no waste, less than 1% fat, and can be cooked in many ways. Other companies involved in the field are Central Soya Co., Ralston Purina Co., Swift and Co., and Worthington Foods. Address: Home economics writer, Christian Science Monitor.

491. Chico-San Inc. 1967. Chico-San Inc.—Unique foods: Retail price list. P.O. Box 1004, Chico, California. 2 p. July 15. 35 cm.

• **Summary:** See next page. This single-sheet catalog and price list, printed front and back with dark brown ink on pink paper (8½ by 14 inches), begins:

“Dear retail customer: We encourage you to buy Chico-San products through your local health food store. When you buy directly from Chico-San you must add shipping costs to the cost of food.” Includes the following interesting items. Those followed by an asterisk (\*) are marked “OEI” meaning “Our Exclusive Import.

Specialties: Rice cakes, buckwheat cakes, millet cakes, wheat cakes, roasted rice, rice crackers\*. Condiments: Tekka [miso], Tamari soy sauce\*, soybean puree (miso)\*, sesame salt, sesame spread, sesame butter, kuzu arrowroot\*, salt plums, salt, sesame oil. Crude salt (1 lb to 10 lb). Cereals: Rice cream. Rice: Brown short grain (2 lb to 100 lb). Sesame seeds: White-brown. Black. Beverages: Ohsawa twig tea\*, 16 herb tea\*, Grain beverage—Koko, Grain beverage—Yano, Lotus root tea\*, green tea. Noodles. Beans: Azuki red\* (\$1.72/lb), Imported red, black beans [soy] (\$1.37/lb).

Note 1. This is the earliest English-language document seen (March 2009) that uses the term “Soybean Puree” to refer to miso. During the next decade, many macrobiotic publications referred to miso as a “Soybean puree.”

Sea vegetables: Shredded hijiki, kombu\*, wakame—curly\*, nori—thin sheet, kanten—sea veg gelatin. Dried foods: Lotus root, shrimp, dried fish, small fish—chirimen, tazukuri, shaved bonito [sic, bonito], dried radish [daikon], gourd strips [kampyo, kanpyo], mushrooms. Grain: Barley, buckwheat groats, corn meal, cracked wheat, millet, oat

groats & oat meal, rolled oats, rye, wheat—hard red. Flour: One from each grain. Tooth powder jar. Cosmetics. Utensils.

Note 2. This is the earliest document seen (March 2006) that mentions Chico-San. It is also the earliest known Chico-San catalog and price list, and the earliest known Chico-San catalog and price that mentions “Rice cakes.”

Note 3. This is the earliest document seen (Sept. 2002) concerning the use of miso in second generation products (tekka).

Note 4. This is the earliest English-language document seen (Dec. 2006) that uses the term “salt plums” to refer umeboshi salt plums.

Note 5. This is the earliest English-language document seen (Nov. 2014) that mentions seitan, which it calls “seitan.” The entry for “Seitan” (actually misspelled as “Sietan”) is different from all other entries in this catalog, since no weight, no price, and no explanation is given—as if Chico-San has ordered the product, but it has not yet arrived. Moreover, no “OEI” (“Our exclusive import”) appears after the word “Sietan.” Address: P.O. Box 1004, Chico, California.

492. **Product Name:** [Soymee (Meatlike Soy Protein Product) {Renamed Soymea then back to Soymee in 1970s}].

**Foreign Name:** Soymea.

**Manufacturer’s Name:** Nisshin Oil Mills Ltd. (Nisshin Seiyu).

**Manufacturer’s Address:** Shinkawa 2-2, Chuo-ku, Tokyo, Japan.

**Date of Introduction:** 1967.

**New Product—Documentation:** “Nisshin: The new soybean protein food (red, yellow & white leaflet). 1990.4 p. See p. 3. “1967—”Soymee was first manufactured and commercial production began.” Note: It is fiber-type soybean protein.

*Soybean Digest*. 1968. March. p. 7. “Meatlike product produced in Japan.” The product was named “Soymee” at this time. *Soybean Digest*. 1969. June. p. 44. “Nisshin Oil Co. markets Soymea, leads in manufacture of vegetable protein in Japan.” *Soybean Digest Blue Book*. 1970. p. 108. “Soymea.” *Soya Bluebook*. 1981. p. 63. It is now called “Soymee Soy Protein.” Also 1982. p. 67; 1984. p. 60.

493. **Product Name:** [Nutana Beeflike Slices, and Chickenlike Slices].

**Manufacturer’s Name:** Nutana Helsekost.

**Manufacturer’s Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

**Date of Introduction:** 1967.

**New Product—Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. John. 1981. Adventist Food Industries: Recent Developments. Spectrum. Feb. Interview with Eric Howse. 1981. Feb. In 1981

# CHICO-SAN INC. - Unique Foods

P.O. Box 1004 • Chico, California

## RETAIL PRICE LIST

Dear Retail Customer:

We encourage you to buy Chico-San products through your local health food store. When you buy directly from Chico-San you must add shipping costs to the cost of food. Of course to meet your needs in areas where we have no retail outlets or where retail outlets are not meeting your needs properly, we want to bring you the service you deserve. We shall be pleased to send you the names of local retailers of Chico-San products. We are seeking the best means to serve you.

Items marked OEI - OUR EXCLUSIVE IMPORT - Through rigorous inspection, we can attest to the purity of these foods organic grains and complete absence of all chemical additives.

Nutana was doing the most advanced work with soy of any Adventist food company outside the U.S. They started in the early 1960s importing spun protein fibers (SPF) from the U.S. Now they import soy fibers spun by DE-VAU-GE in Germany and use them to make a range of meat analogs. Labels in Danish, Dutch, and Finnish.

Note: This is the earliest known commercial soy product made in Denmark.

**494. Product Name:** Village Soyburger (later renamed Village Soy Patties).

**Manufacturer's Name:** Village Manufacturing Co.

**Manufacturer's Address:** Berkeley, California.

**Date of Introduction:** 1967.

**Ingredients:** Whole soybeans, brown rice, carrots, oats, seasonings.

**Wt/Vol., Packaging, Price:** 3.25 oz patties, sold in packs of four.

**How Stored:** Frozen.

**New Product–Documentation:** See next page. Label and story in *Living Lightly* catalog, ca. 1982. "It all started in Berkeley, California, in 1967, when a student at the University of California majoring in dietetics, mixed together the ingredients, constituting the first 'Village soyburger.' They were first sold at a sandwich stand just outside the campus."

Letter from Somari Das of *Communities* magazine, Route 1, Box 191, Oroville, California 95965. 1975 or 1976. June 26. "Yes, we are *very* interested in learning to prepare tofu & miso on a community scale. We are a group of 12 adults and 3 children on 20 acres in Northern California. We have two cottage industries, one of them being a *soyburger* business, so we are pretty familiar by now with the marvelous soybean. We use miso and tamari to make our soyburgers and they are very tasty. At home, we eat a lot of tofu and miso soup, but we buy these products from local distributors rather than produce them ourselves. I am a student of Oriental medicine and feel like my education would be greatly enhanced by learning to prepare these traditional foods at home.—Om Tao, Somari Das."

Talk with Mara Devine. 1988. April 7. The business was started by two women. A collective she belonged to bought the business from these two women in the early 1970s and did it until 1973, when they sold the business. It was made with cooked soybeans (not tofu) pressure cooked with miso. They would run them thru a Hobart grinder then mix in oats as a binder, carrots, maybe onions or garlic powder, then put it through a patty machine. The patties were then frozen. They were not fried; most people fried or baked them at home. The company also made a Frozen Rice-Patti. Their plant was in Oroville, across the street from the high school. The product is still being made, probably in Oroville. Mara now runs her own company named Soy Devine (which see).

495. Berg, Sally; Berg, Lucian. 1967. *New food for all palates: A vegetarian cook book*. London: Victor Gollancz Ltd. 192 p. 23 cm. [10 ref]

• **Summary:** The glossary of ingredients (p. 17) discusses soy sauce and recommends Kikkoman for dipping. Page 85 gives a recipe for watercress cooked in soy sauce.

Gluten is mentioned repeatedly. Granose Meatless Steaks are made of wheat gluten (p. 15-16). Klops, a typical Russian-Jewish savoury, can easily be prepared with a can of wheat gluten (meatless steaks; p. 62-63). There are also gluten recipes for: Fried gluten and eggs (p. 80). Homemade gluten. Breaded gluten sweet and sour. Breaded gluten pineapple. Cold breaded gluten (p. 85-87; all in the chapter on China). Curried gluten (p. 109; India). Burgers (p. 116-17; America). Protein sources (p. 178). Address: England.

496. Loma Linda University, School of Medicine, Women's Auxiliary to the Alumni Association. 1967. *An apple a day: Vegetarian cookery by doctors' wives*. Pasadena, California: Typecraft Inc. & WAAA. 296 p. 23 cm. Recipe index.

• **Summary:** A Seventh-day Adventist lacto-ovo vegetarian cookbook. Soy-related recipes include: Tofu loaf (p. 51). Soy cheese scallops (with tofu, p. 54). Soyameat–vegetable loaf (with 1 lb. Soyameat Chicken Style, p. 95; many recipes on pages 95-103 use Soyameat, which comes in 13 oz cans or frozen, and is made by Worthington Foods). Roasted soybeans (Nepalese, p. 258). Soy cheese roast (Korean, with tofu, p. 268). Chop Chai #1 (Korean mixed vegetables with 2 cups soy bean threads, p. 269). Pineapple soy chicken curry (Polynesian, with Chicken Style Soyameat, p. 274). Polynesian soya meat with cling peaches (with Chicken Style Soyameat, p. 274). Address: Loma Linda Univ., School of Medicine, Los Angeles, California.

497. Stegner, Wallace Earle. 1967. *All the little live things*. New York, NY: Viking Press. 345 p. 22 cm.

• **Summary:** A disquieting and keenly observed novel about the engulfing chaos of the 1960s and early 1970s. The hero (Joe Allston) and his wife (both Easterners in their sixties) retire to California in search of peace after the death of their wayward son. Their little paradise in Los Altos Hills (which looks like Eden) "is invaded by various parasites, including a neighbor with a bulldozer bent on 'development.' Jim Peck, a bearded young cultist, builds a treehouse on their property [across the creek] and starts a University of the Free Mind, complete with yoga, marijuana, and free-wheeling sex. Most damaging of all, it is invaded by Marian Catlin, and attractive young wife and mother, affirming all the hope and love that the Allstons believe in..." (inside front dust jacket).

This book is about: "The cult of youth, the Hippie Revolution, and the excruciating conflict between the generations." Joe Allston represents the square older generation and Jim Peck the Hippie; their antagonism is presented in the most irreconcilable terms. If there is an

# VILLAGE

It all started at Berkeley California in 1967, when a student at the university majoring in dietics, mixed together the ingredients, constituting the first "Village soyburger". They were first sold at a sandwich stand just outside the campus and later moved from a very very small business, to a very small business, supplying a few retail health food stores. Our family purchased the business in 1976, and have seen steady growth ever since, supplying various distributors throughout California, Oregon, and Washington state. Our goal is to supply a superior nutritional product, at a reasonable price.

PRODUCT DESCRIPTION.

Whole soybeans cooked to perfection, fine quality Lundberg brown rice steamed until fluffy, fresh carrots shredded tender and juicy, mixed with oats and seasonings, and processed into perfectly portioned 3.25oz. patties, stacked in units of four, and frozen for either INSTITUTIONAL, or packaged in the familiar blue, with gold "village people" logo, for distribution to retail outlets.

answer, a way of bridging the chasm between them, “it is in Marian Catlin’s openness to all experience and her affection for all life” (rear dust jacket).

One very interesting scene (p. 102-20), an evening party at the Catlins with invitations, is set around a barbecue in the California spring. The Allstons are there, as is Jim Peck, who sets forth his philosophy of life and worldview—which he considers sane and virtuous. He is an apostle, not of modernity, but of alienation, with his wild hair, wild beard and wild eyes. Joseph Allston says: “If he can stand me, I can stand him.” Jim advocates a healthy vegetarian diet and the philosophy behind it (including a protest against the hypocrisies of eating meat). “All the largest and strongest animals were vegetarian. He himself wanted to be absolutely *harmless*. He believed in ahimsa, nonviolence, harmlessness.”

He wanted to keep his mind crystal clear and expand its boundaries, and to expand his consciousness. He was writing a book about himself and his experiments. He did yoga. They asked him about “organically grown vegetables,” the use of natural manure, and avoidance of chemical sprays. He smiled. Was “there a health store in town where they sold soybean steaks and blackstrap molasses,…” He didn’t know. What hypocrisy to try to make honest soybeans taste like sirloin. Better to hold to simplicity. John opens another beer and Debby has a second soft drink. The men were hesitant to talk with him. All this “self-realization business, a mongrel

cross between Socrates on the examined life and the Buddha on contemplation... that would begin in Huxley’s *Doors of Perception* and end in Leary’s LSD cult. There would be a lot of Zen passivism scrambled with a sanyasi withdrawal...”

John Allston wonders: “Could I stand to see human feelings and noble ideals come half-baked from the oven?” Jim Peck, no doubt “would have a smiling sneer for people who took aspirin and denounced drugs, and for incipient alcoholics who objected to other ways of getting high.” But John mostly conjectured; he rarely asked. In fact, much of the above is conjectured by the straight men (as they drink beer), rather than actually said by Peck.

A photo on the inside rear dust jacket shows Wallace Stegner, who is currently “a professor of English at Stanford University and head of the Creative Writing Center there.” A brief biography is given. Address: California.

**498. Product Name:** Prime Stakes: A Vegetable Protein Product.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1967?

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate, wheat gluten), egg whites, soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, onion, turmeric, spice, salt, extractives of celery

& spice), potatoes, partially hydrogenated soybean and cottonseed oil, modified corn starch, oat flour, wheat flour, modified tapioca starch, yeast extract, caramel color, onion, carrageenan, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 13 oz (368 gm) can. Retail for \$2.35 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1980. Sept. 11.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19.

499. *Food Product Development*. 1968. Legal developments: Identity proposals for vegetable protein herald future control of fabricated entrees. 1(6):10. Dec/Jan.

• **Summary:** Two innocent looking documents appeared in the *Federal Register* of 13 Oct. 1967 concerning the establishment of an identity for fabricated foods developed in the future. “General Mills has petitioned the FDA to establish an identity for a new class of foods” based on spun soy protein fibers to be called *Bontrae*. This “fibrous, textured food, prepared from soy protein isolate.” Part of the proposed identity “defines the process of preparing this filamented food product by a form of extrusion (spinning). General Mills is offering to relinquish its trade mark registration for the name if its proposal is accepted.

In the second proposal, Archer-Daniels-Midland Co. calls for an identity standard for the ingredient “textured vegetable protein” made from one or more proteinaceous materials. Labeling standards are similar in each proposal.

According to the introduction, the FDA would like to establish a single standard for what appears to be two unique classes of food materials. The FDA has seized Bac\*Os, believing the product must be labelled “imitation bacon.” Yet such as name could deceive the consumer, who might think this product need not be cooked or fried like natural bacon.

Another key aspect of the proposal hinges on whether the identity of a product depends on its chemical and physical properties alone, or whether biological considerations should apply. Comments are requested by FDA.

500. *Soybean Digest*. 1968. Meatlike product produced in Japan. March. p. 7.

• **Summary:** “Successful development of a meatlike product from soy protein on a commercial basis was recently announced by Nisshin Oil Mills Ltd., Tokyo, Japan. The new product, marketed as Soy mee [it may have been later renamed Soy mee], is the first of its kind to be commercialized in Japan...

“Soy mee will be sold initially to meat processors for manufacture of hamlike and sausage-like products or for mixing with beef and pork for processing.”

501. Sanford, David. 1968. Unfoods: Do you know what you’re eating? *New Republic* 158(2):13-15. May 18.

• **Summary:** Discusses (critically) the meat-like products made by Thomas J. Lipton Co., Loma Linda Foods, Worthington Foods, and General Mills (Bac\*Os). “Swift & Co. markets a soy larded chili, salisbury steaks, canned meat loaf and sloppy joes to restaurants, which call them pretty much what they like.

“The transforming of soy protein into edibles involves, in the case of Worthington Foods, General Mills and Ralston Purina a process licensed by Robert Boyer, an inventor and protégé of Henry Ford.” Note: No mention is made of Loma Linda using spun soy protein fibers. Many legitimate issues regarding the labeling of modern soy protein products are raised.

“Bac\*Os, the bacon-like bits test marketed over the past 18 months in Denver [Colorado], Buffalo [New York] and Sacramento [California], is about to be advertised nationally. Two years ago a token quantity of Bac\*Os was seized by the Food and Drug Administration in Buffalo and a case was brought in the US Federal District Court (Western Region) in New York to force General Mills to identify their product as ‘imitation bacon.’ ...

“Bac\*Os bottles didn’t say that Bac\*Os were bacon, just that they were a lot *like* bacon... Its label now reads ‘Crispy Bontrae bits with a flavor like bacon.’ Bontrae, the label explains, is a registered trademark for a vegetable protein product. Arthur Odell, who manages General Mills’ isolated protein program, thinks that that is sufficient.”

502. Hurd, Frank J.; Hurd, Rosalie. 1968. A good cook—Ten talents. Chisholm, Minnesota: Published by the authors. Printed by The College Press, Collegedale, Tennessee 37315. 354 p. Illust. Color plates. No index. 22 x 15 cm. Spiral bound. [1 ref]

• **Summary:** A very important, pioneering, indeed classic American vegan cookbook, which uses no animal products (except in one chapter at the end titled “Recipes Using Milk and Eggs,” “for those who are in the transitional period. However, we encourage all those who still cling to milk and eggs to become acquainted with the facts concerning their use, and become weaned through this process”). Some recipes also use honey.

Contains more than 750 unique recipes (plus color photos), including many innovative soy recipes, including the first recipe for shakes made with soy milk ice cream.

In the Glossary (p. 11-17) are entries for lecithin (p. 13; “A food extracted from the soybean”), soybeans (p. 15-16), and tofu (p. 16), as well as agar-agar, almonds, carob, cashew nut, coconut, dulse, flaxseed, malted nuts (made

from peanuts and cashew nuts with dry malt added), nuts, oils, peanut, sea kelp or dulse, sesame seed, and sesame tahini. A color photo (p. 55) shows soy sprouts. Soy-related recipes include: Homemade soy coffee (p. 66). Soybeans milks (p. 69; No. 1 costs \$0.06/quart homemade. "Soybean pulp [okara] which remains can be made into various dishes. Try Soy Not-Meat," p. 202; No. 2 uses 1 cup plain soya starter). Banana milk shake (with chilled soy milk, p. 70). Banana carob milk shake #1 or #2 (with soy milk, p. 72). Molasses milk shake (with soy milk, p. 72). Soy-fig milk (p. 72). Milkless milk shakes (with non-dairy ice cream incl. soy milk powder, p. 72-73). Soy yogurt, cultured (p. 73-74; 3 recipes—made from whole soybeans, liquid Soyagen, or soy starter). Soya bread or rolls (p. 80). Vanilla ice cream (with soy milk powder optional, p. 125). Pineapple ice cream (with soy milk powder, p. 127). Banana soya ice cream (with rich soy milk, p. 128). Sesame soy cookies (p. 131, with 1½ cups raw sesame seeds). 7 grain granola (with 1 cup soy flour, p. 156). Easy granola (with soy flour, p. 157). Soy-millet patties or loaf (p. 182). Vegetable-nut loaf (with soy milk, p.

186). Green soy beans (p. 187; dry, green-seeded soybeans). Buckwheat, soy or whole wheat spaghetti (p. 192). Soybean curd #1 (homemade tofu using whole soybeans, curded with Epsom salt, p. 195). Soybean curd #2 (from soy flour, curded with lemon juice, p. 196). The tofu-making process is shown in six black-and-white photos. Ways to serve tofu (p. 196). "Scrambled eggs" (made with tofu, egg-free, p. 196). Tofu loaf (p. 198). Chinese nut loaf (with soymilk, p. 198). Vegetarian chow mein (with soy sprouts, p. 199). Peanut-soymeat (with soy flour, p. 200; steamed for 2-3 hours in greased cans). Soy not-meat (p. 202, with soaked ground soybeans or "the soybean pulp from the soy bean milk. This way the pulp is not wasted" [i.e. okara]). Peanut-soy round (p. 202). Soy meat (p. 203; made with 2 cups homemade gluten, 1 cup toasted ground peanuts, and 1 cup soaked blended soybeans, plus water, seasonings, oil and salt, steamed for 3 hours in greased cans). Soya peanut soufflé (p. 204). Soybean soufflé (p. 204). Tofu & rice croquettes (p. 206).

The chapter titled "Nuts, seeds, olives" (p. 209-20) includes: Glossary of nuts, raw nuts for your enzymes, nut notes, almond butter (king of the nuts), raw nut butters, cashew nut butter, cashew Brazil-nut butter, peanut butter, nut butter clusters, peanuts—oven blanched, dry roasting—soya nuts, malted nuts, browned sesame seeds, seed cereal topping (sunflower seeds, sesame seeds, flax seed), peanut butter-seed spread (tahini, sunflower seeds), peanut butter balls, simple sesame squares, sprouted sunflower clusters, olives, tree chestnuts, roasted chestnuts, roasted chick peas.

Note 1. This is the earliest document seen (Dec. 2013) that uses the term "dry roasting" to describe how soybeans are roasted, or that contains the term "Dry Roasting—Soya Nuts" (p. 217).

Green soy bean salad (p. 234; probably dry, green-seeded soybeans). Soybean sprouts salad (p. 234). Tofu cheese salads (p. 235). Tofu sun faces (p. 236). Pineapple tofu salad (p. 245). Pineapple tofu cottage cheese (p. 246). Lo-fat salad dressing (with soy yogurt, p. 251). Soy mayonnaise—eggless (4 types, p. 252-53). Soy butter (made with soybean flour, lightly dextrinized, p. 262). Soya starter (made with soy flour, p. 262). Soya yeast sandwich spread (p. 263). Super sandwich spread (with soybean pulp [probably okara, see p. 69], p. 264). Pimento-soy chee spread (p. 265). Sour cream—soy (p. 270). Soy whipped cream (p. 271; whirl in a blender ½ cup each soybean milk and soy oil, plus 1 tablespoon honey, ¼ teaspoon vanilla, and a pinch of salt). Tartar sauce, cheese (with soy mayonnaise and tofu, p. 273). Sprouts (p. 291-95). Fresh cucumbers with soy sour cream (p. 304). Celery and green soyas (p. 312; "2 cups green soy beans, frozen, canned, or fresh." Probably means green vegetable soybeans). Soya starter (base, made with soy flour, p. 326; keep a jar ready for quick use in making tasty spreads, milk and cream, mayonnaise, a binder when nut butter is not available. Dextrinizing the soy flour gives this

Soya Starter a nutlike flavor).

Talk with Rosalie Hurd. 1991. June 3. *Ten Talents* is now going into its 44th printing. More than 250,000 copies have been sold. The latest was published by College Press in 1985. The first edition was published in May 1968. Frank, originally a chiropractor, is now a medical doctor. The Hurds now live most of the year in Fountain City, Wisconsin, where they run Alpine Springs, a live-in lifestyle program and center on 585 acres of land offering treatment and education in natural health.

Note 2. This is the earliest cookbook seen (Oct. 2013) that contains a recipe for soy sour cream. For the basic recipe: Pour 3/4 cup soy bean milk into a blender. Gradually add 3/4 cup soy oil until desired thickness is reached. Stir in 1-2 tablespoons lemon juice and 1/4 teaspoon salt. Chill. "Delicious on fresh cubed cucumbers with a dash of dill." An alternative recipe calls for the use of: 1/2 cup soy starter (not dextrinized, see p. 69, 262), 1/4 cup water, and 1/2 teaspoon honey.

Note 3. This is the earliest English-language document seen (Nov. 2014) that contains the word "Soy meat" (p. 200), or the term "Soy Not-Meat," or the term "Soy Meat" (p. 203) as a recipe name.

Note 4. This is the earliest dated English-language document or book seen (Sept. 2012) that contains the modern term "Soy yogurt."

Talk with Rosalie and Dr. Frank Hurd. 2005. Feb. 9. Both have moved to Oregon to warmer weather. They have a daughter there. *Ten Talents* is now in its 48th printing. They are working on a revision. He was born in March 1936 and she in April 1937.

Talk with Rosalie Hurd. 2009. Jan. 19. Frank is still working as a doctor and she as his helper. They are both in good health. The greatly enlarged 40th anniversary edition of *Ten Talents* has been published and is now available.

The term "Ten Talents" comes from the teachings of Ellen G. White: "The one who understands the art of properly preparing food, and who uses this knowledge, is worthy of higher commendation than those engaged in any other line of work. This talent should be regarded as equal in value to ten talents; for its right use has much to do with keeping the human organism in health. Because so inseparably connected with life and health, it is the most valuable of all gifts" (Ellen G. White, *Counsels on Diet and Foods*, p. 251). Address: 1. D.C. [Doctor of Chiropractic]; 2. B.S. Both: Box 86A–Route 1, Chisholm, Minnesota 55719.

503. Chico-San Inc. 1968. Chico-San Inc.–Unique foods: Retail price list. P.O. Box 1004, Chico, California. 2 p. June 1. 35 cm.

• **Summary:** This single-sheet, dated catalog and price list, printed front and back with dark brown ink on pink paper is almost identical to the edition of 15 July 1967 in appearance, content, and pricing.

However two new condiments have been added: Dehydrated tamari, and Seitan. Address: P.O. Box 1004, Chico, California.

504. *NewsTime (Scholastic)*. 1968. Next TVPburgers? 33(6):2. Oct. 18.

• **Summary:** Switzerland's largest supermarket chain is selling TVP, an American-made substitute for meat, made from soybeans. TVP stands for "Textured Vegetable Protein." Its makers hope the Swiss *won't* think it stands for "tastes very poorly."

505. **Product Name:** Texgran Smoked Soy Bits: Imitation Bacon (Textured Soy Flours–Extruded).

**Manufacturer's Name:** Swift & Co. Vegetable Protein Products Div.

**Manufacturer's Address:** Champaign, Illinois.

**Date of Introduction:** 1968 December.

**Ingredients:** Defatted soybean meal.

**How Stored:** Shelf stable.

**New Product–Documentation:** *Food Product Development*. 1968. Nov/Dec. p. 23. A photo shows three cans of Texgran Smoked Soy Bits: Imitation Bacon, and some of the product itself on a table.

Interview with Don Aldon, formerly with Swift & Co. 1985. Feb. 26. "Work with Swift & Co. and non-dairy frozen desserts." The first retail product in which Texgran was used was artificial bacon bits, the first such product on the market. Don developed this product, which was launched in about 1977-78. It was based on Texgran, with flavors added then smoked in a smokehouse. Right after that, General Mills introduced Bac\*O's.

506. **Product Name:** Bacon Bits.

**Manufacturer's Name:** Archer Daniels Midland Co.

**Manufacturer's Address:** Minneapolis, Minnesota.

**Date of Introduction:** 1968.

**New Product–Documentation:** Horan. 1974. Meat analogs. p. 380. Manufacturer's catalog. Talk with ADM sales dept. 1988. Sept. 15. This product was launched in about 1968, about a year after the company started to make TVP. It is made by texturizing soy flour, and may not be a registered trademark.

507. **Product Name:** [GranoVita Sausages (Regular, or seasoned Frankfurter Style)].

**Foreign Name:** GranoVita Soja-Wuerstchen (Regular, or nach Frankfurter Art).

**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1968.

**Ingredients:** Vegetable oils and fats, water, soya protein, egg protein, onions, natural spices, wheat gluten, salt, glucose, yeast, rolled oats, bread crumbs.

**Wt/Vol., Packaging, Price:** 275 gm can of either wholesales for DM 6,30; 140 gm can for DM 4.

**How Stored:** Shelf stable.

**New Product–Documentation:** Full-page ad for 8 granoVita soy products in the book by Manfred Heide. 1977. *Vegetarische Ernährung: 193 Rezeptvorschläge und Speisepläne für ein Vierteljahr* [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. Stuttgart, West Germany: Paracelsus Verlag.

DE-VAU-GE leaflets. 1980? *Rezepte aus der GranoVita Versuchskueche. And Neue Rezepte mit Soja-Wuerstchen Frankfurter Art.* “Did you know that soyfoods (Soja-Kost) are free of cholesterol and low in purines?” Manufacturer’s catalog. 1981. May 1. DE-VAU-GE Sortiments-Preisliste. 4 p.

Letter from H.J. Gruetzmann of DE-VAU-GE. 1981. May 18. “Our company started producing foods in 1899. Our first Soja-product was produced around 1970. We started with Soja-sausages. Our current Soja-line contains Soja-cutlets, Soja-sausages, Soja-ready-dish, and Soja spreads. Our most popular products currently are the sausages and the cutlets, followed by the spreads and the ready-dish (Fertiggerichte). We are enclosing our current price list, where we marked the Soja-products. Note: At the top right of the letterhead and price list is written, in large letters, “granoVita.”

Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

Form filled out and Labels sent by DE-VAU-GE. 1990. June 11.

**508. Product Name:** Loma Linda Canned Meatless Slices (Based on Spun Soy Protein Fiber) [Chicken-Like Slices, Beef-Like Slices, Turkey-Like Slices, or Luncheon-Like Slices].

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1968.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** Loma Linda probably purchased the spun soy protein fibers from General Mills. Sold in 14-ounce cans. Note: This is the earliest commercial product seen (Oct. 2014) that is a meatless alternative to turkey (one of six products).

**509. Product Name:** Loma Linda Luncheon Slices (Frozen and Meatless; Based on Spun Soy Protein Fiber) [Chicken Slices, Smoked Beef-like Flavor, Corned Beef-like Flavor, Smoked Turkey Flavor].

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1968.

**How Stored:** Frozen (in 1973).

**New Product–Documentation:** It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Luncheon slices are frozen products that come in smoked beef-like flavor, corned beef-like flavor, and smoked turkey flavor. They are based on spun soy protein fiber, which Loma Linda probably purchased from General Mills.

Sold frozen in 1 or 2 lb packages. Note: This is the earliest commercial product seen (Aug. 2002) that is a meatless alternative to turkey (one of six products).

**510. Product Name:** Loma Linda VegeCuts.

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1968.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Seventh-day Adventists. Food Service Improvement Committee. 1968. “Dining delightfully: Tested recipes from Adventist hospital chefs.” Loma Linda VegeCuts are mentioned.

Loma Linda Food Co. 1969. “Wholesale Price List.” Vegecuts are now sold in 14 oz, 20 oz, 30 oz, and 48 oz cans.

**511. Product Name:** Luncheon Slices, or Frozen Roll [Meatless Corned Beef, Meatless Smoked Beef, or Meatless Smoked Turkey].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1968.

**Ingredients:** Meatless Corned Beef: Textured vegetable protein (soy protein isolate, wheat gluten and flour), egg whites, soybean and/or corn oil, partially hydrogenated soybean and coconut oils, flavorings (hydrolyzed vegetable protein, yeast extract, garlic and onion powder, natural smoke flavor, artificial flavors, spice), sugar, salt, artificial colors, disodium guanylate, disodium inosinate, niacinamide, etc.

**How Stored:** Frozen.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1968. p. 110. “Luncheon Slices.” Manufacturer’s catalog. 1984, undated. Frozen Products. Label reads: “Vegetable Protein Slices. Rich in Vegetable Protein. Artificial Flavor.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27. The ingredients in the Meatless Corned Beef (rolls, or luncheon slices) are those given above. Note: This is

the earliest commercial product seen (Aug. 2002) that is a meatless alternative to turkey (one of six products).

**512. Product Name:** Holiday Roast (Meatless Turkey-like Product Based on Spun Soy Protein Fibers).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1968.

**How Stored:** Frozen.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1968. p. 110. Perhaps later renamed Dinner Roast (1980).

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Holiday Roast is a frozen turkey-like product based on spun soy protein fiber.

Worthington Foods. 1989. "The Tradition of Healthy Foods" (50th anniversary booklet). p. 21-22. Worthington's first products made with spun soy protein fibers were White Chik, Beeflike, Prosaage, Stripples, and Holiday Roast (with a plastic wishbone). All were hits and sales took off. These products were sold frozen. In "October 1963 a series of television, radio and newspaper advertisements featuring the new frozen foods was introduced." Note: This is the earliest commercial product seen (Aug. 2002) that is a meatless alternative to turkey (one of six products).

**513. Product Name:** Turkey Style.  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1968.  
**New Product–Documentation:** *Soybean Digest Blue Book*. 1968. p. 110. Note: This is the earliest commercial product seen (Aug. 2002) that is a meatless alternative to turkey (one of six products).

**514. Product Name:** Smoked Beef (Meatless).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1968.  
**Ingredients:** Soybean protein, water, wheat protein [wheat gluten], corn oil, vegetable shortening, egg albumin, wheat flour, yeast extract, hydrolyzed vegetable protein, flavorings, salt, corn syrup solids, MSG, caramel, U.S. certified color.  
**How Stored:** Frozen.  
**New Product–Documentation:** *Soybean Digest Blue Book*. 1968. p. 110. "Luncheon Slices."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Smoked Beef (Worthington)." This is an institutional product.

Manufacturer's catalog. 1984, undated. Frozen Products.

Label reads: "Vegetable Protein Slices. Rich in Vegetable Protein. Artificial Flavor."

**515. Product Name:** Smoked Turkey (Meatless).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1968.

**Ingredients:** Soybean protein, water, wheat protein [wheat gluten], water, corn oil, egg albumin, soy protein, hydrolyzed vegetable protein, salt, MSG, sugar, flavoring, vegetable gum, onion powder, U.S. certified color.

**How Stored:** Frozen.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1968. p. 110. "Luncheon Slices."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in "Smoked Beef (Worthington)." This is an institutional product.

Manufacturer's catalog. 1984, undated. Frozen Products. Label reads: "Vegetable Protein Slices. Rich in Vegetable Protein. Artificial Flavor." Note: This is the earliest commercial product seen (Aug. 2002) that is a meatless alternative to turkey (one of six products).

**516. Hahn, Emily.** 1968. *The cooking of China*. New York, NY: Time-Life Books. 206 p. Illust. (many color photos). Index. 28 cm. Series: Foods of the World.

• **Summary:** Another superb work in this superlative series from the editors of Time-Life Books. This book is about cooking in China, where the author lived (in Shanghai), before the 1949 Communist revolution.

Contents: Introduction: The cooking of the world's oldest civilization. 1. An ancient and honorable art. 2. "Chinese cooking" in your own kitchen. 3. Secrets of savor and spice. A reverence for good food. 5. Oriental staff of life. 6. Gentle teas and strong spirits. 7. Feasts for festivals. 8. A cuisine for all continents.

China, the world's oldest existing civilization, has the world's most ancient cuisine—as well as one that is both great and profound (p. 6). When the Red Guards of China's Cultural Revolution appeared in the 1960s, they "attacked every symbol of what they regarded as bourgeois culture. Among the targets in Peking were the city's fine restaurants." In the process they destroyed much of China's culinary heritage—but only inside of China (p. 7). An article by Peggy Durdin in the *New York Times* was titled "Mao's great crime against cuisine" (p. 184). Chinese food is, of course, about life, but it is also about health, and it can resonate on numerous symbolic levels (p. 7).

The southern provinces of China, Fukien, Kwantung, Yunnan, and Kwangsi, enjoy tropical temperatures year round and more than 80 inches of rain. Here rice is the main crop. Yet China is a mountainous country, with 60% of its

land at elevation 6,500 feet or higher; only 11% of its land can be cultivated (compared with 80% in the USA) (p. 10). Fukien, a coastal province to the south, makes the best soy sauce in China, and stewing is called “red cooking” because of the color imparted by the soy sauce (p. 16, 42).

Vegetable oil is very important in China because the Chinese rarely use butter (p. 29). “For protein the Chinese depend heavily on the soybean, which has for this reason been called the cow of the East.” Soybean oil is used for cooking. Soybean milk is a good substitute for cow’s milk. And “doctors, even Western doctors—prescribe it for babies who cannot get mothers milk and are allergic to cow’s milk” [sic]. From soymilk one can make “bean curd, an exceptionally high-protein food known in China as ‘the meat without bones.’” Bean curd is made by curdling soybean milk with gypsum, then pressing the curds into pieces about 3 inches square by ½ inch thick. “The thickened curd skin [sic, yuba] is a food by itself, with a more concentrated flavor. Fermented bean curd [fermented tofu] tastes much like cheese.” Both soy and mung-bean sprouts are used in China, “In one form or another the soybean can be found in dishes eaten at every meal” (p. 29).

A two-page color photo spread and legend (p. 61-63) shows (numbered) basic Chinese ingredients, incl. “13. Fresh bean curd. 14. Dried bean-curd skin” [yuba]. Buddhist monks and nuns in China are strict vegetarians; special foods that simulate meat have been developed for them. The main ingredients in these dishes are bean curd and gluten. These include vegetarian “duck made from crisp bean-curd skin, colored and shaped to look like the bird’s flesh” and “chicken roll in *hoisin* sauce, the ‘chicken’ made of soft soybean curd” (p. 64, 67, 70).

Note 1. This is the earliest English-language document seen (Oct. 2012) that uses the term “beancurd skin,” apparently to refer to yuba.

Note 2. This is the earliest document seen (Jan. 2014) that describes the use of yuba, or of tofu, to make meat alternatives.

A full-page color photo and legend (p. 74-75) shows (numbered) Chinese sauces and condiments, incl. “1. *Hoisin* sauce. 3. Soy sauce. 8. Yellow-bean paste, or thick bean sauce. 11. Fermented black beans. 14. Red bean [azuki] paste.” “Among the best known of Chinese seasonings is soy sauce, which was mentioned in several Confucian classics as early as the Fifth Century B.C.” [sic]. Other condiments made from soybeans are bean paste (for preserving and flavoring meat) and *hoisin* sauce (widely served with Peking duck). “It is said that the best grades of soy sauce can take as much as six to seven years of aging to reach perfection, and that the making of superb soy sauce requires ‘as much art in its preparation as good French wines’” (p. 74-75, 77).

The controversy over M.S.G. is discussed. “A really god Chinese chef considers it a questionable shortcut for giving taste to second-rate foodstuffs, but most Chinese cooks admit

that its use in certain dishes is perfectly valid” (p. 77-78).

The emperor Chien Lung (1735-1796), 4th ruler in the Manchu [Qing] dynasty, wrote an *Ode to Tea* (p. 91). In China there is an intimate association between eating and health (p. 91).

Recipes: “Steamed bass with fermented black beans *Tou-shih cheng hsien yu* (with “2 teaspoons fermented black beans,” soy sauce, Chinese rice wine, and shredded fresh ginger root, p. 104).

Most festivals (each with a feast) in China are based on events of agricultural importance; the two most important are New Years and the Moon Festival (p. 155, 162, 164-65). A Peking duck is “brought to the exact degree of plumpness and tenderness through force-feeding,” then roasted slowly, suspended by hooks, in a mud-lined oven “until the thick, fat skin becomes golden in color. This crackled skin is the choice part of the dish.” The skin, a piece of the meat, a spring onion, and thick, sweet *hoisin* sauce are served enfolded in a thin wheat-flour “pancake” (p. 158, 15).

The history of chop suey (unknown in China) and chow mein (had an honorable origin in China) are discussed (p. 178-79).

The first wave of Chinese to America came with the gold rush and transcontinental railway. Most were laborers from southern China. The first Chinatown in the USA was established in San Francisco (1850s), followed by New York City (Manhattan, 1870s). Most early American Chinese restaurants reflected their social status, serving inexpensive foods. In the early 20th century, as China’s Republican revolution was gaining momentum, a second wave arrived to study. These young people, also mostly from southern China, came from far more prosperous backgrounds than those in the 1st wave and they wanted better food. Restaurants were started or upgraded to suit their tastes. Thus, it “was the southern school of cookery that first spread over the world outside China” (p. 179).

China has three great regional cuisines: Cantonese (southern), northern, and Szechuan (p. 179). Six photos show “The Americanization of the fortune cookie: Assembly line at a factory in New York City’s Chinatown.” A two-page spread shows many of the “fortunes” found in fortune cookies (p. 195-97).

“A guide to ingredients in Chinese cooking” (p. 198-99) includes: Bean curd, fresh: Square. Bean-curd skin [yuba] (“Thin stiff sheets of dried bean curd. Sold by weight... {5 to 6 sheets weigh about 1 ounce}”). Bean sprouts (“Young sprouts of the mung bean”). Black beans, fermented (“Strongly flavored, preserved black soybeans.” Sold in cans or plastic bags). Brown bean sauce (“Thick sauce made from fermented yellow beans [huang dou = yellow soybeans], flour and salt. Sold in cans of 1 pound or more”). *Hoisin* sauce (“Sweet, brownish-red sauce made from soybeans, flour, sugar, water, spices, garlic and chili for use in cooking. Sold in 1-pound cans and up”). Oyster sauce

("Thick brown sauce with a rich flavor, made from oysters, soy sauce and brine"). Red bean paste ("Thick, sweet paste made from red soybeans" [sic, azuki beans]). Salted eggs and thousand-year eggs. Sesame seeds and sesame seed oil. Soy sauce ("Pungent, salty, brown liquid made from fermented soybeans, wheat, yeast [sic, mold] and salt"). Vegetable steak ("A vegetarian food that looks like a small beefsteak but is made from wheat gluten. Sold in cans"). Address: Author, lives in England with her husband.

517. Hon, Hazel. comp. 1968. Three week vegetarian menu. Sydney, Australia: Published by the author. 88 p. 24 cm.

• **Summary:** This Seventh-day Adventist vegetarian cookbook uses lots of canned Adventist food products, gluten, and whole soybeans. The Four Basic Food Groups (p. 7) are fruits and vegetables, cereal and bread, protein (including legumes, cottage cheese, eggs, soy cheese, nuts, peanut butter, and various manufactured nuts, soybean and gluten products), and milk groups ("use milk or a suitable alternative such as soybean milk").

A table titled "Seasonings" (p. 8) divides them into (1) Not irritating. (2) Slightly irritating. (3) Strongly irritating: Cloves, ginger, paprika (Hungarian). (4) Irritating, stimulating, harmful: Cayenne pepper, chili pepper, horseradish, mustard, pepper (black or white). (5) Seasoning herbs: Oregano, tarragon, chervil, sage, basil or sweet basil, bouquet garni, marjoram, rosemary.

A table (p. 9) lists "Goods obtainable at all Sanitarium health food shops" including gluten flour, soya flour, Soyagen (liquid or powder). Sanitarium canned foods: Nutmeat, Nutolene, Soya Beans, Vegetarian Sausages, Lima Beans. Worthington Foods: Soya Meat in tins. Chicken Style sliced. Chicken Style diced. Beef Style sliced. Beef Style diced. Loma Linda: Vegelona, and Linkettes.

Three weeks of menus and recipes are given. Soy-related recipes include: Soya nut loaf (p. 30). Soybean omelette (p. 65). Soya vegetable loaf (p. 70). Soya mayonnaise (p. 71). Soya oven croquettes (p. 82).

Note: This is the earliest document seen (Oct. 2004) concerning the work of Sanitarium Foods in Australia with soy. Address: 54 Castle Howard Road, Cheltenham, N.S.W., Australia.

518. Seventh-day Adventists. Food Service Improvement Committee. 1968. Dining delightfully: Tested recipes from Adventist hospital chefs. Washington, DC: Review and Herald Publishing Assoc. 159 p. Illust. (some color). 25 cm.

• **Summary:** This Adventist vegetarian cookbook is sponsored by the Medical Department of the General Conference of Seventh-day Adventists, and the Seventh-day Adventist Hospital Association. The entrees in this book use lots of meatlike products (many of which contain soya) manufactured by Seventh-day Adventist food companies. These products include: Worthington White Chik (frozen).

Nuteena. VegeBurger. Wham. Bac-O-Chips. Smoked Chipped Prime. Worthington Prime (chipped, smoked [frozen]). Battle Creek Vegetable Skallops. Loma Linda VegeCuts.

519. Worthington Foods, Inc. 1968? Tomorrow's Foods Today. Worthington, Ohio. 19 p. Undated. 28 cm. [3 ref]  
 • **Summary:** Contents: Message from management. Tomorrow's Foods Today (the company slogan). Research and development department, W.E. Hartman, director. Production department, Sam Brown, manager. Sales department, W. Kenneth Case, manager. The Worthington line. Engineering department, B.J. Knecht, chief engineer, B.L. Knecht, assistant engineer. Data processing department, John Dalton, manager. Credit and traffic, Al Foster, manager. Advertising department, Michael A. Jones, manager, James Converse, art director. Purchasing and office management, Luther Lyle, manager. Personnel department, Kenneth Innocent, manager. Accounting department, Richard Waters, manager. The future. The wonderful Choplet. Board of directors: James L. Hagle (chairman), Warren E. Hartman, Allan R. Buller, George T. Harding, III, M.D., Warren G. Harding, M.D., George E. McKay, Harrison Evans, M.D.

A color photo shows each of the products in the Worthington line. All are canned, except those followed by an asterisk: Cutlets, Fry Sticks, Vegetable Skallops, Sandwich Spread, Chili, Vegetarian Luncheon Slices\*, Kaffir Tea, Soyameat, Vegetarian Dinner: Salisbury Steak Style\*, Soyameat: Diced Chicken Style, Choplets, Vegetarian Pie: Chicken Style\*, Vegetarian Dinner: Chicken Style\*, Holiday Roast\*, Prosaage: Breakfast Treat\*, Vegetarian Luncheon Slices: Smoked Beef Style\*, Vegetable Steaks, Numete, Vegetarian Luncheon Slices: Use Like Corned Beef\*, Soyameat: Diced Beef Style, Breeding Meal: Fry and Loaf Mix, Vegetarian Dinner: Ham Style\*, Soyameat: Beef Style Slices with Gravy, Soyameat: Sliced Chicken Style, Meat Loaf Mix\*, Veja-Links, Soyamel: All Purpose, Saucettes, Infa-Soy, Soyamel: Banana Beverage, Fortified Soyamel: A Powdered Soy Milk. The section titled "The future" is prophetic. "Since 1962 Worthington Foods has been growing in sales by nearly 20 percent a year. This is significant but modest in comparison to what is coming. For in our opinion the growth of the vegetable protein industry very shortly will be astronomical. The reasons are fairly simple.

"First, these new foods not only taste good. They are nutritionally sound.

"Second, vegetable protein foods offer significant economies over traditional meats. When grazed, an acre of land offers approximately 43 pounds of protein. Plant that same acre to soybeans and the yield is about 450 pounds of protein. The economic advantages of vegetable proteins are widening rapidly today. They will continue to widen.

"Third, vegetable protein foods are more convenient, and convenience foods will soon dominate the food

business. No long hours of marinating, basting, or baking are necessary with these new foods. No skin to peel or bones or fat to cut out. With vegetable protein foods, taste and tenderness are controlled. The housewife or chef need only heat and serve.

“A fourth reason why the growth of this industry is going to be enormous shortly is because of the protein shortage in the world. The U.S. Department of Agriculture recently pointed out that even in the United States, ‘Future protein needs must be met by chemically nurtured and protected plant materials. They certainly cannot be met by animal protein.’”

Note 1. This brochure contains an original illustration of each of the men mentioned above. Note 2. All three dated footnotes at the end of this brochure are from the year 1967, and the latest is Dec. 1967. Address: Worthington, Ohio.

520. Cade, Leland. 1969. ‘Artificial meats’: Something to contend with in the years ahead—Outlook 1969. *Washington Farmer (Washington State)*. Jan. 2. p. 8-10.

• **Summary:** Contains a long list of “artificial meats” made by Worthington Foods. A photo shows many of these canned products.

521. *Food Processing (Chicago)*. 1969. Soy protein debuts as main course. Winter. p. F4-F7. Foods of Tomorrow section.

• **Summary:** About textured soy protein products that can take the place of meat, especially Bontrae (from General Mills, Inc., Minneapolis, Minnesota), TVP from ADM (Minneapolis, Minnesota), and Stripples from Worthington Foods (Worthington, Ohio). The costs vary widely. “Unflavored spun soy fibers in an acid-salt media [medium] cost about 50 cents a pound.” Prices of the finished products to consumers are about 2/3 to 3/4 of that of the meat they can replace. “Expanded-soy textured protein [extruded textured soy flour] is less expensive. Cost in chunk or dry granular form ranges from 12 to 40 cents a pound. Since it rehydrates with 2 parts water, the cost on an as-served basis ranges from 4 to 13 cents a pound.”

Bontrae comes in the form of frozen, free-flowing, pre-cooked crumbles or dice packed in 5-lb cartons. “General Mills is making a sizable increase in the capacity of its pilot plant for the production of Bontrae...” Bontrae is presently being marketed mainly to Minnesota State institutions, hotel, restaurant, and institutional accounts in Albany, New York, and college food service accounts in the Baltimore (Maryland), and Washington, DC, area.

ADM “calls its expanded-soy textured vegetable protein TVP” (registered trademark). The company “had the first production-size facility for textured soy protein and is now in the midst of a major expansion.” In the U.S., TVP has been sold mainly to food processors for use in canned, dehydrated, and frozen foods. But in Europe it is sold mostly

to consumers, in 200 gm (7 oz) retail packages.

Swift & Co. (Chicago) entered the market 2 years ago with Texgran, expanded soy protein. In less than a year, sales exceeded capacity. A new plant, being constructed in Champaign, Illinois, should be finished soon.

H.B. Taylor Co. (Chicago) sells Texturasoy, an expanded-soy textured protein, which is the lowest cost textured protein available. Until about a year ago it was sold to the pet food industry.

“Six years ago [1963], Worthington Foods introduced a line of simulated meats based on spun-soy textured protein supplied by Ralston Purina.” In 1966, Worthington built its own plant for making the “spun-soy fibers.” A new line has just been developed for the institutional market. Worthington’s latest product is Stripples, which can replace bacon. It undergoes no shrinkage in preparation for serving, compared with a loss of about 25% of its weight when bacon is broiled or fried. Although it costs twice as much as bacon, “the as-served cost is only half that of bacon.” Ralston Purina still makes spun-soy textured protein in the form of unflavored fibers in an acid-salt media, or in flavored dehydrated form.

Color photos show: (1) A table set with 4 ready-to-eat dishes, each containing “Bontrae spun-soy textured protein,” which “is being successfully market tested in restaurants and institutions.” On one side is a menu with the bold title “C’est Bontrae.” (2) A smiling lady placing silver platters of food on a sideboard. The caption: “TVP expanded-soy textured protein is penetrating the home market in Europe.” (3) Three traditional bacon dishes on a table, each containing Stripples. The “latest soy protein convenience food,” its hickory-smoked strips can be used in place of bacon. Both the light and dark stripes are protein.

522. **Product Name:** Bac-o-Bits (Meatless Bacon Bits from Extruded Textured Soy Flour).

**Manufacturer’s Name:** General Mills, Inc.

**Manufacturer’s Address:** 9000 Plymouth Ave., Minneapolis, MN 55427. Head office 9200 Wayzata Blvd., Minneapolis.

**Date of Introduction:** 1969 March.

**Ingredients:** In 1971: Soy flour [textured, extruded], vegetable oil, hydrolyzed vegetable protein, salt, sugar, natural and artificial color, and artificial flavor.

**New Product—Documentation:** *Soybean Digest Blue Book*. 1969. p. 114.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 160. Lists the ingredients in “Baco Bits.”

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. The ingredients in “Baco-O-Bits (General Mills)” are soy flour, vegetable oil, salt, hydrolyzed vegetable protein (HVP), sugar, dried egg white, artificial color, artificial flavor.

523. Breth, Fred E. 1969. Ersatz-foods: The danger ahead. *British Vegetarian*. March/April. p. 141-45.

• **Summary:** Writing in a critical tone, the author discusses the various products resembling meat and dairy products now available to American shoppers. “Turkey meat that has never held a feather and milk that has never been near a cow... These foods are making progress in markets around the world. Like the prospect or not, it is obvious we shall have to live with laboratory-bred proteins in the not-too-distant future.” For more than a decade, food companies have been developing imitation animal proteins, based largely on soya bean proteins. Soya bean derivatives are being used to “stretch” low-cost meats.

“The American dairy industry has yet to find an answer to soya-protein based coffee whiteners, whipped cake toppings, cream-type and frozen desserts. The consuming public has fully accepted them some time ago—and likes them. Are synthetics a real threat to animal products? Expert opinion on this question is deeply divided.” Mr. J.L. Hagle, president of Worthington Foods Inc. (“at present the major producer of ‘synthetic foods’”) believes that “Granted enough time, the relative efficiency of man-made foods will work in their favour.”

“Professor C.O. Chichester, University of California, put it even more bluntly: ‘... the isolation of plant proteins and their processing into textured products may very well result in a major change in the eating habits of the world.’”

“‘Meatless’ meats, also called ‘synthetic meats,’ ‘analogue meats’ and ‘textured meats’ are made from isolated soya-protein (90 per cent. protein), which is a tasteless, odorless powder.”

“Worthington Foods Inc. is already marketing about 30 different ‘meat’ items, including fried chicken, dried beef, meat loaf casserole, croquettes, chicken show mein, ‘soymeat’ sandwiches, sandwich spread, bacon bits and so on.”

Experts predict plenty of competition in the field of “high-protein drinks” (H.P.D.s). Large companies like Monsanto (a chemical company), Pillsbury (a flour mill), and Swift (a meat packer) have already entered this market. They are all aware of the success story of “Vita-Soy” [Vitasoy], “a straight, three per cent. protein soya-bean milk drink,” which sells 60 million bottles a year and has captured 25% of the Hong Kong soft drink market; it sells for as little as 5 pence per bottle. And they are aware of a similar powdered soy protein drink [Saridele] which contains 18% protein and is being marketed successfully in Djakarta, Indonesia and was introduced in 1957; 300 tons/year are now being produced.

The author concludes that these new foods are a necessity from the viewpoint of global nutrition. Three other publications also used this term later in 1969.

524. Corkern, R.S.; Dwoskin, P.B.; Hoofnagle, W.S.; et al.

1969. Synthetics and substitutes for agricultural products: A compendium. *USDA-ERS, Miscellaneous Publication No. 1141*. 85 p. April. [30+ ref]

• **Summary:** Contents: Introduction. Man-made substitutes in the fibers market. Substitute dairy products. Synthetics and substitutes for cereal products. Meat and poultry substitutes. Sugar substitutes. Substitutes for leather. Synthetic citrus drinks. Synthetics and substitute for oilseed products. Protein from petroleum.

“Agricultural materials have been losing ground to synthetic materials in industrial, feed, fiber, and food markets.” Address: USDA.

525. Moede, Herbert H.; Rogers, G.B.; Agnew, D.B.; Duewer, L. 1969. Synthetics and substitutes for agricultural products, a compendium: Meat and poultry substitutes. *USDA Economic Research Service, Miscellaneous Publication No. 1141*. p. 34-40. April.

• **Summary:** “Dale Johnson, an industry representative, estimated the following end uses for soy protein and grits to replace an animal-source raw material in commercial products in August 1967.” The estimated quantity is in million pounds per year: Pet food 120, meat products—fresh, smoked, and canned 30, calf milk replacers 15, soy milk and beverage products 10. Address: USDA.

526. Nagle, James J. 1969. Iowa plant to produce soy protein. *New York Times*. May 18. p. F15.

• **Summary:** General Mills announced that it has begun construction of a multimillion dollar plant in Cedar Rapids, Iowa, for the production of soy protein foods marketed under the brandname Bontrae. The plant is necessary because demand for the company’s Bontrae products has outstripped the present capacity of the pilot plant that makes them.

General Mills has invested millions of research dollars and “more than 300 man years of effort” in Bontrae foods, which are made from defatted soybean meal that is transformed into spun soy protein fiber. Bac-O, the first product, went into test markets several years ago and is now distributed nationally through retail food stores.

Soy protein products made by Swift & Co., ADM, and Worthington Foods are also discussed.

527. **Product Name:** Imitation Vienna Sausage.

**Manufacturer’s Name:** Bryan Bros. Packing Co. Subsidiary of Consolidated Foods Corp.

**Manufacturer’s Address:** Chicago, Illinois.

**Date of Introduction:** 1969 May.

**Ingredients:** Incl. sodium caseinate and soy protein concentrate.

**New Product–Documentation:** Gentry & Connolly. 1969. Stanford Research Institute, Report No. 374. “Fabricated Foods.” p. 10.

528. *Food Engineering*. 1969. Vegetable 'meats' look good for the '70s. 41(5):85-87. May.

• **Summary:** Pioneer producer Worthington Foods, Inc. of Worthington, Ohio, now makes more than 60 "meatless-meat products." Sales are growing 20% a year, quality is steadily improving, and consumer awareness is growing. A larger proportion of the simulated meats has been sold to people abstaining from meat for religious, health, or philosophical reasons, but purchases have also been made by the meat-consuming public.

Worthington is taking a sophisticated new marketing approach with its bacon-like slices named Stripples, which are made from randomly layered, spun soy protein fibers. The process of making Stripples is described. The company spins soy protein isolate purchased from Ralston Purina, Central Soya, and others. Address: Worthington Foods, Inc., Worthington, Ohio.

529. Gentry, Robert E.; Connolly, Eleanor M. 1969. Fabricated foods. *Stanford Research Institute, Report No. 374*. 16 p. May. (Menlo Park, California, and Zurich, Switzerland).

• **Summary:** This is subtitled "A research report by the Long Range Planning Service." Contents: Executive summary. Scope and definitions. Present status and outlook: Changes in product mix, changing technology. Impact on food processing industry: Markets, marketing strategies, processing, research and development. Impact on food service industry. Impact on food wholesalers and retailers. Impact on flavor technology. Impact on packaging materials. Impact on agriculture: Meat and poultry, dairy products, oilseeds, grains. Impact on petroleum, natural gas, and coal. Boxes: New protein sources. Approval by the Food and Drug Administration (FDA). Representative groups of companies developing new sources and forms of food. Examples of fabricated foods—1980.

This report predicts that sales of fabricated foods in the USA will increase from about \$1,500 million in 1969 to approximately \$7,000 million in 1980, but will still account for only 5% of total sales of the food processing industry. The primary impact during the 1970s will be on convenience, snack, and other specialty foods.

"Sales of meat, seafood, and poultry analogs amounted to only about \$2.5 million in 1966. Worthington Foods and Loma Linda Foods were the major suppliers to a primarily religious and vegetarian market. In the past few years, several major food companies have entered the market and sales have risen to an estimated level of \$10 million. As flavor and texture improve, 1980 sales will soar to \$1,500 million to \$2,000 million." The foodservice industry will be a prime outlet for the new products.

The most important food analog in America today is margarine. Among dairy foods, margarine accounts of about 66% by volume of the butter market, nondairy whipped

toppings have about 60% of the whipped cream market, and coffee whiteners have about 35% of the cream market. In terms of sales: In 1968 sales of margarine are \$475 million out of \$1,150 million (41%) for the total butter and margarine market. By 1980 this is predicted to increase to \$750 million out of a total \$1,250 million (analogs will have 60% of the total market). Sales of coffee whitener are \$30-35 million out of \$85-100 million (35%) for the total coffee cream and coffee whitener market. By 1980 this is predicted to increase to \$100 million out of a total \$130-150 million (71%). Sales of nondairy whipped topping are \$25 million out of \$40-50 million (55.5%) for the total whipped cream and nondairy whipped topping market. By 1980 this is predicted to increase to \$50-60 million out of a total \$80-100 million (61%). Sales of filled and imitation milks are \$3-4 million out of \$3100-3200 million (0.11%) for the total milk and imitation milk market. By 1980 this is predicted to increase to \$600 million out of a total \$3800-4000 million (15%, the biggest percentage increase). Sales of mellorine and other "frozen desserts" are \$45 million out of \$1200-1300 million (3.6%) for the total frozen dessert market. By 1980 this is predicted to increase to \$80-90 million out of a total \$1500-1700 million (5.3%).

A table (p. 5) titled "Soy Protein Products" discusses soy flour and grits, soy protein concentrate, and soy protein isolate, describing briefly the protein content, processing, price per pound, 1967 U.S. consumption, and applications. In 1967 soy flour and grits sold for \$0.075/pound and 105-110 million pounds were consumed. Soy protein concentrate sold for \$0.18/pound and 17-30 million pounds were consumed. Soy protein isolate sold for \$0.37/pound and 22-35 million pounds were consumed.

Page 10 lists representative companies developing new sources and forms of food. For each, the company name, city, state, and product name or names are given. Companies selling soy protein products include Archer-Daniels-Midland (Minneapolis, Minnesota), Bryan Bros. Packing Co. (Subsidiary of Consolidated Foods Corp, Chicago, Illinois), Central Soya Co., General Mills Inc. (Minneapolis), Griffith Laboratories, Inc. (Chicago), Loma Linda Foods (Riverside, California), Ralston Purina Co., Swift & Co. (Chicago), H.B. Taylor Co. (Chicago), USDA ("Developing edible forms of soybean protein"), and Worthington Foods, Inc. (Worthington, Ohio).

Note: This is the earliest document seen (Aug. 2002) containing statistics on the meat alternatives industry or market—by geographical region. Address: 1. Senior economist; 2. Industrial economist, Stanford Research Inst., Menlo Park, California 94025. Phone: 415-326-6200.

530. **Product Name:** [SVP {Structured Vegetable Protein}].

**Foreign Name:** Ptitai Soya.

**Manufacturer's Name:** Shefa Protein Industries Ltd.

**Manufacturer's Address:** Industrial Zone, Arad, Israel.

**Date of Introduction:** 1969 May.

**Ingredients:** Defatted soy flour.

**Wt/Vol., Packaging, Price:** For export and foodservice: 12 kg cardboard cartons with a plastic liner; For retail, 500 gm plastic bag, later in small paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Horan, Odell, and Forman. 1971. PAG Bulletin No. 13. p. 26. “Shefa Protein Foods, Ltd. (Israel). The company manufactures texturized soy food products by thermoplastic extrusion.”

Horan. 1974. Meat analogs. p. 401. This product is made of soy flour (50% protein). It is probably extruded.

Duda. 1974. Vegetable protein meat extenders and analogues. p. 89. The company, now named Shefa Protein Industries, Ltd., is listed as the only manufacturer of soy protein products in Israel.

Call Israeli Consulate, Economic Dept. in San Francisco. 1991. March 25. The 1988-89 directory shows the parent company located at P.O. Box 707, Haifa 31006. Phone: 972 4-721-141. The manufacturing company is located at P.O. Box 39, Arat 80700, Israel. Phone: 972-57-957860. Fax: 972-57-958049.

Talk with Mrs. Ronit Sklar, Plant Manager of Shefa. 1991. March 27.

Letter (fax) from Daniel Chajuss, Managing Director of Hayes General Technology Co. Ltd. in Israel and founder of Hayes Ashdod Ltd. in 1963. 1993. Jan. 14. “The first TVP type product in Israel was made in about 1965 by Dr. Sol Katzin [Katzen] in a company named Shefa Ltd., situated in Arad.”

But note: Letter from Mrs. Ronit Sklar, Plant Manager, Shefa Protein Industries Ltd. 1991. April 14. The company’s first product was Schnitzel Cotlett, a Soya Hamburger.

Talk with Sol Katzen, co-founder of Shefa Protein Industries Ltd. 1993. March 14. SVP (like today’s TVP) was Shefa’s first product, launched in 1969—not 1965. The company got a registered trademark on the name. The name in Hebrew is Pitay Soya (pronounced pee-TAY SO-ya) but “SVP” was written on the package in roman (not Hebrew) letters. The only ingredient, defatted, flash-desolventized soy flour, was imported by the container load from Central Soya. The soy flour could not be heated much during defatting so that it maintained a high nitrogen solubility index (NSI), and it must be food grade. As far as they knew, no company in Israel was making defatted soybeans. Eventually they used defatted soy flour made in Israel; they worked with several Israel crushers to install the necessary flash desolventizing equipment. The product was sold only for food use to 3 markets: (1) About 50% was exported, mainly to Iran, France, Sweden, Italy, and the USA (in descending order of importance); (2) About 30% was sold to foodservice institutions in Israel; and (3) About 20% was sold to consumers via food stores in Israel. Initially the packaging for export and foodservice was 12 kg cardboard cartons with

a plastic liner. But soon they found a way to condense the product, remove the air without harming the structure, so they could sell 24 kg in the same sized box, which halved their shipping costs. This product came in only one size or shape (chunks) and one flavor (plain). Recipes appeared on the package. To reduce the flatulence factor, consumers were encouraged to soak the SVP in excess water, then squeeze out the water thoroughly.

Talk with Daniel Chajuss of Hayes. 2005. April 13. The taste of this product was problematic, but you can mask the taste. The larger problem is that soya flour, which is not alcohol washed, contains 3 antigenic proteins—2S, 7S, and 11S. People gradually developed an aversion to this product because of an immunological reaction. Of course, there are also flatulence factors in the soy flour. If they eat it only once a week or in small amounts with meat, it does not matter. But if they eat a lot of it, it affects them badly. We didn’t know this until many, many years later. We have also learned that you cannot feed soya flour to calves without it hurting them through an immunologic reaction.

531. Fehr, Walter R.; Clark, Robert C. 1969. New high protein soybean variety for contract production. *Iowa Farm Science* 23(12):3-5. June.

• **Summary:** Provar, a new special purpose, high protein soybean variety, is now in the hands of certified seed growers. It should be available to growers for contract production in 1970. This is the most detailed article seen on Provar. Photos show: (1) A round photo of cans or packages of Worthington Soyameat, Loma Linda Soyolac, and General Mills Bac\*Os. (2) Rows of Provar soybeans growing in a field. (3) A close-up of eleven seeds of the following soybean varieties in rows showing the hilum: Lindarin, Provar, Disoy, Magna, and Prize. The last three are large-seeded varieties. Address: 1. Asst. Prof. of Agronomy; 2. Research Technician, Crops Research Div., USDA-ARS. Both: Iowa State Univ.

532. *Soybean Digest*. 1969. General Mills breaks ground for new protein plant. June. p. 40.

• **Summary:** In Cedar Rapids, Iowa, General Mills has begun construction of the “world’s first major commercial plant to make a new group of foods from spun soy protein; they will be marketed under the “Bontrae” brand name. Demand for the company’s Bontrae foods has outstripped the present pilot plant’s capacity. The Cedar Rapids plant will be completed in about 1 year and initially will employ about 100 people. The first such product, Bac\*Os, is now in national distribution through retail stores.

James P. McFarland, president of General Mills, said the Bontrae foods will be less expensive than their natural counterparts, ranging in price from \$0.40/lb to \$0.85/lb in moist frozen form. Manager of the new plant in Cedar Rapids will be J. Brent Adair, age 34. The multi-million

facility will make highly sophisticated engineered meat-like foods. An architect's drawing (illustration) shows the Bontrae plant. Small photos show James P. McFarland and Brent Adair.

**533. Product Name:** Protoveg (Meatlike Products Based on TVP) [Flavors are Ham, Beef, Bacon, and Unflavored. Textures are mince, and chunky. Also Smokey Snaps (which resembled bacon bits)].

**Manufacturer's Name:** Direct Foods Ltd.

**Manufacturer's Address:** Greatham, Liss, Hampshire, England.

**Date of Introduction:** 1969 August.

**Ingredients:** TVP (made by ADM) plus flavoring.

**Wt/Vol., Packaging, Price:** 5 oz or 10 oz double cellophane bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Mail-order catalog and price list from Direct Foods Ltd. 1969. "The Protoveg Food Range." The company address is Copse House, Greatham, Liss, Hants. 6 panels. Dark green and yellow on light green. Flavors are ham, beef, bacon, or unflavoured. Pack sizes are standard or large. Textures are mince or chunky. There are 14 products total.

Export price list from Direct Foods Ltd. 1974. Oct. 1. Protoveg comes in beef, ham, pork, or natural flavors. Sizes are 5 oz, 10 oz, 10 lb, or 50 lb. 10 products total.

Ad in *The Vegetarian Health Food Handbook* (UK). 1974. p. 88. "Born free? Probably not." An illustration of a bull is shown. "Now you can eat beef without butchery. Protoveg brings you a complete range of meat flavour foods. Protoveg is a natural food made from soya beans." Direct Foods Ltd. is located at Bedford Rd., Petersfield, Hampshire. Phone: (0730) 4911 / 2.

Eva Batt. 1976. *What's Cooking*, rev. ed. p. xvi, xviii. This is a soya-based meat-like product. The unflavoured variety contains added vitamin B-12.

Trade catalog and price list from Direct Foods Ltd. 1977. April 25. Protoveg comes in beef, ham, pork, or natural flavors, plus Smokey Snaps. Sizes are 5 oz, 15 oz, and 10 lb (catering size). 14 products total.

Interview with Peter Roberts, founder of Direct Foods Ltd. 1990. Dec. 12. This was Direct Foods' first product, based on ADM's TVP purchased from British Soya Mills (British Arkady). BSM offered to supply Peter but would not offer any exclusive arrangement. BSM agreed not to compete with Peter, saying they were interested only in selling to food manufacturers, not to the retail market. Peter accepted and in 1969 placed a trial order of about 10 lb of beef chunks or mince. The Roberts called their product Protoveg (pronounced PRO-toe-vej, a registered trademark), and sold it in 9 different flavors and textures (see above): They packed it in 4.5 oz. double cellophane bags with a label between the two bags, developed a recipe leaflet and order form, and

distributed it via their Compassion in World Farming and via Beauty Without Cruelty (Lady Dowding's anti-fur-trapping group). The 4.5 ounces yielded 1 pound of hydrated product; the mince hydrated in 2 minutes and the chunks in 15-20 minutes. By the mid-1970s a typical label read: Protoveg: Textured Soya Protein. Beef-Style Chunks.\* \*Contains no meat. Vegetarian.

**534. Worthington Foods, Inc. 1969. Create! Improve! Processed plant protein (Portfolio). Worthington, Ohio. Eight inserts. 28 cm.**

• **Summary:** These 8 glossy color leaflets have a full-page photo on one side and a description of one product on the other. The cover letter (on Worthington letterhead) from Radcliffe F. Robinson, dated 22 Aug. 1969, explains that these are new vegetable protein products that Worthington now supplies to the food industry. The products are: Ground beef type granules. Chicken-alike cubes. Red meat extender. Fibrotein–spun protein fibers. Dehydrated ham-alike nuggets. Bacon-style chips. Chicken meat extender. Textured simulated meats.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the term "Chicken-alike cubes" or "ham-alike nuggets" to refer to meatless meatlike products made from soy. Address: 900 Proprietors Rd., Worthington, Ohio 43085.

**535. Prestbo, John A. 1969. Meatless 'meats':** Several firms develop soybean-based copies of beef, pork, chicken. Some now on market mixed with real thing; low cost, high-protein food is aim. Questions about taste, labels. food aim. *Wall Street Journal*. Oct. 2. p. 1, col. 1 and p. 21, col. 4.

• **Summary:** Discusses soy-based "pork, beef, and nuts" made by 6 U.S. companies including ADM, General Mills, Swift & Co., Worthington Foods, and Ralston Purina Co. Americans are eating more of these meat analogs than they may realize. "Soup mixes, canned stews and chili, frozen ravioli and prepared, frozen hamburger patties are among a growing number of grocery store staples that now contain relatively small amounts of flavored, textured soybean 'meats' along with real meat. In many instances, the only mention of the analogs on the labels of these convenience foods is in the fine-print list of ingredients. Analogs also are being tested in restaurants, factory cafeterias and institutions."

"Since last year, the New York State Department of Mental Hygiene has been adding General Mills Inc.'s meatless crumbled 'beef' and diced 'ham' and 'chicken' to meals for its 90,275 patients in 49 institutions."

Sales of soy-based analogs this year are estimated at \$10 million and growing fast, up from about \$3 million 5 years ago. "One study conducted by a West Coast research firm forecasts sales of \$1.5-\$2 thousand million for the products by 1980, which would equal 5-6% of the meat and poultry

market now projected for that year.”

“One of the first products to use analogs, Skippy Peanut Butter with Smoky Crisps (simulated ‘bacon’ bits), was dropped last year after little more than a year in test markets.”

“Last year a cattlemen’s convention innocently devoured a banquet entree of ‘meat loaf,’ only to be jolted later by a speaker who told them they had eaten soybeans, not beef.”

“Right now, most meat analogs retail for as much or more than the real meat they imitate. But eventually analogs’ biggest attraction is expected to be low cost—roughly half that of trimmed, boned and cooked real meat.”

Extruded soy “meats” wholesale for an average of \$0.35/lb., while those made from spun soy protein fibers range from \$0.45 to \$0.80/lb. General Mills is building its first meat analog plant at Cedar Rapids, Iowa. Worthington Foods makes a bacon analog named Stripples, which sells for \$0.79 per half pound package. “Worthington is also developing meatless breakfast sausages with similar characteristics which it plans to call Sizzles.

“Other food makers are trying different approaches to using analogs. Nalley’s Fine Foods division of W.R. Grace & Co. is test-marketing Meat Mate, a package containing dehydrated, textured soy particles. When mixed with a pound or more of ground meat and some water, the particles expand, extending the meat weight by up to 50%. Different types of Meat Mate contain various spices.” Other products include Wham, Bac-Os, and Bac’n.

536. Hartman, Jane. 1969. Versatile meat analogs will satisfy individual needs. *Modern Hospital*. Oct. p. 138.

• **Summary:** “If you think that meat analogs are nothing more than ‘fake food,’ you have a pleasant surprise in store.”

“General Mills, the Ralston-Purina Company, Worthington Foods and other food processors are all actively researching and test marketing meat analogs.” A diagram (courtesy of General Mills) shows how textured soy protein meat analogs, made from spun soy fibers, are manufactured.

A small portrait photo shows Miss Hartman. Address: Food Service Consultant, Baltimore, Maryland.

537. **Product Name:** [Vegetarian Schnitzel / Cutlet {Dry}].

**Foreign Name:** Schnitzel Tsimchi.

**Manufacturer’s Name:** Shefa Protein Industries Ltd.

**Manufacturer’s Address:** P.O. Box 39, Industrial Zone, Arad, Israel.

**Date of Introduction:** 1969 October.

**Ingredients:** Defatted soy flour.

**Wt/Vol., Packaging, Price:** 250 gm paperboard box with a liner.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Mrs. Ronit Sklar, Plant Manager, Shefa Protein Industries Ltd. 1991. April 14. The company’s first product was Schnitzel Cotlett,

a Soya Hamburger [or Cutlet].

Letter from Daniel Chajuss, Managing Director, Hayes General Technology Company Ltd. 1993. Jan. 14. “Dr. Sol Katzin [Katzen], the founder of Shefa Protein Industries Ltd. (the correct full name) is still alive and lives at 62 Itzakhi St., Herzelia [Herzliyya, or Hertseliya], Israel (Phone: 972-52-586369). Although commercial production of texturized soy flour probably started in 1967 (as Mrs. Sklar, the present Managing Director of Shefa Protein Industries Ltd. told you), trials and first the first non-commercial production of texturized by Shefa were probably earlier. If I am not mistaken, I was shown samples by Dr. Katzin as early as 1965.”

Talk with Sol Katzen, co-founder of Shefa Protein Industries Ltd. 1993. March 14. Very shortly after Shefa’s first product, SVP, was launched, they realized that they wanted a larger chunk in the shape of a cutlet. In Arad they built a die that cut and shaped this cutlet as it emerged from the extruder. Then it dropped directly into a roller (while it was still plastic), which compressed it to twice its original density and gave it a much meatier texture. A typical schnitzel (which was a dry product) was about 3 inches wide by 4 inches long. There were many schnitzels in each 250 gm box. The product was sold only to retail consumers in Israel. The Hebrew word “tsimchi” is pronounced “Tsim-HEE”. The instructions read: “In order to use SVP it must be hydrated in a ratio of 1 to 2 in water, in either of two ways: Approximately 5 minutes in boiling water or in cold water. In both cases the SVP has to be soft inside. To make sure there is not too much water, we usually advise to squeeze out the excess while flattening the schnitzel. In both cases, instant chicken soup, salt, pepper, garlic, onion, and cumin is added to the rehydration water. Then when the schnitzel is rehydrated and flattened, you treat it in the same way as regular schnitzel, dipping it in beaten eggs, and then bread crumbs, and finally frying until it is brown.”

538. **Product Name:** Stripples (Meatless Bacon-like Strips Based on Spun Soy Protein Fibers).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1969 October.

**Ingredients:** Incl. spun soy protein fibers.

**Wt/Vol., Packaging, Price:** 5 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Notes by Dr. Walter Wolf of Peoria, Illinois. 1969. April 16. Worthington is now test marketing Stripples, a frozen product. Upon heating, there is no shrinkage or fat loss. Wall Street Journal. 1969. Oct. 2. p. 1. “Meatless ‘meats.’” Stripples retail for \$0.79 per half pound package. Spot in Food Product Development. 1969. Jan. p. 13. A photo shows a package of Stripples. 8 oz sells for \$0.69. Spot in *Soybean Digest*. 1970. April. p. 9. Being

test marketed in Fort Wayne, Indiana. Stripples do not shrink.

H. Hellman. 1972. *Popular Science*. Oct. p. 78-80, 164.

This product is made from spun soy protein fibers.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a frozen pork-like product based on spun soy protein fiber.

Horan. 1974. Meat analogs. p. 380. Ad (½ page) in *Better Nutrition*. 1974. Dec. p. 45. "Now they're back. Meatless Stripples." A photo shows the package.

Manufacturer's catalog. 1984, undated. Frozen Products. Label reads: "Artificial Bacon Flavor. Textured Vegetable Protein Strips." Frozen.

Worthington Foods. 1989. "The Tradition of Healthy Foods" (50th anniversary booklet). p. 21-22. Worthington's first products made with spun soy protein fibers were White Chik, Beeflike, Prosaage, Stripples, and Holiday Roast (with a plastic wishbone). All were hits and sales took off. These products were sold frozen. In "October 1963 a series of television, radio and newspaper advertisements featuring the new frozen foods was introduced."

539. Blakeslee, Sandra. 1969. Challenge to food tests. *New York Times*. Nov. 10. p. 1.

• **Summary:** A good history of the use of food additives, legislation governing food additives, and legitimate concerns over the safety of food additives in the United States. Experts predict that there will be more "synthetic foods" e.g., "meat analogues extracted from vegetable proteins, such as the soybean, and doctored to taste like real meat."

540. Simpson, Alma. 1969. Here's a soy menu for the farm or family group. *Soybean Digest*. Nov. p. 38-39.

• **Summary:** The 10-course soy dinner menu uses the following products made by Worthington Foods or Fearn Soya Foods: Hi-Protein, Fried chicken style soy meat, Salisbury soy meat steak, Veja-Links soy meat, Soy powder (flour), Diced chicken soy meat, Soyamel (powdered soymilk). The author is the wife of Chas. V. Simpson, former American Soybean Assoc. director from Minnesota and a past president. Address: Tetonka Farms, Waterville, Minnesota; Wife of former American Soybean Assoc. director.

541. *Chemical Engineering*. 1969. General Mills' engineered foods score high in technical, commercial and sociological impact. Dec. 1. p. 79-85. [10 ref]

• **Summary:** General Mills has won the 1969 Kirkpatrick Chemical Engineering Achievement Award based on its innovative work with spun soy-protein monofilaments. The firm's Bontrae line of protein foods first won strong consumer retail acceptance "with an analog of bacon, Bac\*Os." This product is already widely sold in grocery stores throughout the USA (except on the West Coast, due to lack of production capacity). "Meanwhile, quick-

frozen, precooked chunks and crumbles of analogs of beef, poultry, and a frozen ham-analog sandwich spread, have been successfully test-marketed at hotels, restaurants and institutions in Albany, New York, as well as in certain outlets of national restaurant chains. What's more, General Mills is supplying its new textured-foods line as ingredients for products sold by Thomas J. Lipton, Inc., Hunt Foods & Industries, Inc., Lawry's Foods, Inc. and others.

Dr. Arthur D. Odell (Director of Special Programs) has been the prime mover in the development of this product line. He often cites the "protein gap" that exists in many poorer parts of the world. Photos show: (1) Dr. Odell with a quotation from him on the dire consequences of dietary protein inadequacy. (2) Five views of the process and products (with meat analog flow sheet). (3) Half-finished plant in Cedar Rapids, Iowa, that is scheduled to start operation in April 1970 and to produce 20 to 30 million lb/year of "wet" or "dry" meat analogs.

Also discusses: Nutrition, versatility, acceptance. Solving upstream problems. Complications during spinning.

The initial base patent for this process was U.S. patent 2,682,466 (Boyer 1954).

542. Worthington Foods, Inc. 1969. Dealer wholesale price list-order blank. Worthington, Ohio 43085. 1 p. Dec. 15.

• **Summary:** New products in the Worthington Foods line include: Salisbury Steak, Worthington "209," Stripple Zips, and Tamales.

The Madison Foods line of products now includes: Cheze-O-Soy, Madison Burger, Not Meat (Tomato). Yum. Infasoy. Address: Worthington, Ohio. Phone: 614-885-9511.

543. *Wall Street Journal*. 1969. Miles Labs set to buy fabricated-food maker: Worthington to be purchased for \$16.4 million of common. Makes about 65 protein items. Dec. 22. p. 10.

• **Summary:** "Elkhart, Indiana-Miles Laboratories Inc. has agreed in principle to acquire all the outstanding stock of Worthington Foods."

Worthington Foods is a pioneer in the technology of making textured vegetable proteins, especially those from edible spun soy protein fibers, and soy beverages. It currently accounts for about 50% of the fabricated food market with trademarks such as Stripples, Prosaage and Soyameat. Worthington's 1969 sales will be an estimated \$5 million.

544. *SoyaScan Notes*. 1969. Chronology of soybeans, soyfoods and natural foods in the United States 1969 plus overview of the 1960s (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1969 Jan. Volume 1, Number 1 of *Food Science and Technology Abstracts* published; the earliest records in it go back to Jan. 1968. It is created from the world's first computerized database specializing in food.

1969 Jan. Richard M. Nixon inaugurated as President of the United States. Clifford M. Hardin of Indiana is Secretary of Agriculture.

1969 March. Paul Hawken takes a 9-month trip to Japan and arranges for Mitoku and Muso Shokuhin to export natural foods to Erewhon.

1969 March. Soybean yields in tests top 100 bushels/acre for the first time.

1969 March. Essene Macrobiotic Supply starts business in Philadelphia, Pennsylvania. Denny Waxman and Charles Smith are founders.

1969 June. A.E. Staley Manufacturing Co. acquires Gunther Products, a pioneer in the field of modified (enzyme hydrolyzed) soy whipping proteins. Gunther had been founded in 1948, incorporated in 1949.

1969 Aug. Erewhon–Los Angeles opens as a small macrobiotic natural foods retail store at 8003 Beverly Blvd. Bill Tara is the first manager.

1969. USAID starts actively encouraging U.S. businesses to launch low-cost commercial protein products in Third World countries.

1969 fall. Erewhon Natural Foods in Boston, Massachusetts, starts to distribute macrobiotic and natural foods. They had begun to wholesale these foods out of the back of their retail store in the spring of 1969. They are America's first natural foods distributor, and remain the largest for many years.

1969 Oct. *Protein-Enriched Cereal Foods for World Needs*, edited by Max Milner, published by American Assoc. of Cereal Chemists.

1969 Nov. Bac-o-Bits, meatless bacon bits made from extruded soy flour, start to be sold nationwide by General Mills. Its forerunner, Bac\*O's, made from spun soy protein fiber, had been introduced in May 1966. Frozen Bontrae meat analogs are sold to the foodservice trade. This pioneering work by one of America's largest food companies indicated to the U.S. food industry that the time for soy protein foods of the future had arrived.

1969 Nov. 4. Eden Organic Foods incorporated in Ann Arbor, Michigan by Bill Bolduc, and their macrobiotic retail store begins operation, selling soyfoods including tamari and miso purchased from Erewhon. The company grew out of a loosely-knit food buying co-op which had started in about July 1967 but which had no name, no formal structure, and no bank account. Bolduc was joined 9 months later by Tim Redmond.

1969 Nov. 17-21. United Nations Industrial Development Organization Expert Group Meeting on Soya Bean Processing and Use held at Peoria, Illinois.

1969. The first of the new wave of tempeh shops in the Western world, Handelsonderneming van Dappern (later renamed Tempeh production Inc.) started by Robert van Dappern in Kerkrade, The Netherlands. It soon becomes the world's largest tempeh manufacturer.

1969. The Program for International Research, Improvement, and Development of Soybeans (PIRIDS) established at the University of Illinois with funding from a Rockefeller Foundation grant. The forerunner of INTSOY, it is directed by Earl R. Leng.

1960s overview:

Oilseed Proteins and the Protein Gap. Worldwide, there is a growing consensus that Third World countries are facing a "protein crisis," that protein malnutrition is the world's most widespread deficiency disease, and that low-cost oilseed proteins (such as defatted soybean meal and flour) offer the most promising hope for remedying the problem. The leading architect and proponent of this view is Dr. Aaron Altschul of Georgetown University School of Medicine. The United Nations' FAO/WHO/UNICEF Protein Advisory Group, composed of the world's leading authorities in the field, is very active from the mid-1960s to the mid-1970s, supporting wider use of soy protein products and soyfoods.

Food for Peace Shipments of Soy Fortified Foods begin. The first shipment of such foods, CSM (corn-soy-milk), took place in 1966, when 28,000 metric tons (tonnes) were shipped. The next year 54,000 tonnes were shipped. Shipments increased dramatically during the 1970s.

Growing Interest in Modern Soy Protein Products. These new products, including soy protein isolates and concentrates, and textured soy protein products, now appear to have major potential in the food systems of all countries.

Leading Soyfoods Research Centers in America are the Northern Regional Research Laboratory at Peoria, Illinois (Hesseltine, Wang, Mustakas, Wolf), and the New York State Agricultural Experiment Station at Geneva, New York (Steinkraus and Bourne).

Vitasoy sales are booming in Southeast Asia. The introduction of Vitasoy by K.S. Lo in Hong Kong in the early 1940s brought soymilk into the modern era. Takeoff began in 1955 when Vitasoy began to be marketed like a soft drink. Sales grew from 8.4 million bottles that year to 42 million in 1960 and 100 million in 1970, a 2.4-fold increase during the 1960s. By 1962 Vitasoy had become Hong Kong's best-selling soft drink, ahead of such internationally known brands as Coca-Cola, Pepsi-Cola, and Seven-Up.

Shoyu (Soy Sauce) Becomes a World Class Seasoning. Thanks to Kikkoman. Shoyu has long been the world's most popular seasoning other than salt, and Kikkoman has been the world's largest manufacturer since about 1918. During the 1960s Kikkoman internationalized its operations, developing new markets for shoyu throughout the world by exporting from Japan and promoting the products for use in Western-style recipes, largely with meat, fish, and poultry. Production climbed from 183,000 kiloliters in 1960 to 340,000 kl in 1970. During the same period its share of the Japanese shoyu market rose from 18% in 1960 to 30% in 1970.

Steady Rise in Soybean Production in Latin America

and Africa. In Latin America production rose from 231,000 tonnes in 1960 to 1,535,000 tonnes in 1969, a 6.6-fold increase during the decade. Brazil accounted for 87% of that production in 1969, followed by Mexico and Colombia.

African soybean production rose from 27,000 tonnes in 1960 to 74,000 tonnes in 1969, a 2.7-fold increase. Nigeria accounted for 84% of that production in 1969, followed by South Africa and Ethiopia.

American Soybean Association Funding Increases Dramatically from Checkoff Programs. This was a decade of great growth for ASA. In 1962 the Minnesota Soybean Growers Assoc., the first affiliated state association, was founded. The ASA's biggest breakthrough to date came in 1966, when soybean growers began to support their own market development and research activities (previously funded by USDA's Foreign Agricultural Service) using funds provided by state checkoff programs. Typically ½ to 1 cent of funding was generated from each bushel of soybeans sold in states where a checkoff referendum had passed. By the early 1970s the checkoff programs had begun to generate large sums of money, which allowed ASA to expand its activities. Expanded market development activities overseas led to a steady, long-term increase in soybean exports.

Soybean Changes from an Oilseed to a Protein Seed. Prior to the mid-1940s the soybean, worldwide, had been crushed primarily for its oil. The meal was considered a by-product. But in the post-war period, with growing affluence driving increased demand for meat, the demand for meal outstripped that for oil, and the oil became the by-product. This trend, which started in America, was in full swing by the 1960s and expanded to other countries thereafter.

Soybean Digest and ASA Interest in Soyfoods. During the past two decades *Soybean Digest* has published a steady stream of articles on soyfoods worldwide. Soyfoods were given big play at many ASA annual conventions. This interest in the USA had largely stopped by the mid-1970s, focusing on soybean production instead.

545. Reynolds, W.B. 1969. Fundamentally, research is applied. *Progress Thru Research (General Mills, Inc., Minneapolis, Minn.)* 23(2):1-5.

• **Summary:** Includes a discussion of the company's protein operations designed to develop and commercialize "new and never before foods." One of these was spun soy protein fibers—monofilaments made in an acid, high electrolyte bath, then sold as Bac\*Os, the company's first product of this type to appear in the consumer market. This "bacon analog" used this rather sophisticated technology. "The semi-works facilities at the James Ford Bell Technical Center are now producing these products on a dry weight basis at close to two million pounds per year." The monofilaments are converted into meat analogs as seen in *Life* magazine a few months ago.

"The Bac\*Os brand product is a dry, shelf stable

product. The beef, ham, and poultry products are moist, fast-frozen and free flowing and are ready for immediate use after thawing." They are sold under the registered trademark Bontrae. General Mills is testing these products in Guatemala and West Pakistan. Photos show three dishes containing these new protein products. Address: Vice President, Research & Engineering, General Mills, Inc.

546. Shurtleff, William. 1969. *The Tassajara food trip*. Tassajara, California: Published by the author. 63 p. Dec. 28 cm. [8 ref]

• **Summary:** Each of the 167 recipes is numbered, all show a strong natural foods influence, and many show a macrobiotic influence. Soy-related recipes include: 60. Fresh daikon nitsuke with miso. 74. Squash in miso-tahini sauce. 76. Nori with tamari.

77. Basic soybean preparation. "Put 2 cups soybeans in a quart container and fill the container with water. Let soak overnight. Pour into a pressure cooker and cook at 15 lb. for 40-50 minutes. Allow pressure to go down naturally. If water remains, continue to simmer beans in open pot until it is gone. Add tamari [soy sauce] to taste 10 minutes before finishing. Note: It is very important that soybeans be well cooked. They should be boiled until they are very soft and easily crushed between the thumb and ring finger, otherwise they will cause digestive problems (to put it nicely!)."

Note: Pressure cooking soybeans can be dangerous! The skins can come off, foam up, and clog the pressure regulator.

78. Soybeans with hijiki. 79. Soybeans with hijiki and tahini (with miso). 80. Soybeans sauteed in miso. 81. Soybeans with lentils and buckwheat flour. 82. Soybeans with carrots and lentil sprouts. 83. Soybeans with dried daikon. 84. Soybean stew. 85. Broiled soyburgers. 86. Roasted soybeans. 87. Tofu sauteed. 96. Miso soup with tofu, carrots, burdock and mushrooms. 97. Miso soup with wakame. 98. Wakame soup with tofu. 99. Soy sauce & lemon soup. 101. Thick lentil soup with miso. 102. Thick lentil soup with miso & vegetables sauteed. 103. Lentil soup with miso and parsley garnish. 105. Aduki/azuki bean soup with miso. 107. Thick split pea soup with miso & vegetables. 110. Navy bean soup with miso. 115. Mushroom soup with dried tofu.

119. Misozuke pickles. 120. Kombu pickled in miso. 122. Bancha with tamari. 123. Kuzu cream with tamari. 125. Ume-syo-kuzu (with umeboshi, tamari and kuzu). 131. Basic soybean spread. 133. Lentil miso spread. 135. Garbanzo and miso spread. 138. Muso (miso-tahini) spread. 139. Peanut butter & tamari spread. 142. Peanut butter, miso, apples, carrot and parsley spread. 161. Sesame tofu (no soy). 163. Nut and seed loaf with miso.

San Francisco's largest natural foods store was New Age Natural Foods, 1326 Ninth Ave. run by Fred Rohé [Rohe]. Also recommended are The Food Mill, 3033 MacArthur, Oakland [founded in 1933 by John Denis, Sr.]; and Chico-

San, P.O. Box 1004, Chico, California. Selling Spiral Foods miso and tamari in bulk; The General Store, 5th and Junipero in Carmel.

Note 1. This is the 2nd earliest document seen (Nov. 2010) concerning the work of William Shurtleff with soyfoods. He wrote the book on a typewriter while practicing at Tassajara Zen Mountain Center, made about 30 photocopies, and sent them to friends as Christmas presents. He did not meet Akiko Aoyagi until 25 Dec. 1971 in Tokyo, Japan.

Note 2. This is the earliest document seen (Jan. 2014) in the SoyaScan database concerning or under the subject heading “Soyfoods Movement.” Address: Zen Mountain Center, Carmel Valley, California.

547. **Product Name:** Worthington Tamales.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1969 December.

**Ingredients:** In 1971: Textured soy proteins (incl. Fibroprotein spun soy protein fibers), tomato paste, corn meal, corn oil, dehydrated onion, rolled oats, hydrolyzed vegetable protein, salt, sugar, corn starch, sweet peppers, MSG, garlic spices, caramel color, water to process.

**Wt/Vol., Packaging, Price:** 20 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Worthington Foods Dealer wholesale price list–order blank. 1969. Dec. 15. Lists “Tamales.” Note: This is the earliest meatless tamale seen. *Webster’s Dictionary* defines tamale (derived from Nahuatl *tamali*), a word first used in English in about 1854, as “ground meat, seasoned usually with chili, rolled in cornmeal dough, wrapped in corn husks, and steamed.”

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in “Worthington Tamales (Worthington).”

Ad in Whole Foods. 1983. Sept. p. 45. in 20 oz. cans. This product and Vegetable Skallops are being promoted as “Salt Shakers.” Both are available in versions with and without salt and MSG. For the hypertensive and sodium-conscious. A black-and-white photo shows the can and label. The text reads: “Contains no meat. A vegetable protein product. No added salt or MSG.”

Worthington Yesterday and Today. 1984. p. 11. Nutrition Action Healthletter. 1987. Oct. p. 13. Critical treatment of this product which contains 790 mg of sodium vs. only 65 mg for lean beef. Much of the sodium comes from MSG. The “no salt added” label is highly misleading though technically legal. It also contains caramel coloring. Thus it is not necessarily more healthful than beef.

548. **Product Name:** Stripple Zips (Dehydrated; Smoky

Bacon-like Flavor).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 614-885-9511.

**Date of Introduction:** 1969 December.

**Ingredients:** In 1971: Wheat, soy and yeast protein, corn oil, egg albumin, brown sugar, salt, U.S. certified color, seasonings, MSG, carrageenan, flavorings, nucleotides.

**Wt/Vol., Packaging, Price:** 6 x 11.5 oz.

**New Product–Documentation:** Worthington Foods Dealer wholesale price list–order blank. 1969. Dec. 15.

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in “Stripple Zips (Worthington).” This is an institutional product.

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a dehydrated product with a smoky, bacon-like flavor.

549. **Product Name:** Worthington “209.”

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio 43085. Phone: 614-885-9511.

**Date of Introduction:** 1969 December.

**Ingredients:** In 1971: Water, textured soybean protein (Fibroprotein spun soy protein fibers), vegetable oil, wheat protein [wheat gluten], egg albumin, soybean protein, salt, brown sugar, starch, wheat flour, vegetable extractive flavorings, MSG, seasonings.

**Wt/Vol., Packaging, Price:** 12 x 14 oz.

**New Product–Documentation:** Worthington Foods Dealer wholesale price list–order blank. 1969. Dec. 15. Lists “Worthington “209””. Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 164. Lists the ingredients in “209 (Worthington).” This is an institutional product.

550. **Product Name:** Tofu Sausages.

**Manufacturer’s Name:** Africa Basic Foods Inc.

**Manufacturer’s Address:** Kampala, Uganda.

**Date of Introduction:** 1969.

**Ingredients:** Tofu 96%, nonfat dried milk 2%, salt 1.0%, MSG 0.5%, curry powder 0.3%, sage 0.2%.

**Wt/Vol., Packaging, Price:** Packed into 1 inch diameter casings.

**How Stored:** Refrigerated.

**Nutrition:** Protein 15%, moisture 65%.

**New Product–Documentation:** Harrison. 1969. Analysis of the Uganda Experience Based on Africa Basic Foods Inc. p. 16-17. Interview with Dr. D.W. Harrison. 1982. Letter from Sam Yoshimura. 1982. The product was pasteurized at 190°F (88°C) for 20 minutes in the casings, cooled, and refrigerated.

551. **Product Name:** Seitan.

**Manufacturer's Name:** Erewhon Trading Co., Inc. (Importer-Distributor). Made in Japan by Marushima Shoyu Co.

**Manufacturer's Address:** 342 Newbury Street, Boston, MA 02115.

**Date of Introduction:** 1969.

**Wt/Vol., Packaging, Price:** 3.5 oz jar.

**How Stored:** Shelf stable.

**New Product–Documentation:** This is the earliest known commercial seitan product sold in the USA; it was imported from Japan. Erewhon Trading Co., Inc. 1970. Jan. 1. "Traditional foods: Importers, processors, distributors. Wholesale-retail catalog." The company imports and sells "Seitan: Wheat and soy sauce cooked together for a long time. When used in soups or sauteed in vegetables it has a taste much like beef; 3½ oz."

Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. "Flour power! Cooking with seitan, the delicious natural food from grain." "When I (Barbara) first tasted seitan, about sixteen years ago, I was fascinated by its flavor and texture. I had stopped eating meat for intellectual rather than sensory reasons, so the idea of using a grain-based product which had the texture of animal food was an appealing one. There were a few problems, however. The only seitan available at that time was expensive, and salty. And the pieces of seitan, as they came out of their jar from Japan, were tiny and hard. Perfect for beer-snacks but not really useful for other purposes."

Talk with Lenny Jacobs. 1991. Nov. 14. Leonard first heard the term seitan in about 1969. Erewhon was importing a little package of dried, salty seitan from a macrobiotic exporter in Japan. Yuko Okada of Muso Shokuhin, or his assistant Julia Yamaguchi (daughter of Alcan Yamaguchi) might know details on this product.

Talk with Aveline Kushi. 1992. April 9. The first seitan imported to America was made by Marushima Shoyu Co. in Japan. George Ohsawa asked them to make it and showed them how. It was imported to America at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. She is not sure which Japanese company (Muso or Mitoku) exported this seitan to America, or which American company imported it, but it probably started to be imported in about 1969.

Letter (fax) from Yuko Okada of Muso Co. Ltd., Japan. 1992. July 2. "I remember the term 'seitan' since I was a kid; it was probably coined by George Ohsawa. *Sei* means 'is' and *tan* is the first character in the Japanese term *tanpaku*, which means 'protein.' So *seitan* means something like 'right protein substitute.' Marushima Shoyu Co. developed seitan commercially in Japan and Muso has carried their

seitan since Feb. 1966 when we started. We shipped seitan to Erewhon on a regular basis from 1968. [Note: Kotszsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] We also exported it to Chico-San. In Europe, we exported seitan to Paris, France."

Talk with Tom DeSilva, owner of Erewhon Natural Foods in Los Angeles. 1992. July 10. The first seitan sold at the Erewhon retail store in Los Angeles, by late 1969, was imported from Japan. "I used to eat that stuff with rice crackers like mad. It was just like jerky. I loved it. I could eat a whole package. But it was so salty that you had to keep eating rice crackers to cut the salt." Originally it was sold in a plastic bag, then later in a jar immersed in a dark liquid. Tom liked the product in the bag better.

552. **Product Name:** Loma Linda Vegelet 'n Gravy (Meatlike Product).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1969.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Loma Linda Food Co. 1969. "Wholesale Price List." Vegelet 'n Gravy is now sold in 14 oz and 20 oz cans.

553. **Product Name:** Sanitarium Health Foods Vegetarian Rediburger (Canned Vegetarian Loaf).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1969.

**Ingredients:** Wheat protein, vegetable oil, wheat germ, soy protein, hydrolysed vegetable protein, dried yeast, salt, yeast extract, brown rice, onion, caramel, colouring, Savex.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color. Photo shows a burger on lettuce and a bun topped with catsup and onion rings. "Vegetable Protein" Recipes for Company Roast and Golden Hot-Pot.

Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1969.

554. Cahill, Tilda. 1969. A South African vegetarian cook book. Cape Town, South Africa: Haum [Hollandsch Afrikaansche Uitgevers Maatschappij]. 80 p. Color illust. 25 cm. \*

• **Summary:** Pages 14-15 describe how to make gluten and its broth at home, and give recipes for: Gluten and walnut meat. Gluten rissoles. Gluten steak. Gluten casserole. Available in the USA from Richard Abel & Co. Reprinted,

apparently without changes, in 1974.

The section titled “Dried Legumes—Beans, Peas, Lentils” states: “Soya beans or Soy beans are perhaps the most nutritious staple diet known to mankind. They contain all the essential amino-acid constituents found in meat or dairy products. Soy bean flour can be added in the cooking to dishes of all kinds... A spoonful of Soya flour added to sauces, soups, casseroles, nut loaves and rissoles will provide extra nourishment. Soya beans are extremely rich in protein.” Soya beans are best pressure cooked, as they take a long time to soften. Recipes are given for: Soya bean roast. Soya bean croquettes.

555. *Cooking good food*. 1969. Order of the Universe Publications, Box 203, Prudential Center Station, Boston, MA 02199. 34 p. No index. 28 cm.

• **Summary:** A simple, concise source of the basic macrobiotic ideas adapted to the American way. Note 1. This booklet was written by Jim Ledbetter, a student of macrobiotic teacher Michio Kushi, although his name does not appear in it.

Contents: The traditional food of man. The way of eating. Salt and oil. Special foods. Useful kitchen items. Cooking brown rice. Cooking other grains. Cooking vegetables. Cooking sea vegetables. Cooking beans. Cooking soups. Cooking with flours (Cooking noodles, cooking creams, baking bread, variations with flour). Cooking animal food. Preparing salads. Preparing condiments. Preparing drinks. Cooking desserts. Plasters. Traveling and eating out. The manner of eating. The seven levels of cooking.

In Chapter 4, titled “Special Foods” is a section on “Soybean foods” (p. 6), which states: “The soybean has been called the ‘Vegetable Cow’ of the Orient. It is full of good vegetable quality protein (43%). It was not traditionally eaten without special preparation, because it is fairly yin, except by monks who wished to limit their sexual desires. When cured with salt, however, it was used as a daily food. You will find these traditional preparations very helpful in your kitchen.

“Tamari is the ancient form of soysauce, fermented for at least eighteen months from soybeans, salt, wheat or barley, and water, without chemicals or preservatives. It has a very distinctive, delicious taste. It is used mainly in cooking vegetables when it is added after salting and just before the end of cooking time, and in broths. It is rarely used directly on grains, but is often found on the table to use with deep-fried foods. Some women mix tamari with an equal amount of water to make it less strong.

“Miso is a paste made from the same ingredients as tamari. There are two varieties; one (Hacho) is a little harder and darker in texture than the other. It has many uses, especially in soups, in which case it is added towards the end of cooking time so that the wonderful digestion-aiding bacteria it contains will not be destroyed. (All of these soybean condiments produce their best flavor when cooked

slightly.) Miso soup has a deep, satisfying bouillon flavor, and is often taken every day as a delicious source of energy. It is helpful to thin miso in a little water before adding it to soups and sauces.

“Morromi [sic, moromi] is the pulp from which tamari has been made. It has a very special tangy flavor, and is used like miso.

“Seitan or ‘Protein X’ is made from the same ingredients as the above condiments. A slightly different process produces a strong jerky which, when boiled or sauteed, resembles beef in appearance and taste. It is very good in soups” (p. 6). Note 2. This is the earliest document seen (March 2011) that mentions “seitan.” It is also the earliest English-language document seen (March 2011) that contains the word “seitan.” By placing seitan in the category of “Soybean Foods,” the author is apparently emphasizing the importance of soy sauce as one of its two main ingredients. He seems to have tasted seitan, but it is not clear that he knows what its other main ingredients are (wheat gluten, ginger, sesame oil) or how it is prepared.

“Tofu is made from fresh soybeans. This curd or ‘cheese’ is a good quality, strong yin food which is very refreshing for occasional use in summer when it is cooked with tamari. It is helpful to store tofu in water. The more yang pulp, which is usually thrown away, can sometimes be obtained from the Oriental stores which make tofu, and used to make delicious casseroles or well-sauteed vegetable dishes.”

The section on “Condiments” (p. 6-7) discusses Gomasio (Sesame salt), umeboshi (salted plums), and Tekka. The section on “Oriental vegetables” (p. 7) discusses lotus root, daikon, ginger root, Chinese cabbage, jinenjo (Japanese potato), and kuzu arrowroot.

In the chapter titled “Cooking Beans” the author considers “Aduki Beans” to be the “King of Beans.”

“Black Beans: The imported Japanese black beans are higher nutritional quality and superior taste. They are very sweet, delicious beans. They should be soaked and boiled, because their skin can become loose and clog a pressure cooker spout.”

“Miso Soup: This hearty bouillon is the staple everyday soup. Prepare vegetables and boil for at least one-half hour (if you want a really good soup); thin miso with a little of the stock in a bowl and add it to the soup towards the end. Do not boil the soup after adding miso or the beneficial digestion-aiding bacteria will be harmed. If it is simmered very slowly, it can be cooked from 5 minutes to one hour.

“Tamari Soup: Prepare as above using tamari instead of miso for flavoring. A simple tamari broth with onions or carrots and onions is often served over dishes such as noodles.”

In the chapter titled “Preparing Condiments” (p. 27) we read: “Vegetable Miso. Slice vegetables finely and saute. Add diluted miso and water and cook. Scallions, chives, carrot

tops and many other vegetables are good prepared in this manner. 'Tekka' is made from lotus root, burdock root and carrots. 'Sigure' [Shigure] ('November Rain') is prepared with lotus roots, carrots, and onions. A little freshly grated ginger is often added towards the end of the cooking. A small amount of these condiments is usually sufficient."

The chapter titled "Preparing drinks" (p. 28-29) discusses Mu tea, umeboshi tea, chicory, Yannoh [Ohsawa coffee], dandelion coffee, Bardan, Kokkoh, kuzu, ume-syo-kuzu, and daikon drink.

The chapter titled "Cooking Desserts" (p. 30) states: "Amasake (Homemade Rice Wine). For special occasions this drink is very smooth and sweet."

Tofu is also mentioned in the chapter titled "Plasters" (p. 31). "Tofu Plaster. Squeeze tofu (soy bean curd, see *Special Foods*) and mix with 10% flour to make it more manageable. Apply this to any painful, feverish, or inflamed area. Alternating tofu plasters with ginger compresses often helps stubborn cases."

Note 3 This is the earliest document seen (July 2000) that mentions "Hacho" miso (spelled that way). Subsequently, many macrobiotic publications used this word and spelled it that way.

The chapter titled "Cooking sea vegetables" briefly defines kombu, wakame, hiziki (the incorrect idea concerning "black rice" comes from a casual remark by Evan Root), arame, dulse, and nori (laver).

Note 4 One original edition of this booklet, sent to Soyfoods Center by Tim Redmond (a founder of Eden Foods), has one dark blue stalk of wheat against a light blue background. In the lower right corner of the cover the following has been stamped with a blue ink stamp: "Eden Organic Food Store, 514 E. William. Ann Arbor, Mich. [Michigan] 48104." Address: [Massachusetts].

556. Larson, Jeanne R.; McLin, Ruth A. 1969. 52 Sabbath menus. Nashville, Tennessee: Southern Publishing Assoc. 255 p. Index. 22 cm.

• **Summary:** This Seventh-day Adventist vegetarian cookbook contains several soy-related recipes: Tofu loaf (p. 52). Sukiyaki (with tofu, p. 186). Vegebites deluxe (with 1 no. 303 can Vegebites, p. 228). Soybean loaf (with cooked mashed soybeans, p. 228). Noodle entree (with 1 large can Choplets, p. 229). Creamed Skallops casserole (with 1 large can Skallops, p. 229).

The chapter titled "Emergency Meals" has a section on "Protein and Main Dish Foods" including "Canned vegetable proteins (Vegecona, Vegetable Steaks, Soyameat, Nuteena, etc.)."

557. Loma Linda Food Co. 1969. Wholesale price list. Arlington, California. 4 p. Undated.

• **Summary:** See next page. The cover states: "Quality foods since 1906. Camp Meeting Prices 1968, 1969." Soy-related

products include: Soy Flour. VegeChee [Tofu]. Soy Beans Boston Style. Soybeans T.S. Smoke (Shaker bottle). Soy Sauce (3 sizes, glass bottles). Other products [probably made mostly from wheat gluten and/or peanuts include]: Nuteena. Proteena. Vegecona. Vegelet 'n Gravy. Dinner Cuts. Dinner Rounds. Vegecuts. Vegeburger (regular or no salt added). Tender Bits. Linketts [Linkettes]. Big Franks. Little Links. Loma Linda Sandwich Spread.

Note: No mention is made of spun soy protein fibers. Address: Arlington, California.

558. Moore, Raymond S. 1969. *China Doctor: The life story of Harry Willis Miller*. 2nd ed. Mountain View, California: Pacific Press. 215 p.

• **Summary:** The original edition of this book was published in 1961. This 1969 edition, although it has been completely re-set, contains only minor revisions: (1) A new color paperback cover shows a large illustration of Dr. Miller's face. (2) This second edition contains a 3-page Postscript (p. 150-52), which describes his work in Hong Kong (1960-65, 1969), Philippines (1966), expansion of his work with soymilk in Hong Kong ("The Hong Kong soft drink industry dispenses more milks derived from his soybean milk than all others combined"), other work with soy ("His grain-and-soybean-based foods are being adopted as alternates to meat in lands which cannot support animals as a principal diet source. They range from soy cheese, milk, ice cream, and butter-like spreads to simulated steaks, wieners, and sausages. These vegetable foods now are making headway even in the United States and other Western countries. In an era of population dilemmas, Harry Miller reminds the experts that meat, as compared with vegetable protein, takes several times the acreage to produce the same amount of food."), George McGovern and Food for Peace (1961) which resulted in sharply increased exports of soybeans from the USA. (3) The number of pages in the book has been reduced to 152, from the original 215. (4) The valuable index in the first edition has (unfortunately) been omitted. (5) The number of photos has been reduced to 11, from 16 in the first edition, and many photos from the first edition were omitted. New photos (located on unnumbered pages 142-47) show: (1) Harry and Maude Miller at the time of their wedding in 1902. (2) Dr. Miller with a woman victim of goiter in China. (3) Hong Kong Hospital for Chinese refugees at Tsuen Wan, completed in June, 1965. (4) Dr. Miller with little Mohammed Ali, a Bedouin child in Libya. (5) Harry and his wife Mary in 1957 waiting at the airport in Benghazi, Libya. (6) Mr. Chan Shun donates 1 million Hong Kong dollars for the construction of a Seventh-day Adventist hospital in Hong Kong. Dr. Miller looks on. (7) In 1968 at Albuquerque, New Mexico, Dr. and Mrs. Miller are given a red-carpet welcome by Governor David F. Cargo.

1969

Francisco, California: Nitty Gritty Productions. xvi + 198 p. Illust. by Mike Nelson. 14 x 22 cm.

• **Summary:** An innovative but hard-to-read book printed with red ink on dark tan paper. The many illustrations (black line drawings) are excellent.

A surprisingly large number of the recipes in this cookbook contain soyfoods. Soy-related recipes include: Sukiyaki (with “1 block of fresh bean cake (*tofu*) or 1 can *tofu*, cut into bite-size squares,” and shoyu, p. 5-10). Teriyaki (normally done on a hibachi grill; *teri* = shiny or glazed and *yaki* = broiled, p. 16). Miso shiru (p. 20). Chicken teriyaki with sesame seeds (with shoyu, p. 24). Chicken liver teriyaki (with shoyu, p. 26). Shrimp teriyaki (with shoyu, p. 28). Spicy shrimp teriyaki (with shoyu, p. 28-29). Tofu dengaku (p. 29). Tofu yaki (fried) (with tofu, miso and shoyu, p. 29). Tofu soup (p. 48). Kaki no miso suimono (Oyster soup with soybean paste, p. 55). Vegetable and noodle miso soup (p. 56). Shrimp miso (p. 56). Takara yaki (omelette with tofu, p. 65). Tofu-egg cakes (p. 66). Tofu-egg omelette with white toasted sesame seeds (p. 66). Fried tofu with egg (p. 67). Cabbage with miso sauce (p. 85). Horenso (spinach) with miso (p. 89). Karai nasubi miso (Spicy eggplant with miso, p. 94). Goma nasubi miso (Eggplant with miso and sesame seed paste, p. 95). Tofu sauce (p. 102). Inari sushi (with aburage, p. 110-11). Miso dango (meatless rice-based patties / balls, p. 117). Soba (buckwheat noodles) with miso sauce (p. 122). Tofu to niku donburi (bowl with meat and tofu, p. 127). Sakana no nitsuke (fish cooked with miso, p. 135). Shiroy sakana no nitsuke (white fish with miso, p. 136). Tofu to ebi no kuzu-ni (tofu and prawns in kuzu sauce, p. 139). Simple kaki (oyster) miso (p. 140). Kaki nabe (pot of oysters with miso, p. 141). Kaki to tofu nabe (oyster pot with tofu and white miso, p. 141). Yaki hamaguri (broiled clams with white miso, p. 143). Kawari tofu nori zuke (prawn dumplings with tofu, p. 148). Tori dango miso (fried ground chicken with miso, p. 162). Tofu, pork and vegetables (p. 167). Mashed tofu and ground pork (p. 168). Buta nabe (pot-au-pork with “4 fried tofu, fresh or canned, cut in strips,” p. 168). Pork mizutaki (with tofu, p. 169). Beef mizutaki (with tofu, p. 175-76). Shabu-shabu (with tofu, p. 181). Shoyu is used in many, if not most, of the recipes in this book.

At the back is a glossary, which includes definitions of aburage, miso, shoyu, and tofu. Address: California.

560. Thurmon, Jimmie Joan. comp. 1969. *Adventures in vegetarian cooking: Over 200 meatless main dish recipes.* Nashville, Tennessee: Southern Publishing Assoc. 128 p. 23 cm.

• **Summary:** The author of this Seventh-day Adventist vegetarian cookbook is a woman. Interesting recipes include: Nut Cheese (no. 1 & 2, with peanuts or peanut butter and gluten flour, p. 11). Tomato Nuttose (with nut butter, p. 11). Homemade Nuttose (with nut butter, p. 12). Homemade Protose (with peanut butter and mashed beans (p. 12).

Homemade Nutmeat (dark) (with gluten flour, peanut butter, and Vegex, p. 12-13). Homemade Nutmeat (light) (with raw nut/peanut butter and flour, wheat meal, or soybean meal, p. 13). Nuttolene (with peanut butter and eggs, p. 13). Homemade gluten (with Vegex or soy sauce, p. 14). Granola. Preparing and cooking dry soybeans (p. 15). This page describes how to make “soybean pulp,” an ingredient is subsequent recipes. “Press cooked soybeans through a coarse sieve or grind in a food grinder. Use in making soups, croquettes, loaf, or soufflé. Cold, the pulp makes a nutritious and flavorful filling for sandwiches when mixed with chopped onion and enough salad dressing or milk to make it easy to spread. May be used like pumpkin or squash with milk, eggs, and spices as a filling for pie. May be used in place of burger in chili.”

Soybean loaf (p. 19). Soybean cheese loaf (with 1 can (14 oz.) soy cheese [tofu] and Savita, p. 21). Gluten roast no. 1 (with gluten burger, p. 21). Soybean loaf, p. 27). Soybean-rice loaf (p. 28). Gluten roast no. 1 & 2 (p. 29). Baked soybean croquettes (with soybean pulp, p. 36-37). Soyameat patties (p. 37). Cheese-nut burgers (with VegeChee [tofu, made by Loma Linda Foods], p. 37). Soyameat tetrazzini (p. 52). Soybean casserole (with Wham, p. 52-53). Soybean soufflé (with soybean pulp, p. 53). Tofu with mushroom sauce (p. 90; Tofu is “A fresh soybean milk curd obtainable at Oriental markets, or canned under the trade name VegeChee” [by Loma Linda Foods]). Puree of soybean soup (with soybean pulp, p. 110).

Pages 121-22 list “Vegetable protein brand names.” All products are made by Seventh-day Adventist food manufacturers. Brand name codes: B = Battle Creek. C = Collegedale. L = Loma Linda. M = Madison. S = Sunnysdale. W = Worthington. 1. Nut meats (canned): Not-Meat (M). Numete (W). Nuteena, Proteena, and Vegelona (L). Protose (B).

2. Gluten burgers: Choplet Burger (W). Collegedale Burger (C). Madison Burger, and Zoyburger (M). Prime Vegetable Burger (B). Redi-Burger, and VegeBurger (L). 2. Gluten steaks: Big Pat, and Fry Sticks (W). Chic-Ketts (S). Collegedale Chops (C). Dinner Cuts, Dinner Rounds, Vege Cuts, and Vegetables ‘n Gravy (L). Vegetable Skallops, and Vegetable Steaks (B).

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Gluten burgers” (or “Gluten burger”).

4. Wieners and sausages: Big Franks, and Linketts (L). Saucettes (B). Veja-Links (W). 5. Frozen foods: Chipped Prime, Prosage, Vegetarian Luncheon Slices (Chicken and Beef Style), Wham (W). Note 2. Worthington was the first Adventist company to make frozen meatlike products.

6. Soy meats: Soyameat (Diced Chicken Style, or Diced Beef Style) (W). VegeChee [Tofu] (L).

Frequently used seasonings in vegetarian entrées. (p. 122). Accent. Bac-O-Chips (General Mills). Bakon Yeast.

Gravy Quik (L). G. Washington Broth. McKay's Chicken Style Seasoning. Savita. Savorex, and Smokene (L). Sovex. Tartex. Tastex. Vegex.

Update. 1995. Oct. 25. Jimmie Joan Thurmon, a Seventh-day Adventist, is retired and lives with her husband at 128 Mountain Ridge Dr., S.E., Cartersville, Georgia 30120-6951. Phone: 770-974-9218. She learned how to make wheat gluten from Seventh-day Adventist women, who had been making it for years. In addition Loma Linda Foods in California and Sanitarium Food Co. in Australia had many products containing wheat gluten on the market by the 1960s. Address: Nashville, Tennessee.

561. Erewhon Trading Co., Inc. 1970. Traditional foods: Importers, processors, distributors. Wholesale-retail catalogue. Boston, Massachusetts. 12 p. Jan. 1. 22 cm. [2 ref]

• **Summary:** On the cover is the silhouette of three heads of grain on the plant, by a Japanese crest. Prices are given for each item. The company sells the following types of foods: 1. Grains: Brown rice (short grain Kokuho Rose grown by Koda Brothers, in 2 lb, 5 lb., 10 lb., 25 lb., 50 lb., or 100 lb. quantities). Sweet brown rice (Koda Bros.; it is more glutinous than brown rice, in the same 6 quantities). Note: No claim is made, anywhere in the catalog, that this rice is organic, or unsprayed, or "natural" or anything other than regular brown rice.

2. Beans: Azuki beans (imported from Hokkaido), Black beans ("Kuromame, a black soy bean import"), Chickpeas (Garbanzo, imported from southern Europe).

3. Sea vegetables: Dulse (From Grand Manan Island, Canada), hiziki, kombu, nori (dried laver), wakame (the latter 4 imported from Japan).

4. Soy Bean Products: Soy sauce (Aged naturally in wooden kegs at least 18 months; 16 oz for \$1.20, 32 oz for \$2.25, ½ gallon for \$4.25, 1 gallon for \$8.00, 4.75 gallon keg {21.13 liters} for \$30.00). Hacho miso ("Soybean puree made from soybeans, salt & water. No chemicals used in fermentation. Aged at least 18 months"; 1 lb for \$1.20, 2 lb, 4 lb, 44 lb keg for \$36.00). Mugi miso ("Soybean puree. A lighter miso made with barley"; 1 lb, 2 lb, 44 lb keg). Moromi ("A thick sauce removed from the bottom of the soy sauce kegs after fermentation. Its uses are unlimited in soups & sauces"; 7 oz for \$1.20.). Seitan ("Wheat and soy sauce cooked together for a long time. When used in soups or sauteed in vegetables it has a taste much like beef"; 3½ oz for \$1.20). Note 1. This is the earliest document seen (July 2005) that mentions seitan and clearly understands what it is.

5. Condiments: *Furikake* ("A tangy sesame condiment made from Miso, sesame seeds, soy flour, nori and bonito [sic, bonito] flakes"; 3½ oz.), Daikon pickle, Sesame miso ("A hearty condiment for use on rice and other grains. Made from miso and unhulled sesame seeds"; 3½ oz). Tekka ("A strong dark condiment; famous for its medicinal qualities. Made from carrots, burdock, lotus, ginger, sesame oil, and

miso"; 3½ oz), Sesame seeds, Sesame tahini.

6. Sea salt: Grey unrefined (from the Mediterranean Sea, unwashed and unground), White unrefined. 7. Oils: Corn germ oil (unrefined, pressed. No solvents, chemicals, or preservatives), Sesame oil. 8. Noodles: Ito soba, Kame soba, Udon. 9. Beverages: Kukicha, Kohren (Lotus root powder), Mu beverage (made from 16 different herbs), Yannah (coffee-like drink made from grains and beans).

10. Miscellaneous: Dentie toothpowder (made from eggplant and salt), Kuzu arrowroot, Umeboshi & chiso [shiso, shisonoha, or beefsteak leaves], Umeboshi ("Salt plums aged in wooden kegs for at least 3 years").

11. Cookbooks (written in America): *Cooking Good Food*, and *Cooking with Grains and Vegetables*.

The majority of the above products are imported, mostly from Japan.

The inside front cover states: "Due to the growth of our business and our belief that good quality food should be available at low cost, we have eliminated many items from our wholesale list. We have eliminated most grains because excellent quality grains are available from many sources at more reasonable prices than we are able to charge. Two excellent sources for grains are Arrowhead Mills, Box 866, Hereford, Texas, and Pioneer Specialty Foods, Box 427, Fargo, North Dakota. Also eliminated from our wholesale list is Chico-San products. For these please write directly to Chico-San, 1262 Humboldt Ave., Chico, California, or contact any health food distributor."

Note 2. The products in this catalog do not require refrigeration; they contain no refined sugar / white sugar, no meat, and no dairy products—just like the catalogs of almost all subsequent natural food distributors during the 1970s and 1980s.

Note 3. This is the earliest existing Erewhon catalog seen (March 2011), and the earliest document seen (March 2011) concerning Erewhon and soy.

Note 4. This is the earliest document seen (March 2006) that mentions Arrowhead Mills, of Hereford, Texas. Address: 342 Newbury Street, Boston, Massachusetts 02115. Phone: 617-262-3420.

562. Atkinson, William T. Assignor to Archer Daniels Midland Company (Minneapolis, Minnesota; a corporation of Delaware). 1970. Meat-like protein food product. *U.S. Patent* 3,488,770. Jan. 6. 6 p. Application filed 7 March 1969. 1 drawing. [8 ref]

• **Summary:** This is ADM's basic U.S. TVP patent based on extrusion cooking of defatted soybean flakes. "Abstract of the disclosure: A hydratable food product is obtained by forming a protein mix of a proteinaceous material having protein content of at least 30 percent, and preferably a solvent-extracted oil seed protein material, with 20-60 percent of water based on the weight of the protein mix, masticating this mix at temperatures substantially above the

boiling point of water, and thereafter extruding this mix at elevated pressures and temperatures through an orifice into a medium of lower pressure and temperature.

This application is a continuation-in-part of application Ser. No. 587,939, filed Aug. 17, 1966, which in turn is a continuation-in-part of application Ser. No. 369,189, filed May 21, 1964, now abandoned. The present invention relates to the production of meat-like food products from vegetable, fish, and similar protein sources. More particularly, the present invention relates to the production of protein structures having a texture and appearance very similar to muscle protein found in common meat products like steaks, fowl, chops, hams, and the like.”

In Example 1 the following components, listed in the order that they are added, were mixed in a ribbon blender at 120°F for about 20 minutes: 11,350 gm of extracted soybean flakes containing 50% soy protein and 6.5% moisture; 45 ml of 50% hydrogen peroxide for purposes of flavor and odor control dilutes in 380 ml water; 1,700 gm imitation beef seasoning; 3,785 ml of water, 90 gm of 97% pure sodium hydroxide; and 340 gm of calcium chloride dissolved in 500 ml of water. The resulting mixture was extruded.

In “Meat Analogs,” Horan (1974, p. 375) notes that the product described in this patent has probably had “the greatest impact in bringing the low-cost, textured vegetable products into commercialization: defatted soy flake or flour (50% protein) is put through a continuous process in an extruder to give an expanded and molecularly oriented material having textural properties described as plexilamellar. The product contains an open cell structure in which the majority of the cells have dimensions of greater length than average width and are aligned in the direction of flow of the plastic mass through the extruder. These types are commonly referred to as thermoplastic-extruded products.”

Brian (1976) reports that “Approximately 60% of the soy flour and grit texturizing capacity in the U.S. is licensed under this Atkinson patent.” The process yields a plexilamellar fibril and is best known in ADM’s product trademarked TVP. The product resulting from Atkinson’s patent was given a large new market in 1971 when it was accepted into the school lunch program in the USA.

Note 1. The Atkinson patent dominated the industry from 1970 to 1976, and during that time ADM very effectively marketed and promoted TVP. However in Feb. 1976 a very similar U.S. patent (No. 3,940,495) was issued to Ronald J. Flier and assigned to Ralston Purina. A lawsuit and trial concluded that the Flier patent now dominated the Atkinson patent because it could be traced back to a July 1964 patent application. Thereafter most large manufacturers of textured soy flour took licenses on the Flier patent—even ADM!

Note 2. Interview with Don Aldon, former soy researcher at Swift & Co. 1985. Feb. 26. In about 1963-64 Dean Wilding of Swift invented a product named Texgran;

it was a textured soy flour, somewhat like today’s TVP. Wilding invented a texturization process while trying to find a way to extrusion cook soy flour. He visited Wenger and saw a variety of products they made. He recognized their value and bought a machine. Aldon worked for about 18 months developing the process, doing research, and generating information to be used in the patent. Swift started selling the product before they applied for the patent. “As soon as our competitors saw this product, they recognized its value because they had been extruding dog food. Ralston Purina slammed things together and got a patent application in first. Two weeks later ADM had one in. Then 3-4 weeks later Swift applied.” Swift started selling Texgran in 1964-65. The patent was finally issued in about 1971-72. Litigation went on for years and years between the three companies. Finally Ralston got the basic patent since they had applied first. ADM and Swift got a royalty-free license. They did that just to settle the litigation. Address: Minneapolis, Minnesota.

563. Erewhon Trading Co., Inc. 1970. Traditional foods: Importers, processors, distributors. Mail order catalogue. Boston, Massachusetts. 16 p. March 1. [2 ref]

• **Summary:** On the orange cover is the silhouette of three heads of grain on the plant, by a Japanese crest. The company sells the following types of foods: 1. Whole grains: Brown rice (short grain grown by Koda Brothers, in 6 weights from 2 lb. to 100 lb). “Not strictly organic, but the finest available in the U.S. today.”

Note: The previous sentence, starting with “Not strictly organic” is deceptive and misleading. According to “Erewhon, A Biography,” by Paul Hawken (*East West Journal*, Aug. 1973, p. 13) the short-grain brown rice being sold by Erewhon at this time was grown by the Lundberg brothers (Wehah Farm, Richvale, California) and harvested in the fall of 1969. But this rice was the result of a secret deal, so Koda Brothers is listed in the Catalog as the grower. According to the Koda website, Koda first started to convert some fields to organic in 2004. Moreover, this rice was not “the finest available in the U.S. today.” The only organically grown brown rice in the USA in March 1970 was grown by the Lundberg Brothers (Wehah Farms) in Richvale, California. 1969 was the first year they had grown rice organically, and they grew 78 acres under contract with Chico-San, who agreed to buy all the brown rice grown on that acreage in exchange for the exclusive right to sell that rice. Chico-San sold half the rice in advance and had no trouble selling all of it. But they refused to sell any of the rice to Erewhon. In 1970 Lundberg expanded their exclusive organic brown rice acreage to 200 acres; that rice was harvested in the fall of 1971.

Sweet brown rice (also grown by Koda Bros.), buckwheat groats (Kasha, from Pocono Mts. in Pennsylvania), wheat berries (organically grown in the Golden Valley of North Dakota), millet (organically grown),

barley, yellow and white corn (organically grown in Deaf Smith County, Texas), oats, rye (organically grown in Deaf Smith County, Texas). Table of prices for different weights. 2. Fresh stone ground flours. 3. Cereals, made from whole grains and milled in a manner to allow quick cooking, incl. Kokoh (which can be used as a milk substitute or prepared as a cereal for children). 3. Noodles (udon, soba, and shonai fu—wheat gluten cakes). 4. Beans: Azuki beans (“The King of Beans... Organically grown on the island of Hokkaido, Japan), black beans (a sweet black soybean imported from Japan. Organically grown), chickpeas, soybeans (“Organically grown in Pennsylvania. A food high in protein, vitamins and minerals. Should be soaked many hours before cooking. Particularly good if cooked with Kombu”), pinto beans, whole green lentils, red split lentils. Table of prices for different weights.

5. Sea vegetables: Nori (dried laver), kombu, wakame, hiziki, agar-agar. 6. Dried fish and vegetables: Bonita [sic, Bonito] flakes, chirimen iriko, daikon pickle, gourd strips (dried), daikon (dried radish). 6. Order form. 7. Beverages: Kukicha, mu herbal beverage, yannah, lotus root powder, mugicha (barley tea), peppermint tea.

8. Soybean Products (imported from Japan): Soy sauce (“aged for at least 18 months”; 16 oz, 32 oz, ½ gallon, 1 gallon, 4.75 gallon keg). Mugi miso—Soybean puree (“Made by a special enzymatic process, this Miso is aged for 18 months. It is made from soybeans, barley, water and salt. It is ideal for making soups and sauces and blends well with tahini to make a spread for bread.” 1 lb, 2 lb, 4 lb, 44 lb keg). Hacho miso—Soybean puree (“A darker, stronger miso than Mugi Miso...”). Moromi (“A thick sauce removed from the bottom of the Soy Sauce kegs after fermentation. Its uses are unlimited in soups & sauces”; 7 oz.). Seitan (“A concentrated protein source made from wheat and soy sauce. When used in soups or sauteed in vegetables, it has a taste much like beef”; 3½ oz.).

9. Condiments: *Furikake*, kuzu arrowroot, tekka, umeboshi, sesame butter, Erewhon sesame tahini, sesame salt, white sea salt, grey sea salt. 10. Oils: Refined corn oil, corn germ oil, sesame oil. 11. Sundries: Sesame seeds, sunflower seeds, pumpkin seeds, popcorn, raisins (Thompsons), dried apricots, wheat germ (raw), apple butter, whole dried chestnuts. 12. Toilet articles: Dentie (tooth powder made from eggplant and salt), Aditi sesame shampoo, Orgene [Orjene] herbal shampoo, Fu-nori (seaweed shampoo), sesame coconut soap, vege oat soap.

13. Kitchen and tableware: Cookbooks: *Zen Cookery*, *Cooking with Grains and Vegetables*, *Cooking Good Food*, *Zen Macrobiotic Cooking*. Tableware: Rice paddles (bamboo), soy sauce dispenser, oil skimmer, bamboo tea strainer, vegetable press, vegetable brush, bamboo chopsticks (Japanese), chopsticks (Chinese), MAC knife (vegetable), vegetable knife, fish knife, grater, suribachi (3 sizes), Corona hand grinding flour mill (\$10.95).

On the inside rear cover is a United Parcel Service rate chart. Address: 342 Newbury Street, Boston, Massachusetts 02115. Phone: 617-262-3420.

564. **Product Name:** [Fujinic Meatless Meat].

**Foreign Name:** Fujinic.

**Manufacturer’s Name:** Fuji Oil Co. Ltd.

**Manufacturer’s Address:** Toyama Building 121, 2-chome Azuchi-cho, Higashi-ku, Osaka, Japan.

**Date of Introduction:** 1970 March.

**New Product—Documentation:** *Soybean Digest Blue Book*. 1970. p. 108.

565. *Soybean Digest*. 1970. Worthington Foods test markets a soy sausage. April. p. 9.

• **Summary:** “A soy-protein ‘sausage’ is being test marketed by Worthington Foods, in Columbus, Ohio, and South Bend, Indiana. Called Prosage, ads in newspapers tell the consumer that there are 50% less calories and 75% less fat in Prosage made of all-vegetable protein with hickory-smoked flavoring added.

“Stripples, a vegetable protein baconlike product, has been test marketed in Fort Wayne, Indiana, and may soon have national distribution. Stripples do not shrink, and are made by Worthington Foods, also.”

566. **Product Name:** Add-a-Bits.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1970 April.

**New Product—Documentation:** H. Hellman. 1972. *Popular Science*. Oct. p. 78-80, 164. This product, made of spun soy protein fibers, consists of small rectangular dehydrated bits of fried meatless bacon, used for garnishing salads or as a snack. They are basically small pieces of Stripples. Horan. 1974. *Meat analogs*. p. 380.

567. Fiske, Edward B. 1970. Adventists: Old faith, new pressures. *New York Times*. June 15. p. 41.

• **Summary:** More than 25,000 of the world’s 2 million Seventh-day Adventists, representing 193 countries, gathered in Atlantic City, New Jersey. They are one of the few major Christian churches still making large gains in membership. Adventists believe that Christianity is more than simply going to church in Saturday; it includes serving all the needs of their believers, not just their spiritual ones. Thus, the church operates a medical school, and more than 200 hospitals, clinics, and nursing schools worldwide. Adventists are also deeply committed to education (with schools and colleges) and relief work.

One consequence of this view is vegetarianism, which is practiced by about half of all Seventh Day Adventists. The church teaches that a nonmeat diet is more healthy than

one which contains meat, and it produces its own “vegetable protein foods” under the Loma Linda Foods brand.

“Soybean burgers:” Snack bars at the convention hall sell nonmeat items such as Loma Linda Burgers for \$0.60 each; they come in “beef style” and “chicken style,” and are made mostly of soybeans and whole wheat. Clinton A. Wall, a dietitian, set up a temporary restaurant that serves 4,000 meals a day in the basement. Young people often ask him for advice on how to plan a balanced vegetarian diet. He adds that Adventists are not against use of insecticides.

For Adventists, diet is only one aspect of a religion that touches the whole of their daily life. Elder Pierson said it well: “We believe that Christianity is more than simply going to church on Saturday.”

A photo shows the packed convention hall.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Soybean burgers” (or “Soybean burger”).

568. *Ralston Purina Magazine (St. Louis, Missouri)*. 1970. Thanks to Mr. Ford. May/June. p. 26-29.

• **Summary:** Henry Ford had an eye for promising young men. And two of Ralston Purina’s key research men, Frank Calvert (R&D director for new venture management) and Bob Boyer (senior scientist, central research) received a truly unique education.” In 1930 the new Chemical Laboratory opened in Greenfield Village; Calvert and Boyer were among the 15 boys from the Ford Trade School, Henry Ford’s technical school in Massachusetts, who were chosen to work there. Boyer, age 21, who had attended the Ford Trade School [at the Rouge Plant in Dearborn, Michigan] from 1927 to 1930, was put in charge of the project. After deciding to focus on soybeans in 1931, they developed a process for extracting soybean oil. Every morning at 8:00 sharp, Henry Ford used to appear at Boyer’s office to see how his pet project was going.

“In 1938 Frank Calvert joined The Drackett Company in Cincinnati [Ohio], and he was followed in a few years by Boyer. ‘At Ford we were trying to make synthetic wool out of [soy] protein but the war cut these efforts short,’ says Boyer.

The work on ‘soybean fabric’ continued at The Drackett Company during the early 1940s. ‘We tested the wool fabric for salt content and other factors and one day—I’ll never forget it—it occurred to me that if we could make something for the outside of man, why not for the inside.’ That’s how it came about that in 1949 Bob Boyer filed the patent for edible soy protein fiber.

“He obtained the use of a textile pilot plant and hand made samples of ‘synthetic meats.’ Later that year, armed with a soy protein ‘ham loaf’ he contacted Worthington Foods, a firm making meat substitutes for people who shun meat for religious, health or other reasons “If they hadn’t shown interest I probably would have dropped it because I

had no income at the time.’

“Swift was the first company to take out a license on the patent and Worthington followed not far behind. Soon several companies were licensed to use the patent and Boyer was kept busy with consulting work...

“In 1957 The Drackett soybean operation was sold to Archer Daniels Midland, and Calvert became technical of their protein operations. The paths of Boyer and Calvert crossed again in 1962 when they both joined soybean research activities at Ralston Purina. Boyer had worked as a consultant to Purina when the company began investigating industrial and edible uses of soybean. When he joined the company he assigned his patent ownership to Purina.”

“‘Back in the 1930s many people thought our work was crazy,’ recalls Boyer. ‘But Mr. Ford was shrewd enough to know’ better. ‘The best thing he did was to help popularize the soybean.’”

Photos show: Calvert and Boyer, together and separately. The automotive products made at Ford’s lab being displayed in New York in 1931; Calvert and Boyer are present. Boyer and Ford conversing. Ford and Boyer standing behind the famous white “plastic” car.

569. Witham, W.C. 1970. Re: Memorandum—Three items of information regarding soybean operations. Letter to F.R. Senti, Deputy Administrator, USDA, ARS, NCIUR [Nutrition, Consumer, and Industrial Use Research], Washington, DC, Aug. 27. 1 p. Typed, without signature (carbon copy).

• **Summary:** While at the annual meeting of the American Soybean Association, Dr. Cowan was given the following information. (1) Cargill is constructing a plant to manufacture textured soy proteins from soy flour at their facility in Cedar Rapids, Iowa. These products will be similar to those produced by Swift and ADM. Staley also announced its intention to make such products, but may be delayed because of a strike that is now 4 weeks old.

(2) Land O’Lakes has purchased the Felco operations, a cooperative in Iowa with one division operating a 700- to 1000-ton a day soybean processing plant. Note: This is the earliest document seen (March 2008) that mentions “Land O’Lakes” in connection with soybeans, or that mentions Felco (in any connection).

(3) “The General Mills’ plant at Cedar Rapids has gone on-stream for the manufacture of Bac\*Os. They expect to be making a complete line of Bontrae products shortly before or just after Labor Day [the first Monday in September]. The latter will be sold to institutions, restaurants, etc. initially.” Address: Acting Director of Div., NRRL, Peoria, Illinois.

570. *Food Processing (Chicago)*. 1970. Textured vegetable protein granules have natural meaty flavor. Summer. p. F10-F11. Foods of Tomorrow section.

• **Summary:** About Ground Beef-Like Granules, “spun soy

granules,” made by Worthington Foods, Worthington, Ohio. “The granules are made from spun soy protein fibers, plus binders and flavoring; no animal products are used in their production.” They closely match the flavor, texture, and appearance of cooked ground beef. Advantages of the dry granules over beef: Less than half the calories, no fats, no cholesterol, and less than half the cost. A full-page color photo shows the product, as sold, and in a casserole.

571. Hartman, Warren E. 1970. Textured soy proteins. In: SOS/70 Proceedings of the Third International Congress, Food Science and Technology. 951 p. See p. 245-47. Held 9-14 Aug. 1970 at Washington, DC.

• **Summary:** “Worthington is currently offering four types of plant-protein products. The first type of product must be classified as a raw material. This major raw material is the textured spun-protein fiber [made of soy protein]. The second type of product is a mixture of raw materials formulated to have a specific function. Among these are extenders for poultry meat and extenders for red meat. These mixtures contain fibers, binders, emulsifiers, fillers, color, and flavors similar to those in the extended product. Hamburger chain-outlets are looking with renewed interest at the fiber red-meat extenders.

“The third type of products are special formulations with or without fiber which may be mixed and extruded to produce units simulating ground beef or other meatlike portions. These bits, or granules, may be large or small, colored or uncolored, flavored or unflavored...”

“The fourth type of Worthington’s food ingredients consists of the present end-products. This includes all the simulated meats and the various canned foods currently available from Worthington Foods. These products are sold fresh or frozen or canned. The simulated meats may also be purchased diced, air-dried, or freeze-dried...”

“Early this year [March 1970], Worthington Foods became a totally owned subsidiary of Miles Laboratories, of Elkhart, Indiana. The objective is to become to a greater degree, *architects of change* rather than *victims of change!*...”

“Whether the products of our technology be called ‘Fake Steak,’ ‘Sham Ham,’ or ‘Phoney Baloney’ [Phony], these protein fabricated foods *will survive*. And they will find extended and varied uses.” Address: Worthington Foods, Worthington, Ohio 43085.

572. Dinshah, Freya. 1970. The vegan kitchen. 6th ed. Malaga, New Jersey: The American Vegan Society. 44 p. Illust. Recipe index. Sept. Saddle stitched. 21 cm. The Ahimsa book series No. 2.

• **Summary:** With a bonus chapter: Why veganism? by Eva Batt. Page 6 notes that soya beans can be sprouted. The authors believe that the best way to eat cereal grains is to sprout them. In a section titled “About Vitamins” we read: “Some people, at least in the transition period, may wish

to supplement the menus given, with a glassful of B-12 fortified soya-milk. In the USA, Loma Linda Soyagen and Worthington Soyamel are marketed in various flavors. In England there is Granogen, Velactin, and a leaf-protein milk known as Plantmilk or Plamil. (Plamil is now also being made available in North America).” Soy-related recipes include: Soya patties (with soya meal or flour, baked in an oiled dish, p. 20). How to shell green soya beans (p. 21). Soya loaf (with cooked soya beans, baked, p. 23). Soya milk (with soya powder/flour and dates, p. 24). Soya cheese Americana (tofu made with soya powder/flour and coagulated with lemon juice, p. 25). Australian soya cheese (tofu made with soya powder, coagulated with orange and lemon juice, jelled with agar-agar, p. 25). British Plantmilk cheese (tofu made with Plamil and lemon juice, p. 25). Vegan “mayonnaise” II (with soya milk and mashed potatoes, p. 26).

A lifetime vegetarian, the author has been a vegan since 1959, and the Secretary of the American Vegan Society since 1960. Married to AVS President H. Jay Dinshah, she is an accomplished author, lecturer, and teacher. Address: The American Vegan Society, 501 Old Harding Highway, Malaga, New Jersey 08328.

573. Corkern, Ray S.; Dvoskin, Philip B. 1970. Consumer acceptance of a new bacon substitute. *USDA Economic Research Service, ERS* No. 454. p. 1-10. Oct. [2 ref]

• **Summary:** “Abstract: A new striplike bacon analog was market tested successfully in Fort Wayne, Indiana, from September 1968 through February 1969. The product was introduced with a substantial promotional campaign that emphasized the analog’s uniqueness related to health and economy. Sales data from store audits indicate a fairly favorable response by consumers. Ratio of sales, bacon/bacon analog, was 24 to 1 in phase I (heavy promotion period) and 79 to 1 in phase II (little or no promotion). The test product attained a market share of 4 percent initially, which declined to 1.3 at the end of the test period. A fairly strong promotional campaign and some measure of control over display and store stocks will be necessary if a high level of sales is to be maintained. The consumer survey revealed little aversion to a vegetable protein bacon substitute. It also revealed no appreciable substitution effect on bacon sales in the short run.

“Preface: In September 1968, a small food manufacturer specializing in meat-substitute products introduced in the Fort Wayne, Ind., market a bacon substitute made from vegetable protein materials. Before and during the market test, the U.S. Department of Agriculture (USDA) had, at the request of this firm, provided informal consultation on proper research methods to use in readying a product for commercial introduction. The Department has had considerable product- and market-testing experience because of product development activities of its utilization

laboratories. In return for its help, USDA was given, for the purpose of information and publication if desired, the nonproprietary information collected during the test period. Publication was deemed desirable since it will allow the entire food industry to more realistically appraise the potential of meat analogs. This, in turn, should give decisionmakers in both the public and private sectors a better understanding of the impact of these new food forms.”

Note: The product was probably Stripples (Meatless Bacon-like Strips Based on Spun Soy Protein Fibers) made by Worthington Foods, Inc. (Worthington, Ohio). Address: 1-2. Agricultural Economists. Both: USDA ERS Marketing Economics Div., Washington, DC 20250.

**574. Product Name:** Bac\*Os Chips (Resembles Bacon).

**Manufacturer's Name:** General Mills, Inc.

**Manufacturer's Address:** Cedar Rapids, Iowa.

**Date of Introduction:** 1970 October.

**How Stored:** Shelf stable.

**New Product–Documentation:** Witham, W.C. 1970. Re: Memorandum—Three items of information regarding soybean operations. Letter to F.R. Senti, Deputy Administrator, USDA Agricultural Research Service, NCIUR, Washington, DC, Aug. 27. 1 p. “The General Mills’ plant at Cedar Rapids [Iowa] has gone on-stream for the manufacture of Bac\*Os. They expect to be making a complete line of Bontrae products shortly before or just after Labor Day [the first Monday in September]. The latter will be sold to institutions, restaurants, etc. initially.”

Mercedes A. Bates. 1970. *Soybean Digest*. Nov. p. 9-11. “Proteins in the age of Aquarius.” Three recipes for the product, with photos, are given.

575. Lane, Mary Margaret. 1970. Tomorrow’s foods today. *Nursing Homes* 19(10):28-29. Oct.

• **Summary:** The author visited the Worthington Foods plant near Columbus, Ohio. There she saw foods made from spun soy protein fibers, such as Prosaage, Stripples, corned beef, smoked beef, and turkey-style slices. “The meat shortages of World War II brought meatless protein into popular demand. Only in 1962, however, did Worthington begin to turn its attention to the manufacture of analogues—those products which taste and look like meats.” The vegetarian products in the Worthington line of “meatless meats” include “fried chicken, choplets, cutlets, pot pies, Skallops which are like seafood, and Veja-Links which contain only 15% fat—half that of regular frankfurters.” Address: R.D.

576. Stuntz, Laurence F. 1970. Synthetic foods may be answer. *Journal Star (Peoria, Illinois)*. Nov. 1. p. B-4.

• **Summary:** A large cartoon shows a machine that is transforming sacks of soybeans into ham, lamb chops, eggs, etc. One chef with a toque orders: “Low cholesterol eggs, once over lightly with broiled ham.” A robot adds: “And a

side order of 3 an 1 oil.”

577. Bates, Mercedes A. 1970. Protein in the age of Aquarius. *Soybean Digest*. Nov. p. 9-11.

• **Summary:** Discusses Bac\*Os Chips, the first product in the Bontrae line made by General Mills from spun soy protein fibers. Three recipes using Bac\*Os Chips are given. A photo shows Mercedes Bates. Address: Vice President, General Mills, Director, the Betty Crocker Kitchens.

578. Goldman, M.C. 1970. Southern California—Foodshopper’s paradise! An exciting burst of organic-living enthusiasm—among young, old and in-between—has created a tidal wave of food shops and more products from Santa Barbara to San Diego. *Organic Gardening and Farming* 17(11):38-45. Nov.

• **Summary:** “Spearheading the surge to organic foods today is the West Coast’s literal Garden of Eden—the southern half of Golden California.” And this should be no surprise. A climate well suited for year-round gardening and farming join with people of all ages with people interested in natural foods plus “that rapidly-enlarging segment of the younger generation now so awake to wholesome eating.

“Actually, a sizable chunk of early interest in organic ideas belongs to this paradisiacal area. Pioneers like Phil Arena, Herbert Clarence White, Maria Wilkes, Clarence Tontz, Lee Anderson and dozens more have all lent the sunny Southwest locale an aura of organic history-in-the-making.”

In a late July trip from Santa Barbara south to San Diego the writer observed in shop after shop (there are at least 300 “health food stores”) along the beautiful Pacific coastline, streams of young folks—many with surfboards and/or children in tow—were coming in to buy fresh fruits and vegetables, whole grains, “juices, kelp and dulse, sea salt and soy products, breads and eggs.”

Veteran Betty Morales, prolific writer and lecturer, notes: “The influx of young people is like a blood transfusion to the health-food business, particularly to the retailers of organically-grown foods.”

Sun Circle Ranches, based in California, supplied by some 200 organic farmers (large and small), are the leading nationwide distributor of organic produce.

In Los Angeles, Erewhon Trading Co., related to the original shop in downtown Boston, Massachusetts, is only a year old, yet serves 100 West Coast stores, natural food restaurants, co-ops and various institutions. Paul Hawken, president of Erewhon [a macrobiotic company], notes that even some of the big universities, including UCLA, have become customers for the popular organic brown rice and soy sauce.

Jimmy Silver, shop manager, says the store’s retail clientele consist of about half each younger and older people. Fresh produce from Sun Circle attracts both. Silver sells about 1,200 hundred pound bags of brown rice each

**granoVita Soja-zart**, pikantes Sojafleisch in Scheiben, eignet sich für Ihren fleischlosen Tag. **granoVita Soja-zart ist glutenfrei sowie praktisch cholesterinfrei und arm an harnsäurebildenden Purinstoffen. Es enthält fast keine Kohlenhydrate.**

**granoVita Soja-zart** ist appetitlich in Scheiben geschnitten, und der vorzügliche Geschmack lädt zu immer neuen Kombinationen ein: Mit Semmelmehl und Ei oder auch Parmesankäse panierte und knusprig gebratene Scheiben zu Gemüse und Salat; gewürfelt in Tomaten-, Senf-, Kräuter-, Currysauce; kalt vermischt in Salaten; mit Käse, Gemüse und Obst auf Toast geschichtet und überbacken oder ganz einfach als pikanter Brotbelag.

month–90% of it wholesale to established shops in L.A. and other parts of the Southwest. Grown for Erewhon by Wehah Farms in Richvale, California, it now retails for \$16.50 per 100-lb sack.

“Grains from the well-known Arrowhead Mills in Deaf Smith County, Texas, also make up a sizable segment of business, says Hawken, a young man who typifies the keen, forceful drive of the new generation in health foods marketing. Along with these and rice, soy sauce made from Japanese organic-grown beans constitutes the biggest seller—nearly 4,000 gallons a month at \$8 by the gallon, down to \$1.20 per pint. Various soybean pastes, such as *mugi miso* prepared with the beans, well water and salt, are also favorite products. So is seaweed...”

Says veteran store owner Walter Lindberg: “No question about it, people are becoming more concerned about the quality of the food they buy.” All store owners say that business has jumped during the past year—especially from young people. “Young people have an open communication system that far outstrips TV and radio.”

At the Sun and Earth shop in Goleta, a suburb of Santa Barbara packed with students, one popular item (called the “natural foods answer to the TV dinner”) is “a platter of our soyburgers, carrots and parsley,” which retails for 57 cents.

Goldman concludes: “The thunderbolt of organic living has not only struck ground in the West—it’s sent a strong, vital message crackling everywhere in the land.”

Contains 6 photos taken inside the new breed of food shops. Address: Box 866, Hereford, Texas.

579. Kreh, Kent Q. 1970. Consumer marketing of textured vegetable protein products. *Soybean Digest*. Nov. p. 28-31.

• **Summary:** “It will probably surprise the average homemaker to learn that one process for producing the new textured vegetable protein foods is similar to that for making

nylon or rayon.” Another method is “by extruding the soy protein through dies that form the desired shape.” These new foods are convenience foods, easy to prepare.

Discusses Bontrae and Bac\*Os made by General Mills. A photo shows a large factory with the caption: “At this new, ultramodern plant in Cedar Rapids, Iowa, General Mills has begun volume production of new textured vegetable protein foods. The plant produces Bac\*Os, textured protein chips flavored like bacon, and Bontrae textured protein granules, cubes, and dice with flavors like beef, ham, and chicken.

“General Mills, several years ago when introducing its Bac\*Os brand of baconlike-flavored chips, began to develop historical data reflecting consumer attitudes toward new, innovated food products.” They held intense, in-depth consumer interviews in many major cities throughout the U.S.

“We see food processors who currently are incorporating vegetable protein in their new food product developmental work. For example, Keebler Bacon Toast Crackers, Wishbone Hickory Bits Salad Dressing, Henri’s Smoky Bits Salad Dressing, Fritos, Bacon-Onion Dip, and others.”

“We sometimes feel frustrated, even impatient, when we hear or read references to phoney [phony], ersatz, fake, or imitation meat. We think cattle and poultry raisers are mistaken and misguided when they look on these new textured vegetable protein foods as competitors.” A photo shows Kent Kreh. Address: Marketing Manager, Food Service and Protein Products Div., General Mills, Inc.

580. **Product Name:** [GranoVita Tender Soymeat Cutlets].

**Foreign Name:** GranoVita Soja-zart (Zartes Sojafleisch).

**Manufacturer’s Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Phone: (04131)-303-145.

**Date of Introduction:** 1970.

**Ingredients:** Soya protein, water, corn-germ oil, egg protein, salt, dextrose, spices.

**Wt/Vol., Packaging, Price:** 175 gm can wholesales for DM 4.65; 350 gm for DM 6.95 (1980).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 14% protein.

**New Product–Documentation:** Full-page ad for 8 granoVita soy products in the book by Manfred Heide. 1977. *Vegetarische Ernährung: 193 Rezeptvorschläge und Speisepläne für ein Vierteljahr* [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. 589. Abehsera, Michel. 1970. *Cooking for life*. Swan House, P.O. Box 638, Binghamton, NY 13902. xiv + 364 p. First Avon Flare Books printing, March 1972. Index. 21cm.

• **Summary:** Contains many imaginative and joyous macrobiotic recipes. Acknowledgments: “This book could never have been completed without the help of my wife, Claude. Most of the recipes are hers; she cooked, tested and

wrote them down... Jack Garvy completed the editing of the book and made definite English corrections. My exceptional friend William Dufty gave valuable advice. Finally, my brother Charles was very helpful...”

The author uses the term “black beans” and from his definition on page 18 it seems that he is referring to black soybeans: “Black Beans, twin brothers of the red aduki in size, are sold in Chinese, Japanese and natural-food stores. They are the milk and honey of the bean family, and their flavor and texture impart a delightful sweetness and richness to any soup or vegetable dish.” No definition is given of soybeans. In the section titled “Condiments” (p. 20-21), the author defines soya sauce, miso, seitan, salted plums, tofu, kuzu, etc. “Tofu is another name for soya-bean curd. In Chinatown, you’ll see it in wooden barrels. It looks like Feta Greek Cheese and some people would swear it tastes like chicken. It is excellent served with sauteed vegetables, sauces, fried or cooked in Miso Soup.

“Seitan: Your guests will almost certainly mistake this for meat. Teeth find it pleasant to chew. A combination of wheat gluten, wheat soya beans [sic], water and salt, it comes in handy when mixed with vegetables, sauces and soups.” Note 1. No recipe for making or using seitan appears in this book.

Soy-related recipes include: Cooking beans in a pressure-cooker (p. 66; “Do not pressure cook black beans. Their skins may come off and clog the pressure cooker spout. It is quite dangerous!”). Cooking beans in a pot (incl. soya beans, p. 67). Black-bean stew (with miso, p. 70). Soja jardiniere (with whole soya beans and miso).

In the chapter titled “Soups,” the author tells the story of how the famous Japanese physician, Dr. Tatsuichiro Akizuki, used miso to strengthen his constitution and to survive the atomic bomb dropped on Nagasaki on 9 Aug. 1945. Under “Minerals” in that chapter he discusses other virtues possessed by miso, then gives a recipe for Miso soup (p. 86).

Radishes sauteed in miso (p. 114). Sandwich au gratin (with miso spread, p. 114). Macrobiotic marbles (with miso, p. 155). Claudia’s pizza (with miso, p. 158). Salade au cresson (with miso, p. 169). Nato [sic, Natto] (Japanese salad with natto, p. 171; Note 2. The author describes “Nato” as “sour soy-beans, bought in a Japanese store”). Miso sauce (p. 178). Miso spread (with tahini, p. 187). Oat-miso spread (p. 188). Scallion spread (with miso, p. 188). Miso pâté (p. 189). Komoku (with tofu, deep-fried and cut into strips, p. 212). O’Sushi (with tofu, p. 217). Kasha à l’Orientale (with tofu, p. 220). Bi-Cuan (Vietnamese recipe with fried tofu, p. 226). Kagetsu ice cream (with fine soya powder [perhaps Jolly Joan from Ener-G foods in Seattle], p. 334; “Kagetsu is a beautiful restaurant in Seattle”). Yellow pompidou (with soya bean powder, p. 336).

The Foreword states (p. 1-2): “Ten years ago I was a sick man, struggling to stay alive and to finish a novel. I suspected I might fail in both matters and the doctors of Paris

agreed. They abandoned me as a hopeless case. It was then that I discovered a way of life called Macrobiotics. After a year of eating grains and vegetables, my health restored, I ventured to New York to discover America and finish my novel.”

Note 3. *Webster’s Dictionary* (1985) defines feta, a word first used in English in 1940, as “a white semisoft Greek cheese made from sheep’s or goat’s milk and cured in brine.”

Fax from Jimmy Silver. 1991. Dec. 17. This was the first best-selling macro / natural food cookbook. Michel is head of a (the?) Jewish community in Montreal, Canada. He has 7-9 brothers and 1 sister. “His brother, George, founded the Nature de France clay based body care company—originally called Cattier but changed after they were sued by Cartier. I thought they would have prevailed in the suit but George didn’t want to spend \$500,000 to fight it even if he won.” Address: New York.

591. Chang, Wonona W.; Chang, Irving B.; Kutscher, Helene W.; Kutscher, Austin H. 1970. An encyclopedia of Chinese food and cooking. New York, NY: Crown Publishers, Inc. x + 534 p. Edited by Lillian G. Kutscher. Charlotte Adams, Consulting Editor. Illust. Index. 26 cm. International Cookbook Series edition. [52 ref]

• **Summary:** This comprehensive work, the result of at least 25 years of collaboration, contains over 1,000 recipes. The 4th printing (March 1977) proclaims prominently: “The first Completely Safe Chinese cookbook compiled in accordance with latest food research without MSG (monosodium glutamate).” Following introductory chapters titled “Chinese Cuisine: Background,” “Regional Chinese Cooking,” “Utensils for Cooking, Serving, and Eating,” “Cooking Preparations,” and “Cooking Techniques,” there is a detailed “Guide to Ingredients” (p. 22-57), which describes the following soy-related foods and gives Cantonese / Mandarin pronunciations / transliterations (see p. 22): beans, black (wu dow / wu do); beans–black salted fermented beans (dow si / do shih; used as a condiment or flavoring agent [seasoning]. Aroma: fragrant, appetizing); bean cake, fermented (fu yu / fu yu [fermented tofu]); bean curd (dow fu); bean curd, dried (dried bean curd [dried yuba], p. 25, 47–tiem jook or fu jook pei / t’ien ch’u or fu pi chi); bean curd cheese, red (nam yu / nan yu); bean filling, sweet (dow sa / do sa; made from red [azuki] beans or green / [mung] beans); bean sauce, brown or yellow (mien see jiong); bean sprouts (large, from soybeans) (wong dow gna / huang do ya); hoisin sauce (red seasoning sauce) (hoy sin jiong / hai hsien jiang); soy sauce (dark lo tsow / lao tsou; heavy–jiong yow / jiang yu [jiang you]; light–sang tsow / sheng tsou; table soy sauce–sin tsow / shien

tsou) “Dark soy sauce has caramel added for coloring. Heavy soy sauce, which has a slightly sweet smell, is also known as black soy. Light soy sauce is the most delicately flavored and is light brown in color. Japanese soy sauce, somewhere between the Chinese light and heavy, is preferable to domestic brands but inferior to Chinese brands.”

Vegetable steak (mien gon / mein jing) “Meat substitute made from wheat gluten. Shape: 3-inch square or round patty ½ inch thick.” Brown, chewy, and firm. Sold in cans.

Photos (black and white, p. 47) show fermented black beans, fresh bean curd, pressed bean curd, bean curd sticks and bean curd sheets [both kinds of yuba, but “bean curd sheets” on p. 47 are called “bean curd, dried”], brown bean sauce, and large fresh bean sprouts.

Note 1. This is the earliest English-language document seen (Oct. 2012) that uses the term “bean curd sheets” or the term “fu jook” or the term “fu jook pei” or the term “fu pi chi” or the term “t’ien ch’u” to refer to yuba or to dried yuba sticks.

Pages 58-60 contain a “Shopping list for Chinese cupboard.” Foods are listed alphabetically in English, with the Cantonese term romanized and Chinese character forms. Next come the 1,000 Chinese recipes divided into chapters. One chapter is titled “Bean Curd” (p. 422-34), which includes Ma Po Dow Fu (p. 433); there are so many recipes for regular tofu (dow fu) in this book that we do not have room to list them all. The many other soy-related recipes are listed in the excellent index.

Recipes for “bean cake, fermented” [fermented tofu] are: Scrambled eggs with fermented bean cake (Fu yu don, Canton, p. 134). Duck with fermented bean cake (Fu yu ta, Adapted, p. 276). Steamed pork with fermented bean cake (Fu yu tsing ju yoke, Canton, p. 292). Stir-fried green beans with fermented bean cake (Fu yu tsang dow, Canton, p. 391). Lettuce and fermented bean cake (Fu yu sang tsoi, Canton, p. 392). Spinach and fermented bean cake (Dow fu bo tsai, General, p. 399). Watercress and fermented bean cake (Fu yu sai yong tsoi, Canton, p. 40).

Recipes for “black beans, salted” [fermented black soybeans] are: Pork with bitter melon and salted black beans (Fu gwa yoke si, Canton, p. 305). Shrimp with bitter melon and salted black beans (Fu gwa dow si har, Canton, p. 306). Steamed spareribs with salted black beans (Dow si pai gwut, Canton, p. 320). Beef with bitter melon and salted black beans (Fu gwa ngo yoke do si jiong, Canton, p. 340). Black bean sauce (Huk dow tsup, Canton, p. 436; with garlic and ginger).

Note 2. This is the earliest separate recipe seen {Nov. 2008} for “Black bean sauce”.

Recipes for “bean curd, dried” [dried yuba] are: Pig’s feet with dried bean curd soup (Ju gyok tiem jook tong, Adapted, p. 113; with “10 sheets dried bean curd.” Soak sheets in hot water for 30 minutes. Drain, cut crosswise into pieces 1 inch wide, then add to soup). Spare ribs with dried

bean curd soup (Pai gwut shiu tiem jook, Adapted, p. 321). Dried bean curd strips with soy sauce (Hung shu tiem jook, General, p. 424). Vegetarian ham dried bean curd (Sue ho twei dow fu, Shanghai, p. 429; with “20 sheets dried bean curd”).

Recipes for “bean curd skin” (or bean curd sheets) [yuba sheets, fresh or dried] are: Red-cooked carp with bean curd skin (Fu pi hung sao yu, Shanghai, p. 158; with “bean curd skin to cover” carp). Red-cooked carp with bean curd skin—Approved ulcer recipe (Hung sao li yu dow fu pi, General, p. 158; with “¼ lb. dried bean curd skin {about 20 pieces, 1½ by 5 inches}. Soak for 30 minutes in hot water. Drain. Cut into 2-inch squares).

Recipes for “frozen bean curd” [frozen tofu]: Frozen bean curd with soybean sprout soup (Dung dow fu dow ya tong, Adapted, p. 90; with “2 cakes frozen bean curd” and “½ lb. soy bean sprouts.” “Defrost frozen bean curd by covering with cold water, letting stand 2 to 4 hours before cooking. Then cut each piece into 10 to 12 thin slices”). Spareribs with frozen bean curd (Pai gwut shiu dung dow fu, Adapted, p. 320; with “4 cakes frozen bean curd”). Stir-fried frozen bean curd (Tsao dung dow fu, Peking, p. 422; with “6 cakes frozen bean curd. \* Wrap 2 to 3 pieces fresh bean curd together in waxed paper, freeze until hard”).

Recipes for “pressed bean curd” [pressed tofu]: Pressed bean curd shrimp (Sha tze gahn si, Shanghai, p. 178, with “4 pieces pressed bean curd”). Golden strips with pressed bean curd (La jiao tsao san sih, Hupeh, p. 313). Pressed bean curd and celery with stir-fried beef (Dow fu gahn ching tsai ro si, Shanghai, p. 357). Stir-fried pressed bean curd with pork (Dow fu gahn tsao ro si, Shanghai, p. 427). Stir-fried pressed bean curd with chicken (Dow fu gahn tsao gee si, Shanghai, p. 427).

Recipes for “soybean sprouts”: Spareribs soybean sprout soup (Pai gu dow ya tong, General, p. 112). Beef shank soybean sprout soup (Wu hwa niu ro hwang dow ya tong, General, p. 112). Braised soybean sprouts (Hung sao hwang do ya, Shanghai, p. 376).

Note 3. This is the earliest English-language document seen (Jan. 2013) that uses the term “wong dow gna” or the term “huang do ya” to refer to soybean sprouts. Address: USA.

592. Hooker, Alan. 1970. *Vegetarian gourmet cookery*. San Francisco, California: 101 Productions. 192 p. Edited by Helen Morrow. Illust. by Sara Raffetto. 21 x 21 cm.

• **Summary:** The section on “Entrees” states (p. 101-02) that one of the easiest ways to get one’s daily protein is by using soya flour, which can be added to many foods.

Soy-related recipes include: Baked soy beans (p. 56). Tofu with tempura vegetables (p. 132). Page 181 recommends various vegetarian food products, including Vegeburger and Choplets (made by Loma Linda Foods), Kikkoman brewed Soy Sauce, Bakon Yeast, and Gravy

Quik (which contains soy and other vegetable proteins). Address: Founder, Ranch House vegetarian restaurant, Ojai, California.

593. Schwarz, Richard W. 1970. John Harvey Kellogg, M.D. Nashville, Tennessee: Southern Publishing Assoc. 256 p. Illust. Index. 22 cm. See p. 44, 120-23, 243. Also published in 1970 by Andrews Univ. Press (Berrien Springs, Michigan).

• **Summary:** This excellent biography of Dr. J.H. Kellogg was originally written as a 1964 PhD thesis at the University of Michigan. Although it contains no references or footnotes, and thus lacks the documentation and completeness of the dissertation, it is still (March 2009) the best biography of Dr. Kellogg. The author is a Seventh-day Adventist.

Contents: Preface. 1. The boy foreshadows the man. 2. A convert (the early health reform and vegetarian movements in America). 3. From teacher to doctor. 4. A man is what he eats. 5. Changing American habits. 6. Developing the Battle Creek Sanitarium. 7. Sanitarium ups and downs. 8. A torrent of words. 9. Variations on a boyhood dream. 10. The unwilling surgeon. 11. Products of an active mind. 12. All work, but little play. 13. What manner of man. 14. Father of forty-two children. 15. His brother's keeper. 16. The ties of fifty years are broken. 17. Food manufacturing and family quarrels. 18. New outlets for promoting an old program. 19. The last battles. 20. An epilogue.

Concerning meat substitutes [meat alternatives] (p. 121-23): "During the years in which he directed the experiments which led to the production of flaked cereals, Bromose, and Malted Nuts, Dr. Kellogg also attempted to develop a substitute for meat from plant sources. He traced his interest in such a product to conversations with Dr. Charles W. Dabney, noted agricultural chemist and former president of the University of Tennessee. When Dabney was serving as President Cleveland's Assistant Secretary of Agriculture [probably about 1893-1897], he had discussed with Kellogg the problem of supplying adequate protein for the world's rapidly expanding population. The men agreed that it was better economics to use grain for human food than to feed it to animals and then use them for food. The problem, as Dabney saw it, was to produce a grain product which would have all the nutritional value and taste appeal of meat.

"In 1896 Kellogg announced that he had perfected the ideal substitute for meat in Nuttose, a nut product which he could prepare to taste much like beef or chicken... The doctor's interest in new vegetarian meatlike protein foods continued active until shortly before his death. Among some of the more popular creations later developed in his laboratories were Protose, Battle Creek Steaks, and Battle Creek Skallops. Various combinations of nuts and wheat gluten composed the principal ingredients in the imitation meats...

"Kellogg's last major food discovery was an artificial

milk made principally from soybeans. He was particularly enthusiastic over soy milk because it proved an excellent host for the *acidophilus* bacteria which the doctor believed needed to be implanted in the intestinal tract in order for it to function perfectly. Shortly after Kellogg had developed soy acidophilus milk, he chanced to read that Marie, smallest of the Dionne quintuplets, was suffering from bowel trouble. Immediately wiring the quints' physician, Dr. A.R. Dafoe, he announced he was sending him a supply of soy acidophilus milk, which he was certain would cure Marie's problem. About ten days later he received a letter from Dafoe which indicated that the soy acidophilus milk had indeed corrected the situation and asked that a continuous supply be sent to Callander, Ontario [Canada], for the five little girls."

In summarizing Dr. Kellogg's major accomplishments, the author notes (p. 243): "His introduction of peanut butter added another widely accepted item to the American diet, and it probably did more to provide a market for peanuts than did the efforts of any other person, with the possible exception of George Washington Carver. John Harvey's development of meatlike products from nuts and legumes combined with wheat gluten has not only helped to enrich the dietary of thousands of persons who for ethical, health, or religious reasons choose to be vegetarians, but such high-protein foods also hold possibilities for supplementing the diet in countries where the supply of meat is insufficient to provide enough protein for a rapidly expanding population."

Concerning Granola: In the early 1860s, Dr. James Caleb Jackson of Dansville, New York, developed Granola, America's first successful cold breakfast cereal, made solely from wheat. For 40 years, Dr. Jackson operated "Our Home on the Hillside," probably the most successful of the "water-cure" institutions that blossomed in the 1850s. "In an atmosphere approaching that of a European spa, Jackson provided hydropathic treatments and a special diet for as many as a thousand patients a year." In about the 1870s, at the Battle Creek Sanitarium, John Harvey Kellogg developed a similar product, which he named Granola. It differed from Jackson's Granola in that it consisted of several grains, and longer baking dextrinized the starch more thoroughly. "At first he apparently had no thought of selling it. He intended it solely for sanitarium patients. Gradually, however, as former patients and others interested in dietetic improvement sent to the sanitarium for Granola, a small commercial business developed, and Battle Creek thus took its first step toward becoming the 'Breakfast Food Capital of the World.' ... Shortly after the production of Granola for patients at the sanitarium began in 1877, Dr. Kellogg organized the Sanitarium Food Company as a subsidiary of the Battle Creek Sanitarium. Operated as an adjunct to the sanitarium bakery, for more than a decade it marketed a variety of oatmeal, graham, and fruit crackers and whole-grain cooked cereals—all originally devised to provide variety in the menu of sanitarium patients." All products were made from

whole grains without artificial additives, and all underwent prolonged high-temperature baking designed to dextrinize their starch. “By 1889 the Sanitarium Foods had become popular enough to warrant the establishment of a separate factory; Granola alone sold at the rate of two tons a week.” But when Dr. Kellogg wanted to expand the business, other sanitarium doctors refused to vote the funds. So Dr. Kellogg launched the private Sanitas Food Company, relying heavily on his younger brother, Will Keith, who had served as his personal accountant and business manager since 1880. John Harvey’s new flaked cereals and vegetable meats became the property of the Sanitas Company. In mid-1906 Dr. Kellogg decided to change Sanitas’ corporate name to the Kellogg Food Company. Then: “In the spring of 1921, to avoid further difficulties with Will Kellogg’s manufacturing business [Battle Creek Toasted Corn Flake Company], Dr. Kellogg changed his concern’s name to the Battle Creek Food Company.”

Concerning flaked breakfast cereals: The first ones were developed from wheat jointly by Dr. J.H. Kellogg and his brother Will, in about 1894. Dr. Kellogg named their first successful wheat flakes product Granose Flakes, and on 31 May 1894 he applied for a U.S. patent on “Flaked cereal and process for preparing same.” But in 1903 courts declared the doctor’s patent invalid. Will Kellogg developed the product into a great commercial success, in part by adding sugar to the malt and corn combination from which he made the flakes. “The sugar greatly enhanced the cereal’s taste appeal, and, as a result, the Corn Flakes business was booming by late 1905.” Will convinced his brother, John Harvey, to relinquish Sanitas’ rights to Corn Flakes, and in early 1906 Will established a separate Battle Creek Toasted Corn Flake Company with outside financing. John Harvey agreed not to take an active part in the new company’s management. Six months later John Harvey decided to change Sanitas’ corporate name to the Kellogg Food Company. The new company “began operating in July 1908, with Dr. Kellogg owning all but two of its fifteen thousand shares of stock. Not only did the new company absorb the old Sanitas Company, but it also leased the entire plant, machinery, goodwill, and business of the Battle Creek Sanitarium Food Company, thus bringing the manufacture and distribution of all the food products with which Dr. Kellogg was associated into one organization. By then John Harvey had decided that it would be a good thing to put out all company products under the trade name ‘Kellogg’s.’”

Will became very upset when Dr. Kellogg attached the family name to his new food company and products. Eventually a series of legal battles developed between the two brothers over this and other products. Will Keith Kellogg is discussed on pages 64, 118-20, 122, 144, 148, 192, 210-18, 224, 237-38.

On pages 193-208 are 16 pages of excellent black-and-white photos from the life of Dr. Kellogg, starting with a

portrait of him and his wife in 1884.

Reprinted in 2006 by Review and Herald Publishing Association (Hagerstown, Maryland)—but with the new subtitle: “Pioneering health reformer.” Adventist pioneer series. On the new cover, on a snipe in the upper right corner: “Father of the health food industry.” Address: Andrews Univ., Berrien Springs, Michigan.

594. Trager, James. 1970. The enriched, fortified, concentrated, country-fresh, lip-smacking, finger-licking, international, unexpurgated foodbook. New York, NY: Grossman Publishers. xv + 579 p. Illust. Index. 24 cm. [350+\* ref]

• **Summary:** This hefty volume is packed with information about a multitude of interesting, little known, or bizarre subjects related to food. It is divided into 11 major chapters, each of which contains many mini-chapters, often with witty or enticing (but often undescriptive) titles such as “mushrooms take savvy” or “Farmer Jefferson.” The extensive index is very useful, containing entries for such things as Accent/MSG (p. 445-48), prehistoric agriculture and food (p. 3-11), meat analogs and Bac\*Os (p. 450-51, 457, 501), Archer Daniels Midland (p. 450), bean curd (p. 333, 362), Battle Creek Sanitarium (p. 460), Kellogg (p. 384, 460-61), miso soup (p. 362), soybeans (p. 21, 262, 382, 450-51, 518), soy protein (p. 450), vegetarianism and vegetarians (p. 3, 324, 343, 457-59).

In Chapter 10, titled “Nuts in the Fruitcake” (p. 455-86), the author takes the opportunity to make fun of anything he discusses related to health/natural foods or vegetarianism. To him, it all smacks of food faddism and extremists. There are sections about vegetarians past and present (“there are no convincing nutritional justifications for vegetarianism”), Sylvester Graham (“One of America’s first home-grown food faddists”), Horace Fletcher, Dr. William Howard Hay and acidosis, Gayelord Hauser (“Perhaps the most prominent diet and health mythologist in recent years”), organic foods baloney (“DDT has not yet been shown to have harmful effects for humans”), Carlton Fredericks and Adolphus Hohensee, Tiger’s Milk, aphrodisiac foods, and food and astrology. Address: New York.

595. **Product Name:** Ranch House Vegetable Mince, Bolognese, Curry, Stew, Goulash.

**Manufacturer’s Name:** Direct Foods Ltd.

**Manufacturer’s Address:** Petersfield, Hampshire, GU32 3EW, England.

**Date of Introduction:** 1970?

**Ingredients:** Macaroni Mix: Wholemeal macaroni, textured soya protein, dehydrated onions, green bell peppers, peas, mushrooms, vegetable oil, sea salt, corn flour, raw sugar, yeast extract, spices, herbs.

**Wt/Vol., Packaging, Price:** Macaroni: 141 gm plastic bags for ½ pound.

**How Stored:** Shelf stable.

**New Product–Documentation:** Brochure (4-panel color) from Direct Foods Ltd. 1970? “Protoveg Meat Substitute and Ranch House Convenience Meals.” “Reduce your meat bill using Direct Foods.” The company address is now Petersfield, Hants. GU32 3EW. Phone: Petersfield 4911/2. Contents: What is Protoveg? How is it used? How is it made? How is it sold? Is it as good for you as meat? Typical analyses.

Export price list from Direct Foods Ltd. 1974. Oct. 1. Ranch House Meals (each 112 gm) include Vegetable Mince, Vegetable Bolognese, Vegetable Goulash, Vegetable Stew, Vegetable Curry. There is also a catering pack consisting of 50 lb of any flavour. Sosmix–meatless sausage mixture (13 oz). is also listed. The company address is now Bedford Road, Petersfield, Hants.

Trade catalog and price list from Direct Foods Ltd. 1977. April 25. The product line is the same as in 1974 except for the addition of: 10 lb sizes for each flavor, and Sizzleberg.

Food Report (Lehmann). 1982. Jan.

Talk with Peter Roberts. 1990. Dec. 12. In about 1970, Direct Foods Ltd. introduced a line of about 20 vegetarian protein products, all replacements for meat and all sold under the Ranch House brand.

596. **Product Name:** Sosmix.

**Manufacturer’s Name:** Direct Foods Ltd.

**Manufacturer’s Address:** Petersfield, Hampshire, England.

**Date of Introduction:** 1970?

**Ingredients:** Macaroni Mix: Wholemeal macaroni, textured soya protein, dehydrated onions, green bell peppers, peas, mushrooms, vegetable oil, sea salt, corn flour, raw sugar, yeast extract, spices, herbs.

**Wt/Vol., Packaging, Price:** Macaroni: 141 gm plastic bags for ½ pound.

**How Stored:** Shelf stable.

**New Product–Documentation:** Food Report (Lehmann). 1982. Jan. Talk with Peter Roberts. 1990. Dec. 12. In the early 1970s British Arkady was making a product named Banger Mix (a “banger” is a sausage), made with soya protein and pig fat. Peter asked them to replace the pig fat with a hardened vegetable oil. The Roberts named the resulting product Sosmix. Introduced in about 1970, it was a dry sausage mix and soon became Direct Foods’ best-seller. To prepare the product, you mix the dry product with water, let it hydrate for about 2 minutes, roll it into sausage shapes (or croquette shapes), then fry it. Or you can put it around an egg to make a Scotch egg.

As Peter Roberts tells the story: Once the labeling division of the county public analyst’s department threatened a lawsuit if Direct Foods did not change the product’s name. They felt that the name implied that the product name was a “phonetic crib on the word sausage, which suggests that the

product is a sausage with a meat content, and as such should come under the sausage regulations.” Peter Roberts politely explained that “the term Sosmix had an entirely different origin. Down in the West Country around Devon and Cornwall there is an old country tradition of ‘sosing,’ which means to swill a food around in the frying pan as its frying. The authorities took on a glazed look in their eyes and went away. They didn’t bother us after that.”

Letter from Peter Roberts. 1991. Oct. 15. Sosmix was not part of the Ranch House line. It stood on its own.

597. **Product Name:** Friday Man Vegetarian Chili with Beans. Renamed Chilli Man Vegetarian Chili with Beans in about 1978.

**Manufacturer’s Name:** Milnot Co.

**Manufacturer’s Address:** 120 W. St. John, Litchfield, IL 62056. Phone: 217-324-2146.

**Date of Introduction:** 1970?

**Ingredients:** In 1990: Water, soaked beans, partially hydrogenated soybean oil, textured soy protein concentrate (caramel color), spices, tomato paste, onion, salt, garlic, imitation beef flavorings (hydrolyzed plant protein, dry yeast, soy flour, partially hydrogenated vegetable oil).

**Wt/Vol., Packaging, Price:** 15 oz can. Retails for \$0.95 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. Talk with Craig Klatt, manager of the Center. He thinks this is one of the best vegetarian chilies, but it has a rather high oil content. Introduced about 20 years ago, its original name was Friday Man Chilli, and it was sold to Catholics who did not eat meat on Friday. Not many Catholics observe the penance of meatless Fridays any more. It was given its present name in about 1978.

598. Harris, Jean. 1971. Engineered food is on the way! *News and Observer (Raleigh, North Carolina)*. Jan. 17.

• **Summary:** Henry Ford’s desire to make cloth from soy protein started the original research on “meat analogues.” The technology for producing spun soy protein products developed from a process to produce casein fibers in Italy in the mid-1920s. A second group of “soy meats,” called textured meat analogues, is made by an extrusion process applied to textured vegetable proteins made from soy protein isolates; one example is Bac-Os.

“Most of these soy meats are available only to the institutional trade. They are now in use in prisons, hospitals, and orphanages.” Two manufacturers of such products are Loma Linda Foods and El Molino Mills.

In North Carolina a full soybean product, made from toasted soybeans, is sold under the name of Golden Nuggets; all Raleigh seems to be eating them.

Recipes are given for: Soya cake (with sifted soya flour).

Soyanise (with Soyamel soymilk). Golden nut pie crust (with soya flour). Soya cookies (with soya flour). Roasted soybeans (made from canned soybeans, either dry roasted at 350 degrees or deep fat fried). Puree of soybean soup (with sieved soybean pulp). Address: Food editor.

599. Carberry, James F. 1971. Our daily bread: Food faddism spurts as young, old people shift to organic diets. Concern on pesticides cited, but some see deception by quacks claiming cures. Yin and yang ice cream. *Wall Street Journal*. Jan. 21. p. 1, 12.

• **Summary:** Written from Hollywood, California, this article reports that “food faddism has been particularly prevalent lately.” Kahan & Lessin Co., one of the nation’s biggest distributors of organic foods, reports that its sales have doubled to \$12 million a year from \$6 million in 1968. New Age Foods of San Francisco [owned by Fred Rohé] recently opened a branch store in suburban Palo Alto, where it expects to gross \$1 million during its first year.

“Health and organic food advocates say the popularity of such items—as well as the more conventional products grown under ‘natural’ conditions—reflects the growing public concern over pesticide poisoning and the publicity over the dangers of food additives, preservatives, and substitutes like cyclamates.”

Richard Hansen is a sociologist at the University of California at Davis; he is researching the organic food movement.

“New insights into universe: Bruce MacDonald [sic Macdonald], president of Erewhon Trading Co., a Boston and Los Angeles concern that specializes in such exotic foods as hacho miso (a soybean paste), says that organic foods appeal to many dropouts from the drug culture. ‘It’s not just that the body’s malnourished from being on drugs a long time,’ he says. ‘It’s also that organic foods can give a person new insights into the order of the universe.’”

Warren Stagg, the bearded proprietor of H.E.L.P., a popular vegetarian restaurant, believes in the mystical, spiritual value of certain foods. A vegetarian diet can help elevate a person to a higher level of consciousness and bring him into harmony with the order of the universe, he says. Since 75% of H.E.L.P.’s clientele are nonvegetarians, the “restaurant offers some meat substitutes such as ‘beef’ stroganoff made from vegetable protein, mushrooms, scallions, bell peppers and sour cream sauce, and a ‘vegeburger’ sandwich that’s also made from vegetable protein. Other dishes on its menu include braised tofu (soybean cake) with brown rice and a salad of cottage cheese, alfalfa sprouts, sunflower seeds, grated carrots, scallions, figs and apricots.”

Note 1. This is the earliest English-language document seen (April 2013) that uses the term “braised tofu” to refer to grilled tofu.

“A group of young people following a macrobiotic diet

live in an old Victorian mansion above Hollywood’s Sunset Strip. They are students of the late Georges Ohsawa, a Japanese philosopher who taught about the delicate balance between yin and yang; they eat ascetic meals that include pressure-cooked brown rice and seaweed soup. There have recently been well-publicized cases of the deaths or severe illnesses of a few young people subsisting on only brown rice, the extreme form of the macrobiotic diet.

“Another famous food-faddist helped found a huge business in breakfast cereals. He was John Harvey Kellogg...” according to Ronald Deutsch, author of a history of food fads called “The Nuts Among the Berries.” Deutsch then tells his inaccurate version of how Mr. [sic, Dr.] Kellogg got into the cereal business.

“One man who spends a great deal of time pooh-poohing various nutritional eccentricities is Dr. Fred Stare, chairman of the department of nutrition at Harvard University’s School of Public Health.” Dr. Stare discusses his pet peeves.

Note 2. Bruce Macdonald recalls (April 1992): “In early 1971 *The Wall Street Journal* ran a front-page feature story on the emerging new natural foods industry. A person from Merrill-Lynch came in and said, ‘We could package this business and raise millions for you.’”

Advest Co. 1972. Dec. “A recent *Wall Street Journal* article named this industry as one of the ten highest growth industries for the 1970s.” Address: Staff Reporter.

600. Brozan, Nadine. 1971. If you’ve never seen a soybean before... *New York Times*. Jan. 23. p. 18.

• **Summary:** Denis Barber owns about 75,000 bushels of soybeans at any given time—yet he’s never seen a soybean. As president of General Arbitrage, a New York commodity trading company, he buys and sells commodity futures. The soybeans he purchases are usually resold before the date he is required to take delivery; if they are not, they end up in a warehouse in Chicago.

In the financial world, the soybean is known as “the Cinderella crop.” It contains more protein than any other vegetable—and costs less. Yet in America, soybeans are not widely available in food stores—except in health food stores and Chinese markets. Although supermarkets do not stock the bean, they do sell many products, ranging from salad dressings to pet foods, that contain soybean oil, meal, or flour. They also carry soy sauce and Worcestershire sauce. Babies allergic to cow’s milk will probably be given soy milk. Observers of orthodox [kosher] Jewish dietary laws, which do not permit the consumption of meat and dairy products at the same meal, are now able to enjoy imitation sour cream, ice cream, or steaks—each made from the soybean. According to Mr. Barber, less than one half of one percent of the crop is used for human nutrition; its main use is as a meal for livestock.

Note: This is the earliest English-language document seen (Oct. 2013) that contains the term “imitation sour

cream.”

Dr. Joseph J. Rackis, principal chemist for the Northern Marketing and Nutritional Research Division of USDA's Agricultural Research Service in Peoria, Illinois, agrees that most soybeans are processed into oil and meal. And even if more were available for sale as food, most people don't like their taste—according to a spokesman for General Foods.

The “future of the soybean probably rests more in what it can become than what it is.” The food industry, scientists and nutritionists believe that the wave of the future lies in the simulation of foods from soybeans. Already they are transforming soybeans into “hamburgers, canned stews, bacon strips, hors d'oeuvre dips, chow mein, pasta, sea food, and a wide range of frozen dinners approximating ham, chicken and beef.” A photo shows soybeans in a plastic bag.

601. Ziemba, J.V. 1971. Showcase plant spins soy protein. *Food Engineering* 43(1):66-69. Jan.

• **Summary:** General Mills' new multi-million dollar computer-controlled facility at Cedar Rapids, Iowa, is spinning texturized vegetable protein foods, which are “laying the groundwork for many of tomorrow's foods... Flexibility is evidenced by the highly diversified line of products is being turned out They're in dry and frozen forms, in different shapes and sizes, with varying textures and flavors, etc.

“Included are Bac\*Os, spun protein chips flavored like bacon; and textured protein cubes, granules and dice (tradename Bontrae) with flavors like ham, beef and chicken.” Photos show the spinning line and the computer control room, and details of the spinning process are given. Soy protein isolate is made into a slurry or dope, which is extruded into streamlets or filaments by a battery of spinnerets (each having about 16,000 holes) into a protein-coagulating acid-salt bath. “A series of take-away rolls, revolving at increasing speeds, stretch-pulls each tow of fibers through a second heat-treating bath. To a degree, tenderness or toughness is controlled by the amount of stretch imparted to fibers during initial forming steps. Each tow is then washed with rolls squeezing out excess water.”

GMI makes two basic types of products. “In making the Bac\*Os and Bac O Chip bacon analogs, the continuous tow is impregnated with additives—flavor, color, binders, etc. The impregnated tow is then slit, cross-cut, dried and coated with vegetable oil.

“The other type is precooked, IQF (individually quick frozen) chunks, bits and analogs of ham, beef, chicken, etc. To produce them, continuous tows are cut into short staple fibers. These are also impregnated with additives. The short fibers are carried through a specially designed cooker. The discharged, cooked slab is finally cut into desired shapes.” Address: Associate Editor, Food Engineering.

602. *Times of India (The) (Bombay)*. 1971. Cheeseless

cheese. March 7. p. 8.

• **Summary:** Last year, according to a report recently published by the U.N. Conference on Trade and Development, the growth rate of food production was 1% less than the population growth rate. Thus, “all the gains of world food production were eaten up by the population explosion.”

Together with the intense worldwide efforts to increase food production are parallel efforts to find inexpensive, nutritious, and tasty substitute foods. Many of these are based on the soya bean, a high quality, low cost source of vegetable protein. Americans, for example, now enjoy meatless turkey roast (complete with a plastic wishbone), milkless milk, and soya sausage.

But will this solve the basic problem? How can people who eat traditional diets in developing countries be coaxed into trying something new—such as soya milk or cheeseless cheese. Perhaps, by making it seem fashionable, exotic, or one of the “in” foods enjoyed by “with it” people.

603. Shinoda, Osamu. 1971. Doufu kao [Thoughts / treatise on tofu]. *Ta-lu Tsa-chih (The Continent Magazine, Taiwan)* 42:172-78. (Also numbered p. 8-14). March 31. [12 ref. Chi; eng]

• **Summary:** A Chinese-language publication apparently similar in content to his 1968 Japanese-language publication by the same title.

A summary, translated into English by Ernst Wolff for Theodore Hymowitz in Jan. 1972, states: The word “tofu” first appeared in the Chinese document *Ching Yi Loo* (Pinyin: Qing Yi Lü) by Tao Goo (Tao Gu) in the early Sung Dynasty (960-1126 A.D.), although the Japanese believed that tofu technology was invented by Prince Liu An of Huai-Nan around 200 B.C. in China. Shinoda believes that the technology for making tofu was adapted from that of cheese making introduced to China by nomadic people, the so-called “Hoo.” They migrated from the north into China during the period from the Six Dynasties (222-589 A.D.) to the T'ang dynasty (618-907 A.D.), in the time just before the Sung dynasty. Tofu was first a popular food among the middle and lower classes during the Sung dynasty. Then it also became part of the diet of the upper class, and was even served to the emperor and royal family during the Ming dynasty (1368-1662). Tofu was introduced to Japan by vegetarian Buddhist monks around the 12th century. On page 12 is an extremely interesting list of the 12 earliest documents (1238-1534), which Shinoda has been able to find, that mention tofu under various names. For each is given the title, the date it appeared, and the name used for tofu or the food in which it appeared. For details, see Shinoda 1968 (in *Fuzoku*).

Terms which are romanized or appear in English in this document include: Cheese, butter, yoghurt, casein, khorot, Suridofu, Hikizuri-dofu, Tofu-zu, Mori, Dengaku, tofu, Oden, Shirakabe, Mura Dengaku, Sakai, Okabe, Antofu,

Ganmodoki, bean curd. A romanized Japanese verse reads:

*Harusato wa Kabe no Tatoes ni Naradofu, Shiroki wa Tsuki no somuke zari keri.*

*Koisureba kurushikarikeri Udzidofu, Mamehito no Na o ikadetoramashi.*

Note: According to Abe (1974, p. 99) this is one of Japan's earliest references to tofu; it is a waka-style poem that comes from a work titled either *Shichijū-ichiban Shokunin-zukushi Uta Awase* or *Nanajū Ichiban Shokunin Jin Utaawase* and appears in the section of poems about sōmen noodle sellers. Address: Japan.

**604. Product Name:** Temptein (Spun Soy Protein Fibers) [Meat-Like Nuggets, Bacon-Like Chips, Seapro, Ham-Like Cubes, Pepperoni-Like Links, or Pro-Lean 45].

**Manufacturer's Name:** Miles Laboratories, Inc. Marshall Div.

**Manufacturer's Address:** Elkhart, Indiana 46514.

**Date of Introduction:** 1971 May.

**New Product–Documentation:** Ad in *Food Technology*. 1971. 25(5):44-45. May. "These spun vegetable fibers could revolutionize your new foods. Temptein: The spun textured protein."

Miles Laboratories Inc. Marschall Div. 1973. Jan. Technical information on Temptein spun textured vegetable protein. Ad in *Soybean Digest*. 1973. Nov. p. 19A-B. "From Miles–Six specific ways to whittle costs in your meat and seafood formulations. And maintain quality."

**605.** Miles Laboratories, Inc. Marschall Div. 1971. These spun vegetable fibers could revolutionize your new foods. Temptein: The spun textured protein (Ad). *Food Technology* 25(5):44-45.

• **Summary:** Temptein, the new textured protein from Miles, is significantly different because its spun. "We spin refined soy isolate (more than 90% protein) using platinum spinnerettes, each containing 15,000 tiny holes. The result is a highly manageable protein 'tow.'"

Much more easily than other forms of protein, it "assumes the texture of almost any food you choose. The genuine texture. Of anything from ground beef to chicken, lobster to scallops. Moreover, Temptein accepts flavors, colors and additional nutrients in precisely measurable quantities. his means that variables like taste, texture, bulk density and nutritional content are calculable. Controllable."

A large photo shows Temptein held between a thumb and forefinger.

Note: This is the earliest English-language document seen (March 2009) that mentions Temptein spun soy protein. Address: Elkhart, Indiana. Phone: (219) 264-8716.

**606.** *Food Processing (Chicago)*. 1971. New products/packages [General Mills]. July. p. 65.

• **Summary:** "Vegetable protein garnishes: Pepr\*Os (with a

flavor like spicy pepperoni) and Saus\*Os" (with a flavor like milk sausage) are vegetable protein products sold nationwide by General Mills. These crisp chips require no refrigeration. They can be used as garnishes or stir-ins to add flavor. Two photos show that each is sold in a glass jar, 3.25 oz. net weight. Note: These products are similar to General Mills Bac\*Os–imitation bacon bits.

**607.** Busta, F.F.; Schroder, D.J. 1971. Effect of soy proteins on the growth of *Clostridium perfringens*. *Applied Microbiology* 22(2):177-83. Aug. [4 ref]

• **Summary:** Although some soy proteins had a stimulatory effect on the growth of *Clostridium perfringens*, others had an inhibitory effect its growth. In a liquid medium in which meat or soy meat was the source of protein, there was a significant stimulation by beef, chicken, and soy beef. Soy chicken supported growth at a lower rate than observed with Trypticase. Under actual meat loaf conditions, the addition of soy meat or protein additives to meat did not affect the growth of *C. perfringens*. Address: Dep. of Food Science and Industries, Univ. of Minnesota, St. Paul, Minnesota 55101.

**608.** Lappé, Frances Moore. 1971. *Diet for a small planet*. New York, NY: Ballantine Books. xiv + 301 p. Illust. by Kathleen Zimmerman & Ralph Iwamoto. Index. 18 cm. [90 ref]

• **Summary:** This one of the most important and influential books written about food, nutrition, and world hunger during the 1970s. It became a huge best-seller and influenced millions of people and many other authors. The idea for *The Book of Tofu* came directly from reading this book—in Japan. Published on 1 Sept. 1971, it introduced the concepts of "protein complementarity" and "eating low on the food chain" to countless Americans. By April 1973 the book had been reprinted 7 times. The book's roots lie in the University of California at Berkeley, where Ms. Lappé was enrolled in the School of Social Work in 1968. A committed community organizer of welfare recipients, she was frustrated in her inability to find an agenda that would truly end the people's suffering. So she began to study the political economy of food in the Natural Resources library. From this research came a 1-page handout, then a 5-page handout, then a 70-page booklet, and finally this landmark book.

Contents: Acknowledgments. Foreword. Part I: Earth's labor lost. Part II: Bringing protein theory down to earth. Part III: Eating from the earth: Protein theory applied. Part IV: Combining non-meat foods to increase protein values. Appendixes. Notes.

Key quotes: "This book is about PROTEIN—how we as a nation are caught in a pattern that squanders it... I propose that our meat-centered diet is at the very heart of our waste of the earth's productivity" (p. xi). "Fully *one-half* of the harvested agricultural land in the U.S. is planted with feed crops. We feed 78% of all our grain to animals. This is

the largest percentage of any country in the world” (p. 5). We feed animals “89% of our corn crop, 98% of our grain sorghum crop, 87% of our oat crop, 64% of our barley crop, as well as 95% of our unexported soybean crop. To make beef or veal, “a cow must be fed 21 pounds of protein [from feed] in order to produce 1 pound of protein from human consumption.”

This vegetarian book contains 125 pages of recipes and makes extensive use of soybeans and soyfoods—though mostly in the form of dry soybeans or grits (\*) or soy flour (+), which are two of the least interesting ways of using soybeans. In the section titled “Getting the most protein for the least calories,” subsection 5 on “Legumes” (p. 106) states: “Soybean curd (tofu) has the fewest calories for the amount of usable protein, largely because most of the fat is removed in its processing. Tofu is truly an excellent protein source. Lightly sautéed with a fresh vegetable accompaniment, one could easily eat 7 ounces of tofu and fulfill 25 to 30 percent of a day’s need for protein at the cost of only about 5 to 7 percent of a day’s calorie allotment. I’ve included several tofu dishes among the recipes given later in this book.”

Tofu is not mentioned in the index, but under “Soy Curd” we find one recipe titled “Leafy Chinese tofu (Soy curd)” (p. 144). It notes that soy + rice, and soy + sesame are complementary proteins.

The recipes are grouped by complementary combinations. Rice and soy (p. 140-45; combining in the proper proportions gives a 32% increase in usable protein): Crusty soybean casserole\*. Stuffed cabbage leaves\*. Curry rice\*. Leafy Chinese tofu (soy curd). Sukiyaki (with tofu).

Rice and wheat and soy (p. 146-50; 24% increase in usable protein): Hearty vegetable soup (with miso and soy sauce)\*. Sweet and pungent vegetable curry\*. Mexican grains\*. Rice-wheat “kasha”\*.

Whole wheat and soy (p. 181-88; 32% increase): “Complementary” pizza+. Savory onion quiche+. Wheat-soy waffles+. Chameleon spice cake+. Wheat-soy pudding+.

Wheat, soy, and sesame (p. 189-94; 42% increase): Sesame crisp crackers+. Sesame dream bars+. Journey cakes+. Orange sesame muffins+. wheat-soy-sesame bread+.

Cornmeal and soy and milk (p. 202-08; 13% increase): My favorite cornbread+. Boston brown bread+. Pineapple-corn muffins+. Corn spice coffee cake+. Cornmeal-soy waffles+. Indian pudding\*.

Soy, wheat, rice, and peanuts (p. 220-26; 15% increase): Curried soybeans and peanuts\*. Nutty bean tacos\*. Soybean croquettes\*. Spanish soybeans over mixed grains\*+. Deep dish vegetable pie\*.

Soy and sesame seeds (or sunflower seeds) and peanuts (p. 227-32; 25% increase): Nutty noodle casserole\*. Soy-sesame-peanut spread+ (with roasted soy flour). Peanut-sesame loaf supreme+. Soy-pea sesame snacks\*. Bean burgers\*.

This was one of the first popular books to show the connection between intensive livestock production and environmental degradation. Part I, titled “Earth’s Labor Lost,” shows how: (1) Animal wastes from huge feedlots cause water pollution (p. 15-16); (2) Growing crops for livestock feed and overgrazing leads to soil erosion, loss of topsoil, and soil depletion (p. 17-18); (3) The increased pressure on our land to grow livestock feeds has led to increased use of pesticides, which kill untargeted species and cause water pollution (p. 26-27). In short, a vegetarian diet “maximizes the earth’s potential to meet man’s nutritional needs and, at the same time, minimizes the disruption of the earth necessary to sustain him. It’s as simple as that” (p. 3).

Also gives a recipe for “Crunchy granola” (p. 251, based on rolled oats, coconut shreds, sesame seeds, and wheat germ).

Note 1. As of Sept. 1991, this book had sold about 4 million copies, and of that 3 million copies in English-language editions.

Note 2. This is the earliest document seen (May 2002) concerning the environmental impact of a vegetarian diet. Address: California.

609. Wilding, M.D. 1971. Textured and shaped oilseed protein food products. *J. of the American Oil Chemists’ Society* 48(9):489-91. Sept. [8 ref]

• **Summary:** Contents: Abstract. Introduction. Discussion. Photos: A piece of extruded textured soy protein showing the structured form of the protein. Figures: (1) Bar chart showing the relative cost of protein from selected edible raw material sources. Most expensive by far is beef (1.62), followed by chicken, fish flour, and dry skim milk (all from animal sources). Least expensive is soy flour (0.14), followed by cottonseed flour and whole wheat. (3) A typical schematic flow chart for the process of making spun fiber food products. (4) An approximate composition comparison (dry basis) of selected meat products with a typical spun soy protein analog (Bontrae, ready to eat; contains 60% protein).

The Abstract begins: “The major emphasis in developing textured and shaped protein foods has been with the use of soy proteins.” Their price is low and stable, their protein content and quality is high, and the inherent chemical properties of the protein allow for unique structure development.

In 1947 Robert Boyer made the first textured vegetable proteins from edible soy fiber. Address: Research & Development Center, Swift & Co., Oak Brook, Illinois.

610. Spiral Foods Inc. 1971. Price list of macrobiotic foods. Chico, California. 2 p. Undated. 35 x 25 cm.

• **Summary:** This single-sheet catalog and price list, printed front and back with reddish-orange ink on green paper, contains 8 panels and is undated. Yet it was sent by Chico-San in a portfolio of sell sheets with a cover letter dated 8

Dec. 1971—from which we can estimate the date. It is also with larger Spiral Foods catalogs issued after the disastrous 1972 fire that destroyed the company's plant. Under the name of each food is given a brief description. It includes the following foods:

Condiments: Tekka (“A traditional flavoring prepared from carrot, burdock, ginger, lotus root, Soybean Puree {Miso}, and sesame oil”), seitan (“A meat substitute made from vegetable protein of wheat gluten and tamari soy sauce”), salt plums, kuzu arrowroot, sesame salt, sesame butter, sesame oil (from organically grown seeds), Lima sesame oil (imported), crude sea salt (“Unrefined, unprocessed, trace sea minerals retained”), white unrefined sea salt, Mishio (Lima, with kombu), moromi (“Mash of soy sauce before pressing. A pungent flavor”), furikake (“A seasoning made from Miso, sesame seed, nori, bonita [sic, bonito] powder, whole brown rice and kombu” {kelp}), Goma Muso (“A seasoning prepared from traditional Miso and whole sesame seeds”), bainiku ekisu (concentrate of green [ume] plums), sesame seeds. Dried fish. Cosmetics. Beverages: Yano (grain beverage), Whole grain cereals. Whole grain noodles. Beans: Azuki red (Dainagon, or Korean), black [soy] beans. Sea vegetables. 100% whole grain brown rice. Sweet rice—mochi gome. Rice cakes. Lima soy sauce (“A traditional soy sauce of exceptional quality”), tamari (“The traditional soysauce, fermented naturally and aged 18 months. Prepared from soybean, wheat, salt and water”). Soybean puree (Miso) (“Made from the cultivation of a special enzyme and aged 18 months. The soybean puree is ideal mixed with sesame butter and used as a spread or can be added to soups and sauces”). Utensils.

Note 1. This is the earliest document seen (April 2011) concerning Spiral Foods, a company organized in 1970 by Bob Kennedy of Chico-San and Peter Milbury to distribute Chico-San products directly to retail stores in the greater San Francisco Bay Area. When Chico-San was established in 1962 there were no natural foods stores in the Bay Area (or in the USA). However by 1970 there were many. They were not being well served by the old-line health food distributors such as K&L and Landstrom which distributed Chico-San's products, yet they wanted to buy Chico-San's products.

Note 2. This is the earliest English-language document seen (Dec. 2006) that uses the Japanese-language term “bainiku ekisu” (literally “plum flesh extract”) to refer to a commercial extract of ume plums. Address: 1017 Willow Street, Chico, California 95926.

611. **Product Name:** Protose (Meatlike Product Made of Peanuts and Wheat Gluten).

**Manufacturer's Name:** Battle Creek Food Co. Div. of Worthington Foods.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1971.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, peanuts, vegetable oil, salt, yeast extract, soy sauce, MSG.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** Ad for Protose by Sanitas Nut Food Co., Ltd. 1900. July. *Good Health* (Battle Creek, Michigan). Protose is described as an easy to digest, perfect substitute for meat. There is no evidence showing that gluten was used in this product until 1971. Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in “Protose (Battle Creek).” Note that in 1960 Worthington Foods had acquired Battle Creek Food Co.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned peanut product resembling cold cuts. Can also be used in salads or sandwiches.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 176. The ingredients in “Protose (Battle Creek)” are “wheat protein [wheat gluten], peanuts, wheat and soy flour, corn oil, yeast extract, soy sauce, salt, HVP, niacinamide, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.”

612. **Product Name:** Bacon Tasters.

**Manufacturer's Name:** Borden, Inc.

**Manufacturer's Address:** Headquarters: 350 Madison Ave., New York, NY 10017.

**Date of Introduction:** 1971.

**Ingredients:** Incl. soy protein isolate.

**New Product—Documentation:** Wolf and Cowan. 1971. *Soybeans as a Food Source*. p. 69. The product is made from soy protein isolate. It is probably spun into fibers.

613. **Product Name:** [Vegetable Meat].

**Foreign Name:** Carne Vegetal.

**Manufacturer's Name:** Industria e Comercio de Productos Alimenticios Vegetal, Ltd.

**Manufacturer's Address:** Brazil.

**Date of Introduction:** 1971.

**Ingredients:** Wheat gluten enriched with soy protein isolate.

**New Product—Documentation:** Horan et al. 1971. *PAG Bulletin* No. 13. p. 26. “This product is made from wheat gluten enriched with soy protein isolate and looks like ground meat. It is in small commercial production and is sold in supermarkets and specialty food shops. It is a relatively expensive product.”

Note: This is the earliest Portuguese-language document seen (Nov. 2014) that mentions a meat alternative, which it calls *Carne Vegetal* (vegetal meat).

614. **Product Name:** Loma Linda Vita-Burger (Meatless Dehydrated Beef-like Product) [Chunks, or Granules].

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1971.

**Ingredients:** Soy flour, salt, natural (vegetable) flavor, caramel color, artificial flavor, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin), ferrous sulfate.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable.

**Nutrition:** Per ¼ cup (0.75 oz–21 gm): Calories 70, protein 15 gm, carbohydrate 6 gm, fat (less than one gm), cholesterol 0 mg, sodium 150 mg, potassium 460 mg.

**New Product–Documentation:** Recipe booklet. 1979, dated. Comes in “regular or chunks.”

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a dehydrated beef-like product.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1971.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

615. **Product Name:** Loma Linda Proteena (Meatless Peanut or Gluten Loaf or Cold Cuts—with Soy Flour).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1971.

**Ingredients:** Wheat protein [wheat gluten], unroasted peanut meal, tomato puree, soy flour, salt, yeast extracts, soy sauce, corn sugar, MSG, seasonings, onion powder, caramel color, water.

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** In 1988: Per ½ inch slice (2.5 oz–71 gm): Calories 140, protein 17 gm, carbohydrate 5 gm, fat 6 gm, cholesterol 0 mg, sodium 460 mg, potassium 260 gm.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 161. The ingredients in “Proteena (Loma Linda)” are: Wheat protein [wheat gluten], unroasted peanut meal, tomato puree, soy flour, salt, yeast extracts, soy sauce, corn sugar, MSG, seasonings, onion powder, caramel color, water.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned peanut product resembling cold cuts. Can also be used in salads or sandwiches.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The ingredients in “Proteena (Loma Linda)” are “wheat protein [wheat gluten], unroasted peanut meal, tomato puree, soy flour, salt, yeast extract, dextrose, L-lysine, HVP, MSG, caramel color, onion powder, flavorings.”

Label sent by Loma Linda Foods. 1988. Oct. 5.

The ingredients now are: Wheat gluten, raw peanut butter, water, tomato puree, soy flour, salt, natural (vegetable) flavors, dextrose, L-lysine, caramel color, onion powder spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). This product was introduced in 1963. A product called “Soy Beans with Proteena and Tomato Sauce” was introduced in 1934.

616. **Product Name:** Loma Linda Vegeburger (Meatless Hamburger—With Soy Flour). Later renamed VegeBurger or Vege-Burger.

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1971.

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, soy flour, hydrolyzed vegetable protein, salt, yeast extract, dextrose, powdered

onion, caramel color, lysine, MSG, celery and parsley extractives.

**Wt/Vol., Packaging, Price:** 19 oz can. Retails for \$2.13 (12/80).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per ½ cup (3.8 oz–108 gm): Calories 110, protein 22 gm, carbohydrate 4 gm, fat 1 gm, cholesterol 0 mg, sodium 190 mg, potassium 110 mg.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. The ingredients in “VegeBurger (Loma Linda)” are: Wheat protein [wheat gluten], water, soy flour, hydrolyzed vegetable protein, salt, yeast extract, dextrose, powdered onion, caramel color, lysine, MSG, celery and parsley extractives.

Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains at least one recipe calling for “Vegeburger” (see Vol. 3, p. 18; Oatmeal Herb Loaf).

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. VegeBurger is a canned steak or burger-like product based on wheat protein.

Recipe booklet. 1979, dated. Consumer Reports. 1980. June. p. 357-65. The protein PER is 1.21. Sensory comments: Slight meat flavor. Spicy. Salty. Smoky flavor. Vegetable-oil flavor. Too moist. Crumbly. Granular.

Label for Vege-Burger sent by Loma Linda Foods. 1988. Oct. 5. This product has been reformulated, so that one of the ingredients is now soy protein isolate.

617. **Product Name:** Loma Linda Gluten Steaks.

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1971.

**Wt/Vol., Packaging, Price:** 14 oz can (1971).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains many recipes calling for “gluten steaks,” which are sold in 14 oz cans.

618. **Product Name:** Loma Linda Scallops.

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1971.

**Wt/Vol., Packaging, Price:** 14 oz can (1971).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains many recipes calling for “Scallops” or “Skallops” (See Vol. 1, p. 37; Green bean and

gluten salad), a gluten-based product.

619. **Product Name:** Primeburger.

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, California.

**Date of Introduction:** 1971.

**Wt/Vol., Packaging, Price:** 20 oz can (1971).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Patricia H. Black and Ruth L. Carey. 1971. *Vegetarian Cookery*. 5 vols. This set of vegetarian cookbooks contains several recipes calling for “Primeburger,” a gluten-based product which is sold in 20 oz cans (See Vol. 3, p. 16-17).

620. **Product Name:** McCormick/Shilling Bac’n Pieces (Imitation Bacon) [Bits, or Chips].

**Manufacturer’s Name:** McCormick & Co., Inc. (Marketer-Distributor).

**Manufacturer’s Address:** East Coast: 414 Light St., Baltimore, Maryland; West Coast: Salinas, California. Phone: 301-771-7301.

**Date of Introduction:** 1971.

**Ingredients:** In 1989: Textured soy flour, partially hydrogenated soy oil, salt, corn starch, artificial and natural flavorings, monosodium glutamate, caramel color, hydrolyzed vegetable protein, FD&C Red #3, BHA as an antioxidant.

**Wt/Vol., Packaging, Price:** 3.25 oz (92 gm) tall plastic jar. Retails for \$1.69 (12/89 California).

**How Stored:** Shelf stable.

**New Product–Documentation:** Wolf and Cowan. 1971. Soybeans as a food source. p. 69. Made from defatted soy flour. The product name is given as Imitation Bacon Bits.

Label. 1989, Dec. Fill color. Brown, green, and red on yellow. “No cholesterol. Uses: Delicious in tossed or pasta salads. Sprinkle over baked potatoes. Spread over cooked hamburgers; add cheese and broil.”

Talk with Polly Murray, head of Consumer Affairs, McCormick & Co. 1991. March 28. The parent company, McCormick & Co. purchased Shilling, a west coast company, in 1947. They still sell their products under the Shilling brand in the western USA (they have a plant in Salinas, California), and McCormick in the eastern USA. This product was introduced in the late 1960s or early 1970s. Jim Sullivan, who is not retired, did a lot of work on it. When the company headquarters were moved from Baltimore to Hunt Valley about 2½ years ago many older files were discarded.

621. **Product Name:** Sanitarium Health Foods Vegelinks (Vegetarian Frankfurter).

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** 148 Fox Valley Rd., Wauroonga,

Sydney 2076, NSW, Australia.

**Date of Introduction:** 1971.

**Ingredients:** Wheat protein, vegetable oil, yeast, soy protein, salt, Savex, hydrolysed vegetable protein, onion.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color. Photo shows a frankfurters on a bed of sauerkraut “Vegetable Protein–Serve fried, boiled, barbecued, roasted or grilled.” Recipes for Party Pleasers and Danish Open Omelette.

Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1971. But note that Worthington Foods introduced a product by this name in 1960, and in 1971 its main ingredient was Fibroprotein, spun soy protein fiber.

622. **Product Name:** Sanitarium Health Foods Soya Loaf (Canned Meatless Meatloaf).

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** Sydney, N.S.W., Australia.

**Date of Introduction:** 1971.

**Ingredients:** Soya beans, wheat protein, soy sauce, vegetable oil, peanuts, tomato, monosodium glutamate, onion, salt, herbs.

**Wt/Vol., Packaging, Price:** 425 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label. 1980, undated. “Vegetable Protein–Ideal for casseroles, stews, patties.” Letter from Sanitarium Health Food Co. 1981.

Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1971.

623. **Product Name:** [Vegetarian Hamburger, and Vegetarian Schnitzel {Rehydrated, Seasoned and Frozen}].

**Foreign Name:** Frozen Schnitzel Tsimchi.

**Manufacturer’s Name:** Shefa Protein Industries Ltd.

**Manufacturer’s Address:** 12 Htaasya St., Arad, Israel.

**Date of Introduction:** 1971.

**Ingredients:** Textured soy flour, hydrolyzed yeast.

**Wt/Vol., Packaging, Price:** ½ kg or 1 kg shallow tray pack with a film wrap overlay.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Sol Katzen, co-founder of Shefa Protein Industries Ltd. 1993. March 14. These were was Shefa’s fourth and fifth products. Sol and his brother set up a food processing line in the Shefa’s plant. They purchased fresh yeast, when they hydrolyzed. They made a solution of this yeast hydrolyzate, dehydrated onion and garlic (both locally produced), and pepper. Then they rehydrated their dry Vegetarian Schnitzel and their SVP in this solution to yield a frozen Vegetarian Schnitzel and Vegetarian Hamburger. The yeast hydrolysate served two purposes: (1) It flavored the structured soy protein; and

(2) It reduced the flatulence factor. The idea of producing a frozen TVP-type product was quite novel at the time. They marketed it for various applications: It could be mixed with egg or egg white and fried to make vegetarian patties, or it could be mixed with meat and served as desired.

624. **Product Name:** Nutmete.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: 614-885-9511.

**Date of Introduction:** 1971.

**Ingredients:** In 1971: Peanuts, corn flour, soya, salt, MSG, water to process.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 160. Lists the ingredients in “Nutmete (Worthington).”

625. **Product Name:** Meat Loaf Mix.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1971.

**Ingredients:** Textured soybean protein [Fibroprotein spun soy protein fibers], rolled oats, vegetable shortening, rice flour, egg albumin, nonfat milk solids, bread crumbs, wheat protein [wheat gluten], dehydrated onions, potatoes, celery, carrots, parsley, sweet red and green peppers, hydrolyzed vegetable protein, salt, MSG, flavorings, caramel, U.S. certified color.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 163. Lists the ingredients in “Meat Loaf Mix (Worthington).” This is an institutional product.

626. **Product Name:** Redi-Loaf Mix.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1971.

**Ingredients:** Textured soy protein, albumin [egg protein], vegetable oil, soy protein, vegetable shortening, plant flavorings and seasonings, rice flour, hydrolyzed vegetable proteins, brown sugar, caramel color, dried onion, salt, yeast, monosodium glutamate, soy lecithin, carrageenan, vegetable mono- and diglycerides, U.S. certified color.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 163. Lists the ingredients in “Redi-Loaf Mix (Worthington).” This is an institutional product.

627. Black, Patricia Hall; Carey, Ruth Little. 1971.

Vegetarian cookery. 5 vols. Mountain View, California, Omaha, Nebraska, and Oshawa, Ontario, Canada: Pacific

Press Publishing Assoc. Illust. by Henry Rasmussen. Recipe index. 24 cm.

• **Summary:** These are lacto-ovo vegetarian cookbooks. "Most of the recipes in these cookbooks have been collected over many years. Some came from association in years past with Paradise Valley Sanitarium and Hospital and with White Memorial Hospital; others came from more recent association with Loma Linda University." The complete nutritional composition of each recipe is given in that back of each book. Note 1. Monosodium glutamate is used in many recipes (For explanation, see Introduction to each volume). Other interesting meaty seasonings include Savorex, Smokene, and G. Washington Broth. Apparently generic names for meatlike products are used ("gluten burger" rather than "Gluten Burger") when more than one Adventist company makes such a product.

Contents: Vol. 1. Appetizers, beverages, salads, dressings and relishes, cooking guides. Vol. 2. Breads, soups, sandwiches. Vol. 3. Main dishes, vegetables. Vol. 4. Pies, cakes, cookies, desserts. Vol. 5. Exotic foods, candies, cooking for a crowd.

Soy- and gluten-related recipes include: Vol. 1: Nut and Soyameat pinwheels (with light Soyameat, p. 16-17). Soyameat puffs (with canned Soyameat, p. 17). Soybean milk (homemade, p. 30). Green beans and gluten salad (p. 37; Skallops [also spelled Scallops, gluten based] or Soyameat may be substituted for diced gluten). Chop suey salad (with Soyameat, or light or dark nutmeat, p. 44). Note 2. This is the earliest vegetarian or health food cookbook seen (June 2004) with "Appetizers" as one of the recipe categories.

Vol. 2: Whole wheat soy bread (with soy flour, electric mixer recipe, p. 15-16; Sponge method, p. 17). Soy cheese spread (with canned tofu, p. 44). Soy cheese and egg filling (with tofu, p. 44). Gluten spread (with canned gluten burger, p. 45). Hot burger sandwich patties (with canned gluten burger, p. 46). Hot gluten sandwich (with canned gluten steaks, p. 46). Hot savory sandwich (with Proast or other nutmeat, p. 47). Nutmeat and olive filling (with Proteena or Nuteena, p. 47). Savory Soyameat filling (p. 48). Soyameat and egg filling (with light Soyameat, p. 48). Soyameat, nut and olive filling (p. 48). Grilled gluten sandwiches (p. 52).

Vol. 3: Homemade gluten (. 15). Gluten roast (p. 15). Gluten burger loaf (with canned "gluten burger," p. 16). Primeburger loaf (with Primeburger [gluten], p. 16-17). Normandy loaf (with Proteena, p. 17). Walnut Proteena roast. Holiday roast (with gluten burger). Oatmeal herb loaf (with Vegeburger, p. 18). Nut roast (with Proteena, p. 21). Cashew nut and gluten loaf (p. 22). Seaside loaf (with Soyameat, p. 23). Ocean fillets (with Soyameat, p. 23). Soy soufflé burger (with dry soybeans, p. 24). Savory soy loaf (with canned soy cheese [tofu], p. 24). Soy cheese (or tofu) loaf (p. 24). Tofu loaf (no eggs, p. 25). Tofu (or soy cheese) patties (p. 25). Browned tofu with mushrooms (p. 25). Nuteena balls (p.

26). Basic gluten balls (p. 26). Nutmeat and rice patties (with Proteena and Nuteena, p. 31). Cottage cheese gluten burgers (p. 31). Chum la King (with Vegesteaks, p. 33). Stroganoff (with canned Soyameat, p. 34). Gluten stroganoff (with canned gluten or Soyameat, p. 34). Savory gluten casserole (with canned Chickettes or other gluten preparation, p. 35). Scalloped Soyameat (with light or dark Soyameat, p. 36). Gluten steaks deluxe (with canned gluten steaks, p. 37). Gluten steaks with mushrooms (p. 37). Shish kebab (with gluten steaks or Tender Bits [made of gluten], p. 37-38). Hearty soybean casserole (with canned Zoyburger, p. 42). Garbanzo and cottage cheese loaf (with Vegeburger, p. 44). Stuffed green pepper (with canned Vegeburger, p. 46). Oriental rice casserole (with gluten or Chickettes, p. 49-50). Chop suey (with fresh tofu, p. 51). Quick chop suey or chow mein (with canned Soyameat, p. 51). Spaghetti marzetti (with canned Vegeburger and Smokene, p. 56). Lasagna (with gluten burger, p. 57). Tetrizzini (with canned white Soyameat, p. 57). Quick eggs Benedict (with beef-style smoked Soyameat, p. 61-62). Eggs con burger (with gluten burger, p. 62). Eggs Vienna (with 6 vegetable wieners, p. 63). Baked soybeans (p. 80). Soybeans creole. Soybeans southern style.

Vol. 4: Soy nut cookies (with 1 cup soy flour, p. 97). Vol. 5: Gluten stew (p. 14). Spanish gluten (p. 14). Gluten nut loaf (with canned gluten burger, p. 16). Ocean fillets (with gluten and Soyameat). Browned tofu (p. 22). Chop suey (with soy cheese [tofu], p. 23). Soy cheese patties (with canned tofu, p. 23). Gluten burger sandwiches (p. 31). Chinese sweet-sour gluten (with canned gluten steaks, p. 41). Sweet-sour Tender Bits (with canned Tender Bits or other gluten preparation, p. 42). Chinese evergreen tofu (p. 42). Japanese sukiyaki (with canned gluten, Tender Bits, or Scallops, p. 45). Scrambled tofu (p. 46). Philippine adobo (with gluten, Tender Bits, or Scallops, p. 48). Philippine gluten curry (p. 49). Philippine gluten escabeche (p. 49). Korean seasoned gluten (with canned gluten, p. 50). Indian gluten curry (with canned gluten, p. 52). Kurma (Indian, with Soyameat, p. 53). Soyameat Indian curry (with canned light Soyameat, p. 53-54). Brazilian Palmito soy loaf (with canned or cooked soybeans, p. 57). Brazilian-style gluten (p. 57).

Can sizes: Chickettes (20 oz). Gluten (14 oz or 20 oz). Gluten burger (14 oz, 28 oz, or 30 oz). Gluten steaks (14 oz). Nuteena (14 oz.). Primeburger (20 oz). Proteena (14 oz). Scallops (14 oz). Soyameat (9 oz or 13 oz). Soyameat, white (13 oz). Soy cheese (12 oz or 14 oz; tofu). Tender Bits (20 oz). Vegesteaks (14 oz). Zoyburger (19 oz). Address: 1. M.S.; 2. PhD.

628. Meiring, Desmond. 1971. *The wall of glass*. London, Sydney, Auckland, Toronto: Hodder and Stoughton. 224 p. See Chap. 23, p. 195. 21 cm.

• **Summary:** This historical novel is set in Israel. In 1948, with fierce fighting and a blockade in place, there was little

food left in the Jerusalem's New City restaurants, so Maria (a nurse) took Amos (her husband) to the hospital canteen. "They went to the counter. It was soya sausages, potatoes, cabbage. He knew they were lucky to get it."

629. Rose, Carrie; Peterson, Melinda. 1971. *The whole wheat heart of Yasha Aginsky: A vegetarian cookbook*. New York, NY: E.P. Dutton & Co., Inc. 128 p. Illust. Recipe index. 31 cm.

• **Summary:** Contains 3 soy-related recipes: (1) "Tofu." A simple recipe for how to make tofu at home from full fat soy flour, using lemon juice as a curdling agent. "Tofu, better known as bean curd, is rich in protein and mainly used in soups, much as are chopped vegetables. Save the residue [okara] to use in breads, casseroles, loafs or soup." (2) "Soy Nuts." Soaked soybeans fried a few at a time in 1 inch of hot oil, then drained and salted. "One handful gives you an enormous amount of protein." (3) "A Loving Soy Pat or Two." Deep-fried patties containing whole and chopped soybeans, miso, vegetables, tahini, and whole wheat flour.

630. Watanabe, Tokuji; Ebine, Hideo; Ohta, Teruo. eds. 1971. *Daizu shokuhin [Soyfoods]*. Tokyo: Korin Shoin. 271 p. Illust. Index. 22 cm. [134 ref. Jap; eng+]

• **Summary:** This is the best book published to date on soyfoods in Japan; however it is written in Japanese. Contents: 1. Classifications and varieties of soybeans (p. 1). 2. Physical characteristics of soybeans (p. 5). 3. Chemical characteristics of soybeans (p. 9). 4. Standards and methods of examining soybeans (p. 47). 5. Special characteristics and problems of using soybeans for food (p. 53).

6. Current status of the soybean industry in Japan (p. 63). 7. Soymilk and various types of tofu: Aburage (deep-fried tofu pouches), ganmodoki (deep-fried tofu burgers), kôri-dofu (dried frozen tofu), soymilk, and yuba (p. 75). 8. Fermented soyfoods: Natto (p. 123-40), shoyu (p. 141-67), miso (p. 168-95), fermented tofu (*rufu*) (p. 196-202). 9. Other soyfoods: Kinako (p. 203-04), soy sprouts or moyashi (p. 206-08), tempeh or tenpe (p. 209-17). 10. Quality and usage of defatted soybeans (*dasshi daizu*) (p. 219).

11. New food uses of soybeans and especially defatted soybeans (incl. 70% soy protein powder, soy protein curds, soy protein isolate, surimi gel, spun soy protein fibers) (p. 229). 12. Advice regarding supplying protein from organizations such as the United Nations and FAO (p. 257).

A 47-page translation of portions of this book (parts of Chapter 6 and all of Chapter 7) by Akiko Aoyagi and Chapters 8.1 and 8.2 by Alfred Birnbaum are available at Soyfoods Center.

Tokuji Watanabe was born in 1917. Hideo Ebine was born in 1921. Teruo Ota was born in 1926. Address: National Food Research Inst., Tokyo.

631. **Product Name:** Loma Linda Dinner Bits.

**Manufacturer's Name:** Loma Linda Food Co.

**Manufacturer's Address:** 11503 Pierce Place, Riverside, CA 92515.

**Date of Introduction:** 1971?

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, vegetable oil, soy flour, oat flour, dried yeast, salt, onion powder, monosodium glutamate, dextrose, lecithin, caramel.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in "Dinner Bits (Loma Linda)."

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned steak or burger-like product based on wheat protein.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 175. The ingredients in "Dinner Bits (Loma Linda)" are "wheat protein, vegetable oil, soy flour, oat flour, dried yeast extract, salt, onion powder, MSG, dextrose, lecithin, caramel."

632. **Product Name:** Loma Linda Tastee Cuts (Imitation Beefsteak).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1971?

**Ingredients:** In 1971: Wheat protein [wheat gluten], water, yeast extract, salt, hydrolyzed vegetable protein, MSG, dextrose, onion powder, lysine, caramel color, celery and parsley extracts.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 162. Lists the ingredients in "Taste Cuts (Loma Linda)."

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned steak or burger-like product based on wheat protein.

Ad in Natural Foods Merchandiser. 1984. Feb. p. 113. "A lot more than meats the eye. Loma Linda Foods taste great."

633. **Product Name:** Lange Breakfast Style Vegetable Links.

**Manufacturer's Name:** Nu Vita.

**Manufacturer's Address:** -

**Date of Introduction:** 1971?

**Ingredients:** In 1971: Wheat gluten, potato meal, filberts, peanuts, unbleached flour, brown rice, dehydrated onion and garlic, hydrolyzed vegetable proteins, vegetable oil, soy sauce, salt, seasonings, processed in water and condensed

smoke.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 3rd ed. p. 161. Lists the ingredients in “Lange Breakfast Style Vegetable Links (Nu Vita).”

634. Heindel, Max. 1972. *New age vegetarian cookbook*. 3rd ed. Oceanside, California: Rosicrucian Fellowship. 492 p. Index. 21 cm. 1st ed. 1968.

• **Summary:** Soy-related recipes: Soybean milk as a substitute for cow’s milk (p. 14; it contains twice as much calcium, and has a higher protein value). About vegetarians (p. 17-18; the first law of occult science is “Thou shalt not kill”). Soy beans (p. 19-20; “Only in recent years has the soy bean gained acceptance in the Western World.” Nutritive value, fresh green beans, sprouts, oil, soy flour, toasted soy beans [soynuts and soynut butter], shelled beans are nutritious as green vegetables, [whole dry] soybeans, soy grits, making soy bean sprouts at home). Soya milk (from soya beans, p. 126). Soy milk (from soy milk powder, p. 126). Soya pineapple tonic (drink with soya powder, p. 128). Soya carob bread (with powdered soy milk, soya carob flour, and soybean oil, p. 141). Soya muffins (with soya flour, p. 146). Soya flap jacks (with sour soya milk, p. 156). Soy waffles–wheatless (with Soya Powder, p. 158). Vegetable soy milk soup (with soy bean powder and “soy butter,” p. 182). Soy noodles (with soybean flour, p. 184). Soy sponge balls (with soy flour, p. 184). Pastitsio (with soy noodles, p. 200). Baked soy beans (p. 202). Soy cheese (tofu) (made from soybean milk coagulated with lemon juice, p. 203). Soy beans and zucchini (p. 204). Soy bean patties (p. 205). Soy beans and vegetables. Baked soy cheese supreme ([tofu], p. 205). Soy slice (with “soy nuts” and peanuts, p. 206). Soy bean loaf (p. 207). Soybean omelet (with soybean pulp [see p. 241–ground cooked soybeans], p. 222).

Vegetables–Soybeans: Introduction. Soybean medley (p. 239). Cooked soybeans (p. 240). Baked soybeans. Soybean casserole. Soybean pulp (p. 241). Soybean soufflé. Soy waffles (p. 241). Soy gravy (with soy sauce, p. 318). Soybean stuffing (with canned soybeans, p. 331). Soy grits stuffing (p. 332). Soy bean butter (with soybean flour, water, and oil, p. 481).

Note: The author’s name “Max Heindel” is printed on the spine but not on the title page or other front matter. He is also the author of numerous other books published by the Fellowship, advertised in the back of the book, such as: Occult principles of healthy and healing. The message of the stars. Mysteries of the great operas. Gleanings of a mystic. Simplified scientific astrology. The Rosicrucian cosm-conception.

Also discusses: Almonds, nutmeat (mostly peanuts, some soybean meal), peanuts, sesame butter, sunflower seeds. Address: Rosicrucian Fellowship, International Headquarters, Mt. Ecclesia, P.O. Box 713, Oceanside,

California 92054.

635. Shufflebarger, Virginia. 1972. Menu ideas using February’s plentiful foods. *Washington Post, Times Herald*. Feb. 17. p. E3.

• **Summary:** These family-tested menus feature foods that are “officially listed as Plentiful Foods by the U.S. Department of Agriculture.” A logo shows the USDA’s “Plentiful Foods” logo.

Peanuts contain as much protein (about 26%) as an equal amount of cooked hamburger or cheddar cheese. They are also a good source of food energy, B vitamins, and minerals.

“Eggs are such a good source of protein that they, like nuts, are counted as meat alternatives.”

636. Huang, Su-Huei. ed. 1972. *Chinese cuisine: Wei-Chuan cooking book*. Taipei, Taiwan: School of Home Economics, Wei-Chuan Foods Corp. 181 p. Illust. No index. 22 cm. [Eng]

• **Summary:** On each page is one recipe and a half-page color photo of the prepared dish. The title of the recipe is written in English in large bold letters and is also given in (to the right) in small Chinese characters, just above the number of servings. Most of the recipes call for ¼ to ½ teaspoon of MSG; many call for soy sauce.

On unnumbered pages at the front of the book are (1) A two-page color photo, on a light blue background, of 39 special ingredients, each numbered, with the numbers and names across the bottom of the pages. These include: “9. nori. 24. pickled plum (*umeboshi*). 25. bean curd noodle [pressed tofu noodles]. 30. bean curd wrapper (*pronounced ‘bai ye’*) [pressed tofu sheets]. 35. bean curd skin [yuba in large, semicircular thin sheets].

(2) Description of some other special ingredients: “Hot bean paste (*pronounced ‘la jiao jiang’*). This is made with red peppers [and soy beans] and has a very hot taste.” “Sweet bean paste (*‘t’ien mien jiang’*). This is made with steamed, fermented bread (black color).” Note 1. Why is this called “Sweet bean paste”? What kind of beans are used to make it?

“Soy bean paste (*‘do ban jiang’*). This is made with fermented soy beans (black color).” “Fermented black bean (*‘do shr’*). This is black [soy] beans which are steamed, then marinated in soy sauce or salt.” “Pickled bean curd [fermented tofu] (*‘do fu ru’* or *‘Chinese cheese’*). This is bean curd which is dried and then pickled; there are many different kinds with different seasonings.”

(3) Helpful hints: “In all recipes you may substitute Worcestershire sauce for dark vinegar.”

In Chapter 3, “Pork and beef,” soy related recipes are: Shredded pork with sweet soy bean paste (with 1.3 tablespoons “sweet soy bean paste,” p. 39). Note 2. This is the earliest document seen (Feb. 2009) that contains the term “sweet soy bean paste.” See also p. 104 below.

Pork ribs with dried black fermented beans (p. 41). Pork in preserved bean sauce (p. 42).

In Chapter 4, “Sea Food,” is a recipe for Steamed carp with fermented black beans (p. 64).

In Chapter 5, titled “Bean curd and eggs” (p. 102-15) are recipes for: Stewed bean curd (with “½ squares bean curd”). Assorted dish with hot sauce (with “½ tablespoon hot soy bean paste, ½ tablespoons sweet soy bean paste,” p. 104). Bean curd stuffed with minced pork. Ma-Po’s fried bean curd with pork. Bean curd leaf rolls with minced pork (With “bean curd wrappers”). Beancurd noodles with celery salad (with “4 oz. {store-bought} bean curd noodles”). Vegetarian chicken (with “16 bean curd sheets”).

Also: Green peppers stuffed with chopped meat (p. 122, with “1 tablespoon fermented black beans, crushed”). Bitter melon stuffed with fermented black beans (p. 126, with “2 oz. fermented black beans”). Eggplant with bean curd skin (p. 133, with “1 sheet beancurd skin” and “1 sheet nori” [sea vegetable]). Bean curd in earthen pot (p. 142, with “3 squares bean curd”). Address: 19 West Nanking Road, Taipei, Taiwan.

637. Aihara, Cornelia. ed. 1972. *The dô of cooking* (Ryorido). Vol. 1. Macroguide No. 13. San Francisco, California: George Ohsawa Macrobiotic Foundation. 109 p. Illust. No index. March. 25 cm.

• **Summary:** All recipes in this macrobiotic cookbook are numbered. Contains information on soy sauce and miso (p. 44-45). Soy-related recipes include: “Top of stove” casserole noodle soup (with “dry tofu” [dried-frozen tofu] and fried wheat gluten, p. 58). Fried whole wheat noodles (with seitan, p. 60). Homemade noodles with soup (and barley miso, p. 61). Onion miso (p. 62). Rolled cabbage with tofu (p. 63). Wheat gluten (p. 71, made from 10 cups whole wheat flour and 4 cups unbleached flour). Seitan (p. 72). Fresh wheat fu (2 versions). Serving recipes—boiled fu (p. 73). Fried fu—gluten cutlet. Shish kebab (with cooked fu, p. 73-74). Making tofu (at home using 3 cups soybeans and nigari, p. 75-76). Making nigari (p. 76). Quantity tofu preparation (using 10 lb soybeans). Okara or onohana (sauteed with soybeans and vegetables, p. 76). Tofu with kuzu sauce (p. 78). Fried tofu. Shinano-age (Fried tofu with buckwheat, p. 79). Kaminari Tofu (Thunder Tofu, p. 79). Nori-maki (Tofu rolled in nori, p. 80). Age-tofu (stuffed tofu, variation, p. 80-81). Miso salad dressing (p. 90). Bean sprout miso salad (p. 91; it is not clear what kinds of beans the bean sprouts are made from—probably mung beans). Gamodoki ([Ganmodoki] mock goose; p. 99-100).

Note 1. This is the earliest (and only) English-language document seen (April 2013) that contains the word *gamodoki* or the term “mock goose,” both of which refer to deep-fried tofu burgers.

French bread made with gluten water (p. 104). Amazake is not mentioned. Some recipes call for chicken or fish as

ingredients.

Note 2. This is the earliest cookbook seen (July 2005) that gives a recipe for making seitan, as follows: “1 T. [tablespoon] dark sesame oil. 1 T. minced gingerroot. 1-2 cups soy sauce. 5 cups cold cooked gluten. Heat oil in a sauce pan, add minced ginger (use only fresh ginger) and saute. The amount of soy sauce used depends upon how long you intend to store the Seitan. Use a larger amount of soy sauce for longer storing and refrigerating. Add soy sauce, bring to a boil, and drop in pieces of gluten. Cook on low heat for three hours, stirring frequently. Remove cover and continue cooking until excess liquid is absorbed and evaporated. Seitan is ideal as a seasoning in noodles au gratin, stews, cooked with vegetables, etc. It will keep for long periods of time in the refrigerator.”

After Volume 2 of this series of four seasonal cookbooks was issued, Volume 1 was subtitled “Spring Cooking.” Address: San Francisco, California.

638. Wiener, Joan. 1972. *New food freaks. Seventeen.* March. p. 134, 156, 158.

• **Summary:** This entire issue is about California. When the writer first came to California in 1967, it blew her mind. It was everything she had wanted back east but couldn’t get. Lots of sunshine, great vistas, abundant organic food, bags of brown rice, refrigerators packed with honey ice cream and goat’s milk yogurt, crates of California fruits and vegetables “untouched by man-made chemicals. It was food-freak heaven!... Since then the natural food scene has exploded. There are longhair-owned restaurants and stores with names like “The Radiant Radish” (in Los Angeles), “Wholly Foods” (Berkeley), “The Good Earth” (Fairfax), and “Agape Natural Foods” (San Francisco). Hundreds of young people are going back to the land and to farming. Thousands more are buying organic foods at natural food stores. New Age Natural Foods is a huge, magnificent, almost unbelievable natural foods supermarket on California Street in Palo Alto—featuring pretty, healthy young salespeople, a huge produce section, a take-out deli (she watched as someone made meatless sesame burgers with chickpeas and miso), fresh pressed juices and information—such as free pamphlets on recycled paper with titles like “The Sugar Story,” “The Oil Story,” “The ‘Not’ List.” The manager, Randy Fishel, age 25, has been in business for 6 years. Randy says that when Fred Rohe opened New Age [in San Francisco] in 1969, the customers were mostly hip long-hairs. Today, 35% of the customers are the wives of doctors and lawyers. Also in 1969 Fred Rohe and Randy created Organic Merchants (OM), the only trade association for natural food stores; today there are 110 members—“mostly freaky little stores run by young people.” OM is very concerned with quality control.

Photos show: (1) Jim Baker and Robin Baker, owners of The Source restaurant, seated at a table under an awning. (2) Warren Stag at his restaurant, H.E.L.P. Unlimited.

(3) Customers weighing their purchases at New Age supermarket. Address: San Francisco.

639. Robinson, Radcliffe F. 1972. What is the future of textured protein products? *Food Technology* 26(5):59-60, 62-63. May.

• **Summary:** Contents: Introduction. How it all began. Two types of products developed: Spun protein (1957), and extruded protein (“Soy flour, soy concentrate, or soy isolate—individually or in combination, with or without fibers—can be combined with other ingredients, including colors and flavors, and extruded to form beef-like strips, meat-like nuggets, or various other analogs in various shapes and sizes. The extruded products are usually sold as a dehydrated ingredient for use in place of or in conjunction with fresh meat.”) Products improved: New uses and products, improved characteristics, specifications, supply, and cost. Effect on industry. Effect on institutions. Effect on consumers. Educational program necessary. Major effort required (The plant protein industry has great potential).

“How it all began: Dr. John Harvey Kellogg started the plant protein industry in 1866. He was one of the early pioneers in the field of nutrition who are today referred to as food faddists.”

“In 1879, Dr. Kellogg married a girl from New York whose hobby was running an experimental kitchen. They worked together to invent the toasted wheat flake, decaffeinated coffee, and a peanut butter and also made many clever products which tasted vaguely like beef or pork or veal—the first protein analogs. Dr. John Harvey Kellogg created an industry, but he never became a part of it. Plant proteins per se had no economic place in the food picture of 1879 when meat was plentiful, and his meat analogs were destined to be used only by vegetarians who for religious, ethnic, or health reasons preferred not to eat meat.

“He died in 1942, probably one of the greatest serendipitists of our times. Although he had pioneered the plant protein industry as a healthful and expedient way to escape the putrefactive and disease-causing factors in the meat and perishable commodities of his time, what he really did was develop a means of nourishing a world with high quality protein when the price of meat or its availability become factors in family nutrition.

“Plant protein products today differ greatly from the prototype veal steaks which Dr. Kellogg and his wife made from fresh wheat gluten.” Address: Manager, Product Development- Food Ingredients, Marschall Div., Miles Laboratories, Elkhart, Indiana 46514.

640. Conrat, Maisie. 1972. Soybean cookery. *Organic Gardening and Farming* 19(7):89-93. July.

• **Summary:** Discusses the benefits of soybeans and their products: whole soybeans, soy flour, tofu, miso, and soy sauce.

“If you go into a natural food store today, you will find soybeans available in many forms. In some stores you’ll find two or more varieties of whole beans as well as soy grits and soy meal, soy powder and soy flour. Most stores also carry roasted, salted soy nuts and a kind of soy cheese called tofu. They will have noodles, spaghetti, and macaroni made from soy; and they will also carry exotic soy products like miso. This may seem like a lot of things to get from one kind of bean, but in Japan, where soy is considered a protein staple, you will find more products yet...”

“Both tamari soy sauce and miso are made from fermented soy beans. (Regular commercial soy sauce has been adulterated with various chemicals to simulate fermentation.) Miso is a thick paste made from black [not true] soybeans and rice, and has the same flavor as tamari soy sauce. You can use miso as you would beef extract in making soups, stews and sauces.

“Tofu is a kind of soy cheese. It is widely used throughout China and Japan, where it is available in many forms. Tofu is made from clabbered soy milk, just as cottage cheese is made from clabbered cow’s milk. It is very mild and delicate, so you will probably want to serve it in a sauce or soup that has plenty of character.”

Contains recipes for: Apple soy crisp (with soy meal). Soy pancakes (with soya flour). Soy cheeseburgers (with soybeans). Soy balls (with soy powder).

641. *Food Processing (Chicago)*. 1972. Color and “crunch” at a fraction of the expense. Textured vegetable garnishes simulate mushrooms, peppers. 33(7):F12-F13. Foods of Tomorrow section. Summer/July.

• **Summary:** Discusses Mira-Tex 315 (imitation unflavored mushrooms, cost \$0.57/lb), and Mira-Tex 310-7 and 310-8 (imitation red and green bell peppers, \$0.80/lb), varieties of textured soy flour made by A.E. Staley Manufacturing Co., Industrial Products Group, 2200 Eldorado St., Decatur, Illinois 62525.

“Although the initial area of acceptance for textured vegetable protein has been in meat analogs, partial meat replacers, and binders, a new important area for use of these ingredients is opening. Nutritious garnishes formulated with textured vegetable proteins perform better than dry vegetables in many applications, and add color and ‘crunch’ at much lower costs than dehydrated or freeze-dried ingredients...”

“Suggested applications for the unflavored mushroom imitators include dry soups, gravies, sauces, pizza and spaghetti sauces, and various processed or dry ethnic style foods.

“They also replace bell pepper... Suggested uses include ala king mixes, soups, ‘fiesta’ corn, frozen or canned main dishes, dehydrated casseroles, and dips.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “meat replacers”

(or “meat replacer”—with any combination of hyphens or quotation marks).

642. Worthington Foods, Division of Miles Laboratories. 1972. Happy cooking: With recipes by Worthington (Leaflet). Worthington, Ohio. 3 panels each side. Each panel: 22 x 9 cm. Aug.

• **Summary:** Contains ten recipes using the following Worthington products: Frozen Chicken Style Slices. Wham (16 oz can). Granburger (dry). Prosage (frozen). Choplets (20 oz can). Veja-Links (19 oz can). Vegetable Skallops (20 oz can). Vegetarian Burger (20 oz canned). Soyameat Fried Chicken Style (13 oz can). Non-Meat Balls (19 oz can). The cover is gold and black on white. Address: Worthington, Ohio 43085.

643. **Product Name:** GranBurger (Dehydrated Granular Burger-like Product).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1972 August.

**Ingredients:** In 1975: Soy protein concentrate, Fibroprotein [spun soy protein fiber], isolated soy protein, onion powder, HVP, sucrose, salt, caramel color, artificial color, niacin, iron, calcium pantothenate, vitamin B-6, riboflavin, thiamin, vitamin B-12.

**Wt/Vol., Packaging, Price:** Dehydrated in 10 oz Pure Pak paper carton (like milk). Retail for \$2.70 (7/90, California).

**New Product–Documentation:** Worthington Foods, Division of Miles Laboratories. 1972. “Happy cooking: With recipes by Worthington” (Leaflet). Worthington, Ohio. 3 panels each side. Contains a recipe using Granburger (dry).

It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a dehydrated beef-like product based on spun soy protein fiber.

Predicasts. 1974. World Manufactured Soybean Foods. p. 13. Horan. 1974. Meat analogs. p. 380. This product is made of textured soy flour (50% protein).

Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18. The package is a Pure-Pak gable-top carton (like a milk carton). The label is orange, brown, red, and white. 10 oz. 283 gm. “Vegetable protein granules. Artificial beef flavor. Contains no meat. Use like ground beef. Makes over 1.8 pounds.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet*

*Manual, Including a Vegetarian Meal Plan. 7th ed.*

Appendix A.6-27. Ingredients are now: Textured soy protein concentrate and isolate, onion powder, hydrolyzed vegetable protein, sugar, salt, artificial color, iron (as ferrous sulfate), niacinimide [niacinamide], natural smoke flavor, calcium pantothenate, vitamin B-6 (pyridoxine hydrochloride), sulfating agents, vitamin B-2 (riboflavin), vitamin B-1 (thiamine mononitrate), vitamin B-12.

644. Norman, Barry. 1972. Meat on his feet. *Guardian (England)*. Sept. 18. p. 13.

• **Summary:** The quality of life seems to get better and better: “how does Kesp grab you, for a start–ready-spun, machine-women, pre-shrunk meat made of beans. Eat it or wear it, presumably the choice is yours.”

Courtaulds says that spinning protein ““ gives the product a fibrous texture not unlike meat or chicken.””

The other night on television, Professor Jacques Monod and colleagues “were discussing the attractions of genetic engineering....” Ah, the future is beginning to take shape. Before long we will be sitting down to enjoy “roast sirloin of bean, leg of bean, and fillet of bean au poivre. Or, to put it another way, delicious, mouth-watering Kesp.”

Note 1. This is the earliest English-language document seen (Oct. 2014) that mentions Kesp, a meat alternative made by Courtaulds—probably from spun soy protein fibers made from soy protein isolates.

Note 2. This is the earliest document seen (Oct. 2014) that mentions Courtaulds in connection with Kesp. Courtaulds is a pioneering British spinning company, founded in 1794 as George Courtauld & Co. that initially spun silk and made crepe and textiles in north Essex. In 1909 Courtaulds entered the market of cellulose (man-made fibers such as viscose and acetate) in North America with the setting up of the American Viscose Corporation. Kesp is also made from man-made fibers.

Note 3. We are not told from what kind of bean Kesp is made, nor whether it is being sold commercially. Actually, it is made from spun soy protein fibers.

645. *Times (London)*. 1972. Synthetic foods ‘watchdog’ established. Sept. 22. p. 2, col. 4.

• **Summary:** Britain’s Ministry of Agriculture, Fisheries and Food has established “an intelligence unit to watch over the research and manufacture of synthetic and unconventional protein foods for people and animals...”

“The unit, part of the ministry’s London-based food science division, will report on new processes for converting natural vegetable products and industrial residues and materials [such as petroleum] into food protein.

“Kesp, a man-made ‘meat’ with a sponge texture based on soya protein, is being launched next month by Courtaulds and RHM (Rank Hovis McDougall) to caterers in the Northwest.”

Note 1. This is the earliest document seen (Oct. 2014) that mentions RHM (Rank Hovis McDougall) in connection with Kesp, a meat alternative.

646. P.A. 1972. This homespun steak never chewed the cud! *Irish Times (Dublin)*. Sept. 29. p. 1.

• **Summary:** Starting next month, edible spun protein (“mock meat for the uninitiated”) is expected to appear on the menu of factory canteens.

Courtaulds, the fibre giant, has spent three years perfecting the techniques of spinning a steak from vegetable protein. The product is named Kesp and it will be available to hundreds of industrial workers in the north-west of England—as they join the “eating revolution.” The word “Kesp” is derived from Courtaulds edible spun protein.

Yesterday, Courtaulds held their first public tasting session in Coventry and opinions of Kesp varied widely; some thought it was a very acceptable alternative to beef and chicken. The menu included: “Kesp apple salad; Kesp mushroom vol-au-vent; Kesp stockholm (home spun meat balls); Kesp cutlets and Kesp Kromeskies, which are a sort of sweet and sour” Kesp. Kesp can be deep fried, and it often relies heavily on the use of sauces. Most recipes can be prepared in about ten minutes.

“And, assured the Kesp man, it will not cause nylon hairs to grow on your chest.”

Note: Apparently either testing or test marketing is scheduled to start in Oct. 1972. Again, we are not told from what Kesp is made.

647. Cockburn, Claude. 1972. That immanent catastrophe. *Irish Times (Dublin)*. Oct. 6. p. 12.

• **Summary:** “Experts at Courtaulds have, it is reliably reported, at length found practical means to by-pass the cow.” The new, nutritious stuff is named Kesp. Experts say it will take some time “before it gets from the laboratories’ mass production and thence to the corner kesp-shops and super-kesperies.”

By that time farmers will hopefully find “gainful employment in other spheres of useful activity,” and society will find some way of preventing “some powerful group or groups of kesp-tycoons” from cornering the marketing and driving up prices until they guarantee a 25% return on their investment.

648. **Product Name:** Tan Pups (Skewered Seitan Deep-Fried in a Breaded Batter).

**Manufacturer’s Name:** Amartseff (Nik and Joanne).

**Manufacturer’s Address:** 216 Gardner Rd., Brookline, MA 02146.

**Date of Introduction:** 1972 October.

**Ingredients:** High-protein wheat flour. Broth: Water, kombu, sauteed onions, soy sauce, fresh gingerroot. Batter: Pre-ground corn meal, fresh onions, garlic, salt, soy sauce,

some of the concentrated liquid in which the seitan had been cooked, and maybe some water.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** This was probably one of America’s first two commercial seitan products. With this extremely innovative, all-American product, seitan was transformed from a salty black seasoning into a juicy meat substitute, and the pattern was set for most subsequent seitan products in the western world.

Talk with Nik Amartseff (P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2942; by June 20: P.O. Box 135, Chesterfield, New Hampshire 03443. Phone: 603-256-6750). 1992. May 24. Nik created this product. He and his first wife, Joanne Street Amartseff, made this product together out of their home, though they never operated under a company name. Joanne now lives in Mission Hill, near Brookline, Massachusetts. They first made the product at Gardner Road in Brookline. It was sort of the Erewhon executive house. The name was a play on two words: “Tan” came from Seitan, and “Pups” came from Hot Dogs.

Nik thinks he first made seitan at home in Los Altos, California. He learned the process by reading about it, either from an early issue of *East West Journal* (which began publication in Jan. 1971), or from a book. *Order of the Universe* (which he also read later) had started publication by 1967. He and Joanne first moved to 216 Gardner Rd. in Boston in May, 1971, when Paul Hawken invited them to Boston from Los Altos, California, where he and Joanne worked at Fred Rohé’s New Age Natural Foods. Nik immediately began to work at the Erewhon warehouse and to live at the Erewhon executive house together with Paul and Dora Hawken, Bill and Renee Tara, Hy and Laura Lerner, and some single people including Wally Gorell and Bill Garrison. The women did the cooking in the house, but some of them (including his wife) also cooked the lunches for the workers at the Erewhon warehouse.

Before Nik and Joanne arrived, Renee Tara was baking ready-to-eat unyeasted macrobiotic goodies at home on Gardner Road and selling them at the Erewhon retail store. When Bill and Renee left for England, Renee asked Joanne if she would like to continue this little cottage industry. So in the early spring of 1972 Joanne stopped cooking for Erewhon and took over Renee’s business, with the help of Nik’s sister, Vera, baking at the Gardner Road house to supplement the family income. Joanne’s project was quite successful right away, in part because she did not toe the macrobiotic line very strictly. She sweetened up Renee’s strict macrobiotic line and added a number of innovative sweet baked snack foods, which apparently no one else thought of or dared to attempt, such as cookies, yeasted cinnamon-maple nut rolls, fruit tarts, and fig newtons. Nik continued to work full time at Erewhon, but during his time off he experimented with making seitan. He had two ideas: One was to use small pieces of seitan mixed with

sauteed vegetables as a filling for piroshki (small cases of dough around the filling; Nik is part Russian), and the other he called Tan Pups—skewered deep-fried seitan on a stick. Joanne recalls that they may have sold these two seitan foods a few times (she is not sure) but they were not regular items. However Nik is quite certain that for at least the last few weeks before he and Joanne moved to New York state, in order to have some extra money, they “baked like crazy” and sold Tan Pups and Piroshki.

In May 1972 Nik quit Erewhon for a while, and he and his wife moved to New York state. They returned to the Gardner Road house in Boston in Sept. 1972 and Joanne resumed baking. At this point Nik began baking with Joanne, mainly out of necessity to make some money. Their two lines of baked products were (1) Joanne’s former line of sweet snack foods, and (2) savory products (such as the Piroshki and Tan Pups). Their two seitan products were on the market by about Oct. 1972 and they soon became popular.

They made Tan Pups entirely by hand as follows: The night before make raw wheat gluten from whole wheat flour (which they bought in bulk from Erewhon). The next morning, cook the loaves of gluten in large enamel kettles with water, kombu, sauteed onions, garlic, and freshly grated gingerroot. About half way through the cooking, add soy sauce. Remove the seitan and simmer the liquid until it is reduced to about ¼ its original volume. Slice the seitan into pieces about ¾ inch square and 3 inches long (like a hot dog with a square cross-section; the traditional New England Corn Dog influenced the product concept). Set aside any scraps or trimmings to use later in making Piroshki. In a blender, prepare a thick batter (having a consistency between crepe and pancake batter) using pre-ground corn meal, fresh onions, garlic, salt, soy sauce, some of the concentrated liquid in which the seitan had been cooked, and perhaps some water. Skewer the seitan pieces from one end, then dip them in the batter (without dusting in a dry breading), and deep-fry, placing them like spokes of a wheel in cast iron pots. When they are crisp and piping hot, deliver to stores.

These savory vegetarian foods (typically 100 Tan Pups and 50 Piroshki) were sold at only two outlets: Most at the Erewhon retail store at 342 Newbury St. in Boston, and the rest at The Organic Food Cellar, also on Newbury St. At Erewhon, they were sold on (or later in) a glass case about 10 feet from the entrance of the store. The products were sold in bulk, without packaging or labels. Nik usually delivered them by 3:00 in the afternoon, which was found to be a prime selling time. Most were sold by 6:00 and almost none were left the next day. He delivered 2-3 times a week. The work was exhausting.

But there was a lot of turmoil at the Gardner Road house, so Nik and Joanne moved in with John Deming in Allston (Massachusetts), then with friends in Saugus, then to Gloucester (27 miles northeast of Boston) by Nov. 1972. At each of the 3 houses they made the Tan Pups, Piroshki, and

sweet snack foods.

In early 1973, Kathy and Mike Atherton, friends of Nik and Joanne’s (Mike was employed at the Erewhon warehouse) moved to Boston from New York. Joanne was due to have a child in June 1973. The business was too labor intensive and soon the family would need more money. So the Amartseffs gave their friends the home business (free of charge) and it was moved to the friends’ home in the north end of Boston. Nik gave them the recipes and his two outlets, and showed them how to make all the products. Nik was re-hired to work full time at Erewhon by Bill Garrison. Nik and Joanne’s son was born in June 1973.

The Amartseffs’ friends continued to sell Tan Pups and Piroshki through at least the autumn of 1973, then they moved on—and the products went off the market. The business never did have a real name.

Nik never heard of nor tasted Tan Pops, the successor of Tan Pups, made by John Weissman.

Talk with Joanne Amartseff. 1992. July 8. She just talked with Nik’s sister, Vera, who both Nik and she think has an excellent memory. Vera (who now lives in San Francisco) does not recall them making any seitan products before Nik and Joanne left for New York.

**649. Product Name:** Piroshki (Filled with Seitan).

**Manufacturer’s Name:** Amartseff (Nik and Joanne).

**Manufacturer’s Address:** 216 Gardner Rd., Brookline, Massachusetts.

**Date of Introduction:** 1972 October.

**Ingredients:** Dough: Whole wheat flour, water. Filling: Seitan scraps.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** This was probably one of America’s first two commercial seitan products. Talk with Nik Amartseff (P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2942). 1992. May 24. This product was introduced at the same time as Tan Pups, which see. To make the Piroshki, Nik and his wife, Joanne, used the same leavened dough that they used for the Cinnamon-Maple Nut Rolls. It was cut, rolled, and filled with ground scraps left over from making the Tan Pups. Then the Piroshki were deep-fried. They made typically 50 a day.

**650. Product Name:** Kesp (Meat Alternative Made from Spun Soy Protein Fibers).

**Manufacturer’s Name:** Courtaulds.

**Manufacturer’s Address:** England.

**Date of Introduction:** 1972 October.

**Ingredients:** Based on Soy protein.

**New Product–Documentation:** Norman, Barry. 1972.

“Meat on his feet.” *Guardian* (England). Sept. 18. p. 13. Discusses Kesp.

*Times* (London). 1972. “Synthetic foods ‘watchdog’ established.” Sept. 22. p. 2, col. 4. “Kesp, a man-made

'meat' with a sponge texture based on soya protein, is being launched next month by Courtaulds and RHM (Rank Hovis McDougall) to caterers in the North-west."

651. Hellman, Hal. 1972. The story behind those meatless "meats." *Popular Science*. Oct. p. 78-80, 164.

• **Summary:** Discusses the production of meat analogs from soybeans, with their economic and health advantages. The article focuses on meatlike products made from spun soy protein fibers by Worthington Foods of Ohio. Gives the history of how Robert Boyer and Henry Ford developed spun soy protein fibers.

Color photos show: (1) Spun soy protein fibers and yellow soybeans against a blue background. (2) A "meat loaf" which is half meat and half textured protein granules. (3) Worthington's Wham, a meatless-meat resembling ham, sliced and shown in a hero sandwich, a chef's salad, and with two poached eggs. (4) A casserole with "beef" chunks of meatless meat. (5) Every kind of meat that has been duplicated. (6) About 50 of Worthington's "meatless meats," most of which are canned.

Four small black-and-white photos show how spun protein fibers are made into meatless meats (such as Stripples and Add-A-Bits) in the Worthington plant. Frank Poston predicts that the "meat analogs will be generally available in supermarkets by 1975." Worthington president Jim Hagle is more cautious, putting the date at 1976 or 1977.

652. *Lancet*. 1972. Synthetic foods. ii(7785):1012-13. Nov. 11. [12 ref]

• **Summary:** To make soy protein isolates, soya beans are "pulverised, extracted with hexane (a petroleum fraction), dissolved at pH 8, precipitated with food-grade hydrochloric acid, dispersed with sodium hydroxide, and spray-dried into a powder. This powder [according to Central Soya sales material] can be used for many purposes—including sausage manufacture... Courtaulds Edible Spun Protein ('Kesp') is made from [soy] beans, and is being introduced quite honestly as an 'alternative to meat.'" Over 60% of the calories in Kesp come from animal fat.

The British diet is not deficient in protein. A 1969 food survey showed an average at-home protein consumption of 74 gm per person per day—193% of the minimum requirement.

For single-cell proteins the "problems of toxicity are far more direct. First, one has to be sure that there is no contamination of the product by microbial toxins or heavy metals, solvents, and carcinogenic hydrocarbons from the growth and extraction media. Furthermore, the high nucleic-acid content of these microorganisms means that one should not eat too much; and individuals liable to gout could be particularly at risk." Address: England.

653. **Product Name:** Bontrae Chunks (With Chicken

Flavor).

**Manufacturer's Name:** General Mills, Inc.

**Manufacturer's Address:** 9200 Wayzata Blvd., Minneapolis, MN 55440.

**Date of Introduction:** 1972 November.

**New Product—Documentation:** Ad in *Soybean Digest*. 1972. Nov. p. 27. "New from General Mills, Inc. Bontrae chunks with a flavor like chicken." "Prime chunks of textured vegetable protein add economy, versatility and variety to any menu. Use them for casseroles, salads, sandwich fillings and creamed dishes. Made from natural vegetable protein and contains no animal-poultry fats or meat, Bontrae provides complete protein and good nutrition by design. Meets nutritional specification FNS 219 for the school lunch program. (Note: FNS is USDA's Food & Nutrition Service). Bontrae is fully cooked and free-flowing frozen so it can be added to recipes without thawing. Bontrae can be used alone or in combination with poultry meat. Use a pound of Bontrae chunks where you would use a pound of fully cooked chicken."

654. **Product Name:** Protoveg Pork Chunks (Meatlike Products Based on TVP).

**Manufacturer's Name:** Direct Foods Ltd.

**Manufacturer's Address:** Greatham, Liss, Hampshire, England.

**Date of Introduction:** 1972.

**Ingredients:** TVP (made by ADM) plus flavoring.

**Wt/Vol., Packaging, Price:** 5 oz or 10 oz double cellophane bag.

**How Stored:** Shelf stable.

**New Product—Documentation:** Rose Elliot. 1972. *Not just a load of old lentils*. p. 151. Recipe for "Vegetarian Pork Chunks in Ginger Cream Sauce" calls for "1 cup Protoveg pork chunks."

Export price list from Direct Foods Ltd. 1974. Oct. 1. Protoveg comes in beef, ham, pork, or natural flavors. Sizes are 5 oz, 10 oz, 10 lb, or 50 lb. 10 products total.

655. Aihara, Cornelia. 1972. *The Chico-San cookbook*. Chico, California: Chico-san, Inc. 126 p. Illust. 22cm. by Nan Schleiger. Reissued in revised form as *Macrobiotic Kitchen* by Japan Publications in 1982.

• **Summary:** All recipes are numbered and pages are unnumbered. Soy-related recipes include: 6. Brown rice in soy sauce. 16. Black [soy] beans and brown rice. 23. Inari-sushi (with agé). 24. Ohagi of 3 colors (with roasted soybean flour and miso). 32. Ojiya (with miso or soysauce). 37. Roasted rice (with black soybeans). 38. Musubi (with miso). 55. Kinako mochi. 76. Soy bean stock. 87. Oden (with agé and soy sauce). 90. Kenchin soup (with agé). 95. Cream of onion soup (with miso). 96. Hacho miso soup. 97. Mugi miso soup. 98. Kome miso. 99. Oil miso. 100. Sesame miso. 101. Walnut miso. 102. Miso salad dressing. 103. Shiguri

[sic, shigure] miso (with scallops). 104. Tokiwa miso (with shiitake mushrooms, citron, and walnuts). 105. Oyster miso. 106. Tai miso. 108. Nuka miso zuke (vegetables pickled in rice bran and miso). 121. Miso pickles. 137. Daikon with agé. 138. Daikon with miso. 143. Turnip with sesame-miso. 159. Burdock-miso soup. 162. Burdock with miso. 180. Onion-miso sauce. 182. Scallion-miso. 191. Carrots with miso. 192. Carrots with soy sauce. 200. Dengaku (with miso). 220. Roasted soybeans. 221. Soybean soup. 222. Soybeans with vegetables. 223. Soybeans with miso. 224. Soybean tempura. 225. Mashed soybeans with tarako (cod fish roe). 226. Soybean croquettes. 227. Soybean potage. 228. Soybean muffins. 229. Kidney beans with miso. 237. Shigiyaki (small eggplants with miso). 241. Eggplant miso pickle. 267. Rolled shiso leaves with miso. 291. Tofu kuzu sauce. 292. Tofu chili-nabe. 293. Tofu with vegetables. 294. Tofu salad. 295. Okara rice. 296. Torimotsu okara (with chicken giblets). 297. Okara soup. 298. Okara croquettes. 299. Egg tofu. 308. Koi-koku (carp soup with miso). 311. Loach soup (with miso). 312. River fish with miso sauce. 320. Mackerel with miso. 335. Coltsfoot with miso. 341. Dandelion miso-ai [miso-ae]. 345. Horsetail with miso-ai. 359. Watercress miso-ai. 361. Nobiru goma miso (with wild onions). 369. Shiromiso shiru [sweet white miso soup]. 371. Nimame (black soybeans). 400. Shoyu bancha (twig tea). 408. Black bean tea. 409. Amasake (homemade from koji rice and sweet brown rice). 456. Amasake manju. 461. Soba with miso-ame. 515. Tekka (with Hacho and/or mugi miso). 516. Seitan (homemade). 517. Soy sauce (homemade). 518. Miso (homemade). 519. Tofu (homemade using nigari). 520. Nigari (homemade). 521. Amasake (homemade from koji rice and sweet brown rice flour).

Cornellia Aihara was born with a heart valve defect. She was told by doctors that she could never bear children and would probably not live past her nineteenth year. She proved them wrong on both counts. In 1955 she came to America from Japan at the invitation of Herman Aihara, a man she knew only through correspondence, and they were married. Within several years their two children were born.

Cornellia has applied herself to the teaching of macrobiotic cooking, childcare, home remedies, and philosophy since 1960. Address: Chico, California.

656. Aihara, Cornellia. 1972. *The dô of cooking (Ryorido)*. Spring, Oroville, California: George Ohsawa Macrobiotic Foundation. 125 p. Illust. by Carl Campbell. Index. 21 cm.

• **Summary:** This macrobiotic book is divided into two parts: Eleven chapters followed by 14 sections of recipes. In part one, miso is mentioned on pages 15, 35, and 51 (Condiments and spices). Recipe section IV, titled “Wheat gluten” (p. 79-82) contains recipes for: Wheat gluten. Seitan. Fresh wheat fu. Boiled fu. Fried fu—gluten cutlet. Shish kebab (using 3 strips of cooked fu). French bread (made with gluten water, p. 115).

Recipe section V, titled “Tofu” (p. 83-90) contains recipes for: Tofu making (using 3 cups green soybeans and nigari coagulant; with 11 excellent illustrations). Nigari (from gray sea salt). Quantity tofu preparation (using 10 lb soybeans). Okara or uonohana (using “3 cups soybean puree leftover from tofu making”). Tofu with kuzu sauce. Fried tofu. Shinano-agé (Fried tofu with buckwheat). Kaminari tofu (Thunder tofu). Nori-maki (Tofu rolled in nori; with illustration). Age-tofu (Stuffed tofu; with illustration).

Soy-related recipes include: Onion miso (p. 70). Rolled cabbage with tofu (p. 71). Bean sprout miso salad (p. 100; miso is called “mixed soybean puree {half mugi and half kome}.” The sprouts are probably from mung beans). Ganmodoki (Mock goose; p. 109). Gyoza filled with seitan, dipped in a mixture of soy sauce and lemon juice (p. 111-12). Address: George Ohsawa Macrobiotic Foundation, Oroville, California.

657. Brown, Edith; Brown, Sam. 1972. *Cooking creatively with natural foods*. New York, NY: Hawthorn Books. xvii + 302 p. Illust. Index. 24 cm.

• **Summary:** This vegetarian cookbook has been 35 years in the making. Edith was born in 1920, and Sam in 1917. “It really goes back to the birth of Brownies [Health Food Restaurant in New York City]. That was in 1936. In the beginning we were just a sliver in the wall, hardly a soybean’s throw from Union Square in New York City. The address hasn’t changed but *we* have.” Brownies began as a tiny shop selling natural foods to people who lived or worked in the neighborhood. Today we are a restaurant-bakery -country store complex sprawled across Siamese-twin brownstone houses.”

“The expansion of Brownies began modestly in 1938. Sam acquired a vegetable juice extractor and installed four stools in the shop. Vegetable-juice bars have long since become old hat, but the one on East 16th Street happened to be the first one in the country.

“The juice bar won a warm welcome. Customers ‘dug’ the oral vitamin shots being dispensed from the extractor. Soon people were coming from precincts far beyond the neighborhood to ‘get juiced.’ The word spread. There appeared a distinguished visitor in the person of the late Clementine Paddleford, the influential food editor of (alas, also the late) New York *Herald-Tribune*. Miss Paddleford came, sipped, and wrote rapturously about her discovery. That rave review really put Brownies on the map.” (p. xi)

In the chapter titled “The natural foods cupboard: A glossary” we find good descriptions of various soyfoods: Soyameat (canned, Chicken or Beef Style), soybean granules, soybean powder [flour], soybeans (canned, like Boston baked beans), soybeans (dried), soy nuts [oil-roasted soybeans], Stripple Zips (“Bacony, crunchy, smoky bits of vegetable protein made from soy and yeast. A wonderful meatless flavoring.”), tamari (soy) sauce, VegeBurger

(canned, made from soy, wheat, and vegetables), VegeChee [tofu], Vegelona.

Soy-related recipes include: Pizza supreme (with Fearn Whole Wheat Soy-O Mix, p. 17). Soy-stuffed mushrooms (with canned green soybeans, p. 17-18). Dill soybeans (p. 74). Triple-treat bean salad (p. 80). Crunchy soybean salad (with canned green soybeans and Chicken-Style Soyameat, p. 81). Soy-nut meatballs (with canned soybeans in tomato sauce, canned VegeBurger, soybean granules, and Toasted Soy Nuts, p. 109-10). Soy, garbanzo & millet pie (p. 126).

One chapter is titled “The miraculous soya—and other members of the clan (bean)” (p. 129-45). The introduction notes: At Brownies we feature soybeans on the relish tray, on the salad menu, and as a meat substitute. We use soybean flour in almost everything that comes out of our ovens.” Soy-related recipes include: Basic soybeans. Zippy soybean salad. Minty soybean salad. Soybean ratatouille. Scrumptious soy pudding. Soy walnut loaf. Protein casserole (with Beef-Style Soyameat). Lentil soy casserole. Tricolor bean salad (with toasted salted Soy Nuts). Exotic bean salad. Neapolitan bean salad. Peppy bean puree. Any-night beans.

Soy recipes with pasta (p. 175-78): Savory soy spaghetti. Soy spaghetti with saucy franks. Corny spy spaghetti. Spaghetti protein casserole (with soybean spaghetti, green soybeans, and Proteena). Soy elbows in parsley mushroom sauce. Oriental elbows. Soya blueberry muffins (p. 248). Crunchy soy-nut spinach cake (with soybean powder and unsalted soy nuts, p. 264).

Brownola plus (like Granola, p. 168). Address: New York, New York.

658. Brown, Lester R. 1972. *World without borders*. New York, NY: Random House. 395 p. [30+ ref]\*

• **Summary:** The *New Yorker* described *World Without Borders* as “an encyclopedic, lucid assessment of some of the world’s persistent problems... and some carefully documented, highly plausible suggestions for solving them. [Brown] persuasively argues... that the day of the militaristic nation state is over, and that a unified global society is the only hope for survival.” This book was about globalization well before the concept was widely used.

General Mills’ Bac-O’s are seen as a meat substitute. Address: Washington, DC.

659. California Health and Safety Code: Food, Drug and Cosmetic Law. 1972. Sacramento, California. Div. 21. Chap. 5. Article 7. Sections 26595-26599.

• **Summary:** Article 7 (popularly referred to as the “Brigg’s Amendment”) is titled “Hamburger and imitation hamburger.” “Article 7 was added by Stats. 1972 [Statutes], c. 1364, p. 2714, #1, operative July 8, 1974.” It defines “hamburger” and says that if it contains added water, binders, or extenders, it becomes “imitation hamburger, and must be labeled as such. The term “restaurant” is defined to

include schools, hospitals, vending machines or any other place where food is served to the public. “(a) If imitation hamburger is sold or served in restaurant a list of ingredients thereof shall appear on the menu, or, if there is no menu, such information shall be posted as state department shall by rules and regulations require. No list of ingredients, however, shall be required for imitation hamburger which contains not more than 10 percent added protein and water, and which does not contain other binders or extenders.

“(b) No restaurant shall use the terms ‘hamburger,’ ‘burger,’ or any cognate thereof in any advertisement, or menu to refer to any imitation hamburger...” Note: This is a revision of the 1939-40 California law. Address: Sacramento, California.

660. Elliot, Rose. 1972. *Not just a load of old lentils*. Liss, England: White Eagle Publishing Trust. vii + 216 p. Portrait. Illust. Index. 22 cm.

• **Summary:** A vegetarian cookbook. Soy-related recipes include: Soya mayonnaise (with soya flour, p. 73). Soya bean and sultana curry (p. 110-11). Nuttolene with lemon mayonnaise sauce (with nuttolene, or a 13 oz can of chicken flavoured soya protein, drained and rinsed, p. 150). Textured vegetable protein curry (with Protoveg or Vitpro chunks, p. 151). Vegetarian pork chunks in ginger cream sauce (with Protoveg pork chunks, p. 151). Address: England.

661. Harris, Thelma Bruner. 1972. *Good foods for good health: A cookbook featuring menu tips and easy-to-prepare recipes calling for the use of vegetables, fruits, grain foods, nuts, and dairy products*. Nashville, Tennessee: Southern Publishing Assoc. 223 p. Illust. Index. 22 cm.

• **Summary:** A Seventh-day Adventist vegetarian cookbook. Soy-related recipes include: Soy-wheat bread (with soy flour, p. 27). Tofu patties (p. 75). Soybeans—Boston style (if possible use “the immature or quick-cooking variety,” p. 84). Soybean croquettes (with cooked soybeans, p. 84). Green soybean succotash (with green soybeans [not clear whether fresh or dry], p. 84-85). Soybean loaf no. 1 and 2 (with pureed soybeans, p. 85). Prosage croquettes (with Prosage sausage-like food made by Worthington Foods, p. 112; other entree recipes on pages 112-20 used brand-name soy and/or gluten products made by Seventh-day Adventist food companies, such as Veelets, Yum, Proteena, Soyameat frozen White Meat, Choplets, Soyameat Fried Chicken Style, Vegeburger, Wham, and Vegelona). Soy sugar cookies (with soy flour, p. 171).

662. Hewitt, Jean. 1972. *The New York Times natural foods cookbook*. New York, NY: Avon. 434 p. Index. 18 cm. [147\* ref]

• **Summary:** Contains a surprisingly large collection of soy-related recipes, and several innovative uses for tofu, considering this relatively early date. The following recipes

list soy in the title. Note that all use cooked or dry soybeans as the main soy ingredient unless otherwise stated in the title or in parentheses: Soy cheese appetizer (with tofu, p. 7). Soybean dip (p. 14). Vegetable-soy soup (with “1½ cups cooked soybeans {or 15½-ounce can, drained; see p. 157},” p. 47). Soy chili (p. 73). Soy meat loaf (p. 80). Vegetarian sausages (p. 111). Soybean soufflé (p. 111). Soybean and nut loaf (p. 112). Soybean and vegetable casserole (p. 112). Pressure cooked soybeans (p. 113). Baked soybeans I and II (p. 113-14). Soy burgers (p. 115). Soy-rice burgers (p. 115). Soybean patties (p. 116). Broiled soy cakes (p. 116). Curried soybeans (p. 155). Soybean pistou (p. 156). Soybeans with tomato sauce (p. 156). Cooking dried soybeans (with 2 cups {1 pound} dried soybeans, green or yellow,” p. 157-58). Soybean cheese or curd (p. 158; how to make tofu at home using 1½ cups dried yellow soybeans and 1/3 cup lemon juice; this recipe will not work since the soybeans are never ground!). Marinated soybean salad (p. 181). Avocado-tofu dressing (p. 187). Basic tofu dressing (p. 190). Corn meal mush and soy grits (p. 211). Soya-carob bread (with soy flour, p. 257). Soy butterscotch pudding (with soy milk, p. 322). Soy nut coffeecake (with soy flour, full fat or low fat, p. 353). Soya cookies (with soy grits, p. 376). Soy mayonnaise (with soy flour, p. 394). Soybean spread (with “½ cup mashed cooked soybeans or soy flour,” p. 394).

Although this book is not wholly vegetarian, it does contain a large selection of vegetarian entrees.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Soy burger” (or “soy burger”), regardless of capitalization.

663. Horton, Lucy. 1972. *Country commune cooking*. New York, NY: Coward, McCann & Geoghegan. 232 + [8] p. Illust. by Judith St. Soleil. Index. 24 cm.

• **Summary:** A nostalgic memoir (for those who came of age at this time) of the world of young Americans in communes in the early 1970s, with many fine illustrations (see p. 27). The author, raised in New York City and educated at Bryn Mawr (Pennsylvania, with a major in classical archaeology), earned her traveling money by working as a live-in maid and cook for a rich “Park Avenue Lady” before embarking on the project that became this book. She hitchhiked to San Francisco, arriving in June 1971, then spent most of the next year visiting 43 communes in 12 states and Canada, and collecting recipes from each. There she found “a New Age of Food Consciousness.” The main topic of conversation and common interest at these intentional communities was not God or sex, but food. This book, with her 150+ favorite recipes, features natural and organic foods (with lapses). Most of the recipes from California and the West Coast are vegetarian, but in New Mexico and eastward (especially New England) she was “surprised to find that vegetarianism was more the exception than the rule” (p. 81). Thus, Chapter 3 is titled “Meat (and one fish).” There are recipes for chicken,

fish, deer, goat, beef, etc.

The Introduction notes (p. 15): “The *sine qua non* of commune cooking is tamari soy sauce, an unspeakably delicious fermented Japanese product available in natural foods stores which bears no resemblance to commercial soy sauce” \* (Footnote: \*”Kikkoman soy sauce, available in supermarkets, tastes like tamari but contains a preservative”).

“1. Soups: The commune soups I sampled were typically of mixed vegetables with a tomato or miso (p. 159) base” (p. 27).

Tamari chickbits (p. 94, with chicken). Note about soy grits (p. 114). Sprouts (p. 135-36, many kinds including alfalfa, mung beans, soybeans, from Terra Firma, Oregon). Miso Almond Sauce (p. 158-59). Tamari gravy (p. 159). Soy-related recipes include: From Chapter 2, “Vegetarian main dishes”—Donna’s soyburgers (p. 60-61, with whole soybeans, from California). Soy cheeseburgers (p. 61-62, with whole soybeans, from Moon Garden, Oregon). Suzy’s soybean casserole (p. 63-64, from Breadloaf, New Mexico). Baked soybeans (p. 64-65, from Woolman Hill School, Massachusetts). Larry’s tofu (soy cheese) (p. 65-68, homemade tofu from whole soybeans, from Om Shanti, Mendocino County, California). Breakfast cereal with roasted, salted soybeans (p. 163). Soy spread (p. 227, with soy flour, from The Motherlode, Oregon). Soy nuts (p. 229-30, baked, soaked soybeans with oil and salt).

A photo on the rear cover shows the author, age 27, with long blonde hair, granny glasses, and blue denim overalls. Says Raymond A. Sokolov: “Lucy Horton has done more than collect exotic recipes... she has assembled the crucial artifacts of a movement within The Movement.”

Also discusses (see index): Adelle Davis, gluten (wheat), granola, ground nuts, macrobiotic diet, peanuts. Address: Derby, Vermont.

664. James, Isabel. 1972. *Vegetarian cookery*. London: Corgi. 128 p. Illust. by Geoffrey L. Rudd. Index. 14 cm. Series: Corgi mini-books.

• **Summary:** Soy-related recipes include: Soya sausage roll filling (with Soyolk or Hi-soy soya flour, p. 78). Quick bean pie (with whole soybeans, p. 79).

665. Smith, A.K.; Circle, S.J. 1972. *Appendixes: Glossary of soybean terms: Terms used in conjunction with the processing of soybeans and the utilization of soy products. Official standards of The United States for soybeans*. In: A.K. Smith and S.J. Circle, eds. 1972. *Soybeans: Chemistry and Technology*. Westport, CT: AVI Publishing Co. xiii + 470 p. See p. 438-56. Appendix. [4 ref]

• **Summary:** Glossary: Soybean(s), soybean processor, soybean processing (solvent extraction, mechanical processing, pre-press solvent processing), soybean oil, crude soybean oil, edible crude soybean oil, refined soybean oil, edible refined soybean oil, hydrogenated soybean oil,

degummed soybean oil, winterized oil, technical grade refined soybean oil, soybean fatty acids, soybean soapstock, acidulated soybean soapstock, soybean lecithin, break material, sludge.

Soybean products: Ground soybeans, ground soybean hay, soybean hulls, solvent extracted soybean feed, soybean meal, dehulled solvent extracted soybean meal, soybean mill feed, soybean mill run, heat processed soybeans, nitrogen free extract (N.F.E.).

Standard specifications: Soybean chips, soybean cake, 41% protein soybean meal, soybean flakes, 44% protein soybean meal, dehulled soybean flakes, 50% protein solvent extracted soybean meal.

Soybean proteins: Soy flour, soy grits, soybean meal, defatted soy flour, low-fat soy flour, high-fat soy flour, full-fat soy flour, lecithinated soy flour, protein, isolated protein, toasting, textured protein products (TPP), meat analogs.

Definitions: Soy grits and/or soy flour, isolated soy protein, soy protein concentrate.

Vegetable fats: Margarine, vegetable shortening.

Oriental foods: Soy sauce (shoyu), soy milk, miso, tofu, dried tofu, aburaage, kinako ("Ground toasted soybeans, used for making Japanese-style cakes" [confections]), namaage, ganmodoki, tempeh, natto, yuba, moyashi (soybean sprouts), vanaspati, ghee.

Official standards of the U.S. for soybeans. Soy flour standards. Analytical data range of commercial soy protein. Some U.S. companies marketing soy protein food ingredients. Nitrogen solubility index (NSI). Protein dispersibility index (PDI). Urease activity. Water absorption of soy flour. Address: 1. Oilseeds Protein Consultant, New Orleans, Louisiana; 2. Director, Protein Research, Anderson Clayton Foods, Richardson, Texas.

666. Snider, Nancy. 1972. Soybean (protein) recipe ideas. New York, NY: Arco Publishing Co., Inc. 112 p. Illust. Food category / recipe index. 18 cm.

• **Summary:** Contents: Preface. About this book. Who makes what: Archer Daniels Midland Co. (TVP), Central Soya (Promosoy), Far-Mar-Co (Ultra-Soy), General Mills, Inc. (Bac\*os, Bontrae), The Griffith Laboratories, Inc., Ralston Purina Co. (Edi-Pro), A.E. Staley Co. (Mira-Tex), Swift & Co. (Texgran), H.B. Taylor Co. (Textrasoy), Worthington Foods, Inc. (Fibroprotein). The facts about soy protein. Soy what? Cooking with soy protein. Cover-ups. Things to do with bacon-flavor soy protein. Soy cooking tips. Breakfast ideas. Breakfast put-ons. Appetizers. Soups. Garnishes for soups. Entrees. Soy sandwiches. Breads. Desserts. Food category / recipe index (within each major food category {appetizers, bread, breakfast ideas, desserts, etc.}, recipes are listed alphabetically).

667. Parkin, Michael. 1973. A committee test for Kesp. *Guardian (England)*. Jan. 24. p. 7.

• **Summary:** "Secrecy was lifted yesterday from trials at three Leeds schools where Kesp, a vegetable protein made by Courtaulds, has been substituted for meat in school meals." But the children were not told of the substitution or of what they were eating.

The chairmen of two committees decided that the children should be informed when Kesp was included in their meals. "If parents objected, the children would be offered another dish." The experiment is scheduled to continue until the end of February.

Kesp, which is made from field beans, "has occasionally been included in meals at a junior high school, a middle school, and a high school in recent weeks. It was well disguised in made-up dishes described as cottage pie or savoury pie."

A table shows that Kesp contains more protein, fat, and calcium, and less carbohydrate than steak. It also is said to cost about half the price of meat.

Note: Leeds is in northern England; historically it was part of the West Riding of Yorkshire.

668. Rowe, Philip. 1973. Learning from silkworms: Textiles. *Guardian (England)*. Jan. 29. p. 20.

• **Summary:** Less than 100 years, humans started copying the silkworm and the spider, by extruding viscous substances to make filaments for textile industry. The carbon fibers, based on a tow of acrylonitrile, were first introduced to combine strength and lightness in critical aircraft parts.

Kesp, an "alternative to meat" made by Courtaulds in the UK, also starts life as a continuous extruded tow. It is based on protein extracted from field beans. "Coming from a fibre-oriented research organisation, Kesp appears to differ from any of the other meat alternative protein products:..." It has a texture that is remarkably similar to that of meat, in part because of its short staple fibres about half an inch in length.

669. Misko, Karin. 1973. SeVa longevity cookery cookbook. Columbus, Ohio: Soybean Press. viii + 113 p. Jan. Illust. by Judy Post. Edited by Debora Bittaker. Introduction by Catherine Bicknell. 22 cm. [45 ref]

• **Summary:** A vegetarian cookbook from the SeVa Restaurant, printed on 100% recycled paper. Soy-related recipes include: Soy milk (p. 18). Tahini milk. Nut milk (p. 18). Miso vegetable soup (p. 25). Variety muffins (with soy flour, p. 36). Salad for Virgo (with green soybeans and roasted soybeans, p. 45). Miso-tahini sauce (p. 51). Brown sauce (with Tamari soy sauce or miso, p. 51). Stuffed cabbage rolls (with green soybeans and brown rice, p. 65). Campfire dinner (with cooked or canned soybeans, p. 65). Soy bean loaf (p. 73). Roasted soybeans (dry roasted, p. 84). Granola (with Soya granules, p. 84).

The glossary (p. 98-100) includes listings for cold-pressed oils, fertilized eggs, ginseng, gluten [sic, gluten],

miso, seaweed, tamari soy sauce, and tofu (“a bean curd made from soybeans which is used for flavoring soups and sauces.”)

Brand name products we use (p. 101; Note: Each contains soya). Smokeene, Soyagen (spray-dried soymilk), and Vegeburger (Loma Linda Foods). Soya Granules (Fearn Soya Foods). Stripples (bacon alternative from Worthington Foods). Vege-Sal (Modern Products; flavored with soy bean extract). “Smokeene: smoked seasoning spice made from toasted soy powder, dried yeast, soy sauce and condensed wood smoke. It is used for flavoring soups and sauces.” Address: Columbus, Ohio.

670. *Mainichi Shinbun*. 1973. Zen no kokoro = ôtôfu [The heart of Zen = Tofu]. Feb. 20. [Jap]

• **Summary:** A large black-and-white photo shows William Shurtleff making tofu burgers at the tofu shop of Toshio Arai near Tokyo Japan. A processing / utilization chart drawn by Shurtleff shows how soybeans are transformed into thick soymilk (which is made into kinugoshi-dofu, or yuba), or thin soymilk (which is made into any of 7 types of tofu: oboro-dofu, aburage, o-tofu [*momengoshi*], atsuage, ganmodoki, yaki-dofu, or koya-dofu). Bill Shurtleff, age 31, comes from America, the world’s main soybean producing country. He is living with the Aoyagi family at 278-28 Higashi Oizumi, Nerima-ku, Tokyo. His Book of Tofu is scheduled for publication in Sept. 1973. The article describes his appearance, then notes that he is a vegetarian doing Zen practice in Japan, which he feels is a very materialistic society. He is writing a book on tofu in large part to try to do something about the world food crisis. He is studying tofu at Sengen-ya under Mr. Toshio Arai. Mr. Arai notes that he has not yet finished his internship since he cannot yet make aburage by himself, but he should be “done” in about 3 months. Bill does translation work for his father’s company and earns 30,500 yen/month which he lives off of. Akiko is his language teacher, so his Japanese has a feminine touch. There follows a brief description of Bill’s favorite recipes: Ganmo burgers, Kori-dofu cutlets, Onion soup with tofu, and strawberry tofu whip.

Note: This is the earliest document seen (July 2012) concerning the work of William Shurtleff and Akiko Aoyagi with soyfoods, in Japan. Address: Tokyo, Japan.

671. *Grocer (The) (London)*. 1973. Vegetable proteins: Will there be a harvest for the supermarkets [in the U.K.]? 194(6069):38-39. Feb. 24.

• **Summary:** With the “move by Courtaulds to sell Kesp vegetable protein pies, reported last week, there is speculation on the future of this type of food in the grocery trade. It is thought that it will be at least a year or so before this type of food will be available in any large quantity for retail sale... Of course vegetable protein products are already selling in health food stores with a range of brands offering

meat substitutes.”

672. McFadden, Charles B. 1973. Cost-saving soybean product marketed. *Minneapolis Tribune*. March 8. p. 1A, 5A.

• **Summary:** General Mills announced Wednesday that a new textured protein product, obtained from soybeans and designed to blend with ground beef. Assuming the cost of ground beef to be \$0.95/lb, a pound of the mixture of ground beef and Bontrae would be about \$0.76/lb, for a savings of 20%. Available in a wide range of flavors and textures, Bontrae can be made to resemble beef, ham, chicken, or fish—or even fruit and nuts. These products have been incorporated into stews, casseroles, salad dressings, spreads, dips, pizza, and snacks by some food processors.

“The U.S. Department of Agriculture has approved the product’s use in school lunches at a 30 percent level in combination with meat, fish, and poultry.”

General Mills said that various vegetable proteins could be used to make Bontrae, but the soybean was chosen because “it is the highest among vegetable proteins in the quality and quantity of the amino acids so necessary for human health and growth.” Address: Staff Writer.

673. Bralove, Mary. 1973. The meat revolt: Stores, packers, farms begin to feel impact of housewives’ rage. *Wall Street Journal*. March 29. p. 1.

• **Summary:** American housewives, battling soaring meat prices, are buying less meat and cheaper cuts. The widely publicized efforts are aimed to getting consumers to give up meat next week in an “April Fool’s boycott” which, it is hoped, will drive down the price of meats.

The situation is expected to get worse and supermarkets are reporting a sharp drop in meat sales as “housewives mix soybean fillers into their hamburger meat to stretch it further,...”

Some housewives are switching to tuna shortcakes or cheese souffles, but even the price of these products has jumped. According to Tim McEnroe of the National Association of Food Chains, “The real problem the housewife is facing is that there are no attractively priced meat alternatives.” Address: Staff reporter for WSJ.

674. Lockmiller, N.R. 1973. Increased utilization of protein in foods. *Cereal Science Today* 18(3):77-81. March. [13 ref]

• **Summary:** Details are given on each type of soy protein product and the way each is used. Table 4 gives the price per pound for various soy protein foods, the estimated annual production in 1972, and the current uses. Soy flour and grits, \$0.15-\$0.17/lb, 352-500 million pounds produced in 1972. Used as ingredients for baked goods, dog foods, sausages.

Soy protein concentrates, \$0.21-\$0.25/lb, 40-50 million pounds produced. Used in manufacturing textured products. Ingredients in processed meats, baby foods, and health foods.

Soy protein isolates: Regular \$0.41-\$0.45/lb, modified

isolates \$0.92-\$1.33/lb. Production of both types: 35-40 million pounds. Regular isolates are used in manufacturing analogs such as meatless ham, bacon, hot dogs, etc. Modified isolates are used in whipping agents.

Textured soy protein products: Extruded flours, \$0.27/lb and up. Spun isolates \$0.50/lb and up. Production of both combined: 35-40 million pounds in 1972. Textured soy protein products are used in bacon bits, bacon strips and similar foods.

Table 6 shows what companies supply which of the following types of edible soy-based ingredients: Soy flour and grits (defatted, low-fat, full-fat), concentrates, isolates, spun fibers, textured soy prod. The companies are ADM (soy flour and grits—defatted, low-fat, and full fat, textured soy prod.), Cargill, Central Soya, Far-Mar-Co, General Mills, Griffith Labs, Gurley, Inc., Lauhoff Grain Co., Miles (Worthington), National Protein, Ralston Purina, A.E. Staley, Swift & Company. Address: A.E. Staley Mfg. Co., Decatur, Illinois.

675. *Forbes*. 1973. Why the makers of Alka-Seltzer want to help reduce your meat bill. April 1. p. 25-26.

• **Summary:** Miles Laboratories, the \$319-million-a-year pharmaceutical company of Elkhart, Indiana, is famous as the maker of Alka-Seltzer. The company's food group [Worthington Foods] has sales estimated at \$18 million a year. The company's "newest products are Morningstar Farms breakfast 'sausage' and 'ham.' They are currently being test-marketed in Florida and soon will be in Arizona and Southern California. Earlier tests, in Erie, Pennsylvania, and Fresno, California, were very successful. If the latest tests confirm the earlier results, Miles reportedly will go national next year, backed with a \$9 million advertising campaign." Currently the biggest problem with these products is that they cost more than meat.

In one sidebar, titled "How it all happened," Robert Boyer tells how he developed spun soy protein fibers, starting with his work at the Ford Motor Co. "I first approached Worthington when I filed my first patent on an edible fiber in 1949 and they became interested immediately." A photo shows Boyer, who is now building a house in Florida, where he plans to retire eventually.

A second sidebar, titled "Verdict: Not as good, but not bad, either," gives the results of a 15-member taste panel test for taste and texture. 11 participants ranked the products as good in taste as their meat counterparts; 1 said excellent and 3 said fair. In texture, 4 said excellent, 9 said good, and 2 said fair. "As to price, four of the participants said they'd buy the products if they could save 10% on meat price; 11 said the prices would have to be 20% cheaper or more. One participant (middle-aged) said he'd consider buying the products at full meat prices because of the anticholesterol feature. The overwhelming conclusion was that most participants would prefer meat, but that price advantage

could make them switch."

Note: This is the earliest English-language document seen (Jan. 2008) that uses the term "Morningstar Farms" to refer to products made from edible spun soy protein fiber.

676. Fischer, Norman H. 1973. Beanburgers—More Americans turn to soybean products as meat substitutes: Restaurants, stores find consumers like the taste and especially the price. *Wall Street Journal*. April 3. p. 1, col. 1. Midwest ed.

• **Summary:** In the continuing struggle against high meat prices, King's Food Host, a restaurant chain based in Lincoln, Nebraska, has been adding TVP for several months now to its Big King burgers at about 20 of its 140 branches. It sells these "soyburgers" for \$0.49, which is 10 cents less than usual. Sales have been very good, with no complaints.

In the past, soybean products have been slipped into a variety of consumer foods, but during the past few months, they have been increasingly advertised as extenders in hamburgers. Consumers seem to welcome the reduction in meat prices.

"The future is now: Over the past several years, such companies as General Mills Inc., Archer-Daniels-Midland Co., Ralston Purina Co., and the Worthington Foods subsidiary of Miles Laboratories Inc., have developed soybean products that have virtually the same appearance, texture and taste as beef, pork, poultry, seafood and even nuts. Some of these all-soy products already are on the market, and more are being added annually.

"U.S. Agriculture Department [USDA] researchers say that by 1980 soy protein could account for as much as 8% of the nation's 'meat' requirements."

This is good news for those who grow and process soybeans. The National Soybean Processors Association says that sales of soy protein products for use in human foods totaled about \$75 million last year, a ten-fold jump from five years earlier. And buoyed by the growing use of soy as an extender for ground beef, sales this year are expected to reach \$120 to \$140 million.

"The biggest move was made in mid-March by Red Owl Stores Inc. in Minneapolis [Minnesota], when it introduced 'Juicy Burger II' in the fresh-meat counters of its 51 supermarkets in the Minneapolis-St. Paul area and its six Duluth stores. 'Juicy Burger II' is 75% ground beef and 25% soy protein, plus a few flavorings. It is selling for about 75 cents a pound, 20 to 25 cents less than all-beef hamburger sells for." Address: Staff reporter.

677. Brooks, Charles. 1973. Bay Area cooks use tofu as a substitute for meat. *Christian Science Monitor*. April 26. p. 12.

• **Summary:** San Francisco—One way consumers here are trying to beat rising meat prices is by using tofu (pronounced toe-foo), or Chinese soybean cake, which is now sold in

many Bay Area supermarkets. Also called “bean curd” and “meat without bone,” tofu originated some 2,200 years ago in northern China. It has long been a key protein source for Buddhist monks and other vegetarians. Now a new generation of young, hip-looking customers are discovering tofu, which retails for about 55 cents a pound in neighborhood supermarkets, and about 45 cents a pound in Chinatown. Since it has no fat and no bones, its the best buy around.

Many people are looking for tofu recipes. Some good ones can be found in *An Encyclopedia of Chinese Food and Cooking*, by W.W. and I.B. Chang, H.W. and A.H. Kutscher (Crown Publishers, New York). There are three basic types of tofu. A Chinese recipe for “Bean curd with tomato (*Dow fu fan keh*)” is given. It calls for “6 cakes bean curd, cubed.”

678. *Food Engineering*. 1973. TVP simulates pepperoni. 45(5):72. May.

• **Summary:** Temptein Pepperoni-like Links are made from spun soy isolate by the Marschall Division of Miles Laboratories. The product costs 25% less than meat pepperoni. Typical analysis of the links is: Protein 18.2%, fat 27.1%, carbohydrates 17.6%, ash 4.9%, and moisture 32.2%. Two photos show the product.

679. Miles Laboratories, Inc. 1973. Which of your food ingredients is becoming too expensive? (Ad). *Food Processing (Chicago)* 34(4):Inside front cover. Spring. Foods of Tomorrow section.

• **Summary:** “Is it a meat product? Then Miles Laboratories can help cut your costs. With Temptein *spun* textured vegetable protein meat-like nuggets and beef-like granules.”

“Temptein extenders, derived from soy isolate (over 90% protein), and spun into fibers. So the cost is significantly less than meat. After all, an acre of soybeans yields 10 times as much protein as the same land would feeding animals. Production, shipping and handling are less costly too.

“No skinning, boning, curing or trimming. And no waste or shrinkage. Temptein—a versatile product that can be stored conveniently at room temperature... Extenders engineered for up to 100% meat replacement. To cut ingredient costs in your existing food products. Or help you design delicious new foods.”

The bottom half of the ad contains a photo of various colorful vegetables, mushrooms, grains, beans and pasta. Just above it is a smaller photo of Temptein spun fibers. Address: Marschall Div., Elkhart, Indiana 46514.

680. *Food Engineering*. 1973. Cholesterol-free meat substitute: New products have all the advantages of real meat, but no cholesterol or animal fat. 45(6):60-61. June.

• **Summary:** Shows large labels of two Morningstar Farms products from Miles’ new textured vegetable protein line. “Textured Vegetable Protein” and “Breakfast Patties.” A

nutritional comparison is made with an equivalent weight of pork sausage. An 8-oz package retails for \$0.79.

681. Sickler, Roberta. 1973. *Ritual of the hearth: A cookbook of 20 menus and 117 unique vegetarian recipes in praise of life*. New York, NY: Macmillan Publishing Co. x + 195 p. Illust. by the author. 26 cm.

• **Summary:** The recipes are grouped by season. Soy-related recipes include: Snow pea soup (with 3 bean-curd cakes [tofu] (each about 3 inches square by 3/4 inch thick), soy sauce, and hoisin sauce, p. 4). Green broth (with bean cake [tofu], p. 84). Tofu (homemade from soy flour and lemon juice, p. 86-87; “Tofu is a rich, delicate curd from soybean. It is especially good for summer, served cold with raw vegetables, or in hot soups or sauces. Tofu is made fresh daily in many Oriental neighborhoods, and sold in the form of small squares. It can be made at home quite successfully.”). Tofu and summer vegetables (with “1 3/4 cups tofu curds, or 3 tofu cakes, cubed,” p. 87). Soy bechamel sauce (with soy flour and Tamari soy sauce, p. 130-31; “We use dark Tamari soy sauce because it is aged slowly in wood and has a light, deep flavor.”). Soy burgers (with whole soy beans, soy oil, soy sauce, miso paste, and soy flour, p. 183-84).

682. Rice, William. 1973. Prices: Harsh new realities. *Washington Post, Times Herald*. July 26. p. F1.

• **Summary:** Prices of meat and dairy products continue to rise. The freeze on food prices under Phase 3½ seems to have worked only partially. The last issue of USDA’s “Smart Shopper” was just published, and the staff of the department’s Plentiful Foods department are out of work. The publication recommends that shoppers in August buy evaporated milk plus “such meat alternatives as ‘peanuts, peanut butter and sardines from Maine.’” Address: Staff reporter for WSJ.

683. Meade, Margaret. 1973. No meat? Well, there’s always potatoes! *Chicago Tribune*. Aug. 22. p. C2.

• **Summary:** Not long ago, dinner wasn’t dinner without meat and potatoes. But now: “Shortages and skyrocketing prices are forcing cooks to hunt for meat alternatives.” Yet potatoes are still inexpensive. Contains two potato recipes.

684. Associated Press (Rome). 1973. Revolution in tastes: Imitation meats gain popularity. *Journal Star (Peoria, Illinois)*. Aug. 23.

• **Summary:** A cartoon at the top of this article shows a man and a woman standing next to a raised metal charcoal grill; smoke is rising from it. He says: “Shhh. You know it isn’t steak, and I know it isn’t steak, but the neighbors don’t know it isn’t steak.”

The Food and Agriculture Organization (FAO) said yesterday that the high price of meat is spurring the

development and production of “imitation meat products.” Imitation meat falls into two categories: meat extenders and meat substitutes. The statement came from an FAO report based on a conference on the world meat trade held recently at FAO’s headquarters in Rome. FAO statistics, which are still fragmentary, estimate that production of soy protein products in the USA has increased at about 18% a year for the past few years.

685. Ohsawa, George. 1973. Practical guide to Far-Eastern macrobiotic medicine. Herman Aihara, editor. The George Ohsawa Macrobiotic Foundation Inc., 1471–10th Ave., San Francisco, CA 94122. xi + 260 p. Aug. 21 cm.

• **Summary:** This book has a red, white, and black cover with a round yin-yang (*t'ai chi*) symbol on it. The Foreword begins: “This book, a compilation of several books and writings of George Ohsawa, attempts to give the whole scope of macrobiotic medicine to everyone.” It includes the first English translation from French of Ohsawa’s 1956 “Guide pratique de la médecine macrobiotique d’Extreme-Orient.”

Contents: Forward [sic]. Preface. Introduction. Theory of macrobiotic medicine. Curing sickness. Cure the man. Letters from students of macrobiotic medicine. Appendix.

Information on soyfoods is found on the following pages: Tamari bancha (syoban, p. 85, 102). Miso (fermented soybean puree, p. 85). Tekka (miso, p. 87, 95). Tofu plaster (p. 88, 110-11, 125-30). Miso soup (p. 96). Koi-koku (Carp soup with miso, p. 99). Aburage (Age, p. 99). Deep-fried vegetable tofu (ganmo, with “1 tofu, ½ lotus root cut small, 2/3 inch jinenjo {nagaimo}, ½ inch carrot cut small, 2 inches burdock cut small, 1 quart oil, 1 cup whole wheat flour.” Grind the tofu well in a suribachi, adding a pinch of salt, p. 99). Vegetable with ganmo (p. 100).

Note: This is the earliest English-language document seen (April 2013) that contains the word ganmo; it refers to deep-fried tofu burgers.

Dried radish with age ([aburage], see recipe 32, p. 100). Yin/yang soboro (with miso, p. 101). Scallion miso. Onion miso. Shigure miso (p. 103). Pheasant nituke [nitsuke] (with miso, p. 104).

The forward [sic] by Herman Aihara, editor, notes: “This book, a compilation of several books and writings of George Ohsawa, attempts to give the whole scope of macrobiotic medicine to everyone. The main part is treatment for sickness. However, treatment without understanding of principles and a good attitude is dangerous, therefore, the theory of macrobiotic and other articles were added. The book, like its predecessor, *The Unique Principle*, is unique not because of its name and contents, but rather in how it was translated, edited and published.

“The first part is a translation taken from Japanese books such as, *A New Dietetic Cure*, *How to Cure Sickness and a Sick Man*, and *Vegetarianism*. The second part is a translation from the French edition of *Practical Guide to Far-Eastern*

*Medicine* which was done by Ann Harris. Noboru Muramoto was consulted to suit remedies to present-day American needs.

“Cornellia Aihara translated *Cooking for the Sick* which was written by Lima Ohsawa. *Massage and Palm Therapy* are based on notes taken by Cynthia McCluskey at Mirimichi Summer Camp, 1972. Photos of Cornellia demonstrating external treatments were taken by Fred Pulver. *The Manual of Macrobiotics* is a contribution of Nina Bond who took notes at George Ohsawa’s lectures in New York at Summer Camp held about ten years ago.

“The third part is a translation from French and Japanese by Fred Pulver, Lou Oles and Herman Aihara.

“The last part is again taken from several articles appearing in past issues of *The Macrobiotic* magazine. The Appendix is taken from a translation of the French edition of Ohsawa’s *Practical Guide to Far-Eastern Medicine*.”

The preface, by George Ohsawa, states: “I am very happy to give you this short, simplified translation of my book, *Cure—Following the New Way of Eating*. It was originally written in Japanese, and is now in its 465th edition. I want to share with you the practical application of Macrobiotic healing that I have been teaching for almost 40 years—leaving aside the conceptual aspects covered in my other books and classes.

“Herein is the synthesis of my medical philosophy, which is nothing but the biological, physiological and dialectic interpretation of Far Eastern philosophy—the principles of the Order of the Universe and the Order of Man. For 30 years I have been writing on both the practical and theoretical sides of this question and have published more than 20 books and thousands of articles. But at this time I wish to limit myself to giving easily accessible information.

“My medical philosophy, the way of eating and the art of longevity and rejuvenation, is so simple and inexpensive that anyone can follow it any time, anywhere. If you decide to cure yourself before all else, you can forget about the bitter, painful and costly suffering that results from medical, physical, psychological and religious therapies.

“This system depends on you alone. No reliance on other people or on artificial means—everything depends on how you eat.”

In the first chapter titled “How did I find macrobiotics? The principle of life,” Ohsawa continues: “I was born at Sagano, Kyoto, Japan in 1893. My mother could not produce enough milk and I was a weak baby. I was told by mother that I almost died five times before I reached the first birthday. My family was poor. Father was a principal of an elementary school of a small village before I was born. Then my parents moved to Kyoto where he became a policeman. Mother worked at home to help finance—making strings for kimonos. Mother was an industrious woman. She studied Western science and culture through Yuzuru Niijima who

was the founder of the Doshisha University. She died at the age of 30 from tuberculosis, leaving two sons. I was 10 and a younger brother was 6. Two sisters had died earlier due to the wrong diet which my mother introduced in our family through her study of Western science and culture.

“From that time we lived sad days as poor orphans. I was an apprentice in a Buddhist temple as a disciple. However, I soon started to vomit blood like my mother and sisters did. At 18, I had to give up my school, medicine, eggs and meat because I was too poor to continue such expensive living. I lived in the lowest living condition. In other words, I lived with brown rice, radish pickle and salt plum even though I was told that my sickness—tuberculosis—required eggs and meats by the doctors and my mother who gave us milk, eggs and bread every morning (which was violating natural order). We were punished for this violation. Such a diet destroyed our family’s health. I, however, resented that I could not afford to continue such a diet because I didn’t know the fact that such a diet was the cause of mother’s and sisters’ death and my sickness. If I could have afforded to continue that diet, I would have died at that time. I am so grateful that I was poor...”

“Curing all my diseases and re-establishing my health at the age of 20, I realized that food is the source of life. After realization of this important fact, I decided to devote my life to preaching this doctrine...”

“I traveled to France for the first time in 1914. Since then I have returned a dozen or more times.”

686. Smith’s Food King. 1973. Display ad: The best choice in meats. *Los Angeles Times*. Sept. 6. p. G21.

• **Summary:** The section titled “Frozen features” includes: “Morningstar Farms 75¢. Vegetable protein, links, patties, slices, 8-oz.”

687. Tanner, J.W. 1973. Where we are and how we got there: An historical review of soybean production in Ontario. In: Ontario Soya-Bean Growers’ Marketing Board, ed. 1973. Ontario Soybean Symposium 1973. Ottawa: Agriculture Canada. 110 p. See p. 11-22.

• **Summary:** The best summary of soybean history in Canada seen up to this time. The author believes that, “based on the chaotic events of the last 12 months... for historical purposes it would seem desirable to divide the history of soybeans into two eras: pre-September 1972 and post-September 1972. Certainly the events of the last year created an awareness in producers and the general public alike of a whole new vocabulary, including words such as anchovies, futures market, protein gap, embargo, superburger, and soaring prices. The latter produced another vocabulary most of which would be unprintable.”

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “superburger” (or “superburgers”).

“The first report of soybeans grown in Canada was by C.A. Zavitz in 1893 at the Ontario Agricultural College. The seeds had been obtained from Dr. C. [Prof. C.C.] Georgeson, Kansas, who had received them from Japan three years earlier. [Note 2. Zavitz first published his research on soybeans in 1901, and first reported the results of his 1893 research in 1908]. For 30 years Zavitz, alone in Canada, meticulously conducted trials on variety tests, dates of planting, seed rates and row widths for soybeans grown for seed and hay.

“By 1927, Zavitz had evaluated over one hundred varieties, most of them for five years or over. The 31 year average of his best variety, Early Yellow was 16.78 bu/acre. The 22 year average green crop yield for the variety Ito San was 7.5 tons per acre per year. In 1924, Zavitz released OAC 211, the first variety of soybeans registered by the Canadian Seed Growers’ Association. The variety continued as one of the recommended varieties until the mid 40’s.

“The soybean program at Harrow was started in 1923 by Dr. F. Dimmock. [In 1923 he grew the first soybeans at Harrow. In 1925 the first soybeans were grown in Kent County. In 1930 the first soybean crosses were made at Harrow.] Dr. Dimmock was transferred to the Ottawa research station in 1927 where he continued his work on soybeans and produced a string of excellent early varieties of soybeans over 35-40 years including Acme, Comet, Crest, Mandarin, Capital, Merit, Kabott and Pagoda. The Harrow research was continued by Casper Owen who started breeding soybeans in 1931. This program was to prove to be one of the most outstanding in North America producing such varieties as AK (Harrow), Harman, Harly, Harosoy and Harome.”

“In the late 1920s a few farmers were growing a small acreage of soybeans for grain, harvesting with a reaper and threshing the seed out. Two short-lived crushing plants were established in the south west part of Ontario in the mid-1930s, one of which was located at Shelbourne [sic, Colborne] Street in Chatham.”

Note 3. Founded in 1934 (see p. 18), this was apparently the first crushing plant in Canada. In *Shepherd’s City of Chatham (Ontario) Directory 1934-35* (p. B-166) we read: “Soyabean Oil & Meal Co-operative Co Ltd, G E Biles, mgr, Colborne n, w cor Adelaid.” Spelled out, with punctuation, this becomes: northwest corner of the intersection of Colborne St. and Adelaide St. See also C.A. MacConkey (1935, p. 65) who gives the company name as: Soy Bean Oil and Meal Co-Operative Co. of Canada, Ltd.

“Subsequently, few beans were grown for hay. The late 1930s were critical years for the soybean in Ontario, and without the help of the Maple Leaf Mills plant (which was primarily processing flax) and Toronto Elevators [which later merged with Maple Leaf Mills in 1962], there would have been no place to market the new crop.

“The establishment of soybeans as a major crop in North

America was assured by the occurrence of World War II. Demand for oil created a rapid expansion in acreage and processing facilities, and in the U.S.A. 1940 marked the first year in which the acreage harvested as seed exceeded the acreage harvested for hay. The latter continued to dwindle away and now, represents an insignificant portion of the U.S. acreage.

“The rapid expansion in acreage, once the demand for oil was established, occurred as a result of a major promotional effort by the consuming industries. With the construction of a new plant in Toronto in 1944, Victory Mills launched one of the greatest promotions of a crop ever witnessed in the Province of Ontario. Extension bulletins, newspaper advertisements, movies, newsletters and meetings inundated the farmers with information and enthusiasm. Ralph Chamberlain and later Ivan Roberts promoted the crop at every opportunity. Acreage grew and by the early 50’s, the soybean had become a major cash crop in S. Ontario and had its own marketing board.

“As the market for oil increased and the acreage expanded in the 1920’s and 30’s, the problem of disposing of all of the meal economically became acute, to the point of slowing the expansion... Gradually the feed industry began to recognize the value of the meal in livestock and pet foods with the result that, with a major market established for the meal by-product, the expansion of the oil industry was assured.”

“To me there have been three outstanding accomplishments in the development of soybeans in Ontario to date: the pioneering work of C.A. Zavitz at the Ontario Agricultural College... Next, the role of Victory Mills in promoting the crop once the market for oil was established.

“Finally, the development at the Harrow Research Station of the variety Harosoy by Mr. Casper Owen. Released in 1951, Harosoy eventually grew to 80% of the Canadian crop (1965). However, its total impact was even greater in the United States Midwest where, in 1966, 26% of the total U.S. crop of 25 million acres was Harosoy, including 42% of the crop in Illinois, 48% in Indiana, 46% in Ohio and 58% of Michigan’s crop. To be that dominant, a variety can’t just be good, it must be great and Harosoy (and later Harosoy 63) was certainly that.”

A graph (p. 20) compares soybean yield in the USA and Canada from 1924 to 1971. The first statistics on Canadian soybean yields date from 1941, and from that year onward Canadian soybean yields were generally higher than U.S. yields—in some year 5-6 bushels/acre higher.

A second graph (p. 22) shows the surprisingly parallel growth of the number of soybean acres harvested from 1924 to 1972. Though the number of acres is smaller in Canada, the rate of growth is almost identical. Address: Crop Science Dep., Univ. of Guelph, Guelph, Ontario, Canada.

688. Brown, Edward Espe. 1973. Tassajara cooking.

Berkeley, California, and London: Shambhala. 256 p. Introduction by Zentatsu Richard Baker-Roshi. Series: A Zen Center Book. Illust. by Norval Delwyn Carlson. Index. Oct. 23 cm.

• **Summary:** This friendly, nicely illustrated natural foods vegetarian cookbook is also about the spirit of Zen Buddhist practice. The chapter on “Beans” (p. 121-26) begins with a sort of eulogy: “Beans. What suffering the word evokes. Beans. When you couldn’t afford meat. Oh beans! When you went camping. Beans! Beans are not meat, they’re beans: garbanzo, kidney... Soy—which rarely remains as a bean... Beans are the overlooked jewels of the vegetable world. They sell at dirt cheap prices and are one of the best protein buys around... Beans take some getting used to, some familiarity. It’s easy to say ‘beans don’t agree with me,’ without having given yourself a chance to agree with them.”

Soy-related recipes include: Oriental dressing (with soy sauce, p. 72). Cooking beans (p. 122-23; if presoaked, pressure cook soybeans for 20 minutes at 15 lb pressure. If not presoaked, for 25 minutes. For cooking without pressure, presoak, bring to a boil without salt, and simmer for 2 hours). Soy-sweetened beans (p. 124; “the Japanese version of an American standby”). Nut-battered beans. Chili beans (p. 125). Blanco beans. Soy beans with hijiki & carrots (p. 126). Five thing beans (p. 126). Easy Oriental dressing (with soy sauce, p. 172). Soy sauce mayonnaise (p. 173). Tahini salad dressing (with soy sauce, p. 174). Seasoning soups (with soy sauce or miso, p. 179). Miso stew (p. 206). Potato-bean bake (p. 211). Basic recipe for burgers (with cooked, ground soybeans, p. 234). Soyburgers (p. 235-36).

Tassajara Zen Mountain Center was founded in 1967. An illustration of the Center cooking in a large skillet graces the cover of this book, which by July 1978 was in its 9th printing. Address: Green Gulch Zen Farm, California.

689. Greenberg, Daniel S. 1973. Slaughterhouse zero: How soybean sellers plan to take the animal out of meat. *Harper’s* 247:38-43. Nov.

• **Summary:** Discusses economics and marketing in the growing industry that makes meatlike products from soybeans. “Among some dozen major firms in America’s vast culinary-industrial complex, the rise of simulated meats is regarded as the biggest opportunity for the triumph of an ersatz product since margarine took over two-thirds of the nation’s butter trays.”

“Numerous regional hamburger chains now serve mass-produced ‘extended’ hamburger patties, and all-vegetable simulations of breakfast sausage and patties are routinely available in supermarkets.”

“Research on the texturizing process began in the 1930s, when the elder Henry Ford became fascinated with the soybean and assigned a team of researchers to transform it into products ranging from fenders to upholstery material. Following laboratory successes that were not economical

enough for the production line, the team eventually split up, but two of the researchers, Robert A. Boyer and William T. Atkinson, maintained an interest in rendering the soybean palatable to American tastes. In 1954, Boyer patented a process for isolating protein from soybean meal and spinning it into resilient threads that could be fabricated into simulated meat products, known in the trade as ‘analogs.’ In other words, they look and taste like the real thing. The process, however, was relatively expensive, and beyond the vegetarian market there was little demand for these simulations.

“The real break came in 1970, when Atkinson patented a cheap and comparatively simple process for imparting ‘chew’ to soybean flour by moistening it into a ‘plasticized’ mass, bringing it to a high temperature, and rapidly forcing it through perforated dies into a chamber of lower temperature and pressure. The result is a neutral-tasting granular material of any desired size and shape, depending on the dies, which contains about five percent moisture. When these granules are mixed with water, they retain their structural integrity, and in feel and texture resemble moist bits of hamburger.”

“Dr. Aaron M. Altschul, head of the nutrition program at the Georgetown University School of Medicine, is more outspoken: ‘The ability to produce texture out of soy flour will probably rank with the invention of bread as one of the truly great inventions of food.’”

“ADM... is venturing beyond the hamburger market. Its subsidiary, Gooch Foods, Inc., of Lincoln, Nebraska, is marketing ‘Noodles Stroganoff with Beef-flavored Vegetable Protein Chunks,’ as well as other dishes containing simulated beef.”

“In February 1971, after years of badgering by the industry, the Food and Nutrition Service of the U.S. Agriculture Department finally sanctioned the use of extenders for the meat portion of the school diet to a maximum of 30 percent. The enabling document—FNS Notice 219—is generally regarded as the Magna Carta of textured vegetable protein. During the first year of certification, the schools used 23 million pounds of the stuff; this year they’re up to 40 million pounds, and with meat prices soaring, no one thinks it unreasonable to expect at least a doubling of that amount in the next year or two.”

“The Red Owl supermarket chain, some 130 stores in the Midwest, had recently introduced ground meat extended 25 percent with textured vegetable protein, labeled ‘Juicy Blend II’ to conform with a Minnesota ban on using ‘burger’ for extended products. It sells at about 20 cents a pound below the undiluted version, and is said to be outselling the all-meat counterpart by three and four to one.”

“The old rules specified that ‘A food shall be deemed to be misbranded’ if it is an ‘imitation’ of another food and does not bear the word ‘imitation’ on the label. The new rules simply say that ‘nutritional inferiority’ shall be the only criterion for evaluating the difference between reality and

verisimilitude. The man-made version, if it’s nutritionally equal, need not bear the pejorative ‘imitation,’ though it may not be labeled as the real thing either.” Address: Publisher of *Science and Government Report*, a Washington-based newsletter.

690. Liener, Irvin E. 1973. Toxic factors associated with legume proteins. *Indian J. of Nutrition and Dietetics* 10(6):303-22. Nov. [80 ref]

• **Summary:** Contents: Introduction. Protease inhibitors in soybeans (*Glycine max*) and other legumes: Historical background, mode of action in the animal organism, factors affecting the trypsin inhibitor content (heat treatment, germination, fermentation, soybean isolates), varietal differences, possible significance in human nutrition. Other anti-nutritional factors in legumes: Phytohemagglutinins, goitrogens, cyanogenic glycosides, anti-vitamin factors, metal-binding constituents (incl. phytic acid binding soy protein), estrogenic factors, toxic amino acids (mimosine, djencolic acid), unidentified growth inhibitors. Lathrogens. Favism. Conclusion.

Tables show: (1) The effect of heat and methionine on the nutritive value of soybeans for rats. (2) The trypsin inhibitor activities of soybean flour / soyflour (unheated), soybean isolate, soybean fiber, chicken analog, ham analog, beef analog [the last 3 probably containing spun soy protein fiber]. (3) Growth inhibitory effect of the soybean hemagglutinin (SBH). (4) Effect of heat on nutritive value of some legumes. (5) Hemagglutinating and antitryptic activities of crude extracts of raw legumes.

Figures show: (1) Scatter diagram relating trypsin inhibitor activity to protein efficiency ratios of various soybean samples. Taken from Kakade et al. 1972. (2) Relationship of weights of pancreas to protein efficiency ratios of various soybean samples.  $r =$  coefficient of correlation = -0.77. Taken from Kakade et al. 1972. The points form an approximately straight line; the lower the protein efficiency ratio, the heavier the relative weight of the pancreas. (3) Effect of soybean trypsin inhibitor and ovomucoid on the activities of human and bovine trypsin. Based on data from Coan and Travis (1971). (4) Effect of a soybean diet with and without iodine on the thyroid gland of the rat. Taken from Anderson (1961). Potassium iodide causes the thyroid gland of the rat to decrease in weight. Address: Dep. of Biochemistry, College of Biological Sciences, Univ. of Minnesota, St. Paul, Minnesota 55101.

691. Miles Laboratories, Inc. Marschall Div. 1973. From Miles: Six specific ways to whittle costs in your meat and seafood formulations. And maintain quality (Ad). *Soybean Digest*. Nov. p. 19A-19B.

• **Summary:** “Meat and seafood prices are on the rise. And what a crimp that puts in your new food product development. Miles has designed special textured vegetable

proteins to extend or replace these costly ingredients. To whittle the costs.

“Temptein, our spun textured vegetable protein, is derived from the most refined soy isolate (90% protein).” Temptein comes in: (1) Meat-like Nuggets (Think about: Enchilada casserole, meat loaf squares, Beef balls in blankets, Porcupines or Rigatoni). (2) Bacon-like Chips (Think about: Bacon-like chips and peanut butter toaster pop-ups, Bac-omelet, Bacon and cheese rarebit, Bac-olive appetizers). (3) Ham-like cubes. (4) Pepperoni-like Links. (5) Seapro (developed to improve seafood specialties). (6) Pro-Lean 45 (“The first vegetable protein to be used successfully at 45% meat extension levels in patty formulations”). A large color photo shows different types of meat and crab. Address: Marschall Div., Elkhardt, Indiana 46514.

692. **Product Name:** Joshua Fillet.

**Manufacturer’s Name:** Food Producers, Inc., Joshua Foods Div.

**Manufacturer’s Address:** Minneapolis, Minnesota.

**Date of Introduction:** 1973.

**New Product–Documentation:** J.E. Austin et al. 1978 “The marketing factor for nonconventional protein products.” p. 121. “The first 100% all-vegetable beef substitute made from textured soy protein to be introduced in the U.S. was produced under the brand name of Joshua Fillets and sold in pound packages containing ten individual fillets.”

693. **Product Name:** Loma Linda Tender Bits (Fish-like).

**Manufacturer’s Name:** Loma Linda Food Co.

**Manufacturer’s Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1973.

**Ingredients:** In 1973: Inc. spin soy protein fibers.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Tender Bits is a canned fish-like products based on spun soy protein fiber.

Recipe booklet. 1979, dated.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. The ingredients are now: Vegetable protein (wheat [gluten] and soy), rice flour, corn or soy oil, oat flour, dried yeast, onion powder, soy lecithin, L-lysine, natural (vegetable) flavors, vitamins [niacinamide, D-calcium pantothenate, thiamine (vitamin B-1), vitamin B-6, riboflavin (vitamin B-2), vitamin B-12]. Broth: Water, salt, natural (vegetable) flavors, cottonseed oil. Label printed March 1990.

694. **Product Name:** Loma Linda Little Links (Meatless Frankfurters Based on Spun Soy Protein Fibers).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce Place, Riverside, CA 92515.

**Date of Introduction:** 1973.

**Ingredients:** Inc. spun soy protein fibers.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 1988: Per 2 links (1.6 oz–46 gm): Calories 80, protein 8 gm, carbohydrate 2 gm, fat 5 gm, cholesterol 0 mg, sodium 210 mg, potassium 40 mg.

**New Product–Documentation:** It’s Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned frankfurter type product based on spun soy protein fiber which Loma Linda probably purchased from General Mills.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The ingredients in “Linketts (Loma Linda)” are “wheat protein, vegetable oil, brown rice, defatted wheat germ, dried yeast, soy protein, salt, potato flour, onion powder, MSG, soybean lecithin, caramel color, HVP, garlic powder, L-lysine, flavorings.”

Recipe booklet. 1979.

Label sent by Loma Linda Foods. 1988. Oct. 5.

The ingredients are now: Wheat gluten, corn oil, water, wheat germ, dried yeast, rice flour, soy flour, natural (vegetable) flavors, potato flakes, onion powder, oat flour, caramel color, soy lecithin, wheat flour, garlic powder, L-lysine, soy protein isolate, spice, vitamins, (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Broth: Water, salt. This product was introduced in 1963. A less sophisticated version of this product with the same name was introduced in 1953.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

695. **Product Name:** Fish Fillets (Imitation Fish). Later renamed Vegetarian Fillets.

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1973.

**Ingredients:** In 1975: “Wheat protein [wheat gluten], Fibrotein [spun soy protein fiber], cracker meal, corn oil, egg white solids, hydrogenated vegetable oils, dehydrated potato, nonfat dry milk, artificial flavoring, soy protein, HVP, MSG, dehydrated onions, salt, dextrose, disodium inosinate/disodium guanylate, niacinamide, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.”

**Wt/Vol., Packaging, Price:** 6 fillets in 10½ oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. Fish Fillets (9 oz. or 6 lb) is a frozen fish-like product based on spun soy protein fiber.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 175. The ingredients in "Fillets, frozen (Worthington) are given.

Label. 1976, undated. "A Vegetable Protein Product. Artificial Fish Flavor." Consumer Reports. 1980. June. p. 357-65. The protein PER is 2.53. Sensory comments: Faint fishy flavor and aroma. Spicy. Dry. Chewy. Flaky; dark tuna color.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27. Ingredients for "Fillets, frozen, Worthington Foods" are "textured soy protein concentrate and isolate, flavorings (artificial flavors, salt, sugar, spices, onion, garlic, celery, parsley), egg whites, soybean and/or corn oil, partially hydrogenated soybean and cottonseed oil, modified tapioca starch, corn syrup solids, monosodium glutamate, disodium inosinate, vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12."

Note: This is the earliest commercial meat alternative seen which has a name clearly indicating that it is an alternative to fish fillets.

696. **Product Name:** Worthington's Meatless Chili.  
**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1973.

697. **Product Name:** FriPats (Meatless Hamburger Patties).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1973.

**Ingredients:** In 1984: Textured vegetable protein (soy protein concentrate and isolate, wheat gluten), soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, salt, spices, spice extractives, onion, garlic powder, paprika), egg white solids, partially hydrogenated soybean and cottonseed oil, calcium caseinate, modified tapioca starch, caramel color, emulsifiers (mono- and diglycerides, glyceryl lacto esters of fatty acids), yeast extract, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118.

Manufacturer's catalog. 1984, undated. Frozen Products.

Label reads: "Vegetable Protein Patties. Artificial Hamburger Flavor. Completely Meatless."

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

698. **Product Name:** Chic-Ketts (Meatless Chicken).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, Ohio. Phone: Tuxedo 5-5359.

**Date of Introduction:** 1973.

**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), water, soybean and/or corn oil, yeast extract, salt, monosodium glutamate, onions, hydrolyzed vegetable protein, niacinamide, etc.

**Wt/Vol., Packaging, Price:** 1 lb (in 1973).

**How Stored:** Frozen.

**New Product–Documentation:** It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a frozen product with chicken-like flavor based on spun soy protein fiber. Each pack weighs 1 lb.

Manufacturer's catalog. 1984, undated. Frozen Products. Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

Note: This product was first introduced in 1960, but did not contain textured soy protein concentrate or isolate until 1973.

699. Adams, Ruth B. 1973. Callaloo and pastelles too: Plus hundreds of other delightful recipes. Mountain View, California: Pacific Press Publishing Assoc. 192 p. No index. 21 cm.

• **Summary:** This Seventh-day Adventist lacto-ovo-vegetarian cookbook, hampered by its lack of an index, plays down the fact that it avoids flesh foods and contains a strong flavor of the West Indies. The chapter on Entrées has a recipe for making gluten, and uses gluten in many recipes, such as Glutenburger casserole (p. 41), Onions and gluten cutlets (p. 48), Gluten macaroni (p. 49), and Pastelles (p. 49; which also calls for "2 cups cubed soya meat or homemade protose"). The various Nut Meat recipes (p. 43-44, resembling Nuteena) each contain peanut butter; one contains gluten. The various Protose recipes (p. 44-45) each contain peanut butter or commercial Protose; one contains gluten. Marmite and soy sauce are sometimes used interchangeably as a seasoning, as in soups (p. 87). Very little soy is used.

700. Andersen, Lynn. 1973. Rainbow Farm cookbook. New York, NY: Harper & Row. 222 p. Illust. Index. 24 cm. Preface by Allen Gordon.

• **Summary:** This vegetarian cookbook, which has a macrobiotic flavor, is from Rainbow Farm, located on over 300 acres of mountain land in Phoenicia, New York. Soy-

related recipes include: Basic miso broth (p. 34). Miso vegetable soup #1. Miso soup #2 (p. 35). Soy butter dressing (made with 2 cups each oil and water, 3 tablespoons soy flour, and the juice of 2 lemons, p. 57). Miso vegetables (p. 67). Carrots and onions with tekka (miso, p. 67). Miso-onion spread (p. 76). Miso rice (p. 85). Tahini-miso spread (p. 108). Tahini-miso spread with vegetables (p. 108). Tahini-miso spread with seeds (p. 108). Tahini-tamari spread (p. 108). Miso balls (p. 111). Soy butter (“This is exactly the same as the whipped soy cream recipe” [which does not appear in this book], made with “soy powder,” p. 111). Soy milk (with a blender, from soy beans, p. 118). Soy milk (without a blender, from soy flour, p. 118). Soy burgers (from okara, p. 119). Soy loaf (with cooked soy beans, p. 120). Tofu (“Chinese Soy Bean Cakes”) (curded with Epsom salt, p. 120). Miso sauce #1 and #2 (p. 126). Hiziki and tofu ([hijiki], p. 132). Egg noodles (with wheat and soy flours, p. 144). Soy milk with whole beans (p. 205). Soy milk with soy flour (p. 205).

A glossary of “New or Unfamiliar Foods” (p. 212-14) includes good descriptions of tamari, miso soy bean paste, kuzu, and tekka. Address: Phonecia, New York.

701. Ford, Marjorie Winn; Hillyard, Susan; Koock, Mary Faulk. 1973. *The Deaf Smith country cookbook: Natural foods for family kitchens*. New York, NY: Macmillan Publishing Co. (Collier Books). London: Collier Macmillan Publishers. xiv + 352 p. Preface by Frank Ford. Illust. Index. 24 cm. [7 ref]

• **Summary:** A pioneering natural foods cookbook, produced and copyrighted by Arrowhead Mills, Inc. of Hereford, Texas. Soy-related recipes include: Roasted soybeans (p. 42-43). Miso soup (with wakame, p. 53). Tamari bouillon (p. 57-58). Todo en la caldera (with soybeans and miso, p. 58). Miso sauce (p. 90-91). Thick tamari sauce (p. 91). Tofu (soybean cheese or bean curd, p. 98-99; an early recipe for homemade tofu made with vinegar or lemon juice as a coagulant. Lists 6 serving suggestions for tofu and 1 for the “soy mash” [okara]). Cooking flaked soybeans (p. 132-33). Soy sesame burgers (with 1/3 cup whole sesame seeds, p. 135-36). Rice pancake with tofu (p. 136). Soybean loaf (p. 138-39). Cooking with soybean flakes (p. 156). Blazing star timbales (with soybean flakes, p. 156-57). Tamale soy pie (with cooked soybeans or soybean flakes, p. 182-83). Soy milk (homemade, p. 292). In the last chapter titled “Natural Foods from Deaf Smith County,” the following soy-related foods are discussed: Soybean flakes (p. 324, 327), black beans (a type of soybeans, p. 326), soybeans and foods made from them (p. 327). Soybean flour (p. 328). Tamari roasted nuts and soybeans (p. 331). Tamari soy sauce (p. 334). Miso soybean paste (p. 334). Wheat gluten is not mentioned in this book. Frank Ford’s preface shows him to be a devout Christian, organic farmer (in Deaf Smith County, Texas), and advocate of natural foods.

In about Sept. 1991 this early natural foods cookbook was reprinted with a new cover and subtitle (“Natural Foods for Natural Kitchens”). Over 300,000 copies are now in print. Address: 1. Arrowhead Mills, Hereford, Deaf Smith County, Texas; 2. Soquel, California; 3. Foods editor, *The Texas Star*.

702. *It’s your world vegetarian cookbook*. 1973. Glendale, California: Seventh-day Adventist Church. 128 p. Foreword by U.D. Register, and Clive McCay. Illust. 23 cm.

• **Summary:** *It’s Your World* is a television series hosted by Art Linkletter (his photo faces table of contents) and sponsored by the Seventh-day Adventist Church in Glendale, California. Soy-related recipes include: Saucy soy sizzlers (no eggs, p. 10). Carrot nut loaf (with soy flour, p. 12). Millet gourmet balls (no eggs, with soy beans, p. 13). Danish Proteena balls (p. 17). Rediburgers (with Rediburger, p. 18). Festive loaf (with Vegeburger, p. 22). Mayflower loaf (no eggs, with soy beans, p. 22). Fresh tofu loaf (p. 25). Soy beans Hawaiian (with Loma Linda Boston Baked Beans, p. 37). Baked soybeans Americana (p. 39). Plantation soy special (with soy beans, p. 39). Browned tofu with mushrooms (p. 42). Viking Roast (with Holiday Roast [frozen, ready-to-bake soy loaf with a smoked turkey flavor], p. 56). Scrambled tofu (p. 56). Crispy tofu sticks (p. 57). Bit o’soy waffles (with soy flour, p. 65). Soy-oat waffles (with soy beans, p. 66). Soy cream topping (with Soyamel powder, p. 114). Soy nut milk (with soy milk powder, almonds, and cashews, p. 116). Soy half-and-half (with All Purpose Soyagen, p. 116).

Pages 118 and 119 list all commercial vegetable protein analogs made by Loma Linda Food Co (Arlington, California) and Worthington Foods, Inc. (Worthington, Ohio). Address: Glendale, California.

703. Miller, Harry W., Jr. 1973. *Observations from forty years of soy protein processing and engineering*. Cedar Falls, Iowa: Soypro International, Inc. 8 p. Undated. Unpublished manuscript.

• **Summary:** “It was a late summer morning 1922 in the State of Maryland that my father announced at the breakfast table that I would accompany him on a short trip to Frederick, Maryland to look at a stone burr mill he wished to purchase for some soy milk experiments he wanted to conduct.

“Protein had always been a high priority topic in our house as Dr. John Harvey Kellogg had made a deep impression on my father (Dr. Harry W. Miller, Sr.) during his student medical days at Battle Creek, Michigan.

“On the way to Frederick my father explained to me that the mill he wished to purchase was to be used to prepare soybeans so that a white milky fluid of suspensible protein could be extracted from the beans. Little did I realize that I was to be introduced to a research field that would dominate my work and studies the rest of my life.

“Having purchased the mill the next step was to find a proper location to conduct the experiment. One of Maryland’s larger dairy farms was chosen for this, and after transporting the mill to the farm, it was bolted to heavy timbers and one of the dairy’s tractors was used to turn the pulley on the mill.

“To a boy of ten it was more interesting than spectacular to see a white milky liquid run down out of the mill instead of seeing the milk being drawn from the udder of a cow. However, this experiment made a lasting impression on a ten year old who was always experimenting and constructing contraptions of his own.

“No, the liquid from that mill did not replace the milk produced on the farm. However, at the present rate of population increase, and ever-increasing shortages of grazing area to produce milk, we may in the future be looking to the use of this mill and its complementary equipment to supplement the animal products in lands of large dairy production.

“Shortly after my introduction to the first experiments on that dairy farm, I traveled to the land of the soybeans. This country was to become my home and source of information as my parents had accepted a call to mission service in China.

“Having been raised a strict vegetarian, the foods made from vegetables and grain sources were always a challenge to my curiosity.

“Roaming the streets of Shanghai every portable food caterer, street sidewalk restaurant, as well as the more sophisticated Buddhist (vegetarian) restaurant held a new horizon of future products made from the soybean.

“It was indelibly inscribed on my young mind that each procedure in each shop had a very definite and end-resulting purpose behind it.

“The first visit I made to a shop which produced these foods, the owner would address me. ‘What is your honorable name,’ and my answer would be, ‘my humble name is “Show Me,”’ translated small rice.

“My childish curiosity either amused the shop keepers or my youth intrigued them. Regardless, I was soon known as ‘small rice.’ in all these shops and home processing establishments and was allowed to roam at will and have my questions answered frankly—so much so, that I was able to get answers and ingredient names that my elders were unable to secure.

“Basically, the first step in extracting protein was to hydrate the bean. I found that each shop had some variation in soaking the bean. Hot water was used in one place and cold in another. Some added chemicals to the soaking water and others varied by prewashing the bean before soaking while others washed the beans after soaking.

“Although I knew that all their variations were vital to the end product, it was to be several years before I would be using these various steps to achieve end results.

“During my earliest experience with processing, I learned that enzyme action is definitely affected by these variations in procedure.

“The Orientals extract soy protein to produce soy curd, in its various forms, and soy skin or film membrane. Note: This is the earliest English-language document seen (Oct. 2012) that uses the term “soy skin” or the term “film membrane” to refer to yuba.

“Soy curd is produced by coagulating the extracted, liquid-suspended protein. After being pressed from the granular residue [okara] of the bean, a liquid white protein suspension is left. Each shop had a different heat to bring the liquid to before adding the coagulatory chemical.

“Each producer had a different product for the customer. One would have a large cake of rather coarse curd. This they cut into blocks according to the purchaser’s need. The buyer taking it would flavor and prepare it as he desired.

“Another shop would produce a firmer curd which was pressed into small cakes; some were flavored with sesame oil; some peanut oil in which they were deep fried; and others were boiled in soy sauce and sold in this form to the customers.

“They also had what I called the yogurt shop. This was a very exacting procedure of heat control and quantity of coagulant to produce a yogurt-like curd which was chilled in bowls and served with rice malt poured on top to flavor it.

“There was one shop that pressed a fine curd till it was rather dry. These cakes were cut into square pieces about 3/4 of an inch square, were stacked on bamboo mat trays and placed in a culture-inoculated, heat-controlled room for three days. After this period the mold-covered squares were put loosely in glass jars in a hot pickling juice with ginger, ground red peppers, rice wine, brown sugar, and salt, and were sealed so the sauce would preserve the curd and flavor it [to make fermented tofu]. This product is sent all over the world to delight the palates of the Orientals.

“Perhaps the most interesting to me was the film protein [yuba] produced by heating the liquid extract to a definite regulated temperature and allowing a film to form on the top of it. This is picked up with a long chopstick and hung on a wire line to dry.

“Here again, liquid flavored films were produced by temperature changes. One way of changing the thickness of the film was to allow the liquid to evaporate so that the last films to be produced from a pot of liquid would be thicker than the first. Also, the fuel used would change the flavor of the film as the smoke from coal, charcoal rice straw and wet saw dust, or bamboo splints each had a definite taste.

“Not being satisfied with seeing these products made, I was determined to see how they were used; so ‘Small Rice’ would go to the kitchen of the Buddhist Restaurant long before dawn to watch the cooks soak these films in various sauces, some to be rolled tightly into bologna-like rolls and broiled for hours in a soy sauce, ginger, and anise flavored

juice. This roll, when sliced, had a beef-jerky like flavor. Another was to lay the films one after another on top of each other to be sprinkled (each one) with rice wine, sesame oil and monosodium glutamate. These films were folded into a half moon shape, placed in bamboo trays and steamed for several hours. They were then placed on a screen to dry the surface moisture, then fried in deep sesame oil or peanut oil whichever flavor was desired.

“When these foods with various seasonings were served you would have anything from fish to turkey or duck.

“It was the eating of these Buddhist meats that gave me the courage in later life to learn to eat animal tissue, as I had been raised a strict vegetarian.

“Had I not learned to eat and taste these various animal products, I am afraid I would be like the official in India: when describing to him how we could make meat analogs from soy milk residue he asked, ‘Well, what does chicken taste like?’

“This early experience in China was a challenge to make extensive study into each country’s dietary and food flavor habits before designing a product for them.

“In the early 1930’s with the encouragement of W.J. Morse and La Clara Reed of the U.S. Department of Agriculture, my father and I, using equipment supplied jointly by the Department and ourselves, produced a spray-dried soy milk formula which was granted a patent by the U.S. Patent Office, and which the American Medical Association accorded its own highly valued seal of acceptance for an infant formula.

“The first commercial plant was installed in Shanghai, China, during 1936 and 1937. Although we were using soy milk for feeding babies and institutional employees, due to the high price of pasteurized cow’s milk there was a challenge to install a soy dairy to produce a vegetable milk at a low price.”

Note 1. This is the earliest document seen (Aug. 2013) that uses the term “soy dairy” to refer to a facility which makes soymilk and related products from soybeans. Continued. Address: Cedar Falls, Iowa.

704. Miller, Harry W., Jr. 1973. Observations from forty years of soy protein processing and engineering (Continued—Document part II). Cedar Falls, Iowa: Soypro International, Inc. 8 p. Undated. Unpublished manuscript.

• **Summary:** Continued: “Flavor was no problem as the public enjoyed the bean-like cereal flavor of soy. We calculated that, if we could produce a product of high keeping quality and automate the production, we could produce and sell soy milk for \$0.20 a quart in comparison to cow’s milk at \$1.00 per quart. To do this we used wide mouth bottles with a metal crown cap. By sterilizing these bottles in a pressure retort, we had a milk that kept indefinitely without refrigeration. This allowed us to divide the city into four quarters, and by delivering a week’s supply

at a time we were able to provide house delivery with one fourth the equipment and personnel of our competitors. We had many customers living in other cities that bought a month’s supply at a time and carried the empty bottles back to us.

“During our first month of operation, the cost was \$1.10 per bottle. The second month was \$0.40 per bottle, the third month \$0.19 per bottle and the fourth month \$0.12 per bottle, which allowed a reasonable profit. We were unable to proceed further as the Japanese blew up the plant on August 7, 1937.

“Realizing the nutritive value of soy and its possibilities, and no longer being able to continue in the Far East, we established the ‘International Nutrition Laboratory’ in Mt. Vernon, Ohio.

“At first our endeavor was to perfect manufacturing equipment so we could return to the Orient and develop foods for low-income population. As a result, we worked with soy flour manufacturers and oil meal developers. Although many experiments were conducted in testing baking and roasting the bean, we learned very early that moist heat was best for developing high assimilability of this rich protein source.

“I believe I built some 21 different types of moist heat processors from pressure steam cookers to blowing line steam jets through liquid falls of the extracted protein. One day my father remarked, ‘Son, you have more equipment out on the scrap pile than you have in the plant.’

“As World War II progressed, we found ourselves producing high protein products for feeding of people that had been undernourished due to the enemies’ confiscation of food materials. However, as the war drew to a close, we saw a need for a change of income source. So, with the assistance of Dr. Baxter of Ohio State University, Soyloc was brought on the market. Although we had to overcome diarrhea and other feeding problems, it was found that, with proper moist heat treatment and a proper balance of various carbohydrates and vegetable oil, we produced an infant milk that was readily accepted by the pediatricians.

“As we had a greater amount of soy protein fiber [okara] than extracted protein, we at first dried this and sold it for livestock feed.

“It was felt that meat analogs could not be produced from this protein casein residue. Again special equipment had to be made to handle and process this product so that palatability and high food value would result. With specially designed heat processes and modified meat manufacturing equipment, bolognas and beef-like cutlets were produced at first with the addition of wheat protein [gluten], later with soy spun protein fibers. As discussed in the latter part of this dissertation, we were also able to produce very satisfactory meatlike products entirely from the residue.

“In the late summer of 1960, I received a call from my father inviting me to a luncheon conference. Here I met

Ronald Hill of UNICEF.

“After being introduced I was informed that UNICEF intended to install an infant formula plant in Indonesia under the direction of Dr. S.S. De of F.A.O.

“We were invited to be designers of the plant and I was to supervise the installation and training of the personnel to operate the installation.

“I was most fortunate to be assisted in the project by Dr. E.L. Rowe, a graduate Ph.D. from the University of Southern California. With his help at the Institute of Nutrition of Indonesia, and the assistance of the College of Medicine of the University of Indonesia we were able to determine the causes of diarrhea in infant feeding and correct it in our formula and processing methods.

“As in every country the natives of that locale must have a product that suits their individual organic reaction to nutrition in-take.

“It has not been possible to produce a product acceptable in all countries and cultures. Thus it has been necessary to adapt both production methods and formula to each area individually. In Indonesia we had a very delicate pH balance to maintain, and moisture quantities had to be regulated so the infant obtained a nutritious substance that its body could absorb without ill effects.

“Shortly after my return to the United States and during a periodic visit of my father, Dr. Perry Webber called upon us to assist Madison Foods to develop their soy products for greater market acceptance. They had some very commendable meat analogs using the combination of both soy and wheat derivatives. However, they wished to explore in the infant formula field which was creating a sizable market. Infasoy was originated at this time and a process was developed to increase the normal extracted quantity of protein from the traditional extraction method. This was done by the use of mechanical equipment and formulations. It was here, with a great quantity of wheat fiber in use, that we derived a method of using the soy residues [okara] to manufacture meat loaves, sausages, wieners, and bolognas entirely of soy except for seasoning materials and added fats. This greatly increased the nutritional value as well as the income derived from the sale of these products.

“As we were perfecting and developing equipment and products at Madison, a call came from Brazil for assistance in developing a soy and cow milk formula.

“As the Brazilian government felt that some animal product should be incorporated in this kind of formulation, processing experiments were carried out. As a result much was discovered in flavor control. It had long been determined that you could not mask the flavor of the soybeans. It was entirely a matter of using some of the flavors in the bean and eliminating the objectionable ones.

“While still at Madison I had a call to install a traditional soy milk plant in the Far East. Our technologies had progressed to the point that we had difficulty at first to retain

sufficient soy flavor to satisfy the palate of the local clients. However, this was accomplished to the satisfaction of the customers.

“The last three years have been used in developing sophisticated analogous types of meat and milk. This has been accomplished in the laboratory and we feel will soon be available for countries now pressed with shortage of milk. Should milk fall short in dairy farming countries, we know we can supplement this shortage with a vegetable source as acceptable as the product in shortage.

“In summary let me review:

“1. We are facing shortages in milk, which is produced with a ratio of 8 lbs. of feed to produce one gallon. We can produce a gallon of vegetable milk with a total of 1 lb. of fat, carbohydrate, and beans.

“2. A breakthrough in flavor control has been achieved, which eliminates the former taste objections.

“3. Breakthroughs have also been made in using the soy milk by-products for low cost meat analogues which are highly acceptable and nutritious.

“We have approached the time that the soybean protein will not only relieve food shortages but will also satisfy the most sophisticated taste.” Address: Cedar Falls, Iowa.

705. Parsons, Mothey. 1973. *Almonds to zoybeans: A cookbook of delicious, varied & high protein recipes for vegetarians*. New York, NY: Larchmont Books. 192 p. Illust. by Maren Ate and Jim Blackfeather. Index. 18 cm. [1 ref]  
 • **Summary:** An early natural-foods, vegetarian cookbook—inspired in part by *Diet for a Small Planet*, by Frances Moore Lappe. Contents: Introduction: How this book came to be written. Appetizers-dips. Eggs. Soups. Cheese dishes. Soybean dishes. Salads. Vegetable dishes. Jerusalem artichokes. Beverages. Miscellaneous. Desserts. Food charts: Sources of thiamine (vitamin B1), riboflavin (B2), niacin (B3), pyridoxine, vitamin B-12, pantothenic acid, biotin.

In the chapter titled “Soybean dishes” all the 14 recipes call for [whole dry] soybeans, cooked soybeans, or “thick soybean puree.”

The last recipe, “Mock turkey souffle,” combines soybeans and sage to give a baked dish that tastes “a lot like turkey.”

706. Salsbury, Barbara G. 1973. *Tasty imitations: A practical guide to meat substitutes*. Bountiful, Utah: Horizon Publishers. vii + 75 p. No index. 22 cm.

• **Summary:** This is a book of TVP recipes from a Mormon perspective. Contents: Foreword. About the author (autobiographical). Protein and proper nutrition. Textured soy protein: Soybean lore, what is T.S.P., types, availability, and storage. Suggestions for cooking with T.S.P.

Ten chapters of recipes use a different flavor of T.S.P. in each chapter with either “regular grocery items” or “home storage items.” The latter are typically part of a Mormon

food storage program. The T.S.P. flavors used are beef, bacon, chicken, ham, and sausage.

Chapter 14, “Legumes or dried beans,” includes recipes for cooked or dry soybeans. Address: Orem, Utah.

707. Kinderlehrer, Jane. 1974. Using soybeans instead of meat. *Prevention (Emmaus, Pennsylvania)*. Jan. p. 168-78.

• **Summary:** Ever since the price of meat began to skyrocket, substitutes for meat have been featured in American food columns. A large ad in the *Wall Street Journal* shows one soybean regally encased in a jeweled pill box with the caption “Life pill for an over crowded world.”

But the soybean should not be presented as a meat analogue—a fancy name for imitation, fabricated, or synthetic—in part because it is not a “complete protein.” However this is not a problem when you understand how to combine complementary proteins, and how to inactivate the soybean’s trypsin inhibitor—by high pressure steam cooking whole soybeans, or by transforming the soybean into milk or “bean curd.” Dr. Royal Lee suggests a method for cooking whole soybeans: Put a cup of soybeans in a quart of water, then put this in the refrigerator and let it stand for 24 hours. Change the water 4 times during that 24-hour period. The beans can then be cooked as you would regular beans such as navy beans—boiled for 20 minutes with constant stirring.

If you have a borderline iodine deficiency or suffer from a sluggish thyroid, the soybean may not be for you. The soybean also contains a shortage of calcium compared to its high phosphorus content. “Since the body requires more than twice as much calcium as phosphorus, it is a good idea to use a calcium-rich complementary food if you use much soy.

Next come three recipes: Soysesame pancakes (with “½ cup soy flour”). Soy balls (with “½ cup soy powder”). Soy cheeseburgers (with “¾ to 1 cup soybeans {preferably small variety}). Crack or split beans in food mill. Soak overnight and cook in the soaking water for two hours with these ingredients:...”

You can also enjoy the nutritional benefits of soybeans in the form of soy grits or soy meal (which need much less soaking and cooking than whole soybeans). Or try green soybeans (more attractive and delicious than fresh lima beans). Describes how to remove the pods and cook these as a vegetable.

“While the soy is certainly the greatest bean of them all, it is still a bean.”

“Enjoy your soybeans and you may find, as Mrs. Mito Umeda [of Kumamoto, Japan] did, that they lead to longevity.” According to an A.P. release of 25 March 1973 (which appeared in the *Milwaukee Journal*, 1 April 1973), she is believed to be the oldest woman in Japan at age 110. She said of her long life: “I eat any kind of food, but I never miss taking soybean flour as well as fruit once a day.”

708. Kushi, Michio. 1974. Natural agriculture and food

processing. *Michio Kushi Seminar Report (Brookline, Massachusetts)* No. 3. Feb. 26 and 27. p. 5-30. Edited by Ane & Mark Riegel.

• **Summary:** On Feb. 26 Mr. Kushi, a macrobiotic teacher, lectured on: Tekka—“Tekka is used not only as a condiment, but also for medicinal use. Tekka is made from three different roots—carrots, burdock, and lotus roots.” The “volume of miso is flexible... Homemade tekka is traditionally made in a cast iron frying pan.” The Japanese word “tekka” derives from *tetsu* (which means iron) and *ka* (fire). “For medicinal use, yang miso is better.”

Miso and miso manufacturing, including how to make malt (rice koji) (8 pages). Note: This section indicates that Mr. Kushi has some basic knowledge of the subject but there are many errors. 1. Koji is not malt (which refers to soaked, germinated cereal grains), but molded cereal grains or soybeans. 2. Koji kin is not malt bacteria, but koji molds. 3. One does not add enzymes to miso and enzymes do not grow. Even modern miso factories do not add enzymes when making miso. 4. The entire mixture is not stirred after 20-25 days to add oxygen. Kushi says you must keep miso for a least 6 months, but to cure sickness it must be kept for 2-5 years. Miso soup can compensate for the bad qualities of meat and eggs—so everyone should eat miso soup daily. Soup stocks and miso soup.

On Feb. 27 he discussed: General outline for making shoyu—soy sauce (4 p.), including discussions with Kikkoman on making natural shoyu starting with whole soybeans. In the early years after 1973, Kikkoman wanted to make natural shoyu and sent Kushi several samples, but he turned them all down, in large part because Kikkoman wanted to use defatted soybean meal instead of whole soybeans. Erewhon is buying shoyu from 3 companies in Japan. But Kushi says the quality is declining compared to five years ago [i.e., 1969], when it had powerful healing effects when taken with bancha or kuzu. He adds: “Around Boston or on our Ashburnham land, I really hope we can begin to make miso or soy sauce.” Kushi says that now, after pasteurization, coloring and flavoring is added [not true, except in HVP soy sauce]. “Traditionally [in Japan] for this they used natural herbs. For a sweeter taste and darker color they traditionally used kanzō [kanrō?] or ‘sweet grass = sweet herb.’”

“Formerly, until modern technological methods started to be applied, almost each village made their own shoyu like this, either as a joint community project, or someone with money made it and sold it to several villages.”

Using bean and grain sprouts—moyashi (including soy sprouts). Other soybean products: Fried tofu (two methods for agé). Ganmodoki. Kori-tofu or koya-tofu (freeze-dried tofu). Soybean milk (“Soy milk is very yin.” Note: Most Japanese and Japanese scientists consider soymilk to be an “alkaline” {*arukari-sei*} beverage, which therefore promotes good health). Yuba. In the discussion (p. 28), yogurt made

by leaving soymilk unrefrigerated and “Chinese fermented tofu... fu nyu” are mentioned. The U.N. [United Nations] recommendations on food, using vegetable proteins.

Note: This is the earliest English-language document seen (April 2013) that uses the term “freeze-dried tofu” to refer to dried-frozen tofu. Freeze drying, which is an expensive, modern, high-tech process that uses a vacuum chamber to dry a frozen food, is not a good term to use for this traditional Japanese food which is air-dried naturally. Address: Brookline, Massachusetts.

709. Jewel Food Stores. 1974. Janie reports: How to use soy protein products! (Ad). *Chicago Tribune*. Feb. 28. p. S\_A23. • **Summary:** Jane Armstrong, Jewel’s home economist, begins: “In a recent column I discussed what soy protein foods are and why they are important. This week I’d like to tell you how to prepare and use them.

“There are two primary uses for textured vegetable protein: as extenders for ground meat and analogs, used as alternatives for meat, fish or poultry protein.” “TVP products” include “Burger Plus, Proteinettes, Williamson, and Red Skillet Dinners.”

“Meat alternatives are available in frozen forms (Morningstar Farms breakfast foods and Freezer Queen skillet dinners for example), dehydrated, and fresh forms.”

You may be surprised to learn that “One acre of land produces 500 pounds of soybeans, but only 58 pounds of beef! So, you can see what future implications are with TVP... Quite a few TVP products are now available at Jewel, so why not try one this week?”

A portrait photo shows Jane Armstrong. Address: 1955 North Ave., Melrose Park, Illinois.

710. *Changing Times (The Kiplinger Magazine)*. 1974. Now there’s “meatless meat.” It cuts your food costs and may be healthier too. 28(2):53-54. Feb.

• **Summary:** Discusses textured vegetable proteins. “With the exception of the imitation bacon bits, such as Bac-Os from General Mills and Stripples from Worthington Foods, the textured vegetable proteins have not been available on most supermarket shelves. Now you can expect to see more of them...”

“The big breakthrough for textured vegetable proteins came in February 1971 when the U.S. Department of Agriculture approved their use in the national school lunch program. Soy proteins, fortified with vitamins and minerals, can replace up to 30% of the meat in patties, stews, poultry and fish dishes served for school lunches...”

When meat prices soared, soy processing companies began to market a new class of nutritious, dehydrated meat extenders in two- to three-ounce “envelopes,” similar to dry soup. They are often sold near the meat counter or with “other semiprepared dinner mixes, such as Hamburger Helper. The packets may contain natural soy crumbles or

caramel-colored granules that blend well with beef. They also come unflavored, so you can add your own seasonings, or preseasoned...”

Note: This is the earliest English-language document seen (Aug. 2011) that uses the term “soy crumbles,” probably to refer to small chunks of textured soy flour.

“Last summer, a midwestern food chain took a full-page newspaper ad to inform shoppers of the advantages of TVP, the trademark for Archer Daniels Midland’s product...”

“Late last year Cargill, Inc., a large grain company, entered the consumer market in the Southwest with Burger-Plus, a lightly seasoned textured soy protein. It test-marketed three-ounce packages at two for 49 cents. Each package of mix and water stretched a pound of ground beef to a pound and a half. Other recent market entries include Grand Union’s seasoned and unseasoned ‘meat’ mixes, General Mills’s Burger Builder and A.E. Staley’s Burger Bonus. More firms plan to package soy products.”

711. Doving, Folke. 1974. Soybeans. *Scientific American* 230(2):14-21. Feb. Cover story.

• **Summary:** The subtitle reads: “Now in a class with wheat and not far behind corn as a major U.S. crop, they have become one of the nation’s main exports. They are thus playing an important role in balancing payments for imports.”

A chart (p. 19) shows that in the year ending 30 June 1973, soybeans and soybean products were America’s largest agricultural export, followed by wheat and flour, feed grains, animals and animal products, fruits and vegetables, cotton, tobacco, and rice, in that descending order. Soybeans now account for more than 5% of all U.S. exports.

A map (p. 16) shows soybean growing areas in the USA; Each dot represents 10,000 acres planted to soybeans as determined by the 1964 census of agriculture. Most soybeans are grown in the Midwest (Ohio, Indiana, Illinois, Iowa), north of the Ohio River, and all along the Mississippi and Wabash Rivers. Photos show: A close-up of a page full of harvested soybeans (p. 15). A field of soybeans (p. 21). A man standing atop a large quantity of soybeans, surrounded by metal silos. A nice illustration shows a soybean plant heavy with pods, and a close-up of two soybeans in a pod. Graphs show: (1) Production of soybeans from 1935 to 1973, worldwide, USA, China, and Brazil. (2) U.S. consumption of margarine and butter (total and individually) from 1930 to 1972, plus use of soybean oil for making margarine. (3) Consumption of meat, poultry, and energy; both are rising in the USA, leading simultaneously to an increased dependence on imports of petroleum and meat, and to the use of more farmland to raise food for domestic animals.

Concerning dietary changes (p. 19): “Soy protein is nutritionally somewhat less complete than meat, but the few deficiencies can be made up easily from other vegetables, including corn. A complete [vegan] diet without animal

products is therefore readily attainable. Many more meat imitations than are currently available could be made from soybeans, including analogues of several boneless meat and poultry cuts.

“A move toward a more vegetable diet would have several advantages for the public, such as lowering the cost of living and reducing the ingestion of fat. It would lessen the pressure of economic activity on the environment, since the current energy crisis is symptomatic of an impending scarcity of resources that would be greatly relieved if less land were used to feed domestic animals.

“The production of natural bacon, for example, requires ten times as much cropland as the same quantity of bacon analogue from soybeans; beef production calls for from 15 to 20 times as much land as is needed for soy protein. Moreover, since soybeans obtain their own nitrogen fertilizer, they draw less on the energy intensive industries that manufacture commercial fertilizers. The ecological pressure from high levels of application of nitrogen fertilizers would also diminish, because less nitrogen would leak into the ground water and streams.” Address: Prof. of Agricultural Economics, Univ. of Illinois, Urbana.

712. **Product Name:** Soy Burger.

**Manufacturer’s Name:** East West Cookery.

**Manufacturer’s Address:** East West Center, Franklin Street, Hollywood, California.

**Date of Introduction:** 1974 February.

**Ingredients:** Incl. cooked whole soybeans, fresh onions, fresh carrots, fresh parsley.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this consumer retail product in either late 1973 or early 1974.

He was born in Brazil, but he had to flee the country in the early 1970s. He went to stay with friends in Los Angeles. Then he moved into the East West Center, a macrobiotic commune at 7357 Franklin Ave., Hollywood, California. First he started working as Roy Steevensz’ assistant making foods. Then in late 1973 or early 1974 he started a company named East West Cookery, where he made Soy Burgers, which he sold to many health food stores around Los Angeles, including the Erewhon retail store. To make the burgers he would soak whole soybeans, pressure cook them until soft, then cool and mash them for use as a binding agent. He would mix the mashed soybeans with cooked brown rice and fresh onions, parsley, and carrots. He would shape the mixture into patties, which he baked in an oven. He made the burgers in the kitchen of the big East West Center. In terms of logistics, he would wake up at 4:00 in the morning, cook the soybeans and let them cool. Later, after others had finished breakfast in the kitchen, he would shape and bake the burgers. He would put these between buns, with lettuce, tomatoes, etc. wrap them in Saran Wrap, insert a black-and-white label in between 2 sheets of wrap, and

distribute them to stores. For more details, see interview with Ademar Reis, Nov. 1993.

713. Gerner, Bob. 1974. Log of trip to Japan to study traditional natural foods, 28 Feb.–2 March 1974. Part II (Log–unpublished). Westbrae Natural Foods Inc., Berkeley, CA 94710. 26 p. Unpublished log. Handwritten. 20 x 8 cm. • **Summary:** Continued: March 19, Tues. Take bullet train to Kyoto to meet Steve Earle of Muso Shokuhin. We 3 go to Okayama to see Fuchu Miso, that makes mugi miso (the barley miso sold in our store) and sweet white miso. The president’s wife is the epitome of Japanese woman. For lunch we have tofu burgers with Italian sauce and mushrooms in a bento made by Akiko. Delicious. Take a boat to Shodo-shima where Marushima Shoyu Co. is located. Island is also famous for toasted sesame oil. Arrive at a ryokan at 6:30 P.M. VIP treatment. Bath before dinner and served in private room by geisha. Too much fish! Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “tofu burgers.”

March 20, Wed. Miso soup for breakfast. Visit Marushima Shoyu where Muso gets its “natural” shoyu for export to America. They have the newest wheat roasters (they roast it with sand), biggest presses. We see cement aging tanks in a temperature-controlled room, then onto a large red building with 150 aging tanks. But we see no whole soybeans, only soybean meal (*dasshi daizu*). “I feel the owner is a liar and this is a bogus operation. The scene gets heavy and ugly. Bill is great and presses on with questions.” The owner claims that 40% of their shoyu is natural, aged for 3 years and made with whole soybeans; 60% made with soybean meal, temperature controlled for 7 months. Thus there should be about 120 vats of natural versus 60 regular. But where is the natural? Their faces turn red. We have caught them red handed. The owner take us to one musty, dirty old building with 25 vats, only 8 of which contain shoyu, some only half full. Lots of cockroaches. Looks like no one ever goes here. Still no sign of a single whole soybean. Uneasy departure. Steve Earle is embarrassed. We take a train to Tokyo. We present Earle/Muso with a list of inconsistencies and ask for a written reply.

March 21, Thurs. Visit Mr. Kazama’s miso factory (*Ikeda Kojiro Miso Shoten* in Kawaguchi-shi near Tokyo), that makes barley miso, the only brown rice miso in Japan, and shoyu. Call Ty Smith of Muso. He says Muso was very happy with our findings concerning the problems at Marushima, and that they have contacted a new source in Kyushu. Marushima said their president died a year or so ago and his son took over. They have lost the old feeling and tradition.

March 22, Fri. 6:00 A.M. Meet with Bill Shurtleff at his tofu master’s tofu shop (*San-Gen-Ya*, run by Mr. Toshio Arai). We watch how he makes tofu. Beautiful place (12 feet square) attached to their home. Beautiful people; they don’t

speak English. Both make tofu starting early in the morning. He delivers in the afternoon and she sells out of the shop. He gave me hot rich soymilk (from *kinugoshi*) with wild mountain honey. Both incredible. So sweet and delicious. They also serve us freshly made agé, kinugoshi, and natto. Lunch at Shurtleff and Aoyagi's home: Noodles and tofu, Chinese fried tofu, tofu pudding, agé, kinugoshi, and mikan orange. We go over my notes from the miso factory. We copy all of his notes. Then I leave, very sad, but the friendship will remain. Akiko is a remarkable lady. Meet Mr. Kazama and go to Pacific Trading. Lousy meeting with Mr. Masaaki Miki (sales manager), and Masa Miyashita (export dept). Go to airport.

Results of the trip: (1) Westbrae started (about 9 months later) to import many varieties of miso, plus shoyu, and other products from Mr. Kazama in Japan. Bob Gerner was the founder, president, and chairman of the board of Westbrae; (2) Bob Gerner and Liz Horowitz taught "Tofu and Miso Cookery Classes" in Berkeley during 1976; (3) Westbrae published and distributed widely two brochures, *What is Miso?* (May 1976) and *What is Tofu?* (July 1976) written by Shurtleff and Aoyagi; (4) In 1976 Westbrae Natural Foods Inc. decided to sell its retail store at 1336 Gilman St. in order to focus on being a distributor and importer. The store had been losing money. Bob Gerner bought it in June 1976 for the low price offered by the highest bidder. He remodeled the store, renamed it Gilman Street Gourmet, and re-opened it in Sept. 1976. In the spring of 1977 Gerner added a deli to the store; there he made and sold Tofu Burgers, Tofu Treasure Balls, and Tofu Steaks Sauteed in Ginger Sauce. The same week that the deli opened, Gerner sold 3,000 to 4,000 of his new Tofu Burgers out of the Westbrae booth at the New Earth Exposition in San Francisco. Bob's nephew and sister (Margaret) made the tofu burgers. The burgers sold equally well at the same Expo in 1978 and 1979; (5) Shurtleff and Aoyagi wrote *The Book of Miso* and their New-age Foods Study Center moved toward becoming Soyfoods Center.

Note: In late November 1974 Mr. Kazama came to a meeting at Pajaro Dunes by Santa Cruz, sponsored by The Well. The idea was to set up a natural foods trade association. Erewhon wanted to control all imports of Japanese natural foods from Japan. Janus and The Well both had to import through Erewhon. They said Westbrae must buy through them via The Well (Roger Hillyard/Pure & Simple), and pay a 5% commission. Kazama had to defer to them. Gerner refused and they backed off. Ty Smith, now head of Erewhon, was upset that Westbrae was not paying a commission. Gerner told him "Tough." So Westbrae ended up importing from Kazama. Address: President & Chairman of the Board, Westbrae Natural Foods Inc., 1224 10th St., Berkeley, California 94710.

714. Hunter, Beatrice Trum. 1974. Textured vegetable proteins: Satisfactory meat substitutes. *Consumers' Research*

*Magazine* 57(2):32-35. Feb. [2 ref]

• **Summary:** The author concludes that "Soy proteins are not an adequate substitute for meat, poultry, and fish." This articles focus mostly on TVP brand textured soy protein, which has been widely promoted. TVP products are inferior in nutrient quality to traditional animal protein sources. They are indigestible for some individuals and produce flatulence. Blended with ground beef at levels up to 25%, the TVP can leave an aftertaste. "It was estimated that by the summer of 1973 one out of every four food stores across the country was selling such blends. Such sales have often outstripped sales of pure ground beef... Vegetable proteins are now said to be selling at a total rate of \$83 million annually, but the industry anticipates sales to reach \$1,500 million by the end of the present decade.

"Clearly, TVP products do not represent a move toward the rational use of plant protein in a world headed toward a serious shortage of animal protein. Rather, these products must be viewed as a new triumph of food technologists and processors who have succeeded in persuading many individuals to substitute such 'reasonable facsimiles' for real, natural foods."

715. *Japan in Pictures*. 1974. Bill Shurtleff, a perfect mania for bean curd. American who has come to Japan to study Zen. 16(1):16-17. [1 ref. Eng]

• **Summary:** Shurtleff is a 31-year-old American who has come to Japan to study Zen meditation and tofu. Five large, black-and-white photos of Shurtleff show him: (1) Deep-frying "ganmodoki" [tofu burgers] at San-Gen Ya, the shop of tofu master Toshio Arai in Nerima-ku, Japan, where Shurtleff is an apprentice, learning how to make tofu in the

traditional Japanese way. (2) Ladling cooked soybean puree (gô) out of the cauldron into the pressing sack. (3) Standing next to Mr. Arai. Much of the equipment in the shop can be seen as Mr. Arai talks about making tofu. (4) With Mr. and Mrs. Arai, sitting on the step that leads from their tofu shop into their home. (5) One sitting in full lotus position practicing meditation in the home of Mr. and Mrs. Kinjiro Aoyagi in Nerima-ku. His head is shaved and a small altar is in the background. Another article on previous pages of this issue discusses a new method for making instant tofu. Address: Japan.

716. Zell, Fran. 1974. New on the shelves: Brown, serve, and get 'em going early (Ad). *Chicago Tribune*. March 14. p. W\_A4.

• **Summary:** “(These products have been taste-tested by members of the Tribune food staff). Consumers trying to cut down on cholesterol and saturated fat now can try three new Morningstar Farm [sic, Morningstar Farms] breakfast products made from vegetable protein derived from wheat, soy, and yeast, Brown and serve Breakfast Patties, Links, and Slices, contain no cholesterol or animal fat and at least as much protein as the comparable cooked meat.”

The products are distributed by Miles Laboratories.

717. Dullea, Georgia. 1974. You don't have to be a Seventh-Day Adventist to like their cooking. *New York Times*. March 25. p. 37.

• **Summary:** They are teaching vegetarian cooking classes, and they are good at it. One couple took the classes and have been meatless for five months. To satisfy their taste for meat, they are eating the “vegetable protein food the Adventists produce under the Loma Linda label. Four soy patties cost 50 cents compared to about \$2 for the same amount of meat.”

The world's 2 million Adventists are not all strict vegetarians; while such a diet is recommended by the church, it is not considered a test of faith. Most Adventists avoid coffee, tea, cola beverages, and strong spices. A recipe for eggless “Soy mayo” (using ½ cup soy milk powder) is given.

718. **Product Name:** Bac-O-Bits, and Bontrae (Now made from Textured Soy Flour).

**Manufacturer's Name:** General Mills, Inc.

**Manufacturer's Address:** 9200 Wayzata Blvd., Minneapolis, MN 55440.

**Date of Introduction:** 1974 March.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1974. p. 124. “Textured Vegetable Proteins (Extruded).” Note that General Mills has reformulated their crumbled bacon analog to include textured soy flour as the main ingredient. It was formerly named Bac-O\*s and made with spun soy protein fibers.

719. **Product Name:** Loma Linda Non-Meat Balls

(Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1974 March.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1974. p. 120. “and ‘meat’ balls.”

720. *Tennessee Valley Authority, Bulletin*. 1974. Soybean: Production, marketing and use. Y-69. 187 p. March. Foreword by Gerald G. Williams, Agricultural Development, Tennessee Valley Authority. Illust. No index. 28 cm. [265 ref]

• **Summary:** Contents: The soybean, status and trends. Soybean production. Harvesting soybeans. Storage and handling. Marketing and use. Strategies for reaching potentials.

This conference was sponsored by the Tennessee Valley Authority, American Soybean Association, National Soybean Crop Improvement Council, and land-grant universities of seven valley states. It represents a multi-institutional, multi-disciplinary approach to identifying and developing the potentials for soybeans in this region.

On page 117, titled “Marketing and Use,” a full-page black-and-white photo shows various soy-related food products: Soy Town Roasted Soy Beans (Sea Salted), Wesson Pure Vegetable Oil, Kroger Bac'n Buds, Jell-o Whip'n Chill (Deluxe Dessert Mix), Nabisco Famous Cookie (Sampler, incl. Oreo, Lorna Doone, Cameo, etc.), Worthington Stripples, Butternut Candy Bar, Red Bird Imitation Vienna Sausage, Kroger's Pro Beef and Hydrated Textured Vegetable Protein Mix (keep refrigerated), Soft Parkay Margarine, Nestlé Crunch, Lipton Onion Soup and California Dip, Kraft Creamy Dressing, plus frankfurters and bread. Address: Muscle Shoals, Alabama.

721. *Newsweek*. 1974. Running out of food? April 1. p. 40-41.

• **Summary:** “In the last two years, famine has threatened India and visited widespread misery upon the sub-Sahara nations of Africa where an estimated quarter million people have died. Scarcely less shocking, half of the world's 3.7 billion people live in perpetual hunger. The industrial nations are swiftly buying up the dwindling supplies of food and driving up food prices so high that poorer countries cannot afford to pay them.

“Prospects for the future are clouded by the old Malthusian specter of population growth. A year from now there will be 4 billion human beings on earth, and by the end of the century that figure is expected nearly to double to 7.2 billion. Food production is simply not growing fast enough to feed that many mouths, and it is unlikely to do so in the decades ahead. A complicating factor in the race between food and people is the burgeoning affluence in

such parts of the world as Western Europe, Japan and the Soviet Union. Rising expectations in these areas have bred strong new demands on the world's food supplies. More and more people want their protein in the form of meat rather than vegetables, and this in turn has driven up the need for feed grains for the growing herds of livestock. 'Affluence,' argues economist Lester Brown, 'is emerging as a major new claimant on world food resources.'

"Even Agriculture Secretary Earl Butz, a notorious optimist on the subject of food, concedes that Americans may have to substitute vegetable for animal protein. 'We have the technology,' Butz told Newsweek's Tom Joyce reassuringly, 'to make better hamburgers out of soy beans than out of cows.'"

722. Nagelberg, Alvin. 1974. They'll eat (soy) shrimp, (soy) ham, (soy) filet: Boyd [sic, Boyer]. *Chicago Tribune*. April 14. p. A7.

• **Summary:** This is a brief biography of Robert Boyer [mistakenly called "Robert Boyd" throughout], age 64. He predicts that within five years housewives will buy shrimp, ham, and filet mignon made from soybean protein. More than 40 years ago, during the Great Depression, he was hired by Henry Ford to find industrial uses for farm crops. World War I interrupted the experiments. Boyer resumed work at a laboratory in Cincinnati, Ohio [Drackett Co.], and in 1949 he applied for his patent, which was issued in 1951.

Today Boyer is a part-time consultant to the Marshall division of Miles Laboratories (Worthington, Ohio); his patent for making edible protein fibers from soybeans expired in 1971. Yet he has done well. He is semi-retired, has a 57-foot cruiser, and condominiums in Florida and Columbus, Ohio.

Miles' first products have been targeted at the vegetarian and health foods markets. One of Miles' latest products is Morningstar Farms sausage, a frozen product made of soy protein, egg albumen, and wheat gluten. "The egg is a binder and the wheat makes it chewy."

723. Gnileerb, J.L. 1974. 2074 and all that. *Nutrition Today* 9(2):30. March/April.

• **Summary:** A humorous article. "The many food products formulated from soybeans have been a staple of the American diet for generations." The author, an eminent orthonutritionist, who contends he was born in 2030, is trying to locate alternate sources of protein. He describes his experiments to make imitation soyburgers out of beef. "Animal tissue and, in particular, beef provided a large portion of the protein in the American diet at one time. A few very old Americans may actually have tasted beef, and they may remember that some of the first soybean products on the American market were beef analogues." A cartoon shows a man viewing a restaurant menu with 6 flavors of soybean sandwiches.

724. *Better Homes and Gardens*. 1974. Soy savvy. 52:136. May; 52:99 June; 52:124 Nov.

• **Summary:** Part 1 gives a recipe for an Italian meat loaf using a mixture of ground beef and textured soy protein. Use of the TVP saves money and the soy protein absorbs the meat juices so the finished product is more moist and flavorful. And there is less shrinkage and no cholesterol.

Part 2 uses whole soybeans with millet in a meatless burger. Part 3 uses ham-flavored textured vegetable protein bits (soy) in a "Ham" medley recipe—a noodle casserole.

725. Erewhon. 1974. Natural and organic foods: Supplying natural food stores, co-ops, schools and communities (Catalog). Boston, Massachusetts. 16 p. Effective June 1974.

• **Summary:** The structure and design of this catalog is quite similar to the previous one of April 6, however four pages of new products and sizes have been added. The background of the illustration has been changed but the foreground is the same; it is now copyrighted by Erewhon. The note from Paul Hawken has been replaced by a similar one signed "the erewhonians." OG = Organically grown.

New additions to the catalog: Flyers: (1) Organic Merchants: The flour story. The salt story. (2) Issues of *East West Journal*. From Vol. IV, No. 6, July 1974, "Energy" to Vol. IV, No. 9, Oct. 1974, "Healing." (3) Natural Recipes: Three by five inch tear-off pads, each pad containing 100 of the same natural-food recipe. Four assortments (A-D), eight different pads in each assortment. There is one soy-related recipe pad in each assortment: (A) Soybeans au gratin. (B) Miso soup. (C) Soybean casserole. (D) Soyburgers.

This catalog cover (blue on white) was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

726. Edwards, Larry. 1974. Soy extenders remain 'food of the future' as category sales dwindle. *Advertising Age*. July 29. p. 3, 46.

• **Summary:** Sales of textured soy protein products have dropped along with the price of ground beef. "The category, which sources say peaked at about \$4,000,000, now reportedly has dipped to about \$3,000,000, with most of the products gathering dust on retail shelves."

"Last year, in response to consumer disenchantment with skyrocketing meat prices, a flood of branded consumer meat extender entries hit the market. To date only Plusmeat from Central Soya's J. H. Filbert Co. has moved into broad distribution. Among other extender entries in limited test markets: Burger Bonus and Tuna bonus from A. E. Staley's consumer products group; Betty Crocker's Burger Builder from General Mills; Armour-Dial's Burger Savor; Ac'cent

ground beef extender from Ac'cent International, and Progresso Foods' Extend'n Flavor."

"Miles' Worthington Foods unit, forerunner to its development of Morningstar Farms, already has over a 50% share of an estimated \$12,000,000 vegetable protein market for religious groups such as Seventh Day Adventists.

"According to researchers at Frost & Sullivan, New York, market research company, the total vegetable protein market jumped to about \$115,000,000 during 1973, but has since leveled off. Its size was put at \$82,000,000 for 1972, and the company predicts it will climb to \$1,500 million dollars by 1980."

Miles Laboratories has stayed away from positioning their Morningstar Farms products as "meat substitutes." Other products that continue to do well are Gooch Foods' TVP Red Skillet Dinners and General Mills; Bac\*O's, one of the original consumer vegetable protein products.

"Miles' Worthington Foods unit, forerunner to its development of Morningstar Farms, already has over a 50% share of an estimated \$12,000,000 vegetable protein market for religious groups such as Seventh Day Adventists.

According to researchers at Frost & Sullivan, New York, a market research firm, the total vegetable protein market jumped to about \$115,000,000 during 1973, but has since leveled off. Its size was put at \$82,000,000 for 1972, and the company predicts it will climb to \$1,500 million by 1980.

727. Dunham, Wayne. 1974. Filet of soybeans. *Chicago Tribune*. Aug. 28. p. C4.

• **Summary:** The "meatless meat dish" is about to become widely available in the United States. Through its ad agency, Tatham-Laird & Kudner, Miles Laboratories is about to start "nationwide marketing of breakfast links and patties made from vegetable proteins, such as soybeans, instead of meat. The products, under the Morningstar Farms brand name will be available in most major supermarkets."

728. Brody, Jane E. 1974. Soybean has become the focus of drive to give more protein to world's hungry. *New York Times*. Oct. 12. p. 62.

• **Summary:** "This is the second of two articles on the drive to increase the amount of protein in the human diet." These are part of a series of articles examining the world food situation.

Americans are already familiar with at least two products made from soybeans: bacon-flavored bits and hamburger extender (also known as "textured vegetable protein"). Scientists believe that Americans will be among the hardest to please with new protein sources. General Mills, Inc. is presently test-marketing two soy protein meat analogues named "Country Cuts"—frozen, ready to eat cubes with the texture or flavor of chicken or ham. They are 25-40% less expensive than the meats they imitate. These products contain meat-like fibers made from defatted

soybean flour and pumped through a "spinnerette," which resembles a showerhead. The chewiness of the "Cuts" can be changed by adjusting the stretch on the fibrils as they pass through the spinnerette.

University of Illinois food scientists Steinberg, Wei, and Nelson are taking a different approach. Starting with the whole soybean (oil and all), they have developed a wide range of foods from soy "milk" and "yogurt" to an ice cream-like dessert, custard, and flakes—and gotten rid of the normal "beany" or "painty" flavor by heating the beans to inactivate the enzyme that causes it.

Another approach is fortification of foods with soy flour or the missing amino acids. Some are working to extract protein from green leaves or from waste, others to grow single-cell protein.

Some of these approaches are little more than ideas, on which a great deal of research needs to be done. However for others, such as "various soy foods" and fish protein concentrate, the technology has been nearly or completely worked out, at least on a pilot scale, and "could theoretically be incorporated soon into the diets of protein-starved people. But the obstacles to such incorporation are substantial."

Note 1. This is the earliest English-language document seen (Aug. 2013) that uses the term 'soy "milk"' in connection with soy milk.

Note 2. This article was reprinted in the *Times of India* (New Delhi) on 16 Oct. 1974 (p. 6) under the title "Looking for new protein sources in war on malnutrition."

729. Carruthers, Jeff. 1974. Ottawa appears baffled, stalling on what to call vegetable wiener. *Globe & Mail (Toronto, ONT, Canada)*. Oct. 29. p. 15.

• **Summary:** It will be months until an "all-vegetable wiener and other cheaper simulated meat products" are introduced for cost-conscious Canadian consumers, because of "federal Government infighting over naming and labeling these foods-of-the-future.

The Agriculture Department, defending the interests of Canada's meat industry, is opposed to the use of any "traditional" meat names—such as steak, burger, hamburger, wiener, sausage, and the like—for "non-meat or mostly non-meat simulated products." However Agriculture Minister Eugene Whelan said that a name such as "soyabean steak" was acceptable; the advertising could even say that it "tastes like beef."

However the Consumer Affairs Department, with support from the Health Department, has proposed that "the new vegetable protein products be called 'simulated' meat products." The label for a "simulated beefsteak" should state that it contains either "no meat or less meat than the traditional product."

In early 1973, while the regulations were being discussed, "some supermarkets in Eastern Canada introduced 'soyaburger' products (mixtures of real hamburger and soya

protein, made to look like hamburger, that sell for less than hamburger).”

At that time, “the federal government decided to allow soyaburger products to be marketed, even though they were not covered by the Food and Drugs Act.”

Now, consumers will have to wait. The issue is expected to be resolved before the year’s end.

730. Dinshah, Freya. 1974. *The vegan kitchen*. 9th ed. Malaga, New Jersey: The American Vegan Society. 48 p. Illust. Index. 29 cm. Spiral bound.

• **Summary:** A lifetime vegetarian, the author has been a vegan since 1959, and the Secretary of the American Vegan Society since 1960. Married to AVS President H. Jay Dinshah, she is an accomplished author, lecturer, and teacher. In this 9th edition, soy-related recipes include: Soya sprouts (p. 14). Soya patties (with soya flour, baked in an oiled dish, p. 23). Soya rounds (with whole soybeans, baked on a lightly oiled baking sheet, p. 24). Soya beans (dry roasted [soynuts], p. 25). How to shell green soya beans (p. 25). Soya loaf (with cooked soya beans, baked, p. 28). Soya butter (made with soya powder/flour, p. 29; this is not really soynut butter). Sesame/soya milk (with soya powder/flour and dates, p. 30-31; a photo shows a bag of Fearn Natural Soya Powder). Quick soya/tahini milk (with soya powder/flour, p. 32). Soya cheese Americana (tofu made with soya powder/flour and coagulated with lemon juice, p. 32). British Plantmilk cheese (tofu made with Plamil and lemon juice). Australian soya cheese (with soya powder, p. 33). Vegan soya/potato mayonnaise (with soya milk, p. 33). Basic jelled ice cream (with soya milk and agar-agar, p. 38).

The cover of this cookbook states: “Comprehensive total-vegetarian natural food system. Nutritionally balanced. Scientifically sound. Healthful and humane. Ethically unassailable. Ecologically superior. Recipes, menus, ideas, illustrations.” Address: The American Vegan Society, 501 Old Harding Highway, Malaga, New Jersey.

731. Farm, The. 1974. *Yay soybeans! How you can eat better for less and help feed the world*. Summertown, Tennessee: The Book Publishing Co. 14 p. Illust. 22 cm.

• **Summary:** This highly creative little booklet, printed with blue ink on white paper (a similar 1978 edition used brown ink on white paper), contains many original / pioneering soyfoods recipes (marked with an asterisk (\*)). Contents: Living on soybeans. Some of our favorite ways to eat soybeans. Basic cooked soybeans: Soybeans and tortillas, Soybean stroganoff, Soyburgers, Soy fritters, Cheezy soybeans (Good Tasting Nutritional Yeast gives the cheezy flavor), Soy nuts (dry roasted), Soy coffee. Soy milk: Homemade using soy flour or using soybeans, Soy ice cream—“Ice Bean,”\* (made with soy milk in vanilla or cocoa flavors), Soy yogurt\* (p. 5, made with soymilk and starter from Chr. Hansen’s Lab. in Milwaukee, Wisconsin).

Soy flour: Basic salad and sandwich spread, Seasoned sandwich spread. Soy cheese\* (made from fermented / soured soymilk), Soy cheesecake\* (made with “soy cheese”), Cookie crust for cheesecake, Soy mayonnaise\* (made with soymilk). Soy pulp [okara]: Introduction, Soy pulp burgers\*, Scalloped potatoes and pulp, Soysage\*, Protein spice cake (with soy pulp), Soy pulp cookies, and Soyola\* (soy pulp granola). Eggless cookery: Introduction, Pancakes (with soymilk), Chocolate cake (with sour fresh soymilk), Soy soufflé (with soy flour). Good Tasting Nutritional Yeast: Introduction, Melty nutritional yeast “cheese,” Nutritional yeast “cheese” crackers, Golden gravy. Nutrition of soybeans: Nutritional composition of 1 cup whole cooked soybeans, 1 cup sweetened soymilk, 1 cup mother’s milk, 1 cup cow’s milk. “We supplement our soymilk with vitamin A (150 mcg./cup), vitamin D (2.5 mcg./cup), and vitamin B12 (6 mcg./cup).” Composition of soymilk and soypulp (wet and dry, including PER). Some facts about people and food. Plenty.

Page 1 begins, “On The Farm we live on soybeans. They supply us with the protein part of our diet, taking the place of meat, fish, eggs, milk, and dairy products. We are complete

## SOYSAGE

4 cups soy pulp	1 ½ t. sage	½ t. cayenne
1 cup whole wheat flour	2 t. fennel seed	2 T. brown sugar
1 cup wheat germ	1 t. black pepper	2 T. liquid smoke (opt.)
¾ cup oil	¼ cup soy sauce	2 T. garlic powder
1 ½ cups soy milk	3 t. oregano	2 T. wet mustard
2 cups nutritional yeast	2 t. salt	2 t. allspice

Mix ingredients. Oil an ovenproof bowl or empty tin can, fill it, cover with tin foil. Steam on a rack in a covered pot or pressure cooker in 5 cups of water for at least half an hour. When it sits until cool, you can slice it and fry it. Use your imagination and whatever ingredients you have on hand.

## PROTEIN SPICE CAKE

2 cups soy pulp	2 cups sugar	1 T. cinnamon
2 cups white flour	2 cups soymilk (or water)*	1 t. ground cloves
4 t. baking powder	4 T. oil	1 t. ginger
1 t. salt	1 T. vanilla	1 t. nutmeg

Sift flour, baking powder and salt together. Add to soypulp and mix well. Add sugar and mix. Gradually add soymilk (or water) and mix. Add oil, vanilla and spices and mix well. Pour into an oiled 9 x 12 inch pan and bake at 350° for 35 to 45 minutes, top it with your favorite icing, and serve your family their protein for dessert!

## SOY PULP COOKIES

2 cups flour	½ cup margarine	½ t. salt
2 cups soy pulp	½ cup soymilk (or water)*	1 t. vanilla
1 ½ cups sugar	4 t. baking powder	

Sift together flour, salt and baking powder. Add soy pulp and mix well. Cream oil and sugar. Add soymilk or water and dry ingredients alternately. Mix well. Add vanilla and mix well. Drop by the spoon on an oiled cookie sheet and bake 20 minutes at 400°. This is a basic cookie dough to which you can add your favorite flavorings.

## SOYOLA

8 cups soy pulp	5 T. oil	1 T. vanilla, maple, or other flavoring (optional)
1 ¼ cups sugar	1 t. salt	

Thoroughly mix all ingredients in a bowl. Heat a large cast iron skillet and toast mixture over moderate heat, stirring constantly, scraping the bottom of the pan often. This mixture will stick at first, but perseverance furthers. As it dries out, it will stick less. Toast for about one hour, until brown and sharply crunchy. Store airtight after it cools. Serve as a breakfast cereal, plain or with soymilk.

Variations: Add rolled oats, nuts, or sesame seeds before toasting. Add raisins after toasting.

\*This recipe was developed with pulp from our soy dairy, which is drier and coarser than pulp from homemade soy-flour milk. If you're using soy-flour pulp, omit, or reduce the quantity of soymilk (or water).

## SOME FACTS ABOUT PEOPLE AND FOOD

Half the people in the world will go to sleep hungry tonight. Hunger is hardest on babies and children. They need lots of protein while they're growing rapidly. To us, eating meat in a hungry world doesn't make sense. We need more relief efforts, more agricultural and nutritional research and more education. But, basically, what's happening is that the consumption of expensive animal products in the rich countries is making it increasingly difficult for the people in the poor countries to get enough to eat.

*Suppose you eat ½ pound of meat and drink one pint of milk a day. The amount of grain and beans necessary to produce that much animal protein could feed ten people for that day.*

Two pounds of soybeans a week will give you all the protein you need. The United States grows ¾ of all the soybeans in the world—enough to feed one billion people or almost a quarter of the world. However, our soybeans feed only 1/20 of the world because most of our crop is consumed in America, Europe and Japan by livestock. On the average, in the U.S. it takes eight pounds of feed protein to produce one pound of meat protein.

More grain is used for feed in America, Europe and Japan, than is eaten by all the people in India and China combined. Grain sorghum is a basic staple cereal in many parts of Africa—places where there are people starving today. In America 98% of the grain sorghum crop is fed to animals. Many countries must import grain to feed their people. The rising demand for meat in the rich countries has increased prices on the world grain market so much that some of the poor countries will not be able to afford enough food next year.

The right to eat should be included under the universal right to life, liberty and the pursuit of happiness. Hunger is not necessary. There's enough to feed everybody right now.

## PLENTY

Living in Tennessee and eating our soybeans hasn't seemed like quite enough to be doing about world hunger and other areas of human need around the planet. So we have formed a new non-profit corporation called PLENTY, with the following purposes, as stated in its charter:

"To help share out the world's food, resources, materials, and knowledge equitably for the benefit of all;

"To help and aid any people anywhere in the world who due to any natural or man-caused disaster such as drought, famine, flood, earthquake, tidal wave, weather imbalance, disease epidemic, storm, fire, insect devastation, crop failure, population imbalance, war, political oppression, religious oppression, racial discrimination, or greed, are in need of food, clothing, shelter, medical aid and supplies, resources, materials; agricultural, engineering, or scientific assistance or education; or anything else, to enable them to lead healthy, comfortable, responsible, and productive lives in the pursuit of happiness...

"To accept donations, gifts, devises, bequests, and loans of food resources, materials, equipment, funds, stocks, bonds, and property of all kinds from any and all sources to help achieve the purposes of the corporation;

"To establish and coordinate a group of volunteer workers who will help achieve the purposes of the corporation; such volunteers will not be salaried, but will receive only necessary subsistence...

"To enter into any partnership or union of interest with others ...or produce food, resources, materials, funds, or knowledge that will help achieve the purposes of the corporation;

"To establish and operate orphanages and foster homes to care for and provide homes for orphans from all countries of the world..."

"To help and aid in finding homes with adopting parents for orphans from all countries of the world, and to help these orphans settle in these homes with adopting parents..."

We really do have PLENTY. Let's spread it around!

For further information, write: PLENTY, Route 1, Box 289, Summertown, Tennessee 38483.

If you make soymilk, you'll have soy pulp left in the cloth when your milk is done. Our soy dairy produces lots of pulp every day, and although the pulp contains less protein than the milk, the protein it has is high quality, so we've been putting our creative kitchen instincts to work developing new ways to use this nutritious foodage. We've found that soy pulp can be substituted for rice in many recipes. It also can be used in baked goods like cake and cookies, where it gives a coconutty flavor when combined with sugar and vanilla extract. It's also good sauteed with onions and other vegetables and spices, and when spiced it makes a good filling for ravioli, etc. Just remember: to be easily digested, soy pulp must be cooked until it's soft. We recommend pressure cooking pulp made from soy grits (ground soaked beans) for 20 minutes in 1/3 cup of water for every cup of pulp.

Here are a few recipes to stimulate your imagination. Try some of your own and share your results with us so we can pass them on to others.

### SOY PULP BURGERS

(This recipe is best made with fine pulp from soy-flour milk.)

2 cups soy pulp  
 ¼ cup rolled oats  
 ¼ cup cornmeal  
 1 t. salt

½ t. garlic powder  
 ¼ t. pepper  
 mustard to taste

Mix ingredients into a thick batter. Cover the bottom of a flat bowl or pan with an additional ¼ cup of cornmeal. Make a pattie and lay it in the cornmeal to cover one side. Turn it over and do the same. Fry in a skillet in ¼ cup of oil until crisp. Good with mustard, relish, ketchup, raw onions, pickles—whatever you like.

vegetarians and don't eat any of those foods. We are growing 150 acres of soybeans this year to feed our community of 800 folks... We've been living, working, and growing on this diet for four years now, as a community, and many of us have been vegetarians longer than that. So far we've delivered 230 babies here on the Farm..." The last page notes that The Farm has "formed a new non-profit corporation called Plenty, with the following purposes, as stated in its charter: To help share out the world's food, resources, materials, and knowledge equitably for the benefit of all..."

The section titled "Soy Pulp" (p. 7) states: "If you make soymilk, you'll have soy pulp left in the cloth when your milk is done. Our soy dairy produces lots of pulp every day, and although the pulp contains less protein than the milk, the protein it has is high quality, so we've been putting our creative kitchen instincts to work developing new ways to use this nutritious foodage. We've found that soy pulp can be substituted for rice in many recipes. It also can be used in baked goods like cakes and cookies, where it gives a coconutty flavor when combined with sugar and vanilla extract..." Three recipes are given.

The last page is about "Plenty." "Living in Tennessee and eating our soybeans hasn't seemed like quite enough to

be doing about world hunger and other areas of human need around the planet. So we have formed a new non-profit corporation called Plenty, with the following purposes, as stated in its charter:

"To help share out the world's food, resources, materials, and knowledge equitably for the benefit of all.

"To help and aid any people anywhere in the world who due to any natural or man-caused disaster such as drought, famine, flood, earthquake, tidal wave, weather imbalance, disease epidemic, storm, fire, insect devastation, crop failure, population imbalance, war, political oppression, religious oppression, racial discrimination, or greed, are in need of food, clothing, shelter, medical aid and supplies, resources, materials; agricultural, engineering, or scientific assistance or education; or anything else, to enable them to lead healthy, comfortable, responsible, and productive lives in the pursuit of happiness..."

"To accept donations, gifts, devises, bequests, and loans of food resources, materials, equipment,

funds, stocks, bonds, and property of all kinds from any and all sources to help achieve the purposes of the corporation;

"To establish and coordinate a group of volunteer workers who will help achieve the purposes of the corporation; such volunteers will not be salaried, but will receive only necessary subsistence..."

"To enter into any partnership or union of interest with others... or produce food, resources, materials, funds, or knowledge that will help achieve the purposes of the corporation;

"To establish and operate orphanages and foster homes to care for and provide homes for orphans from all countries of the world..."

"To help and aid in finding homes with adopting parents for orphans from all countries of the world, and to help these orphans settle in these homes with adopting parents..."

"We really do have Plenty. Let's spread it around!"

"For further information, write: Plenty, Route 1, Box 289, Summertown, Tennessee 38483."

Note 2. This is the earliest English-language document seen (June 2013) that uses the term "soy pulp" or the word "soypulp" to refer to okara.

Note 3. This is the earliest document (Oct. 2013) seen that contains a recipe for a soy cheesecake (one of two documents).

Note 4. This is the earliest document seen (June 2013) that uses the word “soysage” to refer to a meatless sausage-like food product in which soy pulp is the major ingredient. Whereas the original 1943 Soysage was a meatless dry mix, a yellow meal containing soy flour, peanut flour, cottonseed flour, etc., this Soysage is ready to be sliced and fried.

Note 5. This is the earliest document seen (Jan. 2010) concerning Plenty (Summertown, Tennessee).

Note 6. This is the earliest document seen (Feb. 2002) that mentions tofu (called “soy cheese”) in connection with The Farm.

Note 7. This is the third earliest publication seen (Jan. 2003) in the SoyaScan database under the subject heading “Soyfoods Movement.” Address: Tennessee.

732. Ford, Frank. 1974. *Pack to nature: Nutrition made easy in the home or in the woods*. Fort Worth, Texas: Harvest Press. vii + 157 p. Introduction by Roger Hillyard. Index. Oct. 18 cm. [13\* ref]

• **Summary:** This book, containing over 250 recipes, describes how to use whole, natural food staples in quick, easy to prepare dishes. By Sept. 1976 this book had become *The Simpler Life Cookbook from Arrowhead Mills*.

In the introduction, Roger Hillyard (writing in Oct. 1974 from Soquel, California) recalls that in late February of 1969, he and his wife and daughter were returning to Boston from California. They stopped in the small Texas town of Hereford to visit Deaf Smith County and the company that was supplying food to a growing number of natural foods followers and devotees—including Erewhon. Four years later they spent a year in Hereford working with Frank Ford and Arrowhead Mills. “During the five years I have worked with, lived with, and been friends with Frank, I have witnessed one of the most dramatic and beautiful personal unfoldings. Frank never wore that robe of self-righteousness, and he helped me to exchange mine for something more embracing.”

Soy-related recipes include: Quick soy pancakes (with soy flour, p. 35). Soybean salad (with cooked soy flakes, p. 43). Quick tamari orange salad dressing (with tamari soy sauce, p. 47). Paul’s salad dressing (with tamari, p. 47). Soybean chili (with dry soybeans and “tamari soysauce,” p. 54). Sprout soup (with 2 cups fresh soybean sprouts, p. 54). Sprouted lentil soup (with soy flour, p. 55). Squash stew (with soy flakes, p. 55). Tamari bouillon (p. 56). Vegetable-soy-sesame soup (with soy flakes, p. 59). Basic soybeans (p. 74). Basic soy flakes (p. 75). Basic bulghur-soy grits (p. 75). Lentil soy loaf (with cooked soybeans or soybean flakes, p. 84). Soy & mushroom loaf (with soy flakes, p. 85). Soy patties (with soy flakes, p. 87). Stuffed peppers (with soy flakes, p. 87). Soyflake & tahini spread (with soy flakes, p.

106).

A 2-page directory titled “Some Natural Foods Sources” (p. 153-54) lists 30 of the natural food industry’s pioneers, including Akin Distributors, Inc. (Tulsa, Oklahoma), Arrowhead Mills, Inc. (Hereford, Texas), Basic Needs (Grand Prairie, Texas), Cinagro Distributors, Inc. (Atlanta, Georgia), Cliffrose (Longmont, Colorado), Collegedale Distributors, (Collegedale, Tennessee), The Concord (Snowflake, Arizona), Deer Valley Farms (Guilford, New York), Eden Organic Foods (Ann Arbor, Michigan), Erewhon Trading Company (33 Farnsworth St., Boston, Massachusetts 02210, and 8454 Steller Dr., Culver City, California 90320), Food for Health (Phoenix, Arizona), Food for Life (Elmhurst, Illinois), Good Food People (Austin, Texas), Great Plains Distributors (Kansas City, Missouri), Happy Health Products (Miami, Florida), Janus (Seattle, Washington), Laurelbrook Foods (Bel Air, Maryland), Lifestream Natural Foods (Vancouver, BC, Canada; Ratana and Arran Stephens), Mottel Health Foods (New York, NY), Naturally Good Foods (Hereford, Texas), Nu-Vita Foods Inc. (Portland, Oregon), Organic Foods & Gardens (City of Commerce, California), Shadowfax (Binghamton, New York), Shiloh Farms (Sulphur Springs, Arkansas), Taiyo, Inc. (Honolulu, Hawaii), Tree of Life (St. Augustine, Florida), Vim & Vigor (Honolulu, Hawaii), The Well (San Jose, California), Walnut Acres Inc. (Penns Creek, Pennsylvania).

A small photo on the rear cover shows Frank Ford out hiking, wearing a backpack.

Note: This is the earliest published document seen (Feb. 2010) concerning Lifestream Natural Foods (Vancouver, BC, Canada). Address: Deaf Smith County, Texas.

733. **Product Name:** Betty Crocker Country Cuts (Textured Soy Protein) [Ham, or Chicken flavored].

**Manufacturer’s Name:** General Mills, Inc.

**Manufacturer’s Address:** Minneapolis, Minnesota. Phone: 612-540-2311.

**Date of Introduction:** 1974 October.

**How Stored:** Frozen.

**New Product–Documentation:** Brody, Jane E. 1974.

“Soybean has become focus of drive to give more protein to world’s hungry.” *New York Times*. Oct. 12. p. 62. Scientists believe that Americans will be among the hardest to please with new protein sources. General Mills, Inc. is presently test-marketing two soy protein meat analogues named “Country Cuts”—frozen, ready to eat cubes with the texture or flavor of chicken or ham. They are 25-40% less expensive than the meats they imitate. These products contain meat-like fibers made from defatted soybean flour and pumped through a “spinnerette.” The chewiness of the “Cuts” can be changed by adjusting the stretch on the fibrils as they pass through the spinnerette.

*Quick Frozen Foods* 1975. Oct. p. 25. “\$100-million market by 1980 is foreseen for frozen soy extenders

and analogues. Textured soy protein.” “General Mills is producing retail frozen soy products under the ‘Betty Crocker’ label in addition to ‘Bontrae.’ First introduced were Betty Crocker Country Cuts—textured soy protein with a flavor like ham, and Country Cuts with a flavor like chicken. The precut chunks may be thawed and served in salads or added directly from the freezer and heated with various hot dishes.”

734. Peterson, Franklynn. 1974. The bean that’s making meat obsolete. *Popular Mechanics* 142:84-87, 188. Oct.

• **Summary:** The subtitle continues: “Scientists are finding new ways to use the soybean, a staple for thousands of years, in creating new foods for a hungry world.” A full-page flowchart shows how soybeans are processed to make a variety of end products. “Almost fully automated plants can process 200,000 bushels of soybeans a day. Every part of the bean is useful, even the hull, which goes into animal feed. Meat analogs are textured soy products made to look and taste like chicken or ham.” A table, based on 1973 figures from Kansas State Univ., shows the comparative cost of a pound of protein from various sources: 50% [whole] soy flour is the least expensive at \$0.14, followed by wheat germ \$0.27, 70% protein [defatted] soy flour \$0.30, wheat \$0.38, isolated soy protein \$0.40, milk solids \$0.44, yeast \$0.67, eggs \$0.85, and beef \$4.20. This a pound of protein from beef costs 30 times as much as a pound of protein from soy flour.

“Vegetarian members among the Seventh Day Adventists experimented with soybean foods as early as the 1930s, hatching at least two commercially successful companies in the process. To this day, one of them markets 50 meat look-alikes made from soybeans. The other company once invited Fidel Castro to lunch at a church school in Cuba. ‘Best pork chops I ever ate,’ said the Premier as he wiped his beard. But the soybean ‘pork chops’ had never even been close to a pig.

“Soybeans began to come into their own as an important food source in the United States after the 1969 White House Conference on Food, Nutrition and Health. Experts at that meeting concluded that over a third of the people in this affluent country were surviving on faulty diets. To help overcome the problem, scientists developed new food technologies to provide low-cost but highly nutritious foods for school-lunch programs, day-care centers, hospitals and other institutional feeding centers.”

735. Slater, Lloyd E. 1974. Engineered protein: Miles Labs sets fast course by Morningstar. *Food Engineering* 46(10):37. Oct.

• **Summary:** The company that has dominated the market for fizzling tablets with Alka Seltzer for the past 40 years recently introduced “Morningstar Farms 100% textured vegetable protein products, a proud offspring of Miles’

Grocery Products Division.” The flavor and appearance of breakfast links, patties, and slices were considered “first rate.” Miles has special expertise in flavor development. The texture was not quite as good.

About a year ago the products were introduced in test markets in Chicago (Illinois), Florida, California, Arizona, and Wisconsin—with no price advantage over equivalent meat products. They have already become a number one dollar volume line in supermarket frozen breakfast sections. Last year General Mills was unsuccessful in the “debut of an analog sausage.” Miles’ Chicago ad agency TLK learned some valuable lessons, creating a “bucolic brand name and colorful old-fashioned package.” Extensive commercials emphasize good tasting food with no cholesterol—rather than cuttnig-edge food science. A color photo shows three packages on a large, old-fashioned skillet and the logo with barn and rolling hills.

736. Slater, Lloyd E. 1974. Engineered protein: Miles Labs sets fast course by Morningstar. *Food Engineering* 46(10):37. Oct.

• **Summary:** Last year Miles unsuccessfully debuted an analog sausage; it had a somewhat synthetic image. Now they have come back with a new line bearing the bucolic name “Morningstar Farms” in a colorful old-fashioned package. The writer tried it and loved it. A photo shows the packages of 3 Morningstar Farms products.

737. Claiborne, Craig. 1974. Traditional dining in Japan: In the evening and in the morning, too. *New York Times*. Nov. 3. p. 80.

• **Summary:** He enjoyed shioyaki, a wedge of fresh salmon, briefly salted and then broiled. It was accompanied “by a piping hot bowl of miso or bean or bean curd soup containing small squares of bean curd and midget-size brown wild mushroom caps,....”

In giving a history of oden restaurants in Japan, the writer explains that they were established as places where men could express their frustrations, hurt feelings or pent-up anger. Oden portions are typically large in size. Choices include “deep-fried bean curd patties (ganmodoki) made with chopped vegetables.”

738. **Product Name:** Wheatmeat (Seitan in the Form of Small Meatball-like Chunks—Sold in Bulk).

**Manufacturer’s Name:** Gimme Some Food Co. Renamed Wheatmeat Co. in 1975, then Vegetable Protein Co. in 1976.

**Manufacturer’s Address:** 17 Dent St., West Roxbury, Massachusetts. Then 51 Oak Ave., West Newton, MA. Then 140 River St., Cambridge, MA.

**Date of Introduction:** 1974 November.

**Ingredients:** Incl. water, wheat gluten, tamari, ginger.

**Wt/Vol., Packaging, Price:** In bulk in a large glass jar, in salty little meatball-like chunks.

**How Stored:** Refrigerated.

**New Product–Documentation:** 1988. April 19. United States Patent and Trademark Office. Trademark registration by John Weissman (United States Citizen) for “WheatMeat.” Trademark registration number: 1,485,401. Date Registered: 19 April 1988. Current address: 140 River St., Cambridge, Massachusetts 02139 [address no longer valid in March 1992]. For: Formed vegetarian protein used as a meat substitute, in Class 29 (U.S. CL. 46). Trademark first used: May 1976. Trademark first used in Commerce: May 1976. Ser. No. 667,393, Filed June 19, 1987. M.E. Bodson, examining attorney. Registered for a term of 20 years from April 19, 1988. Note: The above information was initially supplied by Mark Machlis of Ivy Foods in Salt Lake City, Utah. 1992. Feb. 27, then confirmed by ordering a copy of the trademark registration. John Weissman later stated that the Wheatmeat trademark was owned by ITT / Wonder Bread before he owned it. He waited until they let it go by not renewing it.

Talk with Sandy Chianfoni of Upcountry Seitan. 1991. Nov. 16. She moved to Boston in 1978 and enjoyed Tan-Pops from the time she arrived. They were probably made by the same guy who made “Wheatmeat” (a seitan product) and Wheatmeat Sandwiches, and who lived in Cambridge. She thinks he made Wheatmeat by mixing wheat and vital gluten together rather than by using the traditional process. Michael Cohen of Lightlife Foods might know who made it, since the manufacturer, whose company was named something like the “Vegetable Protein Company” may have offered to sell his company to Michael.

Talk with Joan Donovan, formerly of Upcountry Seitan. 1991. Nov. 17. She thinks this product was made in Jamaica Plain. It was kofu cooked in hot water without tamari. It had no flavor. People would flavor it themselves. She first saw it in about 1979-80 at the Erewhon store in Brookline Village. They sold it in a pan in the store.

Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970s. 1991. Nov. 18. Joel recalls that a man named Johnny Weissman made both Wheatmeat and Tan-Pops. He owned the Vegetable Protein Company in Cambridge. Joel is not sure which product was launched first. Johnny still has a trademark on the term. He sold two types (white and brown), one plain unseasoned kofu and one made into seitan. He sold it in little heat-sealed polyethylene bags, 5-6 ounces each, refrigerated. There were several pieces or chunks per bag. They were not slices. There was a little seasoned broth in the bag with the brown seitan type. He brought it in refrigerated or frozen; Erewhon froze it. The product was introduced in about 1976, perhaps as early as 1975. To get details on the product and company, try doing a trademark search.

Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Paul was in Boston from Sept. 1978 for 9 months. Wheatmeat was definitely made by the Vegetable Protein Co. in Cambridge. Johnny Weissman was a partner with some other person in that company. But Paul thinks Johnny made the Tan-Pops on his own. Paul was in the place where Johnny made the Tan-Pops; it was a little deep-frying place in Cambridge, and no Wheatmeat was made there. Wheatmeat Seitan was launched before Tan-Pops. Paul saw Wheatmeat Seitan in natural food stores.

Talk with Lenny Jacobs. 1992. March 11. John Weissman, the first person to make seitan in America, is selling Solar Burgers and stuffed pita sandwiches at Stuff-Its in the Harvard Garage (a collection of little shops) in Harvard Square in Cambridge, Massachusetts. Lenny saw him about a month ago and thinks he can find his address and phone number. Solar Burgers are basically seitan plus some new ingredients. Talk with Lenny Jacobs. 1992. March 30. Johnny’s phone number is 617-783-3742. Stuff-Its is 617-497-2220.

Talk with Johnny Weissman of VegPro Co. in Brighton, Massachusetts. 1992. March 31. See this interview for details on this pioneering product and its history.

739. Brand, David. 1974. The food crisis: New-food research isn’t likely to ease poor nations’ hunger. Technology is too complex, costly in many instances. *Wall Street Journal*. Dec. 18. p. 1, 21.

• **Summary:** Researchers are taking the basic building blocks, such as soy protein, and changing them into new

shapes and textures. “So far, the researchers seem to have made the most progress in duplicating textures. General Mills’ Country Cuts ‘chicken’ cubes and ‘ham’ cubes and Miles Laboratories’ Morningstar Farms ‘sausage’ links and patties and ‘ham’ slices imitate the texture of the real meats with remarkable accuracy. But their flavor clearly is a problem.” Address: Staff reporter.

740. *SoyaScan Notes*. 1974. Chronology of soybeans, soyfoods and natural foods in the United States 1974 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1974 March. The first issue of *Vegetarian Times* published by Paul Obis in Chicago.

1974 April. Bob Gerner (of Westbrae) and William Shurtleff (guide) travel throughout Japan searching for quality sources of traditional miso and soy sauce. Right after the trip, Westbrae starts importing these products.

1974 Aug. 9. President Nixon, elected in 1968 and 1972, resigns after the Watergate scandal. Gerald Ford succeeds him as president. Butz continues as Secretary of Agriculture.

1974. Brazil passes West Germany to become the world’s second largest soybean crusher, after the U.S.

1974 late. Miles Laboratories / Worthington introduces the Morningstar Farms line of meat analogs based on spun soy protein fiber. Sold nationally at U.S. supermarkets.

1974 late. The Farm in Summertown, Tennessee, publishes *Yay Soybeans!*, a 14-page booklet containing many innovative soyfoods recipes, such as “soy ice cream–ice bean,” soy yogurt,” “soy cheese,” “soy cheesecake,” “soy mayonnaise,” and “soysage” (a meatless okara & soymilk sausage). Most of the dairylike products were made with fresh or cultured soymilk. The Farm now grows 150 acres of soybeans to feed its community of 800 people. It has just established Plenty, a non-profit corporation “To help share out the world’s food, resources, materials, and knowledge equitably for the benefit of all.”

1974. The Farm in Summertown, Tennessee, publishes *Hey Beatnik*, which contains the earliest know use of the term “Soy Dairy.” The Farm’s soy dairy now makes 60 gallons of soymilk a day at a total cost of \$0.30 per gallon.

1974. *Tofu Recipes*, the first book on tofu in English, written and self-published by Grace Kikuchi in Ann Arbor, Michigan. Spiral bound and 47 pages long, it gives a recipe for homemade tofu and uses tofu largely with fish and meat.

1974 Nov. World Food Conference in Rome, Italy. Delegates from 130 UN member countries adopt an international strategy to overcome world hunger and malnutrition.

1974-1975? Eden Foods starts to import natural foods, including miso and shoyu, from Japan.

741. **Product Name:** Lean Strips (Refrigerated Alternative to Bacon).

**Manufacturer’s Name:** General Foods Corp.

**Manufacturer’s Address:** White Plains, New York.

**Date of Introduction:** 1974 December.

**Ingredients:** Incl. formed vegetable protein and egg albumin.

**Wt/Vol., Packaging, Price:** 20 strips in 4 oz. in paperboard box. Retails for \$0.59 (1974/12).

**How Stored:** Refrigerated.

**Nutrition:** Serving of two slices: Calories 50, protein 3 gm, carbohydrate 1 gm, fat 4 gm.

**New Product–Documentation:** Spot (half page) in *Food Product Development*. 1974. Dec. p. 64. A black-and-white photo shows the front panel of the package. Below the product name: “textured protein strips with a flavor like bacon.” Product concept and positioning: To help offset the rising costs of meat, General Foods has developed this product that looks and tastes like bacon. It is now being introduced into test markets. It is also healthier than bacon, since it contains less animal fat and no cholesterol. Also, little shrinkage occurs during cooking and there is little excess oil to pour off. However 74% of the calories are derived from fat. The ratio of polyunsaturated to saturated fats is 1.0. And it requires only half the cooking time of bacon. The product is partially pre-cooked. The 20 strips in a 4-oz box yield about the same as a pound of uncooked bacon. Product may be cooked in a skillet or oven.

Spot in *Food Engineering*. 1975. May. p. 42. “TVP breakfast market expands: GF [General Foods] introduces bacon analog.” The product, Lean Strips, will compete with three TVP breakfast meats from the Grocery Products Division of Miles Laboratories. The GF product is being tested in Ft. Wayne, Indiana, and Dayton, Ohio.

Talk with W.E. Marshall of General Foods. 1979. Aug. 20. G.F. is currently test marketing two meat analogs: Lean strips (a refrigerated bacon-like product) and Crispy Strips (a fried, shelf stable product like bacon bits). Both contain soy protein concentrate and isolate.

*Food Engineering*. 1981. Aug. p. 106-07. “Diversified line of food products.” General Foods makes Lean Strips, a bacon analog. Talk with W.E. Marshall. 1981. Sept. 3. Lean Strips is being distributed in Virginia; Phoenix, Arizona, and on the West Coast. It is scheduled to go into nationwide distribution.

Talk with W.E. Marshall. 1983. May 27. Lean Strips has been discontinued. Acceptance level was too low to make it a profitable product.

742. Predicasts, Inc. 1974. World manufactured soybean foods. Special Study No. 108. Predicasts, Inc., 200 University Circle Research Center, 11001 Cedar Ave., Cleveland, OH 44106. vi + 93 p. Dec. 24. No index. 28 cm. Research Analyst: Frederick M. Ross.

• **Summary:** Contents: 1. Introduction. 2. Summary. 3. Economics of Soybean Foods: Soybeans, soy flour, meat

extenders (based on extruded textured soy flour), synthetic meat (based on spun isolates). 4. Industry structure: General, \$1,000 million food and feed giants (ADM, Cargill, Central Soya, General Mills/Takeda Chemical, Nabisco, Ralston Purina/Fuji Oil, and Esmark [Swift]), other major manufactured soy food companies (Unilever, General Host [New York], Miles Laboratories/Worthington & Kyowa Hakko Kogyo, A.E. Staley Mfg. Co., Stange [Chicago, Illinois], Chambers & Fergus [Humberside, England]), food industry structure. 5. Demand for manufactured soybean products: Demand for meat & substitutes, supply of natural meat, demand for meat substitutes, demand for soy flour. 6. North America: United States, Canada. 7. Latin America: General, Argentina, Brazil, Mexico, Other Latin America (Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay). 8. West Europe: General, France, West Germany, Italy, Spain, United Kingdom, Other West Europe. 9. East Europe: General, Hungary, Poland, USSR, Other East Europe. 10. Africa: General, Egypt, Nigeria, South Africa, Other Africa & Mideast. 11. Asia: General, China, India, Indonesia, Japan, Pakistan, Other Asia. 12. Oceania: Australia, New Zealand, Other Oceania.

Most sections contain numerous tables, mostly on meat and meat substitute consumption, and raw protein consumption, by country. Address: 200 University Circle Research Center, 11001 Cedar Ave., Cleveland, Ohio 44106. Phone: 216-795-3000.

743. *Progress Thru Research (General Mills, Inc., Minneapolis, Minn.)*. 1974. The ground beef-soy introduction: Case history of a new product. 27(2):1-3.

• **Summary:** With the new ground beef-soy mixtures, now popular with consumers, General Mills introduced a whole new class of foods. The story begins on 11 March 1973, at which time scientists at General Mills' research laboratories had accumulated 400 man years of research and development on textured vegetable protein. They had begun many years earlier with a license in the early 1950s from Robert A. Boyer to develop an edible product from pure soy protein. The first product was Bac\*Os, made at a new plant in Cedar Rapids, Iowa. The frozen, precooked product was sold under the Bontrae trademark.

March 11 was the date that Juicy Burger hit the retail market—a national “first” for Owl Stores, Inc. in Minneapolis, Minnesota. That product was soon improved and renamed Juicy Blend II.

744. **Product Name:** Morningstar Farms Breakfast Strips (Meatless Bacon).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974 December.

**Ingredients:** Egg whites, soybean and/or corn oil, modified corn starch, textured soy concentrate, wheat gluten, flavorings (natural and artificial flavors, hydrolyzed vegetable protein, monosodium glutamate, spice, yeast), glycerin, soy isolate, salt, sodium citrate, caramel color, propylene glycol, monocalcium phosphate, carrageenan, sodium tripolyphosphate, locust bean gum, guar gum, malic acid, sucrose, sodium sulfite, artificial color including yellow 6, niacinamide, disodium guanylate, disodium inosinate, iron (as ferrous sulfate), thiamine mononitrate B-1, pyridoxine hydrochloride B-6, vitamin B-12.

**Wt/Vol., Packaging, Price:** 18 strips per 5 oz paperboard box. Retail for \$0.89 (1974/12).

**How Stored:** Frozen.

**Nutrition:** Serving of three strips: Calories 70, protein 4 gm, carbohydrate 2 gm, fat 5 gm.

**New Product—Documentation:** Spot (half page) in *Food Product Development*. 1974. Dec. p. 64. A black-and-white photo shows the front panel of the package. Above the product name is written: “Cholesterol free textured vegetable protein.” Below the name: Artificial Bacon Flavor. In a box to the left: “No Animal Fat. Protein rich.” This product is an addition to the line of “meat analogs” developed by Miles Laboratories to meet the needs of consumers who want products that are low in cholesterol and saturated fats. The ratio of polyunsaturated to saturated fats is 2.0. To serve, the frozen product is browned in polyunsaturated vegetable oil in a skillet.

Product with Label copyright 1978. Sent by Dr. Walter Wolf. Label is identical to that described in the 1974 ad above except, on front panel, in lower left, in black letters on a yellow background: “Shrinks less—Yields about as much as a pound of bacon cooked.”

Ad. 1980. “No cholesterol. No kidding.” Label reads: “Cholesterol Free. Artificial Sausage Flavor. Textured Vegetable Protein. No Animal Fat. Protein Rich.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

Ad (full-page, color) with coupon in *Vegetarian Times*. 1993. July. p. 29. “A delicious way to cut down on meat without cutting down on your options.” Shows new label designs for 4 Morningstar Farms meatless products.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product never contained spun soy protein fiber.

745. **Product Name:** [GranoVita Pasta Asciutta: Bologna-style Spaghetti Sauce].

**Foreign Name:** GranoVita Pasta Chuta Bolognese {Nudelsauce}.

**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach

1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1974.

**Ingredients:** Tomato pulp, water, textured soya-protein, onions, grated cheese, soya-oil, salt, natural spices, corn-starch.

**Wt/Vol., Packaging, Price:** 200 gm can wholesales for DM 4; 400 gm for DM 6,40.

**How Stored:** Shelf stable.

**Nutrition:** Protein content: 10% protein.

**New Product–Documentation:** Full-page ad for 8 granoVita soy products in the book by Manfred Heide.

1977. *Vegetarische Ernährung: 193 Rezeptvorschläge und Speisepläne für ein Vierteljahr* [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. Stuttgart, West Germany: Paracelsus Verlag. This product is named “Pasta chuta Bolognese.”

DE-VAU-GE leaflet. 1980? *Rezepte aus der GranoVita Versuchskueche*. Manufacturer’s catalog. 1981. May 1. DE-VAU-GE Sortiments-Preisliste. 4 p. Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products. Note: In Italian, *pasta asciutta* refers to “macaroni and cheese.”

746. Duda, Zbigniew. 1974. Vegetable protein meat extenders and analogs; with special emphasis on proteins of soybean origin. Rome, Italy: Food and Agriculture Div. of the United Nations. Animal Production and Health Div. vii + 89 p. No index. 27 cm. [214 ref]

• **Summary:** Contents: Author’s preface. Acknowledgements. Foreword. Introduction. Raw materials: Soybeans, other raw materials. Definitions: Meat extenders, meat analogues. Protein rich products originating from soybeans: Soy flour and grits, food utilization of soybean flours and grits, soy protein concentrates, soy protein isolates, texturized soy protein. Technological and functional properties of vegetable protein. Market considerations. A random selection of T.V.P. extenders and analogues with their characteristics and uses: Miles Laboratories, Inc., Marschall Division, Elkhart, Indiana, USA, Vegetable protein food products (Temptein TM spun textured vegetable protein, vegetable protein meat analogues, bacon-like flavoured chips, dehydrated ham-like flavoured cubes, R pepperoni-like flavoured links, Pro-lean 45 TM, Maxten textured vegetable protein, Morningstar Farms–breakfast links, patties, slices), Swift food protein, General Mills, Inc.–textured vegetable protein foods, Worthington Foods, Inc.–textured vegetable protein foods, Archer Daniels Midland Co.–textured vegetable protein products, Purdy Steak Corp.–textured vegetable protein products, A.E. Staley Manufacturing Co.–textured and untextured vegetable protein products (200 series textured vegetable protein products, 400 series), Ralston Purina Company–textured soy protein products, Central

Soya International Inc.–soy protein products, Nabisco, Inc. Protein Food Division–textured vegetable protein products, Lucas Meyer–soy protein products. Possible sources of meat substitutes other than soybeans: Protein from beans, from rapeseed, from sunflower seed, from cottonseed, from peanuts, other sources of proteins. General technological considerations. Projected consumption and market penetration. Cost considerations: The scale of production, the degree of processing, the price of raw materials. Conclusions. Selected Bibliography. Appendix I: USA soybean processors and products manufactured. Appendix II: Selected recipes using TVP for type A school lunches. Appendix III: Addresses of some companies making soy protein products. Appendix IV: Soybean utilization chart.

This book is compiled from a British viewpoint and cites many British journal articles, thus making it a nice complement to the American articles and bibliographies on this subject. Its bibliography is excellent. Address: Meat and Milk Service, Animal Production and Health Div., FAO, Rome, Italy.

747. **Product Name:** Granose Soya Bean Pâte (Gluten Free). Later renamed Soya Bean Paste.

**Manufacturer’s Name:** Granose Foods Ltd. (Marketer). Made in Denmark by Nutana Helsekost.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1974.

**Ingredients:** Soya beans, onion, egg, textured soya protein, soya oil, yeast, salt, hydrolised vegetable protein, spices, monosodium glutamate.

**Wt/Vol., Packaging, Price:** 205 gm (7 oz) can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. Label. 1980?, undated. 9.5 by 2 inches. Green, black, yellow, and white. Text only “Granose soya bean pate makes delicious sandwiches with mushrooms, tomato, cucumber, etc.” Labels in Danish, Dutch, and Finnish.

Form filled out and Labels sent by Granose Foods Ltd. 1990. June 13. States that the product, made by Nutana, was introduced in 1974. It is now named Soya Bean Paste. Label. 1990. 9.5 by 2.25 inches. White, yellow, and black on green. Photo of a slice of bread spread with the paste garnished with a slice of tomato, avocado and a sprig of green. “Low calorie value. Gluten free. Ingredients: Textured soya protein, soya beans, water, onion, egg, soya bean oil, yeast extract, vegetable stock, leek extract. Directions for use: Soya Bean Paste is a delicious sandwich spread, which can be decorated with cucumber, tomato or mushroom.”

748. **Product Name:** Soyapro (Canned Texturised Vegetable Protein).

**Manufacturer's Name:** Granose Foods Ltd. (Marketer-Distributor). Made in Denmark by Nutana.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1974.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Clare Bryant. 1974.

*Everyday Vegetarian and Food Reform Cooking*. p. 137. The following is included in a list of meat substitutes. "Soyapro: A tinned [canned] texturised vegetable protein. Many other brands of TVP will appear on the market in the years to come." Neither the name or address of the maker is included.

749. **Product Name:** Loma Linda Meatless Entrees (Based on Spun Soy Protein Fiber) [Meatless Chicken Style, Meatless Roast Beef, or Meatless Turkey].

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1974.

**Ingredients:** Roast Beef: Wheat gluten, soy protein isolate, water, corn oil, egg whites, artificial and natural (vegetable) flavors, corn starch, salt, dried yeast, caramel color, soy protein concentrate, dextrose, onion, guar gum, garlic, soy lecithin, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin), spice.

**How Stored:** Frozen.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1977. p. 30. "New meatless chicken made with spun soy fiber." Recipe booklet, 1979, dated. Loma Linda probably purchased the spun soy protein fibers from General Mills. Sold frozen.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

750. **Product Name:** Pro-Lean 45: A Textured Vegetable Protein Product.

**Manufacturer's Name:** Miles Laboratories, Inc. Marshall Div.

**Manufacturer's Address:** Elkhart, Indiana. Made at 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974.

**Ingredients:** Soy protein concentrate, spun isolated soy protein, isolated soy protein, sugar, salt, 1.93% hydrolyzed vegetable protein and caramel color. 0.1% titanium incorporated as food grade titanium dioxide in accordance with USDA regulations.

**New Product–Documentation:** Rosenfield & Hartman. 1974. *Journal of the American Oil Chemists' Society*. 51(1):91A-94A. Jan. "Spun-fiber textured products." The

product label for "Pro-Lean 45: A Textured Vegetable Protein Product" is shown. It is manufactured at Worthington, Ohio.

Predicasts. 1974. *World Manufactured Soybean Foods*. p. 13. This is a meat extender.

Horan. 1974. *Meat analogs*. p. 380. Prolean-45 is a textured soy protein isolate containing spun soy protein fibers.

751. **Product Name:** Sunburger.

**Manufacturer's Name:** Nature's Oven.

**Manufacturer's Address:** Fort Lauderdale, Florida.

**Date of Introduction:** 1974.

**Ingredients:** TVP, vital wheat gluten (powdered, 75% protein, serves as a binder), natural flavorings, natural spices, fresh onion.

**New Product–Documentation:** Talk with Richard Gross, owner of Nature's Oven, Florida. 1991. Sept. 3. This product, based on TVP, was sold at a chain of 7 restaurants that he owned in the Fort Lauderdale area of Florida, but from the beginning it was also sold in a few other restaurants and natural foods retail stores in Florida and New York. The burgers were made and deep-fried at a commissary that supplied the restaurants. He also made his own buns and sauce, and served all together. He sold the chain he owned in 1978 in parts to various people. Several of the restaurants were renamed Nature's Delight. Several of the people who bought two of the restaurants and the commissary continued to make the Sunburger; they distributed it more aggressively and widely to retailers, but not very successfully due to a fight between the 3 partners. Last year Richard got involved again, bought back the name, and started developing a new generation of Sunburger using textured soy protein concentrates.

Concerning ADM's new Harvest Burger (a name used only in the USA, called Vege Burger in the USSR and Veggie Burger, made by British Arkady in the UK and sold elsewhere in Europe), Richard finds its texture too tough and chewy (like the sole of a shoe), the flavor a little bit off, and he dislikes their use of methylcellulose as an ingredient (a binder) in the product; it is wood pulp processed with caustic soda and other chemicals, and there is a residue—it is not really natural as ADM claims.

752. **Product Name:** Sanitarium Health Foods Tender Bits (Vegetable Protein Bits).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1974.

**Ingredients:** Wheat gluten, sauce [incl. soy sauce], onion, flour, vegetable oil, water added.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Letter and Label sent by

Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1974. "Soy sauce is the first ingredient in the sauce."

**753. Product Name:** Sanitarium Health Foods Casserole Mince (Minced Vegetable Protein).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1974.

**Ingredients:** Wheat gluten, flour, soya sauce, hydrolysed vegetable protein, sauce, water added.

**How Stored:** Shelf stable.

**Nutrition:** Per 110 gm (¼ can): Protein 16 gm.

**New Product–Documentation:** Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1974.

**754. Product Name:** All American Fun-Links (Meatless Hotdogs).

**Manufacturer's Name:** Swift Chemical Co. Vegetable Protein Products. Subsidiary of Esmark.

**Manufacturer's Address:** Chicago, Illinois.

**Date of Introduction:** 1974.

**New Product–Documentation:** Predicasts. 1974. World Manufactured Soybean Foods. p. 11. "Esmark (Chicago, Illinois), through its wholly-owned Swift unit, manufactures various types of spun soy protein synthetic meat products such as 'All American Fun-Links' meatless hotdogs. Esmark is a relative newcomer to the synthetic meat field but already has extensive soy food research facilities and marketing networks."

**755. Product Name:** Somos (Textured Soy Flour, and Protein Stew Flavors), MaxTen (Textured Soy Flour), and Sossies.

**Manufacturer's Name:** Tiger Miles Protein Industries (Pty) Ltd. Subsidiary of Miles Laboratories Inc. and Tiger Oats & National Milling Co. Ltd.

**Manufacturer's Address:** Plant: Fedler St., Randfontein 1760, Transvaal, South Africa. Office: P.O. Box 575, Randfontein.

**Date of Introduction:** 1974.

**New Product–Documentation:** Horan. 1974. Meat analogs. p. 401. This product is made of textured soy flour (50% protein). The manufacturer is given as Tiger Oats Ltd., South Africa.

Anne and Gerald Machanik. 1974. *Nutritious Dishes that Replace Meats and Fishes*. South Africa: HAUM. Somos is used in a recipe on p. 61.

*Soybean Digest Blue Book*. 1976. p. 50.

**756. Product Name:** Alborada (Beef-Flavored Textured Soy Flour).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974.

**Wt/Vol., Packaging, Price:** Paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** *Soybean Digest*. 1975.

May. p. 8. "ASA [American Soybean Assoc.] promotes soy for nutrition." Alborada is beef-flavored TVP which is made by the Miles/Worthington group. Sold in an attractive paperboard box, it "has received very good acceptance by the public and is being sold in all the leading supermarkets. It is also sold in large quantities to institutions such as restaurants, hospitals, meal packaging plants and canned food producers." A photo shows the box.

H.L. Wang, et al. 1979. Soybeans as human food—Unprocessed and simply processed. p. 36. "Since 1973, other textured soy products have been independently manufactured and distributed in Mexico. For example, Miles/Worthington, Elkhart, Indiana, has produced a beef flavored TSP called ALBORADA..."

**757. Product Name:** Morningstar Farms Breakfast Patties (Meatless Sausage).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974.

**Ingredients:** Textured vegetable protein (wheat gluten, soy concentrate and isolate), egg whites, soybean and/or corn oil, partially hydrogenated soybean and cottonseed oil, sodium caseinate, flavorings (artificial flavors, salt, monosodium glutamate, spices, lactose, dextrose, etc.).

**Wt/Vol., Packaging, Price:** 1998: 6 patties in 8 oz paperboard box. Retail for \$2.29 (1998/10, Concord, California).

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 174. The ingredients in "Breakfast Patties are (Morningstar Farms)" are "textured soy protein, vegetable oils (corn, and partially hydrogenated soybean and cottonseed) oats, egg albumen, natural and imitation flavors, spices, salt, emulsifier, corn starch, sodium phosphates, HVP, caramel color, niacin, iron, thiamin, vitamin B-6, riboflavin, vitamin B-12."

Ad. 1980. "No cholesterol. No kidding." Label reads: "Cholesterol Free. Artificial Sausage Flavor. Textured Vegetable Protein. No Animal Fat. Protein Rich." Product with Label. 1989. Sept. 7. Sold at Diablo Foods, a supermarket in Lafayette, California. Label is copyright 1987. The cholesterol-free sausage-like patties (8 oz., 6

patties) retail for \$2.25.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

Ad (full-page, color) with coupon in *Vegetarian Times*. 1993. July. p. 29. "A delicious way to cut down on meat without cutting down on your options." Shows new label designs for 4 Morningstar Farms meatless products.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product originally contained spun soy protein fiber. But after several years it was reformulated; the fiber was removed and replaced by other textured vegetable proteins.

Product (Meatless Breakfast Patties) with Label (new design) purchased at Safeway supermarket in Lafayette, California. 1994. May 18. 7.75 by 5.5 by 1 inch. Gold, white, blue, and red on dark green. A color photo on the front panel shows 3 patties with part of a waffle above and 2 strawberries to the right. Price: \$2.49. Frozen. Six patties. Ingredients are now: Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), egg whites, corn oil, soy oil, partially hydrogenated cottonseed and soybean oil, sodium caseinate, modified food starch,... Soyfoods Center Taste Test. 1994. June 7. Good taste and texture. Easy to heat and serve.

Product (Breakfast Patties) with Label (new design) purchased at Safeway supermarket in Lafayette, California. 1995. Aug. 17. 7.75 by 5.5 by 1 inch. Orange, white, blue, gold, and red on green. A color photo on the front panel shows 2 patties on a white plate with diced fried potatoes. Price: \$2.59. Frozen. Six patties. Ingredients, which have been changed, are now: Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), egg whites, corn oil, sodium caseinate, modified food starch, soybean oil... On the back is Worthington's own green V symbol "Suitable for vegetarians."

Product with Label purchased at Trader Joe's in Concord, California. 1998. Oct. 30. Six patties weigh 8 oz. Retail price: \$2.29.

Product with Label purchased at Trader Joe's in Lafayette, California. 2002. April 28. Six patties weigh 8 oz. Retail price: \$2.49. New package design with large strawberry in lower right corner of front panel. "75% less fat than pork sausage."

**758. Product Name:** Morningstar Farms Breakfast Links (Meatless Sausage).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974.

**Ingredients:** Jan. 1974: Textured vegetable protein (wheat, soy, yeast), water, vegetable oils (corn oil and

partially hydrogenated soybean and cottonseed oils), oats, egg albumen, natural and imitation flavors and spices, salt, emulsifier (mono and diglycerides, glyceryl lacto esters of fatty acids), corn starch, sodium phosphates (tripolyphosphate, pyrophosphate, hexameta-phosphate, monophosphate), hydrolyzed vegetable protein, caramel color, niacin, iron (as ferrous sulfate), thiamine (vitamin B-1), pyridoxine (B-6), riboflavin (B-2), cyanocobalamin (B-12).

**Wt/Vol., Packaging, Price:** 8 oz (10 links).

**How Stored:** Frozen.

**New Product–Documentation:** See next page. Rosenfield & Hartman. 1974. *Journal of the American Oil Chemists' Society* 51(1):91A-94A. Jan. "Spun-fiber textured products." The ingredients in Breakfast Links are shown above.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 174. The ingredients in "Breakfast Links (Morningstar Farms)" are vegetable protein (wheat, soy, yeast), vegetable oil, oats, egg albumin, natural and imitation flavors, spices, salt, emulsifier, corn starch, sodium phosphates, HVP, caramel color, iron, thiamin, vitamin B-6, riboflavin, vitamin B-12.

Ad. 1980. "No cholesterol. No kidding." Label reads: "Cholesterol Free. Artificial Sausage Flavor. Textured Vegetable Protein. No Animal Fat. Protein Rich." Product with Label. 1989. Sept. 7. **759. Product Name:** Morningstar Farms Breakfast Slices (Meatless Ham or Sausage Slices).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1974.

**Ingredients:** Jan. 1974: Textured soy protein, water, vegetable oils (partially hydrogenated soybean and cottonseed oil, corn oil), natural and imitation flavors and spices, egg albumen, lactose, salt, sodium caseinate, sugar, modified tapioca starch, sodium phosphates (tripolyphosphate, pyrophosphate, hexametaphosphate, mono-phosphate), hydrolyzed vegetable protein, carrageenan, niacin, U.S. certified colors, iron (as ferrous sulfate), thiamin (vitamin B-1), pyridoxine (vitamin B-6), riboflavin (B-2), cyanocobalamin (vitamin B-12).

**New Product–Documentation:** Rosenfield & Hartman. 1974. *Journal of the American Oil Chemists' Society* 51(1):91A-94A. Jan. "Spun-fiber textured products." The ingredients in Breakfast Links are shown above.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 174. The ingredients in "Breakfast Slices (Morningstar Farms)" are basically the same as they were in Jan. 1974.

Shurtleff & Aoyagi. 1983. *History of Worthington Foods.* p. 9.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product originally contained spun soy protein fiber. But after several years it was reformulated; the fiber was removed and replaced by other textured vegetable proteins. In 1979 it was reformulated again and its name was changed to Morningstar Farms Luncheon Slices.

760. Brooks, Karen. 1974. *The forget-about-meat cookbook.* Emmaus, Pennsylvania: Rodale Press. 215 p. 23 cm.

• **Summary:** The glossary (p. 10-11) includes Pero (a coffee substitute made from barley and rye), tamari soy sauce (Contains no chemicals and is made from water, soybeans, wheat, and sea salt), and wheat-soy macaroni (made with whole wheat and soy flours). A "Grain texture chart" (p. 19) gives tips for using soybeans and soy flour. Soy-related

recipes include: Soya-raisin griddle cakes (with soy flour, p. 59). String beans with roasted soybeans (p. 134). Soybean-lentil-rice loaf (with cooked soybeans, p. 136). Soyburgers (with cooked soybeans). Notes on cooking beans (incl. soybeans, p. 126). Address: Easley, Missouri.

761. Cottrell, Edyth Young. 1974. *The oats, peas, beans & barley cookbook.* Santa Barbara, California: Woodbridge Press. 271 p. Illust. Index. 24 cm.

• **Summary:** This very creative Seventh-day Adventist vegetarian cookbook, featuring nature's most economical foods, contains 450 recipes including many using soybeans and gluten (see p. 59-68), and many color photos. One acre of soybeans will supply 34 times as many calories, 49 times as much protein, and 33 times as many vitamins as beef produced on one acre. Soy-related recipes include: Garbanzo-soy-oat patties with Brazil nuts (p. 39). Soybeans–Prairie gold (Boiled soybeans, p. 51. Freezing soaked soybeans helps to shorten the cooking time. The use of soft or spring water in soaking and cooking also helps to reduce the cooking time. The author adds salt to soybeans after they have been boiled for at least 1 hour. Baked soybeans (p. 52). Soy-oat patties with tomato sauce (with whole soybeans, p. 53). Tofu (p. 54, curdled with calcium lactate or calcium carbonate, then seasoned with Vegex or Savorex). Creamed curd cheese: May be used as cottage cheese (p. 55; made with tofu curds and soy sour cream). Scrambled tofu (p. 56). Rice with tofu–Chicken style (p. 56-57). Home-baked bread (with soy flour, p. 70-76). Modified pioneer bread (with soy flour, p. 81). Pioneer soy bread (p. 82). Soy-oat waffles (p. 109). Barley-soy waffles. Cornmeal-soy waffles. Millet-soy waffles (p. 111). Rice-soy waffles (p. 112). Soya French toast (p. 116). Cornmeal with soy grits (p. 117). Corn granola (with soy flour, p. 118). Good earth granola (with soy flour, p. 119).

One chapter, titled "Soybean Magic" (p. 121-26) contains the following soy-related recipes: Soybean concentrate: Replaces milk and eggs in many recipes (Note: This is fresh soybean puree, or gô, made with the hot water grind method). Soy milk and concentrated soy milk. Cream sauces. Soy whipped topping. Soy cream. Soy sour cream. Sweet cream custard sauce.

Whipped soy topping (with fortified soy milk powder, p. 141). Cabbage baked in 'soy sour cream' (p. 165). Cauliflower baked in soy cream (p. 167). Soy mayonnaise (with concentrated soy milk, p. 195). Savory yeast spread with soy milk, p. 196).

Pages 255-67 give a nutritional analysis of each of the recipes in this book. A photo on the rear cover shows Cottrell. A second edition was published in 1980 by Woodbridge. As of early 1993 some 157,000 copies of this book are in print. Address: Research Nutritionist, Loma Linda Univ. School of Health, Loma Linda, California.

762. Derevitzky, Catherine. 1974. Tansy cakes with honey: A cookbook. Morrill, Maine: C. Derevitzky. 44 p. Color illust. 23 cm.

• **Summary:** This vegetarian cookbook, which contains many color illustrations, is hand-lettered and written for children, and includes 22 low-cost meatless recipes from soups to desserts collected from all over the world. Tansy is a common, weedy herb (*Tanacetum vulgare*) with an aromatic odor and very bitter taste.

Soy-related recipes include: Soy-rice casserole (with dry soybeans, p. 13-14), and Soy patties (with cooked soybeans, p. 20). Address: Morrill, Maine.

763. Hannaford, Kathryn. 1974. Cosmic cookery. Berkeley, California: Starmast Publications. xixd + 264 p. Illust. by Lorena Laforest. 21 cm.

• **Summary:** This vegetarian cookbook contains 190 recipes created and tested at the communal One World Family Natural Foods Restaurant. Page 35 lists uses and seasonings of beans, including aduki beans and soy beans. Favorite seasonings for the latter are thyme, oregano, basil, green pepper, tomato, cheese, soy sauce, onion, or garlic. Soy-related recipes include: Soy grits (p. 75). Macroburger mix (with cooked soybeans, p. 83). Soy mayonnaise (with soy milk powder, p. 111). Chunky soy spread (p. 130). Miso tahini spread. Creamy soy spread (p. 131). Miso soup (p. 144). Miso-scallion broth (p. 145). Macro-sausage (with Soy Spread, p. 163). Spaghetti with miso sauce (p. 176). Super soybean casserole (p. 182). Miso sauce (p. 200). Soya carob nut brownies (with soy milk powder, p. 227). Address: Berkeley, California.

764. Himalayan International Institute. 1974. The Yoga way cookbook. 1st ed. Honesdale, Pennsylvania: Himalayan International Institute. 203 p. \*

• **Summary:** This is a natural foods, vegetarian cookbook. Page 7 contains basic information about various soyfoods. Soy-related recipes include: Soybean rice (p. 37). Soy burgers (p. 38). Soy tacos (p. 39). Miso soup (p. 99). Tofu-avocado sandwich (p. 193). Tofu salad dressing (p. 194).

765. Kikuchi, Grace F. 1974. Tofu recipes. Ann Arbor, Michigan: Published by the author. 47 p. Illust. by Lou Bohr. No index. 22 cm. Spiral bound.

• **Summary:** Contents: 1. To begin with: Homemade tofu, okara. 2. Soups and sauces: Clear and miso soups, mushroom tofu soup, tofu sauce for vegetables. 3. Poached, steamed, fried: Hiyadofu—chilled, yudofu—hot, stewed tofu, fried tofu, steamed tofu, ganmodoki. 4. Pots—one dish meals: Hamanabe, fresh pork and vegetables, chicken mizutaki, sukiyaki, shabu shabu, sin sul lo. 5. With fish: Seafood mizutaki, tofu steamed with fish, tofu with flounder, sakamushi, tofu and tuna fish. 6. With this and that: Stir-fried tofu, soboro domburi, mandoo, meatballs made with tofu,

tofu with scrambled eggs, tofu with pork and miso, beef with tofu and chili peppers. Glossary.

There is a full-page illustration at the beginning of each section. On the book's cover, occupying the top 80% of the page, above the English title, are the two large Chinese characters for "tofu."

Note 1. This is the earliest known book on tofu ever published in the Western world or in a European language. It is spiral bound, sells for \$1.25, has white covers front and back, and was printed by Braun-Brumfield, Inc. in Ann Arbor, Michigan. All but 12 of the recipes contain meat, fish, or poultry. A small sheet, stapled to the title page, is titled: "Meatless recipes in this book."

Note 2. The author's formal married name is Mrs. Chihiro Kikuchi. Address: 260 Sumac Lane, Ann Arbor, Michigan 48105.

766. Larson, Jeanne R.; McLin, Ruth. 1974. The vegetable protein and vegetarian cookbook. New York, NY: Arco Publishing Co. 216 p. Illust. Index. 24 cm. Reprinted in 1980.

• **Summary:** The authors may be Seventh-day Adventists since they make widespread use of "meatless meats" made by Loma Linda Food Co. and Worthington Foods, both Adventist-run companies. Pages 11-14 list these meatlike products in the following categories: 7 dry vegetable proteins to which liquid must be added, or which are used for seasonings: Granburger. Vitaburger. Meat loaf mix. Burger aid. Stripple zips. Baco-Bits. Gravy quik.

35 canned foods: Rediburger. Vegeburger. Chopletburger. Vegetarian burger. Madison burger. Non-meat balls. Prime burger. Vitaburger. Chili. Choplets. Cutlets. Skallops. "209." Vegesteaks. Dinner bits. Tender bits. Dinner cuts. Tastee cuts. Dinner rounds. Salisbury steak. Frysticks. Numete. Protose. Proteena. Nuteena. Vegechee. Vegecona. Wham. Beef slices. Chicken slices. Linketts. Little links. Big franks. Saucettes. Veja-links.

30 frozen foods (said to be by far the tastiest of the vegetarian meats): Beef slices, loaf, and cubes. Corned beef slices, loaf, and cubes. Smoked beef slices, loaf, and cubes. Beef pie. Chicken slices, roll, cubes. Chicken pie. Chickettes. Wham slices, roll, cubes. Prosage. Vegetarian fillets [fish alternatives]. Holiday roast. Salisbury steak. Stripples. Smoked turkey slices or loaf. Fri-pats. Soy-chee. Vegechee. Soycheeze. Lentils. Garbanzos. Boston style soybeans. Green soybeans [probably harvested dry rather than fresh]. Savorex. Tastex. Savita. Vegex. Chicken seasoning. Beef seasoning. Smoke. Baco-bits.

Soy-related recipes include: Soybean loaf (with cooked mashed soybeans, p. 39). Tofu loaf (p. 149; "Tofu can be obtained at Chinese food stores. If not, use canned soy cheese found in most health food stores"). Tender crisp vegetables (soybean sprouts, p. 197).

767. Ohsawa, Lima. 1974. *The art of just cooking*. With Nahum Stiskin. Hayama, Japan and Brookline, Massachusetts: Autumn Press. 216 p. Illust. by Maurice Owen. Index. 19 x 23 cm. Reissued in 1984 as *Macrobiotic Cuisine* by Japan Publications, NY. 175 p. [26 ref]  
 • **Summary:** This work is based on Lima's Japanese-language book titled *Macrobiotic Cookery* (1971). In 1953, at age 54, Lima Ohsawa first ventured beyond the shores of her native Japan. She and her husband, Georges Ohsawa, left on their first world tour. In 1955-56 they spent time with Dr. Albert Schweitzer in Lambarene, Gabon. "Being vegetarian Dr. Schweitzer was always very interested in the nutritional assets of the soybean and asked me to show him different ways to prepare it" (p. 10). During this and many subsequent travels, Lima learned many traditional, natural recipes from around the world.

Contains numerous Japanese macrobiotic style recipes. Page 32 gives good definitions of miso and shoyu. Soy-related recipes include: Brown rice with soybeans (p. 53). Inarizushi (p. 55). Brown rice porridge with vegetables and miso (p. 58). Soya omochi (mochi with soya flour). Burdock with miso and lemon peel (p. 90). Broccoli and radish with miso dip (p. 92). Carrot with green beans and tofu (p. 95). Ninjin shiro-ae (with "½ cake of *tofu*, drained and mashed (p. 173)," p. 95). Cucumber with wakame and walnut miso (p. 96). Cucumbers with miso and sesame (p. 97). Onion nitsuke with miso (p. 100). Onion goma-miso-ae (onion with sesame miso, p. 100). Eggplant nabeshigi-yaki (with miso, p. 101). Scallion and aburage nitsuke (p. 101). Scallion dengaku (with miso, p. 102). Renkon ikada age with kuzu-lemon sauce (p. 103). Kabocha miso ni (p. 106). Kabu miso-ae (turnips with sesame miso, p. 109). Daikon age rolls (with aburage, p. 114). Vegetable skewers with koya-dofu (dried-frozen tofu, p. 114). Kombu with shoyu (p. 117). Renkon miso inro (lotus root tempura with miso, p. 123). Coltsfoot buds with miso (p. 126). Wakame miso soup (p. 137). Mugi-miso soup (p. 137). Sake-no-kasu jiru (miso soup with sake lees, p. 137). Go jiru (soybean potage with aburage, p. 141). Oden with ninjin and gobo kombu maki (with aburage, p. 146).

Condiments and pickles (p. 154-57): Gomashio (sesame-salt). Tekka miso (sauteed vegetables with miso). Shigure miso (moist tekka). Miso sauté. Soybeans with miso and burdock. Soybeans with miso. Miso pickles (fall and winter). Sauces, spreads and salad dressings (p. 161-63): Lemon shoyu. Ginger shoyu. Orange shoyu. Tsuje-jiru dipping sauce (with shoyu). Goma joyu sauce (with shoyu). Scallion miso. Walnut miso. Citron miso. Goma miso (sesame).

Beans (p. 165-78). Black bean ni (the black beans are actually black soybeans. Soak 1 cup soybeans overnight in 3 cups water. "Drain the beans through a strainer reserving any soaking water." Add enough fresh water to equal 4 cups then pour this liquid into a heavy saucepan. Add the soaked beans, bring to a boil over high heat. Reduce heat to low,

cover and simmer for 2+ hours, or until tender. Add water during cooking if liquid completely evaporates. Toss pan to stir. When done, season with a dash of salt and/or shoyu. "In Japan this exquisitely sweet dish [nimame] is a must on New Year's Day. It gets even sweeter after standing for a day or two." Cooking soybeans with a small strip of *kombu* helps to soften them). Gomoku-mame (soybean nitsuke).

Tofu ryori (p. 173-78; "Tofu or bean curd is rich in vegetable protein. Although it is rather *yin* in our classification of foods, the recipes I have included here balance its *yin* characteristics with *yang* so don't hesitate to use it occasionally. It's delicious in miso soup, stews and *nabe*, and as a dish by itself. It is available at Oriental food shops and can also be made at home.") Homemade tofu (p. 174; 3 cups soybeans plus nigari make 1 lb. tofu; also describes how to make nigari {sea brine} by dampening 5 lb. sea salt). Variation: Homemade grilled tofu. Unohana pouches (with okara and aburage). Gammudoki. Tofu with kuzu sauce. Tofu roll. Koya-dofu sandwich. Tofu nitsuke. Chinese dow-foo oroshi-ae. Tofu mold (with kuzu). Tofu tempura. Goma dofu (sesame tofu).

Note 1. This is the earliest English-language document seen (April 2013) that contains the term "grilled tofu."

Squid and scallion miso-ae (p. 183). Salmon head soup (with soybeans, p. 183). Surimi shinoda (with aburage, p. 184). Red snapper in miso. Koi koku (with miso, p. 184). Egg tofu (p. 185). Amazake manju (sweet sake dumplings, p. 198). Amazake (homemade, using glutinous "sweet" brown rice, p. 207).

The section titled "*Kofu*: Wheat Gluten" (p. 85-86) includes recipes for Homemade kofu (wheat gluten, including Kofu loaf and Seitan), and Kofu cutlet. "First introduced to Japan from China by Buddhist monks, *kofu* became a very popular food in Zen temples. It is delicious in soups and stews and mixed with sautéed vegetables. *Kofu* cutlet looks, feels, and tastes like meat." Seitan is made by simmering 5 cups cold wheat gluten, separated into small pieces, for 3 hours in shoyu, sesame oil, and minced gingerroot.

Dandelion coffee (made from minced and dry roasted, ground dandelion root) and Yannoh (prepackaged grain coffee, made from 5 different grains) are described on p. 206-07.

The book, which contains many fish recipes, begins with a nice photo of Lima at age 75—she looks 20 years younger—and ends with a good glossary. Lovely illustrations, a wealth of original information on Japanese foods.

Note 2. This is the earliest document seen (July 2000) that mentions "Tekka miso" (spelled that way).

Note 3. This is the earliest English-language document seen (Feb. 2005) that used the word "kofu" to refer to wheat gluten. Address: Tokyo, Japan.

768. American Soybean Assoc. 1974? Soybeans: From

America's fertile soils the worlds versatile protein resource. Hudson, Iowa. 16 p. Undated. No page numbers. All color.

- **Summary:** On a page titled "Utilization," color photos show many soy products including: Milnot (can), Worthington Soyameat (can), Nabisco Sociables (paperboard box), Candied Pernuts: Toasted Soybeans (paperboard box), Bac\*Os (glass jar), Crisco (shortening; can), Hain Soy Oil (glass jar), Dream Whip: Whipped Topping Mix (paperboard box), Hamburger Helper (paperboard box), Worthington Veja-Links (can), RG Lecithin (jar), Yoshihara Oil Mill, Ltd. Golden Soybean Salad Oil (can, 2 sizes), and 3 brands of bottled soymilk made in Korea. Another page shows Soyor bottled soy oil. The addresses of American Soybean Association offices in Hudson, Iowa (USA), Tokyo (Japan), Taipei (Taiwan), Brussels (Belgium), Hamburg (West Germany), Vienna (Austria), and Mexico City (Mexico) are given. Address: Hudson, Iowa.

**769. Product Name:** Loma Linda Meatless Chicken Style or Beef Style (Based on Spun Soy Protein Fiber).  
**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.  
**Date of Introduction:** 1974?  
**Wt/Vol., Packaging, Price:** Can.  
**New Product–Documentation:** Loma Linda probably purchased the spun soy protein fibers from General Mills. Sold in both canned and frozen forms.

770. Mother Nature's Inn. 1974? Our menu. 1813 West 4th Ave., Vancouver, BC, Canada. 4 p. Undated.

- **Summary:** Contents: [Basics]: Soup of the day, Brown rice, Mother Nature's bread or sprouted 8 grain, Tahini, soy lecithin or vegie butter, Chapatti–whole wheat flatbread of India (buttered or with vegie butter), Sprouted 7 grain English muffin (buttered or with tahini or vegie butter), Bible bread with any spread. Fresh salads (incl. alfalfa sprouts or Tabouli salad). Salad dressings (incl. sesame tahini dressing). Mom's great sandwiches, Daily special, Evening dinner menu (as posted on menu board) or Golden Lotus Macroplate.  
 Chapizza, Vegeburger (with vegetable protein patty). Desserts. Juices. Teas (incl. Healthy coffee, Roastaroma, Mu, Red Zinger). At the bottom of page 3: "All food served by Mother Nature's Inn are purely vegetarian and natural, We use neither eggs, sugar, nor cheese with animal rennet. Our fare is lovingly prepared from the freshest, highest quality produce available.

"May the long time sun shine upon you  
 All love surround you  
 And the pure light within you  
 Guide your way home."

On the rear cover is a large oval illustration of a child [Jesus] dressed in a long white road, leading a sheep, a lion

and two cows. Around that, the name of the restaurant. Below: Its hours (Mon.–Sat. 11:30 am–5 pm, Sunday 12-7) and address.

Accompanying this menu is a photo (angled upwards) of a waitress at Mother Nature's Inn (Lisa) holding out a plate of food in her right hand; behind her are a hanging light, hanging plant, and the restaurant's ceiling. Address: Vancouver, BC, Canada. Phone: 733-5528.

771. *Christian Science Monitor*. 1975. Low-cost soybeans: 'meat that grows on vines.' Jan. 16. p. 11.

- **Summary:** Soybeans come in many forms. There "are fresh soybeans in their fuzzy pods, dried soybeans, soy and wheat noodles, spaghetti and macaroni, soy grits, soy flour, soy milk, soy cheese [tofu], nutlike roasted soybeans, sprouted soybeans, textured soy, soy oil, and soy butter." When these are combined with other foods, the possibilities are almost without limit.

Soybeans are high in protein and low in cost—about 35 cents a pound.

Recipes: How to cook basic whole dried soybeans. Soyburgers (with 2 cups cooked soybeans and 1 cup cooked brown rice). Four ideas are given for adding cooked soybeans to other recipes. Finally, soy flour and its uses are discussed in detail. Now is a "perfect time to get acquainted with the versatile soybean." Address: Special to the Monitor.

772. *Grocer (The) (London)*. 1975. C&B [Crosse & Blackwell] move into the TSP [textured soya protein] market. 196(6167):23-25. Jan. 25. See also p. 4.

- **Summary:** Mince Savour is designed to be added to minced meat "to make it more tasty and go further." The product comes in two sizes, 1 oz and 2.125 oz, ready seasoned and expected to retail at 7p and 13 p. respectively. C&B are processing the protein at their Aylesbury factory. One ounce added to water and mixed with 8 oz. mincemeat produces 12 oz. before cooking.

The brief introduction on p. 4 notes that Mince Savour "is being launched in London and the South and is being backed with a £250,000 campaign... While there are soya protein lines being used in catering and Standard Brands have a hamburger type product in the grocery trade," this appears to be the first meat extender of its type on the market. "Of course, Courtaulds have already tested their Kesp pies through the trade and are now on sale through selected Sainsbury stores." Address: England.

773. *Grocer (The) (London)*. 1975. Kesp on test in 30 Sainsbury stores. 196(6167):23. Jan. 25.

- **Summary:** "Kesp soya protein pies from Courtaulds are being sold by Sainsbury in a test operation through 30 stores. The 1 lb pies sell for 25 pence each from refrigerated cabinets." Address: England.

774. **Product Name:** Kesp Soya Protein Pies (Meat Analog Based on Spun Soy Protein Fibers Chunks and Mince in Gravy).

**Manufacturer's Name:** Kesp Protein Foods, Courtaulds Ltd.

**Manufacturer's Address:** P.O. Box 16, Coventry CV6 5AE, England.

**Date of Introduction:** 1975 January.

**Wt/Vol., Packaging, Price:** 1 lb. Retail for 25 pence (1/75, London).

**How Stored:** Refrigerated.

**New Product–Documentation:** The Grocer (London).

1975. Jan. 25. p. 23. "Kesp on test in 30 Sainsbury stores." Kesp soya protein pies from Courtaulds are being sold by Sainsbury in a test operation through 30 stores. The 1 lb pies sell for 25 pence each from refrigerated cabinets.

775. *Hartford Courant (Connecticut)*. 1975. Meat alternatives suggested as relief for budget woes: Table talk. Feb. 25. p. 19.

• **Summary:** Storrs, Connecticut—Traditionally, Lent has been the time of year for meatless meals. However today (according to Janina Scajkowski, extension nutritionist at the University of Connecticut) "increasing your use of meat alternatives all year can help your budget." Combining "vegetable sources of protein" can provide high quality protein containing all the necessary amino acids. For example lentils or beans or peas plus rice. Gives recipes for Old-fashioned lentils, and Lentil loaf. Soy is not mentioned.

Note: This is the earliest English-language document seen (Aug. 2014) with the term "meat alternatives" (or "meat alternative"—with any combination of quotation marks) in the title.

776. *Farm, The*. 1975. *The Farm vegetarian cookbook*. Summertown, Tennessee: The Book Publishing Co. 128 p. Illust. Index. 18 cm. Revised edition by L. Hagler. 1978. 223 p.

• **Summary:** Expanding on the pioneering "Yay Soybeans!" (1974), this creative and creatively illustrated vegan cookbook contains many extremely innovative and original recipes including: Soybean Stroganoff. Soyburgers. Spaghetti Sauce with TVP. Soysage. Soy fritters. Indonesian fried tempeh. Soymilk. Tofu. Tofu spreads. Soy "yogurt." Soy "cheese." Soy "butter" (made with soy flour). "Cream cheese" (made with soymilk). Soy "mayonnaise." Soy "whipped cream." Soy "coffee." "Soy 'nuts.'" Soy pulp granola. Ice Bean [soy ice cream] (Recipes include: Pineapple "sherbet" and "Vanilla ice bean," each made with soy milk instead of dairy milk). Mellowmeal (breakfast cereal containing soy flour). Soy "yogurt" Danish pastry. Soy bread. Soy pulp cookies. Soy "cheese cake." Blintzes (filled with tofu).

Gluten recipes (p. 54-59) include: Basic gluten (feeds

8 generously). Gluten roast. Gluten burritos. Chili gluten. Oven-fried gluten. Janice's barbeque [barbecue] gluten ribs.

The rear cover states: "We are a large, long-haired spiritual community in Tennessee. We came together through open meetings in San Francisco with Stephen. We have 750 people, including 250 kids, living on 1,750 acres. This cookbook is to help as many people be vegetarians as possible without turning any of them off and making them think its strange or weird and to let people know that it tastes good, is nice, graceful, and it can be a turn-on, that it'd be really neat to eat, and make you look forward to meal-times and make you really happy to eat such good food." The Introduction, by Stephen, begins: "The thing about our cookbook is we don't want to be faddish or cultish or scare people off. We just honestly want them to know how to make it on vegies, even somebody who doesn't particularly have a moral reason for being a vegetarian, but just wants to eat a little cheaper, or somebody who learns to be a vegetarian to lose weight, 'cause you maintain a really healthy natural weight on vegetables... The main thing is that we're absolute

vegetarians. We don't do meat or milk or eggs or cheese or fish or fowl."

"You can increase the world's food supply by being a vegetarian. So its good for everybody else, its good for the individual for health, and its good for the soul and the spirit not to be involved in killing. And I understand that vegetables are alive, but like I've said before, I've been to pig stickings, and I've been to rice boilings, and rice boilings have better vibrations than pig stickings."

Photos show: Facing title page: People planting white potatoes at the edge of a large field in front of the woods. The lady in front is Sylvia Tepper, Robert Tepper's wife. Pages: (1) Little Susannah Frohman eating a rolled up soybean tortilla. (3) Stephen Gaskin. (18) Ruth Thomas, making lunch in the kitchen of the only house on the property when Farm folks first came here. It housed The Farm's clinic, school, bank offices, and receptionist for a number of years until other facilities were built for these purposes. Ruth could make a mean soybean burger (which is pictured). (23) Laurie Sythe making potato soup on the other side of the same kitchen Ruth was pictured in. (35) Poblano chili plants. (60-61) Tempeh sliced to be round to fit on buns, resting on a plate (L) and a tray (R). (64). Uncle Bill (age 82, center, surrounded, from left by: Marilyn Keating, Jeffrey Keating, Ruth Thomas, Patrick Thomas, Uncle Bill, Joel Kachinsky, Roberta Kachinsky, Bruce Moore, Roslyn Moore {holding baby Sam}. All at their home on Schoolhouse Ridge. The house, named "Kissingtree," was originally built for Stephen and family, but he declared it "too fancy" for him, and he passed it on to this group {women were mostly schoolteachers in our school}). (67) Janice Hunter making stir fry at the Tower Road House kitchen. (68) John Hurgeton drinking a glass of soymilk on a construction site somewhere. (71) Sue Ellen, who worked in The Farm's soy dairy, holding a glass of soymilk and relaxing. (89) Sour soymilk Danish pastry. (106) Jars of canned goods stored at the Farm's canning facility. Thanks to Cynthia Holzapfel for providing photo captions.

Illustrations appear on almost every page: On the front cover is a color illustration of a basket full of vegetables on a quilt. Many of the pages have illustrated borders or unique illustrations (line drawings) (flowers, plants, leaves, a pot of steaming food, psychedelic designs, native American motifs, etc.) where there would otherwise be empty space. Pages: (10) A Farm member eating, with one hand, a tortilla wrap filled with cooked whole soybeans. (20) A young woman in a kitchen facing the stove. (28-29) Illustrations of two Farm members making pizza. (65) Uncle Bill in a kitchen stirring a pot. (81) A pitcher labeled "Soy Milk." (83) An old-fashion, hand-turned ice cream machine for making Ice Bean. (88) Sour soymilk Danish pastry. (95) A happy man and a woman eating bagels. The man's finger, pointing up, serves as a bagel holder. Yum! (100) Overhead view of a round table with ten people eating. (105) A vase full of kitchen utensils.

(113) A lady holding a cake—a very favorite recipe on The Farm. (120) A lady rolling out dough on a table.

Note 1. This book played an important role in introducing soyfoods (especially tempeh and soy ice cream), as well as a vegan diet, to America.

Note 2. This is earliest publication seen by The Farm that contains a tempeh recipe.

Note 3. This is the earliest document seen (Oct. 2008) that contains the word "vegies" (one of two documents).

Note 4. This is also the earliest document seen (Oct. 2008) that uses the word "barbeque" or "barbequed" rather than the standard "barbecue."

Note 5. This is the earliest English-language document seen (Oct. 2013) that contains the term "Soy 'whipped cream' (regardless of capitalization).

Note 6. Some sources (OCLC/WorldCat) cite Stephen Gaskin as the author of this book. Others cite Louise Dotzler; her maiden name was Louise Hagler, but she was married to Thomas Dotzler in 1975. Later that decade they separated and Louise reverted to using her maiden name As "Louise Hagler," she was the editor / author of several later revised and expanded editions of *The Farm Vegetarian Cookbook* (1978, 1988) plus several outstanding books about soyfoods published at The Farm. Address: Summertown, Tennessee.

777. Wu, Lawrence C.; Bates, R.P. 1975. Protein-lipid films as meat substitutes. *J. of Food Science* 40(1):160-63. Jan/Feb. [21 ref]

• **Summary:** Starting with traditional yuba, texturization is achieved in two ways with rehydrated and flavored films: (1) The yuba sheets are soaked in appropriate flavoring solutions such as soy or meat broths, layered several sheets thick, rolled tightly, wrapped firmly in cloth, then tied to retain internal pressure. The rolls are then steamed for about one hour and consumed as a main dish.

(2) Layers of the moist, flavored films are packed into aluminum molds shaped like whole chicken or fish. "The center of the mold may be stuffed with film remnants or fitted with a wooden plug, thus providing a hollow space for subsequent stuffing ingredients. The mold is closed and screwed or clamped shut thereby applying manual pressure. Note: For best results the mold should be steamed.

These yuba products were found to be highly acceptable to due to a combination of pleasing texture and flavor characteristics.

The most influential variable affecting both the texture and appearance of the meat substitutes was the film moisture content. A moisture content of 50-75% was found to represent a good range for fabrication.

Contains 4 figures and 3 tables. Address: Food Science Dep., Univ. of Florida, IFAS, Gainesville, FL 32611.

778. **Product Name:** Cedar Lake Vegeburger (Meatless). **Manufacturer's Name:** Cedar Lake Foods.

**Manufacturer's Address:** Box 116, Cedar Lake, MI 48812. Phone: 517-427-5590.

**Date of Introduction:** 1975 March.

**Ingredients:** Wheat gluten, water, soy flour, oatmeal, corn, yeast, salt, hydrolyzed vegetable protein, onion, celery salt.

**Wt/Vol., Packaging, Price:** 19 oz can

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label printed 19 March 1975.

Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 22. Cedar Lakes. "Vegeburger" (19 oz).

Cedar Lake Foods wholesale price list. 1976. March 15.

779. **Product Name:** Cedar Lake Vegetarian Mix for Sloppy Joes.

**Manufacturer's Name:** Cedar Lake Foods.

**Manufacturer's Address:** Box 116, Cedar Lake, MI 48812. Phone: 517-427-5590.

**Date of Introduction:** 1975 March.

**Ingredients:** Wheat protein, water, tomato paste, textured soy protein, corn meal, oatmeal, rehydrated celery, rehydrated green and red bell peppers, food yeast, soy sauce, salt, hydrolyzed vegetable protein.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label printed 19 March 1975. Cedar Lake Foods wholesale price list. 1976. March 15.

780. **Product Name:** Solar Burgers (Soy-Wheat; Not so named until 1976 [late summer or fall]).

**Manufacturer's Name:** Vegetable Protein Co.

**Manufacturer's Address:** 140 River St., Cambridge, MA 02139.

**Date of Introduction:** 1975 March.

**Ingredients:** Soy flour [textured extruded; TVP], water, wheat gluten, wholewheat flour, tamari, vegetable oil, yeast extract.

**Wt/Vol., Packaging, Price:** 7 oz net plastic bag (2 burgers).

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label designed in late 1976 or 1977 (when the company was located at 140 River St., Cambridge, Massachusetts) sent by John Weissman on 8 May 1992. 4 inches square. Self adhesive. Red, orange, and white. "100% vegetarian–High protein. This product is made from soy and wheat, two of the world's most abundant crops. Fry, broil, grill, bake, steam, serve with your favorite sauce. May be used without cooking. All natural."

Talk with and letter from John Weissman. 1992. May 8. In early 1975, based on information about protein combining in *Diet for a Small Planet* by Frances Moore Lappé, John began grinding cooked soybeans into the wheat gluten and selling the burger-like patties. This was the first Solar Burger,

but it had not yet been named. Then in 1976 he named the burger "Solar Burger" and reformulated it with TVP. Robert Allen, his friend, suggested that their company, now named the Vegetable Protein Co., might sell the Solar Burger to other, competing sandwich makers—which they did. Shortly thereafter they stopped making their own sandwiches. Vacuum packing of these burgers and the flavored Wheatmeal began in 1980.

Talk with Ademar Reis. 1993. Nov. 30. In 1976 the Solar Burger was still being made by John Weissman. Ademar started making and private labeling the product in 1979. John had a plant in Cambridge, Massachusetts. Then John closed the plant and Ademar bought some of his equipment and started making the Solar Burger for John. At that time, Ademar first discovered Response, textured soy protein concentrate.

Talk with John Weissman. 1993. Dec. 1. John introduced Ademar to Response textured soy protein concentrate. John invented this product by mixing cooked whole soybeans and wheat together when he lived with Sakee Israel, before he moved to River Street in Cambridge. They first sold it as a Wheatmeal Sandwich but it didn't last for very long and it was not a bona fide burger patty until he moved to River Street. Then he decided to sell the patty by itself to sandwich companies—since he had stopped making sandwiches. He wanted to focus on packaged products. The soy component of the patty kept changing. Initially it contained cooked ground soybeans, then it evolved to TVP, then to Response (textured soy protein concentrate). John made the Solar Burger and sold the patties in bulk to two competing sandwich makers—Season's Harvest owned by Ademar Reis and Sunrise Sandwiches owned by Tom Iglehart. They both made burgers by putting John's Solar Burger patty on a bun with all the trimmings. Iglehart dropped out first. In about 1979, when John dismantled his shop, Ademar manufactured the Solar Burger patty for a very brief time (no more than 8 batches). It didn't work out so Ademar discontinued it.

781. **Product Name:** Wheatmeal Sandwiches [Cabbage/Carrot & Coleslaw, or Tomato & Lettuce with Natural Russian Dressing].

**Manufacturer's Name:** Wheatmeal Co. Renamed Vegetable Protein Co. in 1976.

**Manufacturer's Address:** 17 Dent St., West Roxbury, Massachusetts.

**Date of Introduction:** 1975 March.

**Ingredients:** Incl. pita bread, vegetables, seitan (made with washed wholewheat dough, tamari, safflower oil, ginger, garlic). The Cabbage/Carrot Coleslaw was made with grapefruit juice instead of vinegar. The Tomato & Lettuce with Natural Russian Dressing used ketchup and eggless mayo, with other herbs and spices.

**Wt/Vol., Packaging, Price:** Saran-wrapped.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Sandy Chianfoni of Upcountry Seitan. 1991. Nov. 16. She moved to Boston in 1978 and enjoyed Wheatmeat Sandwiches, made by a man who lived in Cambridge. His company was named something like the “Vegetable Protein Company.”

Talk with Lenny Jacobs. 1992. March 11. John Weissman, the first person to make seitan in America, is selling Solar Burgers and stuffed pita sandwiches at Stuff-Its in the Harvard Garage (a collection of little shops) in Harvard Square in Cambridge, Massachusetts. Lenny saw him about a month ago.

Talk with John Weissman. 1992. March 31. In about late 1975 or early 1976 he and Sakee, now business partners, began making seitan in their apartment in West Roxbury, and selling it in bulk (5-10 lbs). Their first customer was a macro study house, but 2-4 weeks later they began selling their seitan, labeled “Wheatmeat,” at Erewhon, refrigerated, in bulk and as “Wheatmeat Sandwiches,” stuffed in pita bread in several flavors—one with homemade cole slaw, another with tomatoes and lettuce; each had a sauce and was Saran-wrapped with a little paper label. Their main drawback was a short shelf life—only several days.

Letter from John Weissman. 1992. June 25. “Fern Israel originally showed us the method as sautéing the gluten, then stewing in tamari and water, using about half as much tamari as water. When I thought of putting seitan in a sandwich, I decided to lower the proportion of tamari drastically. Thereafter we only stewed the product in tamari broth, ginger and garlic, leaving out the frying or sautéing in oil. This was while still at 17 Dent Street, West Roxbury.”

**782. Product Name:** Wheatmeat (Cutlets Made of Seitan). Renamed Wheatmeat: Gluten Cutlet by 1977.

**Manufacturer’s Name:** Wheatmeat Co. Renamed Vegetable Protein Co. in 1976.

**Manufacturer’s Address:** 17 Dent St., West Roxbury, Massachusetts. Then 51 Oak Ave., West Newton, MA. Then 140 River St., Cambridge, MA.

**Date of Introduction:** 1975 April.

**Ingredients:** In 1977: Water, wheat gluten, wheat flour, tamari, yeast extract.

**Wt/Vol., Packaging, Price:** In 8 oz heat-sealed polyethylene bags.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label for “Wheatmeat: Gluten Cutlet” designed in late 1976 or 1977 (when the company was located at 140 River St., Cambridge, Massachusetts) sent by John Weissman on 8 May 1992. 4 inches square. Self adhesive. Dark brown on yellow. “100% vegetarian–100% natural. Use in casseroles, soups, stews, sandwiches. Dip in batter and deep fry. Baste with marinade and bar-be-que. Fry strips and serve with noodles or grains, sauce, cheese, Put in omelets. Keep refrigerated or frozen.” Ingredients are shown above.

**783. Product Name:** Tan-Pops (Made with Seitan).

**Manufacturer’s Name:** Wheatmeat Co. Renamed Vegetable Protein Co. in 1976.

**Manufacturer’s Address:** 17 Dent St., West Roxbury, Massachusetts. Then 51 Oak Ave., West Newton, MA. Then 140 River St., Cambridge, MA.

**Date of Introduction:** 1975 May.

**Ingredients:** Wheatmeat: Wheat gluten, soy sauce, gingerroot, garlic, and onion. Batter: Corn flour, wheat flour, onion, garlic, herbs, spices, salt.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** R. Leviton. 1983.

*Vegetarian Times*. Jan. p. 32-37. “Mochi, amazake and seitan: Introducing three new foods from the Orient.” “A product named “Tan-pops” was sold several years ago in Boston. They were large fist-sized chunks of seitan, breaded in cornmeal, deep-fried, and sold unwrapped in wicker baskets by the check-out counters of a few natural foods stores in Boston.

Talk with Lenny Jacobs. 1991. Nov. 14. Corn Dogs are a traditional New England food made by inserting a skewer into the end of a hot dog, dipping it in a thick cornmeal batter, then deep-frying it. The Tan-Pops made from seitan were on a skewer that was as thick as a chopstick; each was dipped in batter, then deep-fried. Starting in the early 1970s, they started to be sold at natural food stores in Boston, and probably on the West Coast. Lenny saw Tan-Pops sold by the cash register at a number of natural food stores in Boston. They were in a big, uncovered serving bowl, lined with oil-stained paper towels. It was a very unsanitary presentation. [John Weissman responds: “Tan-Pops were put, not ‘presented.’ They usually sold before they could spoil, and people breathing on them didn’t contaminate them because the world was clean then”]. Since it was a fresh, perishable product, it was not distributed outside of the local area where it was made. Barry Creighton may have made them [actually, he did not]. He was with Cable Springs Bakery, and he now lives in Alaska. Kathy Bellicchi might know more about this product. The key point is that the person who made the seitan for these Tan-Pops was one of the first, if not the first, person to manufacture seitan commercially in America—even before Grain Dance.

Talk with Sandy Chianfoni of Upcountry Seitan. 1991. Nov. 16. She moved to Boston in 1978 and at that time they sold Tan-Pops at the Erewhon retail store. They were the same shape as a fat hot-dog on a stick, as they were also dipped in a thick cornmeal batter then deep fried. They were not shaped like a fist. The meat-based ones were also called “Corn Dogs.” She does not know who made them but her cousin Richard might know. It may have been the guy who made “Wheatmeat” (a seitan product) and Wheatmeat Sandwiches, and who may have lived in Cambridge. She thinks he made Wheatmeat by mixing wheat and vital gluten

together rather than by using the traditional process. He sold it vacuum packed by itself. It was in Boston when she arrived in 1978. Michael Cohen of Lightlife Foods might know who made it, since the manufacturer, whose company was named something like “The Protein Company” may have offered to sell his company to Michael.

Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970s. 1991. Nov. 18. Joel recalls that a man named Johnny Weissman made both Wheatmeat and Tan-Pops (or were they spelled Tan-Pups?). He owned the Vegetable Protein Company in Cambridge. Joel is not sure which product was launched first. He thinks at least one of them was being sold by 1976, maybe as early as 1975. Andy Levine, a clerk in the Newbury Street store who now runs Yellow Emperor (they make Chinese herbs) in Eugene, Oregon (Phone: 503-465-6664) might well know more about Johnny. Tan-Pops were about the shape and size of a Corn Dog—which is a hot dog on a stick, deep-fried in a blanket. In the name Tan-Pops, “Tan” comes from seitan, and “Pops” comes from Popsicles. A wiener-shaped piece Wheatmeat was made into seitan, which must have had a lot of garlic in the broth, was skewered, breaded with a combination of cornmeal, soy grits, and maybe some seasonings or spices, then deep-fried. Johnny delivered them to stores in a basket while they were still hot. “Tan-Pops were an incredibly good product. They sold themselves by their intense aroma. You’d have to be careful not eat too many when they first came in so you’d have some left to sell. They were outrageous. After a while you’d learn not to eat them all. They were crispy and crunchy on the outside, then you’d bite in and they’d be juicy and rich on the inside.”

Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Paul was in Boston for 9 months starting in Sept. 1978. Wheatmeat was definitely made by the Vegetable Protein Co. in Cambridge. Johnny Weissman was a partner with some other person in that company. He is sure that the straight Wheatmeat Seitan was developed before the Tan-Pops. He made more money off the Tan-Pops than off the seitan. But Paul thinks Johnny made the Tan-Pops on his own—he had been making them for about 12-18 months. Paul does not know the name of the company that made Tan-Pops, but the business definitely had a name. Paul was in the place where Johnny made the Tan-Pops; it was a little deep-frying place in Cambridge. The Tan-Pops had a wonderful smell and were delicious but quite greasy. While Paul was there, Johnny was moving his Tan-Pops operation out of that deep-frying place into his house. He was converting his basement into a food plant, in part because of his fear of health inspectors. Johnny was very creative in making foods. In 1979 he developed a Tofu Bologna and some other tofu-based meatlike product, but he was so paranoid that other companies would copy him after he launched them that he never did. “I tasted the Tofu Bologna at his home and I

flipped out. It was just fantastic—great texture and flavor—I’ll never forget it.” He was good at product development but poor at marketing. Between late 1978 and 1979, the health department made him stop selling Tan-Pops in a paper-lined basket, asking him to place each one in small, individual, open-top plastic bags in the same basket. Kathy Bellicchi, who ran Cable Springs Bakery, knew Johnny.

Talk with Joan Donovan, co-founder of Upcountry Seitan. 1991. Dec. 7. She remembers that this product was sold at natural food stores in the Brookline/Boston area but she does remember any details about the manufacturer or product.

Talk with Johnny Weissman. 1992. March 31. See this interview for details on the product and its history.

784. Gallese, Liz Roman. 1975. Soy is rebounding as a substitute for animal protein. *Wall Street Journal*. June 4. p. 24.

• **Summary:** “‘Meats’ made from soybeans are making a comeback.” When meat prices were high in 1973, so was enthusiasm for soy extenders and substitutes. When those prices dropped, so did the enthusiasm. But now meat prices are rising again and soybean prices are falling, so more food processors are using soy protein ingredients in a wider range of products—frozen entrees, packaged meals, canned meats, and dairy foods.

But there are other reasons for the better acceptance. The quality of the soy products has improved. And the Food and Drug Administration recently changed its policy; it no longer requires the word “imitation” to be used on labels containing soy protein, as long as these products are nutritionally equivalent to the real thing.

Arthur D. Little Inc. recently published a study on substitute food ingredients. It concludes that imitation animal proteins, including soy, protein from cow’s milk [whey], and others will grow at 8% a year to 1.3 pounds by 1980. More specifically, the study says that soy protein use will grow 25% a year to 439 million pounds; that is from 270 million pounds this year to 225 million pounds in 1970.

Makers of soy protein say food processors are already placing larger orders. Central Soya Co. says uses for soy are increasing so fast that it will “bring out a new soy food product within a month” to increase its share of the new market.

785. Machida, Yoshiro. 1975. Suisan neriseihin to shite no daizu tanpaku kaado [Using soymilk curds like fish pastes]. *Japan Fudo Saiensu (Japan Food Science)* 3(3):41-45. June. Bessatsu. [5 ref. Jap]  
Address: Sugiyama Industrial Chemical Research, Tokyo, Japan.

786. MacMillan, Joan Bradford; Smith, Elizabeth B. 1975. Development of a lacto-ovo vegetarian food guide. *J. of the*

*Canadian Dietetic Association* 36(2):110-17. Summer. [13 ref]

• **Summary:** Page 111: “Whether the plant-based diet is arrived at by means of simple elimination of meat, fish and poultry, or by judicious substitution of suitable high protein vegetable sources for the animal proteins, it is known that it is possible to supply a nutritionally adequate dietary by means of plant foods plus milk and eggs.” “The guide was designed for vegetarians who consume some milk and eggs.”

Page 112: Table 1. Food groups and serving sizes. “The standard serving of milk is one cup whole, 2%, skim (added Vitamins A and D).” Other dairy products, such as 4 oz. cream cheese, may be substituted. “One and a half eggs on the average are recommended by the guide. This includes those used in baked items,…”

The four food groups are: 1. Bread, cereal, pasta, and rice. 2. Vegetable protein foods, including TVP, A. Legumes: 1 cup cooked soybeans or other beans, ¼ cup peanuts or peanut butter, 6 oz. soybean curd. “Meat analogues: These are usually canned or frozen meat-like foods derived from vegetable protein (often soy, gluten or nut protein).” B. Nuts and seeds (1½ oz. or 3 tablespoons). 3. Milk and eggs. 4. Fruits and vegetables.

Note: This is the earliest document seen (Nov. 2014) that contains the term “plant-based diet” in a nutritional context. This term, which is now widely used, denotes a diet that contains a high percentage of calories from plant foods, with an optional small percentage of animal foods allowed. There is no universally agreed numeric value for the definition of high vs. small percentages in this context. The term appears to mean different things to different authors; these diets can range from strict vegan to non-vegetarian with limited consumption of flesh foods. Address: 1. Research Assistant; 2. Associate Professor. Both: Dep. of Foods and Nutrition, Faculty of Home Economics, Univ. of Manitoba, Winnipeg [Canada].

787. Wenger Manufacturing. 1975. A new concept in meat analogs: Wenger Uni-Tex process (Leaflet). Sabetha, Kansas. 2 p. Front and back. 28 cm.

• **Summary:** The front of this glossy color dated leaflet shows seven color photos of products (both rehydrated and not) made by the Uni-Tex process. At the top is a field of soybeans. Across the bottom is written: “Shown for the first time at Wenger booth 1807-1809, I.F.T. Show, Chicago [Illinois], June 9-12, 1975.”

On the back, the words “Uni-Tex” are written boldly six times, one below the other in increasingly dark colors. Below that: “A new concept in meat analogs.” Address: Plant and general offices—Sabetha, Kansas 66534. Industrial sales—Kansas City, Missouri 64112. Phone: 816/531-6833.

788. Wenger Manufacturing. 1975. A “Jack and the bean” talk (Ad). *Soybean Digest*. July. p. 32.

• **Summary:** The wizard from Wenger Manufacturing showed Jack, a bright young food scientist, “how Wenger extrusion cooking systems can be used to make textured vegetable protein meat extenders, and the exciting new economical meat analog, UNI-TEX (a Wenger developed, patent applied for, universal textured protein) or full-fat soy flour for bakery products, beverages, and infant foods; or even dry-expanded and semi-moist petfoods.”

Illustrations show: (1) Jack sitting cross-legged, looking perplexed. (2) The Wenger Wizard standing in front of smiling Jack. Above them is a small photo of a Wenger extruder. (3) Happy Jack resting, reclining on his elbows, in a patch of soybeans.

This ad also appeared in *Food Processing* (Chicago), Aug. 1975, p. 45. Address: Sabetha, Kansas 66534.

789. *Food Engineering*. 1975. Lower-cost meat analogs made directly by extrusion-cooking of various proteins. 47(8):27. Aug.

• **Summary:** Kansas City, Missouri: A new process for making “meat analogs” from relatively inexpensive materials has been developed by Wenger manufacturing here. The analogs, called Uni-Tex, can be produced from “defatted soy,” peanut, or a wide range of other vegetable proteins. A large photo shows the meat-like texture of a piece of ham analog next to a piece of real ham.

790. *Consumer Reports*. 1975. A low-fat imitation of pork sausage. 40(9):525. Sept.

• **Summary:** About Morningstar Farms Breakfast Links, which are sold frozen and contain wheat gluten, soy, yeast, vegetable oils, egg albumen, sugar etc. The biggest selling point is their low fat content, however oil must be used when preparing the links. They were found to be a poor imitation of real links—“crumbly in texture and beanlike under a heavy mask of spices.”

791. *NHK Kyo no Ryori (Tokyo, Japan)*. 1975. Jiman ryôri: Biru Shurutorefu. Tôfu [Recipes I am proud of: Bill Shurtleff and tofu]. Oct. 1. p. 84-85. [Jap]

• **Summary:** This magazine is published by Japan’s largest and most popular television station, NHK public TV. The contents are taken from NHK-TV programs. This one shows Bill Shurtleff and Akiko Aoyagi teaching Japanese how to make tofu at home. Black-and-white photos show: (1) Shurtleff, wearing an apron, ladling soymilk curds from a metal pot into a cloth-lined forming box (tofu kit). (2) Pouring soaked soybeans into a blender. (3) Straining the soymilk from the fiber. (4) Ganmodoki salad with tofu mayonnaise. (5) Ganmo burger sandwich. (6) Shurtleff and Aoyagi, seated cross-legged on tatami mats, with a large meal prepared in front of them.

792. Erehwon Trading Co., Inc. 1975. Erehwon harvest ‘75.

Boston, Massachusetts. 48 p. Oct. Catalog and price list.

• **Summary:** On the front cover, a brown and white photo shows a rustic farmer, holding a pitchfork, standing by his horse and hay wagon with wife and child. On the rear cover, Erewhon's president, Tyler Smith, writes a poetic passage about the beauty of wheat. Products include: Grains: Lone Pine in Arkansas grows organic short grain and long grain brown rice. Wehah Farms in California grows organic short grain brown rice and non-organic sweet brown rice [glutinous rice]. Baker in Louisiana grows organic medium grain brown rice. Organic hard red winter wheat is grown in Nebraska and in Deaf Smith, Texas. Organic hard red spring wheat is grown by Ted Whitmer in Montana and Ricke in Minnesota. Organic hard amber durum wheat is grown by Whitmer in Montana. Organic soft white pastry wheat is grown by Wild Winds in New York. Other organically grown grains are pearled barley (Idaho), whole unhulled buckwheat for sprouting, hybrid yellow or white corn (Deaf Smith), open-pollinated yellow corn (Minnesota), blue corn, whole oats, and rye. Cereals include organic soy flakes from Deaf Smith (25 lb). Flours include organic soybean flour (25 lb, steelground, full-fat). Pasta (packaged or bulk) includes Japanese soba, Soy Rice Shells.

Snacks from "Erewhon L.A." include Chico-San Yinnies, and Date-Nut Delight. Nik's Snaks (p. 8): This full page lists about 30 products. Of these, eleven are "tamari-roasted" whole-food snacks. The 30 products are sold in 5 sizes: 2.5 oz, 3.5 oz, or 6 oz. pick-up packages, or 25 lb bulk. The soybeans (dry roasted with tamari, no salt) are sold only in 25 lb packs. Other tamari-roasted seeds include: Spanish peanuts, sunflower seeds, roasted almonds (all 2.5 oz or 25 lb), cashews or pumpkin seeds (25 lb). Non tamari-roasted products include: Raisin walnut mix. Roasted mixed nuts. Raw mixed nuts. Raisin nut mix. Peanut raisin mix. Trail mix (Honey almond granola, roasted peanuts, raw sunflower seeds, date pieces, raisins, and sea salt). Honey almond granola. Chia seeds. Bee pollen. Alfalfa seeds. Date sugar. etc. Erewhon Aztec organic corn chips. Baked goods from Cable Springs Bakery in Cambridge, Massachusetts. Fruit juices from Erewhon, Heinke's, Knudsen, Lehr's (natural grape juice from Germany), and Biotta (Swiss Vegetable juices).

Dairy Products: Cheeses from Alta Dena (also kefir and yogurt) in California, Superior Cheese Co. in Massachusetts, Redwood Natural Cheese Co. in California. Also Favorite Foods yogurt.

Dried fruit, including organically grown Monukka and Thompson raisins, prunes, dates, apricots, apples, Bing cherries, black mission figs, and Calimyrna figs. Peanut-, apple-, sunflower-, and sesame butters. Sesame tahini. Pure & Simple "fruit butters sweetened with honey only; terrific old-fashioned jams (apple, apricot, peach, plum, raspberry, strawberry, grape, cherry). Erewhon apple sauce. "Pumpkin Sour" apple sauce and apple butter made in Plainfield,

Vermont. Tree of Life fresh fruit preserves from Florida (8 varieties).

Seeds & nuts, incl. Erewhon organic soybeans in 1-lb packs, and Erewhon organic stoneground soybean flour in 24-oz packs. Arrowhead Mills packaged products, incl. Bulghur-soy grits (24 oz), Soy flakes (16 oz, organic), Roasted soy flour (24 oz, organic). Beans, incl. Aduki (25 lb, from Japan or Mainland China), yellow soybeans (50 lb, organic, New York), black soybeans (25 lb, non-organic from Japan, or organic from New York), green soybeans [dry] (25 lb, organic). Erewhon granola (17 products, including various sizes), Arrowhead Mills granola, Back to Nature granola (unsalted).

Oils, incl. Arrowhead Mills soybean oil (pints, quarts, or 5-gallon jug). Honey. Baking, incl. Premose barley malt, and Yinnies grain syrup from Chico-San. Tea, incl. 2 pages from Celestial Seasonings, and Erewhon Mu tea (9 or 16 herbs), Lotus root tea, Kukicha-branch twig tea. Springwater.

Tamari & Miso: 4 pages of descriptions and prices for Hacho miso (all misos are sold in 1 lb or 44 lb keg), Mugi miso, Kome miso, Tamari soy sauce [actually shoyu] (8 oz, pints, quarts, ½ gallons, gallons, or 4.7 gallon tin), Barley koji (1 lb). Specialties, incl. Unrefined sun-dried sea salt with natural trace minerals from the north coast of Brittany in France, Tekka, kuzu, umeboshi, sesame salt, Herbamare salt, nigari, brown rice vinegar, non-alcoholic beer (Birell, Kingsbury), Bambu instant coffee substitute.

Fearn Soya Foods: Soya granules, Soy-O wheat cereal, Soy-O corn bread & muffin mix, Soy-O bran muffin mix, Soy-O pancake mix–buckwheat, Soy-O pancake mix–wholewheat, Sesame burger mix, Natural soya powder.

Sea vegies: Agar-agar, dulse, hiziki, kombu, wakame, nori seaweeds (a description of each is given).

Erewhon certified organic produce, incl. Daikon grown in California. Soaps, incl. Cattier clay products and Dr. Bronner's Peppermint castile soap, Orjene, Nature's Gate, Tom's Natural Soap.

Cookware, mostly imported from Japan, incl. Soy [sauce] dispenser, 4½ inch. Growing [sprouts and sprouters]. Cast iron. Flyers, incl. Talking Food series, Natural recipes (3 by 5 inch tear-off pads. Soy-related recipes include: Soy au gratin, Soy casserole, Miso soup, Soyburgers, and Soy loaf).

A map shows Erewhon's delivery region (Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey) and schedule. The company also has an office near New York City at 303 Howe Ave., Passaic, New Jersey 07055. Phone 212-594-6455.

Note 1. This is the earliest document seen that uses the word "vegies" (spelled as such, one of two documents) to refer to vegetables, or "Sea vegies" to refer to sea vegetables (edible seaweeds).

Note 2. This is the earliest document seen (May 2006) that uses the term "trail mix" to refer to a non-perishable

mixture of dried fruits, seeds, nuts, roasted soybeans, granola, etc. to be eaten as a snack, as when hiking or walking. Nik Amartseff coined the term “trail mix” and launched the first commercial trail mix product through Erewhon Trading Co. in 1974. At the time, Nik was studying and practicing macrobiotics in Boston, Massachusetts. By the late 1970s several brands of trail mix were on the market in both natural food stores and supermarkets; by the 1980s there were many, as it became a mainstream American snack.

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

793. *Quick Frozen Foods*. 1975. \$100-million market by 1980 is foreseen for frozen soy extenders and analogues: Textured soy protein. 38:24-26. Oct.

• **Summary:** The market is growing for textured soy protein products that can “stand in” for more expensive meat, poultry and seafood in frozen usage. The trend is toward analogues that extend animal protein to the point of replacing it as the main component in new products entering the field. After industry consultation this magazine estimates that by 1980 these extenders and analogues combined will range from a low of \$60 million to a high of \$200 million in frozen food use.

Products discussed include: Central Soya Co.’s Response (textured soy protein concentrate). Ardex 700, one of the “TVP” [sic, soy protein concentrate] products from ADM. Nabisco’s VMR line with its beef, chicken, and seafood extenders. General Mills’ Bontrae “no-meat meats” (beef, chicken and ham products spun from soy protein isolate) and no-tuna tuna. Most Bontrae products are sold frozen to food service people for better flavor. Mott’s Soyloin entree line available from the Foodservice Division of Duffy-Mott Company, Inc., New York, NY. “These frozen, pre-cooked products include soy-analogues resembling traditional Sloppy Joe, Chili Con Carne, Chili Hot Dog Sauce with Meat, Sliced Meat Loaf in Tomato Sauce, Salisbury Steak in Gravy or in Sweet ‘N’ Sour Sauce, Meat Balls with or without Spaghetti Sauce.”

“In the retail field, complete lines of vegetable protein analogues of animal foods are exemplified by the products of Worthington Foods, Worthington, Ohio... and the Joshua Foods Division of Food Producers, Inc., Minneapolis, Minnesota, among others... Twenty-eight of the [Worthington] items are frozen, with sales amounting to almost half of the company’s total. The frozen products are predominantly spun from high-protein isolates. Their primary advantage is their well-wrought texture, and they also have shipping and storing advantages.

“The Joshua Foods products include meatless ‘sausage’

pizza, meatless ‘meat’ casseroles with noodles and macaroni, meatless lasagna, stew and barbecue cubes. All are shipped frozen. The Joshua Foods Division is in partnership with the Israeli developer of the special structurization process the company utilizes. The firm first produced its basic Joshua Filet, simulating beef, in 1973, and offered it to hospitals and other institutions. Retail product development followed success in the institutional market in the same year—initially with ground beef extender.”

“General Mills is producing retail frozen soy products under the ‘Betty Crocker’ label in addition to ‘Bontrae.’ First introduced were Betty Crocker Country Cuts—textured soy protein with a flavor like ham, and Country Cuts with a flavor like chicken. The precut chunks may be thawed and served in salads or added directly from the freezer and heated with various hot dishes.

“Two new Betty Crocker products, in three varieties each, are currently undergoing testing in the Fort Wayne and Tucson marketing areas—a croquette entree in ham, chicken and seafood flavors (with the seafood variety containing some real cod) and ham, chicken and barbecue beef meat sticks that blend real animal protein with vegetable protein in a potato crust. Each 1½-ounce box of Meat Sticks contains 12 sticks.”

794. Singer, Peter. 1975. *Animal liberation: A new ethics for our treatment of animals*. New York, NY: New York Review. Distributed by Random House. xix + 301 p. Oct. Illust. Index. 18 cm. Paperback edition published Sept. 1977 by Avon Discus. [200\* ref]

• **Summary:** This book, a milestone in and “bible” of the animal rights movement worldwide, first popularized the concepts of animal rights and speciesism (pronounced SPEE-shees-iz-um, a term first used in 1973) as logical extensions of human rights and racism. It helped to make 1975 a year that saw explosive growth in the animal rights and vegetarian movements. Singer is an Australian academic.

The author, an Australian philosopher, argues for an end to oppression and exploitation of non-human animals, discusses animal experimentation and factory farming, and presents vegetarianism as an opportunity to take a political, economic, and moral stance in our daily lives.

Contents: Preface (It begins: “This book is about the tyranny of human over nonhuman animals. This tyranny has caused and today is still causing an amount of pain and suffering that can only be compared with that which resulted from the centuries of tyranny by white humans over black humans. The struggle against this tyranny is a struggle as important as any of the moral and social issues that have been fought over in recent years”). Acknowledgments. 1. All animals are equal... or why supporters of liberation for blacks and women should support animal liberation too. 2. Tools for research... or what the public doesn’t know it is paying for. 3. Down on the factory farm... or what happened to your dinner

when it was still an animal. 4. Becoming a vegetarian... or how to reduce animal suffering and human starvation at the same time. 5. Man's dominion... a short history of speciesism. 6. Speciesism today... defenses, rationalizations, and objections to animal liberation. Appendices: Cooking for liberated people (incl. Seventh-day Adventists, bread, peanut butter, tahini, miso, hummus, and Tartex, Chinese recipes, mung bean sprouts and tofu, Indian recipes, Middle Eastern recipes, flat Arabian bread, chickpeas and felafel, Italian recipes, macrobiotic recipes {incl. soy sauce, soybeans}, meat substitutes {incl. TVP, Granburger, Protoveg, Itona, Vitpro, Loma Linda meatless frankfurters, imitation bacon bits}, and milk substitutes—often made from soybeans), further reading, organizations.

Singer's book was not just a philosophical treatise. It was a call to action. Invoking the concept of speciesism, Singer deplored the historic attitude of humans toward non-humans as a "form of prejudice no less objectionable than racism or sexism," and urged that the liberation of animals become the next great cause after civil rights and the women's movement. Singer's popular book produced two important effects. First, it reintroduced to the anti-vivisectionist cause an intellectual basis, a philosophical orientation, and a moral focus. Second, it attracted to the animal rights cause a host of new activists who started many new organizations. The most active and visible of these has been PETA (People for the Ethical Treatment of Animals, in Washington, DC), which by 1988 was thought to have 200,000 dues paying members in the USA.

Singer maintains that: "to treat animals as resources and argue about when use is sustainable, is a classic example of economic rationalism running heedlessly over non-economic values. We should no more hand our wild animals over to the tender mercies of the market than we should hand our children over to the same market forces. Neither children nor wild animals are a 'product' or a 'resource' at all."

Note: This is the earliest document seen (Oct. 2009) that mentions Itona, a British maker of soymilk and meat alternatives. Address: Australia.

795. Smith, Oak B.; Crocco, Stephanie C. 1975. Engineering "meat": Analogs that look and taste like meat are a real challenge to engineered foods' technology for affluent nations. *Food Engineering* 47(10):ef-22, 23, 26, 28, 30, 32-33. Oct.

• **Summary:** "How can you engineer a meat analog with true meat texture from soy ingredients without resorting to costly isolates and concentrates?... The solution is a double extrusion process that turns out bite-size analogs with almost unlimited application." These meat analogs are being made by Wenger Manufacturing's new Uni-Tex process, which uses the principles of high temperature / short time (HT/ST) extrusion-cooking. Color photos show: Pieces of ham-flavored Uni-Tex. Below them is a black-and-white

illustration of the front of a hog. (2) Photomicrographs of defatted soy flakes, first uncooked, then extrusion cooked. (3) Beef-type steak bites. (4) Rehydrated ham analog, separated by knife and fork, to show "its untwisted layering, characteristic of muscle tissue." (5) Pieces of real ham and ham-flavored Uni-Tex side by side for comparison. (6) A flow diagram of two processes: Extrusion cooking and Uni-Tex. Address: 1. President, Wenger International, Inc.; 2. Midwest Editor, Food Engineering.

796. **Product Name:** Cedar Lake Soynut Loaf (Meatless). **Manufacturer's Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).

**Manufacturer's Address:** Cedar Lake, MI 48812.

**Date of Introduction:** 1975 November.

**Ingredients:** Water, peanut butter, soy flour, wheat protein, tomato juice, peanut meal, salt, vegetable seasoning.

**Wt/Vol., Packaging, Price:** 19 oz can

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 22. Cedar Lakes. "Soynut Loaf." Label.

• **Summary:** Lecithin Liquid (16 or 32 oz). Soya granules (16 oz or 3 lb). Soya powder–natural [whole] (11 or 36 oz). Soya powder–low fat (12 oz or 40 oz). Soya pancake mix–salt free

(16 oz). Soya pancake red–unbleached (16 oz or 3 lb). Soya pancake blue–whole wheat (16 oz or 3 lb). Soya buckwheat pancake mix (1 lb). Bran muffin mix (12 oz). Corn & muffin mix (16 oz). Rice baking mix (16 oz). Wheat cereal & soy (16 oz). Rich earth pancake mix (16 oz). Sprouting mung beans (16 oz). Cooking soybeans (16 oz). Soybeans, wheat, or alfalfa for sprouting (16 oz). Sprouter kit. Non fat dry milk (3 lb). Rice flour (3 lb). Sesame burger mix (16 oz). Qualipro65 Muscle Protein (12 oz). Protein 600 tablets (vanilla or chocolate, 325/bottle). Hi Pro powder (vanilla, chocolate, or carob, 16 oz). Soy Protein 91% (10 or 40 oz). Whole Wheat Flour stgr. [stone-ground] (24 oz). Address: [Melrose Park, Illinois 60160].

803. Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. '75. Ann Arbor, Michigan. [vii] + 93 + 8 p. Index. Illust. 28 cm.

• **Summary:** This catalog, largely printed by a computer, contains many ads on unnumbered pages. Contents: Hi! Ordering and service information. Bulk: Whole grains, beans, seeds and nuts, dried fruit, nut butters, etc. Refrigerated and frozen ("Frozen meats {beef}–No DES, steroids, female hormones, antibiotics, or stimulants used in feeding; Chickens–No hormones & antibiotics. Ask for turkeys and hens during Thanksgiving." "Frozen soy products: soy milk and tofu soybean curd"). Books. Packaged (by company and product category). Index by product. Index by manufacturer.

"We are happy to announce that Midwest and Mountain High are now one entity... We go into the fall and winter seasons with a fall and winter catalog, delivery schedule, and computer system." For new developments, watch the monthly newsletter and sale sheets. "Your Friends at Midwest."

Includes the following ads (the number is that of the facing page). Wheat Stalk Soya Burger (Cotati, California, p. 17). Arrowhead Mills (p. 27). Dr. Bronner's Magic Soap (p. 32). Chico-San (p. 35). Erewhon (p. 41, incl. "Trail Mix, Niks"). Fearn Soya Foods (p. 42; shows a package of Fearn Soy/o Buckwheat Pancake Mix). Flavor Tree–Pernut soy beans (p. 42). Hain (p. 49, "Cold pressed safflower oil," mayonnaise, and margarine). Health Main (p. 54; soy is not mentioned–only natural potato chips and yogurt dressing & dip). Infinity Herbal Products Ltd. (p. 56). Malt-O-Meal–Soy Town (dry roasted soy beans, p. 60). NF Factors (Lafayette, Calif., p. 67. A photo shows a can of Protesoy). Pure & Simple (p. 72, 795 West Hedding St., San Jose, California 95126; mainly fruits, fruit juices, fruit butters, vinegars). Sovex (p. 83-84. "The fastest selling natural cereal line on the market... Here's the one that started it all, the original Crunchy Granola"). Viobin (wheat germ oil, p. 85F, 89). Tiger's Milk Products (p. 86).

Companies whose products are listed with ads include: Back to Nature (granola, p. 28). Country Natural (granola,

p. 36). El Molino (p. 38-39; incl. Cara Coa Crunch Bar, Carob Fruit & Nut Bar, Carob Mint Candy, Chia Seeds, Flaxseed–Whole, Pumpkin seeds, Soybeans–whole, Soya flour, Soya grits, Carob Coated Soybeans). Ener-G-Foods–Jolly Joan (incl. Instant Soy Milk Powder, Wheat & Soy P&W [Pancake & Waffle] Mix {regular and low salt}, p. 39). Flavor Tree (Pernola cereal, Pernut soy beans–salted, cinnamon, salt free, garlic, Pernut toasted soybeans–salted, salt free, garlic, onion). Wok sets in gift box, Quaker City grain grinder, Corona hand mill (p. 58). Lassen Foods (granola, p. 60, 60F). Mac Knives (p. 60). Orjene (p. 70-71). Parkelp–Ocean Labs (p. 71, incl. Sea Zun).

The Chico-San Inc. ½-page ad (facing p. 35) features four products; a photo of each is given and each is K-Parve: Rice Cake San-Wich (filled with sesame seeds and Yinnies Rice Syrup). Yinnies Rice Syrup (natural sweetener, made from rice and barley). Yinnies (traditional oriental confection, wrapped like individual candies). Rice Cakes in 4 varieties: Salted or Unsalted, Rice Cakes with Millet–Salted. Rice Cakes with Buckwheat–Salted. “Other Chico-San Products: Organically grown brown rice. Lima soy sauce, miso (soybean puree), rice malt vinegar, sesame butter, sesame oil, nigari, barley koji, tekka, sesame salt, sea salt, salt plums, kuzu, organic rice cream, organic rice flour, black soybeans, azuki beans, sea vegetables, mu tea, lotus root tea, twig tea, toothpowder, seaweed shampoo.” Address: Ann Arbor, Michigan 48107. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

**804. Product Name:** Soya Burger [Plain, Curry, Taco, Bar-B-Que].

**Manufacturer’s Name:** Wheat Stalk.

**Manufacturer’s Address:** Cotati, California. Phone: 707-795-0091.

**Date of Introduction:** 1975 November.

**Ingredients:** Blend of finely ground soya beans, carrots, wheat germ, eggs, oatmeal, garlic, onion, soya oil, salt, 10 spices and herbs.

**Wt/Vol., Packaging, Price:** 12.0 oz.

**How Stored:** Frozen.

**Nutrition:** 147 calories. 9.9 gm protein.

**New Product–Documentation:** Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See ad facing p. 17.

**805. Product Name:** Cadbury’s Soya Choice (Canned Meat Substitute) [Mince, or Casserole Chunks].

**Manufacturer’s Name:** Cadbury Typhoo Ltd.

**Manufacturer’s Address:** Franklin House, Bouvinnville, P.O. Box 171, Birmingham B302NA, England.

**Date of Introduction:** 1975 December.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** Archer Daniels Midland (ADM) Annual Report. 1977. “What’s new: A 75 year report

from Archer Daniels Midland Company.” p. 8. “Who needs high priced foods? Not the British. Cadbury’s Soya Choice fills the bill. Based on TVP, these products are a raging success. It has the good flavor and nutrition of meat. At half the price. A color photo shows two cans of Cadbury’s Soya Choice (Casserole Chunks, and Mince).

Cummings. 1979. *Food Manufacture* (London). 54(1):49-51. Jan. The product was launched in Dec. 1975.

*Food Engineering*. 1979. Jan. “Marketing Soy Products.” A photo shows four cans of Cadbury’s Soya Choice (Curry, Mince Italian Style, Casserole Chunks, and Mince).

Cummings. 1979. *Journal of the American Oil Chemists’ Society* 56(3):400-03. March. “Launching a successful product on the consumer market.” Development of the product by Cadbury Schweppes started in 1973 at a time when meat prices in the UK has started to rise and the economy was in one of its periodic downturns. “The final product was launched in December 1975. The brand name chosen was Soya Choice... We originally launched in blue cans but have since changed to discriminate between the mince and the chunk form.”

Jenny Botsford. 1980. Soya. p. 50. Shows a black-and-white photo of two cans of Cadbury’s Soya Choice, one in Casserole Chunks and one in Mince texture. The photo on the can shows the product in a pie. The text on the front bottom of the can reads: “Textured soya casserole chunks (or mince) with onions in beef gravy.”

R.A. Sair. 1981 (presented Aug. 1978). Marketing plant protein in Europe. p. 395-97. Shows a black-and-white photo of each product in its can. States that test marketing of the product in London began in Jan. 1976. Describes how the product and marketing strategy was developed.

W. Pringle. 1991. “Soya protein, past experience & future potential.” In: *Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung*. p. 156. Cadbury Soya Choice was launched in Jan. 1976. It consisted of extruded textured soya in gravy. There were three different products in cans. All of the meat extenders or meatlike products launched in the UK during 1975 and 1976 enjoyed real success for a period of time. “In particular Cadbury’s Soya Choice sold well for about three years in every area of the U.K. Sad to relate, however, all of them quietly and gradually lost sales and finally disappeared from the market.”

806. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]

• **Summary:** This pioneering work started the “tofu revolution” in America. Contents: Preface. Acknowledgments. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food: Introduction, rich in high quality protein (NPU, biological value, protein

score, amino acid content), high protein complementarity (tofu contains an abundance of lysine, an essential amino acid that is deficient in many cereal grains; increase usable protein by combining tofu with wheat, rice, corn, etc.), easy to digest, an ideal diet food, low in saturated fats and free of cholesterol, rich in vitamins and minerals, a health-giving natural food, backbone of the meatless / vegetarian diet, free of chemical toxins, low in cost, easily made at home, quick & easy to use, versatile.

3. Getting started: Introduction, buying and storing tofu, basic ingredients (whole-wheat flour, miso {rice-, barley-, and soybean miso, special Japanese miso, Chinese chiang}, oil, brown rice, salt, shoyu {natural shoyu, shoyu, Chinese soy sauce, synthetic or chemical soy sauce}, sugar, vinegar, monosodium glutamate {MSG}), Japanese kitchen tools (each illustrated), preparatory techniques (salt rubbing, rinsing and pressing leeks and onions, soaking burdock root, reconstituting dried sea vegetables {dried hijiki, wakame, agar}, wheat gluten and kampyo [kanpyo], parboiling, cutting tofu and vegetables, using sesame seeds, toasting nori, preparing a steamer), basic recipes (soup stocks and broths {dashi}, basic shoyu dipping sauces {tsuke-jiru}, miso toppings {sweet simmered miso / *nerimiso*, miso sauté / *abura miso*, special miso toppings and dipping sauces, finger lickin' miso, and regular miso}, miso salad dressings, nut and seed butter toppings (incl. sesame butter or tahini, peanut butter), spreads and dressings, basic sauces, rice, noodles and

other basic preparations).

Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History of soybeans and “soybean foods,” cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*, incl. a recipe for “Sweet emerald bean paste {*Jinda*}),” kinako (roasted full-fat soy flour, incl. Japanese health food treats such as *kinako amé*, *gokabo*, *kokusen*, *kankanbo*, and *abekawa mochi*), soybean sprouts (*daizu no moyashi*), natto (“sticky fermented whole soybeans,” with “gossamer threads”), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein {TVP}, soy oil products). 5. Gô (a thick white puree of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey. 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing {towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding, homemade tofu (basic, from powdered soymilk, fermentation method related to soymilk yogurt), tofu quick and easy {incl. Chilled tofu–Hiya-yakko}, tofu dressings, spreads, dips and hors d’oeuvre {incl. Creamy tofu dressings and dips, Tofu mayonnaise dressing, Tofu tartare sauce, Tofu cream cheese, Tofu sour cream, Tofu cottage cheese, Tofu guacamole}, tofu in salads {Western style and Japanese style salads incl. Shirae}, tofu with sandwiches and toast, tofu in soups {Western style and Japanese style soups, incl. miso soup}, tofu in sauces, tofu in breakfast egg dishes, tofu baked, tofu sautéed, stir-fried or topped with sauces {incl. Mabo-dofu [Ma Po doufu]}, deep-fried tofu, tofu with grains, tofu broiled {incl. Tofu dengaku}, tofu simmered in one-pot cookery and seasoned broths, tofu steamed, tofu desserts {incl. Tofu whipped cream or yogurt, Banana tofu milkshake, Tofu icing, Tofu ice cream, Tofu cheesecake, Tofu-peanut butter cookies}).

9. Deep-fried tofu: Thick agé or nama-agé (incl. *atsu-agé* meaning “thick deep-fried tofu,” “three-cornered agé” {*sankaku-agé*} in Kyoto, agé cubes {*kaku-agé*}, “five-color agé” {*gomoku-agé*}), ganmo or ganmodoki (incl. *hiryozu / hiroso*, “Flying Dragon’s Heads,” “treasure balls,” “Ganmo treasure balls”), agé or aburagé (incl. *kiji*, “agé pouches,” “crisp agé,” *kanso aburagé*, “agé puffs,” “fried soybean cakes,” “hollow agé cubes,” “Smoked tofu,” p. 189-91, 197).

Note 1. This is the earliest English-language document seen (April 2013) that contains the following terms related to deep-fried tofu (p. 180-90): “Thick agé,” *nama-agé*, *atsu-agé*, *Hiryozu*, “Dragon,” “Flying Dragon’s Heads,” “treasure

balls,” “five-color agé,” *gomoku-agé*, “Ganmo treasure balls.” “fresh or raw deep-fried tofu,” “three-cornered agé,” *sankaku-agé*, “agé cubes,” *kaku-agé*, *kiji*. “agé pouches,” “crisp agé,” *kanso aburagé*, “agé puffs,” “fried soybean cakes,” or “hollow agé cubes.”

10. Soymilk. 11. Kinugoshi (“*Kinu* means ‘silk’; *kosu* means ‘to strain’; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk.” It is made from concentrated soymilk). 12. Grilled tofu (incl. *sukiyaki*). 13. Frozen and dried-frozen tofu. 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha’s chicken, Buddha’s ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}; see p. 258 for illustrations of many meat alternatives, incl. Buddha’s fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig’s head, and molded ham). One type of Korean soybean miso is called *kotsu jang* [sic, *kochu jang*]. When tofu is served with miso [Korean-style, *Tenjang*] as the dominant seasoning, and with rice, “it becomes the popular *Tenjang Chige Pekkem*” (p. 262). 16. Special tofu.

Note 2. This is the earliest (and only) English-language document seen (March 2009) that uses the word “*Tenjang*” to refer to Korean-style soybean *jang* (miso).

Part III—Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way.

Appendices: A. Tofu restaurants in Japan; many are vegetarian: In Tokyo: *Sasa-no-yuki / Sasanoyuki*, *Goemon*, *Hisago*, *Sanko-in*, *Shinoda-zushi*, *Dengaku* (south of Tokyo in Kamakura). In Kyoto: *Nakamura-ro*, *Okutan*, *Takocho*, *Izusen*, *Junsei*, *Nishiki*, *Hakuun-an*, *Rengetsu*, *Sagano*, *Sorin-an*. Tea ceremony cuisine (*Kaiseki ryori*), Zen temple cookery or Buddhist vegetarian cookery (*Shojin ryori*), Tea ceremony cookery from China (*Fucha ryori*), Wild gathered cookery (*Sansai ryori*). A directory of these and others, with addresses and phone numbers, is given (p. 312).

B. Tofu shops in the West (Directory of 43 shops in the USA, 3 in Europe, and 3-7 in Latin America {Mexico City, Rio de Janeiro and Sao Paulo, Brazil}). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

Pudding recipes include: Rice pudding with *gô* and apple (p. 76, incl. 2 cups soymilk). Tofu *chawan-mushi* (p. 147; Steamed egg-vegetable custard with tofu). Tofu fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk *chawan-mushi* (p. 209). *Chawan-mushi*

with *yuba* (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or *parfait*). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for “Mock tuna salad with deep fried tofu.”

Note 3. This is the earliest English-language document seen (Sept. 2013) that uses the term “Tofu ice cream” to refer to soy ice cream or that contains a recipe for “Tofu ice cream.”

Note 4. This is the earliest English-language document seen (April 2013) that uses the term “Tofu Cheesecake” and the first to give a recipe for a tofu cheesecake.

Note 5. This is the earliest English-language document seen (Oct. 2013) that uses the term “Tofu sour cream” (p. 109) or that contains a recipe for “Tofu sour cream.”

Note 6. This is the earliest English-language document seen (April 2013) that uses the term “tofu milkshake” or that gives a recipe for a shake made with tofu.

Note 7. This is the earliest English-language document seen (Jan. 2012) that uses the term “sticky fermented” to refer to *natto*.

Note 8. This is the 2nd earliest English-language document seen (April 2013) that uses the term “dried-frozen tofu.”

Note 9. This is the earliest English-language document seen (April 2013) that describes preparatory techniques for tofu (p. 96-98).

Note 10. This is the earliest English-language document seen (April 2013) that contains the term “smoked tofu.”

Note 11. This is also the earliest English-language document seen (April 2013) that uses the term “kinugoshi tofu” to refer to silken tofu.

Note 12. As of March 2007, the various English-language editions of this book have sold more than 616,000 copies.

Note 13. This is the earliest English-language document seen (Aug. 2011) that contains the term “Modern Western soybean foods” (see p. 69), a term that Shurtleff would soon (by 1983) replace by the more accurate “Modern soy protein products.”

Note 14. This is the earliest published English-language document seen (Jan. 2012) that contains the term “creamy tofu dressings” (or “dressing”).

Note 15. This is the earliest English-language document seen (Sept. 2012) that contains the term “Soymilk yogurt.”

Note 16. This is the earliest document seen (Oct. 2012) that contains an adequate or detailed description of how to make *yuba* at home.

Note 17. This is the earliest English-language document

seen (June 2013) that contains the term “whole dry soybeans.”

Note 18. This is the earliest published English-language document seen (Oct. 2013) that contains the term “Tofu whipped cream” (regardless of capitalization). This term appears on pages 113, 148 (with recipe), 149, 153, and 179. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

807. Shurtleff, William; Aoyagi, Akiko. 1975. Yuba [in Japan] (Document part). In: W. Shurtleff and A. Aoyagi. 1975. *The Book of Tofu*. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 238-49.

• **Summary:** On the front cover of *The Book of Tofu* is a color illustration of Yuba Han, a traditional yuba shop in Kyoto, by Akiko Aoyagi. The tofu forming boxes are not in the actual yuba shop.

Contents: Introduction (What is yuba, how it is made in commercial shops, history, yuba shops in Japan). Types of yuba in Japan: Fresh yuba (*nama yuba*), half-dried yuba (*nama-gawaki* or *han-gawaki*), dried yuba (*kanso-* or *hoshi-yuba*). The varieties of yuba in Japan (with illustrations): Fresh yuba sheets (*nama-yuba*), flat yuba sheets (*hira-* or *taira-yuba*), fresh yuba rolls (*maki-yuba*), long yuba roll (*komaki*), small yuba rolls (*kiri-komaki*), tied yuba (*musubi-yuba*), large yuba spirals (*omaki-*, *futomaki-*, or *uzumaki-yuba*), ginkgo-leaf yuba, *Oharagi-yuba* (slightly flattened roll tied with a thin piece of kombu), sweet yuba (*amayuba* or *ama-yuba*), fresh yuba trimmings (*kirehashi*), yuba flakes (*kuzu-yuba* and *mimi*), trough-shaped yuba (*toyuba* or *to-yuba*). An illustration (line drawing) accompanies each variety.

The chapter begins: “If you have ever simmered a pot of milk over very low heat or set a bowl of hot milk aside to cool, you have no doubt noticed the thin, delicate film that soon forms on the milk’s surface. The longer it is allowed to set, the firmer and thicker it becomes. And if you have ever tried lifting this film off and tasting it, you may well have found it to be soft, warm, and delicious. In the same way, if fairly thick soymilk is gently heated, a thin film soon covers its surface. In Japan this film is called yuba, and since ancient times it has been considered a true delicacy. It is easily prepared at home, and since it is best when fresh and warm, yuba made in your own kitchen and served as an hors d’oeuvre or as part of a meal will have a tenderness and fragrant richness that can far surpass that of the yuba ordered from even the finest traditional shops.”

Reconstituting dried yuba. Homemade fresh yuba—How to make fresh yuba at home: Variations—half-formed yuba (*tsumami-agé*), large sheets of fresh yuba, fresh yuba rolls (*maki-yuba*), dried yuba.

Yuba recipes: Yuba hors d’oeuvre (15 recipes, mostly Japanese- or Chinese-style). Chinese-style deep-fried yuba hors d’oeuvre: Yuba chicken (*ssu-chi* or *suji*), deep-fried

Buddha’s yuba, yuba nori roll, yuba drumstick (*Sso-tsai*), glutinous rice roll. Yuba in salads, soups, and sauces (2 recipes). Yuba in sandwiches, egg dishes, and oven cookery (one recipe). Yuba sautéed and deep-fried (5 recipes, including *Tamago yuba with ankake sauce*, *Kenchin maki*, *shinoda maki*, and *yuba harumaki*). Yuba with noodles or with rice and sushi. Yuba in one-pot cookery and seasoned broths (Incl. *Happosai*). Yuba steamed (Incl. *Chawan-mushi*, *Yuba kenchin-maki*, and *Yuba shinjo*). Chinese-style steamed yuba (Yuba-filled steamed buns, Pressed yuba with peanut sauce).

“Sweet yuba (*Amayuba*): This is the last sheet of yuba lifted (and often partially scraped) from the bottom of the steaming tray. It has a sweet rich flavor and slightly reddish color. Thicker and less delicate than most yuba, its edges are often ragged and uneven. Eaten fresh and warm at the yuba shop, it is ambrosial. It is usually dried and sold in large pieces of various sizes in sealed cellophane bags. The least expensive of all types of yuba, sweet yuba is, in our opinion, the most delicious, especially when deep-fried, lightly salted, and served like potato chips. Dried pieces may be added to soups, egg dishes, or sautéed vegetable preparations” (p. 241).

Note 1. A full-page illustration (p. 258) shows many types of Chinese yuba mock meats (meat alternatives).

Note 2. This is the earliest English-language document seen (Oct. 2012) that gives the Japanese names for many popular types and varieties of yuba, and suggests a useful English equivalent for each, for example: Fresh yuba (*nama yuba*), sweet yuba (*amayuba* or *ama-yuba*), etc. An illustration shows each of the many types and varieties.

Note 3. This is the earliest English-language document seen (Oct. 2012) that gives a variety of authentic Asian yuba recipes, including both Japanese and Chinese. Many of these recipes are illustrated.

The word “yuba” appears on 59 pages of this book; pages 4, 8, 12, 21-25, 52, 70, 73, 117, 118, 120, 125, 128, 136, 147, 152, 177, 190, 203-205, 209, 236-250, 252, 257-59, 261, 262, 310-12, 316, 330-34, rear cover. Address: Lafayette, California.

808. Shurtleff, William; Aoyagi, Akiko. 1975. Tofu, soymilk and yuba in China, Taiwan, and Korea (Document part). In: W. Shurtleff and A. Aoyagi. 1975. *The Book of Tofu*. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 250-64.

• **Summary:** Contents: Introduction. Three varieties of tofu. Doufu: Known as *tojo* or *tokua* in the Philippines, or as *tahu* in Indonesia. Pressed tofu (*doufu-kan*): Savory tofu (*wu-hsiang kan*), soy-sauce pressed tofu (*chiang-yu doufu-kan*), pressed tofu sheets (*pai-yeh*, incl. pressed tofu noodles or “beancurd shreds” {*doufu-ssu*, *kan-ssu*}, pressed tofu loops {*pai-yeh chieh*}, Buddha’s Chicken {*su-chi*} or Buddha’s Ham {*suhuo-t’ui*}, salted dry tofu {*doufu-kan*}). Chinese

soft kinugoshi (*shui-doufu*, *sui-doufu*, *nen-doufu*, *nan-doufu*, *shin-kao doufu*). Warm soymilk curds: Chinese smooth curds (*doufu-nao*, *dou-nao*; often served for breakfast by street vendors), curds-in-whey (*doufu-hua*). Deep-fried tofu (*yu-doufu*, *cha-doufu*, *doufu-kuo*, *kuo-lao doufu*). Frozen tofu (*tung-doufu*, *ping-doufu*).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *tung-doufu* or the term *ping-doufu* to refer to frozen tofu.

*Doufu-ru* [fermented tofu]: white fermented tofu (*pai doufuru*, incl. 5 different types such as red pepper, sesame oil and red pepper, five-spice, etc.), red fermented tofu (*hung doufuru*, *nanru*, *nanyu*, made by adding Chinese red fermented rice [red rice koji] {*ang-tsao*} to the brining liquor to give it a deep red color, thick consistency, and distinctive flavor and aroma; soy sauce is generally used in place of rice wine; another variety is rose essence fermented tofu), stinky fermented tofu (*tsao-doufu*, *ch'ou doufu*, incl. green stinky fermented tofu), *chiang-doufu* (prepared by pickling firm cubes of tofu for several days in either Chinese-style miso {*chiang*} or soy sauce).

Soymilk (*doufu chiang*, *dou-chiang*, *dou-nai*, *dou-ru*): Widely enjoyed as a spicy hot breakfast soup (p. 204) or a warm, sweetened beverage (p. 207). Sometimes sold bottled by street vendors.

Yuba: Yuba is much more popular and much less expensive in China and Taiwan than it is in Japan. There are hundreds of yuba shops throughout Taiwan and probably thousands in China, and yuba plays an important role in the nutritional life of the people in home and restaurant cookery. Called bean curd “skin” or “sheets” in most Chinese cookbooks, yuba is known in Mandarin as *doufu-p'i* (“tofu skin”) or *doufu-i* (“tofu robes”). “One of the obvious differences between the uses to which yuba is put in China as compared to Japan is the remarkable ingenuity and inventiveness employed by the Chinese in giving yuba the semblance of meat. Imagine walking by the display case of attractive restaurants or marketplace yuba shops and seeing perfect replicas of plucked hens, roosters, and ducks, light-brown fish (complete with fins, gills, eyes, and mouth), juicy hams, tripe, liver and rolled meats—all made from yuba (fig. 111). Rich red sausage links hang in rows and deep-fried drumsticks are handsomely arranged on a large platter—together with a life-sized pig’s head. Most of these imitation meat dishes are prepared by pressing fresh yuba into a hinged (wooden or aluminum) mold,” clamping the mold closed, then steaming it until the yuba’s shape is fixed. Served at *su-tsai* restaurants which specialize in Buddhist vegetarian cookery, each has its own well-known name: Buddha’s Chicken (*suchi*), Buddha’s Fish (*suyu*, *sushi*), Buddha’s Duck (*suya*), Vegetarian Tripe (*taoto*) or Liver (*sukan*); Molded Pig’s Head (*tutao*), Molded Ham (*suhuo*), Sausage Links (*enchan*), Buddha’s Drumsticks (*sutsai tsui*), Deep-fried Duck (*suya*). A full-page illustration

(p. 258) shows these products. Fresh yuba. Dried yuba (*kan doufu-p'i*, incl. sweet yuba and Bamboo yuba {*fuchu* [dried yuba sticks]}). Tofu and yuba in Chinese cookery: Mandarin cookery, congee (rice porridge), “red broiled” sauces (*hong-sao*), meatless days, vegetarian restaurants.

810. Shurtleff, William; Aoyagi, Akiko. 1975. Sukiyaki (Document part). In: W. Shurtleff and A. Aoyagi. 1975. *The Book of Tofu*. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 224-25.

• **Summary:** “A Japanese cookbook written over 350 years ago contains the following recipe for Sukiyaki: ‘Obtain either wild goose, wild duck, or antelope, and soak the meat in *tamari* shoyu. Heat a well-used Chinese plow (*kara-suki*) over an open fire. Place the meat on the plow, garnish with thin rounds of *yuzu*, and broil on both sides until the color changes. Serve and be happy.’

“The word *sukiyaki*—pronounced *skee-ya-kee*—means ‘broiled on the blade of a plow.’ Although the modern preparation generally features beef as the basic ingredient, *sukiyaki* was traditionally prepared with wild game, fowl, fish, or shellfish. Wild boar was also a favored ingredient, and seafoods such as tuna, yellowtail, whale, wreath shells,

and scallops were and, in areas such as Kyoto, still are widely used in the dish.

“Before reaching its present form, *sukiyaki* passed through a number of unusual historical transformations. The earliest preparation was undoubtedly developed by farmers, hunters, and fishermen who broiled their catch over an open fire using a plow or whatever other utensil was available. Since the earliest plow, the predecessor of the present *nabe*, was nothing but a flat iron plate, it was unable to hold cooking liquids. It was probably for this reason that the meat came to be marinated or basted with *tamari* shoyu, a technique that is still practiced in some Japanese restaurants. Gradually, sake or *mirin* came to be used in the marinade, various vegetables and grilled tofu were broiled with the meat, and the traditional flat plow or griddle became inadequate to hold the juices of this cornucopia of new ingredients. A new container was needed, and at this point, the ancient tradition of broiling wild meat on a plow merged with the newly-imported tradition of *shippoku*, a type of beef-*nabe* cookery which originated about 300 years ago, just after the first contact with Western traders and missionaries.

“Developed in the international port town of Nagasaki, *shippoku* was said to have its historical culinary roots in Holland, Portugal, China, and Korea. As a result of the merger, the original *sukiyaki* ingredients eventually came to be cooked in heavy iron or Korean-style stone pots, and the dish was served as a one-pot meal prepared at the table. Consequently ‘*sukiyaki*’ became a misnomer, for the new dish was neither broiled nor prepared on a griddle-like plow. But neither was the new *sukiyaki* a true *nabe* dish, since its ingredients were not simmered in a seasoned broth. Rather, this unique Japanese creation straddled three categories: it was a broiled dish insofar as the meat was first cooked in a sizzling-hot pan; it was a *nabe* dish since it was a one-pot prepared at the dining table; and it was a *nimono*, or simmered dish, insofar as the meat and vegetables were simmered together in a rich mixture of shoyu, sake, and dashi.

“Up until this time, the Japanese had never apparently considered using beef or other livestock in *sukiyaki*. According to a popular legend, *kamado-gami*, the god of the kitchen hearth, is said to have instructed the Japanese people in ancient times to refrain eating the meat of all four-legged animals, especially of livestock. This admonition was reinforced by the nation’s emperors and the vegetarian teachings of Buddhism, so that for about 1200 years—from the 8th century until the 19th century—most Japanese did not eat meat. However with the arrival of Christianity in the 16th century, the eating of beef was also forbidden, and *sukiyaki* was once again prepared exclusively with seafood, wild game, or poultry. Those who developed a longing for broiled meat, but who were not allowed to prepare it in the family’s common pot or in the presence of those who kept the faith,

were compelled as a last resort to prepare their sukiyaki the traditional way, substitution using a plow or mattock for the kettle and enjoying the forbidden delicacy alone and in secret in the barn, field, or forest. This tradition of ‘underground sukiyaki’ is said to have continued until about 1900.

“With the opening of Japan to the West in the mid 19th century and the relaxation of traditional prohibitions, meat eating gradually became fashionable in the cities. Yet most Japanese tasted their first beef with considerable trepidation, having been warned by priests and traditionalists that their action was an affront to their ancestors and that dire consequences would befall them. Little by little, however, beef sukiyaki came to be accepted.

“The first Japanese who worked up the courage to actually eat beef did not prepare it Western-style as steak or roast beef. Rather, they cut the meat into paper-thin slices, employing the same method they had used for centuries to prepare *sashimi*, or raw fish. And they seasoned this meat with shoyu in much the same way they would season simmered vegetable or tofu dishes. Many Japanese probably ate their first beef in the form of sukiyaki, and different parts of the country soon developed unique styles of serving it. To this day in the Kyoto area, restaurants place dispensers of shoyu, *mirin*, and sugar on the table and allow each guest to season his food to taste, whereas restaurants in Tokyo have developed their own unique mixtures of these ingredients to form standard cooking liquids.

“Throughout the world people now associate sukiyaki with fine Japanese cookery. In a sense, this is ironic because Japanese cuisine makes relatively little use of meat, and much of sukiyaki’s historical influence came from abroad. The ancient delicacy of Japanese hunters and the imported *nabe* preparation have now been totally transformed to become Japan’s most famous international dish. And although tofu plays a relatively inconspicuous role in creating the flavor of this dish, sukiyaki has nevertheless been the vehicle whereby thousands of Westerners have had their first taste of ‘soybean curd.’

“Although most present-day sukiyaki uses beef as the featured ingredient, our recipe uses ganmodoki—mock goose—in deference to the earliest traditions of using wild fowl. Homemade frozen tofu and frozen thick-agé, the textures of which resemble that of tender beef, make excellent substitutes. Although regular tofu is occasionally used in sukiyaki, grilled tofu is generally preferred for its ability to absorb the flavors in the rich broth; its substantial, almost meaty texture; its ability to keep its form during the frequent stirring; and its barbecue flavor. In Japan, more grilled tofu is used in sukiyaki than in any other type of cuisine.” A recipe follows. Address: Lafayette, California.

812. Shurtleff, William; Aoyagi, Akiko. 1975. Okara or unohana (Document part). In: W. Shurtleff and A. Aoyagi. 1975. *The Book of Tofu*. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. See p. 77-85.

• **Summary:** This chapter begins: Unohana (*Deutzia scabra*) is a tiny white flower that grows in thick clusters on briar bushes and blossoms in the spring (Fig. 20). In 1869, the haiku poet Basho, on his last long trek to the back country of northern Japan, wrote of unohana in his journal:

Mounting towards the Shirakawa barrier  
 “Autumnal winds” hummed in my ears,  
 “The maple” stood imagined,  
 But leafgreen branches haunting too,  
 Against unohana white white briars,  
 As if pushing through snow. (Cid Corman translation)

The word “unohana” is also used in connection with tofu. After gô is ladled into a cauldron of boiling water and simmered, it is transferred to a heavy cloth sack set on a rack on top of a wooden curding barrel. The sack’s mouth is twisted closed and the sack is pressed. In farmhouses a grinding stone is set atop the sack; in tofu shops the sack is pressed either with a traditional lever (fig. 21) or with more modern equipment. In each case liquid soymilk filters through the sack into the curding barrel. The soybean pulp—called okara or unohana—remains in the sack. The soymilk is eventually made into tofu; the okara has its own special uses.

Okara is beige in color and has a crumbly, fine-grained texture. Some Westerners have remarked—only half in jest—that its appearance reminds them of moist sawdust. But the Japanese, in line with their ancient tradition of honoring even the simplest and most humble of foods, place the honorific prefix *o* before the word *kara*, which means “shell, hull, or husk.” Thus *o-kara* means “honorable shell.” In Chinese it is called “child of tofu lees” (*doufu chatsu* [*dou zha*, *douzha*, *doufu-zha*]), “soy lees” (*docha*), or “tofu’s head” (*douto*) in contrast with the soft curds which are called the “tofu’s brain.” Trying to translate any of these words into descriptive English is almost impossible; terms such as “soybean lees, grounds, mash, pulp, fines, residue, dregs,” or the like hardly do justice to this fine food.

Note: This is the earliest English-language document

seen (June 2013) that uses the word “lees” or the terms “tofu lees” or honorable shell, or soybean lees, to refer to okara (see p. 22, 77).

When Japanese refer to okara as an ingredient in cooking, they call it unohana, in honor of Basho’s tiny white blossoms. And, indeed, it deserves this high evaluation for, when properly prepared, it is a tasty and nutritious food which serves as an important ingredient in traditional Japanese cuisine. Okara dishes are available in most delicatessens and at many fine restaurants. Light and almost fluffy, okara absorbs flavors well and gives body to sautéed vegetable dishes, soups, casseroles, breads, and salads.

The most important constituent of okara is what nutritionists and doctors call “dietary plant fiber” and now consider to be an essential part of every well-balanced diet. Fiber, by definition, is indigestible. Composed of carbohydrates found in the outer bran layers of whole grains and the cell walls of natural vegetables and pulses, it passes unchanged through the human digestive tract performing two key functions: it provides the “bulk” or “roughage” necessary for regular bowel movements and the prevention of constipation; and it absorbs toxins (including environmental pollutants) and speeds their passage out of the body.

The recent re-evaluation of the importance of fiber-rich foods such as okara has resulted from the recognition of three dangerous trends in the dietary patterns of most industrialized nations: (1) our intake of dietary fiber is now only 20 percent of what it was one hundred years ago due both to the rapid rise in the consumption of sugar, meat, fats, and dairy products (all of which contain no fiber) and the decrease in the use of grains and vegetables; (2) a large proportion of the grains we do consume are in their refined, processed forms (such as white bread, rice, or pasta) which have been stripped of their fiber-rich (and nutritious) outer layers; (3) the average person has a steadily increasing intake of toxic substances from both food additives and the environment. Serving okara, therefore, allows us to make use of natural soybeans in the most holistic and health-giving way.

Containing about 17 percent of the protein in the original soybeans, okara itself consists of 3.5 percent protein by weight, or about the same proportion found in whole milk or cooked brown rice. While it is perhaps unfortunate that all of this protein is not transferred to tofu, its presence in okara is just that much more reason for utilizing this byproduct of the tofu-making process.

The tastiest and most nutritious okara is that removed in the process of making kinugoshi tofu, a variety made from very thick soymilk. Since this okara is pressed only once, it retains a great deal of the soymilk’s flavor and nutrients, and has an obviously moist, cohesive texture. In the process of making regular tofu in tofu shops, soymilk is filtered through first a coarsely woven and then a finely woven sack. The

small quantity of very fine-grained okara that collects in the second sack is usually pressed by hand (rather than with a press) so that it, too, retains a large portion of the soymilk taste and food value. During the winter months when the cold air ensures their freshness, both varieties are shaped into 4½-inch-diameter balls or sealed in small plastic bags to be sold for a few pennies per pound. Some tofu makers present okara to their customers free of charge as a token of appreciation for their patronage.

Before World War II, most tofu-shop okara was sold for use in cooking. Young apprentices at the shop were often allowed to cook the day’s okara any way they wished and then sell their creations from door to door. At New Year’s, okara croquettes and other tasty dishes, made and sold in this way, earned an impoverished apprentice a little pocket money.

In some parts of China, okara is pressed into cakes about 6 inches in diameter and 1 inch thick, and allowed to ferment for 10 to 15 days until each is covered with a mycelium of white mold. The cakes are dried for a few hours in the sun, then deep-fried or cooked with vegetables and sold as a nutritious flavoring agent called meitauza [okara tempeh]. In Indonesia, a similar product called ontjom is said to be well liked for its tasty almond-like flavor.

In Japan, a typical tofu shop produces about 15 gallons of okara daily, or roughly 1 gallon for each gallon of dry soybeans used. But at most, only one gallon or so of this is retailed. The remainder is picked up daily at the shop by local dairymen who feed it to their cows to stimulate milk production and enrich the milk’s nutrient content. In China, many tofu makers run small hog farms and use okara as their principal source of fodder. Okara also works well as an organic mulch and fertilizer, or as a free, high-protein pet food. (In Japan it is now used commercially in dried dog- and cat foods.)

Nursing mothers have used okara for centuries to enrich their milk and stimulate its flow. It also serves as a traditional cure for diarrhea. Wrapped in a cloth and used to rub down the household woodwork, okara’s natural oils coat and darken the wood, thus serving as a wax and polish.

At present in the United States, okara is available at some Japanese and Chinese groceries and, of course, at all tofu shops. But the easiest way to obtain okara is to prepare Homemade Tofu (p. 99) or Soymilk (p. 204). If you prepare enough tofu for two people, you will have as a byproduct about 1 cup of okara, or enough for two to four servings.

Then come instructions for “Roasting or parching okara” and for “Homemade okara.”

The chapter ends with 7 pages of okara recipes, grouped as follows: Okara in salads. Okara in soups. Okara in sauces. Okara with eggs. Okara baked. Okara stir-fried, sautéed, and deep-fried (incl. Okara burgers and okara tempeh). Okara with grains and sushi. Okara desserts.

Note 1. This book contains the most information about

okara and the most okara recipes of any book published in English to date. Before publication of this book, okara was very difficult to obtain in the West, except directly from Asian tofu shops. Soon, however, people started making their own tofu at home (often using tofu kits) and many new tofu shops sprang up and became sources of fresh okara.

Note 2. This book (and its companion, *Tofu & Soymilk Production*, 1979) were largely responsible for the word “okara” becoming widely used in English.

Note 3. Within 5 years after the book’s publication the importance of fiber in the diet began to be widely publicized.

Note 4. This is the English-language document seen (Nov. 2014) that contains the term “Okara burgers” (or “Okara burger”). Address: Lafayette, California.

813. Chen, Wen-liang; Wang, F.J.; Huang, F.M.; Wang, I.K.; Chu, S.H.; Wang, C.Y. 1975. Po mo chuang tan pai shih p’in, tou fu p’i, chih tsao fang fa chih yen chiu [A study on the process of protein-lipid film food manufacturing]. *Shih P’in Chia Kung (Food Processing)* No. 45. 16 p. [10 ref. Chi; eng]

• **Summary:** “An automatic continuous method for producing soybean protein-lipid film was developed successfully in a pilot plant scale experiment. Sodium alginate at the level of 0.6% by weight was added into soybean milk. After mixing thoroughly and deaeration, the mixture was extruded through a narrow slit into a flow channel of calcium chloride solution (5%), and coagulated to form a thin film immediately. This film was different in physical properties from the traditional product. Using this film some kinds of delicious Chinese foods, such as pan-fried protein-lipid film, egg rolls and vegetarian chicken meat could be prepared.” Address: China.

814. **Product Name:** Soy Burger.

**Manufacturer’s Name:** East West Cookery. Renamed Season’s Harvest in about 1977.

**Manufacturer’s Address:** 23 Wisconsin Ave., Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1975.

**Ingredients:** Incl. cooked whole soybeans, fresh onions, fresh carrots, fresh parsley.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He first introduced this consumer retail product in Los Angeles in late 1973 or early 1974. Then he moved to Boston, re-activated the company in Somerville, and started making the product again in about 1975—with exactly the same ingredients. First he made the product out of his home at 23 Wisconsin Ave. in Somerville, then they moved out of the home to 77 North St. in Somerville, and later to 52 Broadway, where they are now located.

815. **Product Name:** Fearn Sesame Burger Mix.

**Manufacturer’s Name:** Fearn Soya Foods.

**Manufacturer’s Address:** 4520 James Place, Melrose Park,

IL 60160.

**Date of Introduction:** 1975.

**Wt/Vol., Packaging, Price:** 10 oz.

**How Stored:** Shelf stable.

**New Product–Documentation:** Erewhon catalog titled “Erewhon Harvest ‘75.” 1975. p. 35. This product, which contains soy flour, is now sold by Erewhon. Label purchased in 1980. Brown, blue, green and red on orange. “Serves four. All natural. All vegetable.” 4.2 oz. in foil pack.

816. **Product Name:** Betty Crocker Croquettes [An Entree in Ham, Chicken, and Seafood Flavors], and Meat Sticks [In Ham, Chicken, and Barbecue Beef Flavors in a Potato Crust].

**Manufacturer’s Name:** General Mills, Inc.

**Manufacturer’s Address:** Minneapolis, Minnesota. Phone: 612-540-2311.

**Date of Introduction:** 1975.

**How Stored:** Frozen.

**New Product–Documentation:** *Quick Frozen Foods* 1975. Oct. p. 25. “\$100-million market by 1980 is foreseen for frozen soy extenders and analogues. Textured soy protein.” “General Mills is producing retail frozen soy products under the ‘Betty Crocker’ label in addition to ‘Bontrae’... Two new Betty Crocker products, in three varieties each, are currently undergoing testing in the Fort Wayne and Tucson marketing areas—a croquette entree in ham, chicken and seafood flavors (with the seafood variety containing some real cod) and ham, chicken and barbecue beef meat sticks that blend real animal protein with vegetable protein in a potato crust. Each 1½-ounce box of Meat Sticks contains 12 sticks.”

817. **Product Name:** Loma Linda Turkey Deli Slices (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1975.

**Ingredients:** Water, corn oil, soy protein concentrate, soy protein isolate, wheat gluten, egg whites, potato flakes, salt, artificial and natural (vegetable) flavors, whole wheat flour, brown sugar, dried yeast, onion powder, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** Paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 2 slices (2.0 oz–57 gm): Calories 160, protein 10 gm, carbohydrate 3 gm, fat 12 gm, cholesterol 0 mg, sodium 1350 mg, potassium 110 mg.

**New Product–Documentation:** Recipe booklet. 1979, dated.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1975, but this label is copyrighted 1985.

**818. Product Name:** Loma Linda Bologna (Meatless).  
**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1975.

**Ingredients:** Wheat gluten, water, vegetable shortening, corn oil, soy protein concentrate, dried yeast, soy protein isolate, natural (vegetable) flavors, salt, egg whites, dextrose, corn starch, onion powder, garlic powder, vegetable mono- and diglycerides, soy lecithin, artificial flavors, whole wheat flour, caramel color, spices, artificial colors, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**How Stored:** Frozen.

**New Product–Documentation:** Recipe booklet. 1979, dated. Loma Linda probably purchased the spun soy protein fibers from General Mills. Sold frozen. See also *Vegetlona*.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

**819. Product Name:** Loma Linda Salami Deli Slices (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1975.

**Ingredients:** Wheat gluten, soy protein isolate, water, corn oil, egg whites, salt, dried yeast, natural (vegetable) flavors, corn starch, soy protein concentrate, dextrose, onion powder, artificial flavor, guar gum, caramel color, garlic powder, soy lecithin, spices, artificial colors, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 8 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 2 slices (2.0 oz–57 gm): Calories 130, protein 13 gm, carbohydrate 2 gm, fat 7 gm, cholesterol 0 mg, sodium 640 mg, potassium 70 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1975, but this label is copyrighted 1985.

**820. Product Name:** Loma Linda Savory Meatballs (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1975.

**Ingredients:** Wheat gluten, soy protein isolate, water, corn oil, wheat flour, egg whites, soy protein concentrate, corn starch, soy flour, dried yeast, artificial flavors, dextrose, onion, oat flour, natural (vegetable) flavor, onion powder,

salt, garlic powder, caramel color, guar gum, artificial colors, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 7 meatballs (2.5 oz–70 gm): Calories 190, protein 22 gm, carbohydrate 7 gm, fat 8 gm, cholesterol 0 mg, sodium 420 mg, potassium 170 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1975.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

**821. Product Name:** Fritini: Vegetable Pattie Mix, and Packaged Meals [Regular, with Herbs, with Curry, or with Paprika].

**Foreign Name:** Fritini: Préparation pour Galettes végétales.

**Manufacturer's Name:** Somalon AG.

**Manufacturer's Address:** Switzerland.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Shredded whole wheat and rye, dehydrated potatoes, soybean protein, bread crumbs, oat flakes, millet flakes, dehydrated carrots, peas, onion, and parsley, salt, spices.

**Wt/Vol., Packaging, Price:** 7 oz (200 gm) box.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan*. 4th ed. p. 175. The ingredients in “Fritini (Somalon AG)” are given.

Eden Foods Spring Catalog. 1976. March. Under packaged meals is Fritini (regular, with herbs, with curry, or with paprika; 8 oz).

Thérèse Caty. 1984. France Dietetique. Feb/March. p. 24-31. “Dossier: Le soja.” Lists “Fritini (Aux herbes).”

Color photo of Fritini package in *Linda McCartney's Home Cooking*. 1990. p. 18. Package is red, brown, and white. A color photo shows two patties on a plate with garnishes.

Label (aux herbes) sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3. The manufacturer is now given as “bio-familia AG, CH-6072 Sachseln, Switzerland.”

**822. Product Name:** Non-Meat Balls (Or: Non-Meatballs).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Soy protein concentrate, hydrogenated vegetable oils, modified tapioca starch, non-fat dry milk, isolated soy protein, dehydrated potato, dehydrated onions, artificial flavors, egg white solids, wheat flour, fats,

sucrose, salt, HVP, garlic powder, oregano, caramel color, niacin, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.  
**Wt/Vol., Packaging, Price:** 19 oz can. Retail for \$2.79 (7/90, California).

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The ingredients in “Non-meat Balls (Worthington)” [non-frozen] are given (see above, incl. soy protein concentrate and isolated soy protein).

Shurtleff & Aoyagi. 1983. *History of Worthington Foods.* p. 11.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27. The ingredients are: Broth: Water, modified corn starch, hydrolyzed vegetable protein. Non-meatballs: Textured vegetable protein (wheat gluten, soy protein isolate and concentrate), partially hydrogenated soybean oil, skim milk, soybean and/or corn oil, egg whites, potatoes, flavorings (hydrolyzed vegetable protein, salt, yeast extract, monosodium glutamate, disodium guanylate, disodium inosinate), tapioca starch, onion, onion powder, garlic powder, spice, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

823. **Product Name:** Non-Meat Balls (Frozen; Or: Non-Meatballs).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Soy protein, Fibroprotein [spun soy protein fiber], hydrogenated vegetable oils, nonfat dry milk, corn oil, egg white solids, wheat flour, artificial flavors, onion powder, sucrose, salt, HVP, MSG, garlic powder, oregano, caramel color.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The ingredients in “Non-meat Balls, frozen (Worthington)” are given.

824. **Product Name:** Sandwich Spread.

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Wheat protein [wheat gluten], corn oil, soy flour, dextrose, dehydrated onions, salt, corn syrup solids, soy protein, soy oil, yeast extract, MSG, dehydrated bell peppers, HVP, garlic powder, vegetable gum, celery and sage extracts, niacin, thiamin, iron, vitamin B-6, riboflavin,

vitamin B-12.

**Wt/Vol., Packaging, Price:** Dehydrated in 10 oz Pure Pak paper carton (like milk). Retail for \$2.70 (7/90, California).

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 177. The ingredients in “Sandwich Spread (Worthington)” are given.

825. **Product Name:** Beef Style Soyameat.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Fibroprotein [spun soy protein fiber], corn oil, dried egg white, flour, yeast extract, starch, flavorings, corn syrup solids, salt, caramel color, onion powder, dextrose, nucleotides.

**Wt/Vol., Packaging, Price:** Canned.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 174. Lists the ingredients in “Beef Style soyameat.”

826. **Product Name:** Chicken Style (Meatless; Resembles White Meat).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1975.

**Ingredients:** In 1975: Fibroprotein [spun soy protein fiber], corn oil, egg white solids, soy protein, salt, MSG, natural and artificial flavorings from vegetable sources, carrageenan, niacinamide, soy flour, thiamin mononitrate, iron, vitamin B-6, U.S. certified color, riboflavin, vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 174. The ingredients in “Chicken Style, frozen (Worthington)” are given.

827. **Product Name:** Protose (Meatlike Product Made of Wheat Gluten with Soy Flour).

**Manufacturer’s Name:** Worthington Foods.

**Manufacturer’s Address:** Worthington, Ohio.

**Date of Introduction:** 1975.

**New Product–Documentation:** This product, introduced in 1900 by the Sanitas Nut Food Co. of Battle Creek, Michigan, was originally based on peanuts. Worthington Foods acquired this company, which had been renamed Battle Creek Foods, in 1960. By 1975 (as shown below), wheat gluten was the main ingredient, and soy flour had been added to formulation.

Seventh-day Adventist Dietetic Assoc. 1975. *Diet Manual, Utilizing a Vegetarian Diet Plan. 4th ed.* p. 176. The

ingredients in “Protose (Battle Creek)” are “wheat protein [wheat gluten], peanuts, wheat and soy flour, corn oil, yeast extract, soy sauce, salt, HVP, niacinamide, thiamin, iron, vitamin B-6, riboflavin, vitamin B-12.”

828. Deer. 1975. The cookbook for people really who love animals. God’s Religion, Route 2, Box 98E, Brooksville, FL 33512. 31 p. Illust. No index. 18 x 22 cm.

• **Summary:** This typewritten vegan cookbook with no price on it, copyrighted in 1975 by Burton Waldbaum, expresses the group’s world view. The cover title is hand written below an illustration (line drawing) of a girl kneeling down with a cow, lamb, pig, and chicken. The book contains a good collection of 62 vegan recipes, which are straightforward, appetizing, and nutritious.

Contents: Introduction, by Sun. Thank you page, by Deer. Breakfasts (12 recipes). Main dishes: Sauté (5), Vegetable and grains (10), Potatoes (3), Variety dishes (4). Sauces (6). Soups (6). Salads (4). Dressings (3). Healthful treats (8). Glossary. Abbreviations. Memo section. Essential items for cooking.

This spiritual vegan community, founded by Burton Waldbaum (who is also called “Light”), was later renamed “World of God,” and after that “Gentle World.”

The Introduction begins: “The Human Race (that is, the race to reach human perfection) has evolved to an exciting point; at least this is true of these who are in the lead. There is a world of truly gentle people on this planet, growing stronger, and surer, and healthier, and happier, and higher every day. And it’s time for the rest of the race to have a good look at them, and to see that it’s their gentleness that allows them to run faster and better; so that everyone can eventually reach the goal of evolving; so that everyone can win its rewards.

“In spite of all the pessimism, all the cruelty, all the brain dirtying, all the lies, all the injustice and all the hypocrisy; in spite of all the internal and external pollution that men and women have been heir to, there is a new breed emerging, and it’s rising clear and sweet and free. Never before, in the history of the world, have so many people stood up in front of each other and announced, very bravely, ‘I don’t eat meat anymore.’ And that standing up has been as a seed that has been nourished and spread, and that will bear much fruit in the New World—a world in which all creatures are gentle; all creatures are unafraid.

“... which is leading the world to a new, much higher, loving and understanding of GOD. Gentleness is the necessary beginning for a new world, but it is only the beginning...”

Soy-related recipes include: Granola (with “½ cup soy granules, {optional},” p. 5.). Bran muffins (with “¼ cup soy milk {1 cup water and 4 T [tablespoons] soy flour}, p. 7). Oatmeal chewies (with “2 T soy powder,” p. 7). Banana bread (with “2 T soy powder mixed with 2 T water,” p. 7).

Soy burgers (with soy beans and tamari, p. 10). Chick pea loaf (with soy powder, p. 11). Tahini tamari sauce (p. 19). Tomato soup (with soy powder, p. 21). Carob ice cream (with soy powder, p. 25). Vanilla ice cream (with soy powder, p. 25). Quick buckwheat pancakes (with soy or nut milk, and soy powder, p. 25). Carob cookies (with soy powder, p. 27). Carob cake (with soy or nut milk, and soy powder, p. 27). Frosting for carob cake (with soy powder, p. 28). Soy butter (Mix ¼ cup water, ½ cup soy powder or soy flour, ¼ cup oil, 1 tablespoon of sweetener, 1 tablespoon herba-mare [seasoning salt mixture]. Delicious with muffins, bread, or crackers). The glossary (p. 29) lists two soy products: “Soy powder—made from soy beans. Used instead of milk or eggs. As an egg substitute: 1 egg equals 1 tablespoon soy powder and 1½ tablespoons water. As a milk substitute: 4 tablespoons soy powder to 1 cup water, blend.

“Tamari—made from aged soybeans, A pure soy sauce. A definite must in all vegetarian kitchens. Used in almost everything that you will be cooking.” Indeed, tamari is used to season more than half the recipes in this book; most are not specifically mentioned above. Address: Brooksville, Florida.

829. Goulart, Frances Sheridan. 1975. Bum steers: How and why to make your own delicious high protein mock meats, fake fish & dairyless desserts, and avoid useless calories, cholesterol, sodium nitrate, salmonella, trichinosis & high prices. Old Greenwich, Connecticut: Chatham Press. 205 p. Illust. Recipe index. 21 x 19 cm.

• **Summary:** This vegetarian cookbook, interspersed with many well-selected anti-meat quotations, describes how to make meatless meats and non-dairy products at home. Contents: Introduction. On the block: Major mock-meat-making supplies. Vegebutchering: Master mock-meat recipe file. Bogus beef. Pseudo pork. Unreal veal. Sham lamb. Con game. Phony poultry. Fake fish. Un-innards. The vegedeli. Mocking up: General dishes. The mock crock. On the side. Dairyless desserts. Steerage (sources of unfamiliar ingredients).

Chapter 1 begins with an introduction to and nutritional composition of tofu, followed by the soybeans, gluten flour, other legumes, etc. Under “Flavors enhancers” are listed soy lecithin granules or flakes, miso, yeast extract (marmite), soy sauce and tamari, and Worcestershire sauce. Chapter 2 contains recipes for making gluten, tofu, grainola (with soy grits), a stock with miso for non-meat dishes (p. 32), mock milk I (made with soy flour), mock milk II (made with raw cashews or almonds), mock (soy) butter (made with soy flour), and mock cream (with soy flour and soy cream), and mock yogurt (with cashew nuts and soy yogurt culture).

Note: This is the earliest document seen (Sept. 2012) that mentions a non-soy, non-dairy yogurt—in this case one made with cashew nuts. A sampling of the many other soy-related recipes include: Moo-less ragout (with tofu,

soy sauce, and soy butter, p. 43). Vegetarian rolladen (with cooked ground soybeans, p. 52). Good red meat (with gluten or tofu, p. 53). Greenbutcher's meatballs (with tofu, p. 57). Mock Mac I (burger with soybeans, p. 64-65). Pineapple pig (with tofu, p. 72). Half-calf (with tofu, p. 79). Surrogate salami (with "bean pulp (residue from making Tofu)" [okara], p. 125). Bumsteads: Two burgers for meat-totalers (with tofu, p. 131). Meatless mincemeat (p. 142). Soybean mustard (with soy sprouts, p. 165). Cow tow: Cowless milk candy (with soy milk powder). Jersey bounce: A moo-juice-less junket (with soy milk, p. 184). Bum bombe: Egg-less, cream free (with soy cream, p. 184). Two 100% vegetarian ice creams: Eggless, milkless (with soy powder, p. 186).

Many recipes also contain wheat gluten: Charisma: Char-broiled bum steers (p. 48). Pig-less pork sausage (p. 70-71). Roast loin of veal (p. 80). Fake steaks: Two sham schnitzels (p. 80-81). Vegetarian cutlets (p. 82). Mocking birds I (p. 83). Fruit stew (p. 86). Sham lamb (p. 89). Sham lamb curry (p. 91). Bum bunny (p. 97). Sweet breads (p. 121).

Azuki beans are used in Moo-less rice pudding (p. 183). Sources of ingredients include: Walnut Acres, Penns Creek, Pennsylvania 17862 (herbs, spices, oils, whole grains, flours, seaweeds, etc.). Erewhon Trading Co., 342 Newbury St., Boston, Massachusetts 02115 (seaweeds and general goods, grains, beans, vegetables, seeds, etc.). Shiloh Farms, Route 59, Box 97, Sulphur Springs, Arkansas 72768. Arrowhead Mills, Box 866, Hereford, Texas 79045. Dynamic Nutritional Products, P.O. Box 528, North Hollywood, California 91603 (Milk-free yogurt culture. Trade names: Soyadophilus and Theradophilus).

Sample quotation: "... traditional American reliance on meat, particularly beef, is perhaps the single largest inefficiency in world dietary patterns..."—*New York Times* Oct. 25, 1974. Address: Wilton, Connecticut.

830. Kuramoto, S.; Katz, I. 1975. Flavoring fabricated foods. In: G.E. Inglett, ed. 1975. *Fabricated Foods*. Westport, CT: AVI Publishing Co. vii + 222 p. See p. 159-69. Chap. 12. [49 ref]

• **Summary:** "A bacon-like product called Baco's was offered in the supermarkets with resounding success during the last decade. It was one of the first attempts by a major food corporation to introduce a meat analog into the American diet. In 1971, the U.S. School Lunch Program authorized the use of up to 30% rehydrated textured soy flour in combination with meat, fish, or poultry. The principle use was in hamburger, and some 25 million school children began consuming vegetable protein in patties, chilies, meat loaves, and spaghetti sauce.

"In 1973, when meat prices were beginning to arouse the ire of consumers, the Red Owl Stores in Minneapolis [Minnesota] pioneered the 25% extended raw hamburger, which presented the housewife with the meat-extender

concept. Today beef patty mixes and 'juicy burgers' appear to have become a permanent product in the meat case...

"Markets for meat flavors closely parallel the development of these fabricated meat analogs... With the advent of gas chromatography, flavorists are able to 'sniff' chemicals as they are eluted." Address: 1. Vice President, Director, Technical Support, International Flavors and Fragrances (U.S.), Flavor Div., New York, NY; 2. Director of Flavor Research, International Flavors and Fragrances, Inc., Union Beach, New Jersey.

831. Liener, Irvin E. 1975. Effects of antinutritional and toxic factors on the quality and utilization of legume proteins. In: M. Friedman, ed. 1975. *Protein Nutritional Quality of Foods and Feeds*. Vol. 1, Part 2: Quality Factors—Plant Breeding, Composition, Processing, and Antinutrients. New York, NY: Marcel Dekker. xx + 674 p. See p. 523-50. [81 ref]

• **Summary:** An excellent review by a pioneer in the field. Contents: Introduction (incl. definition of food legumes; "Much of the material contained in this review is taken from a similar review on this subject published elsewhere—Liener, I.E. 1973. "Toxic factors associated with legume proteins." *Indian J. of Nutrition and Dietetics* 10:303"). Protease inhibitors: Historical background, mode of action in the animal organism, factors affecting the trypsin inhibitor content (heat treatment, germination, fermentation, soybean isolates), possible significance in animal and human nutrition. Phytohemagglutinins. Goitrogens. Cyanogens. Anti-vitamin factors. Metal-binding constituents (incl. phytic acid binding soy protein). Lathyrogens. Favism. Conclusions.

Tables show: (1) The trypsin inhibitor activities of soybean flour / soylour (unheated), soybean isolate, soybean fiber, chicken analog, ham analog, beef analog [the last 3 probably containing spun soy protein fiber]. (2) Effect of removing soybean hemagglutinin (SBH) on the growth promoting activity of raw soybean extracts. Lists five protein components of the diet: Original soybean extract (324, 0.91), original soybean extract minus SBH (29, 1.13), original soybean extract heated (6, 2.25), raw soy flour (330, 1.01), heated soy flour (13, 2.30). The two figures in parentheses after each are: Hemagglutinating activity per gm of protein  $\times 10^{-3}$ . And PER = protein efficiency ratio. Address: Dep. of Biochemistry, College of Biological Sciences, Univ. of Minnesota, St. Paul, Minnesota.

832. Moncrieff, R.W. 1975. *Man-made fibres*. 6th ed. New York and Toronto: John Wiley & Sons. A Halsted Press Book. 9 + 1094 p. See p. 289-90. 23 cm.

• **Summary:** Today, the nylons, the polyesters, and the acrylics are the dominant fibers, having replaced large amounts of cotton and wool. In part 2 of this book, titled "Fibres Made from Natural Polymers," chapter 8, "The first rayons" (p. 157-61) notes that the first rayons were

developed, starting in the 1830s, as “artificial silk” from natural sources of cellulose, especially wood-pulp. The first practical process for making artificial silk (later called rayon) was invented by Count Hilaire de Chardonnet and patented in 1885; large amounts of Chardonnet silk were first produced starting in the 1880s. The process for making viscose rayon was discovered in 1891 by C.F. Cross and E.J. Bevan, then patented in 1892. “The greatest single factor in the development of the viscose process has undoubtedly been the support given to it by Courtaulds, Ltd. The pioneer work was undoubtedly carried out by Courtaulds, Ltd., who not only founded and developed an important new industry, but also introduced it to America under the name “The American Viscose Co.” In 1900 world production of viscose rayon was about 1,000 tons. In 1920 it was 15,000 tons and in 1940 it was 1,100,000 tons. Note: Courtaulds, Ltd. was a pioneer in making a spun soy protein fiber named Kesp for food uses in the UK, starting in 1973.

Chapter 17 in Part 2, titled “Casein fibres” (p. 307-09) discusses Lanital, Aralac, Fibrolane, and Merinova. In 1904 Todtenhaupt disclosed a method of making casein filaments, but they were brittle and lacked sufficient resistance to water to withstand wet processing. Early attempts by him and others to make a commercially successful casein fibre were unsuccessful, and it was not until 1935 that the problem was really solved by an Italian named Ferretti, who conducted his research from 1924 to 1935. He succeeded in making pliable fibres with certain wool-like characteristics. The Italian rayon manufacturer Snia Viscosa purchased Ferretti’s patents and began large-scale production of casein fibre, named Lanital (*lana* means “wool” in Latin) from milk. In 1937 they made 1,20 tons Lanital.

Chapter 18 in Part 2 is titled “Ardil, Vicara, Soybean.” It is very similar to the same chapter in the 1963 edition. Ardil fiber is made from peanuts (groundnuts), and Vicara from corn (maize) protein.

Chapter 19 discusses nylon, which was a product of the genius of Wallace H. Carothers. This brilliant organic chemist left his academic life at Harvard University to undertake fundamental research work in 1928 with the huge American chemical combine of E.I. du Pont de Nemours & Co. He was interested in fibers made of polyesters and polyamides. By 1938 the du Pont Co. was making nylon at a small pilot plant in Wilmington, Delaware. In the UK this fiber is spun by I.C.I. Ltd. (the huge chemical combine) at Doncaster, Pontypool, and Gloucester. Address: United Kingdom.

833. Noorbergen, Rene. 1975. Programmed to live: A scientific confirmation of health reform. Mountain View, California: Pacific Press Publishing Assoc. 159 p. No index. 18 cm. [158\* footnotes]

• **Summary:** Contents: 1. Health care–The nation’s vital problem. 2. Meat and fat–are they fit for consumption? 3.

Sugar and alcohol–The fingers of death. 4. Cancer–Curse of the good life. 5. Nicotine and caffeine–The twin dangers. 6. Don’t upset the body clock. 7. Forget the steak! Have an analog. 8. Embrace life–Don’t be a statistic.

Quoting extensively from medical research and the writings of Ellen G. White, this book states the case for the Seventh-day Adventist diet and lifestyle, and against the unhealthy products listed above.

In 1904 only 67.7 deaths per 100,000 U.S. population were caused by cancer; today the figure has grown to 166.6–2.46 times as many. In 1904 heart disease caused 359.5 deaths per 100,000 population, but by 1972 it had jumped to 493.9–up 37%. Each hour in America, 144 heart attacks occur, and each year 600,000 people die of heart attacks. Thus more Americans die of heart attacks each year than died in all of World War II (400,000).

Before the Biblical deluge, God told humans to eat plants. But after the Flood, God granted Noah and his family permission to eat the flesh of the clean animals that had been preserved in the ark (Genesis 9:3) since every green thing had been destroyed by the flood.

On the copyright page appreciation is expressed to Drs. Mervyn G. Hardinge, U.D. Register, and J.A. Scharffenberg.

834. Rombauer, Irma S.; Becker, Marion Rombauer. 1975. Joy of cooking. Indianapolis/New York: Bobbs-Merrill Co. 915 p. Illust. by Ginnie Hofmann and Ikki Matsumoto. Index. 25 cm.

• **Summary:** One of the great American cookbooks. A classic and an all-purpose cookbook, this is the last edition revised by Marion Rombauer Becker. Soy-related recipes and descriptions include: Soy or lima bean casserole (p. 255-56). Soy cakes (“patties” of mashed cooked soybeans, rice, vegetables and eggs, rolled in sesame seeds and sauteed, p. 256). About fresh beans–edible soy beans (p. 284-85, with illustration {line drawing}). Green soybeans (cooked, p. 286; “Use the edible vegetable type, not field varieties of beans”). Low-fat tofu dressing (p. 369). About vegetable and nut milks: These are all nutritionally inferior to animal milks, “as their protein is of lower biologic value and their vitamin content is different.” Almond and walnut milks have long been known in Europe. Native Americans used hickory and pecan milk. These milks, and coconut milk, with their delicate, fragile flavors “are a great delicacy in sauces and puddings.” Gives recipes for almond milk, soybean milk (p. 534-35). Soybean curd or tofu (homemade, p. 535; “For other suggestions, see *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi). Soybean paste or extender (cooked soybeans pressed through a colander, p. 535). Alternate or engineered foods (p. 535-36; textured vegetable proteins, “TVPs,” CSM, WSB). Soy flour (p. 549). Soy meal (p. 549-50; coarser than flour). About seeds, grains, beans and peas–Roasted soybeans (p. 564). About commercial sauces–Soy sauce and shoyu (p. 574). Soy whole wheat bread (with soy

flour, p. 608).

In the long, excellent section titled “Know your ingredients” (p. 519+), under “The capers and caperlike buds and seeds” (p. 580) we read: “Similar in Use are Chinese fermented black beans, or *toushi*, which are available in cans;...”

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “Chinese fermented black beans” or the word “toushi” to refer to fermented black soybeans.

As of April 1996 the book has not been revised since 1975. It is now a Scribner book published by Simon & Schuster. Hardcover price: \$24.00. Address: Jennifer Becker, 38537 S.E. Hudson Rd., Sandy, Oregon 97055.

835. Yuchi Pines Institute. 1975. “Blessed art thou, o land, when... thy princes eat... for strength, and not for drunkenness.” Ecclesiastes 10:17. Seale, Alabama: Yuchi Pines Institute. 222 p. Undated. Illust. Index. 26 cm.

• **Summary:** A natural foods and vegetarian cookbook, with considerable nutritional information. On spine: “Eat for strength.” Chapter III, titled “Dairy product substitutes” (p. 43-59) contains numerous recipes that use soy as an ingredient. Soy-related recipes include: Soy bread (p. 15, with soy flour). Soy-bran crackers (p. 25, with soy flour, lecithin, whole wheat flour, and bran). Soy crackers (p. 27, with whole soaked soybeans and lecithin). Soy noodles (p. 28, with Soy Base—see p. 46). Soy waffles (p. 41, with whole soaked soybeans). Double strength soy milk for cream (p. 45—Save pulp [okara] to use in Soy Crackers. Use rich soy milk as a base for Mayonnaise or Sour Cream, as Soy milk, or as Soy yogurt). Sour cream (p. 45, made with soy milk). Madison milk (p. 46, with whole dry soybeans). Banana soy milk (p. 46). Soy base and milk with various flavors (p. 46). Soy sour cream (p. 47). Vegetarian cream (p. 47, with double strength soy milk). Sesame spread (p. 48, with soy base). Soy cottage cheese (p. 52, with soy grits). Scrambled tofu—Soy cheese (p. 53). Tofu (homemade, 3 methods, from soy flour or whole soybeans). Soy yogurt (p. 54, from soy milk). Simple soy butter (p. 55, with soy flour or dry soybeans). Food yeast butter (p. 55, with Soyonnaise). Soy butter (p. 57, with soy flour, lightly browned). Margarine [non-hydrogenated] (p. 58, with coconut oil, oil, hot water, lecithin, lemon juice, and onion salt). Carrot pie (p. 69, with soy milk and soy flour). Banana cream toast (p. 72, with soy or nut milk). Carob drink (p. 74, with soy or nut milk). Bread pudding (p. 75, with Soy base). Soaked soybeans (p. 85, 210). Soynuts I and II (p. 85-86). Soy patties I and II (p. 86, with mashed soybeans and peanut butter). Soy loaf (p. 87, with soaked soybeans). Soy cheese balls (p. 88, with Soy cottage cheese or chopped Tofu). Soy soufflé (p. 88, with soaked soybeans). “Salmon loaf” (p. 90, with soy flour). Soy corn chowder (p. 105, with Soy milk or Basic Cream Sauce). Cucumber soup (p. 106, with Soy milk or Basic

Cream Sauce). Fresh cream of corn soup (p. 107, with Soy or nut milk). Vichyssoise (p. 109, with Soy or nut milk). Corn chowder (p. 110, with Soy or nut milk). Rice and soybean loaf (p. 119, with cooked soybeans). Basic cream sauce (p. 127, with Soy base). Soyonnaise I-IV (p. 133-34, incl. with Soyagen or canned Soyalac).

Recipes containing peanuts or wheat gluten: Nut cheese (p. 54). Emulsified peanut butter (p. 55). Peanut butter balls (p. 65). Peanut butter loaf (p. 86). Peanut butter Creole (p. 89). Chinese pepper steak (p. 93, with gluten). Nuttose (p. 95, with nut butter). Gluten (p. 96). Peanut butter gravy (p. 126). Grandmother’s gravy (p. 126, with peanut butter).

A table titled “Irritating substances” (p. 123) lists the name of the substance, the chemical, and the effect. The substances are: Black pepper, chili peppers, cayenne, horseradish, cloves, cinnamon, mustard seed, ginger, nutmeg, vinegar, baking soda, baking powder, salt (sodium chloride). On the facing page is a list of 25 “Safe herbs.”

Note: A later edition of the book was copyrighted in 1979, then revised in 1983. The title was changed to “East for Strength” and the author was listed as Dr. Agatha Thrash. Yuchi Pines Institute (renamed Uchee Pines Inst. in the late 1980s or early 1990s) was founded in 1970 by Drs. Agatha and Calvin Thrash, who are both physicians and Seventh-day Adventists. As of April 1992 both are still living at Uchee Pines.

Talk with Dr. Agatha Thrash. 1999. June 4. This book was first published (with the above title) in 1975. They copyrighted it in 1979. Address: Route 1, Box 273, Seale, Alabama.

836. *Grocer (The) (London)*. 1976. S. Daniels—A year on. Record turnover is achieved and they enter the TVP [textured vegetable protein] market. 198(6217):60-61, 64. Jan. 17.

• **Summary:** S. Daniels & Co. is a London importing house widely known for their Danoxa brand. This year the company’s biggest new product launch will be Danoxa Kesp Curry in a joint venture with Courtaulds Protein Foods. A photo shows a can of the product. “It is better than any ready-to-serve meat curry on the market. It is cheaper... We will be backing the launch with the heaviest advertising campaign ever undertaken by the company.”

Note 1. This is the earliest document seen (Oct. 2014) that mentions Courtaulds Protein Foods in connection with Kesp, a meat alternative.

Note 2. This is the earliest document seen (Oct. 2014) that mentions S. Daniels & Co. or their Danoxa brand in connection with Kesp, a meat alternative made by Courtaulds.

837. *Grocer (The) (London)*. 1976. Daniels sell Kesp curry. 198(6217):23. Jan. 17.

• **Summary:** “S. Daniels & Co., the London food importing and distributing house, have entered the textured vegetable

protein consumer market with 15½ oz Danoxa Kesp Curry. Daniels have been talking with Courtaulds for two years and say this will be the forerunner of many more Kesp products under the Danoxa label.”

838. S. Daniels & Co. Ltd. 1976. Danoxa Kesp Curry: A great new curry experience. A great new way to spice up your profits (Ad). *Grocer (The) (London)* 198(6217):46-47. Jan. 17.

• **Summary:** This cartoon shows a housewife serving her husband Danoxa Kesp Curry, tender chunks of spun soy protein fibers in a spicy sauce. He loves it and keeps calling it “Kesp beef.” She replies: “But its not beef. It’s Kesp soya protein.” “It’s NOT beef, cloth ears, it’s Kesp. That’s why it’s tender. No gristle, no fat, no waste... It’s Kesp soya protein.” Kesp is a registered trademark of Courtaulds Ltd. S. Daniels & Co. are the sole distributors. Photos show: (1) The can of Danoxa Kesp Curry, subtitled “Tender chunks of soya protein in a rich curry sauce.” (2) The curry served over a dish of rice. Address: Wilec House, 82-100 City Road, London EC1Y 2BU, England. Phone: 01-253-9013.

839. *Grocer (The) (London)*. 1976. Good start for Kesp. 198(6218):5. Jan. 24.

• **Summary:** “The first retail selling operation for Kesp—the vegetable protein food from Courtaulds—has exceeded expectations. In the first 4½ days of a special promotion at Burton’s of Smithy Row, Nottingham—part of Fine Fare—5,500 Kesp pies were sold. Courtaulds hope to have the product in the retail market proper within 18 months to two years.”

840. S. Daniels & Co. Ltd. 1976. Danoxa Kesp Curry: A great new way to spice up your profits (Ad). *Grocer (The) (London)* 198(6218):78. Jan. 24.

• **Summary:** This cartoon shows how people really go for Danoxa Kesp Curry, tender chunks of spun soy protein fibers in a spicy sauce. Kesp is a registered trademark of Courtaulds Ltd. S. Daniels & Co. are the sole distributors. Address: Wilec House, 82-100 City Road, London EC1Y 2BU, England. Phone: 01-253-9013.

841. **Product Name:** Kesp (Meat Analog Based on Spun Soy Protein Fibers Chunks and Mince in Gravy) [5 Canned Products].

**Manufacturer’s Name:** Kesp Protein Foods, Courtaulds Ltd.  
**Manufacturer’s Address:** P.O. Box 16, Coventry CV6 5AE, England.

**Date of Introduction:** 1976 January.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1977. p. 36. Maureen Byrne. 1988. Oct. p. 53. A spun soy protein brand-named Kesp was originally developed by Courtaulds, which sold the technology to Master Foods

(formerly Dornay Foods) in the early 1980s, but products containing Kesp have now been discontinued.

W. Pringle. 1991. “Soya protein, past experience & future potential.” In: *Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung*. p. 156. Cortaulds Kesp was launched in Sept. 1976. It consisted of spun soya fibre chunks and mince in gravy. There were 5 different products, all canned.

842. **Product Name:** Danoxa Kesp Curry: Tender Chunks of Soya Protein in a Rich Curry Sauce.

**Manufacturer’s Name:** S. Daniels & Co. Ltd. (Distributor).  
**Manufacturer’s Address:** Wilec House, 82-100 City Road, London EC1Y 2BU, England.

**Date of Introduction:** 1976 January.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** *The Grocer (London)*.

1976. Jan. 17. Article on p. 60-61, 64. “S. Daniels—A year on. Record turnover is achieved and they enter the TVP [textured vegetable protein] market.” S. Daniels & Co. is a London importing house widely known for their Danoxa brand.

This year the company’s biggest new product launch will be Danoxa Kesp Curry in a joint venture with Courtaulds Protein Foods. A photo shows a can of the product. “It is better than any ready-to-serve meat curry on the market. It is cheaper... Ad on p. 46-47. “Danoxa Kesp Curry: A great new curry experience. A great new way to spice up your profits.”

843. **Product Name:** [Unico {Soy Protein Concentrate}, and Dubit {Textured Soy Protein Concentrate; Renamed Unibit in Jan. 1976}].

**Foreign Name:** Unico, Dubit, Unibit.

**Manufacturer’s Name:** Unimills B.V. Renamed Loders Croklaan B.V. in 1986. Subsidiary of Unilever.

**Manufacturer’s Address:** Lindtsedijk 8, 3336 LE Zwijndrecht, Netherlands.

**Date of Introduction:** 1976 January.

**Wt/Vol., Packaging, Price:** 25 kg valve bags and in bulk.

**New Product–Documentation:** *Soya Bluebook*. 1980. p. 54 (concentrates), p. 55 (textured soy proteins, extruded—apparently textured concentrates). Note: No brand name is given for this product. This company is owned by Unilever. The address, apparently incorrect, is given as Lindtsedijk 8, Box 18, NL 3330 Zwijndrecht. *Soya Bluebook* 1981, p. 64 (soy protein concentrates; no brand names are given). Address is now Lindtsedijk 8, 3336 LE Zwijndrecht; 1987. p. 72. Unimills B.V., affiliate of Unilever N.V. of Rotterdam, makes Unico and Soycomil Soy Protein Concentrates, at Zwijndrecht. They contain 60.5% protein on a dry basis and come in a variety of particle sizes.

Talk with Torben Svejgard of Aarhus in Denmark. 1990.

July 20.

Letter (fax) from Aat Visser of Loders Croklaan. 1990. Aug. 6 and Aug. 27. "Unico was introduced in Jan. 1976. Unico is also available as a textured soya concentrate, named Unibit, introduced in Jan. 1976 as Dubit." Says the original address was Lindtsedijk 8, 3336 LE Zwijndrecht, Netherlands (which differs from Soya Bluebook listing). The concentrates and flour are available in various particle sizes and degrees of functionality in 25 kg valve bags and in bulk. The current address is: Lindtsedijk 8, 3336 AA Zwijndrecht, Netherlands. Or P.O. Box 18, 3330 AA Zwijndrecht.

Product brochure (undated) for Unibit sent by Aat Visser. 1990. Aug. 6. Unibit is a textured soya protein concentrate, with improved flavor, sold in two types: S102 (natural) and S202 (caramel). Each contains 68% protein and 1% fat. It has 5 advantages over textured soya flour: Higher protein content (70% vs. 52%), a more bland taste with little or no soya off flavors, does not cause the flatulence problems associated with textured soy flour, because of the bland taste and absence of flatulence, it can be applied at high levels in good quality meat products, and though it is more expensive than textured soy flour it offers greater savings in its ability to replace more meat. Uses: Cooked sausages, minced meat products (such as beef burgers), pâté and spreads, sauces (Bolognaise and curry ragout), vegetarian products (mousaka filling, vegetable burger mix). Product brochure (undated, full color, 8 pages) for Unico sent by Aat Visser. 1990. Aug. 6. Unico is a soya protein concentrate. Types include Unico 75, 600, 850, and 850/180.

Note: This is the earliest Dutch-language document seen (Nov. 2014) that mentions a meatless burger–beef burgers.

844. Clayton, Hugh. 1976. Vegetable protein: A new ingredient in the British diet. *Times (London)*. March 19. p. 19, cols. 4-8.

• **Summary:** "Students of propaganda will find an interesting field for study in the debate about the use of textured soya protein where only meat was used before. Farmers and butchers are pursuing a loud campaign against 'moc meat' [mock meat] and appear to be winning the argument."

Representatives of the National Farmers' Union (NFU) have "spoken darkly about the 'disquieting reports' about the long-term effects of using" textured vegetable protein (TVP). "The soya lobby is less vocal but no less influential." Since 30% TVP is now allowed as a meat extender, some of Britain's largest meat processors, such as Unilever and Spillers, now sell catering packs of TVP.

The retail market was harder to crack. Nestlé, the first to jump in, "used the prestigious and long-standing Crosse & Blackwell label as a vehicle for a meat extender." A table shows companies that followed Nestlé's lead with tinned [canned] products: Cadbury Schweppes (Cadbury's Soya Choice, canned chunks in beef gravy, 15 oz for 30p. The product contains 6% by weight of beef fat). S. Daniels,

a distributor of Danoxa hams, sausages, and tinned stew (Danoxa Kesp Curry, 15¼ oz for 30p. Based upon the Cortauld spun protein product Kesp). Spillers (Tyne, large stewed steak, 43½ p.). Unilever (Walls 15 oz stewed steak with gravy, 46 p.). RHM (Chesswood 15 oz curry with beef, 38p.). Allied Breweries (Appleford, 15 oz meatless steak, 36p.)

Two companies sell canned, precooked beans in sauce: Allied Breweries (Delicia 10 oz soya beans in tomato sauce, 24 p.). Heinz (Heinz 20 oz baked beans in tomato sauce, 19½ p.). Miles Laboratories, which markets TVP in Britain, sells an imitation bacon in the USA. Address: Agricultural correspondent.

845. **Product Name:** Cedar Lake Terkettes (Meatless).

**Manufacturer's Name:** Cedar Lake Foods.

**Manufacturer's Address:** Cedar Lake, MI 48812.

**Date of Introduction:** 1976 March.

**Ingredients:** Gluten from unbleached and whole wheat flour, water, salt, hydrolyzed protein, onion salt.

**Wt/Vol., Packaging, Price:** 20 oz (1 lb 4 oz) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label (printed 24 March 1976) sent to Soyfoods Center by Cedar Lake Foods. 4¼ x 11 inches. Dark blue, red, black, and yellow on light yellow. "Cedar Lake Foods are developed to meet the dietary needs of Millions of Americans who recognize the benefits of a meatless diet."

846. Norinsho. 1976. *Nihon shokuhin hyôjun seibunhyô* [Food composition tables for Japan. 2nd ed]. Tokyo: Ishiyaku Shuppan K.K. 180 p. March 25. Index. 15 x 21 cm. [Jap]

• **Summary:** The first edition of this book was published on 15 Jan. 1964. The first revised edition (130th printing) was published on 25 Jan. 1969. This is the second revised edition (265th printing), published on 25 March 1976. Also published by Joshi Eiyo Daigaku Shuppan-bu.

For soybeans and soyfoods, see pages 33-35, 69, and 74 (basic nutritional composition), and 111-12 (amino acid composition).

Page 88, No. 812: Amazake. Per 100 gm. Calories 101, moisture 74.0 gm, protein 2.4 gm, fat 0.1 gm, carbohydrates (sugars 22.7 gm, fiber 0.6 gm), ash 0.2 gm, calcium 74 mg, phosphorus 25 mg, iron 0.4 mg, vitamin A 0 mg, vitamin B-1 0.08 mg, vitamin B-2 0.06 mg, nicotinic acid 0.06 mg, vitamin C 0 mg.

A later edition (after 1976), containing at least 298 pages, gives details on the following soy-related foods (p. 76-80): Japanese-grown whole soybeans (dry, or boiled). Whole dry USA-grown soybeans. Whole dry Chinese-grown soybeans. Green immature soybeans (edamame; raw, or boiled). Soybean sprouts (raw, or boiled). Defatted soybeans (whole, or dehulled). Kinako (soybeans roasted and ground). Budô-mame (soybeans boiled with shoyu). Momen tofu

(regular). Kinugoshi tofu (silken). Soft tofu. Packed tofu. Okinawa tofu. Yaki-tofu (grilled). Nama-age. Abura-age. Ganmodoki. Kôri-dofu. Tofu-chikuwa (steamed type, or roasted type). Natto (fermented soybeans): Itohiki-natto, Goto natto, or tera-natto.

Miso: Rice-koji miso (sweet type, light yellow type, dark yellow type). Barley-koji miso. Soybean-koji miso. Dried miso. Kinzanji miso. Hishio-miso.

Other: Okara. Soymilk (regular, reconstituted, or soft drinks). Yuba (wet, or dried).

Page 254 gives the amino acid composition of soybeans and various soyfoods. Page 298 gives the protein scores, amino acid values, and chemical scores of selected foods. Page 8 gives the energy conversion factor for tofu, agé, and yuba.

847. Puski, Gabor; Konwinski, Arthur H. Assignors to Central Soya Company, Inc. (Fort Wayne, Indiana). 1976. Process of making a soy-based meat substitute. *U.S. Patent* 3,950,564. April 13. 7 p. Application filed 2 Aug. 1974. [1 ref]

• **Summary:** “A process for preparing a soy-based meat substitute characterized by relatively flat, elongated, generally longitudinally aligned fibrous masses having the appearance of stacked platelets which simulate the compactness, chewiness and texture of meat; achieved by extrusion of a soy protein-containing source material at higher moisture content and lower temperature (as contrasted to prior art), minimizing expansion with reduction of pressure in the extruder in a somewhat stepwise fashion by modifying the extruder so as to allow more shearing action and to allow space for alignment of fibrous masses.” Address: 1. Hanover Park, Illinois; 2. Melrose Park, IL.

848. Hartman, Warren E. 1976. Plant protein foods: From whence they came to where they are going? Paper presented at the American Chemical Society Symposium, “One Hundred Years of Agricultural and Food Chemistry—Challenges of Food Processing and Flavor: Past, Present, and Future.” 20 p. April 7. Unpublished manuscript. [21 ref]

• **Summary:** Contains a detailed discussion of the work of Dr. John Harvey Kellogg, and other Seventh-day Adventist vegetarians, which greatly influenced Worthington. Their pragmatic approach led to the development of various meat analog products called “nutmeats.” “Usually nuts were finely ground into a paste or nut butter and water was then added to produce an emulsion. To this emulsion was added flours, starches, cereals, or other ingredients. This white milk-like oil and water emulsion was then retorted or cooked to set up into a solid mass. This product could be diced or sliced for salads or used as a main entree. The texture of the resulting product depended mainly upon the degree of emulsification and the varying degree of particle sizes incorporated within the product.

Extracted wheat proteins or wheat gluten was also used as one of the basic raw materials for the early vegetarian protein products. The gluten or protein extraction process usually starts with a high protein hard wheat flour which is mixed with water to form a dough in a conventional dough mixer. This dough is repeatedly washed with water to remove the starch. The carbohydrate water is decanted off and the process repeated several times until the gluten reaches the desired protein content, typically around 72% protein on a dry basis. This dough-like elastic mass of gluten is cut into slices or cubes and cooked in boiling water where it expands and the protein simultaneously denatures, giving an expanded cellular chewy texture to the product. This product may be canned in a bouillon-type broth or may be ground through a chopper to simulate minced meat or hamburger. The wheat gluten also provided an elastic matrix for incorporation of nuts, grains, flours, legumes, and other vegetable material into a mass, when mixed vigorously at high speed with considerable shear for an extended length of time would yield a thin, string-like fibrous textured dough mass in which other materials could be incorporated. This product was also canned and cooked to produce a solid textured loaf-type product which served as a vegetarian entree, or was diced or ground for use in home recipes.

“Similar products are being manufactured today and wheat protein or wheat gluten is still an important basic raw material for its contribution to texture. The Worthington division of Miles Laboratories presently has a number of products based almost exclusively on wheat gluten which are peculiar, yet significantly textured protein products. Miles Laboratories also is becoming basic in the production of vital wheat gluten for utilization by industries throughout the world.”

“Worthington Soyamel was the first soymilk-type beverage to be based on or formulated primarily from soy protein isolate.” Also discusses spun soy protein fibers. Address: Worthington Foods, Worthington, Ohio.

849. Longacre, Doris Janzen. 1976. More-with-less cookbook. Scottsdale, Pennsylvania: Herald Press. 328 p. April. Illust. Index. 22 cm. Introduction by Mary Emma Showalter Eby. Spiral bound. [30\* footnotes]

• **Summary:** Commissioned by the Mennonite Central Committee. On the cover: “Suggestions by Mennonites on how to eat better and consume less of the world’s limited resources.” However, this is not a vegetarian cookbook. Contents: Introduction. Part I: More with less. 1. Less with more: World shortages, North America: Five times as much, overspending money, overeating calories, overeating protein, overeating sugar, overcomplicating our lives. 2. Change—An act of faith: Does it really help anyone if I cut back?, it seemed inadequate, we liked it better the second time. 3. Building a simpler diet: The protein question, what is complete protein?, amino acid teamwork, no-meat, low-

meat, and which meat, increasing protein content in foods.

II. Sharing the recipes. Soy-related recipes (all use whole soybeans unless otherwise stated): Nameless soybeans (p. 47). Soybean granola (with roasted soybeans, p. 91). Section of soybean recipes (p. 96-98, 109-15): Savory baked soybeans. Soybean loaf. Soybean hamburger casserole (with ground beef). Soybean casserole. Fresh soybean-cheese casserole (with “fresh green soybeans”). Soybean pie. Refried soybeans. Soybean soufflé. Sweet and sour soybeans. Marinated soybeans. Soybean sandwich spread. Basic soybean spread or dip. Soybean curd sauté (with bean curd [tofu]). Gather up the fragments. Soy, cheese and meat loaf (with “vegetable-protein meat extender, p. 166). Basic burger mix (p. 166). Quick soybean soup (p. 211). Soybean salad (p. 259). Roasted soybeans (3 recipes, p. 305).

Soy is also mentioned elsewhere: Soybeans contain complete protein (p. 28). Protein complementarity: In Indonesia fermented soybean cakes go with a rice meal. Chinese and Japanese use bean curd [tofu] and bean sprouts with rice (p. 29) Use soybeans or soy flour to increase protein content of foods (p. 31). Table showing protein and calorie content of some common foods (low fat soy flour, dry soybeans, immature cooked soybeans, mature cooked soybeans, p. 34). Table showing comparative costs of protein sources (dry soybeans {the least expensive of all!}, textured vegetable protein meat extender, soybean breakfast sausage, soy flour, p. 37). Soybeans and soy flour (p. 45). Cook large amounts of soybeans and freeze them to save time (p. 48). Soybeans contain fewer calories per gram of protein than common white beans (p. 49). When making granola, add soy flour, soy grits, roasted soybeans, or soaked soybeans (p. 88). Address: Akron, Pennsylvania.

850. Frouin, A. 1976. Usage des protéines végétales en charcuterie en France [Use of vegetable proteins in pork-butcher's shops in France]. *Revue Francaise des Corps Gras* 23(5):271-74, 285-86. May. [2 ref. Fre; eng; ger]

• **Summary:** Proceedings of a conference during the Days of Information I.T.E.R.G., Paris, held in May 1975, on the flours and proteins of oilseeds and legumes in human nutrition. There are many promising applications for soy proteins with meats and dairy products. Address: Societe Olida et Caby associes, Service des Recherches appliquees, 92300 Levallois-Perret.

851. Huang, Su-hei (Miss). ed. 1976. Chinese cuisine: Wei-Chuan cooking book. Taipei, Taiwan: Wei-Chuan Publishing Co. 221 p. May. Illust. Index (at front). 27 cm. [Chi; Eng]

• **Summary:** This attractive book of Chinese cooking from the Wei-Chuan Cooking School is a bilingual Chinese / English edition. On each page is one recipe and a 1/3-page color photo of the prepared dish. The title of the recipe is written in Chinese in large bold characters and is also given (to the right) in smaller bold letters in English. Above the

number of servings is the province or region of China from which the recipe comes (e.g., Szechuan, Cantonese, Peking, Hunan, etc.) Most of the recipes call for ¼ to ½ teaspoon of MSG; many call for soy sauce.

The introduction (p. 2-17) contains: (1) Seasonings for Chinese cooking, incl. soy sauce. (2) Instruments [utensils] for Chinese cooking. (3) Culinary idioms (basic techniques, such as cleaning, cutting, heating the pan, stir frying, etc.). (4) Arrangement of seating order at feast. (5) Arrangement of the dinner sets at a feast. (6) Arrangement of food and menu. (7) Basic principles of arranging the menu. (8) Sample menus for banquets or ordinary meals. (9) Commonly used vegetables (2-page color photo, incl. “9. yellow soybean sprouts”).

(10) Commonly used dry materials and canned foods (2-page color photo, incl. “6. fried gluten balls { ‘mien jin pau’ }.” 13. pickled plums (‘umeboshi’). 18. agar-agar. 33. nori (purple laver sheet). 35. bean curd skin [yuba, tofu p’i]. 36. bean curd roll. 37. Pressed bean curd cake [doughgan]. 39. kau fu. 40. bean curd wrapper (bai yeh; pressed tofu sheets). 41. vegetarian gluten roll (mien jin). 42. dried bean curd noodles [kan-ssu]. 43. Fermented black beans [fermented black soybeans]. 44. bean curd stick [dried yuba stick] (‘fu dzu’). 47. Soy sauce. These two pages also show Wei-Chuan Foods Corp. is a manufacturer of many Chinese-style foods.

(11) Description of some other special ingredients. “1. Hot bean paste (pronounced ‘la jiao jiang’). A thick spicy paste made from ground hot red peppers and soy beans.” “2. Sweet bean paste (‘t’ien mien jiang’). Made ‘from ground, fermented steamed bread and spices’ [soy is not mentioned]. “3. Soy bean paste (‘do ban jiang’). A thick black paste similar in taste to sweet bean paste, but made from fermented soybeans.” “8. Fermented black beans: Small black [soy] beans which have been marinated in soy sauce and salt and are used to flavor steamed fish and meat or in stir-fried dishes.” “10. Pickled bean curd or Chinese cheese [fermented tofu] (‘do fu ru’). Bean curd cubes which are first dried and then mixed with wine, spices and salt and allowed to ferment. It is used to season braised pork and duckling.” “21. You tiau. A deep-fried crispy Chinese cruller...” \* “Kau fu: A spongy type of vegetarian ingredient made from wheat gluten” (see p. 151). “Fried gluten ball (‘mien jin pau’): A type of light, round, deep-fried ball made from wheat gluten and water.” “Su tsang: A type of long thin roll made of wheat gluten and water.”

Interesting soy related recipes: Bean curd noodle and celery salad (with “4 oz. bean curd noodles,” Szechuan, p. 23). Steamed spareribs with fermented black beans (with “3 T. [tablespoons] fermented black beans,” garlic, ginger root, rice wine, and soy sauce, Cantonese, p. 60). Steamed pork in preserved bean sauce (with “2 squares fermented bean curd” (‘do fu ru’), Cantonese, p. 74). Steamed carp with fermented black beans, Hunan, p. 88. Braised carp with hot bean paste

(with “1½ T. [tablespoons] hot bean paste” (‘la do ban jiang’), Szechuan, p. 100). Stir-fried oysters with fermented black beans (Taiwanese, p. 132).

One section of the book titled “Bean curd & eggs” (p. 140-49) contains various tofu and yuba recipes, including: Ma-Po’s bean curd (Szechuan, p. 140). Vegetarian chicken loaves (with “16 sheets bean curd skin” [yuba], Shanghai, p. 147). Eggplant rolls with chopped pork (with “1 sheet bean curd skin, Taiwanese, p. 148). Stuffed bean curd rolls (with “8 bean curd sheets (*bai ye*), Shanghai, p. 149). Bean curd is counted in squares. Address: Taiwan.

852. Rodale, Robert. 1976. Looking for Chinese health secrets. *Prevention (Emmaus, Pennsylvania)*. May. p. 23-30. • **Summary:** Three years ago Mr. Rodale had the good fortune to be able to travel throughout China for 27 days, “As I sat on the Northwest Orient plane, eating an airline meal of chicken, potatoes, bread and a salad, I thought how I would rather be eating some rice, bean sprouts and perhaps some tofu, or bean curd... Recently we learned the Chinese lesson that sprouted seeds are much more nutritious than dry, dormant seeds. Protein and vitamin values are improved dramatically by sprouting, and minerals in the seeds are absorbed much more easily. I think there is tremendous potential in the U.S. for wide use of sprouts as food...”

“Bean curd is another great Oriental food that is making friends here rapidly. It is a creamy, mild-tasting kind of ‘cheese’ made from soybeans—inexpensive and rich in protein. Most people here call it tofu, which is the Japanese name for bean curd. The Chinese call it dofu. No matter what you call it, bean curd is a much better soybean food than the fake meats and meat fillers made from spun soybean fibers that are being sold to American consumers now. They are hoked up with additives to give the resulting food color and flavor, and are far more expensive per ounce of protein than bean curd. The white color and mild flavor of tofu are part of its appeal, so why load yourself up with harmful additives just to make believe that soybeans are really bacon?”

A photo (p. 29) shows six large, square flats of pressed tofu stacked atop one another, separated by boards. The caption reads: “Bean curd, Taiwan style, is not sold in fancy packages. But it’s clean, fresh, low in cost, and full of excellent protein.”

In Taiwan, Dr. Doris C.N. Chang (photo, p. 27) is an American-trained scientist looking for better ways to sprout soybeans and mung beans. Ton Yen Street in Taipei, known as “the street of sprouts,” is where soybeans and mung beans are grown in large crockery sprouting urns and watered every 5 hours. A secret “hormone accelerator” may be added to the water bath to make the sprouts grow faster, and have them end up fatter with shorter roots. Doris Chang thinks it’s an auxin-like material, probably a common weed killer like 2,4-D or 2,4,5-T; those herbicides kill plants by making them grow too fast in a short time. In Taiwan Mr. Rodale also

visited AVRDC in Tainan; they were growing amaranth and sweet potatoes.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “fake meats” (or “fake meat”). Address: Emmaus, Pennsylvania.

853. **Product Name:** The “Billy Biggins,” and the “Weymouth Whitney” (Wheatmeat Sandwiches).

**Manufacturer’s Name:** Wheatmeat Co. Renamed Vegetable Protein Co. later in 1976.

**Manufacturer’s Address:** Waltham, Massachusetts.

**Date of Introduction:** 1976 May.

**Ingredients:** Incl. pita bread, seitan, vegetables.

**Wt/Vol., Packaging, Price:** Saran-wrapped.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Johnny Weissman. 1992. March 31. After introducing larger Wheatmeat sandwiches, John introduced a new line of smaller seitan sandwiches, in hamburger-sized pita pockets. They were named after people he knew.

Letter from John Weissman. 1992. June 25. In the spring of 1976 John moved the kitchen to a location behind a bar in Waltham, Massachusetts. With friend Robert Allen, they introduced a new line of smaller seitan sandwiches, in hamburger-sized pita pockets. They were named after people he knew, like the “Billy Biggins,” a Wheatmeat sandwich with grated carrots and tahini sauce, etc. Billy Biggins owned the bar. Then they rented space in a basement “mall” in Central Square, Cambridge, to begin a restaurant featuring Wheatmeat, Tan Pops and waffles. The developers ran away after somehow failing. John named another pee-wee sandwich the “Weymouth Whitney,” after the construction manager. It contained Wheatmeat, sauerkraut, caraway seeds, and Russian dressing made with Hain eggless mayo. These little sandwiches didn’t sell very well.

854. Clayton, Hugh. 1976. Acquiring a taste for meals without meat. *Times (London)*. June 11. p. 8, cols. 4-5.

• **Summary:** The article, written in a negative tone throughout, begins: “If some farmers and butchers had their way, meat-like groceries made from soya beans would be banned from shops and the catering market. They condemn such products as undesirable and possibly unsafe substitutes foisted upon the public by unscrupulous food companies that make them masquerade as meat.”

“Soya flour and other derivatives” have long been used in meat products, “but products based on soya and containing little or no meat are new to shops in this country. Here is a guide to some of them:

Name, description, use, price and packaging is given for each. Crosse & Blackwell Mince Savour. Appleford’s Meatless Stew, Goulash and Curry. Cadbury’s Soya Choice. Danoxa Kesp Curry. Delicia Soya Beans in Tomato Sauce. Meat Extenders Coloured Mince and Coloured Flakes, from

A.E. Staley (Decatur, Illinois). Unflavored soya protein supplied by The British Arkady Co. of Old Trafford.

The article concludes: “The great obstacle is flavouring. A mouthful of soya protein flakes tastes very much as this page probably would.” So highly-flavoured sauces must be used. “The great advantage” is “that soya beans do not have to be slaughtered before we eat them.”

855. Becker, Kenneth W.; Tiernan, Eugene A. 1976. New technology in oilseed proteins. *J. of the American Oil Chemists' Society* 53(6):327-31. June. [46 ref]

• **Summary:** Contents: Abstract. Introduction. Single cell protein—an alternative. Leaf protein concentrate—second alternative. Algae (incl. *Chlorella*)—third alternative. Improvements in known technology. Emerging oilseed technologies. Development of alcohol and solvent wash processes (NRRL, including an excellent chronology). Oilseeds cleaning and dehulling. Texturized vegetable proteins (Wenger UniTex, British patent specification 1,325,110). Steam texturization (General Mills' process). New rapeseed technology. Small portrait photos show K.W. Becker and E.A. Tiernan.

Tables show: (1) Alfalfa LPC advantages. (2) A chronology of the development of alcohol and solvent extraction and wash of soy proteins in the U.S. (1940s to 1975; each entry has the source cited). (3) Hydrated extrudates -characteristics, British Patent No. 1,325,110. (4) Products characteristics of steam texturization. (5) Typical analysis of rapeseed protein concentrate (from *Brassica napus*, winter type).

Figures show: (1-2) Flowcharts of two processes for making alfalfa LPC. (3) Flow diagram of steam texturization process (General Mills). Address: Arthur G. McKee & Co., 10 South Riverside Plaza, Chicago, Illinois 60606.

856. *Vegetarian World* (Los Angeles). 1976. Tofu: Prime hope for a starving world. No. 6. p. 7. June.

• **Summary:** Discusses the work of Bill Shurtleff and Akiko Aoyagi with tofu. Photos show: (1) The two holding a block of homemade tofu on a plate. (2) A hungry child. Gives four “quick and easy recipes for delicious tofu dishes:” Crumbly scrambled tofu, Tofu mayonnaise dressing, Grilled tofu steak, and Tofu ice cream. “In *The Book of Tofu* by Bill Shurtleff and Akiko Aoyagi, the authors assert that the exotic cakes of soybean curd, found primarily in health food stores in the U.S., are about to revolutionize world-wide eating habits.” Address: Lafayette, California.

857. *New York Times*. 1976. From column A to column Z (Advertorial). July 4. p. ADS12.

• **Summary:** This is a full page advertorial describing and promoting China's different regional cuisines, including Taiwanese cuisine. We are not told which organization is paying for the ad. Could it be the government of Taiwan?

“For Chinese cuisine—which is unmatched by any other—is a brilliant blend of contrasting tastes and textures. But then, it's the product of several thousand years of genius.” “As all aficionados of Chinese food know, Taipei [capital of Taiwan] is a gourmet's paradise.” The island republic of Taiwan is a “vital center of vegetarian cuisine.” Most customers at these meatless restaurants are Buddhists, who are vegetarians for religious reasons. Over the past 2,000 years, Buddhists have developed a host of totally vegetarian [vegan] dishes that simulate their Chinese counterparts based on meat, fowl, or fish. For example, monks long ago developed a snack that “tastes surprisingly like ham by blending dry-roasted peanuts with tofu, or bean curds, that had been sauteed in soy sauce.”

“In vegetarian restaurants, the menu features such dishes as ‘roast duck’ or ‘pork balls’ or ‘fried fish.’ But in fact the ingredients are such non-meat products as soy bean curds, mushrooms, seaweed, water chestnuts, and wheat gluten. Yet so artfully are they prepared and sauced that most non-vegetarians, unless they are forewarned, believe they are savoring meat dishes.” Address: Food editor.

858. Bates, Cynthia. 1976. Tempe (Leaflet). Summertown, Tennessee: The Farm. 4 panels each side. Each panel: 22 x 14 cm. Undated.

• **Summary:** Printed with blue ink on white paper. Describes how to make 5 pounds of tempe. Describes the differences between good and bad tempe. Gives four recipes: Indonesian fried tempe. Tempe burger. German tempe sandwich. Albert's tempe topping.

Photos show (1) Close-up of tempe cake. (2) Cross section of tempe cake. Two parts of this cross-section are circled and described: “Not done yet. Mold around beans too sparse.” “Well done. Heavy mold around each bean.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Tempe burger” or “Tempeh burger” or a tempeh burger recipe. This leaflet was distributed with tempeh starter and “Fermentation Funnies” (cartoons designed to help introduce tempeh). The leaflet was revised as “Tempeh” in 1977, for distribution with Farm Foods' commercial tempeh. Address: Summertown, Tennessee.

859. Litman, Ira; Pava, Barry. 1976. Problems related to flavoring vegetable protein analogs. *Cereal Foods World* 21(7):308-10. July. [7 ref]

• **Summary:** In Nov. 1974, at the World Food Conference in Rome, representatives of 130 nations met to analyze and to find solutions to the world's food problems. “The conference closed with a Declaration on the Eradication of Hunger and Malnutrition: ‘Every man, woman and child has an inalienable right to be free from hunger and malnutrition...’” Address: Flavor & Fragrance Dep., Stephan Chemical Co., Northbrook, Illinois.

860. Bates, Cynthia; Lyon, Alexander; Sorenson, S.; Keller, B.; Jenkins, Suzy. 1976. Beatnik tempeh making. Summertown, Tennessee: The Farm. 20 p. Undated. 28 cm. Mimeograph. [8 ref]

• **Summary:** Contents: Abstract. Introduction. Methods of preparing inoculum: Pure culture propagated on rice (in California and Kentucky), dry inoculum (Tennessee), inoculum grown on sweet potatoes (Tennessee), serial transfer (Tennessee).

Methods for making tempeh: Making tempeh at home (5 lb.; soaking the beans, splitting the beans, second boiling, cooling the beans, inoculation, incubation), making tempeh for a large family group (about 4 kg [8.8 lb] per day), community scale production (25 kg [55 lb], Tennessee), commercial production in California (10 kg. [22 lb] per day). soy pulp [okara] tempeh. Quality control. A table compares “good tempeh” with “bad tempeh” in terms of texture, color, odor, uniformity, and taste. Tempeh is a great favorite on the Farm and easily digested.

Recipes for tempeh: Indonesian fried tempeh. Tempeh burger. German tempeh sandwich. Albert’s tempeh topping. The great potential of tempeh. Expanding our tempeh operation (on the Tennessee Farm). Some facts about tempeh and food. References. Acknowledgement.

“Introduction: The Farm is a non-denominational religious community of 1,100 men, women and children living in southern Tennessee. We also have a dozen smaller communities living in other parts of the U.S., also in Canada, Europe and Guatemala. We are complete vegetarians: we eat no meat, eggs or dairy products because we found out that, on the average in the U.S., it takes eight pounds of feed protein to produce one pound of meat protein. We believe that by being vegetarians we can utilize our planet’s resources more efficiently, and this make more food available for our hungry world.

“Over the last five and one-half years that we’ve been together, we’ve developed a tasty, nutritious diet of beans and grains that centers around soybeans as a protein source. We have a soy dairy that produces 120 gallons of soy milk fresh each day to supply our community. The Soy Dairy also makes soy yogurt, soy cheese [tofu] and Ice Bean (soy milk ice cream) from the soy milk. We love the good tasting, versatile, high protein soybean and one of our favorite ways of eating it is the fermented product, tempeh. At present our communities are making tempeh in Tennessee, California [San Rafael], Colorado, Kentucky, New York, and Louisiana [Houma].”

“We plan to increase tempeh production on the Tennessee Farm to 135 kg. daily for the community, and to introduce it to neighboring towns.” “Our Colorado Farm makes solar dehydrated tempeh chips for soup mix, and this operation could be expanded or duplicated.”

“Acknowledgement: We would like to thank Don

Wilson for the information on the California Farm method of making tempeh and inoculum.” Thanks also to Diane Darling, “the Farm Tempeh Crew, and friends who’ve helped: Debra Heavens, Valerie Epstein, Paul Meltzer, Maureen Hale, Deborah Stevenson, Laurie Sythe, David Handel, JoAnn Else, Paula Denton, and Corey Ford.

Later summarized as “Utilization of Tempeh in North America” in K.H. Steinkraus, ed. 1983. *Handbook of Indigenous Fermented Foods*. New York: Marcel Dekker. p. 48-50. Address: The Farm, Summertown, Tennessee.

861. Farm Food Company. 1976. August. New soyfoods restaurant or deli. 820 B. St., San Rafael, CA 94901.

• **Summary:** Shurtleff & Aoyagi. 1976. Sept. Tofu & Miso America Tour Itinerary. Contact: Kathleen Sandler.

Questionnaire filled out by Robert & Constance Dolgin. 1980. Jan. The Farm Food Co. in San Rafael opened its deli in about Aug. 1976, and the same month started making tempeh, tofu and soymilk. Shurtleff & Aoyagi visited in Sept. 1976. A list is given of dishes containing soyfoods served at the deli during its first year in business: Fried tofu sandwiches, tofu salads [like eggless egg salads], tofu salad dressings, and tofu cheesecake; tempeh burger, deep-fried tempeh cutlet, tempeh with creamy tofu topping, and Indonesian delight (tempeh strips with peanut butter and miso sauce over rice); soymilk ice cream, soymilk shakes, soy yogurt, soymilk mayonnaise, and soy whipped creme; soybean stroganoff and burritos; TVP chili; and Vege-Links (canned Loma Linda meatless hot dogs). Also for sale at the food store were packaged tofu, soymilk, tempeh, soy mayo, and Ice Bean [soy ice cream], all made in the same building.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3.

Laurie Sythe Praskin. 1985. “The Farm soy history: An overview.” States (p. 3) that it was named “Farm Foods Cafe.”

Note 1. This is America’s first “soy deli,” offering a host of highly creative and delicious recipes, served at a counter or tables.

Note 2. At this deli was developed and made the world’s first “Tofu Salad,” which would soon (made by various companies, including Farm Foods in San Francisco) become one of America’s first popular tofu products, widely called “Eggless Egg Salad” (1977), “Tofu No-Egg Salad” (1978), and “Missing Egg Salad” (1978). Address: San Rafael, California. Phone: 415-454-3797.

862. *Family Health*. 1976. Is there a TVP in your future? 8(9):52. Sept.

• **Summary:** Contains 9 recipes using textured vegetable proteins, which you can find in local supermarkets and health food stores. The ingredients include: Sausage-like breakfast links. Bacon-like breakfast strips. Ham-like breakfast slices. Refrigerated cholesterol-free egg substitute. Sausage-like

breakfast patties. Vegetable protein patties. Vegetable protein links.

863. Mayer, Jean. 1976. TVP: Can you tell the meat substitutes from the 'real' thing? (Only chickens, pigs and cows know for sure)! *Family Health* 8(9):40-41, 69. Sept. • **Summary:** Discusses TVP and soy-based meat analogues, their history, how they are made, and reasons for eating them. These foods are an outgrowth of the "extenders" added to ground beef after the 1973 rise in meat prices. "Today, the canned and frozen-foods sections in many large supermarkets sport long rows of soy-based meat analogs (definition: something similar in function to, but differing in structure from, something else)—diced 'ham,' sliced 'bacon,' or 'chicken' or 'sausage' patties, 'cheese' bits, chili-con-TVP, and dried stuffing-like mixtures that can be shaped into 'meat' loaves or 'hamburgers' or used as extenders." The future for TVP looks bright. Some experts predict growth of 25-50% a year, "and its estimated that by 1985 extenders and analogues will comprise about 10 percent of the total meat consumed in the United States!"

But such foods are not new. For centuries, Chinese and Japanese have processed soybeans and wheat into products resembling meat and cheese. "Similarly, prototypes of many of today's vegetable-protein foods were developed at the turn of the century by Dr. John Harvey Kellogg for his Seventh-Day Adventist patients—all vegetarians—at the Adventist sanitarium in Battle Creek, Michigan... Determined to provide his patients with a nutritious, balanced and tasty vegetarian diet, he produced 'coffee' made from cereals, decaffeinated coffee and peanut butter. His first meat analogues, which he called 'nutmeats,' combined nut butters with water in an emulsion. Then flours, starches, and cereals with different textures and flavors were added to the line. These mixtures were cooked and served as entrées or diced and added to salads. Kellogg made the analogues by extracting gluten, the main protein of wheat, washing away the starch, and mixing the gluten at high speed with nuts, grains and beans. The result: a fibrous, stringy dough that could be cooked as a loaf, diced, and canned for making vegetable bouillon or ground like hamburger." Dr. Kellogg's peanut butter and breakfast cereals soon became popular across America. But the "meat substitutes" were sold only to a small, specialized clientele. A photo shows various meat analogues served on plates. Address: Prof. of Nutrition at Harvard Univ. from 1950 to 1976, is the new president of Tufts Univ. [Medford, Massachusetts].

864. Shurtleff, William; Aoyagi, Akiko. 1976. Tofu & Miso America Tour: 29 Sept. 1976 to 3 Feb. 1977. Continued from Jan. 1977. [Itinerary with two maps]. Lafayette, California: New-Age Foods Study Center. Unpublished manuscript. • **Summary:** Continued: 1976 Dec. 21. Arrive at The Farm in Summertown, Tennessee. Meet Margaret Nofziger and

Stephen Gaskin. Stay until 2 Jan. 1977. We stayed most of the time at "Hoot Owl Hollow," a large community owner-built home with many families; our host was Edward Sierra. During the next few weeks we stayed in a parked mobile home (owned by the Sandler) in a lovely valley about 1 hour drive away. I worked on *The Book of Kudzu* final draft. Heavy confrontation with Farm folks—as I am about to start a program—about how they didn't like my way. Write a 4-page pamphlet titled "What is Tempeh?" jointly with Cynthia Bates. 1976 Dec. 31—This is our first year with significant income (\$27,390, mostly from Autumn Press royalties) but no profit. During 1976 thirty articles and book reviews about our work with tofu and miso were published in magazines and newspapers in the USA and Japan.

1977 Jan. 2—Our Tofu & Miso America Tour continues. Jan. 3—Stay in a suburban home with Lynn Delacruz in Meridan, Mississippi. Jan. 4—Program for Atlantis Distributors in New Orleans. That night we stay in a trailer home with John and Katherine Gabriel in Houma, Louisiana. They are from The Farm and make commercial tempeh in their trailer. Jan. 6—Jim Baker (Dallas, Texas). After the program I meet Dr. Ralph Sand who is studying tofu and soy cheeses at Anderson Clayton. We also visit with my cousin, Bob Shurtleff, near Dallas. Jan. 7—Jane Binante in Denton, Texas. Jan. 9—Jim Hemminger of Gregg St. Tofu Co. (started by Thom Leonard) in Fayetteville, Arkansas. His partner is Mary Weingartner. We sleep on the floor of a small house in Fayetteville and the next morning see Jim make tofu in a bathtub. Jan. 10—East Wind in Tecumseh, Missouri. Jan. 12—Stay with Robert Nissenbaum (a fine, humble fellow) in St. Louis, Missouri. I finish typewritten manuscript of "What is Tempeh?" Jan. 13—Program at a restaurant, The Sunshine Inn (St. Louis). Sponsored by The Ethical Society. Stephen Uprichard, Dale Deraps, and Robert Nissenbaum are there.

Jan. 15—Meet David and Danette Briscoe (Kansas City, Missouri; they soon start publishing *Soycraft*, a small periodical on soyfoods), dinner with Thom Leonard at his home in Lawrence, Kansas (we have miso soup with miso that Thom made, then do a big program sponsored by the Mercantile Community Co-op in downtown Lawrence at either the Lawrence Library or Community Center—in a big downstairs room. I tape the lecture. Unbeknownst to me, Ken Bader, CEO-to-be of the American Soybean Assoc., is in attendance). Jan. 16—Visit Bob Amelay of the Omaha Food Co-ops in Omaha, Nebraska. Jan. 17—Drive across Nebraska to Denver. Jan. 18-19—Dave Bolduc and Christie Shurtleff in Boulder, Colorado. The first night we do a big tofu program in the historic Boulder Theater. That afternoon we have an audience with the Karmapa—a high Tibetan spiritual leader, who has diabetes; we give him an inscribed hardcover copy of *The Book of Tofu*. Akiko recalls cooking tofu burgers for him. That evening in a large, packed hall, we witness his Holiness conduct the Black Crown Ceremony.

Jan. 20. Jimmy Carter is inaugurated as president. Jan.

24—Program for The Colorado Farm in Hotchkiss, Colorado—way out in the boondocks. Jan. 25—Stay with Andrea Chin in Taos, New Mexico. Visit Lama Foundation high above Taos in the snow (Steve Durkee, teacher). They have many small meditation cubicles around the hillside and have just finished a nice adobe meditation hall. Near Durango, Colorado, we visit Ed Tripp, who looks lonely, sad and desolate, farming a little patch of organically grown wheat and living alone in a bare shack on coffee and cigarettes.

Jan. 26. We stay somewhere in New Mexico. Jan. 27—Program at the First Unitarian Church in Albuquerque (79 p.m.) hosted by Michele E. Martin of Jemez Bodhi Mandala Zen Center, Jemez Springs, New Mexico. Sit meditation in their cold Rinzaï zendo then soak in the hot springs outside in the snow. Their teacher, Sasaki roshi, is not there. Jan. 28—Susan Berry in Silver City is supposed to host a program. We cannot find her house. At one point along in here we do a program in or near Utah in a remote church up on a little bluff. Dinner before at Frosty Hot Dog place. Jan. 29—Long drive across Arizona to San Diego. Jan. 30—Big program in San Diego for 350 people at the Ocean Beach Community School hosted by David and Barbara Salat, publishers of *Well Being* magazine. Afterwards we stayed overnight on their houseboat in San Diego Bay. Magical. Akiko had a bad cough and was very tired.

In Los Angeles we spend a day (in late January or early February 1977) with Lewis Headrick and Jimmy Silver visiting three small tempah shops: Bali Foods (in Baldwin Park, run by Mr. Henoch Khoe), Country Store Health Foods (in Sun Valley; Joan Harriman), and Toko Baru (in West Covina; Randy Kohler). One evening we had dinner with Mr. Yamauchi and perhaps Al Jacobson. I gave a presentation on tofu. Afterwards, in the parking lot, Mr. Yamauchi gave me an envelope containing several hundred dollars in bills—his way of saying thank you for the work we were doing on behalf of tofu.

Feb. 1. Drive to northern California, then have dinner at the home of Herman and Cornelia Aihara (Oroville, CA). Feb. 2. Last program of the tour for Harold Lockhard of the Sacramento Natural Foods Co-op (Sacramento, California; Program is in a modern college building).

On 3 Feb. 1977 arrive home in Lafayette, California.

On this 4-month tour the Shurtleffs, trying to do for soyfoods what Johnny Appleseed did for apples, presented 70 public programs attended by about 3,646 people, did many media interviews and appearances, and travelled 15,000 miles. They had a gross income of \$18,020 from honoraria and sales of their books (*Book of Tofu*, *Book of Miso*), tofu kits, pamphlets, and nigari. Total trip expenses were about \$5,361 plus about \$7,200 for books from the publisher, leaving a net income of about \$5,459. It was a huge, challenging, and exhausting Odyssey that bore abundant fruit in the founding of a new tofu shop almost everywhere they spoke.

1977 Feb. 9—Meeting in Lafayette (790 Los Palos Dr.) with Robert Dolgin and David Sandler (from the Farm and Farm Foods in San Rafael) and Larry Needleman leads to the establishment of Bean Machines, Inc. (BMI). The Farm places a firm order for a Japan tofu system.

1977 Feb. 12—Bill and Akiko leave America and fly to Japan. Air fare paid by Hydrometals. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

865. Worthington Foods, Inc. Div. of Miles Laboratories, Inc. 1976. Why textured vegetable protein? The real facts about meat substitutes and how they contribute to balanced nutrition (Ad and booklet). *Mother Earth News* No. 41. Sept. p. 45. Also in No. 42. Nov. p. 57.

• **Summary:** Shows peanuts in the shell, soybeans, and ears of wheat on a plank of wood. “Vegetable protein foods are made primarily from soybeans, wheat and peanuts... Worthington products average more than 16.5% of the U.S. Recommended Daily Allowance for protein in each serving... There are no animal derivatives of any type, no preservatives and no cholesterol. Ingredients are primarily from natural sources. Vegetable protein foods help make the transition to a non-meat diet quick and easy... Most Worthington products contain important minerals and vitamins (like B-12) that are sometimes lacking in vegetarian diets.”

The booklet lists Worthington product names: 3 are dry, 18 are canned, and 25 are frozen. Address: Worthington, Ohio 43085.

866. Robertson, Laurel; Flinders, Carol; Godfrey, Bronwen. 1976. Laurel’s kitchen: A handbook for vegetarian cookery and nutrition. Nilgiri Press, Box 477, Petaluma, CA 94952. 508 p. Oct. Foreword by George M. Briggs, Prof. of Nutrition, Univ. of California, Berkeley. Illust. Index. 24 x 20 cm. Bantam Books pocketbook ed. Dec. 1978. 641 pages. [45 ref]

• **Summary:** One of the best, most original, and most influential books of lacto-ovo vegetarian recipes and nutritional information published during the 1970s. Handsomely illustrated with woodcuts by Laurel, this classic is divided into three parts: Part I, “Giving the Gift of Life (p. 10-62), is by Carol Flinders, a superb writer who majored in creative writing at Stanford University. It begins with her preface and a dedication that reads: “This book is dedicated to the glossy black calf on his way to the slaughterhouse many years ago, whose eyes met those of someone who could understand their appeal and inspire us, and thousands of others like us, to give the gift of life.” The first section describes how one woman, Laurel, made the transition from Sloppy Joes to vegetarian culinary and nutritional mastery. The second section, “The Keeper of the Keys, talks about alternate and traditional roles for women in the home and society.

Part II is recipes and menus (p. 65-297). Pages 66-69

introduce “The Four Food Groups”: 1. Grains, legumes, nuts, & seeds. 2. Vegetables. 3. Fruit. 4. Milk & eggs. The “Four Food Groups for the Vegan” (p. 320-24) are grains-nuts-seeds, legumes, vegetables, and fruit.

Part III, “Nutrition for a Meatless Diet” (p. 298-486) is one of the best sources available on vegetarian nutrition. Of special value are the extensive tables on nutrient composition of foods, which include vitamins and minerals; they are up to date and well documented. A 22-page index adds to the books usefulness.

Soybeans and soy products are praised as an excellent source of low-cost high quality protein (p. 69). Pages 82-83 give details on soy flour (full-fat) and soy powder.

Soy-related recipes include: High protein bread (with soy flour, p. 91). Pumpnickel (with soy meal, p. 92). Soy bread (with cooked whole soybeans or soy grits, p. 92-93). Pine nut pinwheels (with Soy Spread, p. 97). Breakfast beans (p. 122). Better-Butter (p. 123, a blend of 1 cup each vegetable oil and butter plus 2 tablespoons each water and dried skim milk, ¼ teaspoon lecithin, and ½ teaspoon salt). Soy milk (basic information and how to make at home using the Cornell method, p. 134-36). Sandwich ideas (incl. Soy burgers, Tofu patty, Soy Pâté, p. 138). Soy spread (p. 140). Tofu-peanut butter spread (p. 141). Minestrone (p. 166). Creamy green soup (p. 170). Stuffed peppers (with soy grits, p. 202). Chinese vegetables & tofu (p. 217). Soybean stock (p. 224). Soy stock gravy (p. 229). Zucchini oat-flake loaf (with soy meal, p. 243). Vegetable bean noodle bake (with soybeans, p. 245). Beans (with “1 cup cooked soy pulp, or coarsely chopped soybeans,” p. 257-60). Savory dinner loaf (with soy grits, p. 265). Soy burgers (p. 266). Neat balls (with Soy spread, p. 266). Tofu patties (p. 267).

Pages 299-486 are about nutrition for a meatless diet. Information on soy is given on pages 307, 322-24, 381 (“Soybean protein is a complete protein; its amino acid pattern conforms closely to that of milk.”), 460 and 463-64 (tables of nutritional composition).

Note: The authors use the term “soy pulp” to refer to soybeans that have been cooked and ground, and the term “insoluble residue” (p. 136) to refer to okara. Address: California.

867. United Press International (UPI). 1976. Tofuburgers in dining halls (News release). Washington, DC. 1 p. Syndicated in newspapers nationwide, Nov. and Dec. 1976. • **Summary:** Orono, Maine (UPI)—At the University of Maine at Orono, in the dining hall, students “will soon be able to munch on tofuburgers.”

A tofuburger is made of soybean curd (low in cost and a good source of protein) fried with onions, carrots and sunflower seeds.

Ann S. Johnson, assistant manager of dining halls at the university, thinks their great as part of an attempt “to wean students at the university away from junk foods and empty

calories.”

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “tofuburgers” (or “tofuburger”).

Note 2. This news release was occasioned by a lecture and cooking demonstration given on Nov. 7 by William Shurtleff and Akiko Aoyagi at the University of Maine, Orono—as part of their Tofu and Miso America Tour.

868. *Feedstuffs*. 1976. Central Soya, General Mills sign soy pact. 48(147):1, 59. Nov. 15.

• **Summary:** General Mills has signed a long-term leasing and licensing agreement with Central Soya giving the latter company exclusive rights to use General Mills’ patented soy protein technology, but only to produce protein products for institutional food service and food processing markets. The agreement includes equipment and technology for steam texturizing vegetable proteins and transfers to Central Soya exclusive rights to the Bontrae trademark. Central Soya plans to install the steam-texturing equipment at its soy protein plant in Gibson City, Illinois.

General Mills retains the rights to make its lines of Bac-Os and Bac-O-Bits.

869. United Press International (UPI). 1976. Tofu-burger no junk food. *Bangor Daily News (Maine)*. Nov. 18. p. 1-2.

• **Summary:** Students will soon be able to munch on tofuburgers in the University of Maine at Orono school dining hall. Anne S. Johnson, assistant manager of dining halls, said the new tofu-burger is part of an attempt “to wean students at the university away from junk foods and empty calories.”

“Mrs. Johnson was introduced to the new vegetarian fare through a food book written by Bill Shurtleff and Akiko Aoyagi. She hopes to have the item on the dinner menu by early next month.” “About 150 of the university’s dormitory students line up nightly to consume vegetarian fare at the Wells Common Dining Hall... The cost of preparing the vegetarian meal is no greater than for the regular one.”

A photo shows Barbara Hill, a student at the University of Maine, as she is about to take her first bite of a Tofu-Burger, a Japanese inspiration that contains no meat.

Note 1. This is Maine’s largest daily newspaper. Many other newspaper articles were generated by this UPI story. Three (from unknown newspapers) are titled: “Tofuburgers in dining hall.” “Shamburger deluxe.” “Maine tofuburgers.”

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “tofu-burger” (or “tofu-burgers”).

870. Wenger Manufacturing. 1976. Wenger X-25 Uni-Tex meat analog process (Ad). *Soybean Digest*. Nov. p. 20k.

• **Summary:** A photo shows the extruder arrangement for the manufacturing of Uni-Tex, Wenger’s new economical meat analog made by extruding defatted soy or peanut

flours, concentrates, or grits. The capacity of the X-25 is 500 pounds per hour of finished product. “Uni-Text is not a meat extender, but is instead, a dense, untwisted, uniformly layered, vegetable protein base replacer of meat. It can be readily flavored, colored, and given a texture like that of ham, beef, chicken or sea foods.” Address: Plant and general offices—Sabetha, Kansas 66534. Industrial sales—Kansas city, Missouri 64112.

871. Maglaty, Jeanne. 1976. Use as answer to nutritional needs. Couple praises soybean uses. *Hartford Courant (Connecticut)*. Dec. 1. [2 ref]

• **Summary:** William Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* and *The Book of Miso*, on a national speaking tour, visited Hartford. “‘We’re trying to do for soybeans what Johnny Appleseed did for apples,’ said William Shurtleff of Lafayette, California.” A photo by Michael McAndrews shows the two; Shurtleff is speaking into a microphone and holding a copy of *The Book of Tofu*. Aoyagi is holding a wooden tofu kit.

Recipes: Creamy tofu dressing with curry. Tofu, peanut butter and banana spread. Tofu burgers (deep-fried). Floating cloud miso dressing (“Tomatoes and (deep-fried) tofu make excellent accompaniments”). Peanut miso.

872. United Press International (UPI). 1976. Vegetarian burgers (Photo caption). *Cleveland Press (Ohio)*. Dec. 3. p. A11.

• **Summary:** A large photo shows a male chef cooking about 7 burgers on a grill; a woman is standing next to him. The caption reads: “Vegetarian burgers—Ron Goslin, chef at Wells Dining Hall on the University of Maine campus at Orono, prepares tofu-burgers, a soybean curd fried in onions, carrots and sunflower seeds, while student Paula Fallon of Westfield, Massachusetts, looks on. About 150 students line up each night for the vegetarian fare. Dietitians are hoping more students will be weaned away from junk foods with their empty calories by the low-cost Japanese protein food.”

Note: This news release was occasioned by a lecture and cooking demonstration given on Nov. 7 by William Shurtleff and Akiko Aoyagi at the University of Maine, Orono—as part of their Tofu and Miso America Tour.

873. *SoyaScan Notes*. 1976. Chronology of soybeans, soyfoods and natural foods in the United States 1976 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Feb. KQED-TV in San Francisco, California, airs a 30-minute special titled “Tofu.” It is an interview with William Shurtleff and recipe preparation by Akiko Aoyagi.

March. “The Joys of Soy” by Brenda Bortz, published in *Organic Gardening and Farming* magazine is the first major popular article on tempeh in America. In June, *Prevention* magazine runs a cover story on tempeh.

April. Soybeans: Brazil as a Competitive Force by J.M. Schultz and W.P. Mason submitted as a Harvard Business School MBA thesis. One of the best early in-depth analyses.

April. The second of the new wave of commercial Caucasian-run tofu shops is started by Peter and Judy Beane in Portland, Maine. There were at least 7 small commercial Caucasian-run tofu shops in America by the end of 1976.

May-June. *Mother Earth News* publishes the first of five long articles on soyfoods, each excerpted from *The Book of Tofu*.

June 2-5. First International Workshop on Low-Cost Extrusion Cookers held at Colorado State University, with 51 participants. Organized by Judson Harper and Richard Jansen, with funding from USAID through USDA. The 173-page proceedings, edited by Wilson and Stumpf, are published shortly thereafter. Cereal-soy blends are seen as having great promise for production in developing countries.

This year cereal-soy blends are first produced in Third World countries using low-cost extrusion cookers: Thripasha in Sri Lanka and Maisoy in Bolivia.

July 20. What is Tofu? pamphlet by Shurtleff and Aoyagi published by Westbrae Natural Foods in Berkeley.

Aug. 6. New-Age Foods Study Center established by Shurtleff and Aoyagi in Lafayette, California. The name was changed to The Soyfoods Center in Sept. 1980.

Aug. Larry Needleman of The Learning Tree in California introduces America’s second tofu kit, which soon becomes the best-seller nationwide.

Aug. Farm Food Company, a branch of The Farm in Tennessee, opens America’s first soy deli, in San Rafael, California. They serve tofu sandwiches, salads, salad dressings, and cheesecakes; tempeh burgers, deep-fried tempeh cutlets, tempeh with creamy tofu topping, and Indonesian delight (tempeh strips); soymilk ice cream, shakes, yogurt, mayonnaise, and whipped creme; soybean stroganoff and burritos; and TVP chili. They essentially launched the concept of second-generation soyfood products.

Sept. 23. *The Book of Miso*, by Shurtleff and Aoyagi published by Autumn Press.

Sept. 29. Shurtleff and Aoyagi begin “Tofu and Miso America Tour.” They do 70 public programs nationwide and travel 15,000 miles in their white Dodge van, continuing until 3 Feb. 1977. In the van they carry hundreds of copies of *The Book of Tofu* and *The Book of Miso* and many of Larry Needleman’s tofu kits, plus little bags of natural nigari, all of which they sell at their programs. They usually have meals and spend the night with the people who have sponsored and organized their program. They also visit numerous soyfoods producers and researchers, including The Farm in Tennessee from Dec. 21 to Jan. 2. After the tour, tofu shops started in most of the areas where they spoke.

Sept. Dr. Kenneth Bader becomes executive director of the American Soybean Association. With the help of increasing funding from checkoff programs, he ushers in an

era of growth, and increased activity and strength for ASA.

Oct. 13-15. Seminars on the use of soy protein for foods and meal for feeds are held in Moscow, sponsored jointly by the U.S. Foreign Agricultural Service, the American Soybean Assoc., and the Food Protein Council. More than 200 Soviet officials attended.

Oct. *The Joy of Soy*, by Sylvia E. Anderson self-published in New Jersey.

Nov. Island Spring starts making tofu in Vashon, Washington. Founded by Luke Lukoskie and Sylvia Nogaki.

Dec. The term “soyfoods” (spelled as one word) is coined by Benjamin Hills of Surata Soyfoods in Eugene, Oregon, for use in their company name. It is first used in a book (*Tofu & Soymilk Production*) by Shurtleff and Aoyagi in July 1979, and as a magazine title in July 1980.

Dec. Morinaga Milk Industry Co. in Japan is granted the world’s first patent on a method for manufacturing aseptically packaged tofu (in Tetra Brik cartons), U.S. Patent 4,000,326.

\* Kibun, in Japan, introduces East Asia’s first commercial fermented soymilk products, a line of acidophilus soymilk drinks brand-named Soena.

\* Beginning of the rise of the modern soymilk industry in Japan. This is the first year that a significant amount of soymilk was sold.

\* Kikkoman soy sauce passes La Choy to become America’s best selling brand of soy sauce. The three major soy sauce markets are consumer retail, restaurants and other institutions, and industrial (for food processors). La Choy may still be the leader in consumer retail; Kikkoman leads in restaurants.

\* Beef consumption in America peaks at 95.4 pounds per capita. It had risen rapidly from 38.6 lb/person in 1930. After 1976 it falls steadily, hitting 75 lb/person in 1985.

\* National Soybean Research Program established in Brazil, building upon the National Soybean Project (1972) and the National Soybean Research Center (1975).

874. Anderson, Sylvia E. 1976. *The joy of soy*. Pleasantville, New Jersey: New Life Press. 48 p. Dec. Illust. Index. 23 cm. Spiral bound. Rev. ed. 1977. Spiral bound.

• **Summary:** Contents: What is the joy of soy. Whole, dry soybeans (“My favorite way to cook whole, dry soybeans is to pressure cook them”). Soymilk. Tofu. Sweet tofu. TVP. Okara. This vegan cookbook was inspired by The Farm, a large spiritual community in Tennessee, where the author and her children lived for several years. “When I arrived on The Farm, I thought I didn’t like soybeans... Now I love soybeans and soymilk—not because my tastebuds have changed and I’ve acquired a new taste for them, but because I’ve learned new ways to cook soybeans so that they taste good to those same old tastebuds.

“The recipes in ‘The Joy of Soy’ have been developed through feedback from members of The New Life Co-op

(326 S. Main St., Pleasantville, New Jersey), where products made from them have been selling rapidly for the past nine months.”

Note: The author’s favorite recipes are: (1) Grandma’s chickenless soup with Kreplach (and tofu, p. 19). (2) “Cheezy” soybean d’lishes (p. 6). (4) Garden salad d’lishes (with tofu, p. 21). (5) Pizza d’lishes (with tofu, p. 23). (6) Tofu cookie bars (sweet, p. 26). (7) Tofu cinnamon rolls (sweet, p. 27). (8) Tofu-filled carob cupcakes (sweet, p. 28). (9) Okara soysage (p. 40). (10) Soysage d’lishes (with TVP, p. 37). (11) Okara spice cake (sweet, p. 45). (12) Dairyless macaroni and cheese (with tofu, p. 15). Address: Pleasantville, New Jersey.

875. Cedar Lake Foods. 1976. Wholesale price list. March 15. Box 116, Cedar Lake, MI 48812.

• **Summary:** The following products are listed: Chops, Vegeburger, Terkettes, Sloppy Joe, Soynut Loaf, Chili Burger, Chipetts, Tender Tips, Breakfast Links, and Hostess Cuts. Terkettes and Tender Tips (and perhaps some others) contain no soy. Address: Cedar Lake, Michigan. Phone: 517-427-5590.

876. **Product Name:** [GranoVita Soy Goulash in Tomato Sauce].

**Foreign Name:** GranoVita Soja-Goulasch in Tomaten Sauce.

**Manufacturer’s Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1976.

**Ingredients:** Non-hydrogenated vegetable fats, soya protein, carrots, celery, tomatoes, wheat flour, natural spices. **Wt/Vol., Packaging, Price:** 425 gm can wholesales for DM 6.

**How Stored:** Shelf stable.

**New Product–Documentation:** Full-page ad for 8 granoVita soy products in the book by Manfred Heide. 1977. *Vegetarische Ernährung: 193 Rezeptvorschläge und Speisepläne für ein Vierteljahr* [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. Stuttgart, West Germany: Paracelsus Verlag.

DE-VAU-GE leaflets. 1980? *Rezepte aus der GranoVita Versuchskueche*. And *Neue Rezepte mit Soja-Goulasch*. Manufacturer’s catalog. 1981. May 1. DE-VAU-GE Sortiment-Preisliste. 4 p. Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

877. **Product Name:** [GranoVita Soya Ragout {Meatless}].

**Foreign Name:** GranoVita Soja-Ragout fin.

**Manufacturer's Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1976.

**Ingredients:** 1983: Water, Soya-zart, mushrooms, wheat flour, cream, vegetable margarine, onions, spices.

**Wt/Vol., Packaging, Price:** 400 gm can. Retail for DM 7.35.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 100 gm.: Protein 9 gm, fat 10 gm, usable carbohydrates 4 gm, calories 142. 1 BE (Broteinheit, or diabetic exchange) = 300 gm.

**New Product–Documentation:** Manufacturer's catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

Label sent by Anthony Marrese. 1990. Jan. 9 by 4 inches. Red, blue, and black letters on beige. A color photo on the front panel shows this dish served in an elegantly simple setting. "Contains no flesh. Alternative eating is meatless eating. It is modern and brings transformation and joy from new experiences in taste. Alternative eating is likewise healthful and nourishing. We recommend for your meatless menu, a fresh salad, and an after-meal walk. And so will your meatless days increase your well-being." Neufarm certification symbol. Ingredients (1990): Water, Soja-zart (piquant soya meat), onions, Feiner Soja-Aufschnitt Delikat, vegetable margarine, wheat flour, onions, powdered cream, spices, corn starch, seasonings. A 400 gm can retails for DM4.56.

878. **Product Name:** [GranoVita Soyameat Balls; Renamed Soya Balls by 1983].

**Foreign Name:** GranoVita Sojafleisch-Kloesschen (Renamed Soja-Kloesschen by 1983).

**Manufacturer's Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1976.

**Ingredients:** Soya protein, water, corn germ oil, egg protein, bread crumbs, spices, sea salt, wheat protein, wheat flakes, yeast, onions, potato starch.

**Wt/Vol., Packaging, Price:** 350 gm can wholesales for DM 6.4.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer's catalog. 1981. May 1. DE-VAU-GE Sortiment-Preisliste. 4 p. Manufacturer's catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

879. **Product Name:** Granose Soyapro Wieners. Later renamed Soya Wieners.

**Manufacturer's Name:** Granose Foods Ltd. (Distributor). Made in Denmark by Nutana.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1976.

**Ingredients:** 1980: Soya protein, vegetable oil, egg albumin, oats, salt, glucose syrup, vegetable stabilizer.

**Wt/Vol., Packaging, Price:** 385 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Soya sausages. Serve as frankfurters. Can be broiled, grilled or fried."

Form filled out and Labels sent by Granose Foods Ltd. 1990. June 13. States that the product, made in Denmark by Nutana, was introduced in 1976. It is now named Soya Wieners. Can Label. 1990. 9.5 by 4 inches. Photo of the prepared dish, three wieners on a plate with rice and vegetables against a brown background. Vegetarian. Ingredients: Water, soya bean oil, egg white powder, textured soya protein, tomato puree, onions, soya protein isolate, salt dextrose, spices, soya sauce, oatmeal, guar gum (E412), sodium alginate (E401), hydrolyzed vegetable protein, smoke flavor. Serving suggestion: Heat or roast Soya Wieners and serve with spaghetti or mashed potatoes. Sliced Soya Wieners are delicious in salads. Ideal for lunch and dinner. Dietary analysis available on request.

880. **Product Name:** Granose Soyapro {Canned Slices} [Beef Like, Chicken Like, or Ham Like].

**Manufacturer's Name:** Granose Foods Ltd. (Marketer-Distributor). Made in Denmark by Nutana.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1976.

**Ingredients:** 1980: Soya protein, vegetable oil, egg albumen, hydrolysed vegetable protein, salt, flavourings.

**Wt/Vol., Packaging, Price:** 400 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Slices of flavoured soya protein fibre canned in sauce. May be used hot or cold as slices or added in pieces to pies, casseroles, etc. Beef like flavour only contains in addition, wheat protein."

Form filled out and Labels sent by Granose Foods Ltd. 1990. June 13. States that the product was introduced in 1976. Made by Nutana. Subtitle is now, for example, "Chicken Like Flavour Soya Fibre in Brown Sauce." Can Label. 1990. 9.5 by 4 inches. Photo of the prepared dish on a plate with rice and vegetables against a brown background. "Ingredients: Water, textured soya protein, soya bean oil, egg white powder, starch, hydrolysed vegetable protein, yeast extract, vegetable stock, wheat flour, celery powder, salt,

stabilizer. Serving suggestion: Cut into shreds and place in a stew of carrots and peas, sprinkle with parsley, serve with potatoes and a salad. Ideal for lunch and dinner.”

881. INTSOY. 1976. Development of improved varieties of soybeans. Urbana, Illinois: University of Illinois, College of Agriculture International Soybean Program. 140 p. Illust. No index. 28 cm. [84 ref]

• **Summary:** Final report on Contract AID/CM/ta-c-73-19. April 1, 1973 to March 31, 1976. Submitted to the U.S. Agency for International Development, Department of State, Washington, DC. The principal investigator and contractor was William N. Thompson. Total AID funding of contract to date: \$980,605.

Summary of accomplishments: “An extensive program in soybean variety evaluation was conducted to acquire information on soybean varieties having potential for home and commercial production in the less-developed countries of the tropics and subtropics. By the third year of contract operations, 90 countries had volunteered to participate in the program. Seed from varieties exhibiting promising production characteristics was increased in Puerto Rico and was distributed during the last quarter of the contract for use in preliminary observation trials at selected locations in six countries...

“Research in soybean food use led to development of concepts for rapid preparation of weaning foods and soybean-cereal patties, a procedure for preparation of a

soybean beverage for village use and the appropriate technologies for home and village level preparation of the foods and beverage. A study was made on the effects of using corn, rice or wheat flour as ingredients in drum dried soy-cereal weaning foods. Investigations were carried out on water uptake and use of sodium and ammonium bicarbonate and their effect/relationship to tenderness of cooked soybeans. Protein efficiency ratios were determined on many prototype foods made wholly or partly from field varieties of soybeans.

“Dissemination of research results was accelerated through an active publication series, a newsletter, regional workshops, training courses, and country programs. The soybean development network was expanded through formal linkages between INTSOY and national and international organizations and with a host of individuals and institutions who share INTSOY’s interest ‘to expand the use of soybeans for human food.’”

Appendix IV (p. 97-134), titled “Soybean Food Use,” summarizes accomplishments in more detail. An innovative sock filter and cradle filter for soymilk are illustrated and described. Appendix V, Project Output, is a bibliography of publications resulting from this research in the fields of: Soybean variety development (8 publications), Taxonomic Information Retrieval System (TAXIR; 5), Insect control and entomological studies (36), Soybean pathology (24 publications). Address: INTSOY, Univ. of Illinois.

882. **Product Name:** Loma Linda Roast Beef Deli Slices (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1976.

**Ingredients:** Water, corn oil, soy protein concentrate, soy protein isolate, wheat gluten, egg whites, artificial flavors, potato flakes, salt, natural (vegetable) flavors, whole wheat flour, caramel color, dried yeast, onion powder, dextrose, oleoresin paprika, monosodium glutamate, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 8 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 2 slices (2.0 oz–57 gm): Calories 150, protein 11 gm, carbohydrate 2 gm, fat 11 gm, cholesterol 0

mg, sodium 670 mg, potassium 120 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1976, but this label is copyrighted 1985.

883. **Product Name:** Loma Linda Chicken Deli Slices (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1976.

**Ingredients:** Vegetable proteins (soy protein concentrate, soy protein isolate, wheat gluten), water, corn oil, egg whites, potato flakes, artificial and natural (vegetable) flavors, salt, whole wheat flour, dried yeast, sugar, onion powder, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 8 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 2 slices (2.0 oz–57 gm): Calories 160, protein 10 gm, carbohydrate 1 gm, fat 13 gm, cholesterol 0 mg, sodium 330 mg, potassium 120 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1976, but this label is copyrighted 1985.

884. **Product Name:** Loma Linda Fried Chicken (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1976.

**Ingredients:** Soy protein isolate, water, corn oil, egg whites, potato flakes, wheat gluten, artificial and natural (vegetable) flavors, dried yeast, salt, dextrose, onion powder, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 8 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 piece (2.0 oz–57 gm): Calories 180, protein 13 gm, carbohydrate 2 gm, fat 14 gm, cholesterol 0 mg, sodium 510 mg, potassium 80 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1976.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

885. **Product Name:** Ganmotoki (Fried Soybean Cake).

**Manufacturer's Name:** Matsuda & Hinode Tofu Mfg. Company.

**Manufacturer's Address:** 526 Stanford Ave., Los Angeles, CA 90013.

**Date of Introduction:** 1976.

**Ingredients:** Soy bean, soy bean oil, water, carrots, seaweed, yam flour.

**Wt/Vol., Packaging, Price:** 1 7/8 oz plastic pouch.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1979. 4.5 by 7 inches. Plastic film. Red yellow and blue on clear plastic. On 1982 letterhead for Matsuda-Hinode Tofu Mfg. Co.

“Ganmotoki.” Product with Label purchased. 1988. Hinoichi Tofu Fritter (Ganmodoki). 3.5 by 5 inches. Red, white, and black on clear film. This label was printed after the merger of Hinode Tofu Co. and House Foods in 1983. Ingredients: Soybeans, water, soybean oil, carrots, seaweed, fish powder (tuna, seaweed, mushrooms), salt. Weight: 1 7/8 oz (70.8 gm) in a plastic pouch. Retail for \$0.93 (10/88, Los Angeles).

**886. Product Name:** [Maxten, and Temptein {Extruded Textured Soy Protein}; Pro-Lean].

**Manufacturer’s Name:** Productos Nutricionales S.A. (Pronasa). Subsidiary of Miles Laboratory.

**Manufacturer’s Address:** A Garcia y Flo. Juarez, Celaya, Guanajuato, Mexico. Offices at Lago Muritz 84-A, Mexico 17, DF.

**Date of Introduction:** 1976.

**New Product–Documentation:** *Soybean Digest Bluebook*. 1976. p. 38; 1977. p. 37. Talk with Gil Harrison of American Soybean Assoc. 1989. April 21. This company was run by Donald Reese, a graduate of Stanford University. He made

defatted soy flour, and cereal-soy blends. General Mills was the first company to make a defatted soy flour in Mexico. They had had their own little cereal-soy mixing plant. Their first experiments were done with a soy beverage (made from defatted soy flour and flavor) served to government dam workers. They probably started in the late 1960s and were definitely there by 1971. When they couldn’t make it go, Don Reese purchased all the machinery from General Mills. He wouldn’t let Gil Harrison into his plant on Lago Muritz in 1971. He made cereal-soy blends and a soy beverage, both containing sesame. He ended up making all the infant formulas for Mead Johnson and others. The plant finally closed over a labor dispute. He is still in Mexico but is no longer doing soy.

**887. Product Name:** Sanitarium Health Foods Canned Vegetable Protein Sausages.

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1976.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1976. p. 37.

**888. Product Name:** Veggie Burger (Sandwich with Wheatmeat-Based Solar Burger Patty).

**Manufacturer’s Name:** Season’s Harvest.

**Manufacturer’s Address:** 52 Broadway, Somerville, MA 02145.

**Date of Introduction:** 1976.

**Ingredients:** Incl. seitan (Wheatmeat), textured soy protein concentrate (Response), whole wheat flour, and soy protein isolate.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970s, and manager of the store in the late 1970s. 1991. Nov. 18. Joel recalls that two sandwich companies in the Boston area bought Wheatmeat or seitan from Johnny Weissman of the Vegetable Protein Company, then used it to make sandwiches. One sandwich was an ethnic variety on whole wheat bread made by Baldwin Hill Bakery, with sauerkraut and mustard. The other was on light, semi-whole wheat bread with lettuce, mayonnaise, and mustard; it resembled a roast-beef sandwich.

Letter from John Weissman. 1992. June 25. Season’s Harvest in Somerville, Massachusetts, introduced Solar Burger sandwiches, in 1976. Ademar Reis owned the company.

Talk with Ademar Reis. 1993. Nov. 30. In 1976 the Solar Burger patty was still being made by John Weissman. Ademar used that patty in a sandwich he named Veggie Burger. He started making and private labeling the product

in 1979. John had a plant in Cambridge, Massachusetts. Then John closed the plant and Ademar bought some of his equipment and started making the Solar Burger patty for John. At that time, Ademar first discovered Response, textured soy protein concentrate.

Note: This is the earliest commercial soy product seen (March 1999) that is a sandwich (one of two such products).

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Veggie Burger” (or “Veggie Burgers”).

**889. Product Name:** [Fansteco or Fan’ssteco (Simulated Meat Products)].

**Manufacturer’s Name:** Societe Industrielle des Oleagineux (SIO).

**Manufacturer’s Address:** Main Office: 30 Rue des Peupliers, 92000 Nanterre, France.

**Date of Introduction:** 1976.

**New Product–Documentation:** B. Julien. 1976. Foreign Agriculture. April 19. p. 6. Soya Bluebook. 1986. p. 92.

**890. Product Name:** Solar Burger (Sandwich with Wheatmeat-Based Solar Burger Patty), and Smoke Flavored Spread sandwich.

**Manufacturer’s Name:** Sunrise Sandwiches.

**Manufacturer’s Address:** Massachusetts.

**Date of Introduction:** 1976.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970s, and manager of the store in the late 1970s. 1991. Nov. 18. Joel recalls that two sandwich companies in the Boston area bought Wheatmeat or seitan from Johnny Weissman of the Vegetable Protein Company, then used it to make sandwiches. One sandwich was an ethnic variety on whole wheat bread made by Baldwin Hill Bakery, with sauerkraut and mustard. The other was on light, semi-whole wheat bread with lettuce, mayonnaise, and mustard; it resembled a roast-beef sandwich.

Letter from John Weissman. 1992. June 25. Sunrise Sandwiches owned by Tom Iglehart introduced Solar Burger sandwiches in 1976 or 1977. They also introduced a popular smoke flavored spread sandwich. The spread used John’s Smoky Soy Bits, tahini, and other ingredients that Tom might remember.

Note: This is the earliest commercial soy product seen (March 1999) that is a sandwich (one of two such products).

**891. Product Name:** Seitan.

**Manufacturer’s Name:** Unknown small company owned by Jos van de Ponselee and 2 Americans.

**Manufacturer’s Address:** Boston, Massachusetts.

**Date of Introduction:** 1976.

**New Product–Documentation:** Letter (fax) from Jos van

de Ponselee and Magda Verfaillie of Mycelia b.v.b.a. in Gent, Belgium, in response to an inquiry. 1992. July 6. Jonathan was the first company in Europe to make seitan for sale commercially. Jos van de Ponselee, the founder of Jonathan, first learned about seitan during a 9-month stay [with his wife and family] at the Kushi Institute in Boston from March to December 1976. He thought it would be a good meat substitute for the growing group of vegetarians in Europe. [Note: Jos was a butcher with a large meat processing operation before he became a macrobiotic vegetarian]. In Boston, he learned how to make seitan on a home scale from Tamara Uprichard. Then, at the very end of his stay in Boston, he started up medium-scale production of seitan with two Americans; he no longer remembers the name of the company or the names of his Americans partners. They sold seitan to macrobiotic study houses in Boston and to the Erewhon retail store. Returning to Belgium, he founded Jonathan.

Talk with Ed Esko. 1992. July 8. He remembers Jos but he does not remember him making any commercial food products.

Talk with John Weissman, seitan pioneer in Boston and developer of Wheatmeat and Tan Pups. 1992. July 8. One day a European man, maybe from France or Belgium, (probably Jos van de Ponselee), called John and asked if they could meet and if John would please tell him how to make seitan. He explained that he planned to make seitan in Europe and would therefore not be competing with John. They met for lunch at a restaurant named the Coffee Connection in Boston. John told Jos just enough so that he would not go away disappointed. John does not recall the product being on the market, nor does he remember the name of the company or the names of the Americans involved. He does recall a frozen seitan cutlet of very poor quality being on the market briefly in Boston in the late 1970s (about 1978). It was sold in round, thick patty-like shapes resembling a burger. John thinks the seitan was ground then stuffed into a thick casing then sliced crosswise. It was sold at Charlie Christopher’s Organic Food Cellar (among other places). The first competing seitan product that he remembers in Boston was that made by Upcountry.

Talk with Charles Kendall. 1992. July 9. He talked with Jos once when Jos visited his apartment (where Charles and his wife-to-be were making natto and pickles) to ask about making foods such as mochi and miso. He remembers Jos as the butcher who turned to macrobiotics. They had a lovely chat, but Charles does not remember that Jos made seitan or any other commercial food products.

**892. Product Name:** Stakelets (Vegetarian Beefsteak).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1976.

**Ingredients:** Textured vegetable protein (soy concentrate and isolate, wheat gluten), soybean and/or corn oil, flavorings (artificial flavors, hydrolyzed vegetable protein, salt, spices and spice extractives, onion, garlic powder, paprika), egg white solids...

**Wt/Vol., Packaging, Price:** Four x 2.5 oz. stakelets in 10 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1976, undated. “A Soy Protein Entree / Artificial Beef Flavor. Sizzling Good Flavor. Completely Meatless. Heat and Serve.” Frozen.

893. **Product Name:** Chik Stiks (Vegetarian Chicken Drumsticks).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1976.

**Ingredients:** Textured vegetable protein (soy protein isolate and concentrate, wheat gluten), egg whites, soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, onion, turmeric, extractives of spices, natural smoke flavor), partially hydrogenated soybean and cottonseed oil, potatoes, oat flour, sodium caseinate, modified tapioca starch, salt, yeast extract, carrageenan, sugar, niacinamide, etc.

**Wt/Vol., Packaging, Price:** 10 oz (283 gm) paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1980, dated. “A Vegetable Protein Product. Completely Meatless. Deliciously Satisfying.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

894. Clamp, Betty Ann. 1976. *Cooking with low-cost proteins: Nutritious, economical, and easy recipes using less familiar protein sources.* New York, NY: Arco Publishing Co. 176 p. Index. [27 ref]

• **Summary:** Contents: Introduction. What protein is. Foods which supply protein. Why we need protein. Protein’s relationship to a total menu plan. Recipes: Soybeans, tofu, textured vegetable protein (TVP), legumes, grains, nuts, and seeds, breads, eggs and cheese, meat stretchers, fish. References.

Given the relatively early date of this book, there is a fairly large amount of information about tofu, including nutritive value, cooking tips and 22 recipes. Some of this was supplied by The Quong Hop Company of South San Francisco. There are also 15 recipes using TVP [textured soy flour].

The author graduated Phi Beta Kappa and With Honors

from the University of California at Berkeley, with a major in Home Economics. After earning a Masters Degree from Cal in Nutrition, she taught home economics in high school for 5 years and is presently assistant prof. at Ohlone College in Fremont, California. Address: USA.

895. Dinaburg, Kathy; Akel, D’Ann Ausherman. 1976. *Nutrition survival kit: A natural foods recipe and reference guide.* San Francisco, California: Panjandrum Press and MidPress Productions. viii + 248 p. Illust. Index. 23 cm. [152 endnotes]

• **Summary:** This book advocates a natural-food (but not vegetarian; see p. 156-58) diet in place of a junk-food meat-centered diet.

Chapter 6, which emphasizes the importance of dietary fiber—found in whole grains and many other natural foods—advises (p. 110) that cooks use 2 tablespoons of soy granules for every cup (dry measure) of grain or grain product cooked. This will not affect the texture or taste, but it will usually raise the NPU to a level comparable to or greater than that of meat. On page 119 in this chapter is a recipe for Grainburgers (with soy grits or granules and “tamari sauce”).

The section on “Sprouts” (p. 164-66) includes soy sprouts (good stir fried) and sprouting instructions.

Chapter 8, titled “Meat is Bean Replaced” (p. 168-88) discusses: vegetarianism, federal meat inspection, DES (hormones in animal feeds), antibiotics in animal feeds, beef and cancer, world famine, meat and ecology, lost protein, protein, essential amino acids and Net Protein Utilization, cost of 100 gm of usable protein, nutritional value and cost comparison of meat and non-meat foods, mutual supplementation, the “cost” of meat protein, lingering meat myths, soybeans. Soy recipes: Soybeans (pressure cooked). Soybeans (not pressure cooked). Baked beans. Soy cheese (homemade tofu). Soybean curry. Mexican beans (soybean frijoles refritos). Soybean chili (incl. “vege burger”). Bean and/or grain patties.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Grainburgers” (or “Grainburger”).

Note 2. A paperback edition was published in May 1978 by Jove/HBJ.

896. Duquette, Susan. 1976. *Sunburst Farm family cookbook.* Santa Barbara, California: Woodbridge Press Publishing Co. 303 p. Illust. by Donna Wright. Photographs by Mehosh Dziadzio. From the Brotherhood of the Sun. Recipe index. 23 cm.

• **Summary:** “The Brotherhood of the Sun is a family of more than 300 people, who have dedicated themselves to living in harmony with all people and all things. Our desire is to follow the simple laws of God and nature. In order to create an environment in which this is possible, we have established four communities upon thousands of acres of

farm and ranch land in the coastal mountains around Santa Barbara, California... In order to help support ourselves and to share with other people our way of life, we have established a large organic foods complex in Santa Barbara called Sunburst Organic Foods.

"This organization includes a large wholesale warehouse that ships food to stores across the country, six large retail markets (with future markets projected along the coast), a community store, a restaurant called 'The Farmer and the Fisherman,' a whole-grain bakery and a fresh juice-bottling plant that distributes along the west coast."

Although this natural foods cookbook is not entirely vegetarian (it includes a chapter titled "Fish," p. 100-123, and many fish and shellfish recipes), the rest of the book is vegetarian and one long chapter (p. 64-99) is titled "Vegetarian Main Dishes." The illustrations are beautiful.

Soy-related recipes include: Tofu-vegie soup (p. 17). Miso-onion soup (p. 17). Many recipes topped with "Baco-bits." Bean salad (with soy beans, p. 35). Sprouts (incl. soy sprouts, p. 38-39). Tamari-onion gravy (p. 63). Enchiladas (filled with tofu or soy beans, p. 85). Corn pudding with Baco-Bits (p. 168). Soy flour cakes (pancakes, p. 268).

The chapter titled "Beans and pasta" (p. 124-39) has a section on Soybeans subtitled "Or: How to get protein without really trying." Recipes and descriptions include: How to cook whole soybeans (with or without pressure). Soybean loaf. Soyburgers. Soy milk. Tofu (curded with lemon juice or vinegar). Tamari and miso. Cheese-soybean soup. Soy nuts. Soy grits. Soy flakes. Soybean cheese spread.

The Glossary (p. 295-97) contains descriptions of gluten, lecithin (from the soybean), miso, protein powder, tamari, seaweeds, tofu. Address: Santa Barbara, California.

897. Friedlander, Barbara. 1976. *The Findhorn cookbook: An approach to cooking with consciousness*. New York, NY: Grosset & Dunlap. xv + 264 p. Introduction by David Spangler. Index. 23 cm. [20+ ref]

• **Summary:** A vegetarian cookbook created by this famous spiritual community at Findhorn, in northeastern Scotland, on a sandy, barren piece of land on a peninsula between the Firth of Moray (part of the North Sea) and Findhorn Bay. In 1962 Peter and Eileen Caddy, their three young sons, and a friend, Dorothy Maclean, came to live there (see photo, p. 76)—following spiritual guidance. Peter and Eileen are British.

Barbara first arrived at the Findhorn Caravan Park in Feb. 1974; she stayed for only 4 days. She returned later that year to live for 6 months, working primarily in the kitchen, to write this book. The first part of the book (to p. 21) is about the spirit and inspiring basic principles of the Findhorn community.

Soyfoods are mentioned occasionally throughout the book. Tamari may be used as a seasoning during sauté-steaming (p. 66). Tofu (bean curd) can be added to a variety

of dishes (p. 72). Soy-related recipes: "Soy bread" (made with soy flour plus wheat flour, and miso, p. 151). Baked soybeans (p. 164. "There are never enough recipes for this valuable bean"). Baked soyburgers (with cooked, mashed whole soybeans and miso, p. 164-65). Fried soyburgers (with cooked, mashed whole soybeans, soy oil, tamari, and miso, p. 165). Tamari ginger sauce (p. 220-21). Homemade tofu (makes 10 pints, p. 224-25. Curded with vinegar or lemon juice. Tofu can be added, cubed, to miso soup, used in tofu and scrambled eggs, or made into salad dressing).

Note: This is the earliest document seen (Jan. 2013) that contains the term "Baked soyburgers" (or "Baked soyburger," regardless of capitalization), or the term "Fried soyburgers."

898. Hensch, Bridget Ann. 1976. *Fast and feast: Food in medieval society*. University Park, Pennsylvania: Pennsylvania State University Press. 279 p. Illust. Index. 24 cm. [930\* endnotes]

• **Summary:** This wonderful, scholarly book, true to its title, is based mainly on English sources of the 13th, 14th, and 15th centuries. Supplementary material has been drawn from other countries and other periods. The book is of special interest because of its many references to early non-dairy milks and creams—made from almonds and served during Lent.

Contents: 1. Introduction. 2. Mealtimes. 3. Fast and feast. 4. Cook and kitchen. 5. Methods and menus. 6. Laying the table. 7. Manners maketh man. 8. Entertainment: Surprise and sotelty [subtlety]. Notes. Suggestions for further reading.

The two longest and most important fasts were Advent and Lent, which preceded the two greatest feasts of the year, Christmas and Easter. Lent is the season most widely associated with fasting. Its length, six weeks, was chosen to recall Jesus' 40-day fast in the wilderness. The tone is sober, a penance to be endured, a sacrifice. Farmers had to offer a tenth of their harvest to their lord or the parish priest. On Fridays, the amount eaten need not be decreased, but meat could not be eaten, and was usually replaced by fish.

But Lent came with many more hardships. Only one meal was officially allowed, and in the early years it could not be eaten until the early evening, after the hour of vespers. In a decree of 817 a collation, a very light snack, no more than a drink and a morsel of bread, could be eaten just before bedtime. During Lent, no meat of any kind could be eaten—but fish could be substituted—especially red herring, often dried or salted. This prohibition was often expanded to cover other animal products—butter, cheese, milk, and eggs. Eggs were usually not consumed after Shrove Tuesday; they reappeared hardboiled on Easter Sunday. Though dairy products were greatly liked by the people, and they must have been in greatest abundance during the late spring and early summer, the period right after the six weeks of Lent, their consumption was forbidden in strict practice. Milk

and cream could be replaced by their counterparts made of almonds. Liquor was widely consumed during Lent, and used in cooking. The last day before Lent, Shrove Tuesday, was a day of feasting, devouring all meat and eggs. Carnival was the days before and up to Shrove Tuesday. Lent began on Ash Wednesday.

“Provided it was too tiny to be deemed a meal, the most luxurious tidbit could be sucked and nibbled [such as] a morsel of almond butter, made from ground almonds pounded together and bound with sugar and rosewater,...” But these were expensive (p. 42).

Medieval recipe books indicate that, during Lent, cooks should use their skills to “find satisfactory substitutions for forbidden ingredients in familiar dishes.” Because no meat, eggs, or butter could be used, major changes had to be made. Cooks “relied heavily on the almond,” which added nourishment and good flavor to a meatless diet. Blanched, ground and steeped in water it yielded “milk of almonds.” *Latte di mandorla* is still a favorite drink in southern Italy. This almond “milk” was used as the basis for soups and stews, and as a binder for pastry. A 15th century cookbook\* offers two recipes, side by side, for little pastry turnovers; on fish days, milk of almonds takes the place of eggs (p. 44) (\* Napier Mrs. A., ed. 1882. *A Noble Boke off Cookry* London: Elliot Stock. p. 47).

Almonds could be steeped two or three times to yield several batches of milk. “A liquid thickened with ground almonds became something more substantial, a moist purée, and was known as ‘cream of almonds.’ On a fish day, this cream might be used in place of eggs or beef marrow to thicken a sauce. In a 15th century cookbook, at the end of a recipe for Custard lumbarde, we read: “Anf if hit be in lenton, take creme of Almondes, And leve [leave out] the egges And the Mary [marrow]” (Austin, T., ed. 1888. *Two Fifteenth Century Cookery Books*, EETS {Early English Text Society} OS [Original Series] 91, 1888, p. 74).

The *Household Accounts of Richard de Swinfield* (1855, vol. 59, p. 68) describe how, in the year 1289/90, Bishop Swinfield’s staff, unlocked their spice cupboards on Palm Sunday (the Sunday before Easter) “and transformed the obligatory fish dinner with almonds, sugar, ginger, and mustard” (p. 50).

Fried almonds were served around the edge of each bowl containing a white chicken stew to add color and a change of texture (p. 105) (See: Power, E., trans. 1928. *The Goodman of Paris* New York: Harcourt Brace, p. 264).

In the late 1200s, a draper in London, calculated the amount of money he had spent while courting a wealthy widow “on diverse deyntees as ffiges & reisis, almonds, prunes... pomegranats and oranges [figs, raisins, pomegranates, and oranges] (p. 113) (See: Thrupp, S. 1962. *The Merchant Class of Medieval London*. Ann Arbor, Michigan: University Press. p. 106-07).

Nuts were widely used in medieval recipes for their oil,

nutritional value, and taste, and to add contrasts of brown or white color and firm, crisp texture (p. 121). “They yielded an oil in which other foods could be fried, and they decorated the finished masterpiece. A mock-hedgehog... made its appearance on the table bristling with fried almonds” (*Two Fifteenth Century Cookery Books* p. 38).

Fried almonds could also be scattered over a white rice pudding to add their glistening brown color, but blanched almonds were called for with a pale purée of ground chicken and ground nuts (*Noble Boke* p. 109; *Two Fifteenth Century Cookery Books* p. 84).

To make pork pudding, ground pork, ground blanched almonds, and rice flour were simmered together. After chopped fried almonds were stirred in, the mixture was spooned onto a dish and decorated with more nuts and powdered ginger (*Two Fifteenth Century Cookery Books*, p. 28).

Page 122 gives details on almond cream and almond milk, how they were prepared and their role in medieval society. Almonds formed the base of two items mentioned repeatedly in recipe books, “almond cream and almond milk.” To make the cream, simply blanch almonds [drop into boiling water, shock in cold water, rub and pick off the skins], grind them, and mix with water. Some instructions say that the mixture should be “akurd thick”-like solid milk curds. Put mixture in a pot over a fire, stir as it comes to a boil and until nicely thickened. Empty contents of pot onto a cloth stretched above a bowl. Stroke the underside of the cloth with a ladle to draw off most of the excess liquid. Gather corners of cloth to form an improvised bag, and hang for an hour or two over the bowl until the last drops drain away. Remove the white fibrous almond pulp from the bag, sprinkle with sugar, decorate with red anise and green borage leaves, then serve like a pale, soft, plump sausage (*Noble Boke*, p. 42-43; *Two Fifteenth Century Cookery Books* p. 91-92).

Almond milk was thinner than almond cream. Ground almonds were steeped in any liquid (water, wine, ale, or a broth of meat or fish) to make a “milk” whose consistency varied from “thryfty,” or thin, to “good and styffe,” depending on the ration of almonds to liquid. This could also be served as a soup by adding spice or sugar plus crisp, twice-toasted bread (*Two Fifteenth Century Cookery Books* p. 91, 16; *Noble Boke*, p. 75-76).

But almond milk was more frequently used as one of any ingredients in a recipe. For a savory pudding, combine ground capon, boiled rice, and almond milk, or spiced meatballs set in a sauce of almond milk thickened with rice. For a sweet spiced pudding, simmer rice in almond milk then divide into three parts: leave one white, make the second yellow with saffron, and the third green with parsley. Arrange spoonfuls of each elegantly on the serving plate (*Two Fifteenth Century Cookery Books* p. 85, 34, 20). Almond milk “was a godsend during Lent,” for it provided

nutrients which were in short supply.

In the year 1405 Lawrence Chateres, the kitchen officer of Croyland Abbey, was mentioned with special approval in the abbey's chronicle because he "gave 40 pounds to supply almond milk to refresh the convent on fish days" (H.T. Riley, trans. 1854. *Ingulph's Chronicle of the Abbey of Croyland*. London: Bohn. p. 359).

Note: Bridget was born in the United Kingdom. As of May 1999, she and her husband are retired and living in State College, Pennsylvania. Address: Independent researcher, State College, Pennsylvania.

899. Lin, Florence. 1976. Florence Lin's Chinese vegetarian cookbook. New York, NY: Hawthorn Books. xix + 236 p. Illust. by Nai Gi. 24 cm.

• **Summary:** Contains a great deal of information on and recipes using soyfoods. Chinese food expert Barbara Tropp says this book has the best glossary available, and has very creative and interesting but drab recipes.

Hoisin sauce is a ground bean sauce to which sugar, garlic, and other flavorings have been added. It is the most popular commercially prepared flavored bean sauce.

Civilized Chinese patterns of eating were established by Confucius. The second great influence was Taoism, which advocated a simple diet, natural foods, and the basic belief that proper eating leads to good health. The third great influence was Buddhism, which was opposed to killing, so advocated a vegetarian diet. The art of vegetarian cookery was initially developed mainly in Buddhist monasteries; later it spread to private homes and restaurants.

To make good meatless broths use soybeans, soy sprouts, tough or wilted vegetables, mushrooms, and / or bamboo shoots. To make soy sprouts, it is best to use new-crop soybeans, which have the highest germination rate. This book contains many recipes that call for sea vegetables. Soy sauce is widely used in Chinese vegetarian recipes.

Chapter 3, titled "Soybeans, soybean products, and other legumes" contains much useful information and recipes. A diagram titled "Chart of soybean products" (p. 53) shows the complex relationships, includes Chinese characters for each product, and shows a few soy products that are not in the Glossary: Fermented soybean curd (*Fu ju*), comes in white (*pai*), red (*hung*) and spiced (*la*). The many interesting recipes, each with a Chinese name (with Chinese characters) and an English name include: *Su huo t'ui* and *su chi* (Mock ham), *Su ya* (mock pressed duck), and *Wu hsiang tou fu kan* (Seasoned pressed bean curd).

Glossary (soybeans, soybean products, and legumes, p. 208-13; Chinese characters are given): "Fresh young soybeans—*Mao tou*." Delicious. They are in season in the early fall. "They come in dark fuzzy pods and are sold by weight. Young soybeans are like corn and should be eaten as soon as they are picked from the plant. They may be cooked with or without the pods."

"Dried soybeans—*Huang tou*." Yellow soybeans.

"Soybean sprouts—*Huang tou ya*." Sold by weight. Best when made in cooler weather. "When bought fresh, they will keep in the refrigerator for 2-3 days, or longer if kept in a brown paper bag inside a plastic bag."

"Soybean milk—*Tou chiang*:... usually served hot as a beverage with breakfast."

"Soybean milk skin—Called by many names [*Fu yi*, *fu p'i*; see p. 53]. Each region has a different name for it, as does each food processor, and the thickness shape and wrapping may be different." Four kinds are readily available in Chinese food stores" (1) *Erh chu* is "cut into rectangles 1½ x 4 inches and 1/8 inch thick. The pieces some stacked and wrapped in paper, in half- or one-pound packages." (2) *Yüan chu* comes in sticks [dried yuba sticks]. When reconstituted, its thickness is about the same as *erh chu*. (3) *San pien fu chu* is half-moon shaped. When still soft, it is folded into 6 x 10-inch rectangles then dried. It is thinner than *erh chu*. (4) *Fu yi* "is the thinnest of the bean milk skins. It is paper thin and almost transparent. When dried it is very brittle, and must be handled very gently. It is used mainly to wrap fillings. It comes in stacks of 8-10 sheets..."

"Soybean milk residue—*Tou fu cha*," [okara]. Can be a delicious ingredient in cooking. "What is not used for food is made into a feed for animals or put into the ground as fertilizer."

"Curdled soybean milk—*Tou fu hua*." *Hua* means "flowers." These very tender curds are "eaten hot with soy sauce or cold with syrup as a snack." It is "sold only in bean curd factories by the pint."

"Bean curd coagulant—*Shou shih kao*" [calcium sulfate]: A "white substance which comes in powdered form. It is used to coagulate soybean milk to make *tou fu* (bean curd)."

"Tender soybean curd—*Nen tou fu*: When some water is removed from the curdled bean milk, it is known as fresh tender bean curd. It is cut into squares 4 x 4 by 1½ inches.

"Firm soybean curd—*Lao tou fu*: When a coagulant is added to the boiled bean milk of a different concentration and some of the water is removed, the milk becomes firm bean curd. It is firmer than the tender bean curd and is cut into 3 x 3 x 3/4-inch squares.

"Pressed bean curd sheet—*Pai yeh*: Fresh bean curd sheet looks almost like a sheet of unbleached muslin. When it is frozen, the color turns darker, to a light brown. It is made into square sheets of various sizes. It is used to wrap fillings and it is also sometimes cut into short strips and cooked in dishes along with seasoning vegetables. Pressed bean curd sheet is best eaten fresh..."

"Pressed soybean curd—*Tou fu kan*—plain: When even more water is pressed out of firm bean curd, it becomes pressed bean curd... it is almost like a firm cheese." It may be bought either plain (*Pai tou fu kan*) or seasoned (*Wu hsiang tou fu kan*). "The seasoned curd is cooked in soy sauce and star anise [*pa chiaol*], giving it a brown color." "The white

pressed bean curd should be soaked in salt water (made of 1 tablespoon salt to 4 cups water) in a covered container. The seasoned pressed bean curd should be soaked in salt water and soy sauce. If stored in the coldest part of the refrigerator, they will keep for several weeks.”

“Fried soybean curd—*Yu tou fu*:... The bean curd is cut into 1½ inch cubes and deep fried in oil until a golden crust forms outside, which the inside... remains soft.” It “is sold by weight, usually in half- or one-pound bags.”

“Wheat gluten—*Mien ching*:” (p. 217). “Deep-fried gluten—*Yu mien ching*:” “Fresh or dried wheat gluten—*K’ao fu*:”

Glossary (condiments and seasonings, p. 219-23): “Soy sauce—*Chiang yu*:” The “most important seasoning liquid in Chinese cooking. Comes in light or dark, thick or thin. Dark or thick is *Lao ch’ou*. Light or thin is *Sheng ch’ou*. Soy sauce also comes in different “flavors, such as mushroom soy sauce and, for nonvegetarians, shrimp roe soy sauce. Flavored soy sauces are used mainly for dips and for special flavors in salads, noodles, and as a final touch to a dish.”

Note: This is the earliest document seen (April 2012) that uses the term “mushroom soy” or the term “mushroom soy sauce” to refer to a type of dark soy sauce flavored with mushrooms, or that uses the term “Lao ch’ou” to refer to dark or thick Chinese soy sauce.

“Salted black beans—*Tou shih*:” These beans [fermented black soybeans] are “used to flavor bland foods, such as eggplant or bean curd.” They are never eaten alone.

“Brown bean sauce—*Yüan shai shih*:” Made from “fermented soybeans and wheat flour mixed with salt and water. The beans in the sauce may be either ground (to make ground brown bean sauce—*Mo yüen shih*), or left whole. To this basic beans sauce, spice and other seasonings are added [in different proportions], creating many varieties” in “different regions of China. In Szechuan, large amounts of hot peppers and crush Szechuan peppercorns are added; in the northern provinces, garlic and scallions are used;...”

“Hoisin sauce—*Hai hsien chiang*:” A “ground bean sauce to which sugar, garlic, and other flavorings have been added. It is the most popular commercially prepared flavored bean sauce. It is used for cooking, or very often as a dip for deep-fried batter-dipped vegetables.”

“Sesame paste—*Chih ma chiang*:” “Sesame oil—*Ma yu*:”

900. Liu, Christine Y.C. 1976. Nutrition and diet with Chinese cooking. [Ann Arbor, Michigan?]. [ix] + 319 p. Illust. (by Jacqueline Sharp). Recipe index. General index. 23 x 19 cm. Reprinted in 1977. [26 ref]

• **Summary:** Contents: Acknowledgment. 1. Introduction. 2. Is Chinese food nutritious?: The protein facts, other advantages. 3. About monosodium glutamate (MSG) (many recipes contain 1/8 teaspoon MSG—optional). 4. Custom, chopsticks and tea. 5. Method of preparation and cooking. 6. Cooking utensils. 7. Menu planning. 8. Recipes: Soup, meat,

poultry, seafood, vegetables, bean curd (to fu), rice, noodles and Chinese steamed bread, eggs, desserts and snacks.

9. Chinese ingredients and seasonings. 10. Tables and charts: Measurements and abbreviations. sources of important nutrients, desirable weight for selected heights (for men and women, small, medium or large frame. Source: Metropolitan Life Insurance Co.), minimum daily requirement of calories, certain vitamins and minerals, calories, protein, fat and carbohydrate value of foods used.

11. Recipe index. 12. References. General index. Order forms.

The chapter on “Bean curd “(to fu)” (p. 191-217) contains 22 recipes, each with the English name in bold characters, and the Chinese name both romanized in pinyin and written in Chinese characters. The first of these is a recipe for homemade tofu made from 1 cup soy beans and a choice of five different coagulants. The 2nd recipe in this chapter is “Fried bean curd (to fu), plain fried (*You dou fu*).

Note: This is the earliest English-language document seen (April 2013) that contains the term *You dou fu* (regardless of hyphenation).

For each recipe, the calories, protein, carbohydrates, and fat are calculated. Most recipes call for either “fresh bean curd” or “dry bean curd” (*dou fu gan*). A typical ingredient listing would be “1 lb bean curd, diced.”

Other recipes include: Those calling for soy bean sprouts (p. 40, 73, 185 {home grown}). Steamed fish with black beans (*Dou chi zheng yu*, with “3 T black beans {about one ounce}, p. 141). Lobster Cantonese style (with “1½ T black beans, minced,” p. 154). Wheat gluten (vegetable steaks) (*mian jing*, p. 186). Vegetarian’s delight (*Su shi jin*, with “2 oz. dried bean curd sticks [dried yuba sticks], soaked and cooked.” “Soak the dried bean curd sticks with 1 t [teaspoon] soda in hot water for 1 hour; drain. Add fresh cold water and bring to a boil. Drain and cut into 1 inch long pieces”) (p. 189-90). Red bean paste (*dou sha*) (p. 269). Many recipes are seasoned with soy sauce.

The section on “Chinese ingredients and seasonings” [glossary] includes: Bean curd or to fu, bean sprouts (the sprouts of mung beans or soy beans), black beans (“Fermented and highly seasoned black soy beans”), calcium sulfate, ginger root, hoisin sauce, monosodium glutamate, mushroom soy sauce (“A newly imported soy sauce from the People’s Republic of China... The flavor is excellent...”), oyster sauce (can be used like soy sauce but oyster sauce is saltier), sea weeds, sesame oil, soy sauce.

“About the author: Born and raised in Shanghai, Mainland China, Mrs. Liu completed her education at the National Taiwan University. It was there she met and married her husband, Stephen Liu, presently professor of Microbiology at Eastern Michigan University.

“After the birth of their eldest son, the Lius lived awhile in the United States, then moved to San Paulo, Brazil, where they remained for some years. The Chinese community in

Sao Paulo was sizeable and affluent and their cuisine was quite popular. It was during this time that Mrs. Liu kindled her latent interest in cooking which ultimately led to the writing of this book.

"In 1965 the Lius returned to the United States and settled in the Ypsilanti-Ann Arbor area. Mrs. Liu further developed an interest in and took up the study of nutrition at the University of Michigan. She received her Masters degree of Nutrition in the School of Public Health in 1971.

"For some eight years Christine Liu has contributed her cooking and teaching talent to the Ann Arbor community by teaching Creative Chinese Cooking and Nutrition & Diet at the Continuing Education Department of Ann Arbor Public Schools..." The Lius have four children: Ted, Paul, Becky, and Peter. A photo shows Christine Liu. Address: M.P.H., P.O. Box 1332, Ann Arbor, Michigan 48104.

901. Neufeld, Don F. 1976. Seventh-day Adventist encyclopedia, 2nd ed.: Nutana (Danish Food Factory). Washington, DC: Review and Herald Publishing Assoc. 1640 p. See p. 1015.

• **Summary:** "A health-food factory owned and operated by the Nordic Philanthropic Society in Copenhagen, Denmark. The factory was established by Dr. Carl Ottosen in 1898 to provide healthful food for the Skodsborg Sanitarium, which he had founded that year.

"In 1966 the factory moved from Copenhagen to the middle of Zealand between Koge and Ringsted.

"During the first years the chief items manufactured were bread made from whole wheat; various nut preparations, such as Nuttolene, Protose, and Granola; various malt preparations; and substitutes for coffee and tea. Today the newest product is soya-meat. Nutana produces products of corn, nuts, soybeans, and gluten, as well as vegetable margarine. The greatest sales are on vegetarian cutlets, soya-sausages, and pate. The total sales for 1973 was \$750,000. Nutana provides Denmark, Faroe Islands, Greenland, Finland, Iceland, Norway, and Sweden with products."

Note: This is the earliest document seen (Sept. 2014) concerning soy products in Iceland (probably). Nutana was selling soyfood products at this time, and it seems likely that some were going to Iceland. We know of no publications that clearly refer to soybeans or soybean products in Iceland, or the cultivation of soybeans there. Address: Washington, DC.

902. Ortiz, Elisabeth Lambert; Endo, Mitsuko. 1976. The complete book of Japanese cooking. Philadelphia, Pennsylvania: M. Evans and Co., Inc.; Dist. by Lippincott. viii + 250 p. Illust. by Marion Krupp. Index. 24 cm.

• **Summary:** A very interesting, well researched, and accurate Japanese cookbook. The illustrations are excellent. Each recipe has its Japanese name in large bold letters and a translation directly below in smaller letters. A hallmark

of her writing is that she prefers to use the native language words and terms (e.g., *shōyu*) rather before giving her translation of them (e.g., soy sauce). This is helpful, since many of her translations have not withstood the test of time. In some cases, however, she fails to catch nuances or chooses to ignore them; e.g., *momen tōfu* should actually be *momen-dōfu*, and *kinugoshi tōfu* should actually be *kinugoshi-dōfu*. Unfortunately, she uses the term "bean paste" to refer to two very different foods: miso and *azuki-an* (see p. 214, 242). A large number of recipes call for various types of *tōfu* ("bean curd") or *miso* ("bean paste)."

Seaweeds (p. 4): "The one single thing that distinguishes Japanese cooking is the use of seaweeds." Kombu is used to make dashi. Nori and wakame are use in many ways.

"The soy bean plays a dominant role in the Japanese kitchen. It comes in the form of *shōyu* (soy sauce), *usukuchi shōyu* (light soy sauce), *momen tōfu* (bean curd), *kinugoshi tōfu* (silky bean curd), *yakidōfu* (broiled bean curd), *koyadōfu* (freeze-dried bean curd), red and white *miso* (bean paste), and so on. Despite their common origin, the products of this versatile bean manage to be very different.

Note 1. This is the earliest document seen (April 2013) that uses the word "silky" or the term "silky bean curd" to refer to *kinugoshi tōfu*.

Note 2. This is the earliest English-language document seen (April 2013) that uses the term *koyadōfu* or the term "freeze-dried bean curd" to refer to dried-frozen tofu.

Soy-related recipes include: Asparagus with malted bean paste (with "moromi miso" and "usukuchi shoyu," p. 27). Dengaku (Bean curd with bean paste, p. 28). Stuffed lotus root (with white miso and mustard, p. 30). Noppei-jiru (vegetable and fried bean curd soup, with "1 *namaage* {type of fried bean curd}" or "2 pieces *aburaage* {fried bean curd}, p. 35). Kenchin-jiru (vegetable soup, with "1 *momen tōfu* {bean curd} weighing about 8 ounces," and "4 tablespoons *miso* {bean paste}, p. 36). Clear soup (*suimono*) with okra and bean curd (p. 38). Clear soup with bean curd and wakame (p. 38). Satsuma-jiru (Miso soup with mixed vegetables, incl. red and white miso, p. 45). Miso soup with tofu and shungiku (p. 46). Miso soup with wakame (incl. red and white miso, p. 46). Miso soup with oysters and bean curd (p. 47). Sekihan (pink rice with azuki beans, p. 57). Miso udon (p. 63). Kitsune udon (noodles with *aburaage*, p. 67). Inari-zushi (fried bean curd stuffed with vinegared rice, p. 79). Sole with bean curd and mushrooms (p. 88). Salmon steamed with bean curd (p. 90-91). Mackerel with red miso (p. 95). Fish marinated in miso (p. 102). Clams in miso, mustard, and vinegar sauce (p. 105). Oysters in vinegared miso sauce (p. 106). Satsuma-agé (with mackerel and bean curd cakes, p. 116-17). Oden (with "4 *ganmodoki* {fried bean curd balls}" and "1 *yakidōfu* {broiled bean curd}, about 7 ounces drained weight," p. 120-21). Kaki no dotenabe (oysters with bean paste, p. 124-25). Yudofu (simmered bean curd, p. 130). Sukiyaki (Sautéed beef and

vegetables, with “2 *yakidôfu* {broiled bean curd}, 134-35). Grilled beef with bean paste (p. 146). Nikumiso (chicken and vegetables pickled in bean paste, p. 159). Eggplant with bean paste (p. 163). Green beans with bean paste (p. 168). Daikon with fried tofu (p. 171). Turnips with bean paste (p. 173). Cucumber and soy bean sprouts with sesame seeds (p. 183). Spinach salad with tofu (p. 186).

A short section titled “Bean curd dishes” (p. 187) notes that “the soy bean is the youngest of the bean family, going back only to about 3500 B.C.” Beans in the Middle East go back to 7000 B.C. and in Mexico they go back to 5000 B.C. But the soy bean “makes up in versatility what it lacks in age.”

Recipes Fried bean curd with hijiki (with “2 pieces *aburaage* {fried bean curd},” p. 187). Sole with bean curd (188-89). Deep-fried bean curd with bonito flakes (p. 190). Dried bean curd with vegetables (with “4 *kôyadôfu* {dried bean curd}” and “2 teaspoons *usukuchi shôyu* {light soy sauce}, p. 191). Kûya-mushi (bean curd, chicken, and vegetable custard, p. 192-93). Simmered bean curd and chicken (p. 193). Takara bukuro (treasure bags with *aburaage*, p. 194). Tofu no shirô-ae (p. 195). Hiya-yakko (garnished cold bean curd, p. 196; *Kinugoshi tôfu* {silky bean curd} may be used). Chrysanthemum flower bean curd (p. 197). Nabeyaki Denraku [Dengaku?] (bean curd with white and red bean paste, p. 198). Pork with bean curd (p. 198-99). Ni-yakko (bean curd with dried bonito flakes, p. 199). Sokuseki misozuke (instant pickled vegetables with bean paste, p. 210). Koshi-an (red bean paste, with “1½ red *azuki* {adzuki} beans,” p. 213-15). New year dishes: Kuromame (black soy beans simmered in soy sauce and sugar, p. 220).

Glossary (excellent, p. 228-36)—Soy-related terms: *Aburaage*, *azuki* bean, *fu* (wheat gluten cake), *ganmodoki*, *kinako*, *kinugoshi tôfu*, *kôji*, *koshi-an* (powdered *azuki* paste), *kôyadôfu*, *kôridôfu*, *kuzuko*, *mirin*, *miso*, *misozuke*, *mochi*, *momen tôfu*, *moromi miso*, *namaage*, *nattô*, *shôyu*, *teriyaki* (“a technique of glazing foods in a soy sauce and *mirin* mixture either in a skillet or on a grill”), *tôfu* (“soy bean curd, usually refers to *momen tôfu*”), *umeboshi*, *usukuchi shôyu*, *yakidôfu*, *yuba*. Address: Both: New York.

903. Ranill, June. 1976. The El Molino cookbook: Natural wholegrain foods from El Molino & CaraCoa. El Molino Mills, A division of ACG Co., Box 2250, City of Industry, CA 91476. 144 p. Illust. Index. 22 cm. Spiral bound.

• **Summary:** Contents: Part I: Description of grains, seeds, legumes & carob (1-2 pages about each with an illustration; barley, buckwheat, corn, millet, oats, brown rice, rye, triticale, wheat, alfalfa seed, chia seed, flaxseed, pumpkin seed, sesame seed, sunflower seed, lentils, mung beans, split peas, soybeans {p. 22-23}, carob, El Molino and CaraCoa products).

Part II: How to use and enjoy whole grains, seeds, legumes. Part III: Recipes (by Alice Walter).

This year El Molino Mills celebrates its 50th anniversary; thus it was founded in 1926. Soya powder is like soya flour, but it is more finely ground for use in beverages. “Soy flour is made from the raw bean, while soya flour is made from soybeans that have been lightly toasted. This ‘toasting,’ actually a moist heat treatment, enhances the flavor.” El Molino soya flour is full-fat flour.

El Molino products (p. 26) include Soybeans (whole cooks best), and Carob coated soynuts. No soy flour or powder is mentioned.

Soybeans, soya flour, grits, and powder are used extensively throughout his book. White bread (with soy flour, p. 46). Honey oatmeal bread (p. 48). Cornell bread (p. 50). Soya bread (p. 51; 4.5 cups wheat flour and 1.5 cups soya flour, so 25% soya flour). Improved quickbreads (p. 68). Crunchy muffins (with soya grits, p. 70). Homemade muffin mix. Soya muffins (p. 72). Gluten sesame thins (p. 74). Homemade Granola (with 1 cup El Molino soya flour, p. 75). Soy nuts. Garlic soy nuts. Roasted soybeans (p. 85). Carob breakfast drink (with 1 tablespoon El Molino soya powder, p. 88). Bean salad (featuring soybeans, p. 92). Meatloaf (with soya grits, p. 97). Soybean loaf. Baked soybeans. Soybean chili (p. 101).

The section titled “Meatless dishes” (p. 102-112) features many soy and many gluten recipes: Soybean medley. Cooked soybeans (Basic). Soy cakes. Soybean paste (ground cooked soybeans). Stuffed peppers. Stuffed tomatoes (both with soybean paste). Baked soybean croquettes. Softened soya grits. Stuffed zucchini (with softened soya grits). Tofu (from soybeans curded with lemon juice). Soy cheese (made from soya powder). Cooked gluten (homemade, p. 110). Gluten cutlets. Gluten patties. Gluten roast. Eggs and soya grits.

Soya milk (from soya powder, p. 115). Pineapple soya cocktail (with soya powder, p. 116). Soya applesauce cake (with soya flour or powder, p. 119). Improved cakes (p. 122). Peanut butter cookies (with soya flour, p. 125). Improved cookies (p. 128). Cookies for your puppy dog (p. 130). Sesame carob balls. Carob nut log (p. 137).

Sesame seed: On page 17 is a full page about sesame seeds and their uses, with an illustration of the sesame plant and its seeds. The Index contains more than 45 entries for “Sesame” including: Sesame butter (p. 17, 87). Sesame granola bars (p. 84). Sesame halvah (p. 17). Sesame milk (p. 17, 115). Sesame in muesli (p. 76). Sesame tahini dressing (p. 93). Address: City of Industry, California.

904. Smith, Oak B. 1976. Textured vegetable proteins. In: L.D. Hill, ed. 1976. World Soybean Research [Conference I: Proceedings]. Danville, Illinois: Interstate Printers and Publishers, Inc. xvii + 1073 p. See p. 861-82. [6 ref]

• **Summary:** Contents: Introduction. Principles of extrusion-cooking. Methodology of extrusion-cooking. The processing of meat extenders from defatted soy flakes, flours, or

concentrates. The new Wenger meat analog process using defatted vegetable protein flours or reground flakes.

“A new concept of meat analogs has now been introduced, this being a double extrusion process which produces products of even and parallel layers, untwisted, devoid of pockets, and structured to have the appearance, mouthfeel, and texture of meat.”

Photos show: (3) Solvent extracted soy flakes—uncooked (magnification x 400). (4) Extrusion-cooked chunk style meat extender. (5) Extrusion-cooked solvent extracted soy flour as a meat extender (magnification x 20). (6) Extrusion-cooker designed for sanitation and complete clean out after each production run. (7) Which two bites are the ham? The two larger bites are ham. The two smaller bites are mini-bites of Uni-Text processed material. (8) Beeflike Uni-Text retorted for 110 minutes at 15 PSI. (9) Uncolored Uni-Text processed material. It has a light color but accepts colors and flavors easily. (10) Dried product produced by the Uni-Text process to resemble ham. (11) The same piece pictured (in dry form) in Figure 10 after rehydration in boiling water. (12) Very dense, Uni-Text process material not rehydrated (magnification x 139). (13) Thin, parallel, untwisted structure, free of pockets and possessed of meatlike structure (magnification x 39). (14) Analog with somewhat thicker layers than Figure 13 after rehydration in boiling water (magnification x 39). (16) A smaller size of Uni-Text double extrusion-cooking equipment.

Figures show: (1) Cutaway view of large capacity / short time / high temperature extrusion cooker. (2) Flow sheet for production of meat extenders. (15) Flow sheet for the production of Uni-Text process meat analogs. Address: President, Wenger International, Kansas City, Missouri.

905. Wang, H.L.; Mustakas, G.C.; Wolf, W.J.; Wang, L.C.; Hesseltine, C.W.; Bagley, E.B. 1976. An inventory of information on the utilization of unprocessed and simply processed soybeans as human food. Peoria, Illinois: USDA Northern Regional Research Center, Interdepartmental Report. AID AG/TAB-225-12-76. 197 p. AID contract report. Undated. No index. 27 cm. Spiral bound. [65 ref]

• **Summary:** Contents: Introduction. Home and village traditional soybean foods by country. 1. Soybean food uses and production in Asia. Soaking dry soybeans. In China: Tou chiang (soybean milk; preparation, ways of serving), tou fu (soybean curd; yen-lu is the Chinese name for nigari), tou fu nao (soft curd), tou fu kan (dry / firm bean curd), chien chang (pressed tofu sheets), yu tou fu (fried tou fu), tung tou fu (frozen tou fu), tou fu pi (protein-lipid film; yuba), huang tou ya (yellow bean sprout or soybean sprout), mao tou (hairy bean, green soybean, or immature soybean), dry soybeans (roasting and frying, stewing and boiling), roasted soybean flour. Fermented soybean foods. Production and consumption of soybeans (China and Taiwan).

Japan: Tofu (soybean curd), kinugoshi tofu, processed

tofu products (aburage or age, nama-age and ganmo), kori tofu (dried-frozen tofu), yaki tofu (grill tofu), yuba (protein-lipid film), soybean milk, gô (ground soybean mash), daizu no moyashi (soybean sprouts), edamame (green vegetable soybeans), whole soybeans, kinako. Fermented soybean foods: Production and consumption.

Korea: Tubu (soybean curd), soybean sprouts, whole soybeans (green soybeans, parched or roasted soybeans, boiled soybeans), soybean flour (“Soybeans are first roasted and then ground to a flour. The flour is extensively used as an ingredient in various food preparations.” Note: This is the earliest document seen (Nov. 2012) that mentions roasted whole soy flour in Korea—however no Korean name of this roasted soybean flour is given), soysauce, bean paste [Korean soybean miso], natto (no Korean name is given), production and consumption of soybeans.

Indonesia: Tahu or tahoo (soybean curd), bubuk kedele (soybean powder), tempe kedele, tempe gembus [the name in Central and East Java for okara tempeh], oncom tahu [the name in West Java for okara onchom], other soybean products (soybean sprouts, green soybeans, roasted and boiled soybeans, kecap or soysauce, tauco or bean paste [miso]), food mixtures (Saridele, Tempe-fish-rice or TFR, Soy-rice baby food, soybean residue [okara]-fish-rice), production and consumption of soybeans.

To make bubuk kedele (p. 58): “Soybeans of the white variety are roasted until no beany flavor can be detected. They are ground into a powder and mixed with such spices as garlic and chili. Bubuk kedele is kept in a jar and served on special occasions with a rice product, longtong (rice wrapped in banana leaves and boiled for 3 to 4 hours). Bubuk kedele is always homemade and is eaten by everyone” (Source: I. Gandjar 1976, personal communication).

Note 1. This is the earliest English-language document seen (Nov. 2012) that uses the word *bubuk* or the term *bubuk kedele* to refer to Indonesian roasted soy flour.

Thailand. Philippines: Soybean sprouts, soybean coffee, soybean cake (made from equal amounts of soybean flour and wheat flour), soybean milk, tou fu and processed tou fu products, production and consumption. Burma. India. Malaysia. Nepal. Singapore. Sri Lanka (Ceylon). Vietnam. West Asia [Middle East; Iran and Turkey]. References—Soybean food uses in Asia.

2. Soybean food uses and production in Africa. Ethiopia: Injera, wots and allichas, kitta, dabbo, dabokolo, porridge. Kenya. Morocco. Nigeria: Whole soybeans, soybean paste, corn-soy mixtures (soy-ogi). Tanzania. Uganda. Production. References—Soybean food uses in Africa.

3. Soybean food uses and production in Europe [both Eastern and Western]. 4. Soybean food uses and production in Latin America. Argentina. Bolivia. Brazil. Chile. Colombia. Ecuador. Guyana. Paraguay. Peru. Uruguay. Venezuela (fried arepas with textured soy). Mexico: New village process, commercial developments of soy-based

food products, Gilford Harrison, Ruth Orellana, Seguras Social. Honduras. Costa Rica. Panama. Dominican Republic. Jamaica. Haiti. Trinidad. References—Soybean food uses in Latin America.

5. Soybean food uses and production in North America. United States: Oriental populations, vegetarian communes, The Farm in Tennessee. Canada. References—Soybean food uses in North America. 6. Soybean food uses in Oceania. Australia. New Zealand. 7. Summary of soybean food uses. Traditional soybean foods: Soybean milk, soybean curd and processed soybean curd products, protein-lipid film, soybean sprouts, tempe (tempeh), green soybeans, boiled soybeans, roasted soybeans, soybean flour, soysauce, fermented soybean paste, fermented whole soybeans [Toushih, hamanatto], natto, fermented soybean curd. Experimental soybean foods: Whole soybean foods, soybean paste, soy flour, soy beverage. Production and consumption.

8. Recent simple soybean processes, other than traditional. Simple village process for processing whole soybeans: Equipment, process, sanitation requirements, quality of product, evaluation of product in formulas and procedures for family and institutional use in developing countries. NRRC village process. Foods from whole soybeans developed at the University of Illinois (drum dried flakes, canned and homecooked soybeans, soy beverages and beverage products, spreads, snacks).

Ways of cooking and serving soybeans in the American diet. 9. Industrial processes. Industrial production and selling prices of edible soybean protein products. 10. Barriers to acceptability and utilization of soybeans in food and research recommendations: Availability. Cultural and social factors. Texture. Flavor. Nutrition and food safety. Technology development. Technology transfer. Research recommendations [concerning each of the above barriers].

Concerning Morocco: Cereal-soy blends have been used extensively in Morocco; in fiscal year 1974 some 14.7 million lb were shipped to Morocco. Mmbaga (1975) reported that soy flour is being used in making porridge, with 1 part soy flour to 3 parts maize / corn flour.

Tables show: (1) Soybean production and imports in Taiwan, 1962-1975 (tonnes = metric tons, p. 33). Production rose from a 53,000 tonnes in 1962 to a peak of 75,200 tonnes in 1967, then fell to 61,900 tonnes in 1975. Imports skyrocketed from 62,400 tonnes in 1962 to a record 827,300 tonnes in 1975. (2) Consumption of soybean foods in Taiwan, 1964-1974 (kg/capita/year, p. 34). Total soybean foods not including tofu rose from 1.08 kg in 1964 to a peak of 2.61 kg in 1972 then fell to 1.99 kg in 1974. Consumption of tofu (80% water) rose from 18.75 kg in 1964 to a peak of 33.89 kg in 1972, then fell to 32.04 kg in 1974. (3) Supply and disposition of soybeans in Japan, 1971-1974 (p. 49). Total supply is beginning stocks, plus domestic production, and imports. Total disposition is crushing, plus traditional foods and feed. In 1974 imports accounted for 87.5% of the

supply, and crushing accounted for 71.0% of the disposition. (4) Whole soybeans used in the production of traditional foods in Japan, 1970-74 (tonnes / metric tons, p. 50). Tofu and others rose from 508,000 in 1970 to 539,000 in 1974. Miso rose from 177,000 in 1970 to 192,000 in 1974. Shoyu rose from 13,000 in 1970 to 14,000 in 1974. (5) Defatted soybean meal used in the production of traditional foods in Japan, 1970-74 (tonnes / metric tons, p. 51). Shoyu rose from 163,000 in 1970 to 176,000 in 1974. Tofu and others was constant at 130,000 from 1971 to 1973. Miso decreased from 4,000 in 1970 to 2,000 in 1974. (6) Production of traditional soybean foods in Japan, 1970-74 (tonnes / metric tons, p. 52). Tofu and others rose from 1,867,800 in 1970 to 2,264,900 in 1973. Shoyu rose from 1,334,1000 in 1970 to 1,455,800 in 1974. Miso rose from 552,200 in 1970 to 587,200 in 1974. (7) Production and food use of beans [various types] and consumption of some soybean products in Korea, 1964-1967 (p. 56-57). In 1967 consumption (in tonnes / metric tons) was: Bean curd 290,000. Bean sprouts 270,000. Bean sauce 69,700. Bean paste 27,700. Total: 11.6 kg per capita per year. (8) Soybean production in Indonesia, 1960-1974 (p. 65). It rose from 442,862 tons in 1960 to 550,000 tons in 1974. (9) Consumption of soybeans in various parts of Indonesia in 1970 (p. 66). (10) Production of soybean foods in the province of Central Java, 1968-1972 (tons, p. 67). Kecap rose from 914,695 in 1968 to 1,524,000 in 1972. Tahu decreased from 18,570 in 1978 to 17,000 in 1972. Tempe rose from 506 in 1968 to 39,000 in 1972. (11) Area planted to soybeans and total soybean production in Thailand, 1964-1974 (p. 70). Area rose from 213,000 rais (6.25 rais = 1 ha) in 1964 to 1,016,000 rais in 1974. Production (in metric tons) rose from 31,300 in 1964 to 252,400 in 1974. (12) Utilization of soybeans by soybean-consuming countries, 1964-66 (based on FAO 1971 Food Balance Sheets, 1964-66 average, p. 150). The countries leading in per capita consumption (kg/person/year) are: China (PRC) 6.7. Japan 5.1. Korea(s) 5.0. Singapore 4.3. Indonesia 2.8. Malaysia 2.6. Taiwan (ROC) 1.1. (13) Amounts of cereal-soy blends distributed under Title II, Public Law 480 in fiscal year 1974 (p. 152-155). (14) U.S. exports of full-fat soy flour, 1974-75 (p. 156). Address: Northern Regional Research Center, Agricultural Research Service, Department of Agriculture, Peoria, Illinois 61604.

906. Winarno, F.G.; Hardjo, S.; Rumawas, F. 1976. The present status of soybean in Indonesia. Bogor, Indonesia: FATEMETA, Bogor Agriculture University. xxiii + 128 p. 29 cm. [7 ref]

• **Summary:** The best and most comprehensive survey up to this time on the subject, it was done as part of the 1974 Industrial Census of the Central Bureau of Statistics. Full of valuable statistics and tables. Contents. Preface. Summary. List of tables. List of figures. I. Introduction. II. Objectives and survey methods: A. Objectives. B. Survey methods. III. Cultivation, product handling and protection: A. Botany

of the soybean. B. Varieties. C. Growth requirements. D. Agronomy of soybean. E. Crop Management. F. Harvesting and product handling.

IV. Production: A. Harvested acreage, production and average soybean yield in Indonesia. B. Center production areas. C. Harvested acreage of soybean versus other food crops. D. Factors affecting soybean production. V. Farm management and soybean marketing in Indonesia: A. Farm management. B. Marketing of soybean.

VI. Soybean utilization (p. 52): A. Soybean products: Introduction, yuba, sere (from Bali: cooked whole soybeans, mixed with onions, hot pepper, turmeric, salt, and coconut presscake; molded into patties, sun dried, then deep fried), soybean milk, tofu (coagulated with *biang* or *sioko* {calcium sulphate}), soybean sprouts (*tauge*), soybean powder (soybeans that have been cooked, dried, dehulled, and pounded), soybean mixtures, kecap (Indonesian soy sauce), oncom (fermented soybean product, red or black), tauco (Indonesian-style miso), tempe. B. Soybean utilization: Utilization by farmer (in each of 6 provinces and total), utilization by processor (tempe, tofu, kecap, miscellaneous), census conducted by Central Bureau of Statistics, conversion factor for soybean products. C. Consumption of soybean and its processed products (by province). D. Other components. Appendixes.

Tables in body of text: (1) Brief description of recommended soybean varieties. (2-3). Insecticides used against *Agromyza* and *Phaedonia inclusa*. (4) Soybean harvest seasons in Indonesia (major harvest months, by province). (5-8) Harvested acreage, production, and average soybean yield during 1950-73, 1960-74, and in Java-Madura (1967-71, 1972, 1973, and 1974). (9) Soybean acreage in Java-Madura. (10) Major production areas in Java-Madura, and average 5-year yield, 1965-69. (11) Harvested acreage of soybeans vs. other crops in Java-Madura, 1971-72. (12) Production cost and value per hectare of soybeans. (13) Major trading and harvest months. (14-15) Percentage of farmer's share and marketing cost of the trade price in various provinces. (16) Percentage of farmer's share of the trade price. (17) Soybean utilization by farmers, 1975-76. (18-21) Production/consumption of tempeh, tofu, kecap, tauco, taugé, yuba, and sere.

(22-29) Raw material utilized by small-scale processors and by soybean home industries in Java and Jakarta. (30-31) Value of raw material and end products of small-scale industries over 3- and 12-month periods. (32) Conversion factor of soybean products to raw material. (33-36) Average daily consumption per capita of soybean and its processed products at villages in Lampung, Yogyakarta, East and West Java, and in 4 other provinces.

Concerning sprouts (*tauge*) in Indonesia (p. 67, 69): Tauge can be prepared from either soybean or mungbean. The average amount of soybean processed into taugé is about 8 qt [=quintal; 1 quintal = 100 kg = 220.46 lb] per year

per processor. The average number of employees is 1 per processor with 30 workdays per month. The entire product is for sale.

Table 33 (p. 84), "Average daily consumption per capita of soybean and its processed products at several villages in Lampung (a province of Indonesia located on the southern tip of the island of Sumatra) is: Tempe 18.33 gm. Soy sprouts 6.51 gm. Tofu 3.36 gm. Oncom 2.34 gm. Soybean 0.29 gm. Okara tempeh 0.25 gm. Okara 0.03 gm.

Table 34 (p. 85), "Average daily consumption per capita of soybean and its processed products at several villages in Yogyakarta and East Java is: Tempe 20.08 / 4.63 gm. Soy sprouts 1.57 / 3.05 gm. Tofu 1.83 / 4.24 gm. Okara tempe 0.53 / NL gm. Soybean 0.35 / 1.07 gm. Okara tempeh 0.25 gm. Okara 0.03 gm.

Table 36 (p. 87), "Average daily consumption per capita of soybean and its processed products of sample family farmers in 4 provinces.

Tempe consumption is highest in Yogyakarta (20.08 gm) followed by Lampung (18.33), Tulungagung (4.63) and West Java (4.42).

Tofu consumption is highest in Tulungagung (4.42 gm) followed by Lampung (3.36), Yogyakarta (1.83) and West Java (0.78).

Soybean sprout consumption is highest in Lampung (6.51 gm) followed by Tulungagung (3.05) and Yogyakarta (1.57); no value is given for West Java.

Oncom [ontjom] consumption is highest in Lampung (2.34 gm) followed by West Java (0.69). Address: FATEMETA, Bogor Agricultural Univ., Indonesia.

907. Wilson, Barry. 1977. Soya meat on the threshold of a boom. *Agra Europe (London)* No. 706. p. M/3-M/8. Jan. 7. • **Summary:** By "soya meat" or "vegetable meat" the writer means "TVP (textured vegetable protein)" which is actually textured soy flour (defatted). A good history of TVP in Britain and Europe; it was launched in Britain three years ago at a time when the UK and most of western Europe was beginning an unprecedented beef glut. With beef prices low, TVP struggled.

During the second half of 1976 TVP sales began to increase and they are expected to increase even faster in 1977.

The launch of Kesp (a spun soy protein product) by Courtaulds in 1973 was a fiasco.

Manufacturers of TVP in the UK include: (1) British Arkady, Old Trafford, Manchester. (2) Spillers (Lucas & Co.), Kingswood, Bristol. (3) British Soya Products, Puckeridge, Herts. [Hertfordshire]. (4) Courtaulds, Kesp Protein Foods, Coventry. (5) GMB Proteins, Blackhorse Lane, London. (6) Miles Laboratories, Slough, Bucks.

The names of six distributors and five users are also given.

"There is no doubt that British Arkady has the lion's

share of the British TVP human consumption market.” The best guess is that British Arkady now has about 40-50% of the UK market, followed by Spillers, then British Soya Products.

It is clear that all the raw material for the TVP [defatted soy flour] sold in the UK is imported from the United States. Briefly describes five commercial products that are on the market. Address: London.

908. DeMasters, Carol. 1977. Research to feed the world. *Milwaukee Sentinel (Wisconsin)*. Jan. 20. p. 1, 7.

• **Summary:** About the work of William Shurtleff and Akiko Aoyagi, directors of the New-Age Foods Study Center, with tofu and miso. “The world food crisis is their *raison d’être*.” They are “ardently devoted to finding alternative protein sources to those commonly used in the world—chiefly meat, poultry, and fish.” Contains 4 recipes plus a photo of the two with their Book of Tofu. Address: Sentinel Food Editor.

909. *Food Engineering*. 1977. Central Soya acquires rights to General Mills’ vegetable protein technology. 49(1):43. Jan.

• **Summary:** General Mills retains certain manufacturing rights for its own internal need and will continue to develop consumer branded protein items such as its successful Bac-Os and Bac-O-Bits. Central Soya will install the steam texturizing operation at its Gibson City Illinois soy protein plant.

910. Kagawa, Ryo. 1977. Shokuhin seibunhyô [Food composition tables for Japan]. Tokyo: Joshi Eiyo Daigaku Shuppan-bu. 145 p. Jan. 15 x 22 cm. [Jap]

• **Summary:** For tables of information on soybeans and soyfoods, see p. 21-22. Includes Kinako, soymilk, regular tofu, kinugoshi tofu, fukuro-iri tofu, yaki-dofu, abura-age, namaage, ganmodoki, kori-dofu, yuba, okara, natto, hamanatto, miso, red miso, light yellow salty miso, red salty miso, soybean miso, powdered miso. Address: Japan.

911. Shurtleff, William; Aoyagi, Akiko. 1977. What is tempeh? Lafayette, California: New-Age Foods Study Center. 14 p. Unpublished manuscript. Jan. Published as a 4-page tan leaflet later in 1977 with the addition of 4 Los Angeles tempeh shops. Revised, published edition, Oct. 1980. Also reprinted by many tempeh shops under their logo. Unpublished manuscript.

• **Summary:** Contents: Introduction. A rich source of nutrients. Tempeh in Indonesia. A brief history of tempeh. Making tempeh at home: Homemade soy tempeh (using 2½ cups soybeans), homemade okara- or coconut press-cake tempeh, homemade grain- or grain & soy tempeh. Storing & preserving tempeh. Favorite tempeh recipes: Deep-fried tempeh. Pan-fried tempeh. Tempeh chips. Tempeh, lettuce & tomato sandwich. Tempeh burger, and 11 others. Soybeans

and the world food crisis. Making tempeh starter at home. Making tempeh in a community or commercial shop. People & institutions connected with tempeh: Research scholars and institutes in North America, tempeh shops in America (7), individuals interested in tempeh in America (4), research scholars and institutes in Indonesia and Japan (5). Address: 790 Los Palos Dr., Lafayette, California 94549.

912. Oblinger, Jan. 1977. Tofu, nutty burgers served on ‘veggie line’ at UMO. *Bangor Daily News (Maine)*. Feb. 16. p. 6.

• **Summary:** “Students at the University of Maine at Orono are eating strange things these days. And they’ve never been healthier. The Office of Dining Services is making available to students a vegetarian menu in addition to the regular meat and potatoes fare served in the campus’ dining halls.” Included on the unique menu are tofu burgers—“a small part of the college’s campaign to get more vegetables and less meat to those students who want it.” Many students who eat at the veggie line do not consider themselves vegetarians; they just like the food. The Bear’s Den, a student restaurant at the Memorial Union, now offers a tofu salad sandwich, as well as a meatless “nutty burger” based on cottage cheese.

“According to UMO’s assistant manager of dining services, Anne Johnson, tofu is purchased from Peter and Judy Beane of the No-moo Dairy in South Portland [Maine], the only source north of Boston [Massachusetts]... Some of the other hard-to-find items are bought through a Boston company named Erewhon.”

“The university learned about tofu in a book by Bill Shurtleff and Akiko Aoyagi, who demonstrated cooking with tofu and miso at the college in November. They showed how to prepare tofu or miso for less than eight-and-a-half cents a pound.”

Contains “veggie” recipes for Nuttyburger, and Maveric Chili (with 1 cup whole soybeans). Five photos show students “dining on the tofuburger,” which contains soybean curd, carrots, onions, and sunflowers. Most said the flavor “was hard to describe. Several said it tasted a lot like a fish sandwich.” Address: Daily News Staff.

913. **Product Name:** Cedar Lake Meatless Terkettes.

**Manufacturer’s Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).

**Manufacturer’s Address:** Cedar Lake, MI 48812.

**Date of Introduction:** 1977 March.

**Ingredients:** Wheat protein, whole wheat flour, water, vegetable seasoning, salt.

**Wt/Vol., Packaging, Price:** 19 oz (1 lb 3 oz) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label (redesigned; printed 12 March 1977) sent to Soyfoods Center by Cedar Lake Foods. 4¼ x 11 inches. Blue, red, brown and black on white. “Other tasty and nutritional products from Cedar Lake Foods

include: Peanut Butter. Vegeburger. Vege-Bits. Sloppy Joe. Soynut Loaf. Chipettes. Hostess Cuts. Tender Tips. Chops. Breeding Meal.” “Cedar Lake Foods assist in supplying the nutritional needs of many people who prefer a meatless diet.”

914. **Product Name:** Cedar Lake Meatless Tender Tips.

**Manufacturer’s Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).

**Manufacturer’s Address:** Cedar Lake, MI 48812.

**Date of Introduction:** 1977 March.

**Ingredients:** Wheat protein, water, vegetable seasoning, salt.

**Wt/Vol., Packaging, Price:** 19 oz (1 lb 3 oz) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label (redesigned; printed 12 March 1977) sent to Soyfoods Center by Cedar Lake Foods. 4¼ x 11 inches. Blue, red, brown and black on white. “Other tasty and nutritional products from Cedar Lake Foods include: Peanut Butter. Vegeburger. Vege-Bits. Sloppy Joe. Soynut Loaf. Chipettes. Hostess Cuts. Tender Tips. Chops. Breeding Meal.” “Cedar Lake Foods assist in supplying the nutritional needs of many people who prefer a meatless diet.”

915. *Wall Street Journal*. 1977. Miles Laboratories says ‘76 sales of some foods trailed expectations. April 7.

• **Summary:** The company’s annual report stated that sales of textured vegetable protein food products have not reached expectations. In 1976 the company’s Morningstar Farms breakfast line of Links, Patties, Slices, and Strips lost money for the 2nd year in a row. A new product, Scramblers, has shows good acceptance in test marketing. Two new products are Grillers (a hamburger-like patty) and Stakelets (which tastes like a chapped steak). One promising fact is that 56% of all U.S. families “have one or more members concerned about the cholesterol in their diet.”

916. **Product Name:** Ranch House Sizzleberg, Savoury Macaroni with TVP (Mix), Soysage, Seasavour.

**Manufacturer’s Name:** Direct Foods Ltd.

**Manufacturer’s Address:** Bedford Rd., Petersfield, Hampshire, GU32 3EW, England. Phone: Petersfield 4911/2.

**Date of Introduction:** 1977 April.

**Ingredients:** Macaroni Mix: Wholemeal macaroni, textured soya protein, dehydrated onions, green bell peppers, peas, mushrooms, vegetable oil, sea salt, corn flour, raw sugar, yeast extract, spices, herbs.

**Wt/Vol., Packaging, Price:** Macaroni: 141 gm plastic bags for ½ pound.

**How Stored:** Shelf stable.

**New Product–Documentation:** Trade catalog and price list from Direct Foods Ltd. 1977. April 25. The product line is the same as in 1974 except for the addition of: 10 lb sizes for each flavor, Sizzleberg (1 lb yields 2 lbs), and New Savoury Macaroni with TVP.

Food Report (Lehmann). 1982. Jan. Talk with Peter Roberts. 1990. Dec. 12. In about 1970, Direct Foods Ltd. introduced a line of about 20 vegetarian protein products, all replacements for meat and all sold under the Ranch House brand.

917. Kolb, H. 1977. Herkoemmliche Verfahren zur Nutzung von Soja im asiatischen Raum [Traditional processes for using soya in Asia]. *Alimenta* 17(2):41-45. March/April. [35 ref. Ger]

• **Summary:** Discusses each of the following foods briefly and gives sources of further information: Kinako (roasted soy flour), soymilk, yuba, tofu, kori tofu (dried-frozen tofu), aburaage, namaage, kinugoshi tofu, sufu, soy cheese (Western style), soy yogurt, ganmodoki, natto, Hamanatto, koji, tempeh, miso, tao-tjo [Indonesian-style miso], kochujang, shoyu, and ketjap.

Note 1 This is the earliest German-language document seen (Oct. 2011) that uses the word “sufu” to refer to fermented tofu.

Note. This is the earliest German-language document seen (April 2013) that mentions silken tofu, which it calls *kinugoshi*. Address: Institut fuer Lebensmitteltechnologie, Frucht- und Gemuesetechnologie, Technische Universitaet Berlin, Koenigin-Luise-Strasse 27, D-1000 Berlin 33, West Germany.

918. **Product Name:** Soy Nuggets (Chunks of Textured Soy Flour Flavored with Soy Sauce).

**Manufacturer’s Name:** Love Natural Foods.

**Manufacturer’s Address:** 3 Masada Dr., Cohutta, GA 30710.

**Date of Introduction:** 1977 April.

**Ingredients:** Defatted soy flour, imported naturally fermented shoyu soy sauce.

**Wt/Vol., Packaging, Price:** 8 oz box.

**How Stored:** Shelf stable.

**Nutrition:** Per 2 oz.: Calories 202, protein 17 gm, carbohydrates 30 gm, fat 1.7 gm, calcium 165 mg, iron 5 mg, sodium 678 mg.

**New Product–Documentation:** Spot in Whole Foods.

1986. Nov. p. 50. “Soy Substitute.” And in *Vegetarian Times*. Nov. p. 58. “Golden Nuggets of Soy.” Ideal for making chili, spaghetti sauce, and Sloppy Joes. Label. 1987. 5.5 by 8 by 2 inch box. Red, black, and white on tan. Color photo of spaghetti sauce, sloppy joe, and chili dish. “With natural soy sauce. Very low fat. No cholesterol. Perfect for Connoisseur Chili, Super Spaghetti Sauce, Sumptuous Sloppy Joes, and many other great dishes. Reconstitutes to over a pound.” Five recipes on back. Several quotes about love and God. Ad for “Love animals, don’t eat them T-shirts.” Form filled out by David Nazar. 1987. Dec. They now make 1,000 lb/month.

Ad in *Vegetarian Times*. 1991. Dec. p. 49. “Soy Nuggets. Lean bean protein. A great tasting soy granule made

**Loveburger**

**The Classic Vegeburger**

We know **Loveburger** is the most **nutritious** vegetarian burger available because of all the quality ingredients we put in it. One burger gives you 25% of the RDA of Protein and Iron *plus* 50% of Niacin, 100% of Riboflavin and 140% of Thiamine.

We think **Loveburger** is the most **delicious** vegeburger you can buy because of the hundreds of letters we've gotten from folks who love the taste and convenience of **Loveburger** as much as we do. Ask for **Loveburger** at your local natural food store or cooperative. Thanks.

And much Love ♥♥♥♥♥

**LET THIS BEAUTIFUL PAINTING DECORATE YOUR HOME** and communicate the spirit of vegetarianism to your family and guests. Get one for your child or grandchild's room and help them to understand the spiritual beauty of a vegetarian diet. That is why we chose this classic masterwork by William Strutt to be the logo for our delicious, nutritious LOVEBURGER. We are offering quality, full color 12" by 15" art prints suitable for framing for only \$10.00 with a money back guarantee if you're not delighted.

**NEW – HEAVYWEIGHT T-SHIRTS IN BLUE OR BEIGE**  
...with the same full-color picture from the painting on each of them. 100% cotton shirt with the picture surrounded by the motto "LOVE ANIMALS DON'T EAT THEM."  
Adults S-M-L-XL. Children's in Ecru only S(6-8) M(10-12) L(14-16)  
ALL ONLY \$8.00 EACH.

**LONG SLEEVE SHIRTS** 100% cotton Blue or Beige adult sizes only S-M-L-XL \$12.00 each. For the print, T-shirts or long sleeve shirts, send check or money order with your address, size and color desired to:

LOVE NATURAL FOODS • 3 MASADA DRIVE • COHUTTA, GEORGIA 30710  
Don't Delay, Mail Your Order Today!

with natural shoyu soy sauce. Perfect for connoisseur chili, super spaghetti sauce, sumptuous Sloppy Joes, and many other great dishes." The company address is still 3 Madada Drive. A color painting shows Jesus as a child walking with animals, illustrating the spiritual beauty of a vegetarian diet.

919. **Product Name:** Loveburger. The Classic Vegeburger.

**Manufacturer's Name:** Love Natural Foods.

**Manufacturer's Address:** 3 Masada Dr., Cohutta, GA 30710. Phone: 404-694-8179.

**Date of Introduction:** 1977 April.

**Ingredients:** Sesame seeds, soy flour, oat flour, bran, potato flour, nutritional yeast, naturally fermented soy sauce (from soybeans, wheat, sea salt), onion powder, basil, garlic powder, marjoram.

**Wt/Vol., Packaging, Price:** 1 lb box.

**How Stored:** Shelf stable.

**Nutrition:** Per 2 oz.: Calories 245, protein 17 gm, carbohydrates 20 gm, fat 11 gm, crude fiber 2 gm.

**New Product–Documentation:** Label. 1987. 5.5 by 8 by 2 inch box. Blue, black, and red on tan. Color photo of a child leading a cow, lamb, and lion. "Easy. All Purpose. Vegetarian. Quick and easy preparation. Makes two pounds." Recipe on back. Several quotes about love and God. Ad for

"Love animals, don't eat them T-shirts." Form filled out by David Nazar. The product is 1/3 soy. They now make 5,000 lb/month.

Color ad in *Vegetarian Times*. 1988. Nov. p. 63.

"Loveburger. The Classic vegeburger." Ad in *Vegetarian Times*. 1990. March. p. 49. "Loveburger: The delicious way to get the fiber you need. With over 14% fiber, Loveburger has almost as much as oat bran... *Vegetarian Times* rated Loveburger the most meat-like of the dry mix vegeburgers... Enjoy Loveburger for life."

920. *Organic Gardening and Farming*. 1977. Tofu cooking: Tofu will give your meals that true Oriental taste and your nutrition a big boost. 24:106, 108, 112. April.

• **Summary:** "If America were to have a tofu expert, it would be the team of William Shurtleff and Akiko Aoyagi. For three years they studied the preparation and use of tofu throughout Japan. Their efforts resulted in the encyclopedic work, *The Book of Tofu* (\$7.95 from Autumn Press, 7 Littell Road, Brookline, Massachusetts 02146). The following recipes have been carefully developed by them to suit American tastes."

Recipes include: Creamy tofu dressing with curry (or other seasonings). Tofu mayonnaise. Tofu sour cream. Tangy

tofu cottage cheese. Homemade tofu burgers (ganmo). Sizzling rice with deep-fried tofu. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

921. **Product Name:** Tofu Pops.

**Manufacturer's Name:** Vegetable Protein Co.

**Manufacturer's Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1977 May.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with John Weissman. 1992. March 31. In addition to the Wheatmeal Tan Pop, John developed and made a Tofu Pop, introducing it in the spring of 1977. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown—he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Kee, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep-fried them. He first sold these at the very first Bread & Circus natural food store purchased by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store—but it was discontinued after a month or so, because it sold slowly; the unflavored tofu was too bland.

922. *Food Engineering*. 1977. Tuna salad analog based on soy protein. 49(6):ef-14, 15. June. In special section on Engineered Foods.

• **Summary:** New U.S. regulations to protect porpoises almost guarantee a severe reduction in the tuna catch. To help alleviate such consequences, the PFW/Hercules Food Technology Center in Middletown, New York, has developed this prototype tuna salad analog which contains no tuna meat. The recipe includes Edipro 200 soy protein, MSG, and artificial and natural tuna flavors.

923. Shurtleff, William; Aoyagi, Akiko. 1977. Excerpts from *The Book of Tofu: Deep-fried tofu*. *Mother Earth News* No. 45. May/June. 62-64. [1 ref]

• **Summary:** Describes how to make at home and serve thick agé, ganmo, and agé. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

924. Howes, Charles D. 1977. Re: The influence of Dr. John Harvey Kellogg on substitute foods and their developers in the USA. Letter to Mr. Stephen H. McNamara, Associate Chief Counsel for Food, U.S. Food and Drug Administration, Washington, DC., July 15. 2 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** “Your paper in *Food Engineering*, June 1977 was read with interest. I do not intend to dispute any of the

points made in it here, but would like to share with you a historical perspective of the development of substitute foods. A brighter future may be assured if we remind ourselves of the progress of the past.

“John Harvey Kellogg, M.D. promoted a simple vegetarian diet at the Battle Creek Sanitarium in Michigan which he headed during most of his 67 years at the medical institution (beginning in 1875/76). During this period he developed a unique program of diet, hydrotherapy and expert surgery which attracted people from around the country and the world. Patients included a number of leading people such as William Howard Taft, William Jennings Bryan, Roald Amundsen, Lowell Thomas, Alfred DuPont, John D. Rockefeller, Jr., J.C. Penney, Montgomery Ward, S.S. Kresge, etc., etc.

“As might be guessed, Kellogg's views on diet and health were widely spread throughout America and the world. In order to provide a satisfactory vegetarian breakfast Kellogg developed the breakfast cereal and Battle Creek became the prepared-cereal capital of the world. The breakfast cereal was a substitute for ham & eggs and other high meat breakfasts.

“Kellogg also invented vegetable protein foods which he served as substitutes for meat. This was the beginning of the meat analogue industry.

“Henry Ford II [sic, Henry Ford] was a patient of Dr. Kellogg and Kellogg was a man who liked to share his ideas with anyone who would listen intelligently. Exactly what was shared we do not know, but back in Detroit Ford established a soy research team. The soy research team invented soy plastic (which was used in Ford automobile steering wheels for several years), soy fabric, and soy fiber [spun soy protein fiber]. When the research team was broken up the leading members joined the food industry and with additional developments produced vegetable fiber suitable for food products. This was the beginning of textured vegetable protein fiber.

“In order to promote his ideas more fully and leave a more lasting impression on the health of the world, Kellogg founded a medical school in connection With the Battle Creek Sanitarium. The American Medical Missionary College was granted a charter in 1895 and had two campuses—Battle Creek & Chicago. Much of the support for the medical school came from the food business. The school gave an excellent education and was soon fully accredited. Into this situation came Harry W. Miller, a medical student from Ohio. Harry Miller started working as a guide in the cereal factory to help support himself as a medical student. He became interested in the food business and became such an expert guide that Kellogg developed an interest in him. Miller was instructed by Kellogg in the area of food processing and read into food development as well as studied medicine. He became well-versed in both areas.

“When Miller graduated he married and soon sailed for

China as a medical missionary. He noted malnutrition among infants and a high death rate among them. He also noted that soymilk was made by the people, but only the old people (no doubt those without teeth) drank it. In time Miller applied his knowledge of food processing methods to taking soymilk production out of the kitchen and making it on a large scale in a formulation suitable for infants. In the late 1930's China was invaded by the Japanese and the soymilk plant was bombed. After several adventures he was able to return to the U.S. and founded the first American soymilk plant.

"Thus a "Whole Picture" of substitute foods may be outlined in perspective thus:" A diagram shows John Harvey Kellogg, M.D. on the top line. Arrows point downward from him to those he influenced on the 2nd line: (1) Henry Ford II and the Soy Research Group. (2) Vegetable Protein Foods. (3) Breakfast Cereal. (4) Harry W. Miller, M.D. Arrows point downward to the 3rd row showing that: (1) Ford and the Soy Research Group developed Vegetable Protein Fiber. (2) Dr. Miller developed Soymilk & Soycheese. Arrows point downward to the 4th row showing that both Vegetable Protein Fiber and Vegetable Protein Foods led to the [commercial] development of Textured Vegetable Protein foods.

"I hope this background material will be helpful to you as you deal with the nutritional problems of engineered foods.

"Sincerely,..." Address: PhD, Technical Director, Loma Linda Foods, 13246 Wooster Rd., P.O. Box 388, Mount Vernon, Ohio 43050. Phone: (614) 397-7077.

925. *Food Engineering*. 1977. First licensee for Uni-Tex meat analogs. 49(8):48. Aug.

• **Summary:** The first licensee is Garrison Products, Inc., which will operate a new plant in Northbrook, Illinois—according to an announcement by Wenger Manufacturing of Sabetha, Kansas. Garrison will produce this unique double extruded meat analog under the Wenger patents.

926. Shurtleff, William; Aoyagi, Akiko. 1977. *Tofu & soymilk production: The Book of Tofu*, volume II. Lafayette, California: New-Age Foods Study Center. 128 p. Aug. 1. Illust. by Akiko Aoyagi Shurtleff. No index. 28 cm.

• **Summary:** A rough photocopied manuscript with a yellow cover, created in response to a letters from many people requesting information on how to start a tofu shop. This book was published in finished form in 1979 under the same title, *Tofu and Soymilk Production* (336 p.).

Contents: 1. So you want to start a tofu shop or soy dairy? 2. Setting up shop; The community shop, the traditional shop, the steam-cooker shop, the pressure cooker shop, the soy dairy, the modern factory. 3. Ingredients. 4. Scientific data concerning the tofu-making process. 5. Tofu. 6. Firm tofu. 7. Using okara and whey. 8. Deep-fried tofu: Cutlets, burgers, and pouches. 9. Soymilk. 10. Soymilk ice

cream, yogurt, kefir, mayonnaise, and cheese. 11. Silken tofu & soft tofu (Silken tofu is made from concentrated soymilk). 12. Lactone silken tofu. 13. Grilled tofu. 14. Wine-fermented tofu. 15. Dried-frozen tofu. 16. Yuba.

Appendix A: People and institutions connected with tofu & soymilk production. B: Sketches of tofu and yuba shops in Japan. C: So you want to study tofu in Japan? D: Table of equivalents.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "silken tofu" to refer to Japanese *kinugoshi* tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term "wine-fermented tofu." Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549; 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan.

927. Rasmussen, Carol. 1977. Vegetarians straight off the farm: Soy is source of successful diet. *Chicago Tribune*. Sept. 8. p. E3, or p. W\_A3, or p. N\_83.

• **Summary:** This article is about The Farm, from Summertown, Tennessee, and their creative but strict vegetarian diet—that uses no meat, eggs, or dairy products." Margaret Nofziger explains that Farm members are not food faddists; they eat cocoa, sugar, and white flour.

Most of their nutrients comes from soybeans. They grow 250 acres of soybeans a year and turn a significant portion of these into an incredible array of foods such as soy flour and soy milk. The soy milk is made into soy yogurt, mayonnaise, a cheese, tofu, soy ice cream, and tempeh (which is a fermented soy product from Indonesia). The pulp [okara] that remains after making soy milk is used to make a meatless sausage; it also add to cakes, cookies, and other baked goods. Also on The Farm, soybeans are roasted to make nuts, and ground to make coffee. They have published recipe booklet titled "Yay soybeans."

The Farm has a great deal of experience in cooking whole soybeans. The best way is to use a pressure cooker for 1 hour at 15 pounds pressure. Or you can cook them for at least 10 hours at atmospheric pressure.

A typical breakfast at The Farm might consist of toast, fried tofu, tea and sugar. Or perhaps fried potatoes and cheese [made from nutritional yeast] and hot soy milk and tea.

A cartoon has this caption: "Soybeans are the base for cheese, ice cream, sausage, and burgers." Address: Food Guide editor.

928. Kapoor, Manjusha; Gupta, A.K.; Deodhar, A.D. 1977. Sensory evaluation of vegetable cutlets prepared from soybean (vegetable and grain type) and potatoes. *Current Agriculture (India)* 1(3):49-52. July/Sept. [4 ref]

• **Summary:** Five soybean varieties, harvested when mature and dry, were subjected to sensory evaluation: Coker-102,

Coker-240, Coker-stuart, JS-2, and Kali Tur [Kalitur] (black soybeans). Meatless cutlets, prepared from potatoes and soybeans, were judged for their appearance, flavour, taste, and blending quality. Coker-102 was given the highest total score. Vegetable-type soybeans were found to be superior to grain-type soybeans. "Therefore, it is suggested that vegetable soybeans may be given due place in applied nutrition programmes of the country as these would be good source of protein and calorie to the poor average Indian diets." Address: Dep. of Plant Breeding and Genetics, J.N. Krishi Vishwa Vidyalaya, Jabalpur, MP.

929. Price, Charlene. 1977. Fabricated foods—The consumer's view. *USDA National Food Situation* No. 161. Sept. p. 20-21. [1 ref]

• **Summary:** USDA's Economic Research Service (ERS) did a nationwide survey of 1,400 shoppers to see how new foods made from textured vegetable proteins are catching on. Three types of products were discussed: 1. Packaged extenders to be added to meat at home. 2. Meat products already extended. 3. Meat analogs, similar to meat but containing none. Of the shoppers sampled, 58% were aware of #1, 12% of #2, and 75% of #3. Of the various products, bacon analogs led the popularity list (73% of the analog users had tried them), followed by egg substitutes (38%), and sausage substitutes (25%). Address: USDA Economic Research Service.

930. Bodin, Paul. 1977. Que mangerons-nous demain? Un avant-gout: les spécialités aux protéines végétales aromatisées [What will we eat tomorrow? A foretaste: Flavored vegetable protein specialties]. *Ouest-France*. Oct. 15-16. [Fre]

• **Summary:** A photo shows two cupped hands holding soybeans. Maybe proteins extracted from them will enrich our menus. But the soybean is not the only seed rich in proteins; others include sunflower seeds, peas, and beans, all of which are cultivated in France. Address: France.

931. Lublin, Joann S. 1977. Soybean saga: Revival is attempted for meat substitutes that flopped after '73. But new line of Miles Labs is still facing resistance to the taste and the price. Pitch to the health-conscious. *Wall Street Journal*. Oct. 26. p. 1, 27.

• **Summary:** Miles Laboratories Inc. is coming out with new versions of its meatless products "that it says taste, feel and smell more like the real thing. A sampling of the new Morningstar Farms line of vegetable-protein products, just now starting to be marketed, largely supports Miles's claim. The products are tastier and juicier, they feel meatier and smell less spicy than earlier versions. But the bacon substitute in particular falls short of the real thing. In the words of one impartial taster, it looks and tastes more like painted cardboard than real bacon."

"When Miles offered its original meat substitutes in 1973, officials predicted sales of more than \$100 million a year within the decade. Now, 4 years later, Morningstar Farms sales are running around \$15 million a year, less than half the levels expected by now. The products, moreover, have registered pretax losses of \$33 million since their development. Others in the food business were similarly overoptimistic. Industry-wide sales of soy protein products last year totaled about \$120 million, up from \$75 million in 1972 but far short of forecasts of \$1.5 billion by 1980... When the original products were offered, meat prices were soaring to 1973 peaks and the public was eager for alternatives."

"Miles Laboratories, best known for its Alka-Seltzer antacid, had great expectations for meat substitutes in 1970 when it bought Worthington Foods Inc., a pioneer in textured-vegetable-protein technology. Miles reformulated several Worthington products and began test-marketing sausage-like links and patties, ham-like slices and bacon-like strips in 1972.

"Consumer surveys at the time showed that more than half of all U.S. households had at least one member concerned about heart-disease risks from excessive cholesterol in his diet. Miles marketers reasoned that many of the 40 million concerned families would welcome cholesterol-free replacements for their breakfast protein. The company spent \$7.5 million on a nationwide promotion campaign in 1974, featuring prime-time television commercials emphasizing the nutrition angle.

"About 10 million American families tried the Morningstar Farms breakfast line in the first 18 months, meeting the company's goal. But fewer people than expected came back for seconds, and outside analysts suggest the current sales are half the anticipated volume."

932. *Cereal Foods World*. 1977. Products: Soy bits. 22(10):557 Oct.

• **Summary:** Swift Edible Oil Co. has developed Swift Premium Imitation Bacon that has a real smoked bacon taste, flavor, and aroma. The product is naturally smoked in a smokehouse. The bits are ideal for salad toppings, etc. Contact Swift Edible Oil Co., 115 West Jackson Blvd., Chicago, Illinois 60604.

933. Farm, The. 1977. How we make and eat tempeh down on the farm. *Mother Earth News* No. 47. p. 105-08. Sept/Oct.

• **Summary:** Most of the article describes how to make tempeh at home, with photos. Then there are sections on "Additional tempeh-checking tips" and "Questions and answers" about making tempeh at home, followed by recipes: Tempeh burger. Deep-fried tempeh. Tempeh pizza. Cubed fried tempeh. Tempeh and noodles. Cajun tempeh jambalaya. One full page of color photos shows tempeh recipes. Address: Summertown, Tennessee.

934. Jonathan. 1977. Re: Products now being sold by Jonathan. Letter to distributors. 1 p. Typed, without signature on letterhead. [Dut]

• **Summary:** At the top of this company's letterhead is written "Jonathan." Below that is an illustration (line drawing) of two seagulls flying, and to the right is a large round yin-yang (*t'ai chi*) symbol. Below that, as part of the letterhead is written: *Productie van macrobiotische natuur en vegetarische specialiteiten* [Macrobiotic products and vegetarian specialties]. Jos-Filoe Van de Pongseele-Holleweg 89-2070 Ekeren-Tel. 031.64.41.73-BTW 631.150.888.

The typed, unsigned letter reads: "Dear gentlemen and ladies: Perhaps you have an interest in natural foods. On 28/29/30 October 1977 there will be an international natural food show (*Natuurbeurs*) in Ghent. Jonathan will be presenting the following natural foods: Seitan (a vegetarian steak), Goulash (made with seitan), Tofu (*Sojakaas*), Mochi (made of sweet rice), sea vegetables, vegetable pickles, and peanut butter."

Note: This is the earliest Dutch-language document seen (April 2013) that uses the term *Sojakaas* to refer to tofu. Address: Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

935. **Product Name:** [Goulash {Made from Seitan}].

**Foreign Name:** Goulash-Gemaakt van Seitan.

**Manufacturer's Name:** Jonathan.

**Manufacturer's Address:** Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

**Date of Introduction:** 1977 October.

**Ingredients:** Incl. seitan.

**How Stored:** Refrigerated.

**New Product-Documentation:** This is the earliest known commercial second generation seitan product in Europe. Jos van de Pongseele (Jos is pronounced like the first syllable in Joseph) was the person responsible for starting seitan production at Jonathan.

Typed letter written in Oct. 1977 on Jonathan letterhead (Jonathan was at Holleweg 89; at the top of the letterhead was an illustration of two seagulls and a round yin-yang (*t'ai chi*) symbol) showing that that company was selling Seitan (a vegetarian steak) and Goulash (made with seitan)—among other things.

936. **Product Name:** [Seitan].

**Foreign Name:** Seitan.

**Manufacturer's Name:** Jonathan.

**Manufacturer's Address:** Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

**Date of Introduction:** 1977 October.

**Ingredients:** Whole wheat, tamari soy sauce, ginger, kombu.

**Wt/Vol., Packaging, Price:** 250, 500 and 1000 gm trays

with transparent plastic film lid.

**How Stored:** Refrigerated.

**New Product-Documentation:** This is the earliest known commercial seitan product in Europe. Jos van de Pongseele (Jos is pronounced like the first syllable in Joseph) was the person responsible for starting seitan production at Jonathan.

Typed letter written in Oct. 1977 on Jonathan letterhead (Jonathan was at Holleweg 89; at the top of the letterhead was an illustration of two seagulls and a round yin-yang (*t'ai chi*) symbol) showing that that company was selling Seitan (a vegetarian steak) and Goulash (made with seitan)—among other things.

Letter from Sjon Welters. 1982. April 16. "Jonathan is a macrobiotic food company. They produce a wide assortment of macrobiotic products, such as... seitan..."

Label sent by Jos van de Pongseele. 1988. 6.25 by 10.5 inches. This card-stock sleeve fits over the product. Color photo of two slices of seitan on a wooden plate with brown rice, onion rings, mushrooms, and lettuce. The product name, Seitan Natural in English, or Seitan Naturell in German, is written in white on a reddish-orange band. Ingredients: water, wheat\*, soya flour\*, wheat gluten, soya sauce, sea salt, sea-weed, spices \* = Organically grown. Nutritional composition: Minerals 1%, vegetable proteins 20%, vegetable fats 0.3%, carbohydrates 3%. 110 calories (Kcal) per 100 gm. The product is sold frozen in a 200-gm tray. "Vegetable product. Use: Open lid with a sharp knife. Spread mustard or sprinkle tamari on the slices and allow them to fry in a pan. Pieces of seitan are delicious in all sorts of stews as in e.g. sauce bolognese with chopped seitan." Code CINAB. Best before 12/89.

Letter from Mark Callebert of Lima Foods in Belgium. Jonathan started to make seitan in 1978 in a plant they built at Holleweg, Ekeren (Hoogboom), Belgium.

Letter (fax) from Jos van de Pongseele and Magda Verfaillie of Mycelia b.v.b.a. in Gent, Belgium, in response to an inquiry. 1992. July 6. Jonathan was the first company in Europe to make seitan for sale commercially. Jos van de Pongseele, the founder of Jonathan, first learned about seitan during a 9-month stay [with his wife and family] at the Kushi Institute in Boston, Massachusetts, from March to December 1976. There he tasted the seitan prepared by Aveline Kushi. He thought it would be a good meat substitute for the growing group of vegetarians in Europe. [Note: Jos was a butcher with a large meat processing operation before he became a macrobiotic vegetarian]. In Boston, he learned how to make seitan on a home scale from Tamara Uprichard. Then, at the very end of his stay in Boston, he started up medium-scale production of seitan with two Americans; he no longer remembers the name of the company or the names of his American partners. They sold seitan to macrobiotic study houses in Boston and to the Erewhon retail store.

Returning to Belgium, he founded Jonathan. The name "Jonathan" came from a famous book titled *Jonathan*

*Livingston Seagull* [by Richard Bach, 1970]. Jos hired a man named Ludo Peeters as his first employee and they set up the business in a garage at Holleweg 53, 2180 Ekeren, near Antwerp, Belgium. The company's first product, made entirely by hand, was plain fresh seitan. It was introduced some time in 1977. The product name on the label was simply Seitan, written in 4 languages (Dutch, French, German, and English). It was packaged in 250, 500, and 1000 gm carton dishes with a transparent plastic film lid. With seitan, the big challenge for Jos was to introduce an entirely new and valuable product to the market. Two months after introducing seitan, Jonathan started making tofu and soymilk. Ludo continued to work at Jonathan for many years, eventually becoming managing director.

In 1979 Jonathan introduced a fresh seitan burger, then in Jan. 1980 the company moved to its present location at Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. At the new location they introduced a number of new seitan products: Seitan Paté (Feb. 1980, sterilized), Seitan Goulash (late 1980, sterilized), and Seitan Schnitzel (1981, fresh). From 1985 on, Jonathan introduced a series of different ready-to-eat meals in which seitan was a major ingredient. Jos sold Jonathan and left on 1 April 1989.

Talk with Tamara Uprichard. 1992. July 7. She lived in the same Boston macrobiotic study house with Jos and his wife and family. She remembers Jos as being a very gentle, hard-working, and well-organized man.

Talk with Ludo Peeters. 1992. July 9. Ludo started working at Jonathan on 28 Aug. 1978. He made seitan with Jos from the very first day; they were Jonathan's only workers at the beginning and they worked in a garage at Holleweg 58 (the address never changed). Jonathan's first product was seitan, followed by tofu and soymilk. Ludo thinks that the seitan was introduced in Nov. 1978. The original ingredients were water, wheat, soy sauce, soy flour or meal, salt, kombu, and ginger. The soy flour improved the flavor and nutritional value. He will look for a document to prove the date of introduction.

937. Tofu Shop (The). (Renamed Far Pavilions in late 1979). 1977. October. New soyfoods restaurant or deli. 116 N. Oak Street (Box 69), Telluride, CO 81435.

• **Summary:** Menu and promotional brochure for The Tofu Shop. 1978, Sept. 6 panels. On the front panel is a stunning circular photo of Rocky Mountains rising out of a misty valley. Around it is written: "The Tofu Shop" (above). "Juice bar—Dining—Catering—Wholesale kitchens" (below). Below that on the front panel: "116 North Oak Street. Next to the opera house. Telluride, Colorado. Call ahead for take-out: 728-9940."

Entrees (Served with soup or salad—\$0.65 extra): Stir-fried tofu, rice & vegetables. Burgers: Soy burger, Tofu burger, Okara burger. Stuffed pitas: Grilled tofu & vegetables, Guacamole and tofu. Burritos: Spicy

tofu and rice filling with guacamole. Smoothies: Carob, honey, soymilk with banana. Carrot sunny shake. Other refreshments: Miso broth, soymilk, whey from making tofu. Salads: Full plate tofu & guacamole salad, Tofu and vegetable salad, Okara salad. Fresh tofu. Grilled tofu. On the back panel is a lively, writhing dragon plus: "Uncompahgre Natural Foods. Producers and suppliers of specialty foods for Colorado's western slope." Talk with Matthew Schmit, founder and owner of The Tofu Shop. 2002. Sept. 19. Matthew estimates that this undated menu was first printed in about Sept. 1978.

Menu for Far Pavilions. 1979, undated. 8 panels. Green on tan paper. "International vegetarian cuisine. Welcome hospitality. Located below the opera house. For details, see separate Menu entry for Far Pavilions.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Oct. 1977 by Matthew Schmit. Later run by Catherine Peterson.

Note: This is America's second "soy deli," offering a host of highly creative and delicious recipes. Address: Telluride, Colorado. Phone: 728-4441.

938. **Product Name:** Unitein 1 and 2 (Double-Extruded Textured Soy Protein).

**Manufacturer's Name:** Garrison Products Inc.

**Manufacturer's Address:** 1471 Paddock Dr., Northbrook (near Chicago), IL 60062. Phone: (312) 729-4906.

**Date of Introduction:** 1977 November.

**Ingredients:** Defatted soy flour.

**Wt/Vol., Packaging, Price:** 35 cubic foot woven polypropylene bags. Sells for \$0.60/lb.

**How Stored:** Shelf stable.

**New Product—Documentation:** This was the first commercial product made using the Wenger Uni-Tex double extrusion process. Food Engineering. 1977. Aug. p. 48. "First licensee for Uni-Tex meat analogs." The first licensee is Garrison Products, Inc. Notes from a phone call to Robert R. Garrison by Dr. Walter J. Wolf, Oilseed Crops Lab., NRRC, Peoria, Illinois. 1977. Dec. 14. He has formed Garrison Products, Inc. and has built a semi-works plant with an initial capacity of 3 million lb, expandable to 12 million lb. Garrison has a chemical processing background (16 years). His plant has been in operation for 45 days. His product, called Unitein, sells for \$0.60/lb., but hydrates 2:1 or \$0.20/lb of hydrated product. Dr. Wolf visited Garrison Products on 9 May 1978 to study their double extrusion process. Robert R. Garrison showed him the plant and discussed the process. Wolf, in turn, sent him information on extrusion of defatted soy flakes.

Letter from Robert R. Garrison to Dr. Walter Wolf of NRRC. 1978. Jan. 16. He encloses samples of unflavored Unitein-1 and Unitein-2, with general instructions for use and preliminary specification sheets. Also six color slides showing close-up views of the products, and two color

photos of products being made at his plant.

Garrison, Robert R.; Stinson, Wm. S. 1978. Food Processing (Chicago). Nov. p. 120-21. "Two-stage extrusion process produces meat analogs: Increases drying efficiency with electrode boiler."

939. *Telluride Times (Colorado)*. 1977. Tofu prepared daily in Telluride shop. Dec. 8. p. 11.

• **Summary:** "The Tofu Shop—a tofu factory and take-out health food store located in the Spectrum Shops—has been doing health since mid-September."

Business partners Matthew Schmit and Timothy Mecke started the Tofu Shop, which makes fresh tofu each morning in Telluride. Schmit was involved in setting up the Winterstash Food Co-op, and Mecke brought the art of making tofu to the enterprise. Both men are vegetarians.

Schmit, who starts making tofu at 6 a.m. each morning says anyone "is welcome to come down to observe and learn. 'It's a beautiful process, somewhat like meditation,' he says."

"The Tofu Shop distributes their products through Winterstash Food Co-op and Rose's market in Telluride, and through natural Food Stores in Durango... The Tofu Shop also offers a variety of take-out foods including salads, soups, soyburgers, sandwiches, sprouts, and soymilk." A photo shows Matthew Schmit, Susie Imbarrato, and Tim Mecke, all holding a tray of sprouts. Susie "runs the fresh juice bar and prepares the baked goods."

Note: This is the earliest article or published document seen (April 2013) concerning The Tofu Shop in Telluride, Colorado.

940. Soy Plant (The). 1977. Re: Introducing The Soy Plant and the Grain Burger Collective. Letter to members of the Michigan Federation of Food Co-ops, Dec. 12. 1 p. Typed, without signature.

• **Summary:** "As the co-op movement continues to grow, a new branch of the cooperative tree has begun to develop; that is collectively organized production groups. Two such collectives have recently been started in Ann Arbor, and this letter is intended to strengthen ties between the food co-ops of Michigan and these production groups."

"Soy Plant which, produces tofu, and the Grain Burger Collective, which produces Grain Burger [Mix], are organized alike. Started by experienced co-ops, these are worker controlled collectives; this means that each has equal decision making responsibility within the business, (i.e. there are no bosses). We are legally non-profit and are striving to build a system in which businesses view themselves as an integral part of the community. Right now, we feel that the welfare of the community demands sources of non-animal protein that are unadulterated, enjoyable to eat, and inexpensive.

"We hope that our collectives thrive and can expand, but rather than expand in the traditional centralized manner,

we would like to expand by assisting other autonomous collectives to start up and serve their own localities with our products and products of their own.

"Our products are available from the Peoples Warehouse [sic, Warehouse]. Tofu comes in one lb. containers and is packed twelve in a case."

This unsigned letter ends with the typed word "PEACE." Along the bottom are stylized illustrations of a mother swan looking to her right at three baby swans swimming toward her. The body of each is a spiral. There are little waves to the left of the mother swan and below the baby swans.

Note 1. This is the earliest document seen (Dec. 2000) concerning The Soy Plant, a pioneering tofu shop in Ann Arbor, Michigan.

Note 2. The address at 330 Maynard was in the basement of Eden's, a restaurant belonging to Eden Foods.

Note 3. Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Steve wrote this letter, though his name is not on it. The purpose of the letter was to introduce The Soy Plant to the Michigan Federation of Food Co-ops to encourage them to distribute Soy Plant products. Eden's was a combination natural food store and sit-down deli. A guy named James developed a Grain Burger Mix and he was using the same downstairs kitchen that The Soy Plant rented from Eden to mix his burger mix. Steve drew the illustration of the swans—to express his artistic creativity. Address: 330 Maynard, Ann Arbor, Michigan 48104. Phone: 313-663-0500.

941. **Product Name:** Seitan.

**Manufacturer's Name:** Grain Dance.

**Manufacturer's Address:** 187 Downey St., San Francisco, California.

**Date of Introduction:** 1977 December.

**Ingredients:** Organic hard red winter whole wheat (always freshly ground), spring water, tamari (actually shoyu), ginger, and onions.

**Wt/Vol., Packaging, Price:** Bulk, then later in 16 oz round plastic deli tubs, then 8 oz tubs.

**How Stored:** Refrigerated.

**New Product—Documentation:** Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. "Flour power! Cooking with seitan, the delicious natural food from grain." "Ron Harris of Grain Dance Company in San Francisco has been making seitan for the past 8 years [i.e. since about 1977]. He is currently selling 250 pounds each week in eight-ounce packages. He does everything by hand and has distribution throughout the West Coast.

Talk with Ron Harris and Debbie Brent. 1988. March 6, and 1991. Nov. 17. A history of Grain Dance, one of America's earliest seitan manufacturers. See separate record at March 1988. Tel. 415-347-1378. San Mateo, California.

Talk with Shiwa Harris. 1988. March 13. Phone: 415-661-6997. She learned how to make seitan in Key West,

Florida from a woman named Martha, who was originally from Los Gatos. Then Shiwa taught her husband, Ron Harris, how to make seitan. She thinks that her “Shiwa’s No-Cheese Cake” was the first tofu cheesecake in San Francisco. She started making it in late 1977, shortly after Ron Harris went commercial with seitan and before her second daughter Elizabeth was born.

Talk with Yuki Muramoto. 1988. Feb. 29. He worked at Rising Sun from about 1975 to 1979. Ron Harris made seitan for a long time. Michael Pierce made his label. Their company was Grain Dance.

Talk with Jacques DeLangre. 1988. March 16. Ron Harris bought a stone mill for making seitan from Jacques.

Talks with Paul Duchesne (formerly of Wildwood Natural Foods) between 8 Oct. 1988 and 18 Aug. 1989. His Brown Rice & Tofu Sandwich (BRTS) was developed in Fairfax in late October or early November 1977. In September 1978 Paul went to Boston, Massachusetts, to study macrobiotics, so he gave his Fairfax sandwich business (which still had no name) to Chris Smith, a local friend interested in macrobiotics. Paul had first offered his business to Ron Harris, but Ron declined since he was getting involved in seitan.

Talk with Aine Travis. 1988. Feb. 18. She worked at Rising Sun for 3 years. Shiwa and Ron Harris made seitan (some of the first in America), which they sold at Rising Sun.

942. Swan Food Corp. 1977-1978. Introducing the Soybeanery—Natural food deli & bakery: Now open. Miami, Florida. 3 p. Undated. 28 cm. Catalog and price list.

• **Summary:** See next page. This retail catalog lists the company’s soy products, iced herbal beverages, and baked goods & pastries—with prices. Serving take out orders—Soy products include: Sandwiches (made with wholewheat pita-pocket bread; all sandwiches served with fresh organic salad vegetables): Tofu—baked, regular, marinated, or caraway: \$1.40. Eggless egg salad: \$1.40. Tofu cream cheese: \$1.05. Salads: House salad with sprouts plus tofu—baked, regular, marinated, or caraway: \$1.35. Eggless egg salad: \$1.35. Hot food: Soyburger sandwich: \$1.30. Desserts (per slice): Mary’s tofu cheese cake: \$0.75. Mary’s marble swirl cake: \$0.75. Mary’s devil’s food cream cake: \$0.75. Mary’s carob cream cake: \$0.75. Rice pudding [made with organic brown rice, soy melk, raisins, maple syrup, sea salt]: \$1.10. Carob pudding: \$1.10. Vanilla pudding: \$1.10. Soyogurt: Strawberry, peach, plain (more flavours to come): \$0.45. Granola: With soyogurt: \$0.45. With soymelk & banana: \$0.75. Drinks: Soy shake (carob, vanilla, strawberry). Soymelk. Non-soy: Herb teas. Coconut juice. Pinacolada. Smoothie (apple-banana). Sweet rice cookie. Oatmeal cookie. Hummus sandwich.

A page titled “Retail price list” lists many of the products shown above but at slightly higher prices. In addition: Tofu—regular: \$1.00. Tofu—baked: \$1.95. Tofu—

marinated: \$1.60. Tofu—caraway: \$1.60. Soymilk [plain]: Quart: \$1.00. Pint: \$0.45. Soymilk (sweetened): Quart: \$1.25. Pint: \$0.45. Tofu cakes and pies (all 7-inch rounds): Tofu pie—cashew: \$4.50 Mary’s devil food cream cake: \$4.50. Tofu chip dip: \$1.25. Whole grain soyburgers: \$1.15. Tofu vegetable stew: \$1.15. Soyogurt—plain or with fruit: \$0.45. Soy shakes—Carob: \$0.85. Vanilla: \$0.95. Strawberry: \$1.05. Mary’s eggless egg salad: \$1.40. Also—Nori roll. Nectarel ginseng.

Note 1. This is the earliest English-language document seen (Dec. 2003) that contains the term “soy shake.”

Note 2. This is the earliest English-language document seen (May 2003) that uses the word “Hummus” (or “Hummous”), which is a paste of pureed chickpeas usually mixed with sesame tahini and/or sesame oil (plus seasonings or spices) and eaten as a dip or sandwich spread.

Note 3. This is the earliest English-language document seen (Sept. 2012) that uses the word “Soyogurt” to refer to soy yogurt.

Note 4. This is the earliest English-language document seen (Feb. 2013) that contains the term “Eggless egg salad” or the term “Mary’s eggless egg salad.”

Talk with Danny Paolucci. 1997. Dec. 1. Danny worked for Swan Foods from 1977 to 1978. He knew Robert Brooks and Mary Pung very well. He last saw Mary about 8 years ago. The foods described above were sold in a little (10 by 12 foot) storefront retail store and deli that was located in the same building as the tofu factory but faced the sidewalk on Bird Road. A young lady named Penny, from England, ran the store. It was take-out only—no tables, chairs, or sit-down space. There was one large glass deli case, from which they sold a great many of Mary’s delicious tofu pies. Danny used to have all the recipes for those pies, but he loaned them to his yoga teacher. They also sold lots of herb teas in Pure-Pak quarts, plus many Wah Guru Chew bars—made by another company that was probably also run by disciples of Guru Maraji. Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

943. Soy Plant (The). 1977-1987. Scrapbook. Ann Arbor, Michigan. 54 p. 45 x 40 cm (18 x 16 inches). [49 ref]

• **Summary:** This large (18 by 15 inches) 34-ring binder has flexible brown covers and holds large black sheets with acetate sheet protectors. On each sheet are taped, in approximately chronological order, articles, photographs (both black-and-white and color), labels, menus, letterheads, etc. documenting the story of this company. An excellent scrapbook! Many of the documents will be cited separately. Some of the highlights (the numbers of the unnumbered pages appear in parentheses): (1) A letter of 12 Dec. 1977 to “Members of the Michigan Federation of Food Co-ops” announcing that The Soy Plant which produces tofu (at 330 Maynard), and The Grain Burger Collective which produces Grain Burger Mix (at 335 Catherine), both in Ann Arbor,

Michigan, are organized as collectives. Both their products are available from the People's Warehouse. Two large black-and-white photos (each 5 by 7 inches) show: Jerry MacKinnon, with long hair and mustache, cutting a large block of tofu into cakes, and Steve Fiering pouring soaked soybeans into the hopper of a grinder. (4) Black-and-white labels for tofu and for soymilk. A one-page leaflet titled "Getting to know your tofu" from "The Soyplant." (7) Long article titled "One of the few U.S. tofu manufacturers right here in Ann Arbor."

On the last two pages of the scrapbook are two undated and unsigned, handwritten pages torn from a spiral-bound, lined notebook, that begin: "Important! We are under attack! A vicious beast unknown to us has snatched from life many a new Soy worker. This pernicious creature... has brutishly eaten, devoured and consumed no less than three new workers without the decency to let them call us before being eaten... This vile unknown entity must be stopped." "This vile beast... bears a striking resemblance to our much loved packing machine. Have we given birth to a monster?" "As Ché Guevara said North Americans live in the belly of a monster, although resembling a machine the monster is none other than the capitalist system... Rx: Revolution and Revolutionaries."

Location: As of Dec. 2000 this binder is owned by Bruce Rose, president of Rosewood Products, Inc., Ann Arbor, Michigan. Soyfoods Center has a photocopy of the contents of this entire scrapbook. Address: 330 Maynard, Ann Arbor, Michigan 48104. Phone: 313-663-0500.

**944. Product Name:** [Dantex (Textured Soy Flour), and Danprotex (Textured Soy Protein Concentrate)].  
**Manufacturer's Name:** Aarhus Oliefabrik A/S.  
**Manufacturer's Address:** Bruunsgade 27, 8100 Aarhus C, Denmark.  
**Date of Introduction:** 1977.  
**New Product-Documentation:** Soya Bluebook. 1984. p. 59. Used in meat analogs and binders.

Talk with followed by letter (fax) from Torben Svejgard, Marketing Manager of Aarhus Olie, Protein Div. 1989. July 12-13. Dantex and Danprotex were introduced in 1977.

**945. Product Name:** Cedar Lake Vegeburger (Meatless).  
**Manufacturer's Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).  
**Manufacturer's Address:** Cedar Lake, MI 48812.  
**Date of Introduction:** 1977.  
**Ingredients:** Wheat protein, water, cornmeal, soy flour, soy sauce, oatmeal, corn oil, vegetable seasoning, salt.  
**Wt/Vol., Packaging, Price:** 19 oz can.  
**How Stored:** Shelf stable; refrigerate after opening.

**Manufacturer's Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).  
**Manufacturer's Address:** Cedar Lake, MI 48812.  
**Date of Introduction:** 1977.  
**Ingredients:** Wheat protein, water, soy sauce, vegetable seasoning, salt.  
**Wt/Vol., Packaging, Price:** 19 oz can.  
**How Stored:** Shelf stable; refrigerate after opening.  
**New Product-Documentation:** Label.

**948. Product Name:** Cedar Lake Grain Burger-Meatless Vegetarian Patties.  
**Manufacturer's Name:** Cedar Lake Foods of Tennessee, Inc. (Packer).  
**Manufacturer's Address:** Cedar Lake, MI 48812.  
**Date of Introduction:** 1977.  
**Ingredients:** Wheat gluten, whole wheat flour, rye flour, barley flour, soy sauce, vegetable seasoning, salt.  
**New Product-Documentation:** Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**949. Product Name:** [GranoVita Seasoned Patty Mixture with TVP].  
**Foreign Name:** GranoVita Soja-vita.  
**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.  
**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.  
**Date of Introduction:** 1977.  
**Ingredients:** Soya protein, bread crumbs, wheat gluten, wheat flakes, glucose, egg protein, yeast, potato starch, onion, spices, sea salt, celery, parsley.  
**Wt/Vol., Packaging, Price:** 200 gm box retails for DM 5.

**How Stored:** Shelf stable.

**Nutrition:** Protein content: 36% protein.

**New Product–Documentation:** Full-page ad for 8 granoVita soy products in the book by Manfred Heide. 1977. *Vegetarische Ernährung: 193 Rezeptvorschläge und Speisepläne für ein Vierteljahr* [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. Stuttgart, West Germany: Paracelsus Verlag. “This product is named “Soja-vita” (Fertig gewuerzte Bratlings-Mischung).”

DE-VAU-GE leaflet. 1980? *Rezepte aus der GranoVita Versuchskueche*. DVMC. Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

950. **Product Name:** Loma Linda Fried Chicken with Gravy (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1977.

**Ingredients:** Fried chicken: Soy protein isolate, water, corn oil, egg whites, potato flakes, wheat gluten, artificial and natural (vegetable) flavors, dried yeast, salt, dextrose, onion powder, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Broth: Water, natural (vegetable) flavor, corn starch, wheat flour, dextrose, onion, sugar, salt, artificial flavor.

**Wt/Vol., Packaging, Price:** 48 oz can. Retails for \$2.35 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 2 pieces (3.0 oz–85 gm): Calories 140, protein 9 gm, carbohydrate 4 gm, fat 10 gm, cholesterol 0 mg, sodium 340 mg, potassium 250 mg.

**New Product–Documentation:** Ad in *Mother Earth News*. 1977. No. 48. Nov/Dec. p. 3. “Avoid animal fat and cholesterol without losing flavor and protein.” Recipe booklet. 1979, dated. Sold frozen.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1977.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. This is now a 13 oz can that retails for \$2.35. The major ingredients in the fried chicken are now “Vegetable protein (soy and wheat [gluten]), corn oil, water, egg whites, potato flakes...”

951. **Product Name:** TVP [Hamburger Style, Bacon Style Bits, Beef, Chicken, Ham Style Chunks].

**Manufacturer’s Name:** Stow Away Foods Ltd.

**Manufacturer’s Address:** England.

**Date of Introduction:** 1977.

**How Stored:** Shelf stable.

**New Product–Documentation:** Listing in *International Vegetarian Health Food Handbook* (UK). 1977-78. p. 185.

952. **Product Name:** Okara Burgers.

**Manufacturer’s Name:** Swan Foods Corporation.

**Manufacturer’s Address:** The Soybeanery, 5758½ Bird Rd., Miami, FL 33155.

**Date of Introduction:** 1977.

**Ingredients:** Brown rice, okara, carrots, onions, garlic, whole wheat flour, corn oil, sesame seeds, rolled oats, sea salt.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1977. 2.75 by 3.5 inches. Self adhesive. Yellow, blue and orange on white. Swan logo. Recipe given by Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 170.

953. **Product Name:** Tofu Pops (Skewered Deep-Fried Tofu in a Batter).

**Manufacturer’s Name:** Vegetable Protein Co. (The).

**Manufacturer’s Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1977.

**Ingredients:** Tofu, corn meal.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** Talk with Johnny Weissman, inventor of Tofu Pops. 1992. March 31. This product was based on Tan Pops made of seitan. In addition to the Wheatmeal Tan Pop, John developed and made a Tofu Pop. He bought squares of plain pressed tofu (3 inches on a

side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown—he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Ki, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep fried them. He first sold these at the very first Bread and Circus natural food store opened by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store—but it was not on the market for long.

954. Albright, Nancy. 1977. *Rodale's naturally great foods cookbook: the best foods to use and how to use them in over 400 original recipes*. Emmaus, Pennsylvania: Rodale Press. [vi] + 408 p. Illust. 24 cm. Reprinted in 1983 as  
 • **Summary:** This book is based on natural foods but makes widespread use of meat, poultry, fish, and dairy products. Raw, unstrained clover honey is used as a sweetener instead of white sugar which “is dangerous to health...”

“Natural foods restaurants are ‘in’” (p. 2). “... the joys of natural foods” (p. 3). “... consumers are making a firm commitment to natural food cooking.”

Soy related recipes: Rice and soy crepes (with ½ cup soy flour, p. 53). Whole soybean casserole (p. 74). Bulgur soybean loaf (with 3/4 cup soybeans, p. 81).

The section titled “The soybean” (p. 275-85) begins: “The queen of the legumes is the soybean. And its status is growing. From a relatively unknown commodity... it has finally come into its own in this country as an important food. The soybean is the vegetable that most nearly provides the complete protein necessary for good health.” Discusses varieties suited to the family garden. Recipes: Green soybean and corn succotash (with green vegetable soybeans). Soy flour for added values: Soy pancakes. Soy cheeseburgers (with soy grits). Tofu (soybean curd): Mentions the Learning Tree tofu kit and *The Book of Tofu*, by Shurtleff and Aoyagi (1975, Autumn Press; no tofu recipes are given). Soy sauce (shoyu): Herbed soybean salad (with 1 cup soybeans). Fresh vegetable and fruit stew with soybeans. Soybean-cabbage casserole. Soybean coffee. Soybean custard pie. Soy milk (homemade). Carrot soy loaf. Liver pate (with 1 cup soy pulp [okara] remaining from making soy milk). Mock pumpkin pie (with soy pulp). Scroggin (backpacker's food, with 3 cups soybeans, boiled). Soy potato dumplings (with ½ cup soy flour). Soy salad dressing (with 3/4 cup soy flour or powder).

A photo (facing copyright page) shows Nancy Albright cutting vegetables in Rodale's Fitness House kitchen. Address: Author of *The Rodale Cookbook*.

955. Bates, Cynthia; Shurtleff, William. 1977. *Tempeh*. Summertown, Tennessee: The Farm. 7 p. Undated. Unpublished manuscript.

• **Summary:** Contents: Introduction. Making tempeh at home

(from whole soybeans or dehulled, cracked soybeans). Good tempeh, immature tempeh, and inedible tempeh. Favorite tempeh recipes: Deep-fried tempeh. Pan-fried tempeh. Tempeh chips. Tempeh burger. Tempeh pizza. Tempeh in sauces. Tempeh in salads. Tempeh in soups or casseroles. Feeding the larger self. Nutritional value of soybeans.

This document was written by the authors when Shurtleff and Aoyagi were visiting The Farm in early 1977. Address: Summertown, Tennessee.

956. Cahill, Tilda. 1977. *The best of South African vegetarian cooking: 500 choice tested recipes*. Cape Town, South Africa: Hollandsch Afrikaansche Uitgevers Maatschappij (HAUM). ix + 116 p. Index. 23 cm.

• **Summary:** The chapter titled “Dried Legumes” (p. 28-31) states: “Of all legumes *soya* beans are the most important. Their protein quality is such that they have been described as ‘the meat that grows on vines’ and as ‘the meat without bones.’ Analysis shows that essential amino acids are there in almost optimum proportions. Unfortunately merely cooked on their own, they are not really very palatable. However there are many ways of preparing them so as to render them quite delicious. One of the simplest and most nutritious ways of using this commodity is in the form of soya bean flour, which can be added to main dishes, soups, sauces, bread, scones and rolls.” Soy-related recipes include: Soya and nut patties (with soya flour, p. 30). Soya bean roast with bread stuffing (with cooked soya beans). Soya bean savoury (with cooked soya beans). Address: South Africa.

957. Chen, Philip S. 1977. *The joy of being a vegetarian*. Mountain View, California, Omaha, Nebraska, and Oshawa, Ontario: Pacific Press Publishing Association. 127 p. 22 cm. [81 ref]

• **Summary:** Contents: About the author (a 1-page autobiographical sketch). Preface. 1. Vegetarianism, form fad to favor. 2. Food for philosophers. 3. Is man carnivorous. 4. Food for champions. 5. Mineral content of animal and vegetable foods. 6. Roughage and health. 7. The number one killer. 8. How wholesome is our meat? 9. What else is wrong with meat eating? 10. Animal protein versus vegetable protein. 11. The wise abstainers. 12. The joys of being a vegetarian. 13. The problem of animal waste. 14. The coming food crisis. 15. The soybean—A vegetarian's best friend. 16. Selected vegetarian recipes (using commercial meat substitutes or analogs). 17. Selected recipes (using homemade gluten and tofu). 18. Selected recipes (using natural, readily available ingredients).

Chapter 1 begins: “Vegetarianism in America used to be the butt of ridicule. But now the situation has changed. The laughter that once greeted mention of a vegetarian diet has died, thanks to discoveries made in biochemistry and nutrition during the last fifty years.” It concludes: “Dr. Jean Mayer, professor of nutrition at Harvard University School

of Public Health [in Boston, Massachusetts] and chairman of the 1969 White House Conference on Food, Nutrition, and Health, says that vegetarianism has three things going for it all at once—economics, health, and compassion.”

Chapter 15, titled “The soybean—A vegetarian’s best friend,” begins by stating: “The soybean is a food without peer...” It discusses: Efficiency of soy protein (and supplementary value), soybean oil, minerals, vitamins, and simulated meats. Address: Camarillo, California.

958. Farm Foods. 1977. Tempeh (Leaflet). Summertown, Tennessee. 2 p. Revised 1978.

• **Summary:** Contents: Introduction. Making tempeh at home: equipment and process (with a description of good, immature, and inedible tempeh). Preserving tempeh. Questions and answers. Four brief recipes: Tempeh burger. Deep-fried tempeh. Tempeh pizza. Cubed fried tempeh. Using whole soybeans.

The border around the front page is single stalks of bamboo. Around the back page is a woven bamboo colander. Contains 9 photos and a line drawing of a five-dollar incubator for tempeh. Address: 156 Drakes Lane, Summertown, Tennessee 38483.

959. Farm, The. 1977. Vegetarian prenatal nutrition and high protein recipes. Summertown, Tennessee: The Book Publishing Co. 14 p. 22 cm.

• **Summary:** Printed with green ink on white paper. On the cover is a photo showing a field of soybeans, in neat rows free of weeds.

Contents: Introduction (“The Farm is a large longhair spiritual community of 1100 people in Tennessee... We are all complete vegetarians [vegans]. Ours is a soy-based vegetarian diet). Taking care of your self while you’re pregnant (by Margaret, Nutritionist for the Farm, incl. iron, calcium, table of nutritional value of soybeans). Recipes: Basic cooked soybeans. Soybeans and tortillas. Soyburgers. Soybean stroganoff. Soy mayonnaise. Soy fritters. Soy yogurt. Soy milk (homemade using soybeans or soy flour) Tofu (Bean curd, homemade using whole soybeans and nigari or epsom salts). Soy cheese [tofu]. Soy flour basic salad and sandwich spread. Seasoned sandwich spread. Hi-protein soy bread (incl. soy milk and soy flour). Soy souffle (incl. soy flour and nutritional yeast). Soy “nuts” (dry roasted or deep fried). T.V.P. Textured vegetable protein. T.V.P. tortilla filling. Spaghetti sauce with T.V.P. Sloppy joes. Good tasting nutritional yeast (A good source of B vitamins. Distributed by The Good Tasting Yeast Company, c/o The Farm). Melty nutritional yeast “cheese.” A word about B12 [vitamin B-12] (“If you are a complete vegetarian, eating only plant foods, you will need to supplement vitamin B12”).

People at The Farm eat “soy ice cream” which is mentioned in the introduction, but no recipe is given. Address: The Farm, Summertown, Tennessee.

960. Farthing, Bill. 1977. Odiyan country cookbook. Emeryville, California: Dharma. xii + 211 p. Illust. by Denise Anderson. Photos by Peter Ogilvie. Index. 20 cm.

• **Summary:** This lacto-ovo vegetarian cookbook is dedicated to Tarthang Tulku, Rimpoche, a Tibetan Buddhist teacher who is head of the Nyingma Institute, founded in 1969 in Berkeley, California, and of Odiyan, the Institute’s country retreat center being built on a redwood forested mountain above the Pacific Ocean in northwestern Sonoma County, California. Odiyan is a transliteration of the Sanskrit name for the birthplace of Padmasambhava the great teacher who brought Buddhism to Tibet.

The Foreword notes: “Although our chickens produce many eggs, we are essentially on a correct balance of grains and beans or soy-dairy products to provide protein.” A chapter titled “Home-Made Proteins” (p. 112-19) includes various soy-related recipes: Homemade soymilk. Homemade tofu. Kinugoshi. Tofu-nut butter (with ground walnuts, peanuts, almonds, or sesame seeds). Tofu and stir-fried vegetables. Sprouted soybean puree. A large photo shows community scale tofu-making equipment plus the observation: “If you enjoyed making your own bread, then you may find the soy-dairy a very rewarding aspect of cooking to explore.”

Other soy-related recipes include: Soy-bean patties (p. 95). Miso and tahini spread (p. 130). Soymilk dressing (p. 131). Soy carob milk (p. 196). Soymilk lassi (p. 197). Nutmilk (made with 2 cups soymilk plus ½ cup almonds, walnuts, or cashews). Address: California.

961. Heide, Manfred. 1977. Vegetarische Ernaehrung: 193 Rezeptvorschlaege und Speiseplaene fuer ein Vierteljahr [Vegetarian nutrition and food: 193 recipe suggestions and meal plans for a quarter of a year]. Stuttgart, West Germany: Paracelsus Verlag. 133 p. Illust. (some color). Index. 24 cm. [13 ref. Ger]

• **Summary:** Chapter V, titled “Soya, and important food,” discusses the nutritional value of soya and various soyfoods including soy oil, soy lecithin, soymilk, soy flour (and its use in diabetic diets), whole soybeans, textured soy protein (*Soja-Pflanzenfleisch*), soy sprouts, “We have every reason to incorporate soya into our diets!” Soya is so versatile. The introduction of soya into our kitchens can serve our health and keep our fitness for work. Soy-related recipes include: How to cook whole soybeans. How to make soy flour at home. How to sprout soybeans. Soy sprout salad. Soy sprouts with soy noodles and vegetables.

In other parts of the book, textured soy flour (*Sojafleisch*) is served with rice. Soy flour can be added to soups and sauces.

One half-page ad titled “No meal without protein” is run by Henselwerk GmbH, 7031 Magstadt bei Stuttgart. It states that Henselwerk in Magstadt is the pioneer

company in processing soybeans. The company's products include: Hensel Vollsoja [Hensel whole soy flour], Hensel Soja fettarm [low-fat soy flour], Hensel Soja-Kost nach Hackfleischart [textured soy protein granules], Hensel Soja-Fleisch in Trockenwuerfeln [textured soy protein cubes], Hensel Soja-Flocken (whole soy flakes), Hensel Kleine gruene Sojabohnen zum Keimen (small green soybeans for sprouting).

A full-page ad titled "For your healthy day" is run by granoVita Soja-Kost. The 8 soy products shown are sold in Reform Houses. All but the first is sold in a can. Soja-Vita (*Fertig gewuerzte Bratlings-Mischung*). Pasta chuta Bolognese. Koletts (Cutlets). Soja-Goulasch (Soy Goulash in Tomato Sauce). Soja-Curry (Soya Meat in Curry Sauce). Sojamilch (Soy milk). Soja-zart. Soja Wuerstchen (Soy Sausages). The author was born in 1934. Address: Germany.

962. Mote, Frederick W. 1977. Yüan and Ming. In: K.C. Chang, ed. 1977. *Food in Chinese Culture*. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 193-257. [38 ref]

• **Summary:** The Yuan (Mongol) dynasty (when China was under alien Mongol rule) lasted from +1271 to 1368. The Ming dynasty (when China was again ruled by Chinese) lasted from +1368 to 1644. In 1644 the Ming fell to the bandit Li Tzu-ch'eng, and Manchu invaders from the north [Manchuria] captured Peking, then soon conquered the rest of China—ushering in the Ch'ing dynasty (1644-1912). Note: The Ming period is one of the great eras of orderly government and social stability in human history. A population averaging around 100 million people lived during 276 years in comparative peace.

Page 212 notes that the growth of the palace eunuch staff is an important feature of early Ming government. The *Huang Ming tsu-hsün-lu* (Ancestral Admonitions), issued first in 1381 during the reign of the Ming founder, stipulated that separate bureaus within the palace eunuch staff be designated. The imperial wine bureau oversaw the production of wines, soybean meal, tofu, etc.

Page 200 notes that during this period "consumption of meat was very low and seems to have remained stable at low levels for many centuries... Because China also used virtually no dairy products, to maintain nutrition they had to supply protein, calcium, fats, and vitamins in many ways quite different from those our society employs. Vegetables, in one way or another, supplied all of those things. The soybean undoubtedly was the most important diet adjunct, being richer in protein than equivalent weights of red meat, richer in digestible calcium than equivalent amounts of milk, and also being an important source of oil and certain vitamins. Excellent cooking oils also were made from sesame seed, rape seed, and other plant materials (*T'ien-kung k'ai wu*, trans. by Sun and Sun, 1966, p. 215-21)."

Pages 240-41 note, under "Special ingredients: The

Japanese specialist in the history of Chinese food and eating, Shinoda Osamu," has remarked that "Traditional China's diet was strikingly different from the Japanese in two respects: the consumption of oils and fats was four or five times higher in China, and everyday cooking demanded more basic materials. The things required to keep an ordinary kitchen going day by day in Yüan and Ming times are sometimes enumerated in the entertainment literature, encapsulated in the formula of 'the seven things.' Shinoda refers to 'Yüan drama' for one enumeration of those, probably having in mind the line spoken by a busy housewife: 'From the moment I get up in the morning, I'm busy with the seven things—fuel, rice, oil, salt, soy sauce, vinegar, and tea' (*Sanshih chung*, p. 261)."

Also discusses: Peanuts (p. 198). Notes that during the last century and a half of the Ming period, from roughly 1500 to 1650 a number of important new crops entered China: Maize, sweet potatoes, peanuts, and tobacco. Vegetarianism (p. 221-25, 242). At private ceremonial banquets, vegetarian foods resembling forbidden meat dishes were served.

Pages 201 states: "Fish were commonly farmed in the ponds, regularly harvested, and sold live in the markets." However no mention is made of soybeans being fed to the fish. Address: Prof. of East Asian Studies, Princeton Univ., Princeton, New Jersey 08540. Phone: 609-452-4284.

963. *SoyaScan Notes*. 1977. Chronology of the early years of Legume, run by Gary Barat and Dyanne Chandri Speer Barat, through Dec. 1983. 27 Oct. 1988. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Gary is one of the founders of an early hippie commune named Huggs, located on 2,000 acres outside Burlington, Vermont. They rented it for \$1 a year. He lives there (in an Indian tepee for a year) and works on their co-operative organic farm. He also learned carpentry and cabinet making. They sold their crops at a fruit and vegetable stand. In 1968 he becomes a vegetarian for moral reasons.

1972-77. The farmer who owned the Vermont land died and his heirs wanted the community off the land. Gary returned to New York. There he worked on and off as a carpenter. In 1971 he founded a company named "Longest Pillow in the World" which markets pillow furniture at outlets like Bloomingdale's and Macys. He may have invented the term "pillow furniture." He creates and registers the trademark "X-Rated" and a logo. He eventually licenses the rights to Sony.

1977. Gary has open-heart surgery necessitated by an unusual blood infection. While recuperating at his sister's home in Umatilla, Florida, he visits Lecanto Tofu Shop (90 minutes drive away) and first sees tofu being made. Decides he wants to do something with tofu as a right livelihood.

1978-79. Gary recuperates.

1979 June. Gary establishes Nature's Inn Corporation

as a research company. He has no money—it was all gone from the operation and not being able to work for almost 2 years. But now he has a chance to start over with a Right Livelihood occupation. It was a spiritual quest. He uses this company to raise money to study the soyfoods market and create a business plan. Some money came from an investment banker, some from a man who owned an advertising agency. They were not relatives and they didn't stay with the company in the long term.

1979 July. Gary attends the Second Soycrafters Conference in Amherst, Massachusetts. First real involvement with soyfoods. Meets Steve Demos of White Wave, Tom Timmins of New England Soy Dairy, and others. After the conference he starts to compile a business plan for his new company.

1979 August. Gary meets Chandri Dyanne Speer at the Muktananda ashram in South Fallsburg, New York. Born on 3 March 1950, she graduated from Syracuse Univ., worked on a PhD at Boston College, studied in Paris at the Political Science Institute for a year, and then spent a year studying Eastern philosophy and meditation in India. Gary hires her to help him do research on the tofu market. On 23 Aug. 1979 Oak Barat of McNaturals orders books on tofu, miso, and tempeh from New-Age Foods Study Center. Gary and Chandri travel together around the USA researching tofu. After visiting Steve Demos at White Wave in Boulder (who personally prepared them a delicious dinner, featuring 15 tofu dishes, at his home) they decide at the Boulderado Hotel that they will make finished tofu products—not plain tofu. In California, they also visit Larry Needleman (their guide in California), Ray Nagai (who convinces them not to make tofu and not to own a factory), Bob Gerner of Gilman Street Gourmet in Berkeley (they loved and were inspired by the tofu burgers he sold at his Deli), and William Shurtleff (Dec. 18-21). At this point, their basic concept is to create a fast-food restaurant serving a variety of tofu dishes, with a traditional tofu shop in the restaurant, clearly visible behind a large glass window. Then on to Japan to study tofu there—with most of the expenses paid by Sony. They eventually collect 500 pages of research on the industry.

1980 May. Return to New York City and start baking Whipped Tofu Mousse Pie (their very first product), Tofu Muffins, and Tofu Spinach Quiche in their apartment. They sell them throughout the summer from a booth at street fairs in New York City both as a source of income and for market research to see which products were well accepted. Lasagna in large trays (unpacked) was also sold at this time.

1980 June. Dissolve Natures Inn Corp. and start doing business as Legume. A Tempeh Chili product is being planned. Tempeh Cutlets soon follow, but neither of these are ever packaged or labeled. The muffins, quiches, and no-creme pies were the first products to be packaged and labeled; each is kosher. They made the first two products, mostly by hand themselves, in a large bakery they rented for

the summer in the Crown Heights section of Brooklyn. The baker, impressed by their business plan, invested \$19,500 in the company and let them use his bakery after his daily baking was done. Limited freezer space in this bakery was a major problem.

1981 Jan. 23. Incorporate Legume in New York, then that month move to Bloomfield Bakery, a larger facility in Verona, New Jersey (which has freezer space), ending up right next to Celentano. Meet Ira Shapiro, a food broker who represents major low-calorie frozen food lines. His son, Robert Shapiro, invests \$10,000 in the company and becomes sales manager. At about this time, when they were trying to raise money, their basic concept changed from being a restaurant to being a nationwide marketer of prepared tofu dishes. The restaurant business was seen as too risky and neither Gary nor Chandri had any experience in it. Investors were scared of putting money into a restaurant.

1981 March. Legume publishes a leaflet with the slogan “Who says rich, creamy foods have to be high in cholesterol & calories.” Their Tofu Country Pies, Tofu-Bran Muffins, Tofu No-Cream Pies, and Cakes now start to be shipped nationwide, frozen, through a network of health food distributors.

1981 May. Celentano starts co-packing Legume's Italian-style entrees, beginning with Tofu Lasagna, followed by Tofu Ravioli. The Tofu Lasagna, a frozen entree, has a crack-and-peel label on an all-white box. It bears the new Legume logo on the front but no food illustration yet. It debuted at a food show in Soho. Gary and Chandri are still making their baked goods by hand in the bakery. Since May 1980 Gary and Chandri have realized that they prefer to let another company make their products, so that they can focus on marketing. They are one of the first soyfoods companies to come to this key realization.

1981 June. Gary and Chandri are married in New Jersey.

1981 Sept. Legume runs its first magazine ad (in *Whole Foods*, p. 56), stating that Legume now markets 3 Legume-brand snacks (Tofu muffins, “No-creme” pies, and tofu cakes), and 3 entrees (Tofu lasagna, Tofu ravioli, and Tofu country pies). The company's slogan is “Delicious protein meals and snacks.”

1982 Feb. (winter). The earliest document seen on Legume appears in *Soyfoods* magazine (p. 56). Their products: Tofu Bran Muffins (Raisin or Blueberry), Tofu No-Creme Pie (Strawberry, Coconut, Banana), Tofu Cake (Carrot or Banana), Tofu Country Pie (Spinach or Broccoli), Tofu Ravioli, Tofu Lasagna.

1982 July. Richard Leviton visits Legume and publishes article in *Soyfoods* magazine (“Touring for Soyfoods,” p. 32, 41). Products now include tofu pizza, lasagna, ravioli, vegetable pies, muffins, cakes, and cheesecakes. Company is now starting to phase out its line of baked products.

1982 Oct. Legume raises \$200,000, half through a public sale of 1,000,000 shares of common stock at a price

of \$0.10 per share, and half a loan, to promote its tofu frozen entrees. This is the first of the new wave of tofu companies to become publicly owned. Now, with the help of food broker and board member Ira Shapiro, they take aim at supermarkets.

1983 Jan. 24. Article on Legume in the *Wall Street Journal* titled “Company finds a niche selling frozen foods made with tofu.” Includes a good history of the company, whose sales now “are only \$40,000 a month, \$20,000 less than the break-even point.”

1983 July. Gary Barat takes the lead in forming the Soyfoods Association of America, a new organization to represent larger companies and to break away from SANA.

1983 Aug. Legumes raises \$600,000 more, 2/3 through sale of common stock to 34 people in a private transaction, and 1/3 from a loan.

1983 Dec. Six new Italian-style tofu entrees, sold frozen, introduced in stylish boxes. Line of “Legume Light & Natural Tofu Entrees” includes Stuffed Shells Provencale, Tofu Tetrazzini, Sesame-Ginger Stir-Fry, Tofu Bourguignon, and Cannelloni Florentine. Each contains less than 300 calories.

1984 Feb. The company borrowed \$200,000 from two parties, one of whom, Vincent Galano, is a principal stockholder of the company.

Note: This is the earliest document seen (Sept. 2014) concerning the history of Legume, Inc.

964. Takai Seisakusho. 1977. Takai Seisakusho no kikai [Takai tofu production equipment leaflets (Portfolio)]. Takai Manufacturing Co., 1-1 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan: Takai Seisakusho. 25 inserts. [Jap]

• **Summary:** William Shurtleff contacted Takai Seisakusho, the largest and oldest manufacturer of tofu equipment in Japan, and asked if he could place an order for Farm Foods in San Rafael. Wataru Takai said that all the information about his equipment was on single-sheet color leaflets printed on both sides in Japanese. They agreed that Takai needed an English-language catalog of tofu equipment, the first such catalog ever to be created. The following glossy color leaflets (most numbered, all undated; each 25.5 x 18 cm, and printed with black and one color of ink on glossy white paper) were given to Shurtleff to use as the basis for his work: 1. Grinders. 2. To-100 system. 3. TM-100 system. 4. Boilers. 5. Mini-Star and other complete systems. 9. Hydraulic press. 10. Jack press, forming box table, and modern forming box. 11. Pressure cookers. 12. Tandem pressure cookers, and whole modern system. 13. Automated yaki-dofu broiler. 15. Three metal sinks, metal curding vat, tofu cutter, tofu forming box, silken tofu box and cutter. 16. Deep mixing plate, simple lever press. 17. Ganmodoki mixing machine. Draining racks. 18. Mechanized deep fryers. 20. Two-chamber manual deep-fryer. 24. Rotary feeder-to move soybeans. 28. Pump. 30. Mechanized tofu

press. 32. Case washer. 33. Continuous roller extractors (4 models). 35. Mechanized soymilk maker. 36. Mechanized soybean soaker and washer. 37. Mechanized tofu cooling tank. 38. Automated TGS-2 whole system. 39. Automated whole system. 40. Automated TGS whole systems (Nos. 1-4 and 10). 134. Automated tofu factory TGS 7-9.

Unnumbered leaflets: TM-100 whole system and other equipment (blue). Micro mini-plant TGS-4 (green). Order form. Address: Ishikawa-ken, Japan.

965. White, Beverly. 1977. *Bean cuisine. A culinary guide for the ecogourmet.* Boston, Massachusetts: Beacon Press. xv + 142 p. Illust. by Julie Maas. Index. 21 cm.

• **Summary:** Contents: Introduction. 1. Becoming a bean cook. 2. Bean soups. 3. Bean salads. 4. Bean sandwiches, spreads, and such. 5. Stovetop beanpots. 6. Oven beanpots. 7. Feasts for special occasions. Dried legume glossary.

Contains good information about pressure cookers and pressure cooking beans (p. 6-10, including soybeans). Soy-related recipes include: Soy sprouts (p. 13). Basic tofu (p. 14). Bean on bean soup (p. 18). Tofu mayonnaise (p. 27). Apple bean sprout salad (with tofu dressing, p. 39). Carrot salad with tofu (p. 40). Soy joy salad (p. 48). Amarillo taco (with cooked soybeans, p. 50). Soy sandwiches (p. 57-58). Soyburgers supreme (p. 58-59). USA paté (p. 60). Soybeans creole (p. 85). Hearthside baked soybeans (p. 99). Vegetable medley (with soybeans, p. 110). Miso shiru soup (p. 126). Soy cucumber salad-sunomono (with soy sauce, p. 126). Vegetable sukiyaki (with tofu and soy sauce, p. 127). Basics (p. 136).

Soybean sprouts should be ½ to 1 inch long; they need to be parboiled for 10 minutes before use in salads. Freshen old tofu by parboiling for 2-3 minutes in a pot of boiling water.

966. **Product Name:** [GranoVita “Cutlets”].

**Foreign Name:** GranoVita Koletts.

**Manufacturer’s Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1977?

**Wt/Vol., Packaging, Price:** 400 gm can wholesales for DM 6.

**How Stored:** Shelf stable.

Manufacturer's catalog. 1981. May 1. DE-VAU-GE Sortiments-Preisliste. 4 p.

968. Edwards, R.A. 1978. Social and legislative constraints [on soy protein foods]: The Australian situation. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 12-13.

• **Summary:** There are somewhat less than 200,000 vegetarians in Australia, mostly Seventh-day Adventists, Hindus, and Jains. Their dietary needs have been met for the last 40 years by the Sanitarium Health Food Company, which is owned by the Adventist Church. Their meatlike products include Nutmeat, Rediburgers, Vegecuts, and Vegelinks. Initially the protein in these foods came exclusively from nuts, then wheat gluten was added, and more recently they have also included low-fat soy flour imported from the USA. The company imports texturized soy protein products and also makes their own, but they have found that their traditional untexturized vegetable protein foods outsell TVP by a factor of 50 to 1. Sanitarium appears to be the only supplier of non-meat protein foods to Australian and New Zealand consumers, presumably because the market is not big enough to attract a second company of the type.

As far as the author knows, the only Australian manufacturer of TVP other than Sanitarium is Griffith Laboratories, which makes an unflavored TVP for the very large and lucrative pet food market; they also make a low-fat soy flour.

In Australia, heart disease is the most serious disease, accounting for more than 30% of all deaths. With health professionals advocating a reduction in animal products, total

fats, saturated fats, and cholesterol, and with the increasing awareness during the last few years of the relation between nutrition and health, "it would seem to me to be an opportune time to give the marketing of soy bean products a deeper and more searching examination than the superficial approaches that have been taken in the past." Address: Prof., School of Food Technology, Univ. of New South Wales, P.O. Box 1, Kensington 2033, Australia.

969. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Alternatives (Miami, Florida)*. 2(1):1. Jan.

• **Summary:** This full-page black-and-white ad lists the company's soy products, iced herbal beverages, and baked goods & pastries. Soy products include: Baked tofu, Marinated tofu, Caraway tofu, Tofu chip dip, Soy melk (sweetened & carob), Soy shakes (carob, vanilla & strawberry), Soyogurt (a cultured soy product), Wholegrain soy burgers. Baked goods include: Tofu cheesecakes, Carob maple swirl, Mary's cream cake, Mary's devil's food cream cake—"and more to come."

On the top half of the ad is a large circular logo featuring a stylized swan, with two large wings symmetrical about a vertical axis and an arched neck on the left side. The other half of the arch is drawn in to form a heart, inside of which is written "Because we love you." Across the inside top are the large words "Swan Foods." A full-color rainbow arches below them and over the swan. At the top center, between the words "Swan Foods," are the smaller words "Nature's Finest" written one below the other; between them is an infinity sign.

Across the bottom of the ad is written: "Every Swan Soybean Product contains all 8 essential amino acids (which are necessary for a balanced diet) and have no cholesterol. Available in health and natural food stores. Retailers: Swan Quality Products are distributed by your local Natural Foods Distributor, or contact Swan Food Corp., 5758½ Bird Rd., Miami, FL 33155. In Miami enjoy all Swan Products at Swan's Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd."

Note 1. This is the earliest ad seen for soyfoods in a U.S. magazine or periodical by one of the new generation of soyfoods manufacturers.

Note 2. In 1978 *Alternatives* (a small-circulation counter-culture magazine) was located at P.O. Box 330139, Miami, Florida 33133. Phone: 305-856-6975. Ad inquiries: 305-856-2473. Editor & publisher: Chik Shank. West coast contact: Steven M. Haines: 415-841-9217.

Note 3. This is the earliest known Swan Foods' ad published in *Alternatives* magazine—which began publication in August 1976. In May 1998 Jeanne Janson of Coral Gables (near Miami) checked every issue!

This full-page ad also appeared in the July/Aug. 1978 issue (p. 49) of this magazine. A half-page version of this ad appeared in the March, April (p. 45), May (p. 45, 49), June,

• **Summary:** Contents: Introduction. Fermented soya bean products: Soya sauce (manufacture of 'thin' (dilute) soya sauce, manufacture of 'thick' (viscous) soya sauce, microbiology of Malaysian soya sauce, stability of the product), tempeh, tau cheo (thick paste-like sauce), tao si (fermented black soybeans). Non-fermented soya bean products: Soya bean sprouts, tofu (semi-firm curd), tofu fah (soft curd), tow kwa (firm curd), tin chok (dried, flat sheets [yuba]), fu chok (dried, rope-like [dried yuba sticks]), tofu pok (deep-fried curd [tofu cubes]), chak tie (vegetarian [yuba] sausage), soya bean milk (tau cheong), meat analogues (soya flour is shaped into desired forms by hand). Nutritional data. Conclusion. Address: Universiti Pertanian Malaysia, Serdang.

971. **Product Name:** Seitan Burger (Ready to Eat) [Tahini & Lemon Sauce, or Ketchup].

**Manufacturer's Name:** Seitan Mama's.

**Manufacturer's Address:** Trapp Ave., Coconut Grove, Florida.

**Date of Introduction:** 1978 February.

**Ingredients:** Seitan burgers (round), whole wheat buns with sesame seeds, and sauce (no lettuce, tomatoes, pickles, etc.).

**How Stored:** Refrigerated.

**New Product–Documentation:** Jan Belleme. 1990. East West. Jan. p. 62-69. "The Seitan Alternative." "My first business venture earned me the nickname 'Seitan Mama.' In 1978 I started making and delivering seitan, hummus, and vegetable sandwiches to natural foods outlets in Coconut Grove, Florida. It was quickly apparent that seitan, or 'wheatmeat,' was the way to go. In no time I was selling 360 seitan 'burgers' a week in just three shops in this one Miami suburb. The growth rate chart was nearly vertical, and it seemed to have endless potential."

Talk with John Belleme. 1992. July 1. In 1974 John first tasted seitan at the Spiral Restaurant in Miami, Florida; he thought it was a really unique and tasty food. Shortly after that, he began to make seitan at home. He went to Boston, Massachusetts, in 1976 and there he met his future wife, Jan. They planned to meet in Miami, where Jan would start a little seitan business. John moved back to Miami in 1977, and Jan arrived there on 10 January 1978. John was managing the Oak Feed Store for Sandy Pukel. Jan started Seitan Mama's, and made seitan in the little cottage which

was their home. She used the seitan in burgers, which were round pieces of seitan on a whole wheat bun. They were launched in Feb. 1978 and sold with two sauces. The product was "phenomenally successful."

The business was closely related to Oak Feed Store since John bought all of her flour through the store and she initially sold about 80% of her burgers to Oak Feed. After a while she was selling 50-70% of her burgers to other natural and health food stores located in Dade County, Florida, within several miles of Oak Feed Store.
